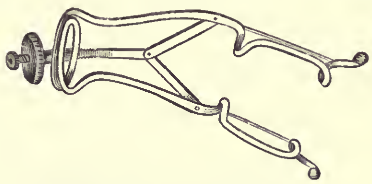
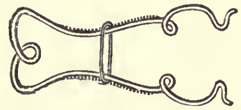
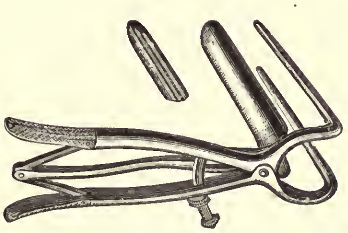
more prisms, and a telescope. The collimator is a narrow vertical slit formed by the adjustment of two metallic jaws at the principal focus of a convex lens which so condenses the divergent rays of light received through the slit as to cause them to enter the prisms as a beam. This prism, or series of prisms, is so arranged that the edges are parallel to the slit ; and thus a spectrum is produced which it is the function of the telescope to magnify. [*a*, 49.]—**Direct-vision s.** A s. made by combining prisms of crown glass with one or more of flint glass. The edges of the prisms of crown and of flint glass are in opposite directions. The dispersion is given by the flint and the refraction is overcome by the crown glass prisms, so that the spectrum appears directly in the line of the source of light, instead of being bent as with a single prism. Used largely in the formation of spectral oculars or microspectroscopes. [J.]



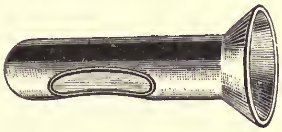
SPECTRUM (Lat.), n. n. Spe^{2}kt'ru^{3}m(ru^{4}m). From *specere*, to look at. Fr., *spectre.* Ger., *S.* 1. A band consisting of a definite succession of colors into which a beam of white light is decomposed when it is passed through a prism or a diffraction grating. Its formation depends on the principle that the different-colored rays of which a ray of white light is composed are unequally refrangible and hence, on undergoing refraction, occupy different positions and are no longer blended together. Their order, beginning with the less refrangible, is red, orange, yellow, green, blue, indigo, and violet. [B.] 2. Of any specific substance, its absorption s. [*a*, 48.]—**Absorption s.** A s. crossed with dark bands produced by the specific absorptive action of gases, liquids, or solutions of solids or translucent or transparent colored solids, such as monazite, on a beam of white light made to pass through them before falling upon the prism or other refracting medium. The position of the bands, which are called absorption bands, is constant for the same substance, but the breadth and definition of the bands depend to some extent on the degree of concentration of the absorbing medium. [B ; J.]—**Continuous s.** A s. uninterrupted by dark or bright lines crossing it. [B.]—**Diffraction s., Grating s.** Ger., *Gitterspectrum.* A s. produced by passing light through a grating (*q. v.*, 3d def.). [B.]—**Solar s.** Fr., *spectre solaire.* Ger., *Sonnenspectrum.* The s. afforded by the refraction of a beam of sunlight. Under ordinary circumstances this is continuous, but when solar light is passed through a fine slit the s. is crossed by numerous dark lines called *Fraunhofer's lines.* [B.]



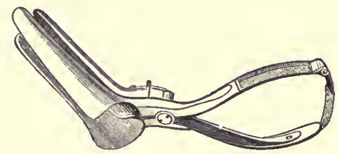
SPECULARIA (Lat.), n. f. Spe^{2}k-u^{2}l(u^{4}l)-a(a^3)'ri^2-a^3. From *speculum* (*q. v.*). Fr., *spéculaire.* Ger., *Spiegelglocke.* A genus of the *Campanulaceæ.* [*a*. 35.]—**S. speculum.** Fr., *miroir de Vénus, doucette, mirette.* Ger., *Ackerviole, Venusspiegel.* Lady's- (or Venus's-) looking-glass ; an astringent species rarely used. The young shoots and the roots are eaten. [*a*, 35.]



SPECULUM (Lat.), n. n. Spe^{2}k'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). From *specere*, to look at. Fr., *spéculum.* Ger., *S.*, *Spekulum, Spiegel.* 1. An instrument by means of which internal parts of the body may be observed or examined. 2. A tendinous structure. [E.] 3. See SÆPTUM *lucidum.*—**Ashton's fenestrated anal s.** A cylindrical s. with a reflecting internal surface and a fenestra for the entire length. [E.]—**Auerbach's s.** An ear s. with a biconcave lens fixed at its entrance, for producing a magnified image of the membrana tympani. [F.]—**Bath s.** A vaginal s. to be worn during a bath, to admit water into the vagina.—**Bivalve s.** A s. having two hinged blades that may be separated after its introduction. [*a*. 34.]—**Bonafont's nasal s.** A bivalve s. with solid blades, the joint near the middle of the blades, and a screw for opening and closing them. [E.]—**Cervical s.** See *Uterine s.*—**Cusco's s.** A bivalve uterine s., the segments articulating at their outer extremities, and each segment having fixed handles that hold the s. open by means of a screw and nut extending from one to the other. [*a*, 34.]—**Ear s.** A conical tube or valvular s. having a calibre sufficiently small to permit its introduction into the external auditory canal. [*a*, 34.]—**Elsberg's s.** A three-bladed s., the blades being straight and opening and closing with a handle like a forceps. [E.]—**Emmet's s.** Emmet's perineal retractor.—**Erhard's ear s.** A funnel-shaped metal s., blackened on the inside, the flare of the funnel having a generally rounded convexity. [F.]—**Fenestrated s.** A metal, glass, porcelain, or vulcanite cylinder having varying diameters, and a fenestra cut along a portion of one side of the cylinder so as to expose the membrane. [*a*, 34.]—**Fergusson's s.** A glass cylindrical vaginal s. silvered like a mirror.—**Foveaux's lid s.** A silver s. to hold the eyelids open ; it is reversible and can be used for either eye. [F.]—**Gross's oral s.** A heavy forceps with blades deeply notched on the back for holding the teeth. When it is placed between the teeth the jaws are separated by pressing the handles together. [E.]—**Gruber's ear s.** A metal s. highly polished within and slightly ovoid in shape, so that its transverse section corresponds to that of the auditory canal. [F.]—**Harnblasens'** (Ger.). See CYSTOSCOPE.—**Kelsey's rectal s.** A bivalve s. with a large fenestra in one blade on the same principle as Cusco's s. [E.]—**Kramer's aural s.** A bivalve dilating s. used only with direct sunlight, and of more use in anterior rhinoscopy than in otoscopy. [F.]—**Larynx s.** See LARYNGOSCOPE.—**Mott and Heister's oral s.** A s. having two strong blades deeply notched on the backs, connected at one end, each by a hinge, to a cross-piece through which a thumb-screw works to open them. [E.]—**Neugebauer's s.** A vaginal s. consisting of two crescentic concave pieces of metal, one of which is narrower than the other ; to be introduced with the concavities of the metallic pieces opposed. [*a*, 34.]—**Noyes's lid s.** A s. consisting of two short limbs working by rack and pinion on a curved aluminium bar. This bar is always placed next the nose, so that the s. is not reversible. It leaves the temporal side quite open and free. [F.]—**Politzer's vulcanite s.** An ear s. shaped like a truncated cone. It is lighter than the polished metal s., and its dark interior serves to render the surface of the membrana tympani more distinct by contrast. [F.]—**Rectal s.** Ger., *Afterspiegel, Mastdarmspiegel.* A s. that may be introduced through the anus and permit examination of the rectum. [*a*. 34.]—**Robert and Collin's nasal s.** A small bivalve s. with non-fenestrated blades. [E.]—**Siegle's pneumatic ear s.** A s. used in the diagnosis of affections of the middle ear. Its wide extremity is closed by an obliquely inserted thin glass plate, and from the side projects a small nipple to which is fastened an India-rubber tube furnished with a small air-bag. By putting a small piece of India-rubber tubing on the end of the s. the instrument can be hermetically fixed in the external meatus. [F.]—**Simrock's nasal s.** A cylindrical s. with a beveled end and flange. [E.]—**Sims's s.** A piece of metal shaped like a modified *w*, the central portion being used as a handle while the extremities are concave on their external surfaces and placed at a slight inward curve from the axis of the handle. [*a*, 34.]—**Skene's urethral s.** A small bivalve s., one blade considerably larger than the other, both ends of the instrument being controlled by a common screw at the middle. [E.]—**S. Helmontii.** See CENTRUM *nerveum.*—**S. lucidum.** See SÆPTUM *lucidum.*—**S. matricis.** A uterine s. Some of the older writers seem to have applied the term to uterine dilators

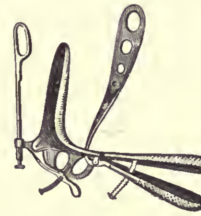


MITTENDORF'S EYE SPECULUM.

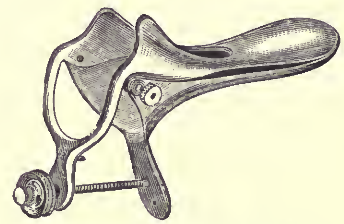


LANDOLT'S EYE SPECULUM.

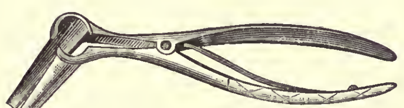
NOYES'S IMPROVED EYE SPECULUM.



NOYES'S PLAIN EYE SPECULUM.

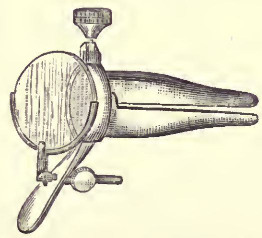


NICAISE'S SPECULUM ANI.



REFLECTING ANAL SPECULUM.

ALSTON'S 3-BLADED RECTAL SPECULUM.



SIMS'S DUCKBILL VAGINAL SPECULUM.

SIMROCK'S AURAL SPECULUM.

BOZEMAN'S VAGINAL SPECULUM.

which could not properly be termed specula. [A. 60.]—**S. Veneris.** See SPECULARIA.—**Thudichum's nasal s.** A bivalve s. made of bent steel wire and having flattened blades attached to the ends. [E.]—**Trivalve s.** A s. having three blades. [α, 34.]—**Trivalve trellis anal s.** A three-bladed anal s. with fenestrated blades arranged at right angles to the handle, which has a hinge arrangement for opening and closing them. [E.]—**Uterine s.** Ger., *Mutterspiegel.* A long slender forceps having narrow, semi-conical blades that may be introduced within the internal os uteri. [α, 34.]—**Vaginal s.** Ger., *Scheidenspiegel.* A s. for introduction into and inspection of the vagina. [α, 34.]—**Wilde's s.** An ear s. made of metal with polished interior, and shaped like a truncated cone. [F.]—**Zaufal's nasal s.** A s. for viewing the naso-pharynx through the nasal cavity; a cylindrical metal or vulcanite tube to be introduced through the anterior naris along the inferior meatus. [F.]

SPECUS (Lat.), n. m., f., and n. Spek(spe^{2}k)'u^{3}s(u^{4}s). Gen., *spec'us.* Lit., a cave; a ventricle of the brain. [K.]

SPEDALSKHED, n. The Norwegian term for leprosy. [α, 34.]

SPEECH, n. Spech. A.-S., *spaec, spec.* Gr., *φωνή.* Lat., *sermo.* Fr., *parole.* Ger., *Sprache.* The faculty of articulate vocal utterance. [α, 48.]—**Echo s.** See ECHOLALIA (1st def.).

SPEEDWELL, n. Sped'we^{2}l. The genus *Veronica.* [α, 35.]

SPEIARZENEI (Ger.), n. Spi'a^{3}rts-e^{2}n-i. An emetic. [A, 315.]

SPEICHE (Ger.), n. Spich^2'e^2. See RADIUS.

SPEICHEL (Ger.), n. Spich^2'e^{2}l. See SALIVA.—**Bauchs'.** See *Pancreatic* JUICE.—**Honigs'.** See MELITOPTYALON.—**S'absonderung.** The secretion of saliva. [K, 16.]—**S'artig.** See SALIVARY.—**S'ausleerend.** See SIALAGOGUE.—**S'ferment.** See PTYALIN.—**S'fluss.** See SALIVATION.—**S'mangel.** See APTYALIA.—**S'mittel.** See SIALAGOGUE.—**S'stoff.** See PTYALIN.—**S'überfluss.** See SALIVATION.—**S'zahnstein.** See SORDES (1st def.).

SPEICHENBEUGER (Ger.), n. Spich^2'e^{2}n-boig-e^{2}r. 1. A flexor arising from the radius. [L.] 2. See *Biceps* FLEXOR *cubiti.*—**S. der Hand.** See FLEXOR *carpi radialis.*

SPEICHENMUSKEL (Ger.), n. Spich^2'e^{2}n-musk-e^{2}l. A muscle attached to the radius. [L.]—**Aeusserer S.** See EXTENSOR *carpi radialis longus.*—**Arms'.** See SUPINATOR *longus.*—**Innerer S.** See FLEXOR *carpi radialis.*—**Kurzer äusserer S.** See EXTENSOR *carpi radialis brevis.*—**Langer äusserer S.** See EXTENSOR *carpi radialis longus.*

SPEICHENSTRECKER (Ger.), n. Spich^2'e^{2}n-stre^{2}k-e^{2}r. An extensor attached to the radius. [L.]—**Kurzer S.** See EXTENSOR *carpi radialis brevis.*—**Langer S.** See EXTENSOR *carpi radialis longus.*

SPEIEN (Ger.), n. Spi'e^{2}n. Vomiting, especially in infants. [K.]

SPEIERLING (Ger.), n. Spi'e^{2}r-li^{2}n^2. See PYRUS *sorbus.*

SPEIREMA (Lat.), n. n. Spir(spe^2-i^{2}r)-em(am)'a^3. Gen., *-em'atos (-atis).* Gr., *σπείρημα* (from *σπειρᾶσθαι,* to be coiled). Fr., *speirème.* Of Wallroth, a spore of a lichen. [α, 35.]

SPEISE (Ger.), n. Spiz'e^2. See ALIMENT.—**Glockens'.** See *Bell* METAL.—**S'brei.** See CHYME.—**S'durchfall, S'fluss.** See *Lienteric* DIARRHŒA.—**S'gang.** See ŒSOPHAGUS.—**S'öl.** Oil used in culinary operations. [B.]—**S'ordnung.** See DIET.

SPEISEND (Ger.), adj. Spiz'e^{2}nd. See ALIMENTARY.

SPEISERÖHRE (Ger.), n. Spiz'e^2-ru^{5}r-e^2. See ŒSOPHAGUS.—**S'neröffnung.** See ŒSOPHAGOTOMY.—**S'nkrampf.** See DYSPHAGIA *spasmodica.*—**S'nloch, S'nschlitz.** See FORAMEN *œsophageum.*—**S'nschnitt.** See ŒSOPHAGOTOMY.

SPEISESAFT (Ger.), n. Spiz'e^2-za^{3}ft. See CHYLE.—**S'behälter, S'behältniss.** See RECEPTACULUM *chyli.*—**S'gang, S'röhre.** See *Thoracic* DUCT.

SPEISUNG (Ger.), n. Spiz'un^2. See ALIMENTATION.

SPEITÄUBLING (Ger.), **SPEITEUFEL** (Ger.), n's. Spi'toib-li^{2}n^2, -toif-e^{2}l. See RUSSULA *emetica.*

SPELT, n. Spe^{2}lt. Gr., *πυρός.* Lat., *spelta, ador.* Ger., *S., Spelz.* The *Triticum spelta* or its grain. [α, 35.]

SPELTER, SPELTERINE, n's. Spe^{2}lt'u^{5}r, -en. Lat., *speltrum.* Commercial zinc. [B.]

SPELZ (Ger.), n. Spe^{2}lts. See SPELT.—**S'blüthe.** A glumaceous flower. [a, 35.]—**S'chen.** See PALEOLA.

SPELZE (Ger.), n. Spe^{2}lts'e^2. A pale or glume. [a, 35.] See also CHAFF (3d def.).

SPENCER SPRINGS, n. Spe^{2}ns'u^{5}r. Mineral springs situated in Tioga County, New York. [A, 363 (a, 21).]

SPERGULA (Lat.), n. f. Spu^{5}rg(spe^{2}rg)'u^{3}l(u^{4}l)-a^3. From *spargere*, to scatter. Fr., *espargoutte, spargoute, speryoule.* Ger., *Spergel, Spark, Spurre.* A genus of caryophyllaceous herbs. The *Spergulæ* are a family including *S., Buda, Telephium, Pharnaceum*, etc. The *Sperguleæ* are a division of the *Paronychieæ.* [a, 35.]—**S. arvensis.** Fr., *espargoutte des champs, spergule, espargoule.* Ger., *Läusegras, Ackerknöterich.* Corn spurrey, toad-flax; a weed found in cultivated fields. One variety is cultivated for fodder, and its seeds are eaten. [a, 35.]

SPERGULARIA (Lat.), n. f. Spu^{5}rg(spe^{2}rg)-u^{3}l(u^{4}l)-a(a^3)'-ri^2-a^3. From *spargere*, to scatter. A genus of the *Spergularieæ*, which are a tribe of the *Paronychieæ.* [a, 35.]—**S. campestris, S. rubra.** Red sandwort, a species found in temperate regions; used in lithiasis. [a, 35.]

SPERM, n. Spu^{5}rm. Gr., σπέρμα (from σπείρειν, to sow). Lat., *sperma.* Ger., *Befruchtungsstoff* (2d def.), *Befruchtungsmasse* (2d def.). 1. See SEMEN (1st def.). 2. In botany, the contents (fovillæ) of pollen-grains and antheridia; of T. J. Parker, the male gamete or spermatozooid. ["Jour. of the Roy. Micr. Soc.," 1890, p. 19; B, 123 (a, 35).]—**S.-mass.** The mass of spermatozooids emitted at one time by one of the tailed *Amphibia* and attached to a spermatophore. [J.]—**S.-morula.** See SPERMOSPHERE.—**S.-nucleus.** See *Spermatic* NUCLEUS.

SPERMA (Lat.), n. n. Spu^{5}rm(spe^{2}rm)'a^3. Gen., *sperm'atos* (*-atis*). Gr., σπέρμα. See SPERM.—**S. ceti** [Netherl. Ph.]. See SPERMACETI.—**S. ranæ, S. ranarum.** See under RANA *esculenta.*—**S. virile.** See SEMEN (1st def.).

SPERMACETI, n. Spu^{5}rm-a^3-set'i^2. Lat., *sperma ceti, cetaceum, album ceti.* Fr., *spermacéti, blanc de baleine, cétine* [Fr. Cod.], *ambre blanc.* Ger., *S., Wallrath.* A soft, unctuous, pearly white, solid substance of crystalline texture, obtained from the *Physeter macrocephalus.* It is devoid of taste, has a slight odor, is inflammable, and dissolves in ether, in chloroform, in carbon bisulphide, and in boiling alcohol. It consists of a mixture of the ethers of various fatty acids, the larger part being made up of cetyl palmitate, although the ethers of stearic, myristic, and lauric acids are also present, with small quantities of lethal, methal, and stethal. [B, 3, 5.] Cf. CETACEUM.—**Ointment of s.** See *Unguentum* CETACEI. —**Prepared s., Saccharated s.** See CETACEUM *præparatum.*—**S. cerate.** See *Ceratum* CETACEI.—**S. ointment.** See *Unguentum* CETACEI.—**S. plaster.** See *Ceratum* CETACEI.

SPERMA CETI (Lat.), n. n. Spu^{5}rm(spe^{2}rm)'a^3 se(ka)'ti(te). Gen., *sperm'atis ceti.* See SPERMACETI.—**Ceratum (seu emplastrum, seu pomatum) spermatis ceti.** See *Ceratum* CETACEI.

SPERMACOCE (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}k(a^{3}k)-os(ok)'-e(a). Gen., *-oc'es.* From σπέρμα, a seed, and ἀκωκή, a point. A genus of rubiaceous plants. The *Spermacoceæ* are an order or tribe of the *Rubiaceæ.* The *Spermacocidæ* are a tribe of the *Coffeæ.* [a, 35.]—**S. alata, S. aspera.** Guiana species used in gonorrhœa. [a, 35.]—**S. ferruginea.** A Brazilian species. The root is used in place of ipecacuanha. [a, 35.]—**S. hirta, S. hispida.** Fr., *s. velu.* Shaggy button (-weed); an East Indian species. The root, which has the taste of sarsaparilla, is used as an alterative, and the juice of the plant as an antidysenteric. The seeds are used as a tonic and aphrodisiac. [a, 35.]—**S. longifolia.** A Guiana species used in gonorrhœa and leucorrhœa. [a, 35.]—**S. poaya.** A Brazilian species used like *S. ferruginea.* [a, 35.]—**S. scabra, S. velu** (Fr.). See *S hispida.*—**S. verticillata.** A South American and West Indian species having properties like those of *S. ferruginea*: used in blennorrhœa. [B, 19, 173, 180 (a, 35).]

SPERMACRASIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}k(a^{3}k)-raz-(ra^{3}s)'i^2-a^3. From σπέρμα, seed, and ἀκρασία, want of power. Fr., *spermacrasie.* See SPERMATORRHŒA.

SPERMAPHORE, n. Spu^{5}rm'a^3-for. Lat., *spermaphorum* (from σπέρμα, seed, and φορεῖν, to bear). Fr., *s.* See PLACENTA (4th def.).

SPERMAPODIUM (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-a^3-pod(po^{2}d)'-i^2-u^{3}m(u^{4}m). From σπέρμα, seed, and πούς, the foot. Fr., *spermapode.* Ger., *Säulchen.* The carpophore of the *Umbelliferæ.* [a, 35.]

SPERMA RANÆ (Lat.), n. n. Spu^{5}rm(spe^{2}rm)'a^3 ran(ra^{3}n)'e-(a^3-e^2). Frog's spawn.—**Aqua spermatis ranæ.** Fr., *eau de frai de grenouille.* A preparation made by distilling frogs' spawn gently over the water-bath and preserving the first third of the distillate. [B, 119 (a, 38).]—**Oleum spermatis ranæ.** Fr., *huile de frai de grenouille.* A preparation made by boiling equal parts of frogs' spawn and olive-oil till the moisture is dissipated, and straining. [B. 119 (a, 38).]

SPERMARY, n. Spu^{5}rm'a^{3}r-i^2. Lat., *spermarium* (from σπέρμα, seed). A male gonad; the organ in which spermatozooids are produced. [B, 28 (a, 27).]

SPERMATACRATIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-a^{3}k-(a^{3}k)-ra(ra^3)-ti(te)'a^3. From σπέρμα, seed, and ἀκράτεια, debility. Fr., *spermatacratie.* See SPERMATORRHŒA.

SPERMATANENERGIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}t-(a^{3}t)-a^{3}n(a^{3}n)-e^{2}n-u^{5}rj(e^{2}rg)-i(e)'a^3. From σπέρμα, seed, and ἀνενεργής, inefficacious. Fr., *spermatanénergie.* Sterility in the male.

SPERMATEMPHRAXIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}t-(a^{3}t)-e^{2}m-fra^{3}x(fra^{3}x)'i^{2}s. Gen., *-phrax'eos* (*-is*). From σπέρμα, seed, and ἔμφραξις, a stoppage. Of Signorini, spermatocele caused by obstruction of the seminiferous tubules. [L, 50 (a, 14).]

SPERMATHECA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^3-the(tha)'ka^3. From σπέρμα, seed, and θήκη, a chest. An organ in which semen is stored. [A, 12.]

SPERMATIAS (Lat.), n. m. Spu^{5}rm(spe^{2}rm)-a(a^3)'shi^2(ti^2)-a^{2}s-(a^{3}s). Gen., *-at'iu* (*-iæ*). Gr., σπερματίας (from σπέρμα, seed). 1. A many-seeded fruit. 2. A plant grown from the seed. [L, 50 (a, 14).]

SPERMATIC, SPERMATICAL, adj's. Spu^{5}rm-a^{3}t'i^{2}k, -i^2-k'l. Gr., σπερματικός (from σπέρμα, seed). Lat., *spermaticus.* Fr., *spermatique.* Ger., *spermatisch.* Pertaining to semen or its elements or to the organs concerned in its production, storage, or discharge. [J; L.]

SPERMATID, n. Spu^{5}rm'a^{3}t-id. See *Seminal* CELL (1st def.).

SPERMATINE, n. Spu^{5}rm'a^{3}t-en. From σπέρμα, seed. Fr., *s.* Ger., *Spermatin.* A peculiar animal matter contained in the semen, said to be related to alkali albumin. [K.]. Cf. SPERMINE.

SPERMATIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)'a^{3}t(a^{3}t)-i^{2}s. Gen., *-at'idos* (*-idis*). Gr., σπερματίς (from σπέρμα, seed). A spermatic vein. [L, 50 (a, 48).]

SPERMATISCHESIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-i^{2}s'-ke^2(ch^{2}e^2)-si^{2}s. Gen., *-es'eos* (*-isch'esis*). See ASPERMATISM (2d def.).

SPERMATISM, n. Spu^{5}rm'a^{3}t-i^{2}z'm. From σπέρμα, seed. Fr., *spermatisme.* The theory that the fœtus is a direct product of the spermatozooid. [K.]

SPERMATISMUS (Lat.), n. m. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-i^{2}z-(i^{2}s)'mu^{3}s(mu^{4}s). Gr., σπερματισμός (from σπέρμα, seed). Fr., *spermatisme.* The emission of semen. [L, 50 (a, 14).]

SPERMATITIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From σπέρμα, seed. See FUNICULITIS.

SPERMATIUM (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-a(a^3)'shi^2(ti^2)-u^{3}m(u^{4}m). From σπερμάτιον, a small seed. Fr., *spermatie.* Ger., *Spermatie.* One of the minute, colorless, unciliated, spore-like bodies or corpuscles, each surrounded by a cell-wall, produced in the floridian *Algæ* in or on variously shaped structures (antheridia), and in lichens and *Fungi* in urn-shaped bodies (spermogones) on antheridial filaments (sterigmata), from which they are detached at maturity. They are in most cases incapable of germinating, but are supposed to fertilize the spores by conjugating with the female cells (trichogynes). They possess no motion except a molecular or Brownian movement. [a, 35.]

SPERMATOBLASTS, n. pl. Spu^{5}rm-a^{3}t'o-bla^{3}sts. From σπέρμα, seed, and βλαστός, a sprout. Fr., *spermatoblastes.* Ger., *Spermatoblasten, Samenständer.* 1. Of Pouchet and Tourneux, certain flattened, polygonal epithelial cells resting upon the hyaline membrane of the seminiferous tubules, supposed to be the seat of formation of the spermatozooids. [a, 15.] 2. Of von Ebner (1872), the separate cells or multinucleated cells arising from a proliferation of the nuclei of the seminal cells. From the nuclei of these s. arise the heads of the spermatozooids, while the middle piece, the tail, and the delicate layer of protoplasm around the head are derived from the protoplasm of the cell-body of the s. [J, 1, 30, 32.]

SPERMATOCELE (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o(o^3)-se(ka)'le(la); in Eng., spu^{5}rm'a^{3}t-o-sel. Gen., *-cel'es.* From σπέρμα, seed, and κήλη, a tumor. 1. A hydrocele containing spermatozooids. [A, 326 (a, 21).] 2. See *Seminal* CYST.

SPERMATOCHORDA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-o(o^3)-ko^{2}rd(ch^{2}o^{2}rd)'a^3. From σπέρμα, seed, and χορδή, a cord. See *Spermatic* CORD.

SPERMATOCLEMMA (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-o(o^3)-kle^{2}m'ma^3. Gen., *-clem'matos* (*-atis*). From σπέρμα, seed, and κλέμμα, a theft. See POLLUTION.

SPERMATOCYST, n. Spu^{5}rm'a^{3}t-o-si^{2}st. From σπέρμα, seed, and κύστις, a bladder. Ger., *Spermatocyste.* 1. See SPERMOSPHERE. 2. In the pl., see *Follicular* CELLS (2d def.).

SPERMATOCYSTIDIUM (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-a^{3}t-(a^{3}t)-o(o^3)-si^{2}st(ku^{6}st)-i^{2}d'i^2-u^{3}m(u^{4}m). From σπέρμα, seed, and κύστις, a bladder. 1. See ANTHERIDIUM (1st def.). 2. Of Hedwig, the anther in phanerogams. [a, 35.]

SPERMATOCYSTIDORRHAGIA (Lat.), n. f. Spu^{5}rm-(spe^{2}rm)''a^{3}t(a^{3}t)-o(o^3)-si^{2}st(ku^{6}st)-i^{2}d-o^{2}r-raj(ra^{3}g)'i^2-a^3. From σπέρμα, seed, κύστις, a bladder, and ῥήγνυσθαι, to break forth. Hæmorrhage from the seminal vesicles.

SPERMATOCYSTITIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)''a^{3}t(a^{3}t)-o(o^3)-si^{2}st(ku^{6}st)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From σπέρμα, seed, and κύστις, a bladder. See GONECYSTITIS.

SPERMATOCYTE, n. Spu^{5}rm'a^{3}t-o-sit. From σπέρμα, seed, and κύτος, a cell. Ger., *Spermatocyt.* 1. The mother cell of a spermatozooid. [a, 35.] See also *Seminal* CELL (1st def.). 2. See SPERMATOBLAST (2d def.).

SPERMATOGEM, n. Spu^{5}rm-a^{3}t'o-je^{2}m. Lat., *spermatogemma* (from σπέρμα, seed, and *gemma*, a bud). Ger., *Spermatogemme.* See SPERMOSPHERE.

SPERMATOGENESIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-o(o^3)-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *-es'eos* (*-gen'esis*). From σπέρμα, seed, and γένεσις, generation. Fr., *spermatogénèse.* Ger., *Spermatogenese.* The production of spermatozooids. [a, 48.]

SPERMATOGONIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-o-(o^3)-go^{2}n-i(e)'a^3. From σπέρμα, seed, and γονεία, generation. Fr., *spermatogonie.* Ger., *Spermatogonie.* See GONEPOIESIS.

SPERMATOGONIUM (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-a^{3}t(a^{3}t)-o(o^3)-gon(go^{2}n)'i^2-u^{3}m(u^{4}m). Fr., *spermatogonie.* Ger., *Spermatogonie, Ursamenzelle.* 1. Of La Valette St.-George, a young seminal cell. [J.] 2. Of Hartog, see SPERMATOSPORE.

SPERMATOID, n. Spu^{5}rm'a^{3}t-oid. Lat., *spermatoidum* (from σπέρμα, seed, and εἶδος, resemblance). See SPERMATOZOOID.

SPERMATOLEPSIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o-(o^3)-le^{2}ps(laps)'i^{2}s. Gen., *-leps'eos (-is).* From *σπέρμα*, seed, and *λῆψις*, a seizure. See POLLUTION.

SPERMATOMERE, n. Spu^{5}rm'a^{2}t-o-mer. From *σπέρμα*, seed, and *μέρος*, a part. Fr., *spermatomère.* Ger., *S.* 1. Of Van Beneden, one of the cells formed in the first section (*Keimzone*) of a seminiferous tubule. 2. Of O. Hertwig, an element which, formed by the segmentation of a spermatogium, has entered the second section (*Wachsthumszone*) of a seminiferous tubule. ["Arch. f. mikr. Anat.," xxxvi, p. 1 (*a*, 32).]

SPERMATOPATHY, n. Spu^{5}rm-a^{2}t-o^{2}p'a^{2}th-i^2. Lat., *spermatopathia* (from *σπέρμα*, seed, and *πάθος*, disease). Fr., *spermatopathie.* Any disease affecting the production or quality of the semen. [L, 50 (*a*, 14).]

SPERMATOPÉ (Fr.), adj. Spe^{2}rm-a^{3}t-o-pa. See GONEPOIETIC.

SPERMATOPHORE, n. Spu^{5}rm-a^{2}t'o-for. From *σπέρμα*, seed, and *φορεῖν*, to bear. Fr., *s.* Ger., *Spermatophor.* 1. The part of a spermospore that remains passive and does not become transformed into spermatoblasts. It may serve as an envelope or carrier of all the spermatozooids developed from the original spermospore. [J, 1, 33.] 2. A semi-transparent, tough substance secreted by the cloacal glands and serving to support a mass of spermatozooids. [J.] 3. In the pl., see *Seminiferous* TUBULES.

SPERMATOPHTHORA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o^{2}f'tho^{2}r-a^3. From *σπέρμα*, seed, and *φθορά*, decay. Fr., *spermatophthore.* Deterioration of the semen. [L, 50 (*a*, 14).]

SPERMATOPHYTA (Lat.), n. n. pl. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o^{2}f'i^{2}t(u^{6}t)-a^3. From *σπέρμα*, seed, and *φυτόν*, a plant. Fr., *spermatophytes.* Phanerogams. [*a*, 35.]

SPERMATOPLANIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o(o^3)-plan(pla^{3}n)'i^2-a^3. From *σπέρμα*, seed, and *πλάνη*, a wandering. Fr., *spermatoplanie.* A supposed metastasis of the semen.

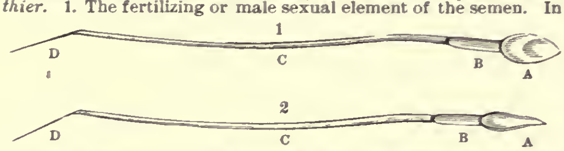
SPERMATOPOETIC, SPERMATOPOIETIC, adj's. Spu^{5}rm-a^{2}t-o-po-e^{2}t'i^{2}k, -poi-e^{2}t'i^{2}k. Lat., *spermatopoeticus.* Fr., *spermatopé.* See GONEPOIETIC.

SPERMATORRHŒA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o^{2}r-re'(ro^2'e^2)-a^3. From *σπέρμα*, seed, and *ῥοία*, a flowing. Fr., *spermatorrhée, flux de sperme, pertes séminales.* Ger., *Samenfluss, Spermatorrhöe.* A morbid condition characterized by too frequent involuntary emissions of semen. [E.]—**S. atonica.** See GONORRHŒA *libidinosa.*

SPERMATOSCHESIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o^{2}s'ke^2(ch^{2}e^2)-si^{2}s. Gen., *-sches'eos (-os'chesis).* From *σπέρμα*, seed, and *σχέσις*, retention. Fr., *spermatoschèse.* See ASPERMATISM (2d def.).

SPERMATOSIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-os'i^{2}s. Gen., *-os'eos (-is).* From *σπέρμα*, seed. Fr., *spermatose.* See GONEPOIESIS.

SPERMATOSOME, n. Spu^{5}rm'a^{2}t-o-som. Lat., *spermatosoma* (from *σπέρμα*, seed, and *σῶμα*, the body). Ger., *Spermatosom.* See SPERMATOZOOID.



SPERMATOSPHERES, n. pl. Spu^{5}rm-a^{2}t'o-sferz. From *σπέρμα*, seed, and *σφαῖρα*, a sphere. See SPERMATOBLASTS and cf. SPERMOSPHERE.

SPERMATOSPORES, n. pl. Spu^{5}rm'a^{2}t-o-sporz. From *σπέρμα*, seed, and *σπόρος*, a sowing. Cells, equivalent to ova, which by division give rise to the spermatoblasts. [J, 1.] See also *Seminal* CELL.

SPERMATOTHECA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o-(o^3)-the(tha)'ka^3. See PERICARP.

SPERMATOZEMIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-o-(o^3)-zem(zam)'i^2-a^3. From *σπέρμα*, seed, and *ζημία*, loss. Fr., *spermatozémie.* See SPERMATORRHŒA.

SPERMATOZOID, SPERMATOZOOID, n's. Spu^{5}rm'a^{2}t-o-zoid, spu^{5}rm-a^{2}t-o-zo'oid. Lat., *spermatozoon* (from *σπέρμα*, seed, and *ζῷον*, an animal), *spermatozoidium, animalculum seminis masculi* [Leeuwenhoek], *filum spermaticum.* Fr., *spermatozoïde, spermatozoaire, zoösperme, zooplaste, ver spermatique, animalcule spermatique, spermatule, spermatobie.* Ger., *Spermatozoïde, Spermatozoon, Zoospermie, Samenfaden, Samenkörper, Samenthier.* 1. The fertilizing or male sexual element of the semen. In

HUMAN SPERMATOZOOIDS; MAGNIFIED 600 DIAMETERS. (FROM FLINT [AFTER LANDOIS].)

1 flat view; 2, side view; A A, head; B B, intermediate segment; C C, tail; D D, terminal filament.

the great majority of cases it is only after one or more s's have fused with an ovum that segmentation and the development of an embryo take place. In all cases a s. is supposed to be the equivalent of a cell. In man and most of the higher animals s's appear in shape and action like minute tadpoles. The head represents the nucleus of the cell, and a delicate layer of protoplasm enveloping the head, together with the tail, represents the cell-body. In some cases there is seen a thickening in the tail at its junction with the head, and also in some cases the tail and middle piece are bordered by a kind of frill. In the inferior animals the s's are of very various form, some being hair-like, as in insects, while others are cell-like. In most cases the tail has a continuous lashing or cilia-like motion, but in the two groups in which the s's are cell-like (nematoids and crustaceans) they exhibit amœboid movement. [J, 1, 30, 35.] 2. In cryptogams, a male motile cell (gamete) developed in the antheridium, occurring in most cases as a more or less spiral filament provided at its smaller end with two or more lash-like appendages (cilia) by means of which, under suitable conditions of moisture, it is propelled from the antheridium and, entering the archegonium or oogonium, fuses with the contained oosphere and forms the oospore. The term is also applied, but less correctly, to a non-motile, unciliated antherozooid (see SPERMATIUM). [B, 19, 77, 121, 229, 291 (*a*, 35).]

SPERMATOZOON, n. Spu^{5}rm-a^{2}t-o-zo'o^{2}n. See SPERMATOZOOID.

SPERMATURIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-u^{2}r-(ur)'i^2-a^3. From *σπέρμα*, seed, and *οὖρον*, urine. Ger., *Spermaturie.* The escape of semen during micturition. [L, 57 (*a*, 14).]

SPERMAZOAIRE (Fr.), n., **SPERMAZOON** (Lat.), n. n. Spe^{2}rm-a^3-zo-a^{2}r, spu^{5}rm(spe^{2}rm)-a^3-zo'o^{2}n. See SPERMATOZOOID.

SPERMIDIUM (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-i^{2}d'i^2-u^{3}m(u^{4}m). See ACHÆNIUM.

SPERMIDUCT, n. Spu^{5}rm'i^2-du^{3}kt. From *σπέρμα*, seed, and *ducere*, to lead. Fr., *spermiducte.* The tract (or a part thereof) through which the semen passes to arrive at the urethra. [A, 4.]

SPERMINE, n. Spu^{5}rm'en. From *σπέρμα*, seed. Fr., *s.* Ger., *Spermin.* 1. Of Schreiner (1878) and others, a non-poisonous base, C_2H_5N (perhaps $= NH(CH_2)_2$ or $CH_2 - NH - CH$), having the odor of semen, occurring in putrefying sea-polypi, in sputum, in human semen, in the organs of leucocythæmic patients, in the alcohol in which anatomical preparations have been preserved, in cultures of choleraic matter, and, according to Poehl, in the thyreoid gland and brain substance. [Brieger, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," cxv, p. 483 (B); "Gaz. hebd. de méd. et de chir.," Oct. 15, 1892, p. 500 (*a*, 34).] 2. See *Brown-Séquard's* ELIXIR.

SPERMIOLUM (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-i(i^2)'o^{2}l-u^{3}m(u^{4}m). From *σπέρμα*, seed. Fr., *spermiole.* See SPERMA RANÆ.

SPERMOBLASTS, n. pl. Spu^{5}rm'o-bla^{3}sts. See SPERMATOBLASTS.

SPERMOBOLE (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-o^{2}b'o^{2}l-e(a). Gen., *-ob'oles.* From *σπέρμα*, seed, and *βολή*, a throwing. See SPERMATISMUS.

SPERMOCOCCUS (Lat.), n. m. Spu^{5}rm(spe^{2}rm)-o(o^3)-ko^{2}k'-ku^{3}s(ku^{4}s). From *σπέρμα*, seed, and *κόκκος*, a kernel. The head of a spermatozooid, with the exception of the outer sheath. [L, 146.]

SPERMODERM, n. Spu^{5}rm'o-du^{5}rm. Lat., *spermoderma, spermodermis* (from *σπερμα*, seed, and *δέρμα*, skin). Fr., *spermoderme.* 1. Of Vines and others, the entire covering of a seed, including (when the ovule has two integuments) both the testa and the tegmen. [*a*, 35.] 2. Of Gray and others, see TESTA (2d def.).

SPERMODOPHORE, n. Spu^{5}rm'o^{2}d-o-for. Lat., *spermodophorum* (from *σπέρμα*, seed, and *φορός*, bearing). Fr., *s.* The gynophore of *Umbelliferæ.* [*a*, 35.]

SPERMŒDEONECROSIS (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-e^{2}d''-(o^2''e^{2}d)-e^2-o(o^3)-ne^{2}k-ros'i^{2}s. Gen., *-ros'eos (-is).* From *σπέρμα*, seed, *οἰδεῖν*, to swell, and *νέκρωσις*, deadness. Fr., *spermœdionécrose.* Gangrene produced by ergot. [L, 50 (*a*, 14).]

SPERMŒDIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-ed'(o^2'e^{2}d)-i^2-a^3. From *σπέρμα*, seed, and *οἰδεῖν*, to swell. Of Fries, the sclerotium. [*a*, 35.] Cf. ERGOT (1st def.).

SPERMOGENOUS, adj. Spu^{5}rm-o^{2}j'e^{2}n-u^{3}s. From *σπέρμα*, seed, and *γεννᾶν*, to beget. Forming or assisting to form spermatozooids. [J.]

SPERMOGONES, n. pl. Spu^{5}rm'o-gonz. Lat., *spermogonia* (from *σπέρμα*, seed, and *γονεία*, generation). Fr., *spermogonies.* Ger., *Spermogonien.* In lichens and certain *Fungi*, urn-shaped conceptacles in which spermatia are developed. [*a*, 35.]

SPERMOLITH, n. Spu^{5}rm'o-li^{2}th. From *σπέρμα*, seed, and *λίθος*, a stone. See *Spermatic* CALCULUS.

SPERMONEURALGIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-o(o^3)-nu^{2}r-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From *σπέρμα*, seed, *νεῦρον*, a nerve, and *ἄλγος*, pain. Neuralgia of the spermatic cord. [L, 50 (*a*, 14).]

SPERMOPHLEBECTASIA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)''o-(o^3)-fle^{2}b-e^{2}k-taz(ta^{3}s)'i^2-a^3. From *σπέρμα*, seed, *φλέψ*, a vein, and *ἔκτασις*, a stretching. Fr., *spermophlébectasie.* A varicose condition of the spermatic veins. [E.]

SPERMOPHORE, n. Spu^{5}rm'o-for. Lat., *spermophorum* (from *σπέρμα*, seed, and *φορεῖν*, to bear). See PLACENTA (4th def.) and SPERMODOPHORE.

SPERMOPHORUM (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-o^{2}f'o^{2}r-u^{3}m-(u^{4}m). 1. A seed-bearing organ. 2. The testicle. 3. The uterus. [L, 50 (*a*, 14).]

SPERMOPLASMA (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-o(o^3)-pla^{2}z-(pla^{3}s)'ma^3. Gen., *-plas'matos (-atis).* From *σπέρμα*, seed, and *πλάσμα*, anything formed. The central portion and the tail of the seed-thread together with the outer sheath of the "head" of a spermatozooid. [L, 146.]

SPERMORRHŒA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-o^{2}r-re'(ro^2'e^2)-a^3. See SPERMATORRHŒA.

SPERMOSPHERE, n. Spu^{5}rm'o-sfer. From *σπέρμα*, seed, and *σφαῖρα*, a sphere. Ger., *Samenknospen.* A ball of cells arising by the repeated division of a germinal cell or gonoblast. Each cell ultimately becomes a spermatozooid. [J, 1.]

SPERMOSPORES, n. pl. Spu^{5}rm'o-sporz. See SPERMATOSPORES.

SPERMOTHECA (Lat.), n. f. Spu^{5}rm(spe^{2}rm)-o(o^3)-the(tha)'-ka^3. From *σπέρμα*, seed, and *θήκη*, a chest. See PERICARP.

SPERMOTYLIUM (Lat.), n. n. Spu^{6}rm(spe^{2}rm)-o(o^3)-ti^{2}l(tu^{6}l)′-i^2-u^{3}m(u^{4}m). From σπέρμα, seed, and τύλη, a swelling. Ger., *Samenschwiele.* In some seeds, a small protuberance near the hilum, on the side of the testa opposite to the micropyle. [α, 35.]

SPERMOZOON (Lat.), n. n. Spu^{5}rm(spe^{2}rm)-o(o^3)-zo′o^{2}n. See SPERMATOZOOID.

SPERNIOLA (Lat.), n. f. Spu^{5}rn(spern)-i(i^2)′o^{2}l-a^3. See SPERMA RANÆ.—**S. Crollii.** A mixture of ½ oz. each of myrrh and olibanum and 1 scruple of saffron, moistened with water distilled from frogs' spawn, and mixed with 6 scruples of camphor; used as a hæmostatic and as a remedy for inflammatory troubles and for rabies. [Palat. Disp., 1764; Würtemb. Ph., 1798 (B, 119).]

SPERRE (Ger.), n. Spe^{2}r′re^2. 1. Dilatation. 2. Stricture, contraction. [α, 14.]—**Afters'.** 1. See *Imperforate* ANUS. 2. Rectal tenesmus. 3. Stricture of the rectum. [A, 305.]—**Mauls'.** See DIVARICATIO *maxillarum* and TRISMUS.

SPERRELEVATEUR (Ger.), n. Spe^{2}r′re^2-le^2-va^{3}t-u^{5}r. See *Lid*-SPECULUM.

SPERRER (Ger.), n. Spe^{2}r′re^{2}r. 1. A dilating speculum; a dilator. 2. A constrictor. [E.]

SPERRKRAUT (Ger.), n. Spe^{2}r′kra^3-u^{4}t. The genus *Polemonium.* [α, 35.]

SPHACELARIA (Lat.), n. f. Sfa^{2}s(sfa^{3}k)-e^{2}l-a^{3}r′i^2-a^3. From σφάκελος, gangrene. Ger., *Brandtang.* A genus of *Algæ.* The *Sphacelarieæ* of Decaisne are an order of the *Aplosporeæ.* [α, 35.]—**S. scoparia.** Ger., *besenförmiger Brandtang.* A brownish-green species found on the coast of the Atlantic and Mediterranean, forming a part of helminthochorton. [α, 35.]

SPHACELATED, adj. Sfa^{2}s′e^{2}l-at-e^{2}d. Lat., *sphacelatus* (from σφάκελος, gangrene). Fr., *sphacélé.* Affected with sphacelus.

SPHACÈLE (Fr.), n. See SPHACELUS.—**S. de la bouche.** See CANCER *aquaticus.*

SPHACELIA (Lat.), n. f. Sfa^{2}s(sfa^{3}k)-el(e^{2}l)′i^2-a^3. Fr., *sphacélie.* Of Leveillé and Fée, a genus of *Fungi*; now recognized as the first or conidial stage of *Claviceps purpurea* and *Epichloe typhina.* [α, 35.]—**S. segetum.** The primary or sphacelial stage in the development of ergot; consisting of an oblong, homogeneous, soft mass of slender hyphæ enveloping and penetrating the soft ovaries of the rye. The outer layer of the mycelial threads is made up of radially-diverging cells (basidia) which produce a multitude of elongated, agglutinated granules (conidia) covering the floral organs of the rye in the form of a whitish dust. [α, 35.]

SPHACELISM, n. Sfa^{2}s′e^{2}l-i^{2}zm. See SPHACELUS.

SPHACELISMUS (Lat.), n. m. Sfa^{2}s(sfa^{3}k)-e^{2}l-i^{2}z(i^{2}s)′mu^{3}s-(mu^{4}s). See SPHACELUS.—**S. cerebri.** See ENCEPHALITIS.

SPHACELIUM (Lat.), n. n. Sfa^{2}s(sfa^{3}k)-el(e^{2}l)′i^2-u^{3}m(u^{4}m). See SPHACELIA.

SPHACELOTYPHUS (Lat.), n. m. Sfa^{2}s(sfa^{3}k)-e^{2}l-o(o^3)-ti-(tu^5)′fu^{3}s(fu^{4}s). From σφάκελος, sphacelus, and τῦφος, smoke. Fr., *sphacélotyphus.* Ger., *Brandfleckfieber.* Gangrenous typhus fever.

SPHACELUS (Lat.), n. m. Sfa^{2}s(sfa^{3}k)′e^{2}l-u^{3}s(u^{4}s). Gr., σφάκελος. Fr., *sphacèle.* Ger., *S.* Cold gangrene; mortification in which complete death of a part in its entirety takes place rapidly.

SPHÆRAGRA (Lat.), n. f. Sfe^{2}r′(sfa^3′e^{2}r)-a^{2}g(a^{3}g)-ra^3. From σφαῖρα, a ball, and ἄγρα, a seizure. Fr., *sphéragre.* See *Bullet* FORCEPS.

SPHÆRALCEA (Lat.), n. f. Sfe^{2}r(sfa^3-e^{2}r)-a^{2}ls(a^{3}lk)′e^2-a^3. From σφαῖρα, a ball, and ἀλκέα, a kind of wild mallow. Fr., *sphéralcée.* Globe-mallow; a genus of the *Malvaceæ.* [α, 35.]—**S. cisplatina.** A Brazilian shrub. The leaves are used like those of *Althœa officinalis* as a pectoral. [α, 35.]

SPHÆRANTHUS (Lat.), n. m. Sfe^{2}r(sfa^3-e^{2}r)-a^{2}nth(a^{3}nth)′-u^{3}s(u^{4}s). From σφαῖρα, a ball, and ἄνθος, a flower. Fr., *sphéranthe.* Ger., *Kugelblume.* A genus of the *Inuloideæ.* The *Sphœrantheæ* are: Of Cassini, a subdivision of the *Buphthalmeæ*; of De Candolle, a subdivision of the *Conyzeæ*; of Lindley, a subtribe of the *Asteroideæ.* [α, 35.]—**S. amarantoides (cochinchinensis).** An emollient and tonic species. [α, 35.]—**S. hirtus, S. indicus.** East Indian globe-flower; a weed of honey-like odor. The roots, seeds, and receptacles are considered anthelminthic; the herb is used as an alterative and pectoral, and externally as an emollient; and the flowers are used as an alterative, depurative, refrigerant, and tonic. The root-bark is used in piles. In Java the entire plant is considered diuretic. Lamarck's *S. indicus* is *S. suaveolens*; Blume's is *S. microcephalus.* [α, 35.]—**S. lævigatus, S. microcephalus.** A species common in rice-fields in the East Indies and China; used as a stomachic tonic, vermifuge, and diuretic. [α, 35.]—**S. suaveolens.** A species with a strong, pleasantly aromatic odor, growing in Egypt and in the East Indies. It has the properties of *S. hirtus.* [α, 35.]

SPHÆRECPHLOGISCUM (Lat.), n. n. Sfe^{2}r(sfa^3-e^{2}r)-e^{2}k-flo^{2}j(flo^{2}g)-i^{2}sk′u^{3}m(u^{4}m). From σφαῖρα, a ball, and ἐγφλογίζειν, to set on fire. See VARICELLA *globularis.*

SPHÆRENCHYMA (Lat.), n. n. Sfe^{2}r(sfa^3-e^{2}r)-e^{2}n^2′ki^{2}m-(ch^{2}u^{6}m)-a^3. Gen., *-chym′atos* (*-atis*). From σφαῖρα, a ball, and ἔγχυμα, an infusion. Tissue in which the cells are spheroidal.

SPHÆRIA (Lat.), n. f. Sfer′(sfa^3′e^{2}r)-i^2-a^3. From σφαῖρα, a ball. Fr., *sphérie.* A genus of *Fungi* formerly constituting nearly all the *Sphœriaceæ* (Fr., *sphériacées*) or *Sphœriacei* (Fr., *sphériacés*), which are a division of the *Pyrenomycetes.* The *Sphœriæ* are a cohort of *Fungi*; the *Sphœriarieæ* include the *Sphœriaceæ*, *Hysterineæ*, and *Xylomateæ*; and the *Sphœrini* are a suborder of the *Sphœriacei.* [α, 35.]—**S. sinensis.** See CORDICEPS *sinensis.*

SPHÆRIOCARCINOMA (Lat.), n. n. Sfe^{2}r(sfa^3-e^{2}r)″i^2-o(o^3)-ka^{3}r-si^{2}n(ki^{2}n)-om′a^3. Gen., *-om′atos* (*-atis*). From σφαιρίον, a little ball, and καρκίνωμα, carcinoma. Fr., *sphériocarcinome.* Of Dorrington, a cancer of globular shape. [L, 50 (α, 14).]

SPHÆROBACTERIUM (Lat.), n. n. Sfe^{2}r(sfa^3-e^{2}r)-o(o^3)-ba^{2}kt(ba^{3}kt)-e(a)′ri^2-u^{3}m(u^{4}m). From σφαῖρα, a ball, and βακτήριον, a little rod. Fr., *sphérobactérie.* See MICROCOCCUS.

SPHÆROCOCCUS (Lat.), n. m. Sfe^{2}r(sfa^3-e^{2}r)-o(o^3)-ko^{2}k′-ku^{3}s(ku^{4}s). From σφαῖρα, a ball, and κόκκος, a kernel. Fr., *sphérocoque.* Ger., *Kugelfruchtalge, Knopfalge, Knopftang.* A genus of *Algæ* with spherical fruit, typical of a division (*Sphœrococcoideæ*) of the *Florideæ.* Most of the species formerly included in this are now referred to *Chondrus, Gigartina, Rhodymenia, Gelidium*, etc. [α, 35.]—**S. acicularis.** Ger., *nadelförmige Knopfalge.* A gelatinous species sometimes constituting part of helminthochorton. It yields an empyreumatic oil recommended in helminthiasis. [α, 35.]—**S. cartilagineus, S. compressus.** Species said to furnish part of Japanese agar-agar. [α, 35.]—**S. gelatinosus, S. gelatinus.** Ger., *gallertartige Knopfalge.* A species common in the Indian Ocean. It yields an edible jelly, and is used as a demulcent. [α, 35.]

SPHÆROMA (Lat.), n. n. Sfe^{2}r(sfa^3-e^{2}r)-om′a^3. Gen., *-om′atos* (*-atis*). Gr., σφαίρωμα. Fr., *sphérome.* 1. A globular protuberance. 2. Of Paulus Ægineta, the head of the femur. 3. In the pl., of Galen, the nates. [L, 50 (α, 14).]

SPHÆROTHECA (Lat.), n. f. Sfe^{2}r(sfa^3-e^{2}r)-o(o^3)-the(tha)′-ka^3. From σφαῖρα, a ball, and θήκη, a chest. Fr., *sphérolèque.* A genus of *Fungi.* [B.]—**S. Castagnei.** Hop-mildew; a species forming white patches on hop-leaves. [B, 61.]

SPHÆROZYGA (Lat.), n. f. Sfer(sfa^3-e^{2}r)-o(o^3)-zig(zu^{6}g)′a^3. From σφαῖρα, a ball, and ζυγόν, a yoke. Fr., *sphérozyge.* A genus of *Algæ* allied to *Oscillatoria*, abundant in some hot springs; said to contain a small proportion of an alkaline iodide, and applied to diseased glands. [α, 35.]—**S. spiralis.** See ANABAINA *spiralis.*

SPHAGE (Lat.), n. f. Sfaj(sfa^{3}g)′e(a). Gen., *sphag′es.* Gr., σφαγή (from σφάζειν, to slay). Lat., *jugulum.* Fr., *s.* Ger., *Kehle.* The anterior aspect of the neck. [L, 50 (α, 14).]

SPHAGIASMUS (Lat.), n. m. Sfaj(sfa^{3}g)-i^2-a^{2}z(a^{3}s)′mu^{3}s-(mu^{4}s). Gr., σφαγιασμός (from σφαγή, the throat). Fr., *sphagiasme.* Of M. Hall, spasm of the cervical muscles. [α, 34.]

SPHAGITIS (Lat.), n. f. Sfa^{2}j(sfa^{3}g)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). Gr., σφαγῖτις (from σφαγή, the throat). See *Jugular* VEIN.

SPHAGNUM (Lat.), n. n. Sfa^{2}g(sfa^{3}g)′nu^{3}m(nu^{4}m). From σφάγνος, tree-moss. Fr., *sphaigne.* Ger., *Torfmoos.* Bog-moss, gold heath; the only genus of an order of mosses, the *Sphagna* of Furnrohr, *Sphagnacea* of Reichenbach, *Sphagnaceæ* [Fr., *sphagnacées*] of Endlicher, *Sphagnea* of Reichenbach, *Sphagneæ* or *Sphagnideæ* of Dumortier, *Sphagnoideæ* of Arnott, and *Sphagnoidei* of Bridel. By their successive growth and decay these plants share in the formation of peat. They are spongy and elastic, and are used for antiseptic dressings. The *Sphagnaceæ* of Nees include the *Sphagnaceæ* of other authors and the *Andreaceæ.* [α, 35.]

SPHALEROTOCIA (Lat.), n. f. Sfa^{2}l(sfa^{3}l)-e^{2}r-o(o^3)-tos(to^{2}k)′-i^2-a^3. From σφαλερός, uncertain, and τόκος, childbirth. Fr., *sphalérotocie.* See DOLORES *præparantes.*

SPHÄRE (Ger.), n. Sfar′e^2. See SPHERE and REGION.—**Fühls', Gefühls'.** See *Sensory* SPHERE.

SPHENDONE (Lat.), n. f. Sfe^{2}nd′o^{2}n-e(a). Gen., *sphend′ones.* Gr., σφενδόνη. Fr., *s.* See FUNDA (1st def.).

SPHENO-BASILAR, adj. Sfen″o-ba^{2}s′i^{2}l-a^{3}r. Lat., *sphenobasilaris* (from σφήν, a wedge, and *basis*, a base). Fr., *sphénobasilaire.* Pertaining to the sphenoid bone and the basilar apophysis. [A, 385 (α, 48).]

SPHENOBASILARIS (Lat.), adj. Sfen(sfan)-o(o^3)-ba^{2}s(ba^{3}s)-i^{2}l-a(a^3)′ri^{2}s. See SPHENO-BASILAR; as a n., see *Basilar* BONE (1st def.).

SPHENOCEPHALIA (Lat.), n. f. Sfen(sfan)-o(o^3)-se^{2}f(ke^{2}f)-al(a^{3}l)′i^2-a^3. From σφήν, a wedge, and κεφαλή, the head. Fr., *sphénencéphalie, sphénocéphalie.* Ger., *Sphenencephalie, Sphenocephalie.* Of G. St.-Hilaire, a form of monstrosity in which the cranium is wedge-shaped, there are two distinct eyes, the inferior maxilla is shorter than the superior, and the ears approach closely or are even united below the head. [L, 41, 49, 50 (α, 14).]

SPHENO-ETHMOID, SPHENO-ETHMOIDAL, adj's. Sfen″o-e^{2}th′moid, -e^{2}th-moi′d′l. From σφήν, a wedge, and ἠθμώδης, ethmoid. Pertaining to the sphenoid and ethmoid bones. [α, 48.]

SPHENO-FRONTAL, adj. Sfen″o-fru^{3}n′t′l. From σφήν, a wedge, and *frons*, the forehead. Pertaining to the sphenoid and frontal bones. [α, 48.]

SPHENOID, adj. Sfen′oid. Gr., σφηνοειδής (from σφήν, a wedge, and εἶδος, resemblance). Lat., *sphenoides.* Fr., *sphénoïde.* Ger., *sphenodisch.* Wedge-shaped; as a n., the s. bone. [C.]

SPHENOIDAL, adj. Sfe^{2}n-oi′d′l. Lat., *sphenoidalis.* Fr., *sphénoïdal.* 1. See SPHENOID. 2. Pertaining to or connected with the sphenoid bone. [L.]

SPHENOIDALIS (Lat.), adj. Sfen(sfan)-o(o^2)-i^{2}d(ed)-al(a^{3}l)′-i^{2}s. Sphenoidal; as a n., in the n., *sphenoidale*, the sphenoid bone. [C.]—**Sphenoidalia lateralia.** See ALÆ *majores.*

SPHÉNOÏDE (Fr.), adj. and n. Sfan-o-ed. See SPHENOID.—**S. postérieur** [Cuvier]. The basisphenoid bone in mammals. [L, 14.]—**S. principal.** The basisphenoid bone [Agassiz] or the presphenoid bone [Cuvier] of fishes. [L, 14.]

SPHENOIDEUM (Lat.), n. n. Sfe^{2}n(sfan)-o(o^2)-i^{2}d(ed)′e^2-u^{3}m-(u^{4}m). See *Sphenoid* BONE.—**S. basilare.** 1. Of Hallmann. see *Presphenoid* BONE. 2. Of Bojanus, Harting, and Stannius, see *Basisphenoid* BONE.

SPHENOIDO-AURICULAR, adj. Sfe^{2}n-oid″o-a^{4}r-i^{2}k′u^{2}l-a^{3}r. From σφηνοειδής, wedge-shaped, and *auricula*, the external ear. Pertaining to the biauricular and sphenoidal diameters, etc., of the skull. [L.]

SPHENOIDO-FRONTAL, adj. Sfe^{2}n-oid″o-fru^{3}n′t′l. From σφηνοειδής, wedge-shaped, and *frons*, the forehead. Pertaining to the sphenoidal and frontal diameters, etc., of the skull. [L.]

SPHENOIDO-PARIETAL, adj. Sfe^{2}n-oid″o-pa^{2}r-i′e^2-t′l. From σφηνοειδής, wedge-shaped, and *paries*, a wall. Pertaining to the sphenoidal and parietal diameters, etc., of the skull. [L.]

SPHENOMAXILLARIS (Lat.), adj. Sfen(sfan)-o(o^3)-ma^{2}x-(ma^{3}x)-i^{2}l-la(la^3)′ri^{2}s. From σφήν, a wedge, and *maxilla*, the jaw. Sphenomaxillary; as a n., in solipeds, the muscle formed by the union of the two pterygoidei. [L, 13.]

SPHENO-MAXILLARY, adj. Sfen-o-ma^{2}x′i^{2}l′a-ri^2. Lat., *sphenomaxillaris*. Fr., *spheno-maxillaire*. Pertaining to the sphenoid bone and the superior maxilla. [α, 48.]

SPHENOMETER, n. Sfe^{2}n-o^{2}m′e^{2}t-u^{6}r. From σφήν, a wedge, and μέτρον, a measure. An instrument for determining the size of the wedge in cuneiform osteotomy. [α, 34.]

SPHENO-OCCIPITAL, adj. Sfen″o-o^{2}k-si^{2}p′i^2-t′l. From σφήν, a wedge, and *occiput* (*q. v.*). Pertaining to the sphenoid and occipital bones. [α, 48.]

SPHÉNO-ORBITAIRE (Fr.), n. Sfa-no-o^{2}r-be-ta^{2}r. See *Presphenoid* BONE.

SPHENO-ORBITAL, adj. Sfen″o-o^{2}rb′i^2-t′l. Lat., *sphenoorbitalis* (from σφήν, a wedge, and *orbita*, the orbit). Fr., *sphénoorbitaire*. Pertaining to the sphenoid bone and the orbit. [α, 48.]

SPHENO-PALATINE, adj. Sfen″o-pa^{2}l′a^{2}t-i^{2}n. Lat., *sphenopalatinus* (from σφήν, a wedge, and *palatum*, the palate). Pertaining to the sphenoid bone and the palate. [C.] As a n., see ABDUCTOR *of the Eustachian tube*.

SPHENO-PARIETAL, adj. Sfen″o-pa^{2}r-i′e^2-t′l. From σφήν, a wedge, and *paries*, a wall. Pertaining to the sphenoid and parietal bones. [α, 48.]

SPHENO-PETROSAL, adj. Sfen″o-pe^{2}t-ro′s′l. From σφήν, a wedge, and πέτρα, a rock. See PETRO-SPHENOID.

SPHENOPHARYNGEUS (Lat.), n. m. Sfen(sfan)″o(o^3)-fa^{2}r-(fa^{3}r)-i^{2}n(u^{6}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). From σφήν, a wedge, and φάρυγξ, the pharynx. That portion of the superior constrictor of the pharynx which arises from the base of the internal pterygoid plate. [Winslow (L).]

SPHENOPTERYGOPALATINUS (Lat.), n. m. Sfen(sfan)″-o(o^3)-te^{2}r(pte^{2}r)‴i^{2}g(u^{6}g)-o(o^3)-pa^{2}l(pa^{3}l)-a^{2}t(a^{3}t)-in(en)′u^{3}s(u^{4}s). From σφήν, a wedge, πτέρυξ, a wing, and *palatum*, the palate. Fr., *sphéno-ptérygo-palatin*. See ABDUCTOR *of the Eustachian tube*.

SPHENOSALPINGOSTAPHYLINUS (Lat.), n. m. Sfen-(sfan)″o(o^3)-sa^{2}lp(sa^{3}lp)-i^{2}n^{2}g″′o(o^3)-sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-in(en)′u^{3}s-(u^{4}s). From σφήν, a wedge, σάλπιγξ, a trumpet, and σταφυλή, the uvula. See ABDUCTOR *of the Eustachian tube*.

SPHENOSIPHON (Lat.), n. m. Sfen(sfan)-o(o^3)-sif(sef)′o^{2}n-(on). Gen., *-on′os* (*-is*). From σφήν, a wedge, and σίφων, a tube. Fr., *sphénosiphon*. Ger., *Keilspritze*. A syringe devised by Schnackenberg for stimulating premature labor by dilating the cervix uteri. [L, 50 (α, 14).]

SPHENOSIS (Lat.), n. f. Sfe^{2}n(sfan)-os′i^{2}s. Gen., *-os′eos* (*-is*). Gr., σφήνωσις (from σφήν, a wedge). Ger., *Einkeilung*. Of Galen, aggravated infarction. [L, 50 (α, 14).]

SPHENO-SQUAMOUS, adj. Sfen″o-skwam′u^{3}s. From σφήν, a wedge, and *squama*, a scale. Pertaining to the sphenoid bone and the squamous portion of the temporal bone. [α, 48.]

SPHENOSTAPHYLINUS (Lat.), n. m. Sfen(sfan)″o(o^3)-sta^{2}f-(sta^{3}f)-i^{2}l(u^{6}l)-in(en)′u^{3}s(u^{4}s). From σφήν, a wedge, and σταφυλή, the uvula. See ABDUCTOR *of the Eustachian tube*.

SPHENO-TEMPORAL, adj. Sfen″o-te^{2}mp′o^2-r′l. From σφήν, a wedge, and *tempora*, the temples. Pertaining to the sphenoid and temporal bones. [α, 48.]

SPHENOTRESIA (Lat.), n. f. Sfen(sfan)-o(o^3)-tre(tra)′zi^2(si^2)-a^3. From σφήν, a wedge, and τρῆσις, perforation. Fr., *sphénotrésie*. Ger., *Sphenotresie*. Perforation with dilatation.

SPHENOTRIBE, n. Sfe^{2}n′o-trib. From σφήν, a wedge, and τρίβειν, to rub. Fr., *sphénotribe*. An instrument for breaking up the base of the skull in the operation of craniotomy; a combination of the cephalotribe and the transforateur. [A, 22.]

SPHERE, n. Sfer. Gr., σφαῖρα. Lat., *sphæra*. Fr., *sphère*. Ger., *Sphäre*. 1. A solid that has all parts of its surface equidistant from the centre; hence, loosely, a ball or globe. 2. A limited space or aspect regarded as a scene of action. [α, 48.]—**Attraction s.** A region within which there is a wheel-like arrangement of fine fibrils or rows of granules radiating from a clear area in the cell protoplasm, and in the middle of which lies the attraction-particle. [Schäfer (α, 34).]—**Embryonic s.** See *Segmentation s.*—**Extrusion s.** See *Extrusion* GLOBULES.—**Granule s.** Ger., *Körnchenkugel*. One of the large granular corpuscles, with numerous fine, very active pseudopodia on their surface, found in connection with ordinary lymph-corpuscles in serous exudations into the great body cavities. [J, 35.]—**Hearing s.** Ger., *Hörsphäre*. Of Munk, certain portions of the temporal lobes of the brain supposed to be the seats of the sense of hearing, the anterior and posterior parts being engaged in the perception of high and low tones respectively. [F, 3.] Cf. *Acoustic* CENTRE (2d def.).—**Hypoblastic s′s.** Those inner products of the segmentation of the fertilized ovum that give rise to the hypoblast. [α, 34.]—**Motor s.** A region of the central nervous system that, when stimulated, originates movement. [α, 34.]—**Protoplasmic primordial s.** See *Segmentation* CELL.—**Segmentation s.** Fr., *sphérule blastémique*. Ger., *Furchungsabschnitt*, *Dotterabschnitt*. One of the nucleated cells into which the vitellus is divided by the process of segmentation. [J.] Cf. BLASTULA and *Embryonic* CELL (1st def.).—**Sensory s.** Of Meynert, a region of the central nervous system that perceives sensory impressions. [α, 34.]—**Vitelline s., Yolk s.** See *Segmentation s.*

SPHÈRE (Fr.), n. Sfe^{2}r. See SPHERE.—**S. blastémique.** See *Segmentation* SPHERE.—**S′s de fractionnement.** See BLASTOMERES.—**S. de l′émotivité.** See SENSORIUM *commune*.—**S. de rebut.** See *Extrusion* GLOBULE.—**S. nutritive.** Of Coste, the sphere to which the cicatricula is attached. [A, 4.]

SPHERICAL, adj. Sfe^{2}r′i^2-k′l. Gr., σφαιρικός (from σφαῖρα, a sphere). Lat., *sphæricus*. Fr., *sphérique*. Ger., *sphärisch*. Having the shape of a sphere. [α, 35.]

SPHEROCHLORINE, n. Sfer-o-klor′en. From σφαῖρα, a sphere, and χλωρός, green. Fr., *sphérochlorine*. The green of the spectrum of the colored globules of the retina in birds. [Waelchli.]

SPHEROIDAL, adj. Sfe^2-roi′d′l. Approaching the form of a sphere. [B, 19 (α, 35).]

SPHEROMETER, n. Sfe^{2}r-o^{2}m′e^{2}t-u^{6}r. From σφαῖρα, a sphere, and μέτρον, a measure. An instrument for measuring the degree of curvature of a lens. [α, 34.]

SPHERORRHODINE, n. Sfe^{2}r-o^{2}r′ro^{2}d-en. From σφαῖρα, a sphere, and ῥόδον, a rose. Fr., *sphérorhodine*. The red of the spectrum of the colored globules of the retina in birds. [Waelchli.]

SPHÉROTHÈQUE (Fr.), n. Sfa-ro-te^{2}k. A macrosporangeium.

SPHEROXANTHINE, n. Sfe^{2}r-o^{2}x-a^{2}n′then. From σφαῖρα, a globe, and ξανθός, yellow. Fr., *sphéroxanthine*. The orange-color of the spectrum of the colored globules of the retina in birds.

SPHERULE, n. Sfe^{2}r′u^{2}l. Gr., σφαιρίδιον. Lat., *sphærula*. A globule.—**Segment s.** See *Segmentation* SPHERE.

SPHINCTER (Lat.), n. m. Sfi^{2}n^{2}kt′u^{6}r(ar). Gen., *-er′os* (*-is*). Gr., σφιγκτήρ. Fr., *s.* Ger., *Schliessmuskel*. An annular muscle which constricts or closes a natural orifice; especially the s. ani. [L, 343.]—**Circular s. of the anus.** See *S. ani internus.*—**Laryngeal s.** See *S. laryngis.*—**S. ani (cutaneus, seu externus).** Fr., *s. anal* (ou *de l′anus*). Ger., *Afterschliesser*. A flat azygous oval muscle surrounding the anus. It arises from the tip and posterior surface of the coccyx and blends anteriorly with the skin of the perinæum and the perineal fascia and muscles. [L, 31, 332.]—**S. ani internus.** Ger., *innerer Afterschltiesser*. A thickened bundle of the circular muscular fibres of the rectum about an inch above the anus. [L.]—**S. ani superficialis.** See *S. ani externus.*—**S. ani tertius.** An inconstant thickening of the circular fibres of the rectum a short distance above the s. ani internus. [L.]—**S. coccygio-cutané** (Fr.). See *S. ani externus.*—**S. cunni.** See *S. vaginæ.*—**S. de la bouche** (Fr.). See ORBICULARIS *oris.*—**S. de Nélaton** (Fr.). See *S. ani tertius.*—**S. gulæ.** 1. The constrictores pharyngis regarded as a single structure. 2. Of Cowper, the inferior constrictor of the pharynx. [α, 46.]—**S. ilei.** See *Ileo-cæcal* VALVE.—**S. iridis (major).** Circular muscular fibres of the iris surrounding the pupil. [L, 332.]—**S. iridis minor.** Circular muscular fibres at the periphery of the iris. [L, 332.]—**S. labiorum.** See ORBICULARIS *oris.*—**S. laryngis.** See COMPRESSOR *laryngis.*—**S. oculi.** See ORBICULARIS *palpebrarum.*—**S. œsophageus.** See FORAMEN *œsophageum.*—**S. of the uterus.** A special re-enforcement of the circular muscular fibres surrounding the os uteri internum. [α, 22.]—**S. oris.** See ORBICULARIS *oris.*—**S. oris externus.** See STRATUM *externum orbicularis oris.*—**S. oris internus.** See STRATUM *internum orbicularis oris.*—**S. palpebrarum.** See ORBICULARIS *palpebrarum.*—**S. pharyngolaryngeus.** The inferior constrictor of the phaynx, the cricothyreoidei, and the thyreoidei transversi. [L, 332.]—**S. prostatæ.** See *S. urethræ prostaticus.*—**S. pupillæ.** See *S. iridis (major).*—**S. pylori.** A ring-like bundle of muscular fibres surrounding the pylorus. [L.]—**S. superior (tertius).** See *S. ani tertius.*—**S. urethræ.** See STRATUM *musculare circulare urethræ.*—**S. urethræ prostaticus.** Muscular fibres surrounding the anterior portion of the prostate gland. [L, 31, 332.]—**S. vaginæ.** Ger., *Schnürmuskel der Scheide*. A circular bundle of voluntary muscular fibres surrounding the lower extremity of the vagina and urethra, and serving to close those canals. See also CONSTRICTOR *cunni.*—**S. vaginæ profundus.** See CONSTRICTOR *cunni profundus.*—**S. ventriculi.** See PYLORUS.—**S. vesicæ.** Circular muscular fibres of the bladder nearest the commencement of the urethra. [L.]—**S. vesicæ externus.** See *S. urethræ prostaticus.*—**S. vesicæ internus.** 1. See *S. vesicæ.* 2. The portion of the muscular coat of the prostate gland nearest the bladder. [L, 31.]—**Superficial s. of the anus.** See *S. ani externus.*

SPHINCTÉRALGIE (Fr.), n. Sfa^{2}n^{2}k-ta-ra^{3}l-zhe. Pain caused by spasm of the sphincter ani. [E.]—**S. fissuraire.** S. due to fissure of the anus. [D, 92.]

SPHINCTEROLYSIS (Lat.), n. f. Sfi^{2}n^{2}kt-e^{2}r(ar)-o^{2}l′i^2(u^6)-si^{2}s. Gen., *-ys′eos* (*-ol′ysis*). From σφιγκτήρ, a band, and λύσις, a loosing. The operation of loosening the iris in anterior synechia. [α, 34.]

SPHINCTEROTOMY, n. Sfi^{2}n^{2}kt-e^{2}r-o^{2}t′o^{2}m-i^2. From σφιγκτήρ, a sphincter, and τομή, a cutting. Ger., *Sphincterotomie*. Section of the sphincter ani. [A, 319 (α, 21).]

SPHINGOINE, n. Sfi^{2}n^2′go-en. An alkaloid, $C_{17}H_{35}NO_2$, found in cerebral tissue in combination with cerebrose and neurostearic acid. ["Brit. Med. Jour.," Sept. 15, 1883, p. 524 (B).]

SPHINGONTA (Lat.), n. n. pl. Sfi^{2}n^2-go^{2}nt′a^3. From σφίγγειν, to bind. Astringent medicines. [L, 94 (α, 43).]

SPHINGOSINE, n. Sfi^{2}n^2'go sen. Fr., *s.* Ger., *Sphingosin.* A crystal-line alkaloid, $C_7H_{35}NO_3$, said to be a decomposition product of phrenosin. [Thudichum (K).]

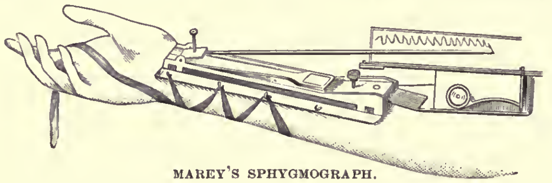
SPHINXIS (Lat.), n. f. Sfi^{2}n^{2}x'i^{2}s. Gen., *sphinx'eos (-is).* Gr., σφίγξις (from σφίγγειν, to bind). See Constriction.

SPHONDYLIUM (Lat.), n. n. Sfo^{2}nd-i^{2}l(u^{6}l)'i^2-u^{3}m(u^{4}m). Gr., σφονδύλιον (1st def.). Fr., *sphondyle, sphondylion.* 1. Of Dioscorides, probably the *Heracleum s.* and related species of *Heracleum.* 2. In pharmacy, the *Heracleum s.* 3. Of Tournefort, the genus *Heracleum.* The *Sphondylia* of Adanson are a section of the *Umbellatæ* (*Umbelliferæ*). [α, 35.]—**S. branca ursina.** See Heracleum *s.*—**S. conforme.** See Heracleum *sibiricum.*

SPHRAGIDONYCHARGOCOMETA (Lat.), n. m. Sfra^{2}j-(sfra^{3}g)-i^{2}d-o^{2}n-i^{2}k(u^{6}ch^2)-a^{3}rg-o(o^3)-ko^{2}m-et(at)'a^3. Gr., σφραγιδονυχαργοκομήτης (from σφραγίς, a seal-ring, ὄνυξ, the nail, ἀργός, shining, or ἄργυρος, silver, and κομᾶν, to plume one's self). A physician or a quack who seeks to gain the public favor by his personal adornments (as by having his fingers covered with rings down to the nails) more than by his professional merits. [α, 48.]

SPHRIGOSIS (Lat.), n. f. Sfri^{2}g-os'i^{2}s. Gen., *-os'eos (-is).* From σφρίγος, strength. An overluxuriance in the development of vegetable products. [α, 35.]

SPHYGMIC, adj. Sfi^{2}g'mi^{2}k. Gr., σφυγμικός (from σφυγμός, the pulse). Lat., *sphygmicus.* Fr., *sphygmique.* Ger., *sphygmisch.* Pulsating; of or pertaining to the pulse. [K.]



SPHYGMOCEPHALIA (Lat.), n. f. Sfi^{2}g(sfu^{6}g)-mo(mo^3)-se^{2}f-(ke^{2}f)-al(a^{3}l)'i^2-a^3. From σφυγμός, the pulse, and κεφαλή, the head. Fr., *sphygmocéphalie.* See Crotaphium.

SPHYGMOCHRONOGRAPH, n. Sfi^{2}g-mo-kro^{2}n'o-gra^{3}f. From σφυγμός, the pulse, χρόνος, time, and γράφειν to write. Ger., *Präcisionssphygmograph.* An instrument for recording graphically the extent and oscillations of the pulse-wave. It consists essentially of a button which is placed over the artery, any movement communicated to which is registered by an index upon a slip of paper which is moved by clockwork. [K.]

SPHYGMODIC, adj. Sfi^{2}g-mo^{2}d'i^{2}k. Gr., σφυγμώδης (from σφυγμός, the pulse, and εἶδος, resemblance). Lat., *sphygmodes.* Fr., *sphygmodique.* Ger., *pulsähnlich.* Pulse-like, throbbing like the pulse. [K.]

SPHYGMOGRAM, n. Sfi^{2}g'mo-gra^{2}m. From σφυγμός, the pulse, and γράμμα, a writing. Fr., *sphygmogramme.* The pulse-curve; the curve that is traced out by means of a sphygmograph. [K.]

SPHYGMOGRAPH, n. Sfi^{2}g'mo-gra^{3}f. Lat., *sphygmographium* (from σφυγμός, the pulse, and γράφειν, to write). Fr., *sphygmographe.* Ger., *S., Pulszeichner.* A recording pulsimeter, especially a sphygmochronograph. [α, 17.]—**Czermak's s.** A s. in which the pulse pad communicates with a small mirror that throws a beam of light on a screen or on sensitive paper. [α, 34.]—**Differential s.** Two small conjoined glass tubes containing

MAREY'S SPHYGMOGRAPH.

mercury and closed by two fine caoutchouc membranes. On the surface of each column of mercury floats a registering style. The tubes are attached to an artery and the accompanying vein and indicate the character of the arterial and venous impulses. [C. Ozanam, "Gaz. hebdom. de méd. et de chir.," Jan. 29, 1886, p. 78 (α, 34).]—**Keyts's s.** An instrument consisting of a rubber-membrane-covered pulse pad, glass transmission tubes, a manometric tube, a water reservoir, a lever that registers the pulse tracing on a writing surface, and a chronograph. [α, 34.]—**Landois's (gas) s.** A s. in which the pulsations are transmitted to a reservoir of gas, so that the oscillations in the height of a flame of the lighted gas are synchronous with the pulse waves. [α, 34.]—**Ozanam's s.** An instrument consisting of a small elastic bulb communicating with a tube containing a column of mercury. On the surface of the latter is a float that supports a slender rod holding a pen. The pen is kept in contact with a moving band of paper by means of a magnet placed behind the paper. [L, 88 (α, 34).]—**Vierordt's s.** A s. consisting of a beam from which are suspended two levers of unequal length that articulate by means of a metal square attached to their free extremities. An index which is in contact with a revolving cylinder is attached to the square, and it oscillates coincidently with pulsations communicated to the longer lever. [L, 88 (α, 34).]

SPHYGMOGRAPHY, n. Sfi^{2}g-mo^{2}g'ra^{2}f-i^2. Lat., *sphygmographia.* Fr., *sphygmographie.* Ger., *Sphygmographie, Pulszeichnung.* The use of the sphygmograph; also the collection and analysis of facts and principles that pertain to the sphygmograph and its use. [D; L, 50 (α, 14).]

SPHYGMOID, adj. Sfi^{2}g'moid. Gr., σφυγμώδης (from σφυγμός, the pulse, and εἶδος, resemblance). Lat., *sphygmoides.* See Sphygmodic.

SPHYGMOLOGE (Fr.), n. Sfeg-mo-lozh. A pulsimeter; a sphygmograph. [K.]

SPHYGMOLOGY, n. Sfi^{2}g-mo^{2}l'o-ji^2. Lat., *sphygmologia* (from σφυγμός, the pulse, and λόγος, understanding). Fr., *sphygmologie.* Ger., *Pulslehre.* The physiology, pathology, etc., of the pulse. [α, 48.]

SPHYGMOMANOMETER, n. Sfi^{2}g-mo-ma^{2}n-o^{2}m'e^{2}t-u^{5}r. From σφυγμός, the pulse, μανός, thin, and μέτρον, a measure. Fr., *sphygmomanomètre.* Ger., *S.* See Manometer (2d def.).

SPHYGMOMETER, n. Sfi^{2}g-mo^{2}m'e^{2}t-u^{5}r. Lat., *sphygmometrum* (from σφυγμός, the pulse, and μέτρον, a measure). Fr., *sphygmomètre.* Ger., *S.* See Pulsimeter.

SPHYGMOPHONE, n. Sfi^{2}g'mo-fon. From σφυγμός, the pulse, and φωνή, a sound. Fr., *s.* An instrument for rendering the rhythm and variations of the pulse audible, consisting of a small pad that may be adjusted over the radial artery at the wrist. The pad is brought in contact, by means of a nut and screw, with a spring, and the pad and spring are connected with the poles of a microphone. By means of the latter the pulse sounds are transmitted to the ear. [B; α, 34.]

SPHYGMOSCOPE, n. Sfi^{2}g'mo-skop. Lat., *sphygmoscopium* (from σφυγμός, the pulse, and σκοπεῖν, to examine). Fr., *s.* Ger., *Sphygmoskop.* See Pulsimeter.

SPHYGMOSYSTOLE (Lat.), n. f. Sfi^{2}g(sfu^{6}g)-mo(mo^3)-si^{2}s-(su^{6}s)'to^{2}l-e(a). Gen., *-syst'oles.* From σφυγμός, pulsation, and συστολή, a drawing together. The difference of time between the cardiac and arterial systole as shown by the sphygmograph. [α, 34.]

SPHYGMOZOAIRES (Fr.), n. pl. Sfeg-mo-zo-a^{2}r. Of Ehrenberg, invertebrates in which there is a circulation of the blood caused by a heart or pulsatile vessels. [L, 231.]

SPHYGMUS (Lat.), n. m. Sfi^{2}g(sfu^{6}g)'mu^{3}s(mu^{4}s). Gr., σφυγμός. See Pulse.

SPHYRA (Lat.), n. f. Sfir(sfu^{6}r)'a^3. Gr., σφῦρα. See Malleus.

SPHYROTOMY, n. Sfi^{2}r-o^{2}t'o^{2}m-i^2. From σφῦρα, a hammer, and τομή, a cutting. Fr., *sphirotomie.* Ger., *Sphirotomie.* Of Wreden, excision of part of the handle of the malleus, so as to remove a portion of the blood-vessels supplying the membrana tympani, and thus prevent the re-formation of an excised piece of the latter. It has not proved efficient. [F.]

SPHYXIS (Lat.), n. f. Sfi^{2}x(sfu^{6}x)'i^{2}s. Gen., *sphyx'eos (-is).* Gr., σφύξις. See Pulsation.

SPIC [Fr. Cod.] (Fr.), n. Spek. See Lavandula *spica.*

SPICA (Lat.), n. f. Spik(spek)'a^3. Fr., *s.* Ger., *S.* See Spike, *S.*-bandage, and Lavandula *s.*—**Essentia spicæ indicæ.** A filtered infusion of spikenard in four times as much alcohol. [B, 119 (α, 38).]—**Gummibindens'** (Ger.). A rubber s. bandage.—**Inguinal s.** Fr., *s. de l'aine.* See *S.*-bandage *for the groin.*—**Oleum (florum) spicæ.** See *Oil of* spike.—**S. alpina.** The *Valeriana celtica* or its root. [α, 35.]—**S. carpi.** See *S.*-bandage *for the hand.*—**S. celtica.** See *S. alpina.*—**S. coxæ.** See *S.*-bandage *for the groin.*—**S. cretica.** See Origanum *creticum.*—**S. de l'aine** (Fr.). See *S.*-bandage *for the groin.*—**S. dorsi.** See *Chest*-bandage.—**S. duplex.** Of Galen, a kind of bandage encircling both shoulders. [A, 325 (α, 48).]—**S. humeri.** See *S.*-bandage *for the shoulder.*—**S. indica.** See Nardostachys *jatamansi.*—**S. inguinalis.** See *S.*-bandage *for the groin.*—**S. manus.** See *S.*-bandage *for the hand.*—**S. nardi.** See Nardostachys *jatamansi.*—**S. pectoris.** See *Chest*-bandage.—**S. pedis.** See *S.*-bandage *for the foot.*—**S. perinæi.** See *S.*-bandage *for the perinæum.*—**S. pollicis.** See *S.*-bandage *for the thumb.*—**S. pro luxatione carpi (seu manus).** See *S.*-bandage *for the hand.*—**S. pro luxatione pedis, S. tarsi.** See *S.*-bandage *for the foot.*—**Tinctura spicæ indicæ.** See *Essentia spicæ indicæ.*

SPICANARD (Fr.), n. Spek-a^3-na^{3}r. See Spikenard.—**Faux s.** See Allium *victoriale.*—**S. commun.** See Lavandula *vera.*

SPICATE, adj. Spik'at. Lat., *spicatus* (from *spicare*, to furnish with spikes). Ger., *ährig* (1st and 2d def's), *ährenhabend* (1st def.). 1. Provided with a spike. 2. Disposed in spikes. [α, 35.] 3. See Spiciform.

SPICE, n. Spis. Gr., ἄρωμα. Lat., *species.* Fr., *épice.* Ger., *Würze, Gewürz.* A fragrant or aromatic, pungent vegetable substance, used for flavoring food. [α, 35.]—**S. plaster.** See Emplastrum *aromaticum.*

SPICEBERRY, n. Spis'be^{2}r-i^2. See Gaultheria *procumbens* and Benzoin *odoriferum.*

SPICED, adj. Spist. Rendered aromatic by means of spice.

SPICEWOOD, n. Spis'wu^{4}d. See Benzoin *odoriferum.*

SPICIFORM, adj. Spis'i^2-fo^{2}rm. Lat., *spiciformis* (from *spica*, a spike, and *forma*, form). Fr., *spiciforme.* Resembling or having the form of a spike. [α, 35.]

SPICKE (Ger.), n. Spek'e^2. See Lavandula *spica.*—**Indische S.** See Spikenard.

SPICKNEL, n. Spi^{2}k'ne^{2}l. See Meum *athamanticum.*

SPICULATE, adj. Spi^{2}k'u^{2}l-at. Lat., *spiculatus* (from *spiculum* [*q. v.*]). Fr., *spiculé.* 1. Covered with spicules. 2. Having the form of a spicule. 3. Of a spike, composed of many sessile spikelets applied closely to the axis. 4. Of a leaf, cordato-hastate or cordato-sagittate. [α, 35.]

SPICULE, n. Spi^{2}k'u^{2}l. Lat., *spiculum* (dim. of *spica*, a point). Fr., *s.*, *épillet* (2d def.). Ger., *Aehrchen* (2d def.). 1. A fine, erect point. 2. A spikelet of grasses and sedges; a cluster of one or more flowers forming one of the little spikes of a compound spike. 3. A sterigma. 4. An acicular crystal. [α, 35.] 5. See Spiculum (1st def.).—**Bony s., Osseous s.** One of the minute rod-like processes of bony matter which extend in a radiating manner from the centre of ossification. [J, 24, 30.]

SPICULUM (Lat.), n. n. Spi^{2}k(spek)'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). 1. A pointed, needle-shaped body. [α, 27.] 2. See Bony *spicule.*—**S.**

amoris. A love-dart; a copulatory dart-like organ in some gasteropods and worms. [α, 48.]

SPIDER, n. Spid'u^{5}r. Gr., ἀράχνη, ἀράχνης. Fr., *araignée.* Ger., *Spinne.* See ARANEA (1st def.) and cf. COBWEB.—**Itch-s.** See SARCOPTES *scabiei.*

SPIDERWORT, n. Spid'u^{5}r-wu^{5}rt. The genus *Tradescantia.*

SPIEGEL (Ger.), n. Speg'e^{2}l. See MIRROR and SPECULUM.—**Gebärmutters'.** See *Vaginal* SPECULUM and *Uterine* SPECULUM.—**Kehlkopfs'.** See LARYNGOSCOPE.—**S'kunst.** See CATOPTRICS.—**S'untersuchung.** Examination by means of a speculum. [α, 48.]

SPIERAPFEL (Ger.), **SPIERBAUM** (Ger.), **SPIERBIRNE** (Ger.), n's. Sper'a^{3}pf-e^{2}l, -ba^3-u^{4}m, -bern-e^2. See PYRUS *sorbus* and PYRUS *torminalis.*

SPIERSÄURE (Ger.), n. Sper'zoir-e^2. See SORBIC ACID.

SPIERSTAUDE (Ger.), n. Sper'sta^3-u^{4}d-e^2. See SPIRÆA.

SPIESSIG (Ger.), adj. Spes'i^{2}g. See ACICULAR.

SPIESSGLANZ (Ger.), n. Spes'gla^{3}nts. See ANTIMONY and ANTIMONY *trisulphide.*—**Brauner S.** See *Crocus* ANTIMONII.—**Gewaschener schweisstreibender S.** See ANTIMONIUM *diaphoreticum lotum.*—**Grauer oxydulirter S., Grauer Sauers'** (oder **S'-kalk**), **Graues S'oxyd, Graues S'oxydul.** See ANTIMONY *ash.*—**Graus'erz.** See ANTIMONY *trisulphide.*—**Kalinische S'leber.** See *Hepar* ANTIMONII.—**Scharfe S'tinctur.** See *Tinctura* ANTIMONII *aurata.*—**Schwefels'.** See ANTIMONY *pentasulphide.*—**Schweisstreibender S.** See ANTIMONIUM *diaphoreticum.*—**S'blumen.** See *Flores* ANTIMONII.—**S'blumenschnee.** See *Nix* ANTIMONII.—**S'butter.** See ANTIMONY *trichloride.*—**S'erz.** See ALABASTER (1st def.).—**S'glas.** See *Vitrum* ANTIMONII.—**S'könig, S'metall.** See *Regulus* ANTIMONII.—**S'mittel.** An antimonial drug.—**S'mohr.** See ÆTHIOPS ANTIMONIALIS.—**S'morsellen.** See TROCHISCI *stibiati.*—**S'oxydulat.** See ANTIMONY *ash.*—**S'safran.** See *Crocus* ANTIMONII.—**S'salpeter.** See NITRUM *antimoniatum.*—**S'säure.** See ANTIMONIC *acid.*—**S'schwefel.** See ANTIMONY *pentasulphide.*—**S'wein.** See *Vinum* ANTIMONII.—**Tartarisirte S'tinctur.** See *Tinctura* ANTIMONII *aurata.*—**Ungewaschener schweisstreibender S.** See ANTIMONIUM *diaphoreticum nitratum.*—**Weisses S'oxyd.** See ANTIMONIUM *diaphoreticum lotum.*—**Weisss'erz.** See ANTIMONY *trioxide.*

SPIESSGLAS (Ger.), n. Spes'gla^{3}s. See ANTIMONY.

SPIGELIA (Lat.), n. f. Speg-e^{2}l'i^2-a^3. From *A. van der Spiegel*, a Belgian anatomist. Fr., *spigèle* (1st def.), *spigétie* (1st def.). Ger., *Spigelie* (1st def.). 1. A genus of the *Loganiaceæ.* The *Spigeleæ* are a tribe of the *Loganiaceæ.* The *Spigeliaceæ* are an order of plants. The *Spigelieæ* are: Of Dumortier, a tribe of the *Gentianaceæ*; of Bentham and Hooker, a subtribe of the *Euloganieæ.* 2. (Indian) pinkwort; in the U. S. Ph., the rhizome and rootlets of *S. marilandica.* [α, 35.]—**Extractum spigeliæ fluidum** [U. S. Ph.]. A fluid extract made by moistening 100 grammes of s. in No. 60 powder with 30 of alcohol of sp. gr. 0·928, exhausting in a percolator with more of the alcohol, reserving 85 c. c., evaporating the rest to a soft extract, mixing the two, and bringing up to 100 c. c. with more of the alcohol. [B, 95 (α, 38).]—

SPIGELIA MARILANDICA. [A, 327.]

Herba spigeliæ [Belg. Ph.]. Fr., *spigétie anthelminthique* [Fr. Cod.]. The flowering plant of *S. anthelminthica.* [B, 95 (α, 38).]—**Infusum spigeliæ** [U. S. Ph., 1870]. An infusion of s. in twelve times as much boiling water, strained after two hours. [B, 119 (α, 38).]—**S. anthelmia, S. anthelminthica, S. arabaca.** Fr., *spigélie anthelmie* (ou *anthelminthique* [Fr. Cod.]), *brainvillière.* Ger., *Wurmkraut, wurmtreibende Spigelie.* Pinkroot of Demerara: a common weed in the West Indies and South America. It has the properties, though in greater degree, of *S. marilandica.* Both the root and the herb, *radix* et *herba spigeliæ* (*anthelmiæ*, seu *arabacæ*), are used. [α, 35.]—**S. glabrata, S. laurina.** Fr., *spigélie glabre.* Ger., *kahle* (oder *glänzende*) *Spigelie.* A suffrutescent species growing in Brazil. Its root, which tastes and smells like *Valeriana officinalis*, is used as an excitant, diaphoretic, and anthelminthic. [α, 35.]—**S. lonicera, S. marilandica.** Fr., *spigétie de Maryland, œillet de la Caroline.* Ger., *marylandische Spigelie, indianischer Pink, Gegenblattspigelie, marylandisches Wurmkraut.* Carolina (or Indian) pink, worm-grass; a perennial herb growing in the southern and southwestern United States. Its rhizome and the rootlets constitute the s., or pinkroot, of the U. S. Ph. In overdoses this is an acro-narcotic poison. It is said to be alterative and tonic, but is mainly used as an anthelminthic. The herb and leaves are less active. [α, 35.]

SPIGÉLIE (Fr.), n. Spe-zha-le. See SPIGELIA.—**S. anthelminthique.** See *Herba* SPIGELIÆ.

SPIGELINE, n. Spi^{2}j'e^{2}l-en. Fr., *spigéline.* Ger., *Spigelin, Spigeliebitter.* A reddish-brown, bitter, acrid, nauseous substance regarded as the active principle of the root of *Spigelia anthelmia*; according to Dudley, a volatile alkaloid. It is neutral, uncrystallizable and very deliquescent, and acts as a purgative, producing also vertigo and intoxication. [B, 38, 48, 93 (α, 14, 35).]

SPIGNEL, n. Spi^{2}g'ne^{2}l. See MEUM *athamanticum.*

SPIKE, n. Spik. Lat., *spica.* Fr., *épi* (1st def.). Ger., *Aehre* (1st def.). 1. A form of indeterminate anthotaxis in which the flowers are sessile, or nearly so, and are arranged on an elongated axis. 2. In the *Equisetineæ*, the fruiting cone, consisting of compactly arranged modified leaves (sporophylls) elevated centrally on a short stalk. [α, 35.] 3. See LAVANDULA *spica.* 4. See SPIKENARD.—**Compound s.** A collection of spikes (spikelets) arranged in a racemose manner. [α, 35.]—**Oil of s.** Lat., *oleum* (*lavandulæ*, seu *florum*) *spicæ.* Ger., *Spiköl, Spieköl.* The essential oil of *Lavandula spica.*

SPIKED, adj. Spikd. See SPICATE.

SPIKELET, n. Spik'le^{2}t. See SPICULE (2d def.).

SPIKENARD, n. Spik'na^{3}rd. Ger., *Spiek, Spieke.* The *Nardostachys jatamansi* or its root. [α, 35.]—**Celtic s.** The *Valeriana celtica* or its root. [α, 35.]—**Indian s.** See *S.*—**Jamaica s.** See HYPTIS *ebracteata.*

SPILANTHES (Lat.), n. f. Spi^{2}l-a^{2}nth(a^{3}nth)'ez(as). Gen., *-anth'is.* From σπίλος, a spot, and ἄνθος, a flower. Written also *spilanthus.* Fr., *spilanthe.* Ger., *Fleckblume.* The typical genus of the *Spilantheæ*, which are a subdivision of the *Heliantheæ.* [α, 35.]—**Capitula et folia spilanthis, Herba spilanthis** [Ger. Ph., 1st ed.]. Fr., *cresson de Pará* [Fr. Cod.]. The leaves and flowering tops [Fr. Cod.] (flowering herb [Ger. Ph., Austr. Ph., Hung. Ph.]) of *S. oleracea.* [B, 95 (α, 38).]—**S. acmella.** Fr., *abécédaire, cresson de l'Isle-de-France, herbe de Malacca.* Ger., *wahre Fleckblume, indianisches Harnkraut.* The alphabet-plant of the East Indies; a bitter balsamic herb introduced into many tropical countries. The herb and seed, *herba* et *semen acmellæ* (seu *acemellæ*, seu *achmellæ*, seu *attmellæ*, seu *spilanthi*), especially the herb, are diuretic, diaphoretic, and antiscorbutic. The leaves are powerfully sialagogue. In India they are given to infants to munch, under the belief that this will enable them to talk the more readily. [α, 35.] Cf. ACMELLA *mauritiana.*—**S. alba.** Ger., *weisse Fleckblume.* A Peruvian species having the same properties as *S. oleracea*; used especially as a sialagogue. [α, 35.]—**S. ciliata.** Fr., *spilanthe ciliée, herbe aux serpens.* An antiscorbutic species of tropical America. In Brazil it is regarded as possessing the properties of guaco. The juice is used in snake-bites. [α, 35.]—**S. oleracea.** Fr., *cresson de Pará* [Fr. Cod.] (ou *du Brésil*). Ger., *kressenartige Fleckblume, Para-Kresse.* Pará cress; a pungent salad plant said to be indigenous to the East Indies, but found also wild in South America. The leaves and flower-heads contain spilanthin, and are powerfully sialagogue. They are used in odontalgia, in affections of the gums and throat, in India, with *Inula bifrons*, in the preparation of certain dentifrices, as an antiscorbutic, stimulant, hydragogue, etc. [α, 35.]—**S. pseudo-acmella.** Ger., *falsche Fleckblume.* An East Indian species often confounded with *S. acmella*, and having probably the properties of the latter. [α, 35.]—**S. urens.** Fr., *spilanthe brûlante.* A very pungent East Indian species; used especially as a masticatory and in odontalgia. [α, 35.]—**Tinctura spilanthis composita.** A tincture made by digesting 40 parts of fresh [Hung. Ph., Austr. Ph.] (dried [Ger. Ph., 1st ed., Swiss Ph.]) herb of *S. oleracea* with 40 of the root of *Anacyclus officinarum* and 200 of dilute alcohol for a week [Swiss Ph.] (for 8 days [Ger. Ph.]), or with 20 of the root of *Anacyclus officinarum* and 120 of 90-per-cent. alcohol for three days [Austr. Ph., Hung. Ph.]; or by macerating 333 parts of the herb of *S. oleracea* and 165 of the root of *Anacyclus officinarum* in 1,000 of 92-per-cent. alcohol for six days [Belg. Ph.]. [B, 95 (α, 38).]

SPILANTHIN, n. Spi^{2}l-a^{2}nth'i^{2}n. Fr., *spilanthine.* Ger., *S.* An acrid crystalline principle obtained from *Spilanthes oleracea.*

SPILANTHUS (Lat.), n. m. Spi^{2}l-a^{2}nth(a^{3}nth)'u^{3}s(u^{4}s). See SPILANTHES; of the Austr. Ph. and Hung. Ph., see *Herba* SPILANTHIS.—**Herba** (**et semen**) **spilanthi.** See under SPILANTHES *acmella.*—**Tinctura spilanthi** (**oleracei**) **composita.** See *Tinctura* SPILANTHIS *composita.*

SPILLBAUM (Ger.), n. Spi^{2}l'ba^3-u^{4}m. See EUONYMUS (1st def.) and RHAMNUS *frangula.*

SPILOMA (Lat.), n. n. Spi^{2}l-om'a^3. Gen., *-om'atos* (*-atis*). Gr., σπίλωμα. See SPILUS.

SPILOPLANIA (Lat.), n. f. Spi^{2}l-o(o^3)-plan(pla^{3}n)'i-a^3. From σπίλος, a spot, and πλάνη, a wandering. 1. Elephantiasis Græcorum. 2. Erythema fugax. [α, 34.]

SPILOPLAXIA (Lat.), n. f. Spi^{2}l-o(o^3)-pla^{2}x(pla^{3}x)'i^2-a^3. From σπίλος, a spot, and πλάξ, a plate. Fr., *spiloplaxie.* Ger., *Spiloplaxie.* See LEPROSY.—**S. indica.** The leprosy of India. [L.]—**S. scorbutica.** See ROSE *of the Asturias.*—**S. vulgaris.** See LEPROSY.

SPILOSIS (Lat.), n. f. Spi^{2}l-os'i^{2}s. Gen., *-os'eos* (*-is*). Fr., *spilose.* Ger., *Flecksucht.* See EPICHROSIS.—**S. permanens.** See SPILUS.

SPILUS (Lat.), n. m. Spil(spi^{2}l)'u^{3}s(u^{4}s). Gr., σπίλος. A spot, stain, or macule. [G.] See NÆVUS *pigmentosus.*

SPINA (Lat.), n. f. Spin(spen)'a^3. 1. See SPINE. 2. Any one of various thorny plants. 3. Of Scopoli, a section of the genus *Mespilus.* [α, 35.]—**S. accessoria ischii.** An anomalous process projecting from the sacro-iliac synchondrosis into the great sciatic notch. [L.]—**S. alba.** The *Onopordon acanthium, Rhamnus catharticus, Lycium europæum, Mespilus oxyacantha*, or *Silybum marianum.* [α, 35.]—**S. angularis.** Ger., *Wespenbeinstachel.* The spinous process of the ala magna of the sphenoid bone. [L.]—**S. anterior inferior ossis ilii.** See *Anterior inferior* SPINE *of the ilium.*—**S. anterior superior ossis ilii.** See *Anterior superior* SPINE *of the ilium.*—**S. basilaris.** See *Pharyngeal* SPINE.—**S. bicipitalis**

externa. See *S. tuberculi majoris.*—**S. bicipitalis interna.** See *S. tuberculi minoris.*—**S. bifida.** See the major list.—**S. cervalis, S. cervaria, S. cervina.** See Rhamnus *catharticus.*—**S. condyli externi femoris.** See Labium *laterale cristæ ossis femoris.*—**S. condyli interni femoris.** See Labium *mediale cristæ ossis femoris.*—**S. condyloidea externa.** See *External condylar* ridge.—**S. condyloidea interna.** See *Internal condylar* ridge.—**S. cruciata.** See Spine *of the tibia.*—**S. Darwinii.** See Spine *of Darwin.*—**S. domestica.** See Rhamnus *catharticus* and Rhamnus *frangula.*—**S. dorsi.** The vertebral column. [A, 47.]—**S. ethmoidalis.** See *Ethmoidal* spine.—**S. frontalis.** See *Frontal* crest and *Nasal* spine (1st def.).—**S. frontalis interna.** See *Frontal* crest.—**S. helicis.** 1. A slight projection on the lower anterior margin of the helix. [L.] 2. See Crura *bifurcata* (under Crus).—**S. ilio-pectinea.** See *Ilio-pectineal* line.—**S. intercondyloidea, S. intermedia.** See Spine *of the tibia.*—**S. ischiadica, S. ischii.** See Spine *of the ischium.*—**S. jugularis.** A sharp elevation on the jugular process of the occipital bone. [L, 332.]—**Spinæ mentales internæ.** See *Genial* tubercles.—**S. mentalis externa.** The mental protuberance.—**S. muscularis inferior.** An elevation on the outer surface of the arytænoid cartilage near its lower third. [L, 31.]—**S. muscularis superior.** A blunt, knot-like prominence near the upper part of the external surface of the arytænoid cartilage. [L, 31.]—**S. musculi teretis majoris.** An anomalous blunt, tooth-like projection of the anterior border of the scapula for the attachment of the teres major. [L, 332.]—**Spinæ mustelæ piscis.** See under Lota *vulgaris.*—**S. nasalis.** See *Nasal* spine.—**S. nasalis anterior.** See *Anterior nasal* spine.—**S. nasalis externa** (seu **ossis frontis**). See *Nasal* spine (1st def.).—**S. nasalis ossis maxillaris superioris.** See *Anterior nasal* spine.—**S. nasalis palatina** (seu **posterior ossis palatini**). See *Posterior nasal* spine.—**S. nasalis superior.** See *Nasal* spine (1st def.).—**S. navicularis.** An anomalous process at the union of the external and inferior surfaces of the scaphoid bone of the foot. [L, 332.]—**S. neuralis.** See *Neural* spine.—**S. occipitalis (exterior).** See *External occipital* protuberance.—**S. occipitalis interna.** See *Internal occipital* protuberance.—**S. orbitalis inferior.** A slight prominence below the s. orbitalis superior. [L.]—**S. orbitalis superior.** A slight prominence on the border of the ala magna of the sphenoid bone, projecting into the sphenoidal fissure at the point where it is slightly constricted. [L, 332.]—**S. ossis ilii anterior superior.** See *Anterior superior* spine *of the ilium.*—**S. ossis ischii.** See Spine *of the ischium.*—**S. ossis pubis.** See spine *of the pubes.*—**S. pedum.** See Clavus (1st def.).—**S. pharyngea.** See *Pharyngeal* spine.—**S. posterior inferior ossis ilii.** See *Posterior inferior* spine *of the ilium.*—**S. posterior superior ossis ilii.** See *Posterior superior* spine *of the ilium.*—**S. pubis.** See Spine *of the pubes.*—**S. recti lateralis.** See *S. orbitalis superior.*—**S. scapulæ.** See Spine *of the scapula.*—**S. solutiva.** See Rhamnus *catharticus.*—**S. sphenoidalis.** See *S. angularis.*—**S. tibiæ.** See Spine *of the tibia.*—**S. transversa.** See *S. muscularis inferior.*—**S. trochanterica major.** See Labium *laterale cristæ ossis femoris.*—**S. trochanterica minor.** See Labium *mediale cristæ ossis femoris.*—**S. trochlearis.** See Trochlea.—**S. tuberculi majoris (húmeri).** The ridge forming the external margin of the bicipital groove. [L.]—**S. tuberculi minoris (humeri).** The ridge forming the inner margin of the bicipital groove. [L.]—**S. tympanica anterior.** A prominent point on the anterior and upper part of the tympanic ring, at the anterior end of a ridge forming the upper boundary of the sulcus malleolaris. [F, 33.]—**S. tympanica major.** Of Helmholtz, the s. tympanica postica of the fœtal temporal bone. It is the anterior point of insertion for the ligaments supporting the malleus in the developed organ. [F, 33.]—**S. tympanica minor.** Of Helmholtz, a point on the postero-superior portion of the annulus tympanicus, which forms the posterior point of insertion for the suspensory ligaments of the malleus. [F.]—**S. tympanica posterior** (seu **postica**). See *S. tympanica major.*—**S. ventosa.** Ger., *Winddorn.* 1. A disease of the bones which causes them to dilate as if distended with air (cf. Osteomalacia). 2. A bony tumor due to internal caries, generally confined to the wrist or ankle. [E.]—**S. vertebræ, S. vertebralis.** See *Spinous* process *of a vertebra.* [L.]—**S. vestibuli.** See Crista *vestibuli.*—**S. zygomatica.** An offshoot from the zygomatic process of the superior maxilla which aids in forming the sphenomaxillary fissure. [L.]—**Syrupus spinæ cervinæ.** A syrup made by boiling equal parts of sugar and the purified juice of *Rhamnus catharticus* to the proper consistence. [B, 119 (*a*, 38).]

SPINA BIFIDA (Lat.), n. f. Spin(spen)′a^3 bi(bi^2)′fi^{2}d-a^3. Ger., *Rückenspalte, Rückgratsspalte.* A congenital malformation caused by absence or deficiency of the laminæ or spinous processes of some of the vertebræ, usually associated with a sacculated protrusion of the membranes of the spinal cord. The sac contains cerebro-spinal fluid and sometimes a portion of the cord. [*a*, 34.]—**False s. b.** Any congenital tumor communicating with the spinal canal but not with the spinal membranes. [E, 4.]—**Pelvic s. b.** S. b. in which the cleft is in the anterior surface of the vertebral column, the sac presenting in the pelvis. [T. G. Thomas, "Gaillard's Med. Jour.," Mar., 1885, p. 237 (*a*, 34).]—**S. b. aperta.** S. b. associated with fissure of the superjacent tissues. [A, 319 (*a*, 34).]—**S. b. cervicalis.** S. b. of the cervical vertebræ. [A, 319 (*a*, 34).]—**S. b. crânien** (Fr.). An encephalocele associated with a hydromeningocele. [Dalbaune, "Lyon méd.," Oct. 4, 1885, p. 143 (*a*, 34).]—**S. b. cystica.** S. b. with the protrusion of a cyst through the fissure. [L, 57 (*a*, 34).]—**S. b. dorsalis.** S. b. of the dorsal vertebræ. [A, 319 (*a*, 34).]—**S. b. lumbalis.** S. b. of the lumbar vertebræ. [A, 319 (*a*, 34).]—**S. b. lumbo-sacralis.** S. b. of the lumbo-sacral region. [A, 319 (*a*, 34).]—**S. b. occulta.** That variety in which the bony deficiency is present, but no tumor.—**S. b. sacralis.** S. b. of the sacral vertebræ. [A, 319 (*a*, 34).]

SPINACH, n. Spi^{2}n′e^{2}j. The genus *Spinacia*, especially *Spinacia oleracea.* [*a*, 35.]—**Garden s.** See Spinacia *oleracea.*—**New Zealand s.** The *Tetragonia expansa* and *Tetragonia implexicoma.* [*a*, 35.]—**Wild s.** The *Chenopodium bonus Henricus, Chenopodium album, Beta maritima*, or *Campanula latifolia.*

SPINACIA (Lat.), n. f. Spi^{2}n(spen)-as(a^{3}k)′i^2-a^3. From *spina*, a spine. Fr., *épinard.* Ger., *Spinat.* Spinach (or spinage); a genus of the *Chenopodiaceæ.* The *Spinacieæ* are a tribe of the suborder *Cyclolobeæ* (cf. Atripliceæ [2d def.]). [*a*, 35.]—**S. glabra, S. inermis.** Fr., *épinard lisse, grand* (ou *gros*) *épinard, épinard de Hollande.* Ger., *glattfrüchtiger Spinat.* Round-seeded spinach; a culinary herb indigenous to the East Indies, usually regarded as a variety of *S. oleracea*, the properties of which it possesses. [*a*, 35.]—**S. oleracea, S. spinosa.** Fr., *épinard cultivé* (ou *cornu*). Ger., *stachelfrüchtiger Spinat, Gemüsespinat.* Garden spinach; supposed to be indigenous to western Asia. The herbaceous parts, *herba spinaciæ* (seu *spinachiæ*, seu *lapathi hortensis*), are mildly laxative; they are used as an emollient poultice. [*a*, 35.]

SPINAL, adj. Spi′n′l. Gr., ῥαχίτης. Lat., *spinalis.* Pertaining to the vertebral column.

SPINALIS (Lat.), adj. Spin(spen)-al(a^{3}l)′i^{2}s. From *spina*, the spine. Spinal; as a n. (Ger., *Dornmuskel*), a muscle arising from or inserted into spinous processes of the vertebræ.—**S. capitis.** See Rectus *capitis posticus major.*—**S. cervicis, S. colli.** Fr., *élévateur épineux de la nuque.* Ger., *Dornmuskel des Halses.* A muscle arising from the spinous processes of the fifth and sixth cervical vertebræ, occasionally from those of one or two dorsal vertebræ, and inserted into the spines of the axis and an irregular number of the vertebræ below. [L, 31, 142, 332.]—**S. dorsi (major).** Fr., *élévateur épineux du dos.* Ger., *Dornmuskel des Rückens.* A long, narrow muscle arising from the lateral surface of the spinous processes of the two upper lumbar and two lower dorsal vertebræ, and inserted into the spinous processes of from 4 to 8 upper dorsal vertebræ. [L, 31, 142, 332.]—**S. lumborum.** See Longissimus *dorsi.*

SPINAT (Ger.), n. Spen-a^{3}t′. See Spinacia.

SPINDEL (Ger.), n. Spi^{2}nd′e^{2}l. See Spindle, Modiolus (1st def.), and Rhachis (3d def.).—**Furchungss'.** See *Nuclear* spindle.—**Kerns'.** See *Nuclear* spindle and *Achromatic* figure.—**Muskels'n.** 1. Of Bremer, young motor end-plates. 2. Of Kölliker, young or incompletely developed striated muscular fibres. 3. Of Kraske, parts of degenerating striated muscular fibre. 4. Striated muscular fibres. [J, 35.]—**Richtungss'.** See *Nuclear* spindle.—**S'bein.** The radius.—**S'blatt.** See Lamina *spiralis ossea.*—**S. der Schnecke.** See Modiolus (1st def.).—**S'element.** A fusiform anatomical element. [J.]—**S'förmig.** See Fusiform.—**S'staar.** See *Fusiform* cataract.—**Theilungss'.** See *Nuclear* spindle.

SPINDLE, n. Spi^{2}n′d′l. A.-S., *spindel.* Lat., *fusus.* Fr., *fuseau.* Ger., *Spindel.* 1. The tapering rod or pin on which the thread is wound in spinning. 2. Anything of s.-like shape (cf. Fusiform). [*a*, 48.]—**Achromatic s., Caryocinetic s.** See *Nuclear s.*—**Cleavage s.** See *Nuclear s.* and Amphiaster (1st def.).—**Muscle s's.** See *Muskel*spindeln.—**Nuclear s., Nucleated s., Nucleus s., Segmentation s.** Fr., *fuseau nucléaire, amphiastre de rebut.* Ger., *Kernspindel, achromatische Fadenspindel.* Of Bütschli, the striated s.-shaped or double cone-like appearance of the nucleus, especially in ova, during indirect division or caryocinesis. The striæ (achromatic fibrils) are supposed to be formed of the achromatin of the nucleus, with perhaps an admixture of protoplasm from the cell-body. They extend in a curved direction from pole to pole of the nucleus, and the nuclear fibrils move along these lines to the poles, where the daughter nuclei are formed. At the ends of the nuclear s. faint striæ are often seen, radiating outward and giving something the appearance of a sun or star (see Amphiaster [1st def.]). [J, 1, 30, 32; "Quart. Jour. of Micr. Sci.," 1876–1884; "Archiv. f. mikr. Anat.," 1878–1884 (J).]—**Thiersche's s.** (Ger.). A small s.-shaped object having an aperture in the centre for the passage of a ligature thread; used to secure apposition of tissues in ligaturing. [*a*, 34.]

SPINE, n. Spin. Gr., ἄκανθα (1st def.), ῥάχις (2d def.). Lat., *spina.* Fr., *épine* (1st def.), *colonne vertébrale* (2d def.). Ger., *Dorn, Gräte, Stachel* (all 1st def.), *Ruckgrat* (2d def.). 1. A hard sharp projection. 2. The vertebral column; so called from the spinous processes of the vertebræ. [C.] 3. In fishes, a non-jointed fin ray. [L, 341 (*a*, 27).]—**Anterior inferior s. of the ilium.** Fr., *épine iliaque antérieure et inférieure* (ou *antéro-inférieure*). Ger., *vorderer unterer Darmbeinstachel.* A rough eminence on the margin of the ilium immediately above the acetabulum. [L.]—**Anterior nasal s.** The inferior sharp edge of the nasal crest of the superior maxilla. [L.]—**Anterior superior s. of the ilium.** Fr., *épine iliaque antérieure et supérieure.* Ger., *vorderer oberer Darmbeinstachel.* The anterior termination of the crest of the ilium. [L.]—**Cleft s., Cloven s.** See Spina bifida.—**Cruciate s.** See *S. of the tibia.*—**Ethmoidal s.** A slight projection in the middle line of the anterior border of the body of the sphenoid bone, which articulates with the cribriform plate of the ethmoid bone. [L.]—**External occipital s.** See *External occipital* crest.—**Frontal s.** See *Frontal* crest.—**Hæmal s.** The portion of the hæmal arch of a typical vertebra that closes it in. In the first seven dorsal vertebræ it is represented by the sternum, in the sacral vertebræ by the symphysis pubis, in the occipital vertebra by the manubrium sterni, in the parietal vertebra by the body of the hyoid bone, in the frontal vertebra by the symphysis of the inferior maxilla, and in the nasal vertebra by the præmaxilla. [L.]—**Iliac s's.** Ger., *Darmbeinstacheln.* The anterior superior and inferior and the posterior superior and inferior s's of the ilium. [L.]—**Inferior anterior nasal s.** See *Anterior nasal s.*—**Inferior posterior nasal s.** See *Posterior nasal s.*—**Irritable s.** See *Spinal* irritation.—**Ischiadiac s., Ischiatic s.** See *S. of the ischium.*—**Mental s's.** See *Genial* tubercles.—**Nasal s.** Ger., *Nasenstachel.* 1. A sharp process which descends in the middle line from the inferior surface of the frontal bone, between the

superior maxillæ. [L.] 2. See *Anterior nasal s.* 3. See *Posterior nasal s.*—**Nasal s. of the palate bone.** See *Posterior nasal s.*—**Nasal s. of the superior maxillary bone.** See *Anterior nasal s.*—**Neural s.** The portion of the neural arch of the typical vertebra that closes it in. It is found in all the vertebræ proper (except the last sacral and the coccygeal) as the spinous process. In the occipital vertebra it is the occipital plate, in the parietal the parietal bones, in the frontal the frontal bone, and in the nasal the nasal bones. [L.]—**Palatine s.** See *Posterior nasal s.*—**Peroneal s.** See Processus *trochlearis calcanei.*—**Pharyngeal s.** Lat., *crista basilaris.* Fr., *épine basilaire.* A short elevation in the middle line of the lower surface of the basilar portion of the occipital bone. [L.]—**Posterior inferior s. of the ilium.** Fr., *épine iliaque postéro-inférieure.* Ger., *hinterer unterer Darmbeinstachel.* A slight eminence on the margin of the ilium immediately above the great sciatic notch. [L.]—**Posterior nasal s.** Ger., *hinterer Nasenstachel.* A prominence formed by the union in the middle line of the elevations upon the posterior internal contiguous margins of the palatal plate of the palate bones. [L, 31, 332.]—**Posterior superior s. of the ilium.** Fr., *épine iliaque postéro-supérieure.* Ger., *hinterer oberer Darmbeinstachel.* The posterior extremity of the crest of the ilium. [L, 31, 332.]—**Pubic s.** See *S. of the pubes.*—**Railway s.** Ger., *Rückenmarkserschütterung nach Eisenbahnunfällen, Eisenbahnkrankheit.* 1. Chronic meningomyelitis consequent upon shock caused by a railway accident. 2. A peculiar train of symptoms following a railway accident. There is initial shock followed by collapse or a period of excitement, there are temperature and pulse disturbances, and the feebleness may terminate in death or there may be temporary improvement that is followed by various functional nervous and mental disturbances. The condition in the latter case may persist for life. No gross lesion can be detected on post-mortem examination. [α, 34.]—**Sciatic s.** See *S. of the ischium.*—**Sphenoidal s.** See Spina *angularis.*—**S'ache.** See Rhachialgia.—**S. of Darwin.** Ger., *Darwin'scher Vorsprung, Darwin'sches Spitzohr.* A slight projection of the free margin of the helix near the upper part, assumed to represent the inverted upper pointed extremity of the ear of quadrupeds. [L, 142. 332.]—**S. of Spix.** See Lingula *mandibulæ.*—**S. of the ischium.** Lat., *spina ischii* (seu *ischiadica*). Fr., *épine ischiatique* (ou *sciatique*). Ger., *Sitzbeinstachel.* An elevation on the posterior border of the ischium just behind the acetabulum. It forms the lower boundary of the great sciatic notch. [L.]—**S. of the pubes, S. of the pubic bone.** Lat., *spina pubis, crista obturatoria.* Fr., *épine du pubis.* Ger., *Schambeinstachel, Schambeinkamm.* The outer termination of the crest of the os pubis. [L, 142, 332.]—**S. of the scapula.** Lat., *spina scapulæ.* Fr., *épine de l'omoplate.* Ger., *Schulterkamm.* An osseous plate projecting from the posterior surface of the scapula which extends obliquely upward and outward from a point near the upper fourth of the posterior border to terminate in the acromion process. [L, 31, 142, 332.]—**S. of the sphenoid bone.** See *Ethmoidal s.* and Spina *angularis.*—**S. of the tibia.** Ger., *Schienbeinkamm.* An elevation on the upper surface of the tibia, between its articular surfaces, which terminates in two tubercles. [L, 142, 332.]—**Superior nasal s.** See *Nasal s.* (1st def.).—**Typhoid s.** An acute inflammation of the periosteum and the fibrous structures holding the spinal column together, following upon and caused by typhoid fever. [V. P. Gibney, "N. Y. Med. Jour.," Nov. 30, 1889, p. 596 (α, 34).]—**Zygomatic s.** See Spina *zygomatica.*

SPINELLA (Lat.), n. f. Spi2n(spen)-e2l'la3. Dim. of *spina*, a spine. Fr., *spinelle.* In botany, an appendage intermediate between ordinary hairs and spines; a very rigid hair. [α, 35.]

SPINESCENT, adj. Spi2n-e2s's'nt. Lat., *spinescens* (from *spinescere*, to grow thorny). Fr., *s.* 1. Ending in a sharp, hard point. 2. Of a leaf, bract, stipule, etc., transformed into a spine.

SPINI-AXOÏDO-OCCIPITAL (Fr.), n. Spe-ne-a3x-o-e-do-o2x-ep-et-a3l. See Rectus *capitis posticus major.*

SPINI-AXOÏDO-TRACHÉLI-ATLOÏDIEN (Fr.), n. Spe-ne-a3x-o-e-do-tra3-ka-le-a3t-lo-e-de-a3n2. See Obliquus *capitis major.*

SPINICEREBRAL, adj. Spin-i2-se2r'e2b-r'l. Lat., *spinicerebralis* (from *spina*, a spine, and *cerebrum*, the brain). Fr., *spinicérébral.* See Cerebro-spinal.

SPINI-PUBIO-FÉMORAL (Fr.), n. Spe-ne-pu6-be-o-fam-o-ra3l. See Adductor *femoris longus.*

SPINIRECTOR (Lat.), n. m. Spin(spen)-i2-re2kt(rakt)'o2r. Gen., *-or'is.* From *spina*, the spine, and *rector*, a guider. See Multifidus *spinæ.*

SPINITIS (Lat.), n. f. Spin(spen)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). Fr., *spinite.* See Spondylitis.

SPINNE (Ger.), n. Spi2n'ne2. See Spider.—**Blasenziehende S.** See Cantharis *vesicatoria.*—**S'ngewebe.** See Cobweb.

SPINNERET, n. Spi2n'e2r e2t. Fr., *filière.* See Arachnidium.

SPINNERULES, n. pl. Spi2n'e2r-u2lz. The glandular ducts of the arachnidial papillæ (see under Arachnidium). [B.]

SPINOCOSTALIS (Lat.), n. m. Spin(spen)-o(o3)-ko2st-al(a3l)'i2s. From *spina*, the spine, and *costa*, a rib. A muscle connected with the vertebræ and the ribs. [L.]—**Spinocostales longi.** The serrati postici inferior and superior. [L, 332.]

SPINOLA (Lat.), n. f. Spi2n(spen)'o2l-a3. Dim. of *spina*, the spine. See Spina bifida.

SPINOMETER, n. Spi2n-o2m'e2t-u5r. From *spina*, the spine, and μέτρον, a measure. See Rhachiometer.

SPINOTRANSVERSALIS (Lat.), n. m. Spin(spen)''o(o3)-tra2ns(tra3ns)-vu5rs(wers)-al(a3l)'i2s. From *spina*, the spine, and *transversus*, transverse. See Transversospinalis, Sacrospinalis, and Splenius.—**Spinotransversales brevissimi.** See Transversospinales *breves.*

SPINOTRANSVERSARIUS (Lat.), n. m. Spin(spen)''o(o3)-tra2ns(tra3ns)-vu5rs(we2rs)-a(a3)'ri2-u3s(u4s). A muscle connected with the transverse processes of the vertebræ. [L.]—**Spinotransversarii longi.** The splenius capitis, splenius cervicis, and obliquus capitis major. [L, 332.]

SPINOUS, adj. Spin'u3s. Lat., *spinosus* (from *spina*, a spine). Fr., *épineux.* Ger., *dornig.* Pertaining to a spine or sharp process of a bone; having or constituting such a process or processes. [C.]

SPINTHERISMUS (Lat.), n. m. Spi2nth-e2r(ar)-i2z(i2s)'mu3s-(mu4s). From σπινθηρίζειν, to emit sparks. 1. The production or emission of sparks. [L, 50 (α, 14).] 2. See Photopsia.

SPINTHEROMA (Lat.), n. n. Spi2n-the2r(thar)-om'a3. Gen., *-om'atos* (*-atis*). From σπινθήρ, a spark. Of Blazius, ocular scintillation produced by cholesterin deposits. [α, 34.]

SPINTHEROPIA (Lat.), n. f. Spi2nth-e2r(ar)-op'i2-a3. From σπινθήρ, a spark, and ὤψ, the eye. Fr., *spinthéropie.* See Photopsia.

SPINULOSE, adj. Spi2n'u2l-os. Lat., *spinulosus* (from *spinula*, a small thorn). Fr., *spinuleux.* Spiny; having diminutive spines. [α, 35.]

SPIRA (Lat.), n. f. Spir(sper)'a3. Gr., σπεῖρα. 1. A spiral structure. [α, 48.] 2. A cerebral convolution. [I, 3 (K).]—**S. cerebri.** See *S.* (2d def.).

SPIRACLE, n. Spi2r'a3-k'l. Lat., *spiraculum* (from *spirare*, to breathe). Fr., *spiracule.* Ger., *Luftloch.* A respiratory opening or pore, such as the blow-hole of a cetacean or one of the openings of the tracheæ in an insect. [B, 28 (α, 27).]

SPIRÆA (Lat.), n. f. Spi(spe)-re'(ra3'e2)-a3. From σπεῖρα, a coil. Fr., *spiréa, spirée.* Ger., *Spierstaude.* Meadow-sweet; a genus of rosaceous plants. The *Spiræaceæ* are a family of the *Calicungulia*, now forming a section or tribe (the *Spiræe*, or *Spiræidæ*) of the *Rosaceæ.* The *Spiræoideæ* are a suborder of the *Rosaceæ.* [α, 35.]—**Flores spiræae** (**ulmariæ** [Belg. Ph.]). Fr., *ulmaire, reine-des-prés* [Fr. Cod.]. The flowers of *S. ulmaria.* [B, 95 (α, 38).]—**Oil of s.** Fr., *essence de reine-des-prés.* A colorless, aromatic volatile oil obtained from the flowers and herb of *S. ulmaria.* [α, 35.]—**S. aruncus.** Fr., *barbe de chèvre* (ou *de bouc*), *épine de bouc.* Ger., *Waldspierstaude, Waldgeisbart, Waldbocksbart.* Goat's-beard. The root, leaves, and flowers, *radix, folia,* et *flores barbæ capræ,* were formerly official. [α, 35.]—**S. filipendula.** Fr., *filipendule.* Ger., *knollige Spierstaude, Filipendelwurz, rother Steinbrech, Erdeicheln, Tropfwurz, Wasserfarnkraut.* Dropwort, Italian may, pride of the meadow. The tuberous root, the leaves, and the flowers, *radix, herba* (seu *folia*), et *flores filipendulæ* (seu *filipendulæ tenuifoliæ*, seu *saxifragæ rubræ*, seu *œnanthes*, seu *filicis aquaticæ*, seu *osmundæ*), are used. The roots contain tannin and a volatile oil (probably salicyl aldehyde, which is found also in the leaves and stem). They are used as a stimulant, laxative, and mild astringent, and, along with the bark, in rabies. The leaves and flowers are used as a mild tonic and astringent and as a tæniafuge. [α, 35.]—**S. salicifolia.** Ger., *weideblättrige Spierstaude.* Queen-of-the-meadow; a shrubby species of eastern Europe and western Asia. The seeds are used as an astringent, and the mildly astringent leaves as a substitute for green tea. [α, 35.]—**S. tomentosa.** Fr., *spirée cotonneuse.* Ger., *filzige Spierstaude.* Hardhack, steeple-bush; a bitter, astringent shrub abundant in the northern United States. The root was once official in the U. S. Ph., but is said to be less active than the leaves and stem. [α, 35.]—**S. ulmaria.** Fr., *ulmaire, ormière, ornière, vignette.* Ger., *Ulmen-* (oder *Sumpf-*) *Spierstaude, Krampfkraut, Wurmkraut, Geisbart.* Bitter-sweet, bride-wort, common meadow-sweet; indigenous to Europe and northern Asia and naturalized in North America. It yields oil of s. The root, leaves, and flowers, *radix, herba,* et *flores reginæ prati* (seu *reginæ pratorum*, seu *ulmariæ*, seu *drimopogonis*, seu *spiræœ*, seu *barbæ caprinæ*, seu *barbulæ caprinæ*), are diuretic, tonic, and astringent. The flowers, and probably other parts, yield salicyl aldehyde. [α, 35.]

SPIRÆIC ACID, SPIRÆIN, n's. Spi-re'i2k, spi-re'i2n. Fr., *acide spiréique, spiréine.* Ger., *Spiräaöl, Spiräasäure, Spiräin.* See Salicyl *aldehyde.*

SPIRAL, adj. Spi'r'l. Lat., *spiralis* (from σπεῖρα, a coil). Ger., *spiralig, spiralförmig, schraubenförmig.* Screw-like; turning like the thread of a screw around an axis; of a flower, having the members arranged in s. series: as a n. (Ger., *Spirale*), a s. line or structure. [α, 35.]—**Cheese s.** See Spirillum *tyrogenum.*—**Curschmann's s's.** See *Leyden's s's.*—**Finkler and Prior's s.** See Spirillum *Finkler-Prior.*—**Fundamental s., Generating s., Genetic s.** Fr., *spire génératrice.* In phyllotaxy, the horizontal projection of an imaginary line winding round an axis either to the right or to the left and passing through the points of insertion of all the leaves on the axis. [α, 35.]—**Leyden's s's.** A thick meshwork of very delicate fibres, commonly looped round in s's, but occasionally retiform, formed in desquamative catarrh of the bronchi and alveoli. They are often overlaid with epithelium and sometimes with Charcot-Leyden crystals. They may be found in the sputum in pneumonia, asthma, or pulmonary tuberculosis. [α, 34.]

SPIRALBLATT (Ger.), n. Sper-a3l'bla3t. A spiral lamina. [L.]—**Knöcherne S.** See Lamina *spiralis ossea.*—**S. der Schnecke.** See Lamina *spiralis.*

SPIRAMEN (Lat.), **SPIRAMENTUM** (Lat.), n's n. Spir(sper)-a(a3)'me2n, -a3-me2nt'u3m(u4m). Gen., *-am'inis, -ment'i.* From *spirare*, to breathe. See Spiracle.

SPIRANTHES (Lat.), n. f. Spir(sper)-a2nth(a3nth)'ez(as). From σπεῖρα, a coil, and ἄνθος, a flower. Fr., *spiranthe.* Ger., *Drehähre, Blüthenschraube.* Lady's-tresses (or -traces); a genus of orchids. The *Spiranthidæ* are a division of the *Neotteæ*; the *Spiranthideæ* are a subtribe of the *Neottieæ.* [α, 35.]—**S. autumnalis.** Ger., *gemeine Drehähre.* Autumn flowering lady's-tresses. The tuberous

roots, *radix triorchidis albæ odoratæ* (seu *orchidis spiralis*), were formerly used as an aphrodisiac. [α, 35.]—**S. diuretica.** A Chilean species, used in ischuria. [α, 35.]

SPIRANTHY, n. Spir'a²nth-i². An occasional development of a flower in which the parts are twisted. [α, 35.]

SPIRATION, n. Spir-a'sh'n. Lat., *spiratio* (from *spirare*, to breathe). See RESPIRATION.

SPIRÉE (Fr.), n. Spe-ra. See SPIRÆA.

SPIRÉINE (Fr.), n. Spe-ra-en. See SALICYL *aldehyde.*

SPIREM, n. Spir'e²m. Lat., *spirema* (from σπεῖρα, a spiral). Fr., *spirème.* Ger., *Mutterknäuel.* In caryocinesis, the phase in which the nuclear figure shows no sign of division into two parts. [L, 351.]

SPIRICLES, n. pl. Spi²r'i²-k'lz. Fr., *spiricules.* Very attenuated threads in the hairs on the surface of certain seeds and achænia. They uncoil when wetted, and are discharged, along with mucilage, from the hairs. [α, 35.]

SPIRILLUM (Lat.), n. n. Spi²r(sper)-i²l'lu³m(lu⁴m). Dim. of *spira*, a coil. A coiled bacillus; a distinct genus of *Schizomycetes* in some classifications. Some authors include in *S.* only the spirally twisted threads in which the coils are rigid and few in number, giving the name *Spirochæte* to those in which the coils are numerous and not rigid. [α, 35.] Cf. VIBRIO.—**Cheese s.** See *S. tyrogenum.*—**S. amyliferum.** A species living in the syrup of beet-root sugar and giving rise to brisk fermentation. [A, 396 (α, 21).]—**S. attenuatum.** A species of varying length, having three convolutions; found in sea-water. [A, 396 (α, 21).]—**S. choleræ asiaticæ.** Fr., *bacille-virgule cholérigène.* Ger., *Kommabacillus.* The comma bacillus (see Plate iii, Fig. 16); a species regarded as the causal agent of Asiatic cholera on account of its constant presence in that disease and its absence in other diseases and in health. It is found in the dejecta and intestinal contents, and, according to Nicati and Rietsch, sometimes in the bile-ducts and gall-bladder, but it never occurs in the other organs or in the blood. It has been observed in small numbers on several occasions in the vomit of cholera, but Flügge suggests that in these cases the vomited matter may have been the intestinal contents which had passed into the stomach. The bacilli are usually minute, and curved like a comma, though at times (as almost always in drop cultivations) they form by the continuous adhesion of the individual bacilli long screw-like filaments. These fragments, or individual bacilli, which vary in length from 0·8 to 2 μ (averaging about 1·5 μ) and have a thickness of from ⅓ to ⅙ their length, are in their youngest state slightly curved or straight, and when more fully developed distinctly curved, sometimes showing a full half-circle. They are usually very active, shooting forward or turning round their axis. The longer spirilla have a slower and more oscillating motion. Under various conditions, as on moist linen or moist earth, they multiply very rapidly. Spore-formation has never been observed with certainty. The s. liquefies gelatin slowly, both in punctures and on plates. In punctures it forms a thin tube, funnel-shaped toward the surface of the gelatin, where it has a diameter after 48 hours of about ⅓ ctm. The funnel contains liquid the level of which is often lower than the surface of the gelatin. It is not till after from 4 to 6 days that the liquefaction has extended to the margin of the glass at the surface of the gelatin. On the plates it forms after 24 hours at 22° C. very minute white points which appear under a low power of the microscope as small, round, whitish-yellow discs which are so refracting that the surface of the plates seem as if sprinkled with bits of glass. These discs, which have an irregular, wavy, not sharply defined margin, become gradually larger, and retain their color, except that the central point becomes somewhat darker. They form, on liquefying the gelatin, funnels containing fluid, the colonies lying at the bottom of the funnels. After 48 hours' growth at 22° C. these funnels measure hardly 1 mm. in diameter at the surface. On the surface of agar-agar the bacillus forms a grayish-yellow, gelatinous, folded coating without liquefying the substratum. Unlike the *S. Finkler-Prior*, it does not grow at all on potatoes at ordinary temperatures, and at higher temperatures forms only a slight, brownish mucous coating. The organisms develop in large numbers in blood-serum, neutralized meat infusion, and milk, the milk not being sensibly altered in character. According to Flügge, in none of the cultivations is there any development of putrefactive gases or foul odor. Buchner asserts, however, that a foul smell was observable in his cultivations of the bacilli in meat infusions. As the bacilli are sensitive to acids, the nutrient jelly, meat infusions, etc., must be slightly alkaline or accurately neutralized. Though the bacilli develop best when in contact with the oxygen of the air, they grow even where that gas is absent, if other conditions are favorable. No growth occurs below a temperature of 16° C., and at 17° C. only a slight growth (Koch). The gelatin cultivations are usually made between 22° C. and 25° C.; between 30° C. and 40° C. the gelatin is completely liquefied. The bacilli are more sensitive to drying than almost any other bacteria, dying in from 2 to 3 hours at the ordinary temperature if spread out in the air on a cover-glass. Hence infection through the air is impossible, unless perhaps in the exceptional cases where bubbles, detached by agitation from infective fluids, might be carried for short distances by currents of air. The presence of saprophytic bacteria, especially when in excess or when the conditions as regards nutrition, temperature, etc., are unfavorable to the comma bacilli, leads rapidly to the death of the latter. According to Koch, if added to sewage, they can not be found after 24 hours, and in impure water they are said to die in 6 or 7 days except when in very large numbers. They will live even at — 10° C.; boiling the fluid containing them, or exposing them for half an hour to a temperature of 60° C., causes their destruction. Alcohol, iron sulphate, hydrochloric acid, and quinine check their development; mercury bichloride and carbolic acid are most effectual in killing them. Natural infection of animals is unknown, and experiments made on them by the usual methods have shown no certain pathogenic action. Rietsch, Koch, and other experimenters have, however, caused the death of guinea-pigs with symptoms of cholera by injections of pure cultivations into the intestinal canal after having caused hyperæmia of the intestine and alteration of peristaltic action; and Koch produced similar results in guinea-pigs by first neutralizing the gastric juice with soda and slowing peristaltic movements with opium or alcohol, and then administering pure cultivations by the mouth. In some cases he used, instead of the pure cultivations, the intestinal contents of animals which had been infected and died. There is a case on record in which a physician was taken sick with cholera under circumstances which seemed to preclude all sources of infection other than the pure cultivations of the bacilli upon which he had been working. The virulence is said to be somewhat decreased if the cultivation is carried on for a long time in meat infusion or nutrient jelly kept at from 20° to 25° C. No inoculations with such bacilli, however, have been shown to be protective. [α, 35.]—**S. Cohnii, S. dentium.** The spirochæte of the saliva; very thin, wavy threads, 10 to 20 μ long, pointed at the extremities, occurring, along with *Leptothrix buccalis*, in the contents of carious teeth and in the deposit on the teeth. [α, 35.]—**S. Finkler-Prior.** A species obtained by Finkler and Prior from the dejecta of patients with cholera nostras, resembling *S. choleræ asiaticæ*, but presenting many differences in its mode of development, especially on potatoes, on which it forms within forty-eight hours, at the temperature of the room, a grayish-yellow coating marked by a white border from the substance of the potato. Further, the curved bacilli are somewhat thicker and longer than the cholera bacilli, and show less regularity in their thickness, being often somewhat pointed at their ends and thicker in the middle. In nutrient substrata containing sugar fermentation occurs with the formation of acid, and in all the cultivations a rather foul odor is developed. According to Buchner, it shows a marked tendency to change its form if the condition of the medium is not favorable; for instance, in gelatin to which 5 per cent. of sugar or 2 per cent. of glycerin has been added it sometimes forms spindles, sometimes spheres, and sometimes monad-bodies. As this organism has been found in other situations than the dejecta of cholera nostras (by Miller in a hollow tooth), as it was found by Finkler and Prior only in dejecta that had been kept so long as to undergo putrefaction, as other observers have not found it in the dejecta of cholera nostras at all, and as the experiments with the cultivations on animals show pathogenic action only under complex conditions, and then but rarely, it is probably saprophytic only. [α, 35.]—**S. leucomelænum.** A rare form of s. having alternating light and dark spaces. It is found in water over decaying *Algæ.* [A, 396 (α, 21).]—**S. Obermeieri.** The *Spirochæte Obermeieri* (see Plate iii, Fig. 18); flexible, colorless threads between 16 and 40 μ long, found in the blood of patients with relapsing fever. It occurs only during the febrile attacks, and is never found in the secretions and evacuations. The threads are not more than $\frac{1}{25000}$ of an inch thick, have from 10 to 20 convolutions, and when fresh exhibit active movements, partly unfolding and becoming wavy throughout their entire length. They resist the action of concentrated acetic acid, and are readily stained by certain dyes, such as fuchsin and alkaline methylene blue. Relapsing fever has been produced in man by accidental inoculations from cuts during autopsies; and Koch and Carter inoculated monkeys with the disease (though without true relapses) with human defibrinated blood containing the spirilla, the blood of the animals showing during the febrile attack large numbers of the spirilla. The monkeys were not protected from a recurrence of the disease by one attack. The fever could not be set up by inoculations with blood not containing the spirilla in a living state. [α, 35.]—**S. plicatile, S. portæ.** A very active organism found in stagnant water, consisting of thin baculi from 110 to 225 μ long, with many narrow turns, forming in most cases a double wavy line. The primary turns are equal in size, the secondary often unequal.—**S. rosaceum.** A species forming a red coloring matter; found in excrement that has been kept in water. [A, 396 (α, 21).]—**S. Rosenbergii.** A species consisting of filaments from 4 to 12 μ long with granules of sulphur; found in brackish water. [A, 396 (α, 21).]—**S. rugula.** See VIBRIO *rugula.*—**S. sanguineum.** A species found in brackish, putrescent water; consisting of cylindrical baculi, rounded at the apex, uniflagellate, 3 μ or more in width, varying in length, usually with 2 turns; its plasma is of a purplish color, and contains numerous granules of sulphur. Zopf refers it to the genus *Beggiatoa.* [α, 35.]—**S. serpens.** Syn.: *Vibrio serpens.* A species occurring, often in dense masses, in stagnant water and various infusions; rapidly moving filaments 0·8 to 1·1 μ thick, 11 to 28 μ long, with 3 or 4 regular permanent turns, and not rarely united in chains. [α, 35.]—**S. tenue.** An exceedingly active form often occurring in heaps or zooglœa masses in marsh water, decoctions of plants, and putrid infusions; very thin threads 4 to 15 μ long, with 2 to 5 turns. [α, 35.]—**S. tyrogenum.** Ger., *Käsespirille.* A species obtained by Deneke from very old cheese, resembling *S. choleræ asiaticæ*, but with smaller individual bacilli and often smaller screws and somewhat narrower twists in the threads. Moreover, it liquefies gelatin more energetically. It forms in 24 hours on gelatin plates small, white, punctiform colonies appearing under a low power of the microscope as dark greenish-brown discs with sharp outlines which disappear as the gelatin begins to liquefy, the margins becoming lighter and the centre of the discs assuming a dark-yellow color. On agar-agar it forms a yellowish-white layer, but does not develop at all on potatoes. From experiments on animals, the organism is regarded as purely saprophytic. [α, 35.]—**S. undula.** Syn.: *Vibrio undula* (seu *prolifer*). A form very common in putrefying liquids, consisting of threads (1 to 1·5 μ thick and 8 to 16 μ long [Saccardo], 1·1 to 1·4 μ by 8 to 12 μ [Flügge]) exhibiting "rapid simultaneously turning and twisting movements." Each thread makes from 1½ to 3 or 4 turns. The flagella are long and slightly arched, becoming thinner toward their ends. [α, 35.]—**S. volutans.** A species found in marsh or stagnant water and in a decoction of dead fresh-water snails; threads, sometimes motile, sometimes non-motile, 1·5 to 2 μ thick, 25 to 30 μ long, with 2½ to 3½ turns, and

with a distinct flagellum at each end. The threads contain a dark granular matter. [α, 35.]

SPIRIT, n. Spi^{2}r'i^{2}t. Lat., *spiritus, alcoolatum.* Fr., *esprit, alcoolat, teinture d'essence.* Ger., *Geist, Sprit.* 1. Of the alchemists, any light or volatile principle, so called from the fanciful analogy existing between the relation of such a principle to the substance whence it was extracted and the relation of the body to the soul. 2. Alcohol, the volatile principle, or s., of wine; subsequently a term mainly restricted to preparations consisting of alcohol distilled with a volatile substance. Such preparations are now, however, usually made by simply dissolving the volatile substance in alcohol. Used without qualification, s. means distilled s. [B.]—**Adiaphoretic s.** Of Boyle, an alcohol (acetone) obtained by the distillation of wood. [A, 306.]—**Adiaphorous s.** Ger., *Mitteldingsgeist, Weinsteingeist.* An old name for an inodorous liquid obtained by distilling cream of tartar. [A, 322.]—**Animal s's.** The nervous fluid (*q. v.*) supposed by the ancients to be formed by a mixture of blood and air. [H; K.]—**Ardent s's.** See *Distilled s's.*—**Aromatic s.** See AQUA *aromatica.*—**Bay s.** See BAY *rum.*—**Beguin's volatile s.** Lat., *spiritus sulphuris volatilis Beguinii.* A blood-red oily liquid described by Beguin in the seventeenth century, prepared by mixing sulphur, quicklime, and sal ammoniac. It consists essentially of a volatile ammonium sulphide, together with an excess of sulphur. [B, 2, 3.]—**Distilled s's.** Alcoholic beverages prepared by distillation. [B.]—**Dyer's s's.** Tin tetrachloride, used as a mordant in dyeing. [B, 3.]—**Ethylic s.** Ger., *Aethylgeist.* Ethyl alcohol. [B.]—**Methylated s., Methylic s.** See METHYL ALCOHOL.—**Nitro-aerial s.** Of Mayou, one of the constituents of the atmosphere, to which he attributed the properties of oxygen; so called from its relation to nitric acid. [Yeo, "Lancet," July 8, 1882, p. 1.]—**Overproof s.** A spirituous liquor containing more alcohol than proof s. [B.]—**Perfumed s.** See SPIRITUS *odoratus.*—**Potato s.** See AMYL ALCOHOL.—**Proof s.** Originally, a liquid containing sufficient alcohol to ignite gunpowder moistened with it when the s. was set on fire; now, according to an act of the British Parliament, a spirituous liquor of sp. gr. 0·923077 at 51° F. (*i. e.*, having at that temperature $\frac{12}{13}$ of the weight of as much water). It contains 49·3 per cent. by weight of alcohol. [B, 3.] See table under ETHYL ALCOHOL.—**Pyroacetic s.** Ger., *Brenzessiggeist.* See ACETONE.—**Pyroligneous s., Pyroxylic s.** See METHYL ALCOHOL.—**Rectified s.** See ETHYL ALCOHOL.—**S. of Mindererus.** See *Liquor* AMMONII *acetatis.*—**Three-six s.** 1. In general, any aqueous solution of alcohol ranging from 22° to 36° Beaumé, and having usually a strength of 33° Beaumé (= 76 per cent. alcohol). 2. An old commercial term for an alcoholic solution of such strength that 3 volumes of it added to 3 volumes of water made 6 volumes of Holland proof s. (marking 19° Cartier). [B, 38, 81, 97.]—**Underproof s.** A spirituous liquor containing less alcohol than proof s. [B.]—**Wood-s.** See METHYL ALCOHOL.

SPIRITUOUS, adj. Spi^{2}r'i^{2}t-u^2-u^{3}s. Lat., *spirituosus.* Ger., *spirituös.* Alcoholic (*q. v.*, 1st and 2d def's); containing alcohol.

SPIRITUS (Lat.), n. m. Spi^{2}r(sper)'i^{2}t-u^{3}s(u^{4}s). Gen., *spir'itus.* See SPIRIT and ETHYL ALCOHOL.—**Abstractitius s.** Alcohol that has been impregnated with some of the principles of a plant by their distillation together. [A, 305.]—**Bussii s. bezoardicus.** Fr., *esprit* (*bézoardique*) *de Bussius.* Syn.: *liquor alcali volatilis compositus.* An old preparation made by distilling 60 parts of s. cornu cervi, 120 of sal ammoniac, 360 of potassium carbonate, 180 of powdered amber, and 7 of essential oil of lemon. [L, 85.]—**Mistura s. vini gallici.** See *Mistura s. vini gallici.*—**S. absolutus.** See *Absolute* ALCOHOL.—**S. acetico-æthereus.** Fr., *éther acétique alcoolisé, liqueur anodine végétale.* A mixture of acetic ether with two, three, or four times as much alcohol. [B, 119 (α, 38).]—**S. æthereus.** 1. See *S.* ÆTHERIS. 2. Ethyl ether. [B. 59.]—**S. æthereus camphoratus.** See *Solutio* CAMPHORÆ *ætherea.*—**S. æthereus ferratus.** See *Tinctura* FERRI *chlorati ætherea.*—**S. æthereus vitriolatus.** See *S.* ÆTHERIS *compositus.*—**S. alcoholisatus** [Dan. Ph., Swiss Ph.]. Fr., *alcool à 95° centésimaux* [Fr. Cod.]. Ninety-five-per-cent. alcohol, obtained by treating 90-per-cent. alcohol with potassium acetate or calcium chloride or in other ways, and having a sp. gr. of 0·800 to 0·816. [B, 95 (α, 38).] See also under ETHYL ALCOHOL.—**S. alexiterius.** See *S. aromaticus* (1st def.).—**S. ammonio-anisatus.** See *Liquor* AMMONII *anisatus.*—**S. anhaltinus.** See AQUA *anhaltina.*—**S. animalis.** 1. See *Animal* SPIRIT. 2. Of Raymond Lully, aqueous ammonia. [B.]—**S. animatus.** Ger., *eingeseelter Geist.* See AZOTH (2d def.).—**S. anthystericus.** A preparation made by digesting 30 grammes of castoreum, 22 of lavender, 11 each of sage and rosemary, 7 of cinnamon, 4 each of mace and cloves, 540 of alcohol, 180 of lavender water, 60 of sal ammoniac, and 90 of potassium carbonate for three days, distilling 450 grammes, and adding 7 of camphor and 20 drops each of the oils of rue and amber; or by digesting 6 parts of asafœtida, 3 of castoreum, 9 each of the herbs of chamomile and rue, and 288 of white wine for 24 hours and distilling 144 parts. [B, 119 (α, 38).]—**S. anticteriens.** A preparation made by distilling oil of turpentine with four times as much alcohol by the aid of gentle heat and rejecting the oil that rises to the surface. [B, 119 (α, 38).]—**S. antiparalyticus** [Dan. Ph., Norw. Ph.]. A mixture of 4 parts of rectified oil of amber and 16 of ammonia water with 4 of oil of turpentine, 64 of spirit of camphor, and 12 of liquor ammonii carbonici pyro-oleosi [Dan. Ph.] (with 4 of oil of juniper, 60 of spirit of camphor, and 16 of liquor ammonii carbonici pyro-oleosi [Norw. Ph.]). [B, 95 (α, 38).]—**S. antiscorbuticus Drawitzii.** A preparation made by distilling a mixture of 12 parts of spirit of cochlearia with 72 of calcined vitriol and either 36 of spirit of tartar or 108 of crude tartar; or with 36 of spirit of tartar and 3 of sulphuric acid; or with 6 of pyrotartaric acid and 1½ of ether; or with 8 of pyrotartaric acid and 1 of sulphuric acid. [B, 119 (α, 38).]—**S. aperitivus Renoti.** See *S.* TARTARI *vitriolatus.*—**S. aromaticus.** 1. Of the Russ. Ph., a preparation made by dissolving 10 parts each of oil of lavender and ethereal oil of nutmeg, 3 each of the oils of cloves, cassia, lemon, fennel, and crisped mint, and 1 part of oil of melissa in 1,728 of 90-per-cent. alcohol, adding 5,184 of 70-per-cent. alcohol, and filtering. 2. Of the Netherl. Ph., see *S. carminativus.* 3. Of the Swiss Ph., see *S. odoratus.* 4. Of the Austr. Ph., Hung. Ph., 2d ed., and Gr. Ph., see *Spiritus* MELISSÆ *compositus.* [B, 95, 119 (α, 38).]—**S. aromaticus ammoniacalis.** See *S.* AMMONIÆ *aromaticus.*—**S. arthriticus Pottii.** Fr., *liniment résolutif.* A preparation made by distilling over the sand-bath 4 parts each of sodium chloride and oil of turpentine slowly mixed with 2 of concentrated sulphuric acid. [B, 119 (α, 38).]—**S. balsamicus.** See ALCOOLAT *de Fioravanti.*—**S. Beguini.** See LIQUOR *fumans Boylii.*—**S. bezoardicus Bussii.** See *Bussii s. bezoardicus.*—**S. cæruleus.** Fr., *esprit bleu.* A preparation made by distilling 216 parts of a mixture of 384 of brandy and 10 each of wormwood, scordium, savin, and lavender, and adding 3 of verdigris and 36 of water of ammonia. [B, 119 (α, 38).]—**S. camphorato-crocatus.** See *S.* VINI *camphoratus crocatus.*—**S. camphoratus.** See *S.* CAMPHORÆ.—**S. cardiacus.** An old preparation distilled from a mixture of zedoary, gentian, serpentaria, *Aristolochia rotunda*, and various aromatics with alcohol. [B.]—**S. Carmelitorum.** Ger., *Carmelitergeist.* See *Spiritus* MELISSÆ *compositus.*—**S. carminativus.** 1. A preparation made by distilling after two days' digestion a mixture of 29 parts each of the roots of elecampane and *Carlina acaulis*, laurel-berries, fennel, caraway, and anise, 115 each of the tops of rosemary and sweet marjoram, 14 each of pimenta and cinnamon, 11 of orange-peel, and 1,035 of brandy. 2. A preparation made by macerating 25 parts each of cloves, cinnamon, nutmeg, and sweet marjoram, and 50 of coriander-seed with 1,000 of 80-per-cent. alcohol and 500 of water [Belg. Ph.] (with 750 of alcohol of sp. gr. 0·829 and 875 of water [Netherl. Ph.]) and distilling 1,000 parts of sp. gr. 0·878 [Belg. Ph.] (such quantity as is of sp. gr. 0·889 to 0·895 [Netherl. Ph.]). [B, 95, 119 (α, 38).]—**S. carminativus de tribus.** A distilled mixture of 3 parts of fuming spirit of nitre, 36 of strong alcohol, and 18 of spirit of tartar; or of equal parts of crude nitre and white tartar. [B, 119 (α, 38).]—**S. concentratissimus.** Concentrated alcohol. [B, 97.]—**S. concentratus.** See under ETHYL ALCOHOL.—**S. concoctivus.** A spirit anciently supposed to perfect the organic processes (*e. g.*, the arterialization of the blood). [Harvey (H).]—**S. de tribus, S. diatrion.** See MIXTURA *pyrotartarica.*—**S. dilutus.** Dilute alcohol. See under ETHYL ALCOHOL.—**S. formicicus.** Ger., *Ameisenspiritus.* See *S.* FORMICARUM.—**S. fumans Glauberi.** Hydrochloric acid. [B, 270 (α, 38).]—**S. fumans Libavii.** Tin tetrachloride. [B.]—**S. genitalis.** See AURA *seminalis.*—**S'lack** (Ger.). An alcoholic solution of shellac. It has been used as a dressing. [A. S. Toporoff, "Russkaja Med."; "Ctrlbl. f. Chir.," Nov. 7, 1885, p. 781.]—**S. Mindereri.** See *Liquor* AMMONII *acetatis.*—**S. mineralis.** The carbonic acid contained in effervescing mineral waters. [B, 3.]—**S. morbi.** A morbific principle. [Paracelsus (H).]—**S. muriatico-æthereus.** Hydrochloric ether. [B, 119 (α, 38).]—**S. naturales.** Animal spirits supposed to move in the veins. [H.]—**S. nitrico-æthereus.** Nitrous ether. [B, 97.] See ETHYL *nitrite.*—**S. odoratus** [U. S. Ph., Russ. Ph.]. Fr., *teinture d'essence de citron composée* [Fr. Cod.], *eau de Cologne.* Sp., *alcohol de cidra compuesto* [Sp. Ph.]. A solution of various amounts of the oils of orange-flowers, bergamot, lemon, lavender (flowers [U. S. Ph.]), and rosemary in alcohol, to which the Fr. Cod. adds oil of orange-peel, omitting the oil of lavender; the Swiss Ph. adds oil of orange-peel and a little of the oils of cloves and cinnamon; the Sp. Ph. adds a little oil of cinnamon, some esencia de cidra, and a generous amount of spirit of rosemary and compound spirit of melissa; the Russ. Ph. adds the oils of orange-peel, cloves, cassia, and thyme, and tincture of musk; and the U. S. Ph. adds acetic ether. [B, 95 (α, 38).]—**S. oleosus aromaticus Sylvii.** See *S.* AMMONIÆ *aromaticus.*—**S. peccans.** A morbific principle. [Paracelsus (H).]—**S. potassatus.** See *Alcohol* POTASSÆ.—**S. pyroaceticus.** See ACETONE.—**S. pyroxylicus rectificatus.** See METHYL ALCOHOL.—**S. rectificatissimus, S. rectificatus.** See under ETHYL ALCOHOL.—**S. salinus aromaticus.** See *S.* AMMONIÆ *aromaticus.*—**S. saponato-camphoratus.** See LINIMENTUM *saponato-camphoratum liquidum.*—**S. saponatus.** Fr., *teinture de savon* [Fr. Cod.] (2d def.). 1. Of the Ger. Ph. and Russ. Ph., see *Tinctura* SAPONIS *viridis.* 2. Of the Ger. Ph. (1st ed.), Austr. Ph., Hung. Ph. (2d ed.), Gr. Ph., Swiss Ph., a solution of soap in from four to eleven times as much dilute alcohol, perfumed with rose-water [Ger. Ph., Swiss Ph.] (with a little oil of lavender [Austr. Ph., Belg. Ph., Hung. Ph., Roum. Ph.]). [B, 95 (α, 38).] 3. See *Tinctura* SAPONIS.—**S. silvestris.** Carbon dioxide. [B. 2.]—**S. strumalis** [Swiss Ph.]. A solution of 3 parts of potassium iodide in a mixture of 15 of spirit of lavender, 30 of spirit of soap, and 3 of water. [B, 95 (α, 38).]—**S. suaveolens.** Fr., *esprit odoriférant.* A solution of 1 part each of the oils of lemon, bergamot, and lavender in 4 parts of acetic ether. [B, 119 (α, 38).]—**S. sulphurico-æthereus.** See *Spiritus* ÆTHERIS *compositus.*—**S. sulphurico-æthereus camphoratus.** Ger., *Campherschwefeläthergeist.* See *Solutio* CAMPHORÆ *ætherea.*—**S. sulphurico-æthereus ferratus (seu ferruginosus, seu martialis).** See *Tinctura* FERRI *chlorati ætherea.*—**S. tartarizatus.** See *S.* VINI *tartarizatus.*—**S. tenuior, S. tenuis.** Dilute alcohol. [α, 38.] See under ETHYL ALCOHOL.—**S. theriacalis.** See *S.* ANGELICÆ *compositus.*—**S. traumaticus.** See AQUA *vulneraria.*—**S. urinæ.** An old name for aqueous ammonia, as the volatile principle of stale urine. [B.]—**S. Veneris.** See *S.* ÆRUGINIS.—**S. vitæ, S. vitalis.** The nervous fluid (*q. v.*), anciently supposed to circulate in the arteries. [H; K.]—**S. volatilis aromaticus.** See *S.* AMMONIÆ *aromaticus.*—**S. volatilis causticus.** See AQUA *ammoniæ.*—**S. volatilis fœtidus.** See *S.* AMMONIÆ *fœtidus.*—**S. vulnerarius.** Fr., *alcoolat vulnéraire* [Fr. Cod.]. Sp., *alcohol de salvia vulnerario* [Sp. Ph.]. A preparation made by distilling 100 parts each of lavender-flowers and the leaves of wormwood, hyssop, rosemary, rue, and sage with 100 each of the leaves of basil, sweet marjoram, melissa, *Nepeta cataria*, origanum, and *Thymus vulgaris* in 9,099$\frac{1}{11}$ of 60-per-cent.

alcohol and the necessary amount of water [Belg. Ph.] (with 100 of peppermint in 2,000 of alcohol of sp. gr. 0·832 and 5,000 of water [Swiss Ph.], with 100 each of the herbs of angelica, basil, calamint, fennel, sweet marjoram, melissa, mint, origanum, satureja, *Thymus serpyllum*, and *Thymus vulgaris*, and the flowering tops of hypericum in 4,500 of 60-per-cent. alcohol [Fr. Cod.]); or by distilling 80 parts each of lavender-flowers, wormwood-leaves, and peppermint, and 5 of oil of rosemary in 1,500 each of alcohol of sp. gr. 0·892 and water [Dan. Ph.] (24 parts each of the tops of lavender, sweet marjoram, and rosemary, and the herb of scordium, 46 each of the herbs of wormwood, hypericum, crisped mint, sage, and tanacetum, and 68 each of the herbs of agrimony, artemisia, and betonica in 2.208 of white wine [Sp. Ph.]). [B, 95 (α, 38).]—**S. vulnerarius acidus.** See *S.* MILLEFOLII *acetatus.*

SPIROCHÆTA (Lat.), **SPIROCHÆTE** (Lat.), n's f. Spir(sper)-o(o^3)-ket'(cha^3'e^{2}t)-a^3, -e(a). Gen., *-chæt'æ, -chæt'es.* From σπεῖρα, a coil, and χαίτη, flowing hair. 1. A genus of the *Compositæ*, included by Bentham and Hooker in *Elephantopus.* [α, 35.] 2. See under SPIRILLUM.—**S. buccalis, S. dentium.** See SPIRILLUM *Cohnii.*—**S. Obermeieri.** See SPIRILLUM *Obermeieri.*

SPIROGRAPH, n. Spir'o-gra^{3}f. From *spirare*, to breathe, and γράφειν, to write. See ATMOGRAPH.

SPIROLOBEUS (Lat.), adj. Spir(sper)-o(o^3)-lob(lo^{2}b)'e^2-u^{3}s-(u^{4}s). From σπεῖρα, a coil, and λοβός, a pod. Fr., *spirolobé.* Ger., *spirlappig, eingerollt-keimblättrig.* Having the cotyledons forming a spiral coil, as in the *Spirolobæ* (an order of the *Apetalæ*) or in the *Spirolobeæ* (of De Candolle, a suborder of the *Cruciferæ* consisting of the *Buniadeæ* and *Erucarieæ ;* of C. A. Meyer, a suborder of chenopodiaceous plants consisting of the *Anabaseæ* and *Salsoleæ ;* of Bentham and Hooker, a series of the *Chenopodiaceæ* comprising the *Suœdeæ, Salsoleæ*, and *Sarcobatideæ*). [α, 35.]

SPIROMETER, n. Spir-o^{2}m'e^{2}t-u^{6}r. From *spirare*, to breathe, and μέτρον, a measure. Fr., *spiromètre.* Ger., *S., Athemmesser.* Of Hutchinson, an instrument constructed on the principle of a gasometer, for measuring the various volumes of air in the lungs, especially the breathing capacity (*q. v.*, under BREATHING). [J, 3, 40, 46.]—**Barnes's dry s.** A s. invented by Barnes (1865), consisting of a flexible, hollow bag or cylinder fixed at the lower end and there connected with a tube through which the air is forced. At the upper end is a disc of wood from the centre of which rises a graduated tube communicating with the bag. The whole is contained in a frame. For an experiment, the graduated tube is closed at the top, air is blown into the lower tube, thus inflating the bag, and the amount of inflation is determined by the height to which the graduated tube rises. [J.]—**Brown's s.** A simple arrangement of two rectangular boxes, one inside the other. The outer one is fitted with a mouth-piece, and the force of the air raises the inner one to a height marked by a gauge. [E.]—**Hutchinson's s.** A cylinder fitted with a mouth-piece and containing another cylinder which is supported by weights passing over pulleys and fitted with a gauge. [E.]

SPIROMETRY, n. Spir-o^{2}m'e^{2}t-ri^2. Fr., *spirométrie.* Ger., *Spirometrie, Athemmessung.* The use of a spirometer for determining the breathing capacity, the thoracic pressure, or the elasticity of the lungs. [J, 3.]

SPIROMONAS (Lat.), n. f. Spir(sper)-o^{2}m'o^{2}n-a^{2}s(a^{3}s). Gen., *-mon'ados (-adis).* From σπεῖρα, a coil, and μονάς, a unit. A genus of the *Schizomycetes* in which the cells are "flat like a leaf and twisted around an ideal long axis." Multiplication takes place by transverse division. [α, 35.]—**S. Cohnii.** A form occurring in stagnant water; hyaline cells 1·2 to 4 μ broad, with 1¼ turn, very pointed at each end, and with a single flagellum. [α, 35.]—**S. volubilis.** A species in the form of rapidly revolving vibrating, colorless, transparent cells from 15 to 18 μ long, found in stagnant water and putrefying infusions. [A, 396 (α, 21); α, 35.]

SPIROPHORE, n. Spir'o-for. From *spirare*, to breathe, and φορός, bearing. Fr., *s.* Of Woillez, an apparatus for establishing artificial respiration by insufflation in cases of asphyxia neonatorum. [A, 15.]

SPIROPTERA (Lat.), n. f. Spir(sper)-o^{2}pt'e^{2}r-a^3. From σπεῖρα, a coil, and πτερόν, a wing. Fr., *spiroptère.* A genus of the *Filaridæ.* [Dujardin (L, 16).]—**S. hominis.** A pseudelminth found in the bladder of a woman, but decided to be either the young of *Strongylus gigas* or the ovisac of the cod introduced for purposes of deception. [L, 16.]—**S. megastoma.** A species found in tubercles in a horse's stomach. [L, 17.]—**S. Rudolphii.** See *S. hominis.*—**S. sanguinolenta.** A species found in tubercles of the stomach in dogs and wolves. [L, 17.]—**S. strongylina.** A species found in the stomach of the hog. [L, 17.]

SPIROSCOPE, n. Spir'o-skop. From *spirare*, to breathe, and σκοπεῖν, to examine. A wet as distinguished from a dry spirometer. [K.]

SPIROYL, n. Spir'o-i^{2}l. Fr., *spiroyle.* See SALICYL.—**S. hydride.** Ger., *S'säure.* See SALICYL *aldehyde.*

SPIROYLOUS ACID, n. Spir-o'i^{2}l-u^{3}s. See SALICYL *aldehyde.*

SPIRRE (Ger.), n. Sper're^2. See ANTHELA.

SPIRSÄURE (Ger.), n. Sper'zoir-e^2. See SALICYLIC ACID.

SPIRULINA (Lat.), n. Spir(sper)-u^{2}l(u^{4}l)-in(en)'a^3. From *spira*, a coil. A subgenus of the *Schizomycetes*, consisting of loops of filaments having the ends wound around each other like a plait of hair (cf. ARTHROBACTERIACEÆ). [α, 35.]—**S. plicatilis.** See SPIRILLUM *plicatile.*

SPIRYLE (Fr.), n. Sper-el. See SALICYL.

SPISSATED, adj. Spi^{2}s'at-e^{2}d. Lat., *spissatus* (from *spissare*, to thicken). See INSPISSATED.

SPITAL (Ger.), n. Spet-a^{3}l'. See HOSPITAL and ASYLUM.

SPITTLE, n. Spi^{2}t'l. See SALIVA.

SPITZAMPFER (Ger.), n. Spi^{2}ts'a^{3}mpf-e^{2}r. The *Rumex obtusifolius, Rumex crispus*, and other species of *Rumex.* [α, 35.]

SPITZBLATTERN (Ger.), n. pl. Spi^{2}ts'bla^{3}t-te^{2}rn. See VARICELLA.

SPITZBUCKEL (Ger.), n. Spi^{2}ts'buk-e^{2}l. See *Pott's* DISEASE.

SPITZE (Ger.), n. Spi^{2}t'tse^2. See ACME, APEX, CUSP, and POINT (1st def.).—**Herzs'.** The apex of the heart. [L.]—**Hinterhauptss'.** The point or extremity of the occiput. [K.]—**Rolls'.** See TROCHLEA.—**Schläfenlappens'.** The anterior extremity of the temporo-sphenoidal lobe. [I, 27 (K).]—**S'nerkrankung.** A disease of the pulmonary apex. [α, 34.]—**S'nfussstellung.** The contraction of the foot caused by tuberculous inflammation of the articulations. [L, 57 (α, 34).]—**S'nwachsthum.** Consolidation of a pulmonary apex. [α, 34.]—**Stachels'.** See MUCRO.

SPITZENHAARE (Ger.), n. pl. Spi^{2}ts'e^{2}n-ha^{3}r-e^2. Pointed hairs; of Pincus, those hairs of the scalp that fall out before attaining the average length, and, having never been cut, have pointed extremities. [G.]

SPITZFUSS (Ger.), n. Spi^{2}ts'fus. See TALIPES *equinus.*

SPITZKEIM (Ger.), n. Spi^{2}ts'kim. See ACROBLAST.

SPITZKEIMEND (Ger.), **SPITZKEIMIG** (Ger.), adj's. Spi^{2}ts'kim-e^{2}nd, -i^{2}g. See MONOCOTYLEDONOUS.

SPITZKOPF (Ger.), n. Spi^{2}ts'ko^{3}pf. See OXYCEPHALIA.

SPITZPOCKEN (Ger.), n. pl. Spi^{2}ts'po^{3}k-e^{2}n. See VARICELLA.

SPLANCHNA (Lat.), n. n., pl. of *splanchnon.* Spla^{2}n^{2}k-(spla^{3}n^{2}ch^2)'na^3. Gr., σρλάγχνα. The viscera, or entrails; also, in a restricted sense, the intestines. [α, 48.]

SPLANCHNECTOPIA (Lat.), n. f. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)-ne^{2}k-top(to^{2}p)'i^2-a^3. From σπλάγχνον, a viscus, and ἔκτοπος, out of place. A displacement of the intestines. [L, 50 (α. 14).

SPLANCHNEMPHRAXIS (Lat.), n. f. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)-ne^{2}m-fra^{2}x(fra^{3}x)'i^{2}s. Gen., *-phrax'eos (-is).* From σπλάγχνον, a viscus, and ἔμφραξις, a stoppage. Fr., *splanchnemphraxie.* Intestinal obstruction. [L, 50 (α, 14).]

SPLANCHNEURYSMA (Lat.), n. m. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)-nu^{2}r-i^{2}z(u^{6}s)'ma^3. Gen., *-ys'matos (-atis).* From σπλάγχνον, a viscus, and εὐρύνειν, to distend. Fr., *splanchnévrysme.* Abnormal dilatation of the intestines. [L, 50 (α, 14).]

SPLANCHNIC, adj. Spla^{2}n^{2}k'ni^{2}k. Gr., σπλαγχνικός. Lat., *splanchnicus.* Fr., *splanchnique.* Pertaining to or supplying the viscera, visceral; of bones, developed within the substance of some of the viscera. [C, 1.]

SPLANCHNODIASTASIS (Lat.), n. f. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)''-no(no^3)-di(di^2)-a^{2}st(a^{3}st)'a^{2}s(a^{2}s)-i^{2}s. Gen., *-as'eos (-asta'sis).* From σπλάγχνον, a viscus, and διάστασις, separation. Abnormal separation of the viscera. [L, 50 (α, 14).]

SPLANCHNODYNE (Lat.), n. f. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)-no^{2}d'-i^{2}n(u^{6}n)-e(a). Gen., *-od'ynes* From σπλάγχνον, a viscus, and ὀδύνη, pain. Intestinal colic. [L, 50 (α, 14).]

SPLANCHNOGRAPHY, n. Spla^{2}n^{2}k-no^{2}g'ra^{2}f-i^2. Lat., *splanchnographia* (from σπλάγχνον, a viscus, and γράφειν, to write). Fr., *splanchnographie.* See SPLANCHNOLOGY.

SPLANCHNOLITHIASIS (Lat.), n. f. Spla^{2}n^{2}k(spla^{2}n^{2}ch^2)-no(no^3)-li^{2}th-i^2-a(a^3)'si^{2}s. Gen., *-as'eos (-is).* From σπλάγχνον. a viscus, and λιθίασις, lithiasis. Fr., *splanchnolithiase.* The formation of intestinal calculi. [L, 50 (α, 14).]

SPLANCHNOLITHUS (Lat.), n. m. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)-no^{2}l'i^{2}th-u^{3}s(u^{4}s). From σπλάγχνον, a viscus, and λίθος, a stone. Fr., *splanchnolithe.* See *Intestinal* CALCULUS.

SPLANCHNOLOGY, n. Spla^{2}n^{2}k-no^{2}l'o-ji^2. Lat., *splanchnologia* (from σπλάγχνον, a viscus, and λόγος, understanding). Fr., *splanchnologie.* Ger., *Eingeweidelehre.* The anatomy, pathology, etc., of the viscera. [α, 48.]

SPLANCHNON (Lat.), n. n. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)'no^{2}n. Gr., σπλάγχνον. Fr., *viscère.* Ger., *Eingeweide.* A viscus; little used in the sing. (see SPLANCHNA). [α, 48.]

SPLANCHNOPATHY, n. Spla^{2}n^{2}k-no^{2}p'a^{2}th-i^2. Lat., *splanchnopathia* (from σπλάγχνον, a viscus, and πάθος, disease). Fr., *splanchnopathie.* A visceral disease. [L. 50 (α, 14).]

SPLANCHNOPLEURE, n. Spla^{2}n^{2}k'no-plu^{2}r. From σπλάγχνον, a viscus, and πλευρά, the side. Fr., *lame pariétal.* Of Foster and Balfour, the inner wall of the pleuro-peritoneal space in the embryo. [A, 11.] Cf. *Splanchnic* MESOBLAST.

SPLANCHNOPTOSIS (Lat.), n. f. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)-no^{2}p-tos'i^{2}s. Gen., *-ptos'eos (-is).* From σπλάγχνον, a viscus, and πτῶσις, a falling. Prolapse of the viscera (cf. ENTEROPTOSIS). [α, 17.]

SPLANCHNOSCLEROSIS (Lat.). n. f. Spla^{2}n^{2}k(spla^{3}n^{2}ch^2)''-no(no^3)-skle^{2}r(sklar)-os'i^{2}s. Gen., *-os'eos.* From σπλάγχνον, a viscus, and σκλήρωσις, an induration. Fr., *splanchnosclérose.* Induration of viscera. [L, 50 (α, 43).]

SPLANCHNOSCOPY, n. Spla^{2}n^{2}k-no^{2}sk'o^{2}p-i^2. Lat., *splanchnoscopia* (from σπλάγχνον, a viscus, and σκοπεῖν, to examine). Fr., *splanchnoscopie.* Ger., *Splanchnoskopie.* Of Milliot, an inspection of the viscera by means of strong transmitted light. [α, 34.]

SPLANCHNO-SKELETON, n. Spla^{2}n^{2}k''no-ske^{2}l'e^2-t'n. From σπλάγχνον, a viscus, and σκελετόν, a skeleton. Fr., *splanchnosquelette.* The bones or hard structures collectively that are associated with the viscera. [B, 28 (α, 27).]

SPLANCHNOSYMPATHY, n. Spla^{2}n^{2}k''no-si^{2}m'pa^{2}th-i^2. Lat., *splanchnosympathia* (from σπλάγχνον, a viscus, and συμπάθεια, sympathy). The reflex action of the viscera on each other and on other organs. [L, 50 (α, 14).]

SPLANCHNOTOMY, n. Spla²n²k-no²t'om-i². Lat., *splanchnotomia* (from σπλάγχνον, a viscus, and τομή, a cutting). Fr., *splanchnotomie*. Dissection of the viscera. [L, 50 (α, 14).]

SPLAY-FOOT, n. Spla'fu⁴t. See FLAT-FOOT.

SPLEEN, n. Splen. Gr., σπλήν. Lat., *lien*, *splen*. Fr., *rate*. Ger., *Milz*. 1. A soft, vascular organ, usually classed among the ductless glands, about five inches in length, four in breadth, and an inch in thickness and somewhat flattened or concavo-convex when removed from the body. When in situ it is concavo-convex and embraces the cardia. Its internal and concave side contains a vertical fissure (the hilum) through which the splenic vessels and nerves pass. It lies between the s omach and the diaphragm. The peritonæum covers it externally except where it is reflected to the stomach and diaphragm. Beneath the peritonæum is a layer of fibrous tissue which surrounds the splenic vessels and sends numerous processes within the organ, forming a supporting framework inclosing the Malpighian corpuscles and true splenic tissue. To it has been ascribed the formation of the red and white blood-corpuscles and of a ferment which plays a part in pancreatic digestion. [L, 31, 142, 172, 332.] 2. Anger; hypochondriasis; melancholy. [B.]—**Accessory s.** Lat., *lien accessorius* (seu *succenturiatus*). Ger., *Nebenmilz*. A nodule (of which there may be a number) of splenic tissue in the vicinity of the spleen. [L, 332.]—**Bacon s.** A form of amyloid degeneration affecting the s. The organ is enlarged and firm, (like the sago s.) but, on section, patches or islands of tissue are seen which resemble the fat of fried bacon. [D, 48.]—**Floating s.** Lat., *lien mobilis*. Fr., *rate flottante*. Ger., *Wandermilz*, *verschiebbare Milz*. An anomalous condition of the s. in which the organ is movable, generally enlarged, and no longer protected by the ribs in the left hypochondriac region, and lies on the brim of the pelvis or even in the right side of the abdomen. This condition is more frequently observed in women than in men. [A, 326 (α, 21).]—**Indian s.** The hypertrophied or indurated s. observed in Anglo-Indians. ["Med. Press and Circ.," 1871, p. 45 (α, 34).]—**Lardaceous s.** Lat., *lien lardaceus* (seu *cereus*). Enlargement of the s. from the presence of lardaceous matter. Cf. *Lardaceous* DEGENERATION.—**Sago s.** Ger., *Fischroggenmilz*. Amyloid degeneration of the follicles of the s. presenting on section the appearance of sago grains. [α, 34.]—**Waxy s.** See *Lardaceous s.*

SPLEEN, v. tr. To deprive of the s. [B.]

SPLEENWORT, n. Splen'wu⁵rt. The genus *Asplenium*. [α, 35.]—**Common s., Dwarf s., Maiden-hair s.** See ASPLENIUM *trichomanes*.

SPLEN (Lat.), n. m. Sple²n(splan). Gen., *splen'os* (*-is*). See SPLEEN.

SPLENADENOMA (Lat.), n. n. Splen(splan)-a²d(a³d)-e²n-om'a³. Gen., *-om'atos* (*-atis*). From σπλήν, the spleen, and ἀδήν, a gland. Fr., *splénadenome*. Ger., *Splenadenom*. Lymphadenoma of the spleen. [α, 34.]

SPLENÆMIA (Lat.), n. f. Splen(splan)-em'(a³'e²m)-i²-a³. From σπλήν, the spleen, and αἷμα, blood. 1. See LEUCOCYTHÆMIA. 2. Of Virchow, leucocythæmia in which abnormal elements are present in the blood, particularly lactic, acetic, and formic acids and hypoxanthin. [D, 1.] Cf. *Splenic* LEUCOCYTHÆMIA.

SPLENALGIA (Lat.), n. f. Sple²n(splan)-a²l(a³l)'ji²(gi²)-a³. From σπλήν, the spleen, and ἄλγος, pain. Fr., *splénalgie*. Pain in the spleen. [L, 50 (α, 14).]

SPLENAUXE (Lat.), n. f. Sple²n(splan)-a⁴x'(a³'u⁴x)-e(a). Gen., *-aux'es*. From σπλήν, the spleen, and αὔξη, growth. Enlargement of the spleen. [L, 50 (α. 14).]

SPLENCULUS (Lat.), n. m. Sple²n(splan)'ku²l(ku⁴l)-u³s(u⁴s). From σπλήν, the spleen. See *Accessory* SPLEEN.

SPLENECHOS (Lat.), **SPLENECHUS** (Lat.), n's m. Sple²n-(splan)-ek(ach²)'o²s, -u³s(u⁴s). From σπλήν, the spleen, and ἦχος, a sound. Ger., *Milzton*. The sound heard on percussing over the spleen. [L, 50 (α, 14).]

SPLENECTAMA (Lat.), **SPLENECTASIS** (Lat.), n's n. and f. Sple²n(splan)-e²kt'a²m(a³m)-a³, -a²s(a³s)-i²s. Gen., *-am'atos* (*-atis*), *-as'eos* (*-ec'tasis*). From σπλήν, the spleen, and ἔκταμα, extent, or ἔκτασις, extension. Enlargement of the spleen. [L, 41 (α, 14).]

SPLENECTOMY, n. Sple²n-e²kt'om-i². Lat., *splenectomia* (from σπλήν, the spleen, and ἐκτομή, a cutting out). Fr., *splénectomie*. Ger., *Splenektomie*. Removal of the spleen. [E.]

SPLENECTOPIA (Lat.), n. f. Sple²n(splan)-e²k-top(to²p)'i²-a³. From σπλήν, the spleen, and ἔκτοπος, out of place. Fr , *splénectopie*. Displacement of the spleen.

SPLENELCOSIS (Lat.), n. f. Sple²n(splan)-e²lk-os'i²s. Gen., *-os'eos* (*-is*). From σπλήν, the spleen, and ἕλκωσις, ulceration. Fr., *splénelcose*. Ulceration of the spleen. [L, 50 (α, 14).]

SPLENELCUS (Lat.), n. n. Sple²n(splan)-e²lk'u³s(u⁴s). From σπλήν, the spleen, and ἕλκος, an ulcer. Fr., *splénulcère*. An ulcer of the spleen. [L, 50 (α, 14).]

SPLENEMPHRAXIS (Lat.), n. f. Sple²n(splan)-e²m-fra²x-(fra³x)'i²s. Gen., *-phrax'eos* (*-is*). From σπλήν, the spleen, and ἔμφραξις, a stoppage. Fr., *splénemphraxie*. Obstruction or congestion of the spleen. [L. 50 (α, 14).]

SPLENEPATITIS (Lat.), n. f. Sple²n(splan)-e²p(ap)-a²t(a³t)-i(e)'ti²s. Gen., *-it'idos* (*-idis*). From σπλήν, the spleen, and ἧπαρ, the liver. Fr., *splénépatite*. Inflammation of the liver and spleen. [L, 50 (α, 14).]

SPLENETIC, adj. Sple²n'e²t-i²k. Lat., *spleneticus*. Fr., *splénétique*. 1. See SPLENIC. 2. Affected with the spleen (2d def.).

SPLENIAL, adj. and n. Sple²n'i²l. Gr., σπληνίον, a bandage. 1. Of or pertaining to the splenius or to the s. bone. 2. The s. bone. [B.]

SPLENIC, adj. Sple²n'i²k. Gr., σπληνικός (from σπλήν, the spleen). Lat., *splenicus*. Fr., *splénique*. Ger., *splenisch*, *milzartig*, *milzig*. 1. Pertaining to the spleen. 2. Affected with splenitis. [L, 41, 44, 49, 50 (α, 14).]

SPLENICUS (Lat.), adj. Sple²n(splan)'i²k-u³s(u⁴s). Splenic; as a n., in the n. (*splenicum*; Ger., *Milzmittel*), a medicine that affects the spleen. [L, 50 (α, 14).]

SPLENICOGASTRICUM (Lat.), n. n. Sple²n(splan)''i²k-o(o³)-ga²st(ga³st)'ri²k-u³m(u⁴m). From σπλήν, the spleen, and γαστήρ, the stomach. See *Gastro-splenic* LIGAMENT.

SPLENICO-PANCREATIC, adj. Sple²n''i²k-o-pa²n-kre²-a²t'i²k. From σπλήν, the spleen, and πάγκρεας, the pancreas. Pertaining to the spleen and the pancreas. [α, 48.]

SPLENICTERUS (Lat.), n. m. Sple²n(splan)-i²kt'e²r-u³s(u⁴s). From σπλήν, the spleen, and ἴκτερος, jaundice. Fr., *splénictère*. Splenitis complicated with jaundice. [L, 50 (α, 26).]

SPLENIFICATION, n. Sple²n-i²-fi²k-a'shu³n. From *splen*, the spleen, and *facere*, to make. See SPLENIZATION.

SPLENIOLA (Lat.), n. f. Sple²n(splan)-i(i²)'o²l-a³. Fr., *splénioll*. See SPLENIUM (1st def.).

SPLENISCUS (Lat.), n. m. Sple²n(splan)-i²sk'u³s(u⁴s). Gr., σπληνισκός (dim. of σπλήν, the spleen). See SPLENIUM (1st def.).

SPLENISERRATOR (Lat.), n. m. Sple²n(splan)-i²-se²r-rat-(ra³t)'o²r. Gen., *-or'is*. The serrati postici and splenii taken collectively. [L.]

SPLENISIS (Lat.), n. f. Sple²n(splan)'i²s-i²s. Gen., *-is'eos*, *splen'isis*. From σπλήν, the spleen. Fr., *splénise*. Of Louis, a form of degeneration of the lung observed at Gibraltar in yellow-fever patients, characterized by well-marked dark spots, resembling the tissue of the spleen in color and consistence. [L, 50 (α. 14).]

SPLENITIS (Lat.), n. f. Sple²n(splan)-i(e)'ti²s. Gen., *-it'idos* (*-idis*). Gr., σπληνῖτις (from σπλήν, the spleen). Fr., *splénite*. Inflammation of the spleen. [D, 1.]

SPLENIUM (Lat.), n. n. Splen(splan)'i²-u³m(u⁴m). Gr., σπλήνιον (from σπλήν, the spleen). Fr., *splénium*. Ger., *Balkenwulst* (3d def.). 1. A plant used by the ancients in affections of the spleen (cf. ASPLENIUM). 2. A bandage or compress. [A, 322, 500 (α, 48).] 3. An enlargement at the posterior extremity of the corpus callosum, just before it joins the fornix. [I, 6 (K).]—**S. corporis callosi.** See *S.* (3d def.).

SPLENIUS (Lat.), adj. Splen(splan)'i²s-u³s(u⁴s). From *splenium*, a bandage. Fr., *splénius*, *cervico-trachélien*. Strap-shaped; as a n. (Ger., *Bauschmuskel*), a muscle so shaped (the s. capitis and s. colli taken as one); also, an analogous muscle in solipeds. [L.]—**S. accessorius.** An anomalous muscle arising from the spinous processes of the lower cervical or upper dorsal vertebræ and inserted into the transverse process of the atlas. [L, 332.]—**S. capitis.** Ger., *Bauschmuskel des Kopfes*. A muscle arising from the spinous processes of two or three lower cervical and two or three upper dorsal vertebræ and inserted into the mastoid process of the temporal bone and the superior curved line of the occipital bone. [L, 31, 142, 332.]—**S. cervicis, S. colli.** Ger., *Halsbauschmuskel*, *Riemenmuskel des Halses*. A long flat muscle arising from the spinous processes of the 3d, 4th, 5th, and 6th dorsal vertebræ and inserted into the transverse processes of two or three of the upper cervical vertebræ. [L, 31, 142, 332.]

SPLENIZATION, n. Sple²n-i²z-a'shun³. Lat., *splenisatio* (from σπλήν, the spleen). Fr., *splénisation*. Ger., *Splenisation*. An infiltrated and thickened condition of tissue, especially of lung tissue, in which it resembles the spleen in consistence. Cf. HEPATIZATION. [D.]—**Hypostatic s.** See *Hypostatic* PNEUMONIA.

SPLENOCERATOSIS (Lat.), n. f. Sple²n(splan)''o(o³)-se²r-(ke²r)-a²t(a³t)-os'i²s. Gen., *-os'eos* (*-is*). From σπλήν, the spleen, and κέρας, a horn. Induration of the spleen. [L, 50 (α, 14).]

SPLENOCELE (Lat.), n. f. Splen(splan)-o(o³)-se(ka)'le(la); in Eng., sple²n'o-sel. From σπλήν, the spleen. Ger., *Milzbruch*. A hernia of the spleen. [α, 34.]

SPLENO-COLIC, adj. Sple²n-o-kol'i²k. From σπλήν, the spleen, and κόλον, the colon. Pertaining to the spleen and the colon. [α, 48.]

SPLENODE-OOPHORITIS (Lat.), n. f. Sple²n(splan)-od-e²-o-o²f-o²r-i(e)'ti²s. Gen., *-il'idos* (*-idis*). From σπλήν, the spleen, εἶδος, resemblance, ᾠόν, an egg, and φορός, bearing. Fr., *splénodeoöphorite*. Oophoritis with splenization. [A, 322.]

SPLENODE-OOPHOROMALACIA (Lat.), n. f. Sple²n-(splan)-od''e²-o-o²f-o²r-o(o³)-ma²l(ma³l)-as(a³k)'i²-a³. From σπλήν, the spleen, εἶδος, resemblance, ᾠόν, an egg, φορός, bearing, and μαλακία, softness. Fr., *splénodeoöphoromalacie*. Oophoromalacia with splenization. [A, 322.]

SPLENODYNIA (Lat.), n. f. Sple²n(splan)-o(o³)-di²n(du⁶n)'-i²-a³. From σπλήν, the spleen, and ὀδύνη, pain. Fr., *splénodynie*. Pain in the spleen. [L, 50 (α, 14).]

SPLENOGRAPHY, n. Sple²n-o²g'ra²f-i². Lat., *splenographia* (from σπλήν, the spleen, and γράφειν, to write). See SPLENOLOGY.

SPLENOHÆMIA (Lat.), n. f. Splen(splan)-o(o³)-hem'(ha³'e²m)-i²-a³. From σπλήν, the spleen, and αἷμα, blood. Fr., *splenohémie*. Congestion of the spleen. [α, 34.]

SPLENOID, adj. Splen'oid. Gr., σπληνώδης (from σπλήν, the spleen, and εἶδος, resemblance). Lat., *splenodes*. Fr., *splénoïde*. Ger., *milzartig*. Resembling the spleen.

SPLENOLOGY, n. Sple²n-o²l'o-ji². Lat., *splenologia* (from σπλήν, the spleen, and λόγος, understanding). Fr., *splénologie*. Ger., *Milzlehre*. The anatomy, etc., of the spleen. [α, 48.]

SPLENOLYMPHOMA (Lat.), n. n. Sple²n(splan)-o(o³)-li²mf-(lu⁶mf)-o'ma. Gen., *-om'atos* (*-atis*). See SPLENADENOMA.

SPLENOMA (Lat.), n. n. Sple^{2}n(splan)-om'a^3. Gen., *-om'atos* (*-atis*). Fr., *splénome*. 1. A swelling or a tumor of the spleen. [L, 50 (*a*, 14).] 2. See Fungus *hæmatodes*.

SPLENOMALACIA (Lat.), n. f. Sple^{2}n(splan)-o(o^3)-ma^{2}l(ma^{3}l)-as(a^{3}k)'i^2-a^3. From σπλήν, the spleen, and μαλακία, softness. Fr., *splénomalacie*. Softening of the spleen. [L, 50 (*a*, 14).]

SPLENOMEGALY, n. Sple^{2}n-o-me^{2}g'a^{2}l-i^2. From σπλήν, the spleen, and μέγας, large. Fr., *splenomégalie*. Hypertrophy of the spleen; of Debove, splenic hypertrophy and progressive anæmia without leucocytosis or alteration in the lymphatic glands. ["Fr. méd.," Aug. 5, 1892 (*a*, 34).]

SPLENONCUS (Lat.), n. m. Sple^{2}n(splan)-o^{2}n^{2}k'u^{3}s(u^{4}s). From σπλήν, the spleen, and ὄγκος, a tumor. Fr., *splenoncie*. Ger., *Mitzgeschwulst*. Tumefaction of the spleen. [L, 50 (*a*, 14).]

SPLENOPARECTASIS (Lat.), n. f. Sple^{2}n(splan)-o(o^3)-pa^{2}r-(pa^{3}r)-e^{2}kt'a^{2}s(a^{3}s)-i^{2}s. Gen., *-as'eos* (*-ect'asis*). From σπλήν, the spleen, παρά, beyond, and ἔκτασις, extension. Fr., *splénoparectase*. See Splenectasis.

SPLENOPATHY, n. Sple^{2}n-o^{2}p'a^{3}th-i^2. Lat., *splenopathia* (from σπλήν, the spleen, and πάθος, disease). Fr., *splénopathie*. Ger., *Splenopathie*. Disease of the spleen. [*a*, 18.]

SPLENOPHLEGMONE (Lat.), n. f. Sple^{2}n(splan)-o(o^3)-fle^{2}g'-mo^{2}n-e(a). Gen., *-phleg'mones*. From σπλήν, the spleen, and φλεγμονή, inflammation. Fr., *splénophlegmon*. Phlegmonous inflammation of the spleen. [L, 50 (*a*, 14).]

SPLENOPHRAXIA (Lat.), **SPLENOPHRAXIS** (Lat.), n's f. Splen(splan)-o(o^3) fra^{2}x(fra^{3}x)'i^2-a^3, -i^{2}s. Gen., *-phrax'iæ*, *-phrax'eos* (*-is*). Fr., *splénophraxie*. See Splenemphraxis.

SPLENO-PHRENIC, adj. Splen-o-fre^{2}n'i^{2}k. From σπλήν, the spleen, and φρήν, the midriff. Pertaining to the spleen and the diaphragm. [L.]

SPLENOPHTHISIS (Lat.), n. f. Sple^{2}n(splan)-o^{2}t(o^{2}fth)'i^{2}s-i^{2}s. Gen., *-phthis'eos* (*-oph'thisis*). From σπλήν, the spleen, and φθίσις, a wasting. Fr., *splénophthisie*. Atrophy of the spleen.

SPLENO-PNEUMONIA, n. Splen''o-nu^5-mon'i^2-a^3. Of Grancher, a form of pulmonary congestion characterized by engorgement of the pulmonary capillaries and partial obliteration of the alveoli, the lung becoming dense, hard, and fleshy, and sinking in water. It is observed in some forms of heart disease. [*a*, 34.]

SPLENOPTOSIS (Lat.), n. f. Sple^{2}n(splan)-o^{2}pt-os'i^{2}s. Gen., *-ptos'eos* (*-is*). From σπλήν, the spleen, and πτῶσις, a falling. See *Floating* spleen.

SPLENORRHAGIA (Lat.), n. f. Sple^{2}n(splan)-o^{2}r-raj(ra^{3}g)'-i^2-a^3. From σπλήν, the spleen, and ῥήγνυσθαι, to burst forth. Fr., *splénorrhémie*, *splénorrhagie*. Hæmorrhage into or from the spleen.

SPLENOSCIRRHUS (Lat.), n. m. Sple^{2}n(splan)-o(o^3)-si^{2}r-(ski^{2}r)'ru^{3}s(ru^{4}s). From σπλήν, the spleen, and σκίῤῥος, an induration. Fr., *splénoscirrhe*. A hard, fibrous tumor in the spleen.

SPLENOTOMY, n. Sple^{2}n-o^{2}t'om-i^2. Lat., *splenotomia* (from σπλήν, the spleen, and τομή, a cutting). Fr., *splénotomie*. Ger., *Milzzerlegung* (1st def.), *Splenotomie*. 1. Dissection of the spleen. [L, 50 (*a*, 14).] 2. See Splenectomy.

SPLENT, n. Sple^{2}nt. See Splint (2d def.).

SPLENYPERTROPHIA (Lat.), n. f. Sple^{2}n(splan)-ip(u^{6}p)-u^{5}r(e^{2}r)-tro(tro^2)'fi^2-a^3. From σπλήν, the spleen, ὑπέρ, in excess, and τροφή, nutrition. Fr., *splénypertrophie*. Hypertrophy of the spleen.

SPLINT, n. Spli^{2}nt. Gr., νάρθηξ. Lat., *assula*, *ferula*. Fr., *éclisse*, *attelle*. Ger., *Beinbruchlade*, *Beinrüstung*, *Schiene*, *Span*. 1. Any apparatus composed of firm and hard material to be applied to an injured or diseased part to prevent motion or displacement. [E.] 2. In horses, an exostosis usually found upon the inner surface of the metacarpal bone. [L.]—**Agnew's s. for hip-joint disease.** A long s. with foot-piece and perineal band, fitting close against the tuber ischii and intended to support the weight of the trunk; used after the subsidence of acute symptoms. [E, 2.]—**American hip s.** See *Davis's s. for coxalgia* and *Sayre's s. for coxalgia*.—**Amesbury's s.** See *McIntyre's s.*—**Anchor-s.** A s. consisting of metal loops that fit over the teeth and are held in apposition by means of a rod and nut; used for fractures of the jaw. ["Med. Record," Oct. 6, 1888, p. 420 (*a*, 34).]—**Ashhurst's wire s.** A bracketed s. of wire fitted with a foot-piece, made to cover the thigh and leg; used after excision of the knee joint. [E.]—**Bauer's s.** See *Bauer's* apparatus (2d def.).—**Bavarian s.** An immovable s. made of coarse flannel soaked in plaster of Paris, gum, or chalk. The cloth is cut to the shape of the part and stitched over the limb. [E. 1.]—**Bean's interdental s.** A s. consisting essentially of a plate of vulcanized rubber, accurately molded to a wax impression of the dental arches and kept in position by a chin compress of the same material fastened by an occipito-frontal bandage; particularly employed in comminuted fractures of the jaws. [E.]—**Billroth's knee s.** A s. consisting of a plaster bandage in which are incorporated two hinged iron strips attached to broad plates. The bandage is allowed to harden, then the front over the knee is cut out, and at the back a transverse division is made. Into this slit are inserted wedges of increasing size until the leg is straight. [A, 520 (*a*, 29).]—**Bond's s's for fracture of the lower end of the radius.** An apparatus consisting of two s's, one of binder's board and the other of thin, light wood, furnished with a block and edges of thin sole-leather, about an inch in height, the whole presenting somewhat the appearance of a shallow trough. They are long enough to reach from a short distance below the elbow to within an inch of the distal end of the metacarpal bones, the block resting in the palm of the hand, and both being well padded with wadding. The pasteboard s. goes upon the back of the forearm. [E.]—**Boyer's s. for fractured clavicle.** A s. consisting of a strong metal plate made to fit between the shoulders behind, where it is held in place by straps connecting it with an abdominal belt. To this plate are buckled two cushioned straps passing over the shoulders and chest and under the axilla, which draw the shoulders backward. [E, 3.]—**Bracketed s.** A s. consisting of two metallic or wooden segments connected by brackets. [*a*, 34.]—**Busk's long s.** A s. in which a joint exists opposite the hip, which enables the patient, after union has taken place, to sit up without affecting the femur. [E, 1.]—**Cabot's s.** A s. made of stout iron wire for securing fixation of the joint in hip disease. [A, 520 (*a*, 29).]—**Cooper's s. for fracture of the great trochanter.** A long s. with a foot-piece for extension, and a leather belt passing around the pelvis. The belt is fitted with a cup for receiving and holding the trochanter. [E.]—**Crib-s.** See *Steadle-s.*—**Cripps's s.** A long s. for fracture of the femur in which extension and counter-extension are both kept up by carefully regulated elastic force. [E, 1.]—**Davis's s.** A knee-joint apparatus consisting of two metallic bands that fit about the thigh connected by two riveted rods parallel with the axis of the thigh. These bars articulate by pivot-joints with rods parallel to the axis of the leg, the latter rods being riveted to bands that fit about the leg. [*a*, 34.]—**Davis's s. for coxalgia.** A s. intended to exert extension and admit of motion. It consists of an external steel plate, extending from a short distance above the ankle to the crest of the ilium, at the upper extremity of which there is a swivel for attaching a counter-extending perineal band, partly elastic and partly inelastic. At the lower end there is a screw having a button on the outer side near its free extremity, in which to fasten a strip of webbing, and which can be lengthened by a key for the purpose of extension. At the upper third of the s. there is a sliding joint by which the appliance can be lengthened or shortened, and at the lower third there is a buckle for securing a band which passes around the knee. [E.]—**Desault's s.** A long s. for fracture of the femur. It consists of one long s. extending from below the sole of the foot to the axilla, and of a short s. extending from the same point to the perinæum. They are connected below by a transverse bar for receiving the extending bands, and along the leg and thigh by strips of bandage. The counter-extension is effected by a suitable thigh belt, the ends of which are passed through the mortise-holes near the upper end of the long s. [E.]—**Dupuytren's s. for fracture of the leg.** A straight wooden s. reaching from the knee to a point 3 inches below the sole of the foot, joined to a wedge-shaped cushion reaching from the knee to the ankle. The apparatus is bandaged to the inner side of the leg, the thin edge of the cushion upward. [E.]—**Fergusson's s. for the hip joint.** A long, straight s. extending from the axilla to below the foot. Counter-extension is made through the opposite thigh by means of a laced socket having a band attached to its upper extremity and connected with the upper end of the s.; used after excision of the joint. [E, 3.]—**Fox's s. for fractured clavicle.** See *Fox's* apparatus.—**Gilbert's long s.** A s. stretched along the outer side of each lower limb from a point a few inches below the sole to within a short distance of the axilla. The extending strips, tied under the sole of the foot and secured to a horizontal block, were controlled by a tourniquet, while the counter-extending strips were carried along the pelvis, both in front and behind, and firmly fastened by transverse bands passed around the hip-bones, the back, and the abdomen. Used in fracture of both thighs. [E.]—**Gordon's s.** A side s. for the arm and hand in Colles's fracture. [E.]—**Hamilton's s. for fracture of the patella.** A triangular apparatus, of which one side rests on the bed, a second side is vertical and is hinged to the lower end of the first, and the third slants from the upper end of the first to the upper end of the second, and is also attached to the upper end of the first by hinges. To this third piece the leg and thigh are fastened, and it is then raised and fastened to the second at any desired angle. In this way the muscles of the thigh are relaxed, while the fragments of the patella are held in apposition by straps which pass over the bone and under the board on which the limb rests. [E.]—**Hammond's s.** A wire s. for fractures of the lower jaw. It consists of a wire frame fitting closely over the teeth, where it is fastened in place by other pieces of fine wire passed around it between the different teeth. [E, 1.]—**Heath's s. for the elbow.** A s. used for extension and counter-extension after excision of the elbow. It consists of a firm band surrounding the arm, of another surrounding the forearm, and of two straight metallic rods connecting them. By means of screws the apparatus may be lengthened to any extent necessary to separate the parts of the joint. [E.]—**Hodgen's suspension s.** See *Hodgen's* apparatus.—**Interdental s.** A s. used for treating fractures of the jaw. It consists of a dentist's lower cup having a flat bottom and square sides that is filled with some plastic material and introduced into the mouth as when taking an impression for a lower set of teeth. A bandage is then placed over the head and chin. [*a*, 34.]—**Levis's s. for fractured clavicle.** See *Levis's* apparatus. — **Lister's s.** A long s. for treating fractures of the thigh, extending from the axilla to below the sole of the foot. [E.] — **McIntyre's s.** A posterior s. for the leg and thigh, in the form of a double inclined plane. The two pieces are connected by a screw-and-nut arrangement beneath them, by means of which the angle of inclination may be altered at will. [E.]—**Mento-dental s.** A s. consisting of a stiff wire chin-support covered with canvas to which head and neck bandages may be pinned; the wire is attached to a tray, and the latter is connected by means of a screw and rods with a second tray that holds a semi-ovoid concave rim for covering the teeth. ["Jour. of the Am. Med. Assoc.," Jan. 21, 1893, p. 55 (*a*, 34).]—**Moon's s.** An interdental s. for fracture of the lower jaw, made in halves which may be adapted to a jaw of any size. [E.]—**Morgan's s.** An extension s. for fracture of the femur in which the extending force is carried from the foot through a pedal cross-bar to a long s. applied to the other femur. [E, 1.]—**Neill's s. for the leg.** A s. consisting of a fracture box with extension made by fastening the lower part of the leg to the foot-board, and counter-extension made by adhesive straps passed through holes in the upper part of the box and tied on the outside. [E, 3.]—**Nélaton's s. for Colles's fracture.** A

pistol-shaped s. consisting of two pieces, one for the inner and the other for the outer aspect of the forearm. [E.]—**Neudorfer's s.** Strips of fabric covered with soft plaster of Paris and applied beneath a bandage. [α, 34.]—**Packard's bracketed s.** A long s. divided into two parts connected by iron rods, for the treatment of compound fractures. Through the space thus left a ready access is permitted to the wound. [E.]—**Physick's long s.** A modification of Desault's s. (*q. v.*). [E.]—**Price's s.** A bracketed s. for the thigh and leg; used after excision of the knee joint. [E, 2.]—**Sayre's s. (for the ankle).** A s. consisting of a steel collar to surround the leg, a foot-piece to fit the sole of the foot, and two rods, each having a male and a female screw, and connected with the band and foot-piece—the anterior rod by a hinge and stirrup. The limb is prepared for the apparatus by first placing longitudinally around the leg strips of adhesive plaster long enough to extend from the ankle to the tubercle of the tibia. These strips are additionally secured by covering them with a roller, leaving about three inches of their upper extremities exposed. The band of the instrument is opened, slipped around the leg, and clasped, and the free ends of the adhesive strips are turned over the collar and fixed by a roller. The foot at the same time is placed upon the foot-piece and fastened by adhesive plaster and a bandage. With a key the screws in the two rods are next turned, increasing the extension until the patient realizes the required support. [E.]—**Sayre's s. for coxalgia.** A s. made on the same principle as Davis's s., but modified so that for walking extension is made from the thigh and counter-extension from the groin, the appliance not extending below the knee. It consists of an extensible steel bar made up of two sections, one running within the other and reaching from the crest of the ilium to a point 2 inches above the lower end of the femur. At its upper end, and connected with it by a ball-and-socket joint, is a well-padded pelvic band, to which one or two perineal bands are attached for counter-extension. At the lower end of the bar is a rectangular branch, designed to include a part of the inner side of the thigh, and at the lower end of both the outer and inner pieces of metal are rollers, over which run the tabs attached to the ends of the adhesive plaster used for extension. [E.]—**Sayre's s. (for the knee).** A s. consisting of two steel collars, one inch wide, which encircle respectively the thigh and the leg below the knee. These collars admit of being opened and then closed and locked by a hinge and clasp, and are connected with each other by two rods which can be lengthened or shortened by a rack and pinion, worked by a key. This apparatus is secured to the limb by means of adhesive plasters placed longitudinally around the thigh from the lower end of it almost to the groin, and in the same manner around the leg from the head of the tibia to a little above the ankle. These plasters are bound to the leg and thigh by a roller, leaving about two inches of each uncovered. The s. is next slipped around the thigh and leg, and, after being adjusted, is fixed in position by turning the ends of the plaster (left uncovered by the roller) over the bands and securing them by the turn of another bandage. Extension and counter-extension are made by screws connected with the lateral rods. [E.]—**Sector s.** Two terminal plates of thin, perforated metal, connected with each other by a bridge consisting of a sector and two overriding slotted steel strips, connected by three thumb-screws or key-clamps. Used in treating fractures or deformities. [α, 34.]—**Shaffer's s. for knock-knee.** An adjustable s. which can be bent to any lateral angle by turning the key which works a traction rod. The s. is applied to the limb in its deformed position and buckled tightly in place, and then by turning the key the s. is straightened and with it the limb. [A, 520 (α, 29).]—**Smith's anterior s.** See under *Suspension* APPARATUS.—**Smith's s. for ununited fracture.** An apparatus made on the same principle as the ordinary club-foot apparatus, consisting of a shoe and a leg- and thigh-piece, connected by hinges and fastened around the limb by straps and buckles. [E, 3.]—**Steadle-s.** The use of a steadie, bedstead, or crib for the purposes of a s. in treating fractures of the thigh. The upper portion of the body is attached to the head and the fractured limb to the foot and each side of the bed by bandages. [S. W. Hope, "Brit. Med. Jour.," Nov. 21, 1885, p. 963 (α, 34).]—**Stillman's s.** See *Sector s.*—**Swinburne's s. for Colles's fracture.** A s. consisting of a single wooden straight s. placed along the posterior aspect of the forearm and reaching from the elbow to the metacarpo-phalangeal joints. It is fitted with two compresses, one of which fills the concavity of the carpus, while the other supplies the deficiency in the straight line of the arm above. The s. is secured with adhesive straps or arranged so as to make extension and counter-extension. [E.]—**Swinburne's s. for the leg.** A long, narrow, straight wooden s. and foot-piece. The foot is bandaged to the foot-piece, and counter-extension is made from the knee by strips of plaster looped about the limb below the joint and fastened by a rope passed through the loop and then through a hole in the side s. opposite the middle of the thigh. [E.]—**Tamplin's s.** A modification of Scarpa's shoe for the treatment of talipes. [E, 14.]—**Taylor's s. for coxalgia (modified by Sayre).** A long s. consisting of two bars, one working within the other, and extending from the crest of the ilium to the sole of the foot, underneath which it is fastened to the shoe. At its upper extremity is an iron girdle, and to this are attached two perineal bands, one for the sound and the other for the affected limb. There is also a knee-pad. [E.]—**Thomas's knee s.** A s. for relieving the knee joint from the pressure of the weight of the body by transferring it to the ischium and perinæum. It consists of two parallel metallic bars connected by a piece of sacking or leather, with a foot-piece and a metallic patten at their lower extremites, and also a ring, well padded, and attached, at an angle of 53°, to the upper ends of the rods, and having a buckle in front and behind for the attachment of a strap. [E, 2.]—**Thomas's s. for hip-joint disease.** A s. made long enough to extend from the middle of the posterior surface of the leg to the middle of the trunk. It consists of thin sheet-steel 1 inch wide and $\frac{3}{16}$ inch thick, and is bent so as to rest close up against the tuber ischii, beneath the nates. On it are placed two semicircular strips of strap-iron, the one on the thigh part of the iron and the other on the leg part. These may be slid up or down. Two short segments of metal are also connected to the upper end of the s., and are designed to embrace half the circumference of the body. A shoe with a cork sole $2\frac{1}{2}$ or 3 inches high, designed for the foot of the sound limb, is also required. The patient stands on the sound limb, with a block placed beneath the foot of the affected limb, high enough to correct the obliquity of the pelvis and the inclination of the spine. The s. is next placed along the posterior surface of the leg, the thigh, the buttock, and the back, and bent so as to conform exactly to the outlines of these parts. A plain roller is then applied around the limb, beginning at the middle of the leg and continuing it up to the groin, from which point it is passed to the body, and ended by a few circular turns beginning about the crests of the ilia and terminating at the lower angle of the scapula. For this roller, which is merely a protective for the skin, one leg of a pair of woolen drawers may be substituted. A plaster roller-bandage is next applied around the limb at the middle of the leg, at the knee, and around the thigh a short distance below the buttock; after which the plaster bandage is made to encircle the body as high as the lower angle of the scapula, care being taken to protect the crests of the ilia. The s. is next placed in position along the posterior aspect of the leg, thigh, and buttock, and is secured by a second and third plaster roller following the same order as the first. After the plaster has hardened it may either be left undivided or split up along the anterior surface and secured by straps. [E, 2.]—**Vance's s.** A leather s. intended to fix the joint in hip disease. [A, 520 (α, 29).]—**Welch's leg s.** A double s., one part guttered and having the general shape of the leg and foot, the other straight; used for fracture of the tibia. [E.]—**Welch's shoulder s.** An angular guttered s. for covering the cap of the shoulder and outer surface of the arm in cases of fracture high up in the humerus. [E.]

SPLINTCHINA (Ger.), n. Spli^{2}nt′ch^{2}en-a^3. Yellow cinchona devoid of suberous layers. [α, 35.]

SPODE (Fr.), n. Spod. 1. Zinc oxide obtained by calcination. 2. White calcined ivory. [A, 385.]

SPODIACON (Lat.), **SPODIACUM** (Lat.), n's n. Spo^{2}d-i(i^2)′-a^{2}k(a^{3}k)-o^{2}n, -u^{3}m(u^{4}m). Gr., σποδιακόν (from σποδός, ashes). A certain old ash-colored collyrium. [A, 325 (α, 48).]

SPODIOMYELITIS (Lat.), n. f. Spod(spo^{2}d)-i^2-o(o^3)-mi(mu^6)-e^{2}l-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). From σπόδιος, ashy-gray, and μυελός, marrow. Fr., *spodiomyélite*, *spodo-myélite antérieure aiguë*. See *Acute anterior* POLIOMYELITIS.

SPODIUM (Lat.), n. n. Spod(spo^{2}d)′i^2-u^{3}m(u^{4}m). Gr., σπόδιον (from σποδός, ashes). An old name for animal charcoal. [B.]—**S. Græcorum.** See ALBUM *græcum*.

SPOGEL, n. See ISPAGHUL.

SPONDIAS (Lat.), n. f. Spo^{2}nd′i^2-a^{2}s(a^{3}s). Gen., *-i′ados* (*-is*). Gr., σπονδιάς. Fr., *s.*, *mombin*. Ger., *Mombinpflaume*. Hog-plum; a genus of trees of the *Spondiaccæ*, or *Spondieæ*, which are a tribe or order of the *Anacardiaceæ*. [α, 35.]—**S. cytheræa, S. dulcis.** Fr., *arbre de Cythère*. Otaheite apple; a species cultivated in the Friendly and Society Islands for its edible fruit, which is aperient and refrigerant. The leaves are eaten. [α, 35.]—**S. lutea.** Fr., *s. jaune*. Golden apple, Jamaica plum, yellow hog-plum; an astringent species of the West Indies and South America. [α, 35.]—**S. mangifera.** Hog-plum or wild mango of the East Indies. The root is used as an emmenagogue, the powdered root-bark as an antidysenteric, and the wood in gonorrhœa, leucorrhœa, etc. A mild, insipid gum exuding from the bark is used as a tonic and in fumigations. The fruit is eaten; and in China its juice is a constituent of several hair tonics. [α, 35.]—**S. mombin, S. monbin, S. purpurea.** Fr., *s. à fruits rouges*, *prunier d'Espagne*, *ramboustan*. Ger., *purpurrothe Mombin*. Spanish plum, purple hog plum of the West Indies and tropical South America. The sugary, acidulous drupes are used medicinally like prunes. The seeds are poisonous. Most parts of the tree are mildly astringent. The leaves are a feeble anodyne and diaphoretic, and the flower-buds are used as a sweetmeat with sugar. [α, 35.]—**S. tuberosa.** A Brazilian species. The tubers contain a potable sap, and the ripe fruits are used as a refrigerant. [α, 35.]—**S. venulosa.** A species with an aromatic and astringent bark. [α, 35.]

SPONDYLALGIA (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-a^{2}lj(a^{3}lg)′i^2-a^3. From σπόνδυλος, a vertebra, and ἄλγος, pain. See CACORRHACHITIS.

SPONDYLARTHRITIS (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-a^{3}rth-ri-(re)′ti^{2}s. Gen., *-it′idos* (*-idis*). From σπόνδυλος, a vertebra, and ἄρθρον, a joint. Inflammation of the vertebral articulations. [E.]—**S. synovialis.** Of Hüter, inflammation of the synovial membrane of the oblique processes of the vertebræ. [A, 326 (α, 21).]

SPONDYLARTHROCACE (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-a^{3}rth-ro^{2}k′a^{2}s(a^{3}k)-e(a). Gen., *-throc′aces*. From σπόνδυλος, a vertebra, ἄρθρον, a joint, and κακός, evil. Fr., *s.* Caries of the vertebræ. [E.]

SPONDYLEXARTHROSIS (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-e^{2}x-a^{3}rth-ros′i^{2}s. Gen., *-thros′eos* (*-is*). From σπόνδυλος, a vertebra, and ἐξάρθρωσις, a dislocation. Fr., *spondylexarthrose*. Dislocation of a vertebra. [E.]

SPONDYLITIS (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). From σπόνδυλος, a vertebra. Fr., *spondylite*. Inflammation of one or more vertebræ. [E.] Cf. *Pott's* DISEASE.—**S. cervicalis.** Arthritis of the cervical vertebræ. [L, 57 (α, 14).]—**S. deformans.** Chronic rheumatic or gouty arthritis of the vertebral column terminating in ankylosis and deformity. [A, 520 (α, 29); E.]—**S. tuberculosa.** Tubercular s.

SPONDYLIZEMA (Lat.), n. n. Spo^{2}nd-i^{2}l(u^{6}l)-i^{2}z(ez)-em(am)′-a^3. Gen., *-em′atos* (*-atis*). From σπόνδυλος, a vertebra, and ἵζημα, a subsiding. Fr., *spondylizème*. Of Herrgott, pelvic obstruction in which, instead of mere spondylolisthesis, there is destruction,

total or partial, of the body of a vertebra, as in Pott's disease, so as to allow the vertebra above it to sink into its place. [Auvard, "Union méd.," May 1, 1884, p. 759 ; A, 15.]

SPONDYLOCACE (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-o^{2}k'a^{2}s(a^{3}k)-e(a). Gen., *-oc'aces.* From **σπόνδυλος**, a vertebra, and **κακός**, evil. See SPONDYLARTHROCACE.

SPONDYLODYNIA (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-o(o^3)-di^{2}n-(du^{6}n)'i^2-a^3. From **σπόνδυλος**, a vertebra, and **ὀδύνη**, pain. See CACORRHACHITIS.

SPONDYLOLISTHESIS (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-o^{2}l-i^{2}sthe(a)'si^{2}s. Gen., *-es'eos (-is).* From **σπόνδυλος**, a vertebra, and **ὀλίσθησις**, a sliding. Fr., *spondylolisthésis, spondylolisthèse, glissement de la colonne vertébrale.* Ger., *Wirbelglitt.* Of Kilian, a deformity of the vertebral column due to the lumbar vertebræ gliding upon each other, so as to overhang and obstruct the brim of the pelvis, the body of the last lumbar vertebra, especially, being separated from that of the first sacral vertebra. Cf. *Spondylolisthetic* PELVIS, PELVIS *obtecta*, and SPONDYLIZEMA.

SPONDYLOMYELITIS (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-o(o^3)-mi-(mu^6)-e^{2}l-i(i)'ti^{2}s. Gen., *-it'idos (-idis).* From **σπόνδυλος**, a vertebra, and **μυελός**, marrow. See SPONDYLITIS.

SPONDYLOPATHIA (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-o(o^3)-pa^{2}th-(pa^{3}th)-i(e)'a^3. From **σπόνδυλος**, a vertebra, and **πάθος**, disease. Fr., *spondylopathie.* Any vertebral disease.

SPONDYLOPTOSIS (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-o^{2}pt-os'i^{2}s. Gen., *-ptos'eos (-is).* From **σπόνδυλος**, a vertebra, and **πτῶσις**, a falling. See SPONDYLOLISTHESIS.

SPONDYLOPYOSIS (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-o(o^3)-pi(pu^6)-os'i^{2}s. Gen., *-os'eos (-is).* From **σπόνδυλος**, a vertebra, and **πύον**, pus. Vertebral disease attended by the production of pus. [E.]

SPONDYLOSCHISIS (Lat.), n. f. Spo^{2}nd-i^{2}l(u^{6}l)-o^{2}sk(o^{2}sch^2)'-i^{2}s-i^{2}s. Gen., *-schis'eos (-osch'isis).* From **σπόνδυλος**, a vertebra, and **σχίσις**, a fissure. A lack of ossification, either unilateral or bilateral, in the arch of the fifth lumbar vertebra ; said to be one of the causes of spondylolisthesis. [F. L. Neugebauer, "Arch. f. Gyn.," xxii, 3 ; "Rev. d. sci. méd.," Jan., 1885, p. 243.]

SPONDYLOTOMY, n. Spo^{2}nd-i^{2}l-o^{2}t'o^{2}m-i^2. From **σπόνδυλος**, a vertebra, and **τομή**, a cutting. Fr., *spondylotomie.* Ger., *Spondylotomie.* See RHACHIOTOMY.

SPONDYLUS (Lat.), n. m. Spo^{2}nd'i^{2}l(u^{6}l)-u^{3}s(u^{4}s). Gr., **σπόνδυλος**. Fr., *spondyle.* See VERTEBRA and VERTICILLUS.

SPONGE, n. Spu^{3}nj. Gr., **σπόγγος**. Lat., *spongea, spongia.* Fr., *éponge.* Ger., *Schwamm, Meerschwamm.* It., *spugna.* Sp., *esponja.* An individual of the *Spongia, Spongiæ,* or *Spongida,* a class of the *Cœlentera* or of the *Protozoa ;* as commonly used, the horny or fibrous skeleton of such an individual. [L.]—**Burnt s.** [U. S. Ph., 1850]. See CARBO *spongiæ.*—**Compressed s.** Lat., *spongia compressa* [Belg. Ph.] (seu *pressa* [Austr. Ph., Hung. Ph., 2d ed.], seu *funiculo pressa* [Fr. Cod.]), *spongiæ compressæ* [Ger. Ph., 1st ed., Gr. Ph., Russ. Ph.]. Fr., *éponge préparée à la cire* [Fr. Cod., 1868] (ou *à la ficelle* [Fr. Cod.]). Ger., *Pressschwamm.* Sp., *esponja preparada* [Sp. Ph.]. Fine s's, cleansed and exposed to pressure—being wound about with fine thread for the purpose, according to many of the ph's. [B, 95 (a, 38).]—**Honeycomb s.** See SPONGIA *equina.*—**Levant s.** See EUSPONGIA *officinalis.*—**Prepared s.** See SPONGIA *præparata.*—**River s.** See SPONGIA *fluviatilis.*—**S.-particle.** See SARCOID.—**Turkey s.** See EUSPONGIA *officinalis.*—**Vegetable s.** See LUFFA *œgyptiaca.*—**Waxed s.** See SPONGIA *cerata.*

SPONGE-HOLDER, n. Spu^{3}nj'hold-u^{5}r. Ger., *Schwammhalter.* A rod terminating in a clasp like device for grasping a sponge, to which it serves as a handle.—**Finger s.-h.** A s.-h. with a thimble at one end, for use within the throat. [E.]

SPONGIA [Swiss Ph.] (Lat.), n. f. Spo^{2}n(spo^{2}n^2)'ji^2(gi^2)-a^3. Gr., **σπόγγος, σπογγία.** Fr., *éponge fine* [Fr. Cod.] (1st def.). Sp., *esponja* [Sp. Ph.] (1st def.). 1. A sponge. In pharmacy, *S. officinalis,* or, according to the Fr. Cod., Belg. Ph., and Sp. Ph., *S. usitatissima,* washed and pressed. The Finn. Ph. and Norw. Ph. require Mediterranean sponges ; the Swed Ph. allows also sponges from the Red Sea. 2. See TONSIL. [B, 95 (a, 38).]—**Carbo spongiæ** [Gr. Ph.]. See CARBO *spongiæ.*—**Pulvis spongiæ ustæ** [Fr. Cod.]. Fr., *poudre d'éponge torréfiée* [Fr. Cod.]. Fine sponges, cleansed, burned in a coffee-mill, powdered, and sifted through a No. 100 silk sieve [Fr. Cod.] ; river sponge sifted through a 1,600-mesh sieve [Russ. Ph.]. [B, 95 (a, 38).]—**S. cerata** [Belg. Ph., Dan. Ph., Finn. Mil. Ph., Norw. Ph., Swed. Ph.], **Spongiæ ceratæ** [Ger. Ph., 1st ed., Gr. Ph., Russ. Ph.]. Ger., *Wachsschwamm.* Fine sponges carefully cleansed, soaked in melted yellow wax, pressed in a warm press [Ger. Ph., Norw. Ph., Russ. Ph., Swed. Ph.], and, when cold, freed from the wax on their edges ; used to make sponge tents. [B, 95 (a, 38).]—**S. compressa** [Belg. Ph.], **Spongiæ compressæ** [Ger. Ph., 1st ed., Gr. Ph., Russ. Ph.]. See *Compressed* SPONGE.—**S. cynorrhodontis, S. cynosbati.** See BEDEGAR.—**S. equina.** Ordinary bath-sponge. [a, 35.]—**S. fluviatilis** [Russ. Ph.]. Small sponges found on stones or on the stalks and leaves of water plants in rivers, ponds, or swamps. [B, 95 (a, 38).]—**S. funiculo pressa** [Fr. Cod.]. See *Compressed* SPONGE.—**S. gossypina.** Wool sponge, "lamb's wool" ; a variety of S. *equina.* [a, 35.]—**S. lacinulosa.** Fr., *éponge peluchée.* A very porous, round, soft sponge found in the Mediterranean and Red Seas and the Indiau Ocean. [B, 119 (a, 38).]—**S. lacustris.** A Russian species used in the fresh state by the homœopathists for the preparation of a tincture. [B, 270.]—**S. marina** [Dan. Ph., Finn. Mil. Ph., Gr. Ph., Norw. Ph., Russ. Ph., Swed. Ph.]. See *S.* (1st def.).—**S. officinalis** [Belg. Ph.]. Fr., *éponge fine* [Fr. Cod.]. See *S. præparata* (2d def.).—**S. præparata.** 1. See *S. cerata.* 2. Sponge rendered soft and suitable for surgical purposes by maceration in cold water and separation of the calcareous matter. [a, 35.]—**S. pressa** [Austr. Ph., Hung. Ph., 2d ed.]. See *Compressed* SPONGE.—**S. rosarum.** See BEDEGAR.—**S. usitatissima.** Fr., *éponge fine* [Fr. Cod.]. A fine porous species of sponge admitted by the Belg. and Sp. Ph's and the Fr. Cod. for medical uses along with *S. officinalis.* [B, 95 (a, 38).]—**S. usta** [Fr. Cod., U. S. Ph., 1850]. Fr., *éponge torréfiée* [Fr. Cod.]. See CARBO *spongiæ.*—**Spongiæ ustæ pulveratæ.** See *Pulvis spongiæ ustæ.*

SPONGIN, n. Spu^{3}n'ji^{2}n. Fr., *spongine.* Ger., *S.* The fibrous substance of sponges exhausted by water, alkalies, and feeble acids. It is analogous to sericin, and is soluble in caustic potassa and in concentrated acids. [B, 38, 48, 93 (a, 14).]

SPONGIOBLASTS, n. pl. Spu^{3}n'ji^2-o-bla^{2}sts. From **σπόγγος**, a sponge, and **βλαστός**, a sprout. A variety of cells from which the stroma of gray nervous tissue develops. [L.]

SPONGIOLA (Lat.), n. f. Spo^{2}n(spo^{2}n^2)-ji(gi)'o^{3}l-a^3. Dim. of *spongia,* a sponge. See SPONGIOLE.—**S. seminis.** See APPENDIX *funicularis.*

SPONGIOLE, n. Spu^{3}n'ji^2-ol. Lat., *spongiola (q. v.).* Fr., *s.* Ger., *Schwämmchen.* 1. A spongelet ; a term formerly applied to certain small bodies, especially the tender tip of a root, on account of their spongy texture and supposed property of absorbing moisture like a sponge. [a, 35.] 2. A chorionic villus.—**Pistillary s.** A stigma. [a, 35.]—**Seed s.** Of De Candolle, one of the minute bodies said to be situated upon the external surface of seeds and to induce germination by the absorptiou of water. [a, 35.]

SPONGIOPILINE, n. Spu^{3}n-ji-o-pil'en. From **σπογγία**, a sponge, and **πῖλος**, felted wool. Fr., *s.* Ger., *Filzschwamm.* A sheet, about half an inch thick, consisting of cotton-wool mingled with small pieces of sponge, coated with gutta-percha on one side ; to be wrung out of hot water and applied as a poultice.

SPONGIOPLASM, n. Spu^{3}nj'i^2-o-pla^{2}zm. Lat., *spongioplasma* (from **σπογγία**, a sponge, and **πλάσμα**, anything molded). The material forming the reticulum of the protoplasm of a cell. [Schäfer (a, 34).] Cf. HYALOPLASM.

SPONGIOSA (Lat.), n. f. Spo^{2}n(spo^{2}n^2)-ji^2(gi^2)-os'a^3. From **σπόγγος**, a sponge. See *Cancellous* TISSUE.—**Horns'** (Ger.). See NEUROGLIA and *Horny* FRAMEWORK.

SPONGIOSE, adj. Spu^{3}n'ji^2-os. Lat., *spongiosus, spongiodes* (from **σπόγγος**, a sponge). Fr., *spongieux.* Ger., *spongiös, schwammig. locker.* Spongy, resembling a sponge in texture ; very cellular, with the cellules filled with air. The *Spongiosi* of Fries are a section of the genus *Polyporus.* [a, 35.]

SPONGOCYNANCHE (Lat.), n. f. Spo^{2}n^2-go(go^3)-si^{2}n(ku^{6}n)-a^{2}n^{2}k(a^{3}n^{2}ch^2)'e(a). Gen., *-anch'es.* From **σπόγγος**, a sponge, and **κυνάγχη**, cynanche. Fr., *s.* See CYNANCHE *tonsillaris.*

SPONGOID, adj. Spu^{3}n^2'goid. Gr., **σπογγοειδής** (from **σπόγγος**, a sponge, and **εἶδος**, resemblance). Lat., *spongoides.* Fr., *spongoïde.* Resembling sponge. [L, 41 (a, 43).]

SPONGOS (Lat.), **SPONGUS** (Lat.), n's m. Spo^{2}n^2'gos, -gu^{3}s-(gu^{4}s). See SPONGE ; in the pl., *spongi,* swollen tonsils. [L, 50 (a, 14).]

SPONGY, adj. Spu^{3}n'ji^2. Fr., *spongieux.* Ger., *schwammig, locker.* Resembling sponge in texture or in characters. [a, 17.]

SPONTANEOUS, adj. Spo^{2}nt-an'e^2-u^{3}s. Lat., *spontaneus* (from *sponte,* of one's free will). Fr., *spontané.* Ger., *freiwillig* (1st def.), *wildwachsend* (2d def.). 1. Originating within one's self ; produced by internal agencies or impulses, apart from external influences. [a, 48.] 2. Of plants, growing wild. [a, 35.]

SPONTÉPARITÉ (Fr.), n. Spo^{2}n^2-ta-pa^3-re-ta. See *Spontaneous* GENERATION.

SPOON, n. Spu^{4}n. Gr., **κοχλιάριον.** Lat., *cochlearia.* Fr., *cuiller.* Ger., *Löffel.* A utensil, consisting of a hollow part (usually more or less oval) and a stem, used in eating and feeding ; also a s.-shaped instrument. [a, 48.]—**Sharp s.** A small metallic s., usually circular, and having a sharp edge, used for scraping away granulations, fungous growths, etc. Special varieties are designated according to the name of their inventors. [B.]

SPORA (Lat.), n. f. Spor(spo^{2}r)'a^3. See SPORE.—**Globulus sporarum.** Ger., *Sporenbällchen.* A round conceptacle containing four united spores. [a, 35.]

SPORACEOUS, adj. Spo^{2}r-a'shu^{3}s. From **σπορά**, a spore. Lat., *sporaceus.* Composed of or convertible into spores. [a, 35.]

SPORADIAL, SPORADIC, adj's. Spo^{2}r-ad'i^2-a^{2}l, -a^{2}d'i^{2}k. Gr., **σποραδικός** (from **σπείρειν**, to sow). Lat., *sporadicus.* Fr., *sporadique.* Ger., *sporadisch, zerstreut.* 1. Occurring at isolated points ; of diseases, not epidemic. [a, 48.] 2. In botany, scattered, widely dispersed. [a, 35.]

SPORANGEIOLE, n. Spo^{2}r-a^{2}n'ji^2-ol. Lat., *sporangeiolum* (from **σπορά**, a spore, and **ἀγγεῖον**, a vessel). Fr., *sporangiole.* A case containing sporidia. [a, 35.]

SPORANGEIUM (Lat.), n. n. Spor(spo^{2}r)-a^{2}n(a^{3}n^2)-ji'(ge^2'i^2)-u^{3}m(u^{4}m). From **σπορά**, a spore, and **ἀγγεῖον**, a vessel. Fr., *sporange.* Ger., *Sporenbehälter, Sporengehäuse, Sporangie.* A spore-case containing non-sexual spores. [a, 35.]

SPORANGIDIUM (Lat.), n. n. Spor(spo^{2}r)-a^{2}n(a^{3}n^2)-ji^{2}d(gi^{2}d)'-i^2-u^{3}m(u^{4}m). Fr., *sporangidion.* Of Bischoff, the theca of mosses.

SPORE, n. Spor. Gr., **σπορά**. Lat., *spora.* Fr., *s.* Ger., *S.* A specialized cell, consisting essentially of a nucleated mass of protoplasm (usually inclosed by a cell-wall), capable of developing into a new individual. The term is usually restricted to the free reproductive cells of cryptogams, the s's of phanerogams being known as ovules and pollen. [a, 35.] Cf. CARPOSPORE, CHLAMYDOSPORE, GYMNOSPORE, MACROSPORE, MENISPORE, MICROSPORE, OOSPORE, PROTOSPORE, TELENTOSPORE, UREDOSPORE, ZOOSPORE, and ZYGOSPORE.—**Autumn s's.** The teleutospores of the *Uredineæ.* [a, 35.]—**Coated s.** See CHLAMYDOSPORE.—**Compound s's.** S's that become septate by division and produce secondary s's (merispores). [a, 35.]—**Dauers'** (Ger.). See *Resting*-CELL.—**Daughter s's.** S's pro-

duced together in a cyst or mother-cell. [α, 35.]—**Inactive s.** A non-motile, reproductive cell. [α, 35.] Cf. *Resting*-CELL.—**Mother-s.** A cell or cyst containing s's; more properly, a mother-cell. [α, 35.]—**Naked s.** See GYMNOSPORE (1st def.).—**Primary s.** See PROTOSPORE.—**Resting s.** See *Resting*-CELL.—**Secondary s.** See TELEUTOSPORE and MERISPORE.—**S.-case.** See SPORANGEIUM.—**S'nblase** (Ger.). See SPOROCYST.—**S'nfrucht** (Ger.). See SPOROCARP.—**S'nhaut** (Ger.). See SPORODERM.—**S'npflanze** (Ger.). See CRYPTOGAM.—**S'nschicht** (Ger.). See HYMENIUM.—**S'nschlauchpilze** (Ger.). See ASCOMYCETES.—**S'nträger** (Ger.). See SPOROPHORE.—**S.-sac.** See SPORANGEIUM.—**Summer s's.** The uredospores of the *Uredineæ*. [α, 35.]—**Swarm s.** See FLAGELLULA and ZOOSPORE.—**Winter s's.** See *Autumn s's*.

SPORID, n. Spor'i^{2}d. Lat., *sporidium* (from σπορά, a spore). Fr., *sporidie*. Ger., *Sporidie*. A small spore; a reproductive cell produced within a cyst or ascus. [α, 35.]

SPORIDIOLA (Lat.), n. f. Spor(spo^{2}r)-i^{2}d-i(i^2)'o^{2}l-a^3. See SPORULE.

SPORIDIUM (Lat.), n. n. Spo^{2}r-i^{2}d'i^2-u^{3}m(u^{4}m). See SPORID.

SPORIFEROUS, adj. Spo^{2}r-i^{2}f'e^{2}r-u^{3}s. From σπορά, a spore, and *ferre*, to bear. Fr., *sporifère*. Ger., *sporenführend*. Bearing spores. The *Sporifera* are a section of the *Fungi*. [α, 35.]

SPORISORIUM (Lat.), n. n. Spor(spo^{2}r)-i^2-sor'i^2-u^{3}m(u^{4}m). Fr., *sporisore*. The genus *Tilletia*. [α, 35.]—**S. maidis.** A species parasitic on Turkish corn, said to produce pellagra. [B, 108 (α, 14).]

SPORN (Ger.), n. Spo^{2}rn. See CALCAR and HIPPOCAMPUS *minor*.—**Hahnens'.** See HIPPOCAMPUS *minor*.

SPOROCARP, n. Spor'o-ka^{3}rp. Lat., *sporocarpium* (from σπορά, a spore, and καρπός, a fruit). Fr., *sporocarpe*. Ger., *Sporenfrucht*, *Keimfrucht*. The fructification in cryptogams, especially the pluricellular body produced in the *Carposporeæ* by the fertilization of the carpogonium. [α, 35.]

SPOROCLADIUM (Lat.), n. n. Spor(spo^{2}r)-o(o^3)-klad(kla^{3}d)'-i^2-u^{3}m(u^{4}m). From σπορά, a spore, and κλάδος, a branch. In some *Algæ*, a branch bearing spores. [α, 35.]

SPOROCYST, n. Spor'o-si^{2}st. Lat., *sporocystis* (from σπορά, a spore, and κύστις, a bladder). A sporangeium in *Algæ*. [α, 35.]

SPORODERM, n. Spor'o-du^{5}rm. Lat., *sporodermis* (from σπορά, a spore, and δέρμα, the skin). Ger., *Sporenhaut*. The wall or envelope inclosing the nucleus of a spore. [α, 35.]

SPOROGONIUM (Lat.), n. n. Spor(spo^{2}r)-o(o^3)-gon(go^{2}n)'i^2-u^{3}m(u^{4}m). From σπορά, a spore, and γόνος, offspring. Fr., *sporogone*. 1. A sporangeium. 2. The sporocarp in *Muscineæ*. [α, 35.]

SPOROPHORE, n. Spor'o-for. Lat., *sporophorum* (from σπορά, a spore, and φορός, bearing). Fr., *s*. Ger., *Sporenträger*. Lit., a spore-bearer; in phanerogams, the placenta; in certain *Fungi*, the basidium; in mosses, that part of the sporogonium that bears the spores, also the sporophyte. [α, 35.]

SPOROPHYLL, n. Spor'o-fi^{2}l. Lat., *sporophyllum* (from σπορά, a spore, and φύλλον, a leaf). Fr., *sporophylle*. A foliar organ bearing spores. [α, 35.]

SPOROPHYTE, n. Spor'o-fit. From σπόρος, seed, and φυτόν, a plant. Fr., *s*. 1. A cryptogam. 2. In the *Bryophyta* and *Pteridophyta*, the plant bearing the non-sexual spores. [α, 35.]

SPOROS (Lat.), n. m. Spor(spo^{2}r)'o^{2}s. Gr., σπόρος (from σπείρειν, to sow). See SEMEN.

SPOROSAC, n. Spor'o-sa^{2}k. From σπόρος, seed, and σάκκος, a sac. Fr., *s*. One of the simple generative buds of certain hydrozoans in which the medusoid structure is not developed. [B, 28 (α, 27).]

SPOROTRICHUM (Lat.), n. n. Spo^{2}r-o^{2}t'ri^{2}k(ri^{2}ch^2)-u^{3}m(u^{4}m). From σπόρος, seed, and θρίξ, a hair. Fr., *sporotrie*. A genus of hyphomycetous *Fungi*. The *Sporotricha* are a cohort of *Fungi*; the *Sporotrichaceæ*, a family of *Hyphomycetes*; the *Sporotricheæ*, a division of the *Mucedineæ*; and the *Sporotrichei*, a section of the *Mucedinei*. [α, 35.]—**S. dermatodes.** A species that infests Provence cane, in the shape of a whitish, pulverulent mold, of a disagreeable, irritating odor, provocative of sneezing. Contact with it gives rise to *maladie des cannes*.

SPOROZOA (Lat.), n. n. pl. Spor(spo^{2}r)-o(o^3)-zo'a^3. From σπόρος, a spore, and ζῷον, an animal. Fr., *sporozoaires*. Ger., *Sporozoen*. A class of cortical unicellular, endoparasitic *Protozoa* reproducing by spores. [L, 121.]

SPORT, n. Sport. A shoot bearing leaves, flowers, or fruit different in character from those of the parent plant. [α, 35.]

SPORULE, n. Spo^{2}r'u^{2}l. Lat., *sporula* (dim. of *spora*, a spore). Ger., *S.*, *Spörchen*. 1. See SPORE. 2. A diminutive spore. 3. A granule contained within a spore. 4. A sporid. [α, 35.]

SPORULOUS, adj. Spo^{2}r'u^{2}l-u^{3}s. Lat., *sporulus* (from *sporula*, a little spore). Fr., *sporuleux*. Of *Fungi*, having peridia containing many sporules. [B, 38 (α, 35).]

SPOT, n. Spo^{2}t. Gr., στίγμα, σπίλος. Lat., *macula*. Fr., *tache*. Ger., *Fleck*. A small extent of surface differing, especially in appearance, from surrounding parts. [α, 48.]—**Anterior perforated s. of the brain.** See *Anterior perforated* SPACE.—**Blind s. (of Mariotte).** See *Optic* DISC.—**Corneal s.** See LEUCOMA (3d def.).—**Embryonic s.** Ger., *Embryonalfleck* (3d def.). 1. The germinal s. 2. See PROTOSOMA. 3. See *Embryonic* AREA.—**Germinal s., Germinative s., Germ s.** Lat., *macula germinativa* (seu *germinans*). Fr., *tache germinative*. Ger., *Keimfleck*, *Furchungskern*. A nucleolus of a germinal vesicle; of R. Wagner, a more or less lenticular or spheroidal aggregation of granules contained within the germinal vesicle in contact with the inner surface of its wall, supposed by him to be the true germ of the embryo. [A, 4.]—**Heat s.** See CHLOASMA *caloricum*.—**Hectic s.** A bright-red s. on the cheek of a person suffering from hectic fever. [α, 34.]—**Hepatic s.** See CHLOASMA (1st def.).—**Igneal s.** See EPHELIS *ab igne*.—**Lenticular s's.** Lat., *maculæ lenticulares*. See LENTIGO and ROSEOLA *typhosa*.—**Light s. on the membrana tympani.** Ger., *Lichtkegel*. A sharply defined and usually triangular s. of light situated in the inferior quadrant of the tympanic membrane. Its apex is in front of the umbo, and it extends forward and downward so that it forms an obtuse angle forward with the direction of the handle of the malleus. Its shape varies greatly on account of differences in the inclination of the membrane and variations in its curvature. The principal cause of this light s. is the inclination of the membrane to the axis of the meatus in connection with the concavity of the membrane. [F.]—**Liver s.** See CHLOASMA (1st def.).—**Mariotte's s.** The optic disc. [A, 301 (α, 34).]—**Milk s.** Fr., *tache laiteuse*. An opaque patch, ½ inch to 1 inch in diameter, found post mortem, on the outer aspect of the visceral layer of the pericardium, most frequently over the right ventricle, less often over the left ventricle, the left auricle, or the prominences of the coronary vessels. It is very common in persons who have passed middle life, and may or may not be detachable. [D, 1.]—**Mother's s.** See NÆVUS.—**Receptive s.** In vascular cryptogams, mosses, and *Hepaticæ*, a small s. on the wall of the oosphere, near its apex, through which the antherozoöids enter the oosphere to fertilize it. [α, 25.]—**Rose s's.** The rose-colored maculæ of the eruption of typhoid fever.—**Soldier s.** Circumscribed leucoplakia of a serous surface. [α, 34.] Cf. *Milk s.*—**S. of Sömmerring.** See MACULA *lutea*.—**Sun s's.** See LENTIGO.—**Wagner's s.** See *Germinal s.*—**Wine s.** See NÆVUS *flammeus*.—**Yellow s.** See MACULA *lutea*.

SPOTTING, n. Spo^{2}t'i^{2}n^2. See NECROSIS (2d def.).

SPRACHE (Ger.), n. Spra^{3}ch^2'e^2. See SPEECH.—**Geberdens'.** See MIMOGRAPHY.—**Hands'.** See CHEIROLOGY.—**Todte S.** Of Meyer, the monotonous snuffling language of persons affected with adenoid vegetations of the pharynx. ["Rev. de laryng.," May, 1892, p. 259 (α, 50).]

SPRACHLOSIGKEIT (Ger.), n. Spra^{3}ch^2'los-i^{2}g-kit. See ALALIA, APHONIA (1st def.), and DUMBNESS.

SPRACHSTÖRUNG (Ger.), n. Spra^{3}ch^2'stu^{5}r-un^2. Any disorder of speech. [α, 14.]

SPRACHWERKZEUG (Ger.), n. Spra^{3}ch^2've^{2}rk-tsoig. The organs of speech. [α, 48.]

SPRAIN, n. Spran. Gr., διάστρεμμα. Lat., *distorsio*. Fr., *foulure*, *entorse*. Ger., *Verrenkung*. The condition of pain, swelling, etc., produced in the soft parts about a joint by a violent wrenching or straining of them without dislocation of the articular surfaces; also the lameness that follows.—**Rider's s.** A s. of the adductor longus femoris muscle, said to be caused generally by the horseman suddenly making a strong grip, owing to his horse rearing, shying, slipping, or unexpectedly taking a jump. [Morris, "Lancet," July 29, 1882, p. 133.]

SPRAY, n. Spra. Fr., *s.*, *pulvérisation*. Ger., *Flüssigkeitsstaub*. Water or other liquid divided into fine particles by wind or a current of a gas; also a jet of liquid in such a condition. [α, 48.] Cf. ATOMIZATION.—**Listerian steam s.** The carbolized vapor from a steam atomizer used to cover the field and environment of a surgical operation. [α, 34.]

SPRAY-PRODUCER, n. Spra'pro-du^{2}s''u^{5}r. See ATOMIZER.—**Sass's s.-p.** Two glass tubes with fine points welded one on top of the other with the points in close apposition. Through the upper tube passes a strong current of air, while the lower one is bent at a right angle and fitted by a cork to a small glass test-tube which contains the medicated solution. [E.]

SPREIZLADE (Ger.), n. Sprits'la^{3}d-e^2. Of Renz, an extension apparatus for fractures of the femur. [L, 57 (α, 14).]

SPREKELIA (Lat.), n. f. Spre^{2}k-e^{2}l'i^2-a^3. From *Sprekelsen*, a German botanist. Fr., *sprékélie*. 1. An old name for the *Galanthus nivalis*. 2. A genus of the *Amaryllideæ*. [α, 35.]—**S. cybister.** Fr., *amaryllis saltimbanque*. A plant referred by Bentham and Hooker to the genus *Hippeastrum*. It scarcely differs from *Hippeastrum reginæ*. [α, 35.]—**S. formosissima.** Fr., *amaryllis magnifique* (ou *reine de beauté*). Ger., *Jakobslilie*, *spanische Lilie*. Sp., *flor de Santiago* [Mex. Ph.]. Jacobæan lily. The bulbs are emetic. [α, 21, 35.]

SPREW, n. Spru^2. Written, also, *sprue*. A local term for thrush. See APHTHÆ.

SPRINGEN (Ger.), n. Spri^{2}n^2'e^{2}n. A variety of gid in sheep in which the animal leaps up into the air; due to the presence of *Cœnurus cerebralis* in the fourth ventricle of the brain. [B.]

SPRINGFERTIG (Ger.), adj. Spri^{2}n^2'fe^{2}rt-i^{2}g. Ready to be ruptured (said of the membranes in labor). [A, 88.]

SPRINGGURKE (Ger.), n. Spri^{2}n^2'gurk-e^2. See ECBALLIUM *elaterium*.

SPRING-HALT, n. Spri^{2}n^3'ha^{4}lt. A disease of horses manifested by sudden, convulsive, and exaggerated lifting of the hind leg, believed to be choreic. [α, 34.]

SPRINGKRAFT (Ger.), n. Spri^{2}n^2'kra^{3}ft. See ELASTICITY.

SPRING LAKE WELL, n. Spri^{2}n^2 lak we^{2}l'. A place in Ottawa County, Michigan, where there is a saline and sulphurous spring. [Anderson (α, 14).]

SPRINGWURM (Ger.), n. Spri^{2}n^2'vurm. See ASCARIS (1st def.).

SPRITZE (Ger.), n. Spri^{2}t'se^2. See SYRINGE.—**Klystiers'.** An enema syringe. [α, 34.]—**Magens'.** See *Stomach* PUMP.—**Nasens'.** See RHINENCHYTA.—**Salbens'.** An ointment syringe. [α, 34.]—**S'nröhrchen.** The cannula of a syringe. [E.]—**Thränens'.** See DACRYOSYRINX (2d def.).

SPRITZFLASCHE (Ger.), n. Spri^{2}ts'tla^{3}sh-e^2. A squirting-bottle; an apparatus for injecting chloroform and other volatile liquids. [L, 57 (a, 14).]

SPROFONDO (It.), n. Spro-fo^{2}n'do. A place in Tuscany where there are alkaline springs. [L, 49 (a, 14).]

SPROSSE (Ger.), n. Spro^{2}s'se^2. 1. A bud, a sprout. 2. A freckle.—**Gefässs'.** A vascular sprout. [H.]—**Lagers', Seitens'.** See ANABLASTEMA.—**S'nbildung.** See PROLIFERATION and *Cell-*GENESIS.—**Urnierens'.** The rudiment of the primitive kidney of the embryo.

SPROSSER (Ger.), n. Spro^{3}s'se^{2}r. See STOLON.—**Gipfels'.** See ACROBRYON.

SPROSSUNG (Ger.), n. Spro^{3}s'sun^3. See GEMMATION.

SPROUT, n. Spru^5'u^{4}t. A shoot; in the pl., s's, young colewort. [a, 35.]—**S.-chain.** A chain of cells formed by pullulation.

SPROUTING, n. Spru^5'u^{4}t-i^{2}n^2. See PULLULATION.

SPRUCE, n. Spru^{2}s. The genus *Abies*. [a, 35.] For subheadings, see under FIR.—**Hemlock s.** See ABIES *canadensis*.—**Oil of s.** See HEMLOCK-*oil*.—**S. beer.** A preparation made by boiling ½ pint of essence of s. and 4 oz. each of pimenta, ginger, and hops in 3 gallons of water for five or ten minutes, straining, adding 11 gallons of warm water, 1 pint of yeast, and 6 pints of molasses, and allowing to ferment for twenty-four hours. It is diuretic and antiscorbutic. [B, 5 (a, 38); B, 98 (a, 31).]—**S. gum.** The exudation of *Abies alba* and *Abies nigra*. ["Proc. of the Am. Pharm. Assoc.," xxx (a, 14).]

SPRUDEL (Ger.), n. Sprud'e^{2}l. A bubbling or spouting spring; hence, a name for many mineral springs. [a, 14.]—**S'salz.** Salts from spouting mineral springs, especially Carlsbad salt. [a, 14.]—**S'stein.** A mineral deposit formed around hot spouting springs, containing calcium carbonate, especially at Carlsbad. [a, 14.]

SPRUE, n. Spru^2. See SPREW.

SPRUNG (Ger.), n. Sprun^2. See FISSURE.

SPRUNGROLLE (Ger.), n. Sprun^2'ro^{3}l-le. The superior articular surface of the astragalus. [L, 332.]

SPÜLSCHLAUCH (Ger.), n. Spu^{6}l'shla^3-u^{4}ch^2. An irrigating bag.

SPULWURM (Ger.), n. Spul'vurm. See ASCARIS and ASCARIS *lumbricoides*.—**S'krankheit.** See ASCARIDIASIS.

SPUMESCENT, SPUMOSE, adj's. Spu^{2}m-e^{2}s's'nt, spu^{2}m'os. Lat., *spumescens, spumosus* (from *spuma*, foam). Fr., *mousseux*. Ger., *schäumig*. Frothing, having a froth-like appearance. [a, 35.]

SPUNK, n. Spu^{3}n^{2}k. See AMADOU.

SPUR, n. Spu^{6}r. Lat., *calcar*. Fr., *éperon*. Ger., *Sporn*. 1. A sharp projection, such as the hippocampus minor. 2. A projection of tissue intervening between the upper and the lower part of the intestine at the seat of an artificial anus. [Morris (A, 87).] 3. In botany, (1) in the *Coniferæ*, a contracted lateral shoot bearing a tuft of leaves at its summit; (2) see under CALCAR (2d def.). [a, 35.]

SPURGE, n. Spu^{6}rj. See EUPHORBIA.

SPURGE-FLAX, n. Spu^{6}rj'fla^{2}x. See DAPHNE *gnidium*.

SPURRY, n. Spu^{6}r'i^2. The genus *Spergula*. [a, 35.]

SPUTUM (Lat.), n. n. Spu^{2}t(sput)'u^{3}m(u^{4}m). From *spuere*, to spit. Fr., *crachat*. Ger., *Auswurf, Spucken*. A liquid discharge ejected from the mouth (when not swallowed). It may be simply saliva, or saliva plus the mucous secretions of the air passages; or it may be more or less purulent or bloody. [D.]—**Black-pigmented s.** S. colored black by inhaled particles of carbon. [a, 34.]—**Cavernous s.** Of Guttmann, nummular s. from a pulmonary cavity. [a, 34.]—**Egg-yolk s.** Of Traube, yellow s. [a, 34.]—**Globular sputa.** The irregularly globular yellow masses of s. composed of mucus, pus corpuscles, epithelium, etc., observed in the later stages of bronchial catarrh, etc. [a, 34.]—**Green s.** Sanguinolent s. in which there has been oxidation of the hæmoglobin, observed in croupous and caseous pneumonia. [a, 34.]—**Icteric s.** S. colored yellow or green by the bile-pigment in icterus. [a, 34.]—**Nummular sputa.** The thick, heavy, and roundish (somewhat coin-like) sputa of pulmonary phthisis. [D.]—**Prune-juice s., Rusty (-colored) s.** The typical dark reddish-brown s. of pneumonia. It is viscid and semi-transparent, and adheres tenaciously to the side of the containing vessel. Its color is due to the presence of blood. [D, 1.]—**S. coctum.** A muco-purulent, yellowish, thick, opaque s., rich in cells, characteristic of the second stage of acute catarrh and also of chronic catarrh. [A, 326 (a, 21).]—**S. croceum.** See *Prune-juice s.*—**S. crudum.** The frothy, clear, mucous s. observed in the beginning of bronchial catarrh. [a, 34.]—**S. fundum petens, Sputa globosa, Sputa lanuginosa.** See *Globular sputa.*—**S. pneumonicum.** See *Prune-juice s.*—**S. puriforme.** S. resembling pus. [A, 326 (a, 21).]—**Sputa rotunda.** See *Nummular sputa.*—**S. tuberculosum.** A muco-purulent or simply purulent s. occurring in pulmonary tuberculosis and cheesy pneumonia, characterized by the presence of Koch's *Bacillus tuberculosis*. [A, 326 (a, 21).]—**Yellow s.** 1. Sanguinolent s. rendered yellow by the oxidation of hæmoglobin. 2. S. rendered yellow by the presence of fungous growth. [a, 34.]

SPYROCOLON, n. Spir-o^{2}k'o^{2}l-o^{2}n. A disease first noticed in 1820 in Greece, supposed to be a peculiar form of syphilis. [C. Wibner, "Jahrb. d. in- u. ausl. ges. Med.," xxx, p. 305 (a, 34).]

SQUALE (Fr.), n. Skwa^{3}l. See SHARK.—**Huile de s.** See SHARK-*oil*.

SQUAMA (Lat.), n. f. Skwam(skwa^{3}m)'a^3. Gr., λεπίς. Fr., *squame, écaille*. Ger., *Schuppe*. A scale or scale-like object; in botany, usually homologous to a leaf. [a, 35.]—**S. frontalis.** See PARS *ossis frontalis*.—**S. occipitalis.** See *Supra-occipital* BONE.—**S. occipitalis superior.** See BONE *of the Incas*.—**S. occipitis** [Hallmann]. See *Epiotic* BONE and *Supra-occipital* BONE.—**S. ossis frontis.** See PARS *ossis frontalis*.—**S. ossis occipitis.** See *Supra-occipital* BONE.—**S. ossis temporis, S. temporalis.** The thin scale-like part of the squamous portion of the temporal bone.

SQUAMATE, SQUAMATED, adj's. Skwam'at, -at-e^{2}d. Lat., *squamatus* (from *squama*, a scale). Fr., *squaméen* (2d def.). Ger., *schuppig*. 1. Scale-like. 2. Furnished with scales. [a, 35.]

SQUAMATIO (Lat.), n. f. Skwa^{2}m(skwa^{3}m)-a(a^3)'shi^2(ti^2)-o. Gen., *-on'is*. From *squama*, a scale. A disease of plants in which rosettes of scale-like leaves are produced. [a, 35.]

SQUAMELLA (Lat.), n. f. Skwa^{2}m(skwa^{3}m)-e^{2}l'la^3. Dim. of *squama*, a scale. Fr., *squamelle*. A minute scale. [a, 35.]

SQUAMES, n. pl. Skwamz. The cells of pavement epithelium.

SQUAMIFEROUS, adj. Skwa^{2}m-i^{2}f'e^{2}r-u^{3}s. Lat., *squamifer, squamiferus* (from *squama*, a scale, and *ferre*, to bear). Fr., *squamifère*. Bearing a scale or scales. [a, 35.]

SQUAMIFLOROUS, adj. Skwa^{2}m-i^2-flor'u^{3}s. From *squama*, a scale, and *flos*, a flower. Lepidantheous: having flowers resembling scales, or having small bracts colored like petals. [a, 35.]

SQUAMOID, adj. Skwam'oid. From *squama*, a scale, and εἶδος, resemblance. Fr., *squamoïde*. Scale-like. [C.]

SQUAMOSAL, adj. Skwa^{2}m-o's'l. 1. Scale-like (see *S.* BONE). 2. As a n., in the pl., in comparative anatomy, the squamous portion of the temporal bone. [C.]

SQUAMOUS, adj. Skwam'u^{3}s. Lat., *squamosus* (from *squama*, a scale). Fr., *squameux*. Ger., *schuppig*. 1. Pertaining to or resembling scales or a scale. 2. Scaly; marked by the formation of scales or by desquamation. [G.]

SQUAMO-ZYGOMATIC, adj. Skwam''o-zi^{2}g-o^{2}m-a^{2}t'i^{2}k. Pertaining to the squamous portion and the zygomatic process of the temporal bone. [C.]

SQUAMULA (Lat.), n. f. Skwa^{2}m(skwa^{3}m)'u^{2}l(u^{4}l)-a^3. Dim. of *squama*, a scale. Fr., *squamule, squamellule, squamelle*. Ger., *Schüppchen*. A small scale; of Cassini, one of the scales forming a pappus (2d def.). [a, 35.]

SQUAMULOSE, adj. Skwa^{2}m-u^{2}l-os'. Lat., *squamulosus*. Minutely squamate, covered with small scales. [a, 35.]

SQUARROSE, adj. Skwa^{3}r-os'. Lat., *squarrosus*. Fr., *squarreux*. Ger., *sparrig*. Roughened with spreading processes such as closely arranged bracts. [a, 35.]

SQUARROSO-DENTATE, adj. Skwa^{3}r-os''o-de^{2}nt'at. Lat., *squarroso-dentatus*. Ger., *sparrig-gezähnt*. Of a leaf, having teeth which form an angle with the plane of the leaf. [a, 35.]

SQUARROUS, adj. Skwa^{3}r'u^{3}s. 1. See SQUARROSE. 2. Scurfy, scabby. [G.]

SQUELETTE (Fr.), n. Ske^2-le^{2}t. See SKELETON.—**S. dermique.** See EXOSKELETON.—**S. viscéral.** See SPLANCHNO-SKELETON.

SQUELETTOPÉE (Fr.), n. Ske^2-le^2-to-pa. The art of preparing a skeleton for purposes of study. [L, 41 (a, 14).]

SQUILL, n. Skwi^{2}l. Gr., σκίλλα. Lat., *scilla* [U. S. Ph., Br. Ph., Aust. Ph., Hung. Ph., Belg. Ph., Netherl. Ph., Roum. Ph.], *bulbus scillæ* [Ger. Ph., Swiss Ph., Norw. Ph., Swed. Ph., Dan. Ph.] (2d def.), *radix scillæ* [Finn. Ph.], *scillæ bulbus* (seu *radix* [Gr. Ph.]) (2d def.). Fr., *scille* (*bulbe*) [Fr. Cod.], *bulbe de scille, ognon marin* (2d def.). Ger., *Meerzwiebel* (2d def.). 1. The genus *Scilla*. 2. The sliced bulb of *Scilla maritima* (*Urginea scilla*). [B, 5, 18 (a, 35).]—**Medicinal s.** See *S.* (2d def.).—**Red s.** S. (2d def.) in which the scales are of a roseate hue. It does not differ in properties from white s. [a, 35.]—**White s.** S. (2d def.) in which the scales are colorless. [a, 35.]

SQUILLITINE, n. Skwi^{2}l'i^{2}t-i^{2}n. See SCILLITIN.

SQUINANCY, n. Skwi^{2}n'a^{2}ns-i^2. Lat., *squinanthia, squinanchia*. See CYNANCHE *tonsillaris*.

SQUINE [Fr. Cod.] (Fr.), n. Sken. See SMILAX *china*.

SQUINT, SQUINTING, n's. Skwi^{2}nt, skwi^{2}nt'i^{2}n^2. See STRABISMUS.

SQUIRRHE (Fr.), n. Sker. See SCIRRHUS.—**S. en cuirasse.** Of A. Velpeau, that form of s. ligneux in which the induration extends in the integument surrounding the thorax in the form of a cuirass. [A, 222.]—**S. ligneux.** Of A. Velpeau, a form of cancer of the skin of the breast characterized by woody density and by shading off insensibly into the surrounding tissues. [A, 222.]

SQUIRRHOGASTRIE (Fr.), n. Sker-ro-ga^{3}st-re. Scirrhous degeneration of the stomach. [L, 41, 55 (a, 14).]

SQUIRRHUS (Lat.), n. m. Skwi^{2}r'ru^{3}s(ru^{4}s). See SCIRRHUS.

SRINT, n. A disease endemic in Hungary, in which there are inflammatory swellings in the mouth, throat, or anus. [a, 14.]

STAAR (Ger.), n. Sta^{3}r. See CATARACT.—**Aderhauts', Aders'.** See CATARACTA *chorioidealis*.—**Alterss'.** See *Senile* CATARACT.—**Angewachsener S.** See *Adherent* CATARACT.—**Axialer S.** See *Nuclear* CATARACT.—**Balkens'.** See *Barred* CATARACT.—**Baumförmiger S., Baums'.** See *Pigmentous* CATARACT.—**Beginnender S.** See *Incipient* CATARACT.—**Blauer S.** See *Punctated* CATARACT.—**Bunter S.** See CATARACTA *marmoracea*.—**Centrallinsens'.** See *Nuclear* CATARACT.—**Complicirter S.** See *Complicated* CATARACT and *Secondary* CATARACT.—**Cystischer S.** See *Morgagnian* CATARACT.—**Eiters'.** See HYPOPYON (4th def.).—**Fester S.** See *Fixed* CATARACT.—**Flüssiger S.** See *Morgagnian* CATARACT.—**Fortschreitender S.** See *Progressive* CATARACT.—**Gefensterter S.** See CATARACTA *fenestrata*.—**Geschminkter S.** See *Pigmented* CATARACT.—**Gestreifter S.** See *Striated* CATARACT.—**Gichts'.** Cataract attributed to gout. [a, 34.]—**Glashauts', Glaskörpers'.** See *Hyaloid* CATARACT.—**Greisens'.** See *Senile* CATARACT.—**Grüner S.** See *Glaucomatous* CATARACT and

Glaucoma.—**Häutiger S.** See *Membranous* cataract.—**Jungs'.** See *Soft* cataract and *Juvenile* cataract.—**Kalkiger S.** See *Arido-siliquose* cataract.—**Kapsels'.** See *Capsular* cataract.—**Käsiger S.** See *Cheesy* cataract.—**Kerns'.** See *Nuclear* cataract.—**Klaffender S.** See *Dehiscent* cataract.—**Klumpiger S.** See *Grumous* cataract.—**Knochens', Knöcherner S.** See *Osseous* cataract.—**Linsens'.** See *Lenticular* cataract.—**Lymphs'.** See *Morgagnian* cataract.—**Markähnlicher S.** See *Myeline* cataract.—**Nachs'.** See *Secondary* cataract.—**Reifer S.** See *Mature* cataract.—**Rindens'.** See *Cortical* cataract.—**Schichts'.** See *Laminated* cataract and *Zonular* cataract.—**Schwarzer S.** See Amaurosis and *Black* cataract.—**Schwimmender S., Schwimms'.** See *Tremulous* cataract.—**S'brille.** Very strongly convex spectacles to be used after cataract extraction, to replace the crystalline lens. [L, 30, 135 (*a*, 14, 50).]—**S'extraction.** The extraction of a cataract.—**S'fell.** The lenticular capsule when it is affected with cataract.—**S'operirt.** A person who has been operated on for cataract.—**S'stechen.** See Couching.—**S'sucht.** See Catalepsy.—**Sterns'.** See *Stellate* cataract.—**Unreifer S.** See *Immature* cataract and *Unripe* cataract.—**Weicher S.** See *Soft* cataract.—**Weisser S.** See Leucoma (4th def.).—**Wunds'.** See *Traumatic* cataract.

STAB (Ger.), n. Sta^{3}b. A rod or staff. [*a*, 48.]—**Bergmann'scher Klangs'.** See Baguette *d'harmonie.*—**Hohls'.** 1. A grooved staff or director. 2. A catheter or cannula. [E.]—**Magnets'.** See *Magnetic* needle.

STÄBCHEN (Ger.), n. Stab'ch^{2}e^{2}n. A little rod; a bacillus. [A, 521 (*a*, 48).]—**Gehörs'.** See Rods *of Corti.*—**S'ellipsoid.** The conical termination of a retinal rod. [L, 332.]—**S'saum.** See *Cuticular* layer.—**Wendungss'.** See Porte-fillet.

STABILE, adj. Sta^{2}b'i^{2}l. Lat., *stabilis* (from *stare*, to stand). Fixed, stable; in medical electrization, with the electrodes held motionless. [*a*, 48.] Cf. Labile.

STABKRANZ (Ger.), n. Sta^{3}b'kra^{3}nts. See Corona *radiata.*—**S. des Thalamus.** Those nerve-fibres in the optic thalamus which radiate from the cerebral cortex. [I, 17 (K).]—**S'bündel.** The nerve-fibres constituting the corona radiata. [I, 17 (K).]

STACHEL (Ger.), n. Sta^{3}ch^{2} e^{2}l. See Aculeus and Spine.—**Darmbeins'n.** See *Iliac* spines.—**Gaumens'.** See *Posterior nasal* spine.—**Gesässbeins'.** See Spine *of the ischium.*—**Hinterhauptss'.** See *External occipital* protuberance.—**Hüftbeins'n, Hüfts'n.** See *Iliac* spines.—**Kinns'n.** See *Genial* tubercles.—**Nasens':** See *Nasal* spine.—**Rolls'.** See Hamulus *trochlearis.*—**Sitzbeins'.** See Spine *of the ischium.*—**S'beere.** See Ribes.—**S'ig.** See Aculeate and Echinate.—**S'panzer.** The prolongations or prickles of a cell of the epidermis. [G.]—**Wespenbeins'.** See Spina *angularis.*

STACHELBECKEN (Ger.), n. Sta^{3}ch^{2}'e^{2}l-be^{2}k-e^{2}n. See Acanthopelvis.

STACHELBERG (Ger.), n. Sta^{3}ch^{2}'e^{2}l-be^{2}rg. A place in the canton of Glarus, Switzerland, where there is a sulphurous spring. [L. 30, 49, 57 (*a*, 14).]

STACHELNUSS (Ger.). n. Sta^{3}ch^{2}'e^{2}l-nus. 1. The genus *Trapa.* [*a*, 35.] 2. See Datura *stramonium.*

STACHELSCHWEIN (Ger.), n. Sta^{3}ch^{2}'e^{2}l-shwin. See Hystrix (3d def.).—**S'aussatz, S'krankheit.** See Hystriciasis.—**S'menschen.** A person affected with ichthyosis hystrix. [G.]

STACHYOPTERIDES (Lat.), n. f. pl. Stak(sta^{3}ch^{2})-i^{2}(u^{6})-o^{2}pt-e^{2}r'i^{2}d-ez(e^{2}s). From **σταχυς**, an ear, and **πτερίς**, a fern. Ger., *Aehrenfarne, Aehrenfarren.* Of Willdenow, an order of cryptogams corresponding in part to the *Equisetaceæ* and the *Lycopodiaceæ.* [*a*, 35.]

STACHYS (Lat.), n. m. Sta^{2}k(sta^{3}ch^{2})'i^{2}s(u^{6}s). Gen., *stach'yos* (*-is*), *stach'ydos* (*-is*). Gr., **στάχυς.** Fr., *stachyde, épiaire.* Ger., *Ziest. Andorn.* 1. See *S. palæstina.* 2. Hedge-nettle; a genus of the *Stachydeæ* (a tribe of the *Labiatæ*). [*a*, 35.]—**S. alopecurus.** Ger., *gelbweisse Betonie.* The **κέστρον** of Dioscorides; a medicinal herb of middle and southern Europe. [*a*, 35.]—**S. arvensis.** Fr., *épiaire des champs.* Ger., *kleiner Andorn.* Corn hedge-nettle, petty ironwort, field-betony; a European and New England species, said to be emmenagogue and diaphoretic. [*a*, 35.]—**S. germanica, S. heterophylla, S. lanata.** Fr., *épiaire d'Allemagne, épi fleuri.* Common woundwort, lamb's-ear, base horehound. The herb, *herba stachydis* (vel *marrubii agrestis*), was once used as an emmenagogue and diuretic. [*a*, 35.]—**S. palæstina.** A species common in Greece; identified by some authors with the **στάχυς** of Dioscorides, which was used as a vulnerary, etc. [*a*, 35.]—**S. palustris.** Fr., *épi* (seu *épiaire*) *des marais.* Ger., *Sumpfziest, brauner Wasserandorn.* Clown's all-heal (or woundwort), the marsh-betony of Europe and North America. The bitter herb, *herba marrubii aquatici acuti* (seu *stachydis aquaticæ*, seu *galeopsidis fœtidæ*), was formerly used as a deobstruent and antiperiodic, and externally as an anodyne and vulnerary. [*a*, 35.]—**S. recta.** Fr., *crapaudine.* Ger., *gerader Ziest, Beschreikraut, Berufkraut, Rossmünze.* A European species formerly used in hysteria, epilepsy, suppressed lochia, etc. [*a*, 35.]—**S. silvatica.** Fr., *épiaire des bois, ortie puante* (ou *à crapaud*, ou *morte des bois*), *stachique, panacée des labours.* Ger., *Waldziest,* (*stinkender*) *Waldandorn.* Archangel, wild nettle-grass, wood-betony; a bitter European herb with a disagreeable, petroleum-like odor, formerly used, under the name of *herba galeopsidis silvaticæ* (seu *galeopsidis fœtidæ*, seu *lamii silvatici fœtidi*, seu *urticæ inertis fœtidissimæ*), in scrofula and glandular swellings and as an emmenagogue and diuretic. [*a*, 35.]

STACHYTARPHA (Lat.), **STACHYTARPHETA** (Lat.), n's f. Sta^{2}k(sta^{3}ch^{2})-i^{2}(u^{6})-ta^{3}rf'a^{3}, -ta^{3}rf-e(a)'ta^{3}. From **στάχυς**, a spike, and **ταρφειός**, thick. Fr., *stachytarphète.* Ger., *Dichtähre.* Bastard-vervain; a genus of the *Verbenaceæ.* [*a*, 35.]—**S. dichotoma.** A species used in the Argentine Republic as a tonic, pectoral, sedative, and vulnerary. ["Proc. of the Am. Pharm. Assoc.," xxxviii, p. 395 (*a*, 50).]—**S. jamaicensis, S. pilosiuscula.** Fr., *verveine bleue.* An aromatic undershrub of the West Indies and South America. The leaves (known in Europe as Brazilian tea and used to adulterate tea) are employed as a stimulant, tonic, diuretic, and vulnerary. The root is considered emmenagogue, anthelminthic, vulnerary, and antirrheumatic. [*a*, 35.]

STACTE (Lat.), n. f. Sta^{2}k(sta^{3}k)'te(ta). Gen., *stac'tes.* Gr., **στακτή** (from **στάζειν**, to drop). Of the ancients, a liquid myrrh; according to Guibourt, probably liquid storax. [*a*, 35.]

STADIUM (Lat.), n. n. Stad(sta^{3}d)'i^{2}-u^{3}m(u^{4}m). Gr., **στάδιον.** Fr., *stade.* Ger., *S., Stufe.* See Stage (1st def.).—**Ends'** (Ger.). The final stage of a disease.—**Condylomatöses S.** (Ger.). Of Zeissl, the stage of condylomata; the secondary stage of syphilis. [G.]—**Frosts'** (Ger.). The stage of chill, as in intermittent fever. [D.]—**S. acmes.** See Acme (1st def.) and cf. Crisis (1st def.).—**S. amphiboles.** The stage of a disease intermediate between its acme and its subsidence. [D, 3.]—**S. contagii.** See *S. prodromorum* (1st def.).—**S. decrementi.** The stage of decrease in the intensity of a disease; the defervescence of a fever. [D, 3.]—**S. decrustationis.** The stage of an eruptive fever during which the pustules form crusts or scales. [G.]—**S. der sinkenden Exacerbationswerthe** (Ger.). The period of descending tendency of the exacerbation. [D, 18.] Cf. Lysis.—**S. der steigenden Exacerbationswerthe** (Ger.). The stage of ascending rate of exacerbation or increase of temperature; especially noticeable in typhoid fever. [D, 18.]—**S. desquamationis.** The stage of an eruptive fever corresponding to the desquamation of the exanthem. [G, 3.]—**S. eruptionis.** The stage of an eruptive fever corresponding to the outbreak of the exanthem. [G, 3.]—**S. exsiccationis.** See *S. decrustationis.*—**S. florescentiæ.** The stage of development of the exanthem of an exanthematous disease. [D.]—**S. floritionis.** The stage of an eruptive fever during which the exanthem is at its height. [G, 3.]—**S. incubationis.** See Stage *of latency.*—**S. initiale.** The initial stage of a disease. [L, 57 (*a*, 14).]—**S. maniacale.** The final stage of nervous excitement in mania, after which the affection gradually becomes less violent. [L, 57 (*a*, 14).]—**S. maturationis et exsiccationis.** See *S. suppurationis.*—**S. nervosum.** The nervous or convulsive stage of a disease, as in whooping-cough. [L, 57 (*a*, 14).]—**S. paralyticum.** The paralytic stage that occurs in some diseases, such as hydrophobia. [*a*, 34.]—**S. prodromorum.** 1. In eruptive fevers the stage intervening between the inception of the fever and the appearance of the eruption. [G.] 2. In obstetrics, the premonitory stage of labor. [A, 88.]—**S. staseos.** See Acme (1st def.).—**S. suppurationis.** The stage in the course of variola at which suppuration takes place in the efflorescences upon the skin. [G.]

STAEHELINA (Lat.), n. f. Sta-he^{2}l-en'a^{3}. From *Staehelin*, a Swiss botanist. Fr., *stœhéline.* A genus of the *Compositæ.* [*a*, 35.]—**S. dubia.** A very bitter species, used in southern Europe as a diuretic, anthelminthic, and emmenagogue. [*a*, 35.]

STAFF, n. Sta^{3}f. Gr., **βάκτρον.** Lat., *baculus.* Fr., *bâton.* Ger., *Stäbchen.* 1. A pole-like or rod-like object. 2. A grooved steel rod, straight or curved like a catheter, to serve as a guide to the knife in perineal cystotomy.—**Lithotomy s.** See *S.* (2d def.).

STAFFORD SPRINGS, n. Sta^{2}f'u^{3}rd. A place in Tolland County, Connecticut, where there are chalybeate and sulphurous springs. [L, 30, 37 (*a*, 14).]

STAGE, n. Staj. Gr., **στάδιον.** Lat., *stadium* (1st def.). Fr., *étage* (1st def.), *stade* (1st def.). Ger., *Stufe* (1st def.). 1. A definite period or condition in the course of a disease. [D.] Cf. subheadings under Stadium. 2. That accessory part of a microscope that serves to support the slide on which the material to be examined is laid, and to admit of the transmission of reflected light from below through the material. It may be furnished with various supplementary devices, such as those for regulating the illumination, for measuring objects, and for enabling the observer to bring a particular portion of the specimen into the field quickly.—**Algid s.** A period in certain diseases (especially in those characterized by exhausting intestinal discharges), marked by lowered temperature, retarded circulation, secondary nervous disorders, etc., largely due to loss of water from the blood. [D, 3.]—**Amphibolic s.** See Stadium *amphiboles.*—**Asphyxial s.** The first period in Asiatic cholera, marked by dryness of the tissues, an altered circulation, etc., due to loss of water from the blood. [D, 3.]—**Expulsive s. of labor.** Fr., *période d'expulsion.* Ger., *Austreibungsperiode der Geburt.* That s. which begins when dilatation of the cervix uteri is complete and consists in the expulsion of the fœtus.—**First s. of labor.** That s. which is occupied by the dilatation of the cervix uteri.—**Flexion s. of labor.** The whole of the expulsive s. except that which begins with extension of the child's head.—**Infective s.** In the course of an eruptive fever, that period during which infection is exhaled by the body in the atmosphere and infects its surroundings. [Makuna, "Med. Times and Gaz.," May 13, 1882, p. 495.]—**Initial s. (of an eruptive fever).** The period of the primary fever. [Makuna, *l. c.*]—**Placental s. of labor.** Fr., (*période de la*) *délivrance.* Ger., *Nachgeburtszeit.* The s. that follows the expulsion of the child and ends with that of the placenta and the fœtal envelopes.—**Pre-eruptive s.** Of an eruptive fever, the time that elapses from the entrance of the poison into the system to the first appearance of the eruption. [Makuna, *l. c.*]—**Pyrogenetic s.** The period of increase or invasion in febrile diseases. [D, 3.]—**Resting s.** In the reproduction of certain cryptogams, that period during which the ciliated spores are quiescent. [*a*, 35.] Cf. Sclerotium.—**Second s. of labor.** See *Expulsive s.*—**S. of decreasing energy.** Of Landois, the period of relaxation of a contracting muscle. [K.]—**S. of increasing energy.** Of Landois, the period of contraction of a muscle. [K.]—**S. of invasion.** The period in the history of a disease in which the developing causes have taken effect, and the system is fairly under the influence of the virus. In fevers, it follows the s. of latency. [D.]—**S. of latency.** Lat.,

stadium prodromorum. Ger., *Stadium der Latenz, Latenzperiode.* The s. of an infectious disease intervening between the time of the lodgment of the virus in the body and that of the outward manifestation of disease. [G.]—**Third s. of labor.** See *Placental s.*

STAGGER-BUSH, n. Sta^{2}g'u^{5}r-bu^{4}sh. See ANDROMEDA *mariana.*

STAGGER-GRASS, n. Sta^{2}g'u^{5}r-gra^{3}s. See ZEPHYRANTHES *atamasco.*

STAGGERS, n. Sta^{2}g'u^{5}rz. Ger., *Kaller.* 1. See GID. 2. A disease of horses and cattle characterized by a staggering gait. [α, 34.]—**Blind s.** S. (2d def.) due to cerebral disease accompanied by convulsions, blindness, etc. [L.]—**Grass s.** See *Loco*-DISEASE.—**Mad s., Sleepy s.** See *Blind s.*—**Stomach-s.** S. (2d def.) caused by cerebral disturbance due to gastric disorders. [L.]

STAGGIA (It.), n. Sta^{3}d'je-a^3. A place in Tuscany where there is a sulphurous spring. [L, 135 (α, 50).]

STAGMODEOPSORIASIS (Lat.), n. f. Sta^{2}g(sta^{3}g)-mod-e^2-o(o^3)-sor(psor)-i^2-a(a^3)'si^{2}s. Gen., *-as'eos (-is).* From στάγμα, a dropping, εἶδος, resemblance, and ψωρίασις, *psoriasis.* Fr., *stagmodéopsoriase.* See PSORIASIS *guttata.*

STAGNATION, n. Sta^{2}g-na'shu^{5}n. Lat., *stagnatio* (from *stagnare*, to stagnate). See STASIS.

STAG'S-HORN, n. Sta^{2}gz'ho^{2}rn. 1. The *Rhus typhina.* 2. The *Lycopodium clavatum.* 3. A species of *Cenomyce.* [α, 35.] In pharmacy, see CORNU CERVI.

STAHL (Ger.), n. Sta^{3}l. See STEEL.—**S'feile.** See FERRUM *præparatum* and FERRUM *metallicum.*—**S'haltig.** See CHALYBEATE.—**S'mittel.** A chalybeate medicine. [α, 48.]—**S'wein.** See *Vinum* FERRI and *Vinum* FERRI *citratis.*—**S'weinstein.** See IRON *tartrate.*

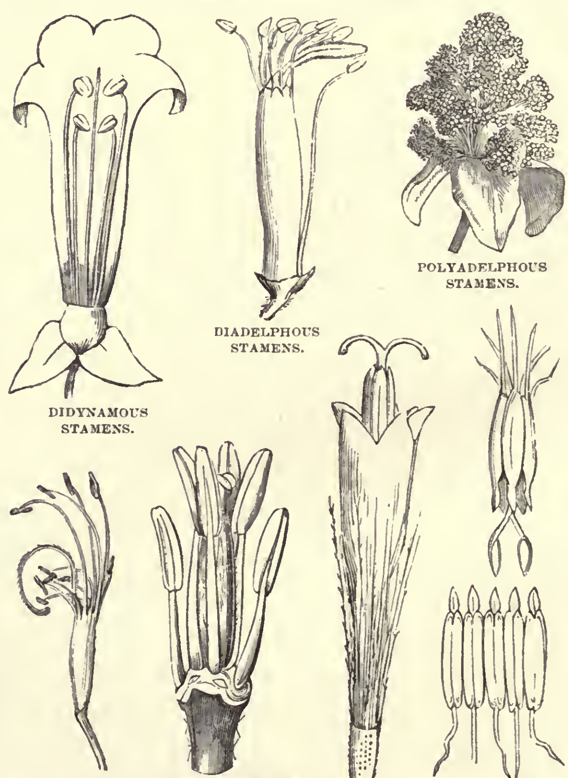
STAIN, n. Stan. Gr., κηλίς, σπίλος Lat., *macula.* Fr., *tache.* Ger., *Fleck.* 1. A discoloration, a discolored spot or tract of surface. [α, 48.] 2. A dyeing preparation.—**Blue s.** See MAL *del pinto.*—**Carbol-Fuchsin s.** See *Ziehl's s.*—**Ehrlich-Biondi triple s.** A mixture of 5 c. c. of a saturated watery solution of methyl green, 10 of a saturated solution of methyl orange, and 2 of Rubin s. (acid fuchsine). The specimen is put into the s. for from 15 minutes to 12 hours, washed in dilute alcohol, then for 1 minute in absolute alcohol, and then in xylol and benzol, and mounted in xylol balsam. The green stains the nuclei, and the acid fuchsine and the orange stain the ground substance of the specimen. [α, 34.]—**Ehrlich's s.** A s. for tubercle bacilli, composed of a saturated solution of aniline oil in distilled water to which is added enough of a saturated alcoholic solution of fuchsine to give the fluid a dark, opalescent appearance. The fluid to be examined is dried on a cover-glass, passed through a flame, floated on the coloring fluid, and boiled from 3 to 5 minutes. The specimen is then decolorized by floating it on a 25-per-cent. aqueous solution of nitric acid, rinsed in water or alcohol, and mounted. If, after rinsing, the specimen is floated in a dilute aqueous solution of methylene-blue, all bacteria except the tubercle bacilli are stained blue, the red of the latter contrasting with the blue of the former. [α, 34.]—**Friedländer's s.** The specimen is stained as by Ziehl's method, heated over a flame until steam is given off, washed in distilled water, and decolorized with a 5-per-cent. alcoholic solution of nitric acid, and then a few drops of an aqueous solution of methylene-blue are added as a contrast s. The specimen is then washed and mounted in balsam. [α, 34.]—**Gabbets's s.** A method of staining tubercle bacilli in Ziehl's s. The specimen is then placed in a mixture of 100 c. c. of a 25-per-cent. solution of sulphuric acid and 2 c. c. of methylene-blue, washed, dried, and mounted. [α, 34.]—**Gibbes's tubercle s.** A solution of 2 parts of rosaniline hydrochloride and 1 part of methylene-blue, made by heating and trituration in a glass mortar, with the addition of 3 parts of aniline oil dissolved in 15 of rectified spirit, and finally of 15 parts of distilled water added slowly. [α, 34.]—**Kühne's s.** A solution of 1·5 part of methylene-blue, 10 parts of absolute alcohol, and 100 of a 5-per-cent. solution of absolute alcohol, in which, in staining bacteria, the section is immersed for half an hour, washed in water, decolorized in a solution of 10 drops of hydrochloric acid in 500 grammes of water, immersed in a solution of 8 drops of a saturated solution of lithium carbonate in 10 grammes of water, washed in distilled water, dipped in absolute alcohol colored with methylene-blue, placed in aniline oil colored with methylene-blue, and washed in pure aniline oil and then in xylol. [α, 34.]—**Lewis's s.** A s. for nerve tissue. On a frozen section of tissue a few drops of a 2-per-cent. osmic-acid solution are poured and allowed to remain a few minutes; the section is then washed in water, immersed in a 1-per-cent. watery solution of aniline-black for one or two hours, and mounted in potassium acetate or in glycerin. [α, 34.]—**Löffler's s.** A mixture of 30 c. c. of a saturated solution of methylene-blue and 100 c. c. of a 1-to-10,000 solution of caustic potash; used for staining bacteria. [α, 34.]—**Milky s's.** See LEUCOPLAKIA.—**Pregle's s.** A modification of Kühne's s. The alcohol in a dehydrated section is absorbed by a piece of filter paper, and a drop of acetone celloidin solution is placed upon it; the section is then stained by dropping upon it the solution composing Kühne's s. from a pipette. [α. 34.]—**Weigert's hæmatoxylin s.** A process of staining various tissue elements of the central nervous system. Sections of tissue that has been hardened in Müller's fluid are soaked for twenty-four hours in a saturated aqueous solution of neutral cupric acetate diluted with an equal bulk of water. They are then soaked for two hours in a solution of 1 gramme of hæmatoxylin crystals in a mixture of 10 c. c. of 97-per-cent. alcohol, 90 c. c. of water, and 1 c. c. of a saturated aqueous solution of lithium carbonate. They are next washed in two or three waters, rinsed in alcohol, and transferred to a bleaching solution of 2·5 grammes of potassium ferricyanide, 2 grammes of sodium biborate, and 200 c. c. of water, in which they remain until the gray matter has a distinct yellow color and the white matter is bluish-black. The section is then washed in water, dehydrated with absolute alcohol, cleared with oil of cloves, and mounted in balsam. The gray matter, connective-tissue elements, and ganglion cells have a yellow or yellowish-brown color, the axis-cylinders are uncolored or have a slight yellowish tint, while the medullary sheaths are bluish-black or black. [α, 34.]—**Ziehl's s.** A s. for the typhoid bacillus; a mixture of 9 parts of a filtered 5-per-cent. aqueous solution of carbolic acid and 1 part of a 10-per-cent. alcoholic solution of fuchsine, in which specimens are soaked for half an hour, then decolorized by alcohol, cleared in cedar-oil, and mounted. [α, 34.]

STAINING, n. Stan'i^{2}n^2. The act of impregnating a substance, especially a tissue under microscopic examinations, with pigments so as to distinguish the various structures of which it is composed. The principal s's used in microscopy are hæmatoxylin, carmin, ammonia-carmin, picro-carmin, silver nitrate, gold chloride, and the various aniline dyes (fuchsine, eosin, vesuvin, auramine, safranine, fluorescin, methylene-blue, gentian-violet, methyl-violet, malachite-green, etc.). [B.]—**Double s.** S. with two pigments simultaneously. [B.]—**Golgi's method of s.** S. with a nitrate-of-silver solution (strength 0·5 to 0·8 per cent.) after preliminary hardening with potassium dichromate or Müller's fluid. Used for demonstrating ganglion cells and processes. [B.]—**Gram's method of s.** A method of s. bacteria in which the pigment is designed to be limited to them. The object placed on a cover-glass is stained with gentian-violet, then placed for a minute in a solution of iodine and potassium iodide, and then transferred to absolute alcohol, where it is left until it is apparently colorless, when the glass is washed off with water. [B.]—**Multiple s.** S. with several pigments simultaneously. [B.]—**Triple s.** S. with three pigments simultaneously. [B.]

STALAGMOMETER, n. Sta^{2}l-a^{2}g-mo^{2}m'e^{2}t-u^{5}r. From σταλαγμός, a dropping, and μέτρον, a measure. Fr., *stalagmomètre.* An instrument for measuring the size of drops. [L. 41 (α, 14).]

STALAGMUS (Lat.), n. m. Sta^{2}l(sta^{3}l)-a^{2}g(a^{3}g)'mu^{5}s(mu^{4}s). Gr., σταλαγμός (from σταλάσσειν, to drop). A dropping, as of blood in epistaxis. [L, 50 (α, 14).]

STALAPOS (Fr.), n. Sta^3-la^3-po. A place in the department of Cantal, France, where there is a chalybeate spring. [α, 14.]



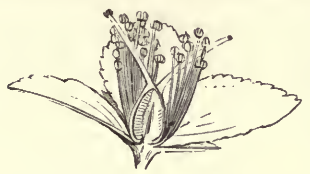
STALAXIS (Lat.), n. f. Sta^{2}l(sta^{3}l)-a^{2}x(a^{3}x)'i^{2}s. Gen., *-ax'eos (-is).* See STAXIS.

STALK, n. Sta^{4}k. Gr., καυλός. Lat., *caulis.* Fr., *tige.* Ger., *Stengel.* Any lengthened support to an organ. [α, 35.]—**Flower-s.** See PEDUNCLE.—**Leaf-s.** See PETIOLE.

STALKED, adj. Sta^{4}kt. Furnished with a stalk, not sessile. [α, 35.]

STALLROTH (Ger.), n. Sta^{3}l'rot. The "black-water" of cattle. [α, 34.]

STAMEN (Lat.), n. n. Stam(sta^{3}m)'e^{2}n. Gen., *stam'inis.* From *stare*, to stand. Fr., *étamine.* Ger., *Staubgefäss, Staubblatt.*



POLYADELPHOUS STAMENS.

DIADELPHOUS STAMENS.

DIDYNAMOUS STAMENS.

MONADELPHOUS STAMENS. TETRADYNAMOUS STAMENS. SYNGENESIOUS STAMENS.

The male sporophyll in a flower, consisting, when complete, of a filament and an anther. [α, 35.]—**Coherent s's.** S's more or less united to each other by the filaments or by the anthers or by both. [α, 35.]—**Diadelphous s's.** S's coherent into two sets. [α, 35.]—**Didynamous s's.** S's of which two are longer than the other two. [α, 35.]—**Epigynous s.** A s. borne on the top of the ovary. [α, 35.]—**Epipetalous s.** A s. inserted on the tube of the corolla. [α, 35.]—**Free s's.** S's not coherent. [α, 35.]—**Gynandrous s.** A s. inserted on or growing fast to the pistil. [α, 35.]—**Hypogynous s.** A s. situated on the receptacle. [α, 35.]—**Included s.** A s. that does not project beyond the corolla, but is contained within it. [α, 35.]—**Monadelphous s's.** S's coherent into but one set. [α, 35.]—**Perigynous s.** A s. borne on the margin of the disc or calyx-tube. [α, 35.]—**Polyadelphous s's.** S's united into a considerable number of sets. [α, 35.]—**Sterile s.** See STAMINODIUM.—**Superimposed s.** An outer s. that is converted into a carpel superimposed on the normal carpels. [α, 35.]—**Syngenesious s's.** S's coherent by their anthers. [α, 35.]—**Tetradynamous s's.** S's so grouped that four are long and two short. [α, 35.]—**Triadelphous s's.** S's coherent into three sets. [α, 35.]

TRIADELPHOUS STAMENS.

STAMINAL, adj. Sta^{2}m'i^2-n'l. Lat., *staminalis* (from *stamen* [*q. v.*]). Fr., *s.* Pertaining to or consisting of stamens. [α, 35.]

STAMINATE, adj. Sta^{2}m'i^{2}n-at. From *stamen*, a stamen. Of a flower, male; having stamens but no pistils. [α, 35.]

STAMINEOUS, adj. Sta^{2}m-i^{2}n'e^2-u^{3}s. Lat., *stamineus.* Fr., *stamineux.* See STAMINAL.

STAMINIDIA (Lat.), n. n. pl. Sta^{2}m(sta^{3}m)-i^{2}n-i^{2}d'i^2-a^3. From *stamen* (*q. v.*). The antheridia of cryptogams. [α, 35.]

STAMINODIUM (Lat.), n. n. Sta^{2}m(sta^{3}m)-i^{2}n-od'i^2-u^{3}m-(u^{4}m). From *stamen* (*q. v.*), and εἶδος, resemblance. Fr., *staminode.* A staminode, or sterile stamen; an imperfectly developed stamen having no pollen. [α, 35.]

STAMINODY, n. Sta^{2}m'i^{2}n-od-i^2. The metamorphosis of other parts of the flower into stamens. [α, 35.]

STAMINOSUS (Lat.), adj. Sta^{2}m(sta^{3}m)-i^{2}n-os'u^{3}s(u^{4}s). From *stamen* (*q. v.*). Fr., *stamineux.* Of flowers, having very long stamens. [α, 35.]

STAMM (Ger.), n. Sta^{3}m. 1. A stem; the trunk of the body; in botany, see CAUDEX. 2. Stock, lineage, breed. [A, 315 (α, 48).]—**Cilienwurzels'.** See *Originating* FIBRE.—**Gefässs'.** An arterial trunk. [L, 31.]—**Grosshirns'.** See CAUDEX *cerebri.*—**Markstämme des kleinen Hirns.** See PEDUNCLES *of the cerebellum.*—**Nervens'.** See ORIGIN *of a nerve.*—**Rippennackens'.** See TRUNCUS *costo-cervicalis.*—**S. der Fissura Sylvii.** Of Bischoff, the depression of the base of the brain the floor of which is formed by the anterior perforated space. [I, 17 (K).]

STAMMÄHNLICHKEIT (Ger.), n. Sta^{3}m'an-li^{2}ch^2-kit. See ATAVISM.

STAMMART (Ger.), n. Sta^{3}m'a^{3}rt. The primary species of a genus. [α, 35.]

STAMMBLÄSCHEN (Ger.), n. Sta^{3}m'blas-ch^{2}e^{2}n. The first primary cephalic vesicle. [I, 17 (K).]

STAMMERING, n. Sta^{2}m'u^{6}r-i^{2}n^2. Fr., *bégaiement, anonnement.* Ger., *Stammeln.* Faltering in speaking; as often used, stuttering. [D, 20.]—**Gutturo-tetanic s.** See BÉGAIEMENT *gutturo-tétanique.*

STAMMESGESCHICHTE (Ger.), n. Sta^{3}m'me^{2}s-ge^2-shi^{2}ch^{2}t-e^2. See PHYLOGONY.

STAMMTHEIL (Ger.), n. Sta^{3}m'til. The lower portion of the primary cephalic vesicle, corresponding to the base of the brain. [I, 17 (K).]

STAMPED, adj. Sta^{2}mpt. See SIGILLATE.

STÄMPEL (Ger.), n. Stamp'e^{2}l. See EMBOLUS.

STANDARD, n. Sta^{2}n'd'rd. 1. A basis of comparison; as an adj., corresponding to the recognized s. [α, 48.] 2. In botany, see VEXILLUM.

STANDARDIZED, adj. Sta^{2}n'd'rd-izd. Brought to the standard strength or to a standard degree of efficiency. [B, 11.]

STANDIETHYL, n. Sta^{2}n-di-e^{2}th'i^{2}l. Ger., *Stanndiäthyl, Zinndiäthyl.* A bivalent radicle, $Sn(C_2H_5)_2''$; in the free state, a double molecule, $Sn_2(C_2H_5)_4$, constituting a thick oily liquid. [B, 3.]

STANDIPHENYL, n. Sta^{2}n-di-fe^{2}n'i^{2}l. A bivalent radicle, $Sn(C_6H_5)_2''$. [B.]

STANDIPROPYL, n. Sta^{2}n-di-pro'pi^{2}l. A bivalent radicle, $Sn(C_3H_7)_2''$. [B.]

STANDSTILL, n. Sta^{2}nd'sti^{2}l. Ger., *Stillstand.* The quiescent state resulting from suspension of action, especially of motion.—**Expiratory s.** A condition in which the respiratory apparatus remains in the state seen at the close of an ordinary or labored expiration. [J.] Cf. *Expiratory* TETANUS.—**Inspiratory s.** Ger., *Athemkrampf, Inspirationskrampf.* A condition in which the respiratory rhythm is so accelerated that the diaphragm remains tetanically contracted, and hence the lungs remain filled with air. It may be produced by strongly stimulating the central end of a divided vagus nerve. [J.]—**Respiratory s.** Ger., *Athmungsstillstand.* A suspension of the respiratory movements in either the inspiratory or the expiratory phase. [J, 19, 40.]

STANNAR, n. Of the alchemists, a hypothetical elementary substance from which metals were supposed to be produced. [A, 325 (α, 48).]

STANNIC, adj. Sta^{2}n'i^{2}k. Lat., *stannicus.* Fr., *stannique.* Containing tin as a tetrad radicle. [B.]—**S. acid.** Fr., *acide stannique.* Ger., *Zinnsäure.* A gelatinous white precipitate, $SnO(OH) = H_2SnO_3$, which on drying forms a semitransparent vitreous mass; acid and dibasic. A related (probably isomeric) acid is called *metastannic acid.* [B, 3.]—**S. anhydride.** Tin dioxide. [B.]—**S. hydroxide.** See *S. acid.*

STANNICHLORIDE, n. Sta^{2}n-i^2-klor'i^{2}d(id). A more correct form for chlorostannate. [B.]

STANNIOL (Ger.), n. Sta^{3}n'ne-o^{2}l. Tin-foil. [B, 48, 124 (α, 14).]

STANNOCHLORIDE, n. Sta^{2}n-o-klor'i^{2}d(id). See CHLOROSTANNATE.

STANNOFLUORIDE, n. Sta^{2}n-o-flu^2'o^{2}r-i^{2}d(id). A compound of tin tetrafluoride with the fluoride of another element or radicle. [B, 3.]

STANNOSOSTANNIC, adj. Sta^{2}n-os''o-sta^{2}n'i^{2}k. Made up of a combination of both stannous and stannic coumpounds, *i. e.*, containing two atoms of tin which have atomicities of two and four respectively. [B, 3.]—**S. ethide.** See STANTRIETHYL.

STANNOUS, adj. Sta^{2}n'u^{3}s. Containing tin as a bivalent element, Sn'', or, more probably, containing a bivalent molecule of the metal consisting of two quadrivalent atoms so united as to present only two free bonds each: $\equiv Sn \equiv Sn \equiv$. [B.]

STANNUM (Lat.), n. n. Sta^{2}n(sta^{3}n)'nu^{3}m(nu^{4}m). See TIN.—**Arbor stanni.** See ARBOR *Jovis.*—**Butyrum stanni.** Tin chloride. [B, 270.]—**Calx stanni, Cineres stanni.** See CALX *Jovis.*—**Limatura stanni.** See ÉTAIN *en poudre.*—**Magisterium stanni, Oxydum stanni cinereum, Protoxydum stanni.** See CALX *Jovis.*—**Rasura stanni.** Tin filings. [B.]—**S. anglicum.** Tin. [B.]—**S. cinereum, S. glaciale.** See BISMUTH.—**S. indicum.** Zinc. [B.]—**S. præparatum, S. pulveratum.** See ÉTAIN *en poudre.*—**S. purissimum** [Fr. Cod.]. Fr., *étain pur en baguettes.* A very pure, shining, white tin, soft and very ductile, of the sp. gr. 7·29, and melting at 228° C. [B, 95 (α, 38).]—**S. raspatum** [Ger. Ph.]. Tin filings. [B.]—**S. suboxydatum.** Tin protoxide. [B, 119 (α, 38).]

STANTRIETHYL, n. Sta^{2}n-tri-e^{2}th'i^{2}l. A thick, oily liquid, $Sn(C_2H_5)_3'$. [B, 3.]—**S. chloride.** An oily liquid, $Sn(C_2H_5)_3Cl$, having a highly irritant vapor. [B, 4.]—**S. hydrate, S. hydroxide.** The compound $Sn(C_2H_5)_3OH$. [B, 4.]—**S. iodide.** Ger., *Zinntriäthyljodür.* An oily liquid, $Sn(C_2H_5)_3I$. [B, 3.]—**S. oxide.** An oily liquid, $[Sn_2(C_2H_5)_3]_2O$. [B, 3.]

STAPÉAL (Fr.), n. Sta^3-pa-a^{3}l. See *Opercular* BONE.

STAPEDIAL, adj. Sta^{2}p-ed'i^2-'l. Lat., *stapedius.* Fr., *stapédien, stapédial.* Ger., *steigbügelig, Steigbügel-.* Pertaining to or connected with the stapes. [α, 48.]

STAPEDIO-VESTIBULAR, adj. Sta^{2}p-ed''i^2-o-ve^{2}st-i^{2}b'-u^2-l'r. From *stapes* (*q. v.*), and *vestibulum*, a vestibule. Ger., *Steigbügel-Vorhof-.* Pertaining to the stapes and the margin of the fenestra ovalis.

STAPEDIUS (Lat.), adj. Sta^{2}p(sta^{3}p)-ed(e^{2}d)'i^2-u^{3}s(u^{4}s). From *stapes* (*q. v.*). See STAPEDIAL; as a n. m. (Fr., *stapédien, muscle de l'étrier;* Ger., *Steigbügelmuskel*), a muscle arising from the hollow in the eminentia pyramidalis and inserted into a point between the capitulum and the posterior axis of the stapes; an antagonist of the tensor tympani. [F, 32.]

STAPELIA (Lat.), n. f. Sta^{3}p-e^{2}l'i^2-a^3. From *Van Stapel*, a Dutch botanist. Fr., *stapèle, stapélie, crapaudine.* Ger., *S.* Carrion-flower; a genus of African plants. The *Stapeliaceæ* are a division, and the *Stapelieæ* a tribe, of the *Asclepiadeæ.* [α, 35.]—**S. hirsuta.** Ger., *rauhaarige S., Aasblume, Aaspflanze.* A species cultivated as an ornament; its flowers, like those of the other species, have a disgusting odor. [α, 35.]

STAPES (Lat.), n. m. Stap(sta^{3}p)'ez(as). Gen., *stap'edis* (*-idis*). Fr., *étrier.* Ger., *Steigbügel.* Lit., a stirrup. The third ossicle of the middle ear. It consists of a collum (see NECK *of the s.*) and a head, or capitulum, on which there is a hollowed articular surface for the lenticular process of the incus, and from which two crura diverge, that end in an oval or bean-shaped foot-plate. The longitudinal axis of the s. stands almost perpendicular to the longitudinal axis of the malleus and incus. [F, 32.]

STAPHIS (Lat.), n. f. Staf(sta^{3}f)'i^{2}s. Gen., *staph'idos* (*-idis*). Of Pliny, see DELPHINIUM *staphisagria.*—**Grana staphidis agriæ.** See *Semen* STAPHISAGRIÆ.—**S. agria.** See STAPHISAGRIA.

STAPHISAGRIA (Lat.), n. f. Sta^{2}f(sta^{3}f)-i^{2}s-a^{2}g(a^{3}g)'ri^2-a^3. From σταφίς, dried grapes, and ἄγριος, wild. Fr., *staphisaigre* (*semence*) [Fr. Cod.] (2d def.). Ger., *Stephanskörner, Lausekörner.* Sp., *estafisagria, albarraz* (*semilla*) [Sp. Ph.] (2d def.). 1. Of the ancients, see DELPHINIUM *s.* 2. Of the U. S. Ph., the seed of *Delphinium s.* [B, 95 (α, 38).]—**Semen** [Belg. Ph.] (seu **semina**) **staphisagriæ, Staphisagriæ semina** [Belg. Ph.]. See *S.* (2d def.).—**Tinctura staphisagriæ.** A tincture made by macerating 100 parts of s. for three days in enough 70-per-cent. alcohol to make 500 parts after straining, expressing, and filtering. [B, 95 (α, 38).]—**Unguentum staphisagriæ** [Br. Ph.]. An ointment made by macerating bruised s. in twice as much melted benzoated lard for two hours, straining, and cooling. [B, 95 (α, 38).]

STAPHISAGRINE, n. Sta^{2}f-i^{2}s-a^{2}g'ren. Fr., *s.* Ger., *Staphisagrin.* A poisonous alkaloid, $C_{22}H_{33}NO_5$, extracted from *Delphinium staphisagria*; a bitter amorphous powder. [B, 93 (α, 14).]

STAPHISAIGRE (Fr.), n. Sta^3-fe-ze^{2}gr'. See STAPHISAGRIA.—**Poudre de s.** [Fr. Cod.]. The seed of *Delphinium staphisagria* dried at 25° C., powdered, and sifted through a No. 1 hair sieve.

[B, 95 (*a*, 38).]—**Semence de s., S. (semence)** [Fr. Cod.]. See STAPHISAGRIA (2d def.).

STAPHYLÆA (Lat.), n. f. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-e′(a^3′e^2)-a^3. See STAPHYLEA.

STAPHYLÆMATOMA (Lat.), n. n. Sta^{2}f(sta^{3}f)″i^{2}l(u^{6}l)-e^{2}m-(a^3-e^{2}m)-a^{2}t(a^{3}t)-om′a^3. Gen., *-om′atos (-atis)*. From σταφυλή, the palate, and αἷμα, blood. Fr., *staphylématome*. Ger., *Staphylämatom*. A hæmatoma of the palate. [*a*, 34.]

STAPHYLAGRA (Lat.), n. f. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)′a^{2}g(a^{3}g)-ra^3. Gr., σταφυλάγρα (from σταφυλή, the uvula, and ἄγρα, a seizure). Ger., *Zäpfchenzange*, *Zäpfchenhalter*. An instrument for seizing and removing the uvula. [E.]

STAPHYLE (Lat.), n. f. Sta^{2}f(sta^{3}f)′i^{2}l(u^{6}l)-e(a). Gen., *staph′yles*. Gr., στάφυλη. Lit., a bunch of grapes ; see UVULA.

STAPHYLEA (Lat.), n. f. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-e(a)′a^3. From σταφυλή, a bunch of grapes. Fr., *staphylier*. Ger., *Pimpernuss*. Bladder-nut ; a genus of the *Staphyleaceæ* (a tribe of the *Celastrineæ*), which are now regarded as a suborder (the *Staphyleæ*, or *Staphyleeæ*) of the *Sapindaceæ*. [*a*, 35.]—**S. pinnata.** Fr., *staphylier penné, né* (ou *nez*) *coupé, patenôtier*. Ger., *gemeiner Pimpernussbaum*, *Klappernuss*, *Blasennussbaum*, *Todtenkopfbaum*. Anthony-nut, common (or European) bladder-nut. The seeds are purgative and yield an oil. [*a*, 35.]—**S. trifoliata.** Fr., *pistachier bâtard* (ou *sauvage*). North American bladder-nut. The edible seeds are slightly laxative and yield a sweet oil. [*a*, 35.]

STAPHYLEPARTES (Lat.), n. m. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-e^{2}p-a^{2}rt′ez(as). Gr., σταφυλεπάρτης (from σταφυλή, the uvula, and ἐπαίρειν, to lift up). See STAPHYLAGRA.

STAPHYLEUS (Lat.), adj. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)′e?-u^{3}s(u^{4}s). From σταφυλή, the uvula. Pertaining to the uvula ; as a n. m., see PALATOSTAPHYLEUS.

STAPHYLINOPHARYNGEUS (Lat.), adj. Sta^{2}f(sta^{3}f)-i^{2}l-(u^{6}l)-in(en)″o(o^3)-fa^{2}r(fa^{3}r)-in(u^{6}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). From σταφυλή, the uvula, and φάρυγξ, the pharynx. See PALATOPHARYNGEUS.

STAPHYLINUS (Lat.), adj. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-in(en)′u^{3}s(u^{4}s). Gr., σταφυλῖνος. Fr., *staphylin*. 1. See STAPHYLEUS. 2. As a n. m., see AZYGOS *uvulæ*. 3. As a n. m., see PASTINACA *sativa*.—**S. externus.** See ABDUCTOR *of the Eustachian tube*.—**S. internus.** See LEVATOR *palati*.—**S. medius.** See AZYGOS *uvulæ*.

STAPHYLION (Lat.), n. n. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)′i^2-o^{2}n. From σταφυλή, the uvula. See PUNCTUM *spinæ nasalis posterius*.

STAPHYLITIS (Lat.), n. f. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-i(e)′ti^{2}s. Gen., *-it′idos (-idis)*. From σταφυλή, the uvula. Fr., *kionite*. Inflammation of the uvula. [E.]

STAPHYLIUM (Lat.), n. n. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)′i^2-u^{3}m(u^{4}m). Gr., σταφύλιον (dim. of σταφυλή, a bunch of grapes). See NIPPLE.

STAPHYLOCAUSTICUM (Lat.), n. n. Sta^{2}f(sta^{3}f)-u^{2}l(u^{6}l)-o-(o^3)-ka^{4}st′(ka^3′u^{4}st)′i^{2}k-u^{3}m(u^{4}m). From σταφυλή, the uvula, and καυστικός, caustic. A caustic for the uvula. [L, 50 (*a*, 14).]

STAPHYLOCOCCUS (Lat.), n. m. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-o(o^3)-ko^{2}k′ku^{3}s(ku^{4}s). From σταφυλή, a bunch of grapes, and κόκκος, a kernel. Fr., *staphylocoque*. Ger., *S.*, *Traubenkokkus*. A genus of *Schizomycetes* (*Micrococci*) in which the spheres become arranged in irregular masses compared to clusters of grapes. [B, 238, 316 (*a*, 35).]—**S. albus liquefaciens.** Of Escherich, an aerobic, liquefying micrococcus from 0·8 to 1·2 μ in diameter, occasionally oval in form and 3 μ in its long diameter, found associated in irregular groups; occasionally found in the alvine discharges of healthy infants. [*a*, 34.]—**S. Biskræ.** Fr., *microbe du bouton de Biskra*. The micrococcus of Biskra button, in which disease it is found in the blood, pustules, etc. It is closely related to *S. pyogenes aureus*, but it liquefies gelatin much more slowly; its colonies, moreover, on agar-agar are whitish and raised, and on potatoes are of an orange-red color. [*a*, 35.]—**S. candidus.** A species found by Warrington in milk, in which it forms so small a quantity of acid that the milk does not coagulate after boiling. The cocci are glistening white, and are associated in the irregular groups peculiar to the genus. [*a*, 35.]—**S. cereus (albus).** A non-pathogenic species forming cocci 1·16 μ in diameter. On gelatin plates, which it does not liquefy, it produces white points that eventually attain a size of from 1 to 2 mm. In stroke cultivation it forms a white, wax-like layer with irregular, somewhat thickened borders, and on potatoes a grayish-white layer of medium thickness. The micro-organism was found by Passet in pus, but experiments on animals show it to possess no pyogenic properties. [*a*, 35.]—**S. cereus flavus.** See *S. Passetii*.—**S. epidermidis albus.** Of Welch, an almost constant inhabitant of the epidermis, resembling *S. pyogenes albus* except that it has a feeble pyogenic capacity ; possibly an attenuated or modified form of that organism. [*a*, 34.]—**S. flavescens.** A variety occurring in pus, differing from *S. pyogenes aureus* in the pale-yellow color of its cultivations. [*a*, 35.]—**S. fulvus.** A species occurring as rusty-red globules on horse dung. The cells are from 1 to 1·5 μ in diameter, usually with a viscid intercellular substance. [*a*, 35.]—**S. Leloirii.** A diplococcus resembling *S. Biskræ* found by Leloir in circumfollicular dermatitis. [B, 316 (*a*, 34).]—**S. Passetii.** A non-pathogenic organism occurring as diplococci about 1 μ long, found in pus. It forms on gelatin plates (without liquefying them) prominent, intensely yellow droplets. [*a*, 35.]—**S. pyogenes.** A species including as varieties, according to Saccardo, *S. pyogenes albus*, *S. pyogenes citreus*, and *S. flavescens*. [*a*, 35.] See Plate iii, Fig. 10.—**S. pyogenes albus.** A s. found in pus, along with *S. pyogenes aureus*, from which it differs only in the absence of pigment, the colonies remaining white even after a long time. According to Flügge, this variety occurs more frequently in rabbits and other animals than *S. pyogenes aureus*. [*a*, 35.]—**S. pyogenes aureus.** Fr., *staphylocoque doré*. The most common of the pyogenic microbes, being found in acute abscesses, empyema, boils, acute osteomyelitis, pyæmia, ulcerative endocarditis, etc. It occurs as isodiametric cells about 0·84 μ (Saccardo) or 0·87 μ (Passet) in diameter, often as diplococci, usually grouped in irregular masses. On agar-agar it forms yellowish colonies undulated at the margins, and on gelatin plates punctiform colonies which appear at first, under a low power of the microscope, as light-brown balls having a dark centre and smooth borders. When the colonies reach the surface of the gelatin (after 2 or 3 days), they assume a yellow color and, slowly liquefying the gelatin, form circular depressions, which finally coalesce. The yellow pigment occurs only when the colonies are in contact with the air, the cultivations under a layer of oil remaining white. The puncture in nutrient jelly produces comparatively rapid liquefaction with the deposition of the colonies in the form of a golden-yellow sediment. Inoculated into milk, it curdles the latter after 1 to 8 days by the production of lactic and other acids. This s. is remarkable for its great resistance to external agents, the cultivations remaining active after more than a year. [*a*, 35.]—**S. pyogenes citreus.** A variety occurring in the pus of acute abscesses, differing from *S. pyogenes aureus* only in the bright, citron-yellow pigment. [*a*, 35.]—**S. pyosepticus.** Of Héricourt and Richet, a variety found in an epithelial non-ulcerated swelling on a recently killed dog. It closely resembles *S. pyogenes albus*. ["N. Y. Med. Jour.," July 6, 1889, p. 14 (*a*, 50).]—**S. salivarius pyogenes, S. sialopyus.** A species occurring as diplococci 0·3 to 0·5 μ long in the contents of an abscess of a guinea-pig inoculated with the saliva from a man with angina scarlatinosa. On gelatin plates, which it liquefies slowly, it forms, especially in the lowest strata, sharply defined rounded colonies of a whitish, opalescent appearance. [*a*, 35.]—**S. viridiflavescens.** A non-pyogenic species found in varicella. It forms on gelatin plates, which it does not liquefy, greenish-yellow, circular, smooth-edged colonies, and on blood-serum lemon-yellow colonies. [B.]

STAPHYLODIALYSIS (Lat.), n. f. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-o(o^3)-di(di^2)-a^{2}l(a^{3}l)′i^2(u^6)-si^{2}s. Gen., *-ys′eos (-al′ysis)*. From σταφυλή, the uvula, and διάλυσις, relaxation. A relaxation of the uvula. [L, 50 (*a*, 14).]

STAPHYLŒDEMA (Lat.), n. n. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-e^{2}d(o^2-e^{2}d)-em(am)′a^3. Gen., *-em′atos (-atis)*. From σταφυλή, the uvula, and οἴδημα, œdema. Œdema of the uvula. [E.]

STAPHYLOMA (Lat.), n. n. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-om′a^3. Gen., *-om′atos (-atis)*. Gr., σταφύλωμα (from σταφυλή, a bunch of grapes). Fr., *staphylôme*. Ger., *Staphylom*, *Traubenauge*. A more or less irregular protrusion of some one of the tunics of the eye, due to a thinning or to a perforation from previous ulceration. [F.]—**Annular s.** Of Walther, cirsophthalmia. [*a*, 34.]—**Anterior s.** See *S. corneæ*.—**Ciliary s.** Ger., *Ciliar-S.* S. scleroticæ in the ciliary region, due to intra-ocular inflammation usually affecting the uveal tract. [F.]—**Posterior s.** 1. See *S. scleroticæ*. 2. See CONUS (2d def.).—**Projecting s.** See *Conical* CORNEA.—**Scleral s.** See *S. scleroticæ*.—**Sclerochorioidal s.** See CONUS (2d def.).—**S. æquatoris oculi.** S. scleroticæ in the equatorial region. [F.]—**S. annulare.** S. scleroticæ in the ciliary region, which extends either continuously or by slight interruptions all round the corneal margin. [F.]—**S. anticum scleræ.** See *Ciliary s.*—**S. conicum.** See *Conical* CORNEA.—**S. corneæ.** Ger., *Hornhautstaphylom*. A bulging of the cornea, in whole or in part, from thinning of the membrane, with or without a preceding ulceration, due to injury or to a chronic inflammation of the cornea and usually of the iris, with abolition of the anterior chamber, adhesion of the iris to the posterior surface of the cornea, and increased tension. The cornea is opaque and occasionally thickened instead of thinned. According to some, the term is restricted to protrusion originating in prolapse of the iris and consisting of iridic tissue replacing the cornea. [B ; F.] Cf. HERNIA *corneæ*.—**S. corneæ intercalare.** A staphylomatous process located in the sclero-corneal region, apparently between the cornea and iris on the one hand and the sclera and ciliary body on the other. [F.]—**S. intercalare.** S. in which the projecting part of the eyeball is inserted between the insertion of the iris and the ciliary body, owing to a thinning of the ligamentum pectinatum and the region of Schlemm's canal. [F.]—**S. iridis.** See HERNIA *iridis*.—**S. laterale.** A s. situated on one side of the equator of the eyeball. [A, 319 (*a*, 34).]—**S. of the cornea.** See *S. corneæ*.—**S. pellucidum (conicum).** See *Conical* CORNEA.—**S. posticum (Scarpæ).** See CONUS (2d def.).—**S. racemosum corneæ.** S. corneæ with perforation at several points, through which small portions of the iris protrude. [F.]—**S. scleræ, S. scleroticæ.** A bulging of the sclerotic at any portion of its circumference, from thinning of the membrane due to long-continued intra-ocular inflammation with increased pressure. [F.]—**S. scleroticæ posticum.** See CONUS (2d def.).—**S. uveæ.** A bulging of a portion of the uveal tract through a perforation in the sclera. [F.]

STAPHYLÔME (Fr.), n. Sta^{3}f-el-om. See STAPHYLOMA.—**S. rameux.** See STAPHYLOMA *racemosum corneæ*.

STAPHYLONCIA (Lat.), **STAPHYLONCUS** (Lat.), n's *f.* and m. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-o^{2}ns(o^{2}n^{2}k)′i^2-a^3, -o^{2}n^{2}k′u^{3}s(u^{4}s). From σταφυλή, the uvula, and ὄγκος, a tumor. Swelling of the uvula.

STAPHYLO-PHARYNGIEN (Fr.), adj. Sta^3-fe-lo-fa^3-ra^{2}n^2-zhe-a^{3}n^2. Pertaining to the uvula and the pharynx. [L, 41 (*a*, 14).]

STAPHYLOPLASTY, n. Sta^{2}f′i^{2}l-o-pla^{2}st-i^2. From σταφυλή, the uvula, and πλάσσειν, to mold. Fr., *staphyloplastie*. Ger., *Staphyloplastik*. The plastic surgery of the palate. [*a*, 34.]

STAPHYLOPTOSIS (Lat.), n. f. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-o^{2}pt-os′i^{2}s. Gen., *-ptos′eos (-is)*. From σταφυλή, the uvula, and πτῶσις, a falling. Elongation of the uvula, as in staphylœdema. [L, 50 (*a*, 14).]

STAPHYLORRHAPHY, n. Sta^{2}f-i^{2}l-o^{2}r′a^{2}f-i^2. Lat., *staphylorrhaphia* (from σταφυλή, the uvula, and ῥάπτειν, to sew). Fr., *staphylorrhaphie*. Ger., *Staphylorrhaphie*, *Gaumennaht*. The operation of closing a cleft of the velum palati. Cf. URANOPLASTY.—**Fergusson's s.** An operation of which the essential feature is the division of the levator palati muscles in all cases and of the

palato-pharyngeus in some, to prevent their interference with the healing of the freshened surface of the cleft by retracting the flaps. [E.]—**Garretson's s.** An operation essentially the same as Fergusson's, except that the operator stands behind the patient, and uses the same instruments as in the operation for vesico-vaginal fistula. [E.]

STAPHYLOTOME, n. Sta^{2}f'i^{2}l-o-tom. Gr., σταφυλοτόμον (from σταφυλή, the uvula, and τέμνειν, to cut). Fr., *s.* An instrument for cutting the uvula or incising the palate. [E.]

STAPHYLOTOMY, n. Sta^{2}f-i^{2}l-o^{2}t'om-i^2. Gr., σταφυλοτομία (from σταφυλή, the uvula, and τομή, a cutting). Lat., *staphylotomia.* Fr., *staphylotomie.* Ger., *Staphylotomie.* 1. Amputation of the uvula. [E.] 2. Abscission of a staphyloma. [α, 34.]

STAPHYLYGROMA (Lat.), n. n. Sta^{2}f(sta^{3}f)-i^{2}l(u^{6}l)-ig(u^{6}g)-rom'a^3. Gen., *-om'atos* (*-atis*). From σταφυλή, the uvula, and ὑγρός, wet. See Staphylœdema.

STAR, n. Sta^{3}r. See Aster (1st def.); in the pl., *s's,* see *Polar s's.*—**Daughter s., Double s.** See Amphiaster.—**Mother s.** See Aster (1st def.).—**Polar s's.** Fr., *étoiles des pôles.* Radiating masses of the granules of the cell-protoplasm during caryocinesis, seen at the poles of the nuclear spindles. [L, 121.]—**S's of Verheyn.** See Stellulæ *Verheynii.*

STARAJA-RUSSA, n. A place in the government of Novgorod, Russia, where there is a mineral spring. [α, 14.]

STAR-ANISE, n. Sta^{3}r'a^{2}n''i^{2}s. The genus *Illicium,* especially *Illicium anisatum;* also its fruit. [α, 35.]

STARASOL (Ger.), n. Sta^{3}r'a^3-zol. A place in Austrian Galicia where there is a saline spring. [L, 30, 37, 57 (α, 14).]

STARCH, n. Sta^{3}rch. Gr., ἄμυλον. Lat., *amylum.* Fr., *amidon, fécule blanche* (ou *amylacée*). Ger., *Stärke, Stärkemehl.* It., *amido.* Sp., *almidón.* A carbohydrate having the chemical constitution $C_6H_{10}O_5$, or some multiple of this formula ($C_{18}H_{30}O_{15}$, $C_{24}H_{40}O_{20}$, and $C_{72}H_{120}O_{60}$ have been given, and $C_{12}H_{20}O_{10}$ for dried s.); according to Salomon, however, the simple formula $C_6H_{10}O_5$ represents its composition most nearly. S. is contained in nearly all chlorophyllaceous plants, being derived from the protoplasm of the chlorophyll corpuscles and from small protoplasmic bodies called *s.-formers.* It is stored up in the tubers, roots, seeds, etc., forming a supply of nourishment for the young shoots and other rapidly growing parts. S. is a white, shining, tasteless, and colorless powder, which, under the microscope, is seen to be made up of striated granules, differing in size, shape, and markings according to the source from which the s. is derived. The diameter of these granules ranges from 2 to 185 μ. Each granule consists of a series of concentric layers disposed about an eccentrically situated nucleus, called the *hilum,* the layers being separated from each other, according to some authorities, by concentric sæpta. S. granules have the property of polarizing light, and under polarized light show a dark cross, with arms intersecting the hilum. Chemically, s. consists of several isomeric substances differing in their solubility in water and their reaction toward iodine. The outer wall of each granule and the concentric sæpta found, according to some, in its interior are made up of *amylin* or *s.-cellulose* (*farinose*), which is insoluble in water but soluble in caustic potash, and gives a yellowish or brownish coloration with iodine. The interior of the granule consists of a soluble s. (see Amylum [2d def.]). Between this soluble s. and s.-cellulose various intermediate isomeric substances exist, which give yellow, violet, and red colorations with iodine. On boiling with water, the s.-granules burst and the contents swell up, forming a gelatinous s. paste (cf. *Mucilago* amyli), which on drying changes to a stiff transparent mass. On long boiling, or by prolonged exposure to a heat of 100° C. in the dry state, or by the action of diastase and chemical agents, s. is converted into a modification soluble in cold water (soluble s.). By the continued action of diastase and chemical agents, or by a dry heat of 200° C., s. is converted into *dextrin.* By the action of cold nitric acid it forms *xyloidin.* With solutions of iodine, s. in all its forms gives a deep-blue color, which disappears on heating, but reappears on cooling. Iodine in substance converts s. into a compound (*iodized s.*) soluble in water, and from this solution a neutral salt precipitates the *iodide of s.* S. is obtained from the grains of the cereals, from the tubers of the potato, from the pith of the sago-palm (sago), from different species of *Maranta* (arrowroot), and from the *Jatropha manihot* (tapioca). It also enters largely into the composition of peas and beans, chestnuts, acorns, and other nuts, and the various edible rhizomes and tuberous roots. [B, 3, 5, 8, 9; L, 165.]—**Animal s.** See Glycogen.—**Canna s., Cane s.** See Canna *s.*—**Corn s.** Lat., *amylum maidis.* Fr., *amidon* (ou *fécule*) *de maïs.* Ger., *Maisstärke.* A variety of s. obtained from Indian corn, distinguished by the small size of its granules. It is valuable for its nutritive properties. [B, 5 (α, 38).]—**Decoction of s.** See under *Mucilago* amyli.—**Explosive s.** Xyloidin. [B, 2.]—**Gelatinized s.** A preparation used as a test in the U. S. Ph. [B.]—**Glycerine (or Glycerite, or Glycerolate) of s.** See *Glyceritum* amyli.—**Hepatic s.** See Glycogen.—**Hydrated s.** S. reduced to a pasty consistence by the action of hot water. [B.]—**Iceland s.** See Lichenin.—**Iodized s.** See Amylum *iodatum.*—**Liver s.** See Glycogen.—**Moss s.** See Lichenin.—**Oat s.** Lat., *amylum avenæ.* Ger., *Haferstärke.* A variety of s. found in oats, constituting nearly 60 per cent. of oatmeal. [B, 5 (α, 38).]—**Potato s.** Lat., *amylum* [Finn. Ph.] (*solani*). Fr., *fécule de pomme-de-terre.* Ger., *Kartoffelstärke, Kartoffelmehl.* S. obtained from the potato. Its granules are very large and somewhat shiny. Used to imitate sago, arrowroot, etc. [B, 5 (α, 38).]—**Soluble s.** A modification of s., produced by the action of heat or chemical agents, which is soluble in cold water, but still gives a blue color with iodine. [B.]—**S. and opium clyster.** See Enema *opii.*—**S. enema.** See *Lavement à l'amidon.*—**S. iodide.** A compound of s. with iodine. Whether a true s. iodide actually exists is uncertain, although the iodized s. of the U. S. Ph. (see Amylum *iodatum*) and that prepared in other ways is supposed to contain such a compound. According to Withaus, s. iodide is precipitated from the soluble iodized s. by the addition of a neutral salt. [B.]—**S. mucilage.** See *Mucilago* amyli.—**S. paste.** See *Hydrated s.*—**S. poultice.** See *Cataplasma* amyli.—**S. sugar.** See Glucose.—**Troches of s.** See Trochisci *bechici.*—**Wheat s.** Lat., *amylum* (*tritici*). Fr., *amidon de blé* (ou *de froment*). Ger., *Weizenstärke.* S. obtained from wheat. [B.]

STARCHY, adj. Sta^{3}rch'i^2. See Amyloid.

STARKBÄRTIGKEIT (Ger.), n. Sta^{3}rk'bart-i^{2}g-kit. See Pogoniasis.

STÄRKE (Ger.), n. Stark'e^2. 1. Strength, intensity. 2. See St-rch.—**Jods'.** See Starch *iodide.*—**S'ferment.** See *Amylolytic* ferment.—**S'glycerit.** See *Glyceritum* amyli.—**S'gummi.** See Dextrin.—**S'lösung.** See *Solutio* amyli.—**S'schleim.** See *Mucilago* amyli.—**S'zucker.** See Glucose.

STÄRKEMEHL (Ger.), n. Stark'e^2-mal. See Starch.—**Amerikanisches S.** Ordinary arrowroot. [α, 35.]

STARR (Ger.), adj. Sta^{3}r. Rigid, inflexible. [α, 35.]

STARRBLINDHEIT (Ger.), n. Sta^{3}r'bli^{2}nd-hit. The momentary darkening of the visual field by long-continued staring at a single point. [L, 57 (α, 14).]

STARRE (Ger.), n. Sta^{3}r're^2. Rigidity. [α, 14.]—**Frosts'.** See Starrfrost.—**Leichens'.** See Rigor *mortis.*—**Nackens', Rückens'.** See Opisthotonos.—**Säures'.** Artificial muscular rigidity, induced by immersion of a muscle in weak acids. [K.]—**Todtens'.** See Rigor *mortis.*—**Wassers'.** Artificial rigidity of a muscle caused by immersing it for some time in water. [K, 16.]

STARRFROST (Ger.), n. Sta^{3}r'fro^{2}st. Shivering due to cold; ague. [α, 34.]

STARRKRAMPF (Ger.), n. Sta^{3}r'kra^{3}mpf. Tetanus.—**Seitens'.** See Pleurothotonus.

STARRSUCHT (Ger.), n. Sta^{3}r-zuch^{2}t. See Catalepsy.

STARVATION, n. Sta^{3}rv-a'shu^{3}n. Gr., ἀσιτία. Lat., *inedia.* Fr., *inanition.* Ger., *Hungerleiden.* The condition resulting from continued want of food or from lack of food sufficient for nutrition. [α, 48.]—**Heart s.** Of Fothergill, neurasthenia of the heart. [L, 57 (α, 14).]

STARWORT, n. Sta^{3}r'wu^{5}rt. 1. The genus *Aster.* 2. The genus *Stellaria.* 3. The genus *Callitriche.* 4. The *Helonias dioica.* 5. The *Aletris farinosa.* [α, 35.]

STASIMETRY, n. Sta^{2}s-i^{2}m'e^{2}t-ri^2. From στάσις, a condition, and μέτρον, a measure. Of Bitot, the measurement of the consistence of soft organic bodies. ["Arch. de phys. norm. et path.," 1878, 2, Ser., v, p. 164 (α, 34).]

STASIMORPHY, n. Sta^{2}s'i^2-mo^{2}rf-i^2. From στάσις, a standing, and μορφή, form. In botany, a deviation from the normal form of a part or organ, produced by arrested development. [α, 35.]

STASIRAFISTERO (It.), n. Sta^{3}s-er-a^3-fes-ta'ro. An instrument invented by Scivelli for maintaining the stitches secure after hysterorrhaphy. [A, 32.]

STASIS (Lat.), n. f. Sta(sta^3)'si^{2}s. Gen., *stas'eos* (*-is*). Gr., στάσις (from ἵστασθαι, to stand). Fr., *stase.* Ger., *Stillstand, Stase, Stauung, Stockung.* Stagnation of blood or other organic fluid in some portion of the body. [α, 34.]—**Diffusion s.** Ger., *Diffusionsstase.* S. with diffusion of serum or lymph. [A, 319 (α, 34).]—**Venous s.** A blood s. due to venous congestion. [α, 34.]

STATEMENT, n. Stat'm'nt. A declaration.—**Ante-mortem s.** A declaration made just before death, with special reference to its medico-legal bearings. Such a s., when made with the consciousness and belief that death is impending, is held in law as equally binding with a s. made on oath. [D, 38.]

STATIC, adj. Sta^{2}t'i^{2}k. Gr., στατικός (from ἱστάναι, to cause to stand). Fr., *statique.* Ger., *statisch.* 1. Pertaining to what is stationary or in a state of rest or equilibrium. [α, 48.] 2. Pertaining to the standing posture. See *S.* ataxia. 3. Of electricity, existing without manifestation by currents (see *S.* electricity).

STATICE (Lat.), n. f. Sta^{2}t(sta^{3}t)'i^{2}s(i^{2}k)-e(a). Gen., *stat'ices.* Gr., (1st def.) στατική (from ἱστάναι, to cause to stand). Fr., *staticé.* Ger., *Strandnelke, Seestrandnelke.* 1. Of the ancients, see Armeria *vulgaris.* 2. Sea-lavender; a genus of plants forming, with *Armeria,* etc., a tribe (*Staticeæ* or *Staticinæ*) of the *Plumbagineæ.* [α, 35.]—**S. brasiliensis.** A Brazilian species. The root, known as *baycuru* or *guaycurú,* is used as an astringent gargle and as a discutient. [α, 35.]—**S. caroliniana.** Fr., *staticé de la Caroline.* Ger., *carolinische Strandnelke.* Marsh-rosemary, inkroot; a North American herb. The bitter root, formerly in the secondary list of the U. S. Ph., is a powerful astringent, and is used in aphthæ, angina, etc. [α, 35.]—**S. limonium.** Fr., *behen rouge, saladelle.* Ger., *gemeine Strandnelke.* Common sea-lavender, wild marsh-beet of Europe. The root and leaves are tonic and astringent. [α, 35.]—**S. mucronata.** A species the roots of which are used in Morocco as a nervine. [α, 35.]—**S. pseudo-limonium.** A species found especially on the shores of the North Sea; used like *S. limonium.* [α, 35.]—**S. speciosa.** Fr., *staticé superbe.* Showy sea-lavender; a soda-yielding species of southern Siberia and Russia, used especially in uterine affections. [α, 35.]

STATOBLASTS, n. pl. Sta^{2}t'o-bla^{2}sts. From στατός, placed, and βλαστός, a sprout. Ger., *Statoblasten.* Certain reproductive buds developed in the interior of *Polyzoa,* but not liberated until the death of the parent organism. [B, 28 (α, 27).]

STATOMETER, n. Sta^{2}t-o^{2}m'e^{2}t-u^{5}r. From στατός, placed, and μέτρον, a measure. Fr., *statomètre.* Ger., *S.* An instrument used to determine the amount of protrusion of an eye; consisting of a rod or bar with two perpendicular arms or legs of equal length, one of them fixed, the other movable. On the former slides a sight-

vane, while on the latter is a mirror. The distance between the arms is made equal to the diameter of the base of the orbit, and the sight-vane is so adjusted that the cornea, its reflected image, and the vane are in the same line. Opposite the eye to be examined, on the cross-bar, is a small, round mirror, in which the eye sees its own image. This mirror, by means of a rod, may be pushed backward and forward upon the cross-bar. [F.]—**Zehender's s.** A s. consisting of a small, rectangular box, with one side open. In this box is a mirror about as wide as the face. When the instrument is placed before both eyes so that the mirror is parallel to the frontal surface, each eye is reflected in it. Small pins, movable by a screw, are so arranged as to stand immediately in front of the centre of the reflected pupils. Their distance from each other may be read off from a scale. [F.]

STATUS (Lat.), n. m. Stat(sta³t)'u³s(u⁴s). Gen., *stat'us.* From *stare*, to stand. Fr., *état.* Ger., *Zustand, Beschaffenheit.* A condition, a stage; particularly (of old writers) that stage of a disease in which, having reached its height, it remains stationary before it begins to decline. [A, 244.]—**S. arthriticus.** Nervous or gastric disturbances due to imperfect or masked gout. [A, 326 (α, 34).]—**S. cribrosus.** See ÉTAT *criblé.*—**S. eclampticus.** The state or condition of an individual affected with eclampsia. [α, 34.]—**S. epilepticus.** Fr., *état de mal épileptique.* 1. That state in which an epileptic has a number of fits in rapid and often regular succession, so that he does not become conscious between them. The condition is often associated with fever and frequently causes death. 2. See HYSTERO-EPILEPSY.—**S. gastricus.** See GASTRICISM (2d def.).—**S. hystericus.** The hysterical state or condition. [D.]—**S. nervosus.** See NEURASTHENIA.—**S. pituitosus.** See GLUTINOSUM *spontaneum.*—**S. præsens.** The condition of an individual at the time a note is made of it (used generally of his condition when he first comes under observation as a patient). [α, 34.]—**S. typhosus.** The asthenic, delirious condition observed in typhoid and certain other fevers; characterized by great prostration, subsultus tendinum, floccitatio, feeble, frequent pulse, low muttering delirium or coma vigil, and dryness with brown color of the tongue. [B; α, 34.]

STAUB (Ger.), n. Sta³'u⁴b. See DUST.—**Befruchtungss', Blüthens'.** See POLLEN.—**Gehirnmarks'.** See MYELOCYTE.—**S'beutel.** See ANTHER.—**S'fieber.** Fever due to the inhalation of dust in certain occupations. [α, 34.]—**S'gefäss.** See STAMEN.—**S'krankheit.** See ANTHRACOSIS (4th def.).

STAUDE (Ger.), n. Sta³'u⁴d'e². An undershrub. [α, 35.]

STAUDIG (Ger.), adj. Sta³'u⁴d-i²g. See SUFFRUTICOSE.

STAUPE (Ger.), n. Sta³'u⁴p-e². Epilepsy; distemper (of dogs); influenza (of horses). [A, 315, 521 (α, 21).]—**Böse S.** See EPILEPSY.—**Korns'.** See ERGOTISM.

STAUROPLÉGIE (Fr.), n. Stor-o-pla-zhe. See *Crossed* HEMIPLEGIA.

STAUUNG (Ger.), n. Sta³'u⁴-un². See STASIS.

STAVESACRE, n. Stavz'akr'. The *Delphinium staphisagria* or its seed. [α, 35.]

STAXIS (Lat.), n. f. Sta²x(sta³x)'i²s. Gen., *stax'eos (-is).* Gr., σταξις (from στάζειν, to drop). Fr., *s.* Ger., *S.* Of Hippocrates, an effusion of blood in drops. [D.]

STEAPSIN, n. Ste-a²p'sin. Fr., *stéapsine.* Ger., *S.* A principle obtained from pancreatic juice, capable of digesting twenty-four times its own weight of fat. It forms translucent, shining scales, soluble in water. [B.]

STEARALDEHYDE, n. Ste-a²r-a²ld'e²-hid. Ger., *Stearaldehyd.* See STEARIC *aldehyde.*

STEARATE, n. Ste'a²r-at. Fr., *stéarate.* Ger., *Stearat.* A salt of stearic acid. [B, 93 (α, 14).]

STEARERIN, n. Ste-a²r'e²r-i²n. Fr., *stéarérine.* Ger., *S.* A fatty substance, analogous to stearin, found in the grease of sheep's wool. [B, 93 (α, 14).]

STEARIC, adj. Ste-a²r'i²k. Fr., *stéarique.* Derived from or contained in stearin. [B.]—**S. acid.** Fr., *acide stéarique.* Ger., *Stearinsäure, Talgsäure.* A monobasic acid, $C_{18}H_{36}O_2$, forming laminar crystals, and occurring as a glyceryl stearate along with glyceryl palmitate in the solid animal fats. It unites with the alkalies to form soaps. [B, 4; K.]—**S. aldehyde.** A body, $C_{17}H_{35}$.CHO, bearing the same relation to s. acid that ordinary aldehyde bears to acetic acid. It occurs in foliate crystals. [B, 4.]

STEARIDIC ACID, n. Ste-a²r-i²d'i²k. Fr., *acide stéaridique.* Ger., *Stearidinsäure.* An amorphous substance, $C_{18}H_{34}O_2$, isomeric with oleic acid. [B, 93 (α, 14).]

STEARIN, n. Ste'a²r-i²n. From στέαρ, stiff fat. Fr., *stéarine.* Ger., *S.* A derivative of glycerin in which one or more molecules of stearyl replace one or more molecules of hydroxyl. The term, when used without qualification, is understood to mean tristearin. [B, 4.] See also DISTEARIN and TRISTEARIN.

STEAROCONOT, n. Ste-a²r-o²k'o²n-o²t. From στέαρ, fat, and κόνις, dust. Fr., *stéaroconote.* Ger., *Stearokonot.* A yellowish-brown, pulverulent fatty substance resembling cephalot; said to have been obtained by Couerbe from the brain. According to Frémy, it is a mixture of albumin, oleophosphates, and stearic acid, while Bibra considers it as simply a mixture of fatty acids. [B, 93 (α, 14); B, 118.]

STEAROL, n. Ste'a²r-o²l. Fr., *stéarol.* A medicament having fat as an excipient. [B, 38 (α, 14).]

STÉAROLÉ (Fr.), n. Sta-a³r-ol-a. See OINTMENT.

STEAROLEIC ACID, STEAROLIC ACID, n's. Ste-a²r-o²l-e'i²k, -o²l'i²k. Fr., *acide stéaroléique.* Ger., *Stearolsäure.* A monobasic acid, $C_{18}H_{32}O_2 = C_{17}H_{31}$.COOH, crystallizing from alcohol as long prisms. [B, 3 (α, 38).]

STEARONE, n. Ste'a²r-on. Fr., *stéarone.* Ger., *Stearon.* Distearyl ketone, $(C_{17}H_{34})_2 : CO = C_{35}H_{70}O$. [B, 2.]

STEAROPHANIC ACID, n. Ste-a²r-o-fa²n'i²k. Fr., *acide stéarophanique.* Ger., *Stearophansäure.* See STEARIC ACID.

STEAROPHANIN, n. Ste-a²r-o²f'a²n-i²n. Fr., *stéarophanine.* Ger., *Stearophan.* See ANAMIRTIN.

STEAROPTENE, n. Ste-a²r-o²pt-en. Fr., *stéaroptène.* Ger., *Stearopten.* A camphor-like solid residue formed by the essential oils at a low temperature. [B, 93, 108 (α, 14).] Cf. ELÆOPTENE.

STEARORICINIC ACID, n. Ste-a²r-o-ri²s-i²n'i²k. Fr., *acide stéaroricinique.* Ger., *Stearoricinsäure.* See RICINOSTEARIC ACID.

STEAROXYLIC ACID, n. Ste-a²r-o²x-i²l'i²k. Fr., *acide stéaroxylique.* Ger., *Stearoxylsäure.* A monobasic acid, $C_{18}H_{32}O_4 = C_{17}H_{31}O_2$.COOH, crystallizing from alcohol as small shining plates. [B, 3 (α, 38); B, 4.]

STEARRHŒA (Lat.), n. f. Ste(ste²)-a²r(a³r)-re'(ro²'e²)-a³. From στέαρ, fat, and ῥοία, a flowing. Fr., *stéatorrhée.* Ger., *Steatorrhöe.* See SEBORRHŒA.—**S. congestiva.** See SEBORRHŒA *congestiva.*—**S. flavescens.** Seborrhœa in which either yellow sebaceous matter is secreted or the sebaceous matter turns yellow after its deposit upon the skin. [G.]—**S. nigricans.** Of Wilson and Neligan, a form of seborrhœa in which the sebaceous matter is of a dark color, varying from gray to jet black when first secreted, forming a dark-colored deposit upon the skin; said by them to be attended with more irritation and sensitiveness of the affected region than ordinary seborrhœa. Other writers regard the disease as a seborrhœa oleosa in which the sebaceous deposit upon the skin is colored dark by admixture with dirt. [G, 1, 45.]—**S. simplex.** Seborrhœa of the common type. [G, 1.]

STEARYL, n. Ste'a²r-i²l. Ger., *S.* The radicle, $C_{18}H_{35}O$, of stearic acid. [B.]

STEATHYLE (Lat.), n. f. Ste(ste²)-a²th(a³th)-il(u⁶l)'e(a). Gen., *-hyl'es.* From στέαρ, fat, and ὕλη, matter. Of Lobstein, a morbid lardaceous substance. [L, 50 (α, 14).]

STEATITE, n. Ste'a²t-it. From στέαρ, fat. Lat., *lardites.* Fr., *stéatite.* Ger., *Steatit, Bildstein, Schreibstein, Seifenstein.* Soapstone, granular magnesium silicate; a gray or grayish-green variety of talc, very greasy to the touch. [L, 30, 41, 49.]—**Sulphurated s.** A mixture of 9 parts of powdered s. with 1 part of zinc sulphate; used as a dusting powder for intertrigo of infants. [Vigier, "Gaz. hebd. de méd. et de chir.," Feb. 5, 1886; "N. Y. Med. Jour.," Mar. 6, 1886, p. 283 (α, 50).]

STEATOCELE (Lat.), n. f. Ste(ste²)-a²t(a³t)-o(o³)-se(ka)'le(la); in Eng., ste²'a²t-o-sel. Gen., *-cel'es.* From στέαρ, fat, and κήλη, a tumor. Fr., *stéatocèle.* A fatty tumor in the scrotum. [E.]

STEATODES (Lat.), adj. Ste(ste²)-a²t(a³t)-od'ez(as). Gr., στεατώδης (from στέαρ, fat, and εἶδος, resemblance). Fatty, abounding in fat. [L, 50 (α, 14).]

STEATOMA (Lat.), n. n. Ste(ste²)-a²t(a³t)-om'a³. Gen., *-om'atos (-atis).* Gr., στεάτωμα (from στέαρ, fat). Fr., *stéatôme.* Ger., *Speckgeschwulst, Speckgewächs, Steatom.* See LIPOMA and ATHEROMA (1st def.).—**S. testiculi.** See STEATOCELE.

STEATOMYCES (Lat.), n. m. Ste(ste²)-a²t(a³t)-o²m'i²(u⁶)-sez(kas). Gen., *-et'os (-etis).* From στέαρ, fat, and μύκης, a mushroom. Fr., *stéatomyce.* Ger., *Speckschwamm.* Of Ritgen, a fatty, fungous excrescence. [L, 50 (α, 14).]

STEATOPYGIA (Lat.), n. f. Ste(ste²)-a²t(a³t)-o(o³)-pi²j(pu⁶g)'i²-a³. From στέαρ, fat, and πυγή, the nates. Fr., *stéatopygie.* Ger., *Fettsteiss.* An excessive development of fat about the nates, as in Hottentot women.

STEATORRHAGIA (Lat.), **STEATORRHŒA** (Lat.), n's f. Ste(ste²)-a²t(a³t)-o²r-raj(ra³g)'i²-a³, -re'(ro²'e²)-a³. From στέαρ, fat, and ῥήγνυσθαι, to burst forth, or ῥεῖν, to flow. See SEBORRHŒA.

STEATOSIS (Lat.), n. f. Ste(ste²)-a²t(a³t)-os'i²s. Gen., *-os'eos (-is).* From στέαρ, fat. Fr., *stéatose.* Ger., *Steatose, Fettbildung* (1st def.), *Speckbildung* (2d def.). 1. Fatty degeneration. 2. A tendency to the formation of abnormal deposits of fat. [D.] 3. A cutaneous affection consisting in an anomaly of sebaceous secretion; in Auspitz's classification, a suborder of the *Keratonosi*, including *Hypersteatoses, Parasteatoses*, and *Asteatoses.* [G, 4.] 4. See SEBORRHŒA.

STEATOSPONGUS (Lat.), n. m. Ste(ste²)-a²t(a³t)-o(o³)-spo²n²g'u³s(u⁴s). From στέαρ, fat, and σπόγγος, a sponge. See STEATOMYCES.

STEATOZOON (Lat.), n. n. Ste(ste²)-a²t(a³t)-o(o³)-zo'o²n. From στέαρ, fat, and ζῷον, an animal. See DEMODEX *folliculorum.*

STEBEN (Ger.), n. Stab'e²n. A place in Upper Franconia, Bavaria, where there are chalybeate and alkaline springs. [α, 14.]

STECHAPFEL (Ger.), n. Ste²ch²'a³pf-e²l. See DATURA and DATURA *stramonium.*—**S'form.** A thorn-apple shape assumed by the red blood-discs after their contents have evaporated. [K.]—**S'samenextrakt.** See *Extractum* STRAMONII.

STÉCHAS (Fr.), n. Sta-ka³. See LAVANDULA *stœchas.*

STECHBECKEN (Ger.), n. Ste²ch²'be²k-e²n. See STECKBECKEN.

STECHEN (Ger.), n. Ste²ch²'e²n. See ACUPUNCTURE.

STECHEND (Ger.), adj. Ste²ch²'e²nd. See PUNGENT.

STECHPILLE (Ger.), n. Ste²ch²'pi²l-le². See SUPPOSITORY.

STECHSAUGER (Ger.), n. Ste²ch²'za³-u⁴g-e²r. An instrument for puncturing the fœtal membranes.

STECHWINDE (Ger.), n. Ste²ch²'vi²nd-e². See SMILAX.

STECKBECKEN (Ger.), n. Ste²k'be²k-e²n. A bed-pan.

STECKFLUSS (Ger.), n. Ste²k'flus. See *Suffocative* CATARRH.

STECKHUSTEN (Ger.), n. Ste^{2}k'hust-e^{2}n. See PERTUSSIS.

STEEL, n. Stel. Gr., χάλυψ. Lat., *chalybs.* Fr., *acier.* Ger., *Stahl.* 1. A form of iron containing 0·6 to 1·9 per cent. of carbon susceptible of being tempered by exposure to heat and a subsequent cooling in water, oil, lead, mercury, etc. S. is capable of being sharpened to a fine, durable edge. [B ; L.] 2. As sometimes used in Great Britain, any medicinal preparation of iron.—**S. balsam.** See *Linimentum* FERRI *nitrici.*—**S. wine.** See *Vinum* FERRI.

STEELYARD, n. Sti^{2}l'y'rd. A balance consisting essentially of a lever on the graduated long arm of which the weights are placed. [α, 48.]

STEEP-WEED, STEEP-WORT, n's. Step'wed, -wu^{5}rt. The *Pinguicula vulgaris.* [A, 505 (α, 21).]

STEGIUM (Lat.), n. n. Stej(ste^{2}g)'i^2-u^{3}m(u^{4}m). From στέγος, a roof. Of Miers, the mass of apical prolongations of the filaments (stamens) which often cover the top of the style in the *Asclepiadeæ.* [α, 35.]

STEGNOSIS (Lat.), n. f. Ste^{2}g-nos'i^{2}s. Gen., *-os'eos (-is).* Gr., στέγνωσις (from στεγνοῦν, to constrict). See CONDENSATION and STENOSIS.

STEGNOTIC, adj. Ste^{2}g-not'i^{2}k. Gr., στεγνωτικός. Lat., *stegnoticus.* Fr., *stegnotique.* Astringent. [L, 50 (α, 14).]

STEHLSUCHT (Ger.), n. Stal'zuch^{2}t. See CLEPTOMANIA.

STEIFWERDEN (Ger.), **STEIFWERDUNG** (Ger.), n's. Stif've^{2}rd-e^{2}n, -un^2. See ERECTION.

STEIFER (Ger.), n. Stif'e^{2}r. See ERECTOR.—**S. des Kitzlers.** See ISCHIO-CAVERNOSUS.

STEIFHALS (Ger.), n. Stif'ha^{3}ls. See STIFF-NECK.

STEIFHEIT (Ger.), n. Stif'hit. See RIGIDITY.—**Muskels'.** 1. Muscular rigidity. 2. See *Thomsen's* DISEASE.

STEIFSUCHT (Ger.), n. Stif'zuch^{2}t. See CATALEPSY.

STEIGBÜGEL (Ger.), n. Stig'bu^{6}g-e^{2}l. See STAPES.

STEIN (Ger.), n. Stin. See CALCULUS, LAPIS, PYRENE (1st def.), and STONE.—**Aders'.** See PHLEBOLITH.—**Fresss'.** See HÖLLENSTEIN.—**Gallens'.** See the major list.—**Gebärmutters'.** See *Uterine* CALCULUS.—**Gelbs', Gelbsuchts'.** See ICTERUS.—**Gifts'.** White arsenic ore. [L, 46 (α, 21).]—**Griess'.** See CALCULUS.—**Harnsäures'.** See *Uric-acid* CALCULUS.—**Harns'.** See *Urinary* CALCULUS.—**Höllens'.** See the major list.—**Hörs'e.** See OTOLITHS.—**Judens'e.** See PHŒNICITES.—**Krötens'.** See BUFONITES and *Salivary* CALCULUS.—**Lendens'.** See NEPHRITE and *Renal* CALCULUS.—**Lungens'.** See *Pulmonary* CALCULUS and LUNG-*stone.*—**Magens'.** See *Gastric* CALCULUS.—**Maulbeers'.** See *Mulberry* CALCULUS.—**Milchs'.** A cheesy mass formed in a galactocele by the absorption of the watery portion of the milk. STEINAPFEL (Ger.), n. Stin'a^{3}pf-e^{2}l. A pome, like that of the hawthorn, containing bony carpels. [α, 35.]

STEINBRECH (Ger.), n. Stin'bre^{2}ch^2. See SAXIFRAGA, EMPETRUM, ASPLENIUM *trichomanes,* and ŒNANTHE *fistulosa.*

STEINCHEN (Ger.), n. Stin'ch^{2}e^{2}n. See CALCULUS.—**Ohrens'.** See *Aural* CALCULUS.—**Thränenweges'.** See *Lacrymal* CALCULUS.

STEINFARN (Ger.), n. Stin'fa^{3}rn. See ASPLENIUM *trichomanes,* ASPLENIUM *ceterach,* and POLYPODIUM *vulgare.*

STEINKLEE (Ger.), n. Stin'kla. See MEDICAGO *lupulina* and MELILOTUS.

STEINKOHLE (Ger.), n. Stin'kol-e^2. See ANTHRACITE and LITHANTHRAX.—**S'nkali.** See ANTHRAKOKALI.—**S'ntheer.** See *Coal* TAR.—**S'ntheerkreosot.** See PHENOL.—**S'ntheeröl.** Coal-tar oil. [B.]—**S'ntheersäure.** Rosolic acid. [A, 324.]

STEINKRAUT (Ger.), n. Stin'kra^3-u^{4}t. See ALYSSUM, ASPERULA *odorata,* and RESEDA *luteola.*

STEINLEBERKRAUT (Ger.), **STEINLEBERMOOS** (Ger.), n's. Stin'lab-e^{2}r-kra^3-u^{4}t, -mos. The *Marchantia polymorpha, Parmelia omphalodes,* and other lichens. [α, 35.]

STEINSAMEN (Ger.), n. Stin'za^{3}m-e^{2}n. See LITHOSPERMUM.

STEINSCHNITT (Ger.), n. Stin'shni^{2}t. See LITHOTOMY and CYSTOTOMY.—**Bauchs'.** See *Suprapubic* CYSTOTOMY.—**Grosser S.** See *Median* CYSTOTOMY.—**Kleiner S.** See APPARATUS *minor.*—**Seitens'.** See *Lateral* CYSTOTOMY.—**S. durch das Trigonum Lieutaudii.** See *Rectal* CYSTOTOMY.—**S'lage, S'slage.** See *Lithotomy* POSITION.—**S'messer.** See CYSTOTOME (1st def.).

STEINWASSER (Ger.), n. Stin'va^{3}s-se^{2}r. A place in Bohemia where there is a sulphurous spring. [L, 49 (α, 14).]

STEIROSIS (Lat.), n. f. Stir(ste^2-i^{2}r)-os'i^{2}s. Gen., *-os'eos (-is).* Gr., στείρωσις (from στεῖρος, barren). Fr., *steirose.* See STERILITY.

STEISS (Ger.), n. Stis. See BREECH.—**Fetts'.** See STEATOPYGIA.—**S'geschwulst.** A swelling in the sacral region. [α, 34.]—**S'tuch.** See DIAPER (2d def.).

STEISSBEIN (Ger.), n. Stis'bin. See COCCYX.—**S'glatze, S'hautgrube.** See FOVEOLA *coccygea.*—**S'hörner.** See CORNUA *coccygea.*—**S'knoten.** See *Coccygeal* GLAND.—**S'spitze.** The apex of the coccyx. [L, 30 (α, 14).]

STEISSCHEN (Ger.), n. Stis'ch^{2}e^{2}n. See COCCYX (1st def.).

STEISSENDE (Ger.), n. Stis'e^{2}nd-e^2. See PELVIC POLE.

STEISSLAGE (Ger.), n. Stis'la^{3}g-e^3. A breech presentation.—**Einfache S.** See *Vollkommene S.*—**Gedoppelte S.** That variety in which both knees and hips are flexed. [A, 61.]—**Unvollkommen gedoppelte S.** That variety in which only one of the lower limbs is flexed at the knee, the other being applied to the abdomen and the chest. [A, 61.]—**Vollkommene S.** That variety in which both lower limbs are flexed at the hips, but neither is flexed at the knee. [A, 61.]

STEISSRÜCKENLAGE (Ger.), n. Stis'ru^{6}k-e^{2}n-la^{3}g-e^2. That posture of a patient in which, the body resting on the back, the knees are bent, and then the thighs brought up against the abdomen, so as to tilt the pelvis forward. [A. 35.]

STEISSTERATOM (Ger.), n. Stis'tar-a^{3}t-om. A teratoma in the sacral region. [α, 34.]

STELLA (Lat.), n. f. Ste^{2}l'la^3. A roller bandage applied to the thorax with figure-of-eight turns over both shoulders so that the point of crossing is over the spine (*s. dorsi*) or over the sternum (*s. pectoris*). [A, 326 (α, 34).]

STELLAL, adj. Ste^{2}l'l'l. Of or pertaining to the *Stellales,* which are Lindley's s. alliance (Lat., *nixus stellalis*) of the *Epigynæ,* consisting of the *Stellatæ.* [α, 35.]

STELLARIA (Lat.), n. f. Ste^{2}l-la(la^3)'ri^2-a^3. From *stella,* a star. Fr., *stellaire* (2d def.). Ger., *Sternkraut* (2d def.), *Sternmiere* (2d def.). 1. The *Asperula odorata* and *Alchemilla vulgaris.* 2. Star-chickweed ; a genus of caryophyllaceous herbs. The *Stellariaceæ* are a family of the *Stellarieæ* ; the *Stellariæ* are a tribe of the *Caryophyllæ* ; the *Stellarieæ* are : Of Dumortier, an order of the *Toropetalæ* ; of Reichenbach, a section of the *Stellarineæ* (a division of the *Caryophylleæ*) ; the *Stellarineæ* are a tribe of the *Alsineæ.* [α, 35.]—**Herba stellariæ.** The *Asperula odorata* (the plant in flower). [α, 35.]—**S. alsine, S. aquatica.** Fr., *stellaire alsine.* Water-starwort ; a refrigerant growing in Europe and North America, recommended as an application to boils. [α, 35.]—**S. holostea.** Fr., *stellaire des haies, langue d'oiseau.* Ger., *grossblumiges Sternkraut, Augentrostgras, Blumengras, Sterngras, Brustkraut, Jungferngras.* Agworm-flower, all-bone, bird's-tongue, break-bones, May-grass, snap-stalks, great starwort of Europe ; a demulcent and refrigerant species. The stems and leaves were formerly used like *S. media.* The bruised leaves, the juice, and a distilled water made from the plant have been used as an application to sore eyes. [B ; α, 35.]—**S. media.** Fr., *morgeline, mouron blanc* (ou *des oiseaux,* ou *d'hiver*). Ger., *mittleres Sternkraut, Vogelkraut, Miere, Hühnerbiss, Mäusedarm, Sternmiere.* Chickweed. It is somewhat astringent, and was formerly used in phthisis, hæmoptysis, hæmorrhoids, and skin diseases, also as an application to wounds, ulcers, and inflamed eyes. [α, 35.]—**S. nemorum.** Ger., *Waldsternmiere.* Wood-starwort ; identified by some with the ἀλσίνη of Dioscorides, which was used like *S. media.* [α, 35.]—**S. pallasiana.** An astringent species found in northern Asia. [α, 35.]

STELLATE, adj. Ste^{2}l'at. Lat., *stellatus, stellaris* (from *stella,* a star). Fr., *étoilé, stellaire.* Ger., *sternförmig.* Star-shaped ; having parts more or less pointed, projecting all round, like a star as conveniently figured. The *Stellatæ,* or *Stellateæ,* are the *Galiaceæ.* [α, 35 ; α, 48.]

STELLE (Ger.), n. Ste^{2}l'le^2. See LOCUS.—**Broca'sche S.** See *Broca's* CONVOLUTION.

STELLIFORM, adj. Ste^{2}l'i^2-fo^{2}rm. Lat., *stelliformis* (from *stella,* a star, and *forma,* form). See STELLATE.

STELLINERVIS (Lat.), adj. Ste^{2}l-li^2-nu^{5}r(ne^{2}r)'vi^{2}s(wi^{2}s). From *stella,* a star, and *nervus,* a sinew. Fr., *stellinervé.* Of a leaf, having the veins radiating from the centre. [α, 35.]

STELLULA (Lat.), n. f. Ste^{2}l'lu^{2}l(lu^{4}l)-a^3. Dim. of *stella,* a star. Fr., *stellule.* Ger., *Sternchen.* A rosette ; in some mosses, a collection of leaves terminating the stem. [α, 35.]—**Stellulæ Verheynii.** Fr., *étoiles de Verheyen.* The stellular radicles of the venulæ interlobulares of the kidney. [L, 57 (α, 14).]

STELLUNG (Ger.), n. Ste^{2}l'lun^2. See POSITION.—**Bloss'.** See EXPOSURE.—**Electionss'.** See POSITION *of election.*—**Hinterhaupts'.** See *Vertex* PRESENTATION.—**Hinterscheitels'.** That form of obliquity of the fœtal head, during parturition, in which the occiput is situated in the axis of the pelvic canal. [A, 15.]—**Kindess'.** See POSITION *of the fœtus.*

STELZBEIN (Ger.), n. Ste^{2}lts'bin. An artificial leg. [E.]

STELZFUSS (Ger.), n. Ste^{2}lts'fus. An artificial foot. [E.]

STEM, n. Ste^{2}m. Gr., καυλός. Lat., *caulis.* Fr., *étui cortical.* Ger., *Stengel, Stamm.* 1. The ascending axis of a plant ; the leaf-bearing part of the axis. [α, 35.] 2. A stalk ; any stalk-like structure or formation. [α, 48.]—**Brain-s.** Ger., *Gehirnstamm.* The brain, less the pallium (or fissured portion) and the cerebrum. [J (K).]—**Gland s.** The duct of a gland.—**Herbaceous s.** A s. that

dies down to the ground at the close of the season. [α, 35.]—**Intra-uterine s.** See *Intra-uterine* PESSARY.—**Leaf-s.** A s., such as a trunk, culm, caudex, etc., having the internodes fully developed and ascending crowned with leaves. [α, 35.]—**Primary s.** The central axis or trunk of a plant. [α, 35.]—**Primitive arterial s.** See *Aortic* BULB.—**Scale-s.** A s. in which the internodes, undeveloped (as in the corm and bulb) or only partially developed (as in the creeper), usually bear undeveloped leaves (scales). [α, 35.]—**S. of the encephalon.** See CAUDEX *cerebri*.—**S. of a hair.** See HAIR-*shaft*.

STEMMA (Lat.), n. n. Ste2m'ma3. Gen., *stem'matos* (*-atis*). Gr., *στέμμα* (from *στέφειν*, to encircle). Fr., *stemmate*. See OCELLUS (4th def.).

STEMMHANGEN (Ger.), n. Ste2m'ha3n2n-e2n. In cinesitherapy, the forward position of the body in which it is suspended by the arms, the soles of the feet resting firmly against a fixed surface. [L, 57 (α, 14).]

STEMODIA (Lat.), n. f. Ste2m(stam)-od'i2-a3. For *Stemodiacra* (from *στήμων*, a thread, *δίς*, two, and *ἄκρον*, a point). Fr., *stémodie*. A genus of the *Scrophulariaceæ*. [α, 35.]—**S. maritima.** Bastard germander; a bitter undershrub growing in the West Indies; used in indigestion. [α, 35.]

STEMONA (Lat.), n. f. Ste2m(stam)'o2n-a3. From *στήμων*, a thread. Fr., *stémona*. A genus of the *Liliaceæ*. [α, 35.]—**S. tuberosa.** A Cochin-China species. The tubers are used as a demulcent and pectoral. [α, 35.]

STEMPEL (Ger.), n. Ste2mp'e2l. See PISTIL.—**S'boden.** See GYNOBASE.—**S'decke.** See GYNOSTEGIUM.—**S'fuss.** See PODOGYNE.—**S'haube.** See GYNOSTEGIUM.—**S'hülle.** See PERIGYNIUM.—**S'polster.** See GYNOBASE.—**S'stiel, S'träger.** See GYNOPHORE (1st def.).

STENAGMA (Lat.), n. n. Ste2n-a2g(a3g)'ma3. Gen., *-ag'matos* (*-atis*). Gr., *στέναγμα* (from *στενάζειν*, to sigh). See SIGH.

STENAGMUS (Lat.), n. m. Ste2n-a2g(a3g)'mu3s(mu4s). Gr., *στεναγμός*. See SIGHING.

STENGEL (Ger.), n. Ste2n2'e2l. See CAULIS and STEM.—**Haupts'.** The axis of a plant, the primary stalk or stem. [α, 35.]—**S'sprosse.** See STOLON.—**S'treibend.** See CAULESCENT.

STENOBREGMATE, adj. Ste2n-o-bre2g'mat. From *στενός*, narrow, and *βρέγμα*, the bregma. Having the upper fore part of the head narrow. [α, 48.]

STENOCARDIA (Lat.), n. f. Ste2n-o(o3)-ka3rd'i2-a3. From *στενός*, narrow, and *καρδία*, the heart. Ger., *Stenocardie*. See ANGINA PECTORIS.

STENOCARPINE, n. Ste2n-o-ka3rp'en. See GLEDITSCHINE.

STENOCEPHALISM, STENOCEPHALY, n's. Ste2n-o-se2f'-a2l-i2zm, -i2. From *στενός*, narrow, and *κεφαλή*, the head. Fr., *sténocéphalie*. Ger., *Stenokephalie*. A condition in which one of the diameters of the head is unusually short. [α, 34.]

STENOCHASMUS (Lat.), adj. Sten(ste2n)-o(o3)-ka2z(ch2a3s)'-mu3s(mu4s). From *στενός*, narrow, and *χασμός*, an incision. Having lines drawn from the punctum alæ vomeris to the punctum spinæ nasalis posterioris and to the punctum foraminis magni anterius respectively intersecting at an angle of from 74° to 94°. [Lissauer, "Arch. f. Anthrop.," xv, Supp. (α, 50); α, 48.]

STENOCHORIA (Lat.), n. f. Sten(ste2n)-o(o3)-kor(cho2r)'i2-a3. Gr., *στενοχωρία* (from *στενός*, narrow, and *χώρα*, a place). Ger., *Stenochorie*. Contraction in general. [A, 301 (α, 34).]—**S. sacci lacrimalis.** Narrowing of the calibre of the lacrymal sac and nasal duct. [F.]

STENOCORIASIS (Lat.), n. f. Sten(ste2n)-o(o3)-ko2r-i(i2)'a2s-(a3s)-i2s. Gen., *-a'seos* (*-i'asis*). Gr., *στενοκορίασις* (from *στενός*, narrow, and *κόρη*, the pupil). Fr., *sténocoriase*. Contraction of the pupil. [L, 50 (α, 14).]

STENOCROTAPHY, n. Ste2n-o-kro2t'a2f-i2. From *στενός*, narrow, and *κρόταφος*, the temple. Fr., *sténocrotaphie*. Ger., *Stenokrotaphie*. A narrowing of the temporal region of the skull, due to the approximation of the squamous portion of the temporal bone to the coronal edge of the frontal bone, by which the anterior lateral angle of the parietal bone and the corresponding part of the greater wing of the sphenoid bone become pointed. The extension of the pterion (sutura spheno-parietalis) is from 3 to 7 mm. S. is also known by the narrowing of the great wing of the sphenoid itself. ["Arch. f. Anthrop.," xx, p. 37 (α, 50).]

STENOMYCTERIA (Lat.), n. f. Ste2n-o(o3)-mi2kt(mu6kt)-e-(a)'ri2-a3. From *στενός*, narrow, and *μυκτήρ*, the nose. Contraction of the nasal passages. [E.]

STENONIAN, STENONINE, adj's. Ste2n-on'i2-a2n, ste2n'-o2n-in. Named from N. Stenson (Latinized as Stenonianus), a Danish anatomist. [α, 48.]

STENOPÆIC, adj. Ste2n-o2p-e'i2k. From *στενός*, narrow, and *ὀπαῖος*, containing a hole. Fr., *sténopéique*. Ger., *stenopäisch*. Admitting light through a small opening or narrow slit. [F.]

STENOSE (Ger.), n. Stan-oz'e2. See STENOSIS.—**Kropfs'.** Laryngeal stenosis caused by goitre. [α, 34.]—**Narbens'.** Cicatricial stenosis.

STENOSIS (Lat.), n. f. Ste2n-os'i3s. Gen., *-os'eos* (*-is*). Gr., *στένωσις* (from *στενοῦν*, to straighten). Fr., *sténose*. Ger., *Stenose*, *Verengerung*. A constriction; the narrowing of a canal, passage, or aperture. [D; E.]—**Aortic s.** S. of the aortic valves, of the aortic orifice, or of the aorta itself. [D, 90.]—**Cardiac s.** Ger., *Herzklemme*. S. of the aortic, mitral, tricuspid, or pulmonary aperture. [α, 34.]—**Cicatricial s.** Ger., *Narbenstenose*. S. caused by a cicatrix. [α, 34.]—**Granulation s.** S. caused by an encroachment of granulations or by their contraction. [α, 34.]—**Mitral s.** S. of the mitral valve or orifice or of both. [D.]—**Post-tracheotomic s.** Granulation s. of the trachea after tracheotomy. [Ross, "Edinb. Med. Jour.," Mar., 1883 (E).]—**Subaortic s.** See *Aortic s.*

STENOSTEGNOSIS (Lat.), **STENOSTENOSIS** (Lat.), n's f. Ste2n-o(o3)-ste2g-nos'i2s, -ste2n-os'i2s. Gen., *-nos'eos* (*-is*), *-os'eos* (*-is*). From *Stenonianus* (see STENONIAN), and *στένωσις*, stenosis. Fr., *sténostegnose*. Stenosis of Stenson's duct. [E.]

STENOSTOMIA (Lat.), n. f. Ste2n-o(o3)-stom(sto2m)'i2-a3. From *στενός*, narrow, and *στόμα*, the mouth. Fr., *sténostomie*. Ger., *Stenostomie*. Stenosis of the mouth. [E.]

STENOTHORAX (Lat.), n. m. Sten(ste2n)-o(o3)-thor'a2x(a3x). Gen., *-ac'os* (*-ac'is*). From *στενός*, narrow, and *θώραξ* (see THORAX). A pigeon-breasted person. [L, 50 (α, 48).]

STEPHANIA (Lat.), n. f. Ste2f-an(a3n)'i2-a3. Fr., *stéphanie*. A genus of the *Menispermaceæ*. [α, 35.]—**S. capitata.** A Java shrub. All parts contain a viscid mucus. The leaves are used as a pectoral. [α, 35.]—**S. rotunda.** A Cochin-China species. The rootstock is used like that of *Aristolochia rotunda*. [α, 35.]

STEPHANIC, adj. Ste2f-a2n'i2k. Pertaining to the stephanion. [α, 48.]

STEPHANION (Lat.), n. n. Ste2f-a2n(a3n)'i2-o2n. Gr., *στεφάνιον* (dim. of *στέφανος*, a crown). The point where the coronal suture crosses the temporal ridge. [C.]

STEPHANURUS (Lat.), n. m. Ste2f-a2n(a3n)-u2r(ur)'u3s(u4s). From *στέφανος*, a crown, and *οὐρά*, the tail. Fr., *stéphanure*. Of Diesing, a genus of nematoid parasites, of the *Strongylidæ*. [L, 16, 18.]—**S. dentatus.** A species found in the adipose tissue of the hog, believed to be the cause of "hog cholera." [L, 24.]

STERBEND (Ger.), adj. Ste2rb'e2nd. See MORIBUND.

STERBLICHKEIT (Ger.), n. Ste2rb'li2ch2-kit. See MORTALITY.

STERBLING (Ger.), n. Ste2rb'li2n2. A still-born child. [L, 46 (α, 21).]

STERCOBILIN, n. Stu5rk-o-bil'i2n. Fr., *s.* Ger., *S.* A coloring matter found in the fæces; a product of change in the bile pigments thought by some to be identical with hydrobilirubin. [α, 38.]

STERCO-ENTÉRECTASIE (Fr.), n. Ste2r-ko-a3n2-ta-re2k-ta3-z-ze. Dilatation of the intestines by fæces; one of Piorry's divisions of constipation that he considered due to insufficient alimentation. [α, 34.]

STERCORACEOUS, adj. Stu5rk-o2r-a'shu3s. From *stercus*, excrement. Fr., *stercoral*, *stercoraire*. Ger., *kothig*. Pertaining to, of the nature of, or containing fæces; caused by the retention of fæces. [D.]

STERCORÆMIA (Lat.), n. f. Stu5rk(ste2rk)-o2r-em'(a3'e2m)-i2-a3. From *stercus*, excrement, and *αἷμα*, blood. See STERCORÉMIE.

STERCORAL, adj. Stu5rk'o2-r'l. See STERCORACEOUS.

STERCORÉMIE (Fr.), n. Ste2r-kor-a-me. Of Bouchard, a state of blood-poisoning supposed to be due to the absorption of excretory alkaloids from the intestinal contents. [Dujardin-Beaumetz, "Gaz. hebd. de méd. et de chir.," June 13, 1884, p. 403.] Cf. COPRÆMIA and LEUCOMAINE.

STERCORIN, n. Stu5rk'o2r-i2n. Fr., *stercorine*. A crystalline substance obtained from fæces, similar to cholesterin, from which Flint supposed it to be derived. [B, 93 (α, 14); K.] Cf. EXCRETIN.

STERCULIA (Lat.), n. f. Stu5rk(ste2rk)-u2l(u4l)'i2-a3. From *Sterculius*, the god presiding over manuring. Fr., *sterculier*. Ger., *Stinkbaum*. A genus of trees giving name to an order (*Sterculiaceæ*; Fr., *sterculiacées*) of the *Malvales*. The *Sterculeæ*, or *Sterculieæ*, are a tribe of this order. [α, 35.]—**S. acuminata.** Fr., *sterculier à aiguillons*. See COLA *acuminata*.—**S. balanghas.** Ger., *länglichblättriger Stinkbaum*. A species found in the Moluccas. The bark is used as an emmenagogue. The seeds, called Malabar nuts, are edible and yield an oil. [α, 35.]—**S. cola.** See COLA *acuminata*.—**S. fœtida.** Fr., *arbre* (ou *bois*) *puant*. Ger., *fingerblättriger Stinkbaum*, *Kothbaum*. An East Indian species. The leaves and bark are aperient, diuretic, and diaphoretic, and a decoction of the mucilaginous, astringent fruit is used in gonorrhœa. The oily seeds are edible if roasted, but, uncooked, produce nausea and vertigo. [α, 35.]—**S. tomentosa.** Fr., *sterculier cotonneux*. Ger., *filziger Stinkbaum*. A Senegambian species. The seeds are used like those of *Cola acuminata*. [α, 35.]—**S. urceolata.** Ger., *krugkelchiger Stinkbaum*. A species found in the Molucca and Sunda Islands. The bark is used as an emmenagogue, and the root externally in cephalalgia. [α, 35.]—**S. urens.** Ger., *brennender Stinkbaum*. Kuteera-gum plant; an East Indian species. The astringent bark exudes a gum resembling tragacanth, and a sort of coffee is prepared from the seeds. [α, 35.]

STERCUS (Lat.), n. n. Stu5rk(ste2rk)'u3s(u4s). Gen., *sterc'oris*. See DUNG.—**Dæmonis s.** An old name for asphalt. [A, 325.]—**S. camelorum.** Camel's dung; once official. Egyptian sal-ammoniac is made from the soot of the burnt dung. [α, 35.]—**S. caninum album.** See ALBUM *græcum*.—**S. cuculi.** The excrement of the cuckoo; formerly official. [α, 35.]—**S. Diaboli.** See ASAFŒTIDA.—**S. nigrum.** See ALBUM *nigrum*.

STERELMINTHA (Lat.), n. n. pl. Ste2r-e2l-mi2nth'a3. From *στερεός*, hard, and *ἕλμινς*, a worm. The solid or parenchymatous worms, constituting a class of entozoa characterized by having the nutrient cavities or canals excavated in the parenchyma of the body. [L, 27.]

STEREOCHEMIE (Ger.), n. Star'a-o-ch2am-e''. Fr., *stéréochimie*. That branch of chemistry which deals with the spatial arrangement of the atoms in the molecule. [B, 270 (α, 48).] Cf. *Physical* ISOMERISM.

STEREOCYST, n. Ste2r'e2-o-si2st. Lat., *stereocystis* (from στερεός, stiff, and κύστις, a bladder). Fr., *stéréocyste*. Ger., *Fettbalggeschwulst*. A cyst containing fatty matter. [L, 50 (α, 14).]

STÉRÉOGNOSTIQUE (Fr.), adj. Sta-ra-o2g-no2s-tek. Relating to the sense of touch. [H. Hoffmann, "Thèse de Strasbourg," 1883; "Arch. de neurol.," Jan., 1885, p. 134.]

STEREOM, n. Ste2r'e2-om. From στερεός, stiff. Fr., *stéréome*. The elements, such as fibres, that give strength to a fibro-vascular bundle. [α, 35.] Cf. MESTOM.

STEREOMONOSCOPE, n. Ste2r-e2-o-mo2n'o-skop. From στερεός, solid, μόνος, alone, and σκοπεῖν, to examine. Fr., *stéréomonoscope*. Ger., *Stereomonoskop*. An instrument devised by Claudet, consisting of a stereoscope in which, by means of two lenses, two stereoscopic images are thrown upon the same spot of a ground-glass plate. When this glass plate is looked at with both eyes, each eye sees only the corresponding image. [F.]

STEREOPHANTOSCOPE, n. Ste2r-e2-o-fa2nt'o-skop. From στερεός, solid, φαντός, visible, and σκοπεῖν, to examine. Fr., *stéréophantoscope*. Ger., *Stereophantoskop*. A panorama-stereoscope in which, instead of pictures, rotating stroboscopic discs are inserted.

STEREOPHOROSCOPE, n. Ste2r-e2-o-fo2r'o-skop. From στερεός, solid, φορός, bearing, and σκοπεῖν, to examine. Fr., *stéréophoroscope*. Ger., *Stereophoroskop*. An instrument devised by Czermak and used in investigating the theories of visual perceptions with special reference to the effects produced on different zones of the retina. It consists of the ordinary lenticular stereoscope, in which both images are pasted by the side of each other on the same piece of paper. These strips of paper are fastened on the lateral surfaces of a many-sided prism rotating round a horizontal axis. Around the prism, several inches from the images, runs a girdle of pieces of pasteboard in which the necessary openings have been cut. Outside of the girdle is fastened the prismatic combination of a Brewster's stereoscope. [F.]

STEREOSCOPE, n. Ste2r'e2-o-skop. From στερεός, solid, and σκοπεῖν, to examine. Fr., *stéréoscope*. Ger., *Stereoskop*. An apparatus employed to produce the impression of projection in a picture, so that the observer, looking with both eyes, sees what appears to him the actual things represented instead of a picture on a flat surface.—**Brewster's prismatic s.** A s. consisting of two prisms with convex surfaces, having their refracting angles turned inward, one before each eye, through which the person being examined must look with parallel visual lines. In the median plane between the two prisms is placed a blackened screen, which reaches nearly to the points of fixation. The eyes are correctly accommodated by the convexity of the prismatic surface, and the images of the two objects of fixation are fused into one by the action of the prisms. [F.]—**Lenticular s.** A s. having, instead of convex prisms, ordinary convex lenses of about 200 mm. focus. In other respects it resembles Brewster's prismatic s. [F.]—**Wheatstone's mirror s.** A s. which consists of two plane mirrors joined together at right angles, in which are reflected the projected images corresponding to the right and left eye, which are placed at the limit of distinct vision in front of the mirrors at an angle of 45° to their reflecting surface. The two eyes then see the reflected images united at one point. [F.]

STÉRÉOSCOPE (Fr.), n. Sta-ra-o-skop. See STEREOSCOPE.—**S. à charnière.** Ger., *Spiegel-Stereoskop*. A stereoscope devised by Javal for the subjective determination of the squinting angle. Around a vertical hinge two mirrors may be rotated. Each of these mirrors is firmly fastened at its other end at an angle of 45° with a plate or tablet. Upon the inner surface of the latter are placed the objects of fixation, which are to be reflected by the mirrors. If an observer looks with one eye toward one mirror and the other toward the other, then by a proper arrangement of the angle of the hinge he can fuse the two reflected images. If this angle is 90° the eyes must stand parallel, if it is greater than 90° they must diverge, if it is smaller they must converge, in order to see binocularly. The position of the mirrors in which each eye is directed toward one of the images is thus found, and the included angle may be read off on a graduated arc. ["Ann. d'ocul.," liv, p. 14, lxv, p. 124 (F).]

STEREOSPERMUM (Lat.), n. n. Ste2r-e2-o(o3)-spu5rm-(spe2rm)'u3m(u4m). From στερεός, solid, and σπέρμα, a seed. Fr., *stéréosperme*. A genus of the *Bignoniaceæ*. [α, 35.]—**S. chelonoides.** An East Indian species. The root is used in fevers and snake-bites, and the bark in menorrhagia. [α, 35.]—**S. suaveolens.** A tree of southern India. The roots are tonic. [α, 35.]

STERESIS (Lat.), n. f. Ste2r-e(a)'si2s. Gen., *-cs'eos* (*-is*). Gr., στέρησις (from στερεῖν, to deprive). Ger., *Beraubung*. Deprivation; negation. [A, 311, 322 (α, 48).]

STERETICUS (Lat.), adj. Ste2r-e2t(at)'i2k-u3s(u4s). Gr., στερητικός. Ger., *beraubend*. Privative, negative. [A, 311, 322 (α, 48).]

STERIGMA (Lat.), n. n. Ste2r(star)-i2g'ma3. Gen., *-ig'matos* (*atis*). Gr., στήριγμα (from στηρίζειν, to set fast). Fr., *stérigmate*, *stérigme*. Ger., *Sterigme*, *Stützschlauch*. 1. A prolongation of a leaf-blade down on the stem by decurrence. 2. In *Fungi* and lichens, a slender filamentous process (stalk) giving origin to the spores or spermatia; in a narrow sense, as distinguished from arthrosterigma, such a process when not distinctly articulated and when producing spermatia from its apex only. [α, 35.]

STERIGMATOCYSTIS (Lat.), n. f. Ste2r(star)-i2g-ma2t(ma3t)-o(o3)-si2st(ku6st)'i2s. Gen., *-cyst'eos*, *-cyst'ios* (*-cyst'is*). From στήριγμα, a support, and κύστις, a bladder. A genus of hyphomycetous *Fungi*. Many of the so-called species are stages of *Aspergillus*. [α, 35.]—**S. antacustica.** Of Cramer, a species found in the external auditory canal; according to some, a conidial stage of *Eurotium aspergillus niger*. [α, 35.]

STERILE, adj. Ste2r'i2l. Gr., στεῖρος. Lat., *sterilis*. Fr., *stérile*. Ger., *unfruchtbar*. 1. Barren, unfruitful, unproductive. [α, 35.] See also EFFETE. 2. Freed from living micro-organisms.

STERILITY, n. Ste2r-i2l'i2t-i2. Gr., στείρωσις (from στεῖρος, barren). Lat., *sterilitas*, *impotentia generandi*. Fr., *stérilite*. Ger., *Sterilität*, *Unfruchtbarkeit*. The condition of being sterile. [α, 35.]—**Facultative s.** Ger., *facultative Sterilität*. The prevention of conception. [C. Hasse, "Ctrlbl. f. d. ges. Therap.," June, 1886, p. 277.]—**Idiopathic s.** See AZOOSPERMATISM.—**Relative s.** S. in consequence of the fertilizing element being wanting or of the ovum not coming to maturity, there being no abnormal condition of the sexual organs. [α, 34.]

STERILIZATION, n. Ste2r-i2l-i2z-a'shu4n. Fr., *stérilisation*. Ger., *Sterilisirung*. The process of rendering sterile by the destruction of all living matter on or within a substance. [α, 34.]—**Hueppe's method of s.** The exposure of the substance to be sterilized to a temperature of from 52° to 65° C. for one or two hours so as to destroy the living bacteria. The process is repeated at periods of 24 and 48 hours, so as to destroy any germinated spores that may have resisted these temperatures. [α, 34.]

STERILIZED, adj. Ste2r'i2l-izd. Deprived of all living matter; rendered sterile. [α, 34.]

STERILIZER, n. Ste2r'i2l-iz-u5r. Ger., *Sterilisator*. An apparatus for effecting sterilization. Seibert's milk-s. consists of a circular tray having a central handle by which it may be carried and sufficient capacity for holding eight specially constructed bottles. It is placed in a covered kettle for steam sterilization. ["N. Y. Med. Jour.," Feb. 15, 1890, p. 172 (α, 34).]

STERN (Ger.), n. Ste2rn. See ASTER (2d def.).

STERNAD, adv. Stu5rn'a2d. Toward the sternal aspect.

STERNAL, adj. Stu5rn'n'l. Lat., *sternalis* (from *sternum* [*q. v.*]). 1. Pertaining to the sternum. [L.] 2. Of Barclay, see VENTRAL.

STERNALGIA (Lat.), n. f. Stu5rn(ste2rn)-a2lj(a3lg)'i2-a3. From στέρνον, the sternum, and ἄλγος, pain. Fr., *sternalgie*. Ger., *Brustbeinschmerz*. Pain in or about the sternum. [L, 41 (α, 14).]

STERNALIS (Lat.), adj. Stu5rn(ste2rn)-al(a3l)'i2s. See STERNAL; as a n. (Fr., *sternal*), (1) a muscle connected with the sternum, especially the s. brutorum; (2) see TRIANGULARIS *sterni*.—**S. brutorum, S. rectus, S. thoracicus.** An anomalous muscle on the anterior surface of the sternum connected with the sterno-cleido-mastoideus, pectoralis major, and rectus abdominis. [L, 332.]

STERNANIS (Ger.), n. Ste2rn'a3n-es. The genus *Illicium*; also the fruit (star-anise) of *Illicium anisatum*. [α, 35.]—**S'samen.** See STAR-ANISE.

STERNBERG (Ger.), n. Ste2rn'be2rg. A place in Bohemia where there are alkaline and chalybeate springs. [L, 49, 57 (α, 14).]

STERNBERGIA (Lat.), n. f. Ste2rn-be2rg'i2-a3. From *Sternberg*, a German botanist. Fr., *sternbergie*. A genus of bulbous plants. The *Sternbergieæ* are a subtribe of the *Amaryllineæ*. [α, 35.]—**S. lutea.** Fr., *faux safran*, *narcisse d'automne*. Winter-daffodil; a native of the Orient and southern Europe. The purgative root, *radix lilio-narcissi*, was formerly used as a maturant.

STERNDISTEL (Ger.), n. Ste2rn'di2st-e2l. See CALCITRAPA.

STERNEBER, n. Stu5rn'e2b-u5r. Lat., *sternebra* (see STERNUM and VERTEBRA). Fr., *sternèbre*. A subdivision or segment of the sternum. [L, 50 (α, 14).]

STERNO-ABDOMINALIS (Lat.), n. m. Stu5rn(ste2rn)-o(o3)-a2b(a3b)-do2m(dom)-i2n-al(a3l)'i2s. Of Rosenmüller, the triangularis sterni and transversus abdominis muscles considered as a single structure. [L, 31 (α, 50).]

STERNO-APONEUROTICUS (Lat.), n. m. Stu5rn(ste2rn)''-o(o3)-a2p(a3p)-o(o2)-nu2r-o2t(ot)'i2k-u3s(u4s). From στέρνον, the sternum, and ἀπονεύρωσις, a tendon. The portion of the pectoralis superficialis that is attached to the fascia of the arm. [L, 13.]

STERNOCERVICALIS (Lat.), n. m. Stu5rn(ste2rn)''o(o3)-su5r(he2r)-vi2k(wik)-al(a3l)'i2s. From *sternum* (*q. v.*), and *cervix*, the neck. An anomalous variety of the costo-fascialis muscle arising from the sternum. [L, 31.]

STERNO-CLAVICULAR, adj. Stu5rn-o-kla2v-i2k'u2l-a3r. Lat., *sternoclavicularis*. Pertaining to the sternum and the clavicle.

STERNOCLAVICULARIS (Lat.), adj. Stu5rn(ste2rn)-o(o3)-kla2(kla3)-vi2k(wi2k)-u2(u4)-la(la3)'ri2s. See STERNO-CLAVICULAR; as a n. m., an anomalous muscle arising from the sternum or from the cartilage of the first rib and inserted into the clavicle, internally to the subclavius.—**S. anticus.** See *S.*—**S. posticus.** An anomalous muscle arising from the posterior surface of the manubrium sterni and inserted into the clavicle. [L, 332.]—**S. superior.** An anomalous muscle arising from the upper part of the sternum and inserted into the clavicle. [L, 31, 332.]

STERNO-CLAVIO-HUMÉRAL (Fr.), n. Ste2r-no-kla3-ve-o-u6-ma-ra3l. See PECTORALIS *major*.

STERNO-CLAVIO-MASTOÏDIEN (Fr.), n. Ste2r-no-kla3-ve-o-ma3st-o-e-de-a3n. See STERNO-CLEIDO-MASTOID.

STERNOCLEIDOBRACHIALIS (Lat.), n. m. Stu5rn-(ste2rn)'''o(o3)-klid''(kle2''i2d)-o(o3)-brak(bra3ch2)-i2-al(a3l)'i2s. From στέρνον, the sternum, κλειδίον, the clavicle, and βραχίων, the arm. See PECTORALIS *major*.

STERNO-CLEIDO-HUMERAL, adj. Stu5rn'''o-klid''o-hu2m'e2-r'l. For deriv., see STERNUM, CLEIDION, and HUMERUS. Pertaining to the sternum, clavicle, and humerus. [L.]

STERNOCLEIDOHYOIDEUS (Lat.), n. m. Stu5rn(ste2rn)'''-o(o3)-klid''(kle2''i2d)-o(o3)-hi(hu6)-o(o2)-i2d(e)'e2-u3s(u4s). For deriv., see STERNUM, CLEIDION, and HYOID. See STERNOHYOIDEUS.

STERNO-CLEIDO-MASTOID, n. Stu^{5}rn‴o-klid″o-ma^{2}st′oid. For deriv., see STERNUM, CLEIDION, and MASTOID. Lat., *sterno-cleidomastoideus.* Fr., *sterno-cleido-mastoïdien.* Ger., *Kopfneigemuskel, Kopfnickermuskel, Brustschlüsselbeinzitzenfortsatzmuskel.* A muscle arising from the anterior surface of the manubrium and the upper side of the inner third of the clavicle, and inserted into the external surface of the mastoid process of the temporal bone and the superior curved line on the occipital bone. The two s.-c.-m's acting together bend the head forward or elevate the upper portion of the thorax. When one of them acts separately, it flexes and rotates the head. This has been described by some anatomists as two muscles, viz., the sternomastoideus and cleidomastoideus. [L.]

STERNOCOSTALIS [Coues] (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-ko^{2}st-al(a^{3}l)′i^{2}s. From *sternum* (*q. v.*), and *costa*, a rib. Fr., *sterno-costal.* See TRIANGULARIS *sterni.*

STERNO-COSTO-CLAVI-HUMÉRAL (Fr.), n. Ste^{2}r-no-cos-to-kla-ve-u^6-ma-ra^{3}l. See PECTORALIS *major.*

STERNOCOSTOCORACOIDEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)‴o(o^3)-ko^{2}st″o(o^3)-ko^{2}r-a^{2}k(a^{3}k)-o(o^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). For deriv., see STERNUM, COSTA, and CORACOID. See PECTORALIS *minimus.*

STERNOCOSTOEPITROCHLEARIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-ko^{2}st-o(o^3)-e^{2}p-i^2-tro^{2}k(tro^{2}ch^2)-le^2-ar(a^{3}r)′i^{2}s. For deriv., see STERNUM, COSTO, and EPITROCHLEA. The chondroepitrochlearis when it is inserted into the condyle of the humerus. [L, 332.]

STERNOCOSTOFASCIALIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-ko^{2}st-o(o^3)-fa^{2}s(fa^{3}s)-si^2(ki^2)-al(a^{3}l)′i^{2}s. From *sternum*, the sternum, *costa*, a rib, and *fascia*, a band. See STERNOCERVICALIS.

STERNOCOSTOGLOSSUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)‴o(o^3)-ko^{2}st″o(o^3)-glo^{2}s(glos)′su^{3}s(su^{4}s). From *sternum* (*q. v.*), *costa*, a rib, and γλῶσσα, the tongue. See STERNOGLOSSUS.

STERNOCOSTOHYOIDEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-ko^{2}st-o(o^3)-hi(hu^6)-o(o^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). For deriv., see STERNUM, COSTO, and HYOID. See STERNOHYOIDEUS.

STERNOCOSTOTHYREOIDEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)‴o(o^3)-ko^{2}st″o(o^3)-thir(thu^{6}r)-e^2-o(o^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). For deriv., see STERNUM, COSTA, and THYREOID. See STERNOTHYREOIDEUS.

STERNODIDYMUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-di^{2}d′i^{2}m(u^{6}m)-u^{3}s(u^{4}s). From στέρνον, the sternum, and δίδυμος, double. See STENOPAGUS.

STERNO-DORSAL, adj. Stu^{5}rn-o-do^{2}r′s′l. From στέρνον, the chest, and *dorsum*, the back. Fr., *s.-d.* Pertaining to or extending between the sternum and the back. [L.]

STERNODYNIA (Lat.), n. f. Stu^{5}rn(ste^{2}rn)-o(o^3)-di^{2}n(du^{6}n)′i^2-a^3. From στέρνον, the chest, and ὀδύνη, pain. Fr., *sternodynie.* See STERNALGIA and ANGINA PECTORIS.

STERNOFASCIALIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-fa^{2}s(fa^{3}s)-si^2(ki^2)-al(a^{3}l)′is. For deriv., see STERNUM and FASCIA. See STERNOCERVICALIS.

STERNOGLOSSUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-glo^{2}s(glos)′su^{3}s(su^{4}s). From στέρνον, the sternum, and γλῶσσα, the tongue. A muscle attached to the sternum and tongue, found in animals with retractile tongues, and occasionally in man. [L.]

STERNOHUMERALIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-hu^{2}m(hu^{4}m)-e^{2}r-al(a^{3}l)′i^{2}s. For deriv., see STERNUM and HUMERUS. Fr., *sterno-huméral.* 1. In solipeds, the portion of the pectoralis superficialis that is attached to the anterior ridge of the humerus. [L, 13.] 2. Of Chaussier, see PECTORALIS *major.*—**S. magnus.** See STERNOTROCHINEUS.

STERNOHYOIDEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-hi(hu^6)-o(o^3)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). For deriv., see STERNUM and HYOID. Fr., *sterno-hyoïdien.* Ger., *Brustbeinzungenbeinmuskel.* A muscle which arises from the sternal extremity of the clavicle, from the posterior sterno-clavicular ligament, and from the posterior surface of the sternum and is inserted into the lower margin of the body of the hyoid bone. [L, 31, 142, 332.]

STERNO-MASTOID, adj. Stu^{5}rn-o-ma^{2}st′oid. Pertaining to the sternum and to the mastoid process of the temporal bone. Cf. STERNO-CLEIDO-MASTOID.

STERNOMASTOIDEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-ma^{2}st(ma^{3}st)-o(o^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). Fr., *sterno-mastoïdien.* 1. See STERNO-CLEIDO-MASTOID. 2. That portion of the sterno-cleido-mastoid which arises from the sternum (cf. CLEIDOMASTOIDEUS). [L.]

STERNOMAXILLARIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-ma^{2}x(ma^{3}x)-i^{2}l-lar(la^{3}r)′i^{2}s. For deriv., see STERNUM and MAXILLA. 1. An anomalous offshoot of the sterno-cleido-mastoideus inserted into the inferior maxilla. 2. The analogue of the sternomastoideus in quadrupeds. [L, 13.]

STERNOMPHALODYMIA (Lat.), n. f. Stu^{5}rn(ste^{2}rn)-o^{2}mf‴-al(a^{3}l)-o(o^3)-di^{2}m(du^{6}m)′i^2-a^3. From στέρνον, the sternum, ὀμφαλός, the navel, and δίδυμος, twin. See STERNOPAGUS.

STERNON (Lat.), n. n. Stu^{5}rn(ste^{2}rn)′o^{2}n. See STERNUM.

STERNO-OMOIDEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-om-o(o^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). From στέρνον, the sternum, ὦμος, the shoulder, and εἶδος, resemblance. See STERNOCLAVICULARIS *superior.*

STERNOPAGIA (Lat.), n. f. Stu^{5}rn(ste^{2}rn)-o(o^3)-paj(pa^{3}g)′i^2-a^3. Fr., *sternopagie.* The condition of a sternopagus. [α, 14.]

STERNOPAGUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o^{2}p′a^{2}g(a^{3}g)-u^{3}s(u^{4}s). From στέρνον, the chest, and πηγνύναι, to make fast. Fr., *sternopage.* Of I. Geoffroy St.-Hilaire, a monster composed of two individuals having a common umbilicus and united face to face for the entire length of the thorax. [α, 34.] Cf. XIPHOPAGUS.

STERNOPETROSOPHARYNGEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)‴o(o^3)-pe^{2}t-ros″o(o^3)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). For deriv., see STERNUM, PETROUS, and PHARYNX. An anomalous muscle arising from the anterior surface of the manubrium, internally to the right sterno-cleido-mastoid, by a tendon ½ inch wide, and attached by three heads, the first being inserted into the vaginal process of the temporal bone, while the second is blended with the pharyngeal aponeurosis and the third with the lower fibres of the constrictor pharyngis superior. [Rennie, "Jour. of Anat. and Phys.," Jan., 1886 (L).]

STERNOPRÆSCAPULARIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-pre(pra^3-e^2)-ska^{2}p(ska^{3}p)-u^{2}l(u^{4}l)-a(a^3)′ri^{2}s. From *sternum* (*q. v.*), *præ*, before, and *scapula* (*q. v.*). The anterior portion of the pectoralis profundus. [L, 13.]

STERNOPUBIALIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-pu^{2}b(pub)-i^2-al(a^{3}l)′i^{2}s. For deriv., see STERNUM and PUBES. Fr., *sterno-pubien.* 1. Of Chaussier, see RECTUS *abdominis.* 2. The analogue of the rectus abdominis of man found in the lower mammals. [L.]

STERNORADIALIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-rad(ra^{3}d)-i^2-al(a^{3}l)′i^{2}s. For deriv., see STERNUM and RADIUS. See STERNO-APONEUROTICUS.

STERNOSCAPULARIS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-ske^{2}p(ska^{3}p)-u^{2}l(u^{4}l)-a(a^3)′ri^{2}s. For deriv., see STERNUM and SCAPULA. 1. An anomalous portion of the subclavius muscle inserted into the upper border of the scapula. 2. An anomalous muscle arising from the first rib and inserted into the coracoid process near the scapular notch. [L, 332.]

STERNOTHYREOHYOIDEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)‴o(o^3)-thir(thu^{6}r)-e(a)″o(o^3)-hi(hu^6)-o(o^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). For deriv., see STERNUM, THYREOID, and HYOID. Of Percivall, the sternohyoideus and the sternothyreoideus. [L, 13.]

STERNOTHYREOIDEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-thir(thu^{6}r)-e^2-o(o^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). From στέρνον, the sternum, and θυρεοειδής, shield-shaped. Fr., *sterno-thyroïdien.* Ger., *Brustschildknorpelmuskel, Kehlkopfniederzieher.* A muscle which arises from the posterior surface of the manubrium sterni and the first or second, or both, costal cartilages, and inserted into an oblique line of the ala of the thyreoid cartilage. [L, 31, 142, 332.]

STERNOTROCHINEUS (Lat.), n. m. Stu^{5}rn(ste^{2}rn)-o(o^3)-tro^{2}k(tro^{2}ch^2)-i^{2}n′e^2-u^{3}s(u^{4}s). For deriv., see STERNUM and TROCHINUS. The inferior portion of the pectoralis profundus in solipeds.

STERNOTRYPESIS (Lat.), n. f. Stu^{5}rn(ste^{2}rn)-o(o^3)-tri^{2}p(tru^{6}p)-e(a)′si^{2}s. Gen., *-es′eos (-is).* From στέρνον, the sternum, and τρύπησις, a boring. Fr., *sternotrypèse.* Perforation of the sternum. [L, 50 (α, 14).]

STERNO-XIPHOID, adj. Stu^{5}rn-o-zi^{2}f′oid. For deriv., see STERNUM and XIPHOID. Pertaining to the sternum and the ensiform cartilage. [α, 48.]

STERNUM (Lat.), n. n. Stu^{5}rn(ste^{2}rn)′u^{3}m(u^{4}m). Gr., στέρνον. Fr., *s.* Ger., *S., Brustbein.* The breast bone; a long, flat bone with which the true ribs and the clavicles articulate in front. From its general resemblance to a sword, its broad upper part has been called the manubrium, or præsternum; and the middle part, the gladiolus, mucro, or mesosternum. [A, 70.]—**Abdominal s.** See LINEA *alba* (1st def.).—**S. fissum.** See FISSURE *of the thorax.*

STERNUTAMENTUM (Lat.), n. n. Stu^{5}rn(ste^{2}rn)-u^{2}t(ut)-a^3-me^{2}nt′u^{3}m(u^{4}m). From *sternutare*, to sneeze. See SNEEZING and STERNUTATORY.

STERNUTATIO (Lat.), n. f. Stu^{5}rn(ste^{2}rn)-u^{2}t(ut)-a(a^3)′shi^2(ti^2)-o. Gen., *-on′is.* See SNEEZING.—**S. convulsiva.** Paroxysmal or spasmodic sneezing. The act of sneezing may be repeated many times before the paroxysm ends, and is accompanied by a profuse watery secretion from the nose. [D, 35.]

STERNUTATORY, adj. Stu^{5}rn-u^{2}t′a^{2}t-o-ri^2. From *sternutare*, to sneeze. Fr., *sternutatoire.* Pertaining to or promoting sneezing; errhine; as a n. (Lat., *sternutatorium*; Fr., *sternutatoire*; Ger., *Niesemittel*), a substance that causes or promotes sneezing. [α, 48.]

STEROCAROBIC ACID, n. Ster′o-ca^{2}r-ob′i^{2}k. A pale-brown acid found in caroba. ["Sentido Católico"; "Med. Rec.," Aug. 5, 1882, p. 163.]

STERTOR (Lat.), n. m. Stu^{5}rt(ste^{2}rt)′o^{2}r. Gen., *stertor′is.* From *stertere*, to snore. Fr., *sterteur, ronflement.* Ger., *Schnarchen.* See SNORING.

STERTOROUS, adj. Stu^{5}rt′o^{2}r-u^{3}s. Fr., *stertoreux.* Ger., *röchelnd, schnarchend.* Snoring; characterized by stertor. [D.]

STETHAL, n. Ste^{2}th′l. An alcohol, $C_{18}H_{38}O = C_{18}H_{37}.(OH)$, not yet obtained in a pure state, but occurring combined with fatty acids in spermaceti. [B, 3.]

STETHARTERITIS (Lat.), n. f. Ste^{2}th(stath)-a^{3}rt-e^{2}r(ar)-i(e)′ti^{2}s. Gen., *-it′idos (-idis).* From στῆθος, the chest, and ἀρτηρία, an artery. Fr., *stéthartérite.* Inflammation of the arteries of the chest. [L, 50 (α, 14).]

STETHOCATHARSIS (Lat.), n. f. Ste^{2}th(stath)-o(o^3)-ka^{2}th(ka^{3}th)-a^{3}rs′i^{2}s. Gen., *-ars′eos (-is).* From στῆθος, the chest, and κάθαρσις, a cleansing. Fr., *stéthocatharsie.* Expectoration.

STETHOCELE (Lat.), n. f. Ste^{2}th(stath)-o(o^3)-se(ka)′le(la): in Eng., ste^{2}th′o-sel. Gen., *-cel′es.* From στῆθος, the chest, and κήλη, a tumor. Fr., *stéthocèle.* See PNEUMONOCELE.

STETHOCELODYSPNŒA (Lat.), n. f. Ste^{2}th(stath)″o(o^3)-sel(kal)′o(o^3)-di^{2}s(du^{6}s)-pne′(pno^2′e^2)-a^3. From στῆθος, the chest, κήλη, a tumor, and δύσπνοια, dyspnœa. Fr., *stéthocélodyspnée.* Dyspnœa due to hernia of the lung. [L, 50 (α, 14).]

STETHOCHYSIS (Lat.), n. f. Ste^{2}th(stath)-o^{2}k(o^{2}ch^2)′i^2(u^6)-si^{2}s. Gen., *-chys′eos (-och′ysis).* From στῆθος, the chest, and χύσις, an effusion. Fr., *stéthochyse.* See HYDROTHORAX.

STETHODESMIS (Lat.), **STETHODESMIUM** (Lat.), n's f. and n. Ste^{2}th(stath)-o(o^3)-de^{2}s′mi^{2}s, -mi^2-u^{3}m(u^{4}m). From στῆθος,

the chest, and δεσμός, a bond. Fr., *stéthodesmie.* See *Chest*-BANDAGE and CORSET (2d def.).

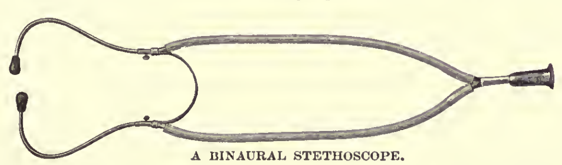
STETHOGONIOMETER, n. Ste^{2}th-o-gon-i^2-o^{2}m'e^{2}t-u^{5}r. From στῆθος, the chest, γωνία, an angle, and μέτρον, a measure. An instrument for measuring the curvature of the chest. [D, 25.]

STETHOGRAPH, n. Ste^{2}th'o-gra^{3}f. From στῆθος, the chest, and γράφειν, to write. See STETHOMETER.

STETHOMENIA (Lat.), n. f. Ste^{2}th(stath)-o(o^3)-men(man)'-i^2-a^3. From στῆθος, the chest, and μήν, a month. Fr., *stéthoménie.* Vicarious menstruation by way of the bronchial tubes.

STETHOMETER, n. Ste^{2}th-o^{2}m'e^{2}t-u^{5}r. From στῆθος, the chest, and μέτρον, a measure. Fr., *stéthomètre.* Ger., S., *Brustmesser.* Of Quain, an instrument for measuring the variations in size of the thorax. As modified by J. B. Sanderson, for registering the respiratory movements of the chest, it consists of two parallel rigid bars joined at right angles to a cross-piece. The free end of one bar bears an ivory button and that of the other a receiving tambour, the latter being connected with a registering tambour. The instrument is somewhat similar to Bert's tambour mounted on calipers and is used much in the same way. [J, 5, 6, 19.]

STETHOMETRY, n. Ste^{2}th-o^{2}m'e^{2}t-ri^2. Ger., *Brustmessung.* The process of using the stethometer. [D.]



STETHOMYITIS (Lat.), n. f. Steth(stath)-o(o^3)-mi(mu^6)-i(e)'-ti^{2}s. Gen., *-it'idos (-idis).* From στῆθος, the chest, and μῦς, a muscle. Fr., *stéthomyite.* Inflammation of the pectoral muscles.

STETHOPHONOMETER, n. Ste^{2}th-o-fon-o^{2}m'e^{2}t-u^{5}r. From στῆθος, the chest, φωνή, a sound, and μέτρον, a measure. A straight stethoscope having a sliding graduated tube to measure the intensity of an auscultatory sound. ["Wien. klin. Woch.," Nov. 3, 1892, p. 629 (α, 34).]

STETHOPOLYSCOPIUM (Lat.), n. n. Ste^{2}th(stath)''o(o^3)-po^{2}l-i^2(u^6)-skop(sko^{2}p)'i^2-u^{3}m(u^{4}m). From στῆθος, the chest, πολύς, many, and σκοπεῖν, to examine. Fr., *stéthopolyscope.* Ger., *Stethopolyskop.* A stethoscope furnished with conducting tubes, so as to be used by several persons simultaneously. [L, 50 (α, 14).]

STETHORRHEUMA (Lat.), n. n. Ste^{2}th(stath)-o^{2}r-ru^{2}m'a^3. Gen., *-rheum'atos (-atis).* From στῆθος, the chest, and ῥεῦμα, a flux. Fr., *stéthorrhume.* Pectoral rheumatism. [L, 50 (α, 14).]

STETHOSCOPE, n. Ste^{2}th'o-skop. From στῆθος, the chest, and σκοπεῖν, to examine. Fr., *stéthoscope.* Ger., *Stethoskop, Brusthorcher.* An instrument for conveying to the ear the sounds pro-

A BINAURAL STETHOSCOPE.

duced within the body for diagnostic purposes; consisting of a tube with one end flaring for application to the chest-wall and the other end shaped for insertion into the ear. [B; α, 34.]—**Binaural s.** A s. adapted for adjustment to both ears. [D.]—**Differential s.** A binaural s. with two cones in connection with the ear-tubes, capable of being applied to different parts of the body simultaneously, and thus enabling the observer to compare the sounds at two different points. [D, 1.]—**Double s.** See *Binaural s.*—**Pulse s.** See SPHYGMOPHONE.

STETHOSCOPY, n. Ste^{2}th-o^{2}sk'op-i^2. Fr., *stéthoscopie.* Ger., *Stethoskopie.* Examination by means of the stethoscope. [α, 48.]—**Vaginal s.** Auscultation of the gravid uterus by means of a stethoscope introduced into the vagina. [J. Wallace, "Edinb. Med. Jour.," xviii, p. 427 (α, 34).]

STETHOSPASMUS (Lat.), n. m. Ste^{2}th(stath)-o(o^3)-spa^{2}z-(spa^{3}s)'mu^{3}s(mu^{4}s). From στῆθος, the chest, and σπασμός, a spasm. Fr., *stéthospasme.* Pectoral spasm. [L, 50 (α, 14).]

STETHOTHLASTES (Lat.), n. m. Ste^{2}th(stath)-o(o^3)-thla^{2}st-(thla^{3}st)'ez(as). From στῆθος, the chest, and θλᾶν, to crush. Ger., *Brustzermalmer.* An instrument for crushing the thorax in embryulcia.

STETHURIA (Lat.), n. f. Ste^{2}th(stath)-u^2(u)'ri^2-a^3. From στῆθος, the chest, and οὖρον, urine. Fr., *stéthurie.* Metastasis of urine to the chest. [L, 50 (α, 14).]

STETHYLIC ALCOHOL, n. Ste^{2}th-i^{2}l'i^{2}k. See STETHAL.

STETIG (Ger.), adj. Stat'i^{2}g. See CONTIGUOUS.

STEUERFEDER (Ger.), n. Stoi'e^{2}r-fad-e^{2}r. See RECTRIX.

STEVIA (Lat.), n. f. Sta'vi^2-a^3. From *Esteve*, a Spanish botanist. Fr., *stévie.* A genus of the *Eupatoriaceæ.* The *Stevieæ* of Reichenbach are a section of the *Agerateæ.* [α, 35.]—**S. febrifuga.** A North American species used as a tonic, stomachic, and febrifuge. [B, 173 (α, 35).]

STHENIA (Lat.), n. f. Sthen(sthe^{2}n)-i(e)'a^3. From σθένος, strength. Fr., *sthénie.* Ger., *Kraftthätigkeit.* 1. Strength, vigor. 2. In the Brunonian nosology, see under ASTHENIA (2d def.).

STHENIC, adj. Sthe^{2}n'i^{2}k. Fr., *sthénique.* Ger., *sthenisch.* Strong, forcible. [D.] See under ASTHENIA (3d def.) and cf. ASTHENIC.

STHENOPYRA (Lat.), n. f. Sthe^{2}n-o^{2}p'i^{2}r(u^{6}r)-a^3. From σθένος, strength, and πῦρ, fever. See FEBRIS *sthenica.*

STIBAMINE, n. Sti^{2}b'a^{2}m-en. See HYDROGEN *antimonide.*

STIBDIAMYL, n. Sti^{2}b-di-a^{2}m'i^{2}l. A radicle, $Sb(C_5H_{11})_2$.

STIBETHYL, n. Sti^{2}b-e^{2}th'i^{2}l. Fr., *stibéthyle.* Ger., *Stibäthyl.* See TRIETHYLSTIBINE.

STIBI (Lat.), n. n. Stib(sti^{2}b)'i^2. Gen., *stib'is.* Gr., στίβι. See ANTIMONY.

STIBIACNE (Lat.), n. f. Sti^{2}b-i^2-a^{2}k(a^{3}k)'ne(na). Gen., *-ac'nes.* From στίβι, antimony, and ἄκνη, acne. Acne produced by the use of antimony. [L, 50 (α, 14).]

STIBIALIS (Lat.), adj. Sti^{2}b-i^2-al(a^{3}l)'i^{2}s. Of, pertaining to, or containing antimony. [B.]

STIBIALISM, n. Sti^{2}b'i^{2}a^{2}l-i^{2}zm. From στίβι, antimony. Systemic poisoning by antimony. [α, 34.]

STIBIAS (Lat.), n. m. Sti^{2}b'i^2-a^{2}s(a^{3}s). Gen., *-at'is.* See ANTIMONATE.—**S. kalicus.** See POTASSIUM *antimonate.*—**S. natricus.** Sodium antimonate. [B.]

STIBIATION, n. Sti^{2}b-i^2-a'shu^{3}n. From στίβι, antimony. Fr., *s.* The excessive use of antimonials. [L, 41, 49 (α, 14).]

STIBIATUS (Lat.), adj. Sti^{2}b-i^2-at(a^{3}t)'u^{3}s(u^{4}s). Fr., *stibié.* Containing antimony, antimonial. [B.]

STIBICUS (Lat.), adj. Sti^{2}b'i^{2}k-u^{3}s(u^{4}s). See ANTIMONIC.

STIBIÉ (Fr.), adj. Steb-e-a. See STIBIATUS.

STIBIIS (Lat.), n. m. Sti^{2}b'i^2-i^{2}s. See ANTIMONITE.

STIBINE, n. Sti^{2}b'en. Ger., *Stibin.* See HYDROGEN *antimonide* and ANTIMONY *trisulphide.*

STIBIOKALI TARTARICUM (Lat.), n. n. Sti^{2}b-i^2-o^{2}k'-al(a^{3}l)-i(e) ta^{3}r-ta(ta^3)'ri^{2}k-u^{3}m(u^{4}m). See ANTIMONY *and potassium tartrate.*—**Emplastrum stibiokali tartarici.** See *Emplastrum* TARTARI *stibiati.*—**Unguentum stibiokali tartarici.** See *Unguentum* ANTIMONII.—**Vinum stibiokali tartarici.** See *Vinum* ANTIMONII.

STIBIOSO-STIBICUS (Lat.), adj. Sti^{2}b-i^2-os''o(o^3)-sti^{2}b'i^{2}k-u^{3}s(u^{4}s). See ANTIMONIO-ANTIMONIC.

STIBIOSUS (Lat.), adj. Sti^{2}b-i-os'u^{3}s(u^{4}s). Antimonious. [B.]

STIBIUM (Lat.), n. n. Sti^{2}b'i^2-u^{3}m(u^{4}m). Gr., στίβι. Antimony; of the Gr. Ph., crude antimony. [B, 95 (α, 38).]—**Calx stibii grisea (seu imperfecta), Cinis stibii.** See ANTIMONY *ash.*—**Flos stibii helmontianus.** See *Flores* ANTIMONII *Helmontii.*—**Hydrosulphuretum oxydi stibii fuscum (seu oxydi stibii rubrum, seu oxyduli stibii).** Kermes mineral. [B, 119.]—**Liquor stibii chlorati.** See under *Liquor* ANTIMONII *chloridi.*—**Morsuli stibii.** See TROCHISCI *stibiati.*—**Murias oxyduli stibii, Murias stibii (oxygenatus).** Antimony chloride (trichloride). [B, 119.]—**Oxodes stibii sulphuratum.** Antimony pentasulphide. [B, 119.]—**Oxydulum stibii sulphuratum semivitreum.** See *Hepar* ANTIMONII.—**Oxydulum stibii vitreatum (seu vitreum, seu vitrificatum).** See *Vitrum* ANTIMONII.—**Oxydum stibii acido muriatico oxygenato paratum.** Antimony oxychloride. [B, 119.]—**Oxydum stibii cum potassa.** See ANTIMONIUM *diaphoreticum nitratum.*—**Oxydum stibii (potasseum) non ablutum.** See ANTIMONIUM *diaphoreticum nitratum.*—**Oxydum stibii sulphuratum rubrum.** See KERMES *mineral.*—**Oxydum stibii sulphuratum vitreum.** See *Vitrum* ANTIMONII.—**Pilulæ ex stibio et hydrargyro.** See *Pilulæ* ANTIMONII *compositæ.*—**Protoxydum stibii griseum.** Antimony trioxide. [B, 119.]—**Pulvis oxydi stibii compositus.** See PULVIS *Cornacchini.*—**Pulvis stibii compositus.** See PULVIS *antimonialis.*—**Sapo hydrosulphureti oxyduli stibii sulphurati.** See *Sapo* ANTIMONII.—**S. arsenicicum.** Antimony arsenate. [B, 270.]—**S. chloratum (concretum).** Antimony trichloride. [B.]—**S. chloratum solutum.** See *Liquor* ANTIMONII *chloridi.*—**S. muriaticum.** Antimony chloride. [B.] **S. muriaticum causticum.** See ANTIMONY *trichloride.*—**S. muriaticum oxydulatum liquidum.** See *Liquor* ANTIMONII *chloridi.*—**S. oxydatum.** See ANTIMONY *trioxide.*—**S. oxydatum album.** See ANTIMONIUM *diaphoreticum lotum.*—**S. oxydatum fuscum.** See *Crocus* ANTIMONII.—**S. oxydatum griseum.** 1. Antimony trioxide. [B, 119.] 2. See ANTIMONY *ash.*—**S. oxydatum sulphuratum vitrificatum.** See *Vitrum* ANTIMONII.—**S. oxydulatum.** Antimony trioxide. [B, 119.]—**S. oxysulphuratum.** See ANTIMONIUM *sulphuratum.*—**S. oxysulphuratum fusum.** See *Vitrum* ANTIMONII.—**S. purum.** See *Regulus* ANTIMONII.—**S. striatum nigrum.** See ANTIMONIUM *crudum.*—**S. sulphuratum aurantiacum (seu auratum).** See ANTIMONY *pentasulphide.*—**S. sulphuratum lævigatum.** See ANTIMONII *sulphidum.*—**S. sulphuratum nigrum.** Of the Ger. Ph., Austr. Ph., Hung. Ph., and Gr. Ph., antimony trisulphide. [B, 205.]—**S. sulphuratum nigrum alcoholisatum.** See ANTIMONII *sulphidum.*—**S. sulphuratum nigrum crudum.** Antimony trisulphide. [B, 95.]—**S. sulphuratum nigrum depuratum.** See ANTIMONII *sulphidum purificatum.*—**S. sulphuratum nigrum lævigatum.** See ANTIMONII *sulphidum.*—**S. sulphuratum pulveratum.** Antimony trisulphide sifted through a 1,600-mesh sieve. [B, 95 (α, 38).]—**S. sulphuratum rubeum (seu rubrum).** See KERMES *mineral.*—**S. ustum.** See ANTIMONY *ash.*—**Sulphuretum oxyduli stibii hydrogenatum.** Antimony pentasulphide. [B, 119.]—**Sulphuretum stibii arsenicatum.** See CAUSTICUM *arsenicale.*—**Sulphuretum stibii cum calce.** See *Calx* ANTIMONII *Hoffmanni.*—**Sulphuretum stibii nativum.** See ANTIMONIUM *crudum.*—**Sulphuretum stibii oxydulati.** Antimony pentasulphide.—**Sulphuretum stibii præcipitatum.** See KERMES *mineral.*—**Sulphuretum stibii præparatum.** See ANTIMONII *sulphidum.*—**Sulphuretum stibii venale.** See ANTIMONIUM *crudum.*—**Tinctura stibii alcalisata.** See *Tinctura* ANTIMONII *aurata.*—**Vinum stibii.** See *Vinum* ANTIMONII.—**Vitrum stibii.** See *Vitrum* ANTIMONII.

STICH (Ger.), n. Sti^{2}ch^2. A puncture or stab; a darting pain; a sting or bite. [α, 17.]—**Impfs'.** A puncture or incision for vaccination. [α, 14.]—**Sonnens'.** See INSOLATION (2d def.).—**S'kanal.** The tract of a puncture (*e. g.*, one made by the passage of a suture).

STICHELN (Ger.), n. Stech²'e²ln. See SCARIFICATION.

STICHIDIUM (Lat.), n. n. Sti²k(sti²ch²)-i²d'i²-u³m(u⁴m). Gr., στιχίδιον (dim. of στίχος, a row). Ger., *Reihenfrucht*. In certain *Algæ* (*Rhodophyceæ*), a special branch of the thallus containing spores (tetragonidia) arranged in rows. [α, 35.]

STICKDAMPF (Ger.), n. Sti²k'da³mpf. See NITROGEN and *Choke*-DAMP.

STICKEND (Ger.), adj. Sti²k'e²nd. Choking, suffocating.

STICKFLUSS (Ger.), n. Sti²k'flus. See *Suffocative* CATARRH and NARCORTHOPNŒA.

STICKGAS (Ger.), n. Sti²k'ga³s. Nitrogen. [B.]

STICKHUSTEN (Ger.), n. Sti²k'hust-e²n. A convulsive cough, especially whooping-cough.

STICKLUFT (Ger.), n. Sti²k'luft. See MEPHITIS (1st def.) and NITROGEN.

STICKOXYD (Ger.), n. Sti²k'ox-u⁶d. See NITROGEN *dioxide*.

STICKOXYDUL (Ger.), n. Sti²k'ox-u⁶d-ul. See NITROGEN *monoxide*.

STICKSTOFF (Ger.), n. Sti²k'sto³f. See NITROGEN.—**S'haltig.** See NITROGENOUS.—**S'jodür.** See NITROGEN *iodide*.—**S'oxyd.** See NITROGEN *dioxide*.—**S'oxydul, S'oxydulgas.** See NITROGEN *monoxide*.—**S'säure.** See NITRIC ACID.

STICKSUCHT (Ger.), n. Sti²k'zuch²t. See ATELECTASIS *pulmonum*.

STICKWURZ (Ger.), n. Sti²k'vurts. See BRYONIA.

STICTA (Lat.), n. f. Sti²kt'a³. From στικτός, punctured. Fr., *s.*, *sticte*. Ger., *Grubenflechte*. A genus of lichens, of the *Stictei* (a tribe of the *Phyllodei*). [α, 35.]—**S. aurata.** A species found on cinchona barks, especially loxa-bark. [α, 35.]—**S. pulmonacea, S. pulmonaria.** Fr., *pulmonaire de chêne, hépatique des bois, herbe aux poumons, thé des forêts* (ou *des Vosges*), *sticte pulmonacée*. Ger., *Lungengrubenflechte, Lungenflechte, Lungenmoos, Baumlungenkraut, Eichenlungenmoos*. Sp., *pulmonaria* [Mex. Ph.]. Hazel-rag (or -crottles), lung lichen, tree lungwort; a species formerly official as *lichen pulmonarius* (seu *arboreus*), *muscus arboreus pulmonarius, muscus pulmonarius quercinus*, etc. It contains a mucilaginous, astringent principle, and is still sometimes used as a pectoral. [α, 35.]

STICTACNE (Lat.), n. f. Sti²kt-a²k(a³k)'ne(na). Gen., *-ac'nes*. From στικτός, punctured, and ἄκνη, acne. See ACNE *punctata*.

STICTIC ACID, n. Sti²k'ti²k. Fr., *acide stictique*. Ger., *Stictinsäure*. A bitter substance, analogous to cetraric acid, obtained from *Sticta pulmonacea*. [B, 38, 93, 108 (α, 14).]

STIEFEL (Ger.), n. Stef'e²l. A boot; of Günther, the hippocampus minor. [I, 3 (K).]—**Schröpfs'.** Junod's boot. See BOOT.

STIEL (Ger.), n. Stel. 1. A pedicle; in botany, a stipe, a corm (*q. v.*, 2d def.). [α, 35.] 2. The petiolus of the epiglottis. [L, 304.]—**Augenblasens'.** See under AUGE.—**Blüthens'.** See PEDUNCLE (4th def.).—**Flockens'.** See FLOCCULUS (2d def.).—**Gehirnanhangs'.** See INFUNDIBULUM (2d def.).—**Harnsacks'.** See URACHUS.—**Hirns'e.** See CRURA *cerebri* and CAUDEX *cerebri*.—**Hypophysiss'.** See INFUNDIBULUM (2d def.).—**Kleinhirns'.** The restiform body. [J, 6 (K).]—**Marks'.** See PEDUNCLE *of the flocculus*.—**Rückenmarks'e.** Of Meckel, the inferior peduncles of the cerebellum. [J, 3 (K).]—**Schnitts'.** See ANSA (2d def.).—**S'behandlung.** The treatment of a pedicle.—**S'hirn.** See PODENCEPHALUS.—**S'torsion.** Twisting of a pedicle, as of an ovarian tumor. [α, 34.]—**S'versenkung.** Treatment of the pedicle of an ovarian tumor by dropping it into the abdominal cavity. [α, 34.]—**S'versorgung.** The treatment of an ovarian-tumor pedicle. [α, 34.]—**S'zerreissung.** Rupture of a pedicle, as of an ovarian tumor. [α, 34.]—**Unterer S. des Thalamus.** The inferior pillar of the optic thalamus, a bundle of fibres which extends downward from the posterior and inferior part of the optic thalamus into the temporo-sphenoidal lobe. [I, 17 (K).]—**Vorderer S. des Thalamus.** Of Meynert, the anterior peduncle of the optic thalamus, a tract of nerve-fibres which issues from the central part of the frontal lobe, extends between the head of the caudate nucleus and the lenticular nucleus, and enters the anterior extremity of the optic thalamus. [I, 17 (K).]

STIELCHEN (Ger.), n. Stel'ch²e²n. See PEDICLE and STIPULE.

STIELRUND (Ger.), adj. Stel'rund. See TERETE.

STIER (Ger.), n. Ster. See BOS *taurus*.—**S'äugig.** Affected with buphthalmia.

STIFF-NECK, n. Sti²f-ne²k'. 1. A state of painfulness on bringing the neck-muscles into play, so that the head is carried stiffly. [D.] 2. See TORTICOLLIS.

STIFLE, STIFLE-JOINT, n. Stifl, stifl'joint. Fr., *grasset*. Of the veterinarians, the region of the hind-limb corresponding to the human knee and having for a base the patella and the soft parts that surround it. [α, 34.]

STIFT (Ger.), n. Sti²ft. See PENCIL (1st def.).—**Pastens'.** See STILUS *dilubilis*.—**Salbens'.** See STILUS *unguens*.

STIGMA (Lat.), n. n. Sti²g'ma³. Gen., *stig'matos* (*-atis*). Gr., στίγμα. Fr., *stigmate*. Ger., *S.* 1. A punctiform spot or mark on the skin (see MARK and NÆVUS). 2. A red spot on the skin with an elevated efflorescence at its centre; an umbo. 3. A small cicatrix; a cicatricula. [G, 16.] 4. The mark of stigmatization (*q. v.*). 5. See *S. folliculi*. 6. Of J. Arnold, one of the gaps between the endothelia forming the wall of blood-capillaries. The gaps are filled with cell-cement, and it is supposed that at these points the white blood-corpuscles emigrate from the capillaries. According to Heitzmann, the s'ta are gaps along the sides of the cells, those at the angles being called stomata. [J, 26.] 7. In botany: (*a*) the part of a pistil, usually the apex of the style, that receives the pollen for the fertilization of the ovules (see *Stigmatic* CELL); (*b*) of Hedwig, a small prominence on the globules in the involucre of the *Equisetineæ*; (*c*) of Beauvois, a point persisting at the apex of the columella of mosses. [α, 35.] 8. The spiracle of an insect. [α, 27.] 9. Any mark or distinguishing feature.—**Baker's s'ta.** Callosities on the dorsal surface of the first and second phalanges of the hands produced by kneading dough. [α, 34.]—**Hysterical s'ta.** 1. Psychical or somatic s'ta indicative of neurasthenia. [α, 34.] 2. The s'ta of stigmatization (*q. v.*).—**Neurasthenic s'ta.** See *Hysterical s'ta* (1st def.).—**Physical s'ta of degeneration.** Certain variations from the normal type in the configuration of the skull, extremities, or other portions of the body, indicating a low or vicious type of mental development. [α, 34.]—**Psychical s'ta.** Of Gilles de la Tourette, certain mental peculiarities characterized by extreme susceptibility to suggestions of a particular kind. [α, 34.]—**Somatic s'ta.** Of Gilles de la Tourette, the objective signs of hysteria, neurasthenia, and other neuroses. [α, 34.]—**S'ta degenerationis.** See *Physical s'ta of degeneration*.—**S. folliculi.** Ger., *Narbe*. A small non-vascular spot (the macula) near the middle of the thinner and more projecting part of a maturing Graafian vesicle, formed by the convergence of minute blood-vessels. At a subsequent period it is devoid of blood- and lymph-vessels, and its cells are undergoing fatty degeneration. It marks the spot where the vesicle bursts when it is fully matured, and the ovum escapes. [A, 5; J, 35.]—**S'ta hereditatis.** Psychical or somatic s'ta resembling those of an ancestor and attributed to heredity. [α, 34.]—**S'ta Malpighi.** Opening of small veins into the larger splenic veins. [L, 332.]—**S'ta nativa.** Punctate nævi. [G, 11.]—**S'ta nigra.** Black spots caused by the lodgment of particles of gunpowder in the skin. [G, 11.]—**S. of the Graafian vesicle, S. ovarii.** See *S. folliculi*.—**S'ta rubra.** Red spots (petechiæ) on the skin due to violent coughing or vomiting, to scurvy, or to suppression of the menses. [G, 11.]—**Venous s'ta.** Varicose veins of the lower portion of the body and extremities. [α, 34.]

STIGMATIC, adj. Sti²g-ma²t'i²k. Lat., *stigmaticus*. Fr., *stigmatique*. Ger., *stigmatisch*. Of or pertaining to a stigma.

STIGMATIZATION, n. Sti²g-ma²t-i²z-a'shu³n. From στιγματίζειν, to brand. Fr., *stigmatisation*. The supposed miraculous impression of marks like those of Christ's wounds on the bodies of certain individuals; hence the formation or appearance of bleeding points on the body in consequence of some psychical or nervous morbid state. [G, 60; α, 48.]

STIGMATOID, adj. Sti²g'ma²t-oid. Lat., *stigmatoideus* (from στίγμα, a stigma, and εἶδος, resemblance). Resembling a stigma.

STIGMATOPHORE, n. Sti²g-ma²t'o-for. Lat., *stigmatophora, stigmatophorus* (from στίγμα, a stigma, and φορός, bearing). Fr., *s.* Of Cassini, that part of the style of *Compositæ* which bears the stigmata. [α, 35.]

STIGMATOSES (Lat.), n. f., pl. of *stigmatosis* (*q. v.*). Sti²g-ma²t(ma³t)-os'ez(e²s). From στίγμα, a mark. Ger., *Stigmatosen, erosive Hautkatarrhe*. Erosive catarrhs of the skin; of Auspitz, the second family under *Dermatitides catarrhales*, embracing catarrhal affections of the skin which are primarily of an erosive character, including parasitic and traumatic s. [G, 4.]

STIGMATOSTEMON (Lat.), n. m. Sti²g-ma²t(ma³t)-o(o³)-stem(stam)'o²n(on). Gen., *-stem'onos* (*-is*). From στίγμα, a stigma, and στήμων, a filament. Fr., *stigmatostémone*. Of Mönch, a body formed by the union of stamens (or anthers) with the stigma.

STILAGO (Lat.), n. f. Sti²l-a(a³)'go. Gen., *-ag'inis*. Fr., *stilage*. Ger., *Salamanderbaum*. The genus *Antidesma*. The *Stilaginaceæ* or *Stilagineæ* are the *Antidesmaceæ*. [α, 35.]—**S. bunias.** Ger., *lorbeerblättriger Salamanderbaum*. Chinese laurel, the *Antidesma bunias*. [α, 35.]

STILBE (Lat.), n. f. Sti²lb'e(a). Gen., *stil'bes*. From στίλβειν, to glitter. Fr., *s.* A genus of shrubs found in southern Africa. The *Stilbaceæ*, or *stilbids* of Lindley and *Stilbineæ* (the *Stilbinæ* of Kunth) are now regarded as a tribe (*Stilbeæ*) of the *Verbenaceæ*. [α, 34.]

STILBENE, n. Sti²l'ben. Fr., *stilbène*. Ger., *Stilben*. A substance, $C_{14}H_{12}$, isomeric with diphenylethylene. [B, 38, 93 (α, 14).]

STILBOCARPA (Lat.), n. f. Sti²lb-o(o³)-ka³rp'a³. From στίλβειν, to glitter, and καρπός, fruit. A genus of the *Araliaceæ*. [α, 35.]—**S. polaris.** An herb with saccharine, edible roots, found in New Zealand. [α, 35.]

STILBUM (Lat.), n. n. Sti²lb'u³m(u⁴m). From στίλβειν, to glitter. Fr., *stilbe*. A genus of hyphomycetous *Fungi*, the type of the *Stilbacei* (of Lindley, a suborder of the *Hyphomycetes*), the *Stilbei* or *Stilbini* (of Fries, a tribe of the *Mucorini*), the *Stilbideæ* (of Gray, a division of the *Nematomyceæ*), and the *Stilboidei* (of Fries, an order of the *Hyphomycetes*). [α, 35.]

STILETT (Ger.), **STILETTE** (Fr.), n's. Stel-e²t, -et'. See STYLET.

STILL, n. Sti²l. Gr., κόγχος σιδήρεος. Lat., *concha ferrea*. Fr., *alambic*. Ger., *Destillirapparat*. See under DISTILLATION.

STILLAMME (Ger.), n. Sti²l'a³m-me². See *Wet* NURSE.

STILLATORY, n. Sti²l'a²t-or-i². A still.

STILL-BORN, adj. Sti²l-bo²rn'. Lat., *natus mortuus*. Fr., *mort-né*. Ger., *stillgeboren*. Dead at the time of birth. [α, 48.]

STILLE (Ger.), n. Sti²l'le². Quiet (said of the state of quiescence of a frog's heart when filled with salt solution; this phenomenon may last for over an hour, and the heart-beat may again be restored by supplying the organ with fresh blood). [K, 19.]

STILLEND (Ger.), adj. Sti²l'le²nd. 1. Calming, sedative. [A, 521 (α, 48).] 2. Giving suck.

STILLENDE (Ger.), n. Sti²l'le²nd-e². A nursing woman.

STILLICIDIUM (Lat.), n. n. Sti^{2}l-li^{2}s(li^{2}k)-i^{2}d'i^2-u^{3}m(u^{4}m). From *stilla*, a drop, and *cadere*, to fall. Fr., *stillicide*. Ger.. *Tröpfeln*. 1. Effusion of a liquid drop by drop. [α, 48.] 2. The bathing of a part by dropping water on it. [B, 48.]—**S. lacrimale, S. lacrimarum.** See Epiphora (2d def.).—**S. narium.** Of Bidloo, coryza. [α, 34.]—**S. sanguinis.** See Staxis.—**S. urinæ.** Ger., *Harnabträufeln*. Dribbling of urine.—**S. uteri.** See Menses *stillantes*.—**Virulent s.** Of Norman, gonorrhœa. [α, 34.]

STILLINGIA (Lat.), n. f. Sti^{2}l-i^{2}n(i^{2}n^2)'ji^2(gi^2)-a^3. From *Stillingfleet*, an English botanist. Fr., *stillingie*. Ger., *Stillingie*. 1. A genus of euphorbiaceous shrubs; by Baillon made a section of the genus *Excœcaria*. The *Stillingieæ* are a tribe and the *Stillingideæ* a division of the *Euphorbiaceæ*. 2. Of the U. S. Ph., the root of *S. silvatica*. [α, 35.]—**Extractum stillingiæ fluidum** [U. S. Ph.]. A fluid extract made by exhausting 10 grammes of s.-root in No. 40 powder with alcohol of sp gr. 0·928, and bringing up to 100 c. c. [B, 95 (α, 38).]—**S. sebifera.** Fr., *arbre à suif*. Ger., *chinesischer Talgbaum*. Chinese tallow-tree; cultivated in India and America. The seeds, which yield a fixed oil used externally in medicine and for burning, are thickly coated with a white tallowy substance (stillistearin, or Tangawang fat), said to be nearly pure stearin, used for making candles. [α, 35.]—**S. silvatica.** Queen's-delight (or -root), silver-leaf, yaw-root; the *Excœcaria silvatica*. Its thick sub-cylindrical root, the s. of the U. S. Ph., is used as an alterative and especially in secondary syphilis. [α, 35.]

STILLISTEARIC ACID, n. Sti^{2}l-i^{2}st-e-a^{2}r'i^{2}k. Fr., *acide stillistéarique*. Ger., *Stillistearinsäure*. A fatty acid, $C_{15}H_{30}O_2$, obtained by saponification of stillistearin. According to Heintz, it is merely a mixture of fatty acids. [B, 93 (α, 14).]

STILLISTEARIN, n. Sti^{2}l-i^{2}st-e'a^{2}r-i^{2}n. Fr., *stillistéarine*. Ger., *S.* See under Stillingia *sebifera*.

STILLSTAND (Ger.), n. Sti^{2}l'sta^{3}nd. See Standstill and Stasis.—**Herzenss'.** See Perisystole.

STILLUNG (Ger.), n. Sti^{2}l'lun^2. The act or process of calming, stopping, or stanching, also of suckling. [α, 48.]—**S'smittel.** A sedative. [α, 48.]

STILOGONIDIUM (Lat.), n. n. Stil(sti^{2}l)-o(o^3)-go^{2}n-i^{2}d'i^2-u^{3}m(u^{4}m). From *stilus* (*q. v.*), and *gonidium* (*q. v.*). In *Fungi*, a gonidium abjointed from the end of a sterigma on a gonidiophore.

STILUS (Lat.), n. m. Stil(sti^{2}l)'u^{3}s(u^{4}s). 1. See Pencil. 2. A peduncle, especially of the optic thalamus. [I, 73 (K).]—**S. dilubilis.** Ger., *Pastenstift*. Of Unna, a pencil composed of dextrin, gum-arabic, or tragacanth and some medicament; used in local treatment of skin diseases. [α, 34.]—**S. unguens.** Ger., *Salbenstift*. Of Unna, a pencil composed of rosin, wax, olive-oil, and some medicament; used in skin diseases. [α, 34.]

STIMATOSIS (Lat.), n. f. Sti^{2}m-a^{2}t(a^{3}t)-os'i^{2}s. Gen., *-os'eos* (*-is*). See Stymatosis.

STIMMBESCHWERDE (Ger.), n. Sti^{2}m'be^2-shwe^{2}rd-e^2. See Phonosus.

STIMMBILDUNG (Ger.), n. Sti^{2}m'bi^{2}ld-un^3. See Phonation.

STIMME (Ger.), n. Sti^{2}m'me^2. See Voice.—**Flüsters'.** Fr., *voix chuchotée*. In auscultation, the whispered voice. [α, 18.]—**Höhlens'.** See Cœlostomia.—**Kehlkopfs', Kehls'.** See Laryngophony.—**Kopfs'.** See Falsetto.—**Krugs'.** See *Amphoric* resonance (2d def.).—**Meckers', Ziegens'.** See Paraphonia *puberum*.

STIMMFEHLER (Ger.), n. Sti^{2}m'fal-e^{2}r. See Paraphonia.

STIMMI (Lat.), n. n. Sti^{2}m'mi(mi^2). Gr., *στίμμι*. See Antimony.

STIMMKRAMPF (Ger.), n. Sti^{2}m'kra^{3}mpf. See Phonospasm.

STIMMLEIDEN (Ger.), n. Sti^{2}m'lid-e^{2}n. See Phononosus.

STIMMLOSIGKEIT (Ger.), n. Sti^{2}m'los-i^{2}g-kit. Aphonia.—**Cholerische S.** See Choleraphone.

STIMMRITZE (Ger.), n. Sti^{2}m'ri^{3}t-se^2. See Glottis, *True* glottis, and Rima *glottidis*.—**Phonischer S'nkrampf.** See *Spastic* aphonia.—**S'ndeckel.** See Epiglottis.—**S'nkrampf.** Spasm of the glottis. [α, 34.]

STIMULANT, adj. Sti^{2}m'u^2-l'nt. Fr., *s.* Ger., *stimulirend*. Stimulating; as a n. (Ger., *Stimuliermittel*, *Reizmittel*), an agent that stimulates; colloquially, an alcoholic liquor. Cf. Stimulus.—**Diffusible s.** A s. that, administered by the mouth or hypodermically, acts quickly. [α, 34.]

STIMULATE, v. tr. Sti^{2}m'u^{2}l-at. Lat., *stimulare*. Fr., *stimuler*. Ger., *stimuliren*, *reizen*. 1. To incite or urge on to increased action. 2. To treat with stimulants. [D.]

STIMULATING, adj. Sti^{2}m'u^{2}l-at-i^{2}n^2. Lat., *stimulant*. Having the power or a tendency to stimulate. [D.]

STIMULATION, n. Sti^{2}m-u^{2}l-a'shu^{3}n. Lat., *stimulatio*. Fr., *s.* Ger., *Reizung*. The act or process or result of stimulating. [α, 48.]—**Intramuscular s.** Of Remak, Duchenne's direct muscular faradization. [α, 34.]—**Latent s.** The period in which the energy of a muscle rises and sinks after instantaneous s. [J. B. Sanderson, "Proc. of the Roy. Soc.," xlviii, 292. p. 14 (α, 34).]—**Terminal labile s.** Stroking the tendinous end of a muscle with the cathode so as to affect the entire length of the muscle, the anode being stationary. [A. L. Ranney, "N. Y. Med. Jour.," July 25, 1885 (α, 34).]—**Unipolar s.** The stimulus to a nerve effected by the application of a single electrode of an induction apparatus. [Landois (K).]

STIMULOSE, adj. Sti^{2}m'u^{2}l-os. Lat., *stimulosus*. Fr., *stimuleux*. Covered with stinging hairs (stimuli). [α, 35.]

STIMULUS (Lat.), n. m. Sti^{2}m'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). From *στιγμός*, a pricking. Fr., *aiguillon* (1st def.). Ger., *S.* (1st def.), *Reiz* (1st def.), *Reizung* (2d def.). 1. An agent or agency that stimulates. 2. The action or result of a stimulant; stimulation. 3. In botany (Ger., *Brennhaar*, *Nesselhaar*, *Brennborste*, *Ahlborste*, *Brennspitze*), a sting (*i. e.*, a stinging hair). [D, 1; α, 35.]—**Adequate s.** Fr., *s. suffisant*. Ger., *hinläuglicher Reiz*. That special form of s. which excites the terminal filaments of a nerve distributed to an organ of sense. [K, 8.]—**Chemical s.** An irritation of the animal economy or of a separate muscle or nerve, produced by the application of a chemical agent. [K.]—**Heterologous s.** An extrinsic (mechanical, thermal, chemical, electrical) s. that acts upon the nervous elements of the sensory apparatus along their entire course. [α, 34.]—**Homologous s.** See *Adequate s.*—**Infallible s.** A weak s., such as is just sufficient to cause a contraction of a frog's heart if applied at the proper time. [K, 19.]—**Mechanical s.** An irritation of a nerve or muscle brought about by mechanical means, as by pinching or striking. [K.]

STIMMWECHSEL (Ger.), n. Sti^{2}m've^{2}ch^{2}s-e^{2}l. The change of voice at puberty. [α, 34.]

STINGING, adj. Sti^{2}n^2'i^{2}n^2. Lat., *stimulans*. In botany, of a hair, producing pain on penetrating the skin. [α, 35.]

STINKASANT (Ger.), n. Sti^{2}n^{2}k'a^{3}z-a^{3}nt. See Asafœtida.—**Ammoniakalischer S'geist.** See *Spiritus* ammoniæ *fœtidus*.—**S'pflaster.** See *Emplastrum* asafœtidæ.

STINKBAUM (Ger.), n. Sti^{2}n^{2}k'ba^3-u^{4}m. See Sterculia, Anagyris *fœtida*, and Prunus *padus*.

STINKHOLZ (Ger.), n. Sti^{2}n^{2}k'ho^{3}lts. The genus *Olax*.

STINKNASE (Ger.), n. Sti^{2}n^{2}k'na^{3}z-e^2. Ozæna. [α, 34.]

STINKWEED, n. Sti^{2}n^{2}k'wed. The *Cassia occidentalis*, *Chenopodium anthelminthicum*, *Senecio jacobœa*, *Datura stramonium*, *Diplotaxis muralis*, etc. [α, 35.]

STINK-WOOD, n. Sti^{2}n^{2}k'wu^{4}d. The *Oreodaphne bullata*, *Zieria macrophylla*, etc., also their wood. [α, 35.]

STIPA (Lat.), n. f. Step(step)'a^3. Fr., *stipe*. Weather-grass; a genus of grasses. The *Stipaceæ* (of Kunth, a tribe of the *Gramineæ*) are now made a subtribe (*Stipeæ*) of the *Agrostideæ*. [α, 35.]—**S. calamagrostis.** A species used by the Russians as a diuretic. [α, 35.]—**S. pennata.** Fr., *étièpe-aigrette*, *stipe à panache*. Feather-grass; a well-known ornamental grass. According to some, the freedom of the Tartars around the Volga from pulmonary disease is due to their daily use of the milk of mares fed upon this grass. [B, 185 (α, 35).]—**S. tenacissima.** Esparto-grass; a rush-like grass growing in sandy tracts of the Mediterranean coast; used for making hats, mats, baskets, etc. [α, 35.]

STIPATE, adj. Stip'at. Lat., *stipatus* (from *stipare*, to press together). 1. Surrounded by parts more or less crowded. 2. Packed, crowded (said of spores, etc.). [α, 35.]

STIPATIO (Lat.), n. f. Sti^{2}p(step)-a(a^3)'shi^2(ti^2)-o. Gen., *-on'is*. From *stipare*, to press together. Fr., *stipation*. An accumulation that forms an obstruction. [L, 50 (α, 48).]—**S. telæ cellulosæ infantum.** See Sclerema *neonatorum*.

STIPE, n. Stip. See Stipes.

STIPEL, n. Stip'e^{2}l. Lat., *stipella*, *stipellum*. Fr., *stipelle*. Ger., *Nebenblättchen*. A small slender or secondary stipule, the stipule of a leaflet. S's are single to each leaflet, except to the terminal one, which has two. [α, 35.]

STIPES (Lat.), n. m. Stip(step)'ez(e^{2}s). Gen., *stip'itis*. Fr., *stipe*. Ger., *Stiel*. The stalk (Ger., *Strunk*) that bears the pileus of *Fungi* or the apothecium of lichens; a leaf-stalk (Ger., *Blattstiel*) in ferns or palms; a stalk-like support (*s. pistilli*) of a pistil or of a gynœcium. [α, 35.]—**S. vaginularis.** Ger., *Scheidenstiel*. The pedicle which in certain mosses (*Sphagnum* and *Andrœa*) carries the vaginula with the fruit above the topmost leaves. [α, 35.]

STIPIFORM, adj. Sti^{2}p'i^2-fo^{2}rm. Lat., *stipiformis* (from *stipes*, a stem, and *forma*, form). Fr., *stipiforme*. Resembling the stem of a palm. [α, 35.]

STIPITATE, adj. Sti^{2}p'i^{2}t-at. Lat., *stipitatus*. Fr., *stipité*. 1. Provided with a stipes which is neither petiole nor peduncle. 2. Elevated on a stipes. [α, 35.]

STIPPCHEN (Ger.), n. Sti^{2}p'ch^{2}e^{2}n. An inflamed papule with an inflammatory areola. [G.]

STIPPENAUSSCHLÄGE (Ger.), n. pl. Sti^{2}p'pe^{2}n-a^3-u^{4}s-shlag-e^2. Eruptions characterized by inflammatory papules with red areolæ. [G, 5.] See Monocarpæ (1st def.).

STIPULA (Lat.), n. f. Sti^{2}p(step)'u^{2}l(u^{4}l)-a^3. Dim. of *stipes*, a stalk. 1. A newly sprouted feather. [L, 343.] 2. A stipule; also, especially in the pl., the amphigastra of the liverworts. [B, 198.]

STIPULACEOUS, adj. Sti^{2}p-u^{2}l-a'shu^{3}s. Lat., *stipulaceus*. Fr., *stipulé*. Ger., *nebenblattartig*. Pertaining to or composed of stipules; of De Candolle, having scales which are aborted stipules (said of buds). [α, 35.]

STIPULANEOUS, n. Sti^{2}p-u^{2}l-an'e^2-u^{3}s. Lat., *stipulaneus*. Fr., *stipuléen*. Taking the place of stipules. [α, 35.]

STIPULAR, adj. Sti^{2}p'u^{2}l-a^{3}r. Belonging to a stipule. [α, 35.]

STIPULATE, adj. Sti^{2}p'u^{2}l-at. Lat., *stipulatus*. Fr., *stipulé*. Ger., *nebenblättrig*. Furnished with stipules. The *Stipulatæ* are a subclass of the *Filicinæ* having stipule-like appendages. [α, 35.]

STIPULE, n. Sti^{2}p'u^{2}l. Lat., *stipula*. Fr., *s.* Ger., *Afterblatt*, *Afterblättchen*, *Nebenblatt*. One of the two foliar appendages at the base of the petiole of a leaf; also one of certain other stipular bodies, such as the unicellular tubes on the inner and outer sides of a leaf in the *Characeæ* and the appendage at the point of a leaf in the *Archegoniatæ*. [α, 35.] See also Stipula.

STIPULIFEROUS, adj. Sti^{2}p-u^{2}l-i^{2}f'e^{2}r-u^{3}s. Lat., *stipulifer* (from *stipula*, a stipule, and *ferre*, to bear). Fr., *stipulifère*. Of a petiole, having stipules. [α, 35.]

STIPULOSUS (Lat.), adj. Sti^{2}p-u^{2}l(u^{4}l)-os′u^{3}s(u^{4}s). Fr., *stipuleux.* Furnished with stipules which are comparatively very long or large. [α, 35.]

STIRN (Ger.), n. Stern. See FOREHEAD.—**S'band.** A head bandage or band.—**S'gegend.** The frontal region of the brain. [J, 17 (K).]—**S'lage.** See *Brow* PRESENTATION.—**S'mittel.** See EPIPROSOPIUM.—**S'schau.** See METOPOSCOPY.—**S'theil.** See PARS *frontalis ossis frontis.*—**S'wulst.** A frontal convolution. [K.]

STIRNFORTSATZ (Ger.), n. Stern′fort-za^{3}ts. See *Frontal* PROCESS.—**Seitlicher S.** See *External nasal* PROCESS.

STIRNWINDUNG (Ger.), n. Stern′vi^{2}nd-un^2. A frontal convolution. [K.]—**Dritte S., Dritte S'sgruppe, Dritter S'szug.** See *Inferior frontal* CONVOLUTION.—**Erste S., Erste S'sgruppe, Erster S'szug.** See *Superior frontal* CONVOLUTION.—**Mittlere S., Mittlerer S'szug.** See *Middle frontal* CONVOLUTION.—**Obere S., Oberer S'szug.** See *Superior frontal* CONVOLUTION.—**Untere S., Unterer S'szug.** See *Inferior frontal* CONVOLUTION.—**Zweite S., Zweite S'sgruppe, Zweiter S'szug.** See *Middle frontal* CONVOLUTION.

STIROSIS (Lat.), n. f. Sti^{2}r(ster)-os′i^{2}s. Gen., *-os′eos* (*-is*). Gr., στείρωσις (from στεῖρος, barren). Fr., *s.* Ger., *S.* See STERILITY.

STIRPS (Lat.), n. f. Stu^{5}rpz(sti^{2}rps). Gen., *stirp′is.* Fr., *stirpe.* In botany, (1) a race or permanent variety; (2) the aerial stem of a plant. [α, 35.]

STIRRUP, n. Sti^{2}r′u^{3}p. See STAPES.

STITCH, n. Sti^{2}ch. Fr., *point.* Ger., *Stich.* 1. The product of one complete movement of the needle in the process of sewing; also any variety of sewing (or of surgical suture) produced by the use of a particular kind of such s'es. [α. 48.] 2. See *S.-pain.*—**Loop s.** See SUTURE *à anse.*—**Royal s.** See *Royal* SUTURE.—**S.-pain.** A colloquial term for a sharp, sudden pain that comes and goes without apparent cause, appearing in any part of the body. [α, 34.]—**Taylor's s.** See *Cobbler's* SUTURE.

STIXIS (Lat.), n. f. Sti^{2}x′i^{2}s. Gen., *stix′eos* (*-is*). Gr., στίξις (from στίζειν, to prick). Tattooing. [L, 50 (α, 14).]

STOBÆA (Lat.), n. f. Sto^{2}b-e′(a^3′e^2)-a. Fr., *stobée.* A genus of the *Compositæ.* [α, 35.]—**S. heterophylla.** A Cape-of-Good-Hope species, considered lithontriptic and used in renal diseases.

STOCK, n. Sto^{2}k. A.-S., *stoc.* Gr., στέλεχος (1st def.). Lat., *truncus, stirps* (4th def.). Fr., *tronc.* Ger., *Stamm.* 1. The trunk or stem of a plant. 2. The basal persistent portion of a stem from which roots proceed. 3. The portion of a stem into which a scion or graft is inserted. 4. A race or fixed variety. 5. The genus *Matthiola.* 6. The *Trollius europæus.* [α, 35.]

STOCKFISCHLEBERTHRAN (Ger.), n. Sto^{3}k′fi^{2}sh-lab″-e^{2}r-tra^{3}n. The oil of the hake (*Gadus merluccius*). [B.]

STOCKUNG (Ger.), n. Sto^{3}k′un^2. See STASIS.

STŒBE (Lat.), n. f. Steb′(sto^2′e^{2}b)-e(a). Gen., *stœb′es.* Fr., *stébé.* 1. Of Persoon, the genus *Centaurea.* 2. Of Linnæus, a genus of composite shrubs. [α, 35.]—**S. rhinocerontis.** A species used at the Cape of Good Hope as a digestive tonic. [α, 35.]

STŒCHAS (Lat.), n. f. Stek′(sto^2′e^{2}ch^2)-a^{2}s(a^{3}s). Gen., *stœch′ados* (*-adis*). Gr., στοιχάς. Sp., *cantueso* [Sp. Ph.] (2d def.). 1. Of Tournefort, the genus *Lavandula.* 2. Of the Fr. Cod., the flowering stalk (herb and flowering tops [Sp. Ph.]) of *Lavandula s.* 3. The *Helichrysum s.* [B, 95 (α, 38); α. 35.]—**Stœchadis flores** [Gr. Ph.]. Sp., *cantueso* (*la sumidad florida*) [Sp. Ph.]. The flowers of *Lavandula s.* [B, 95 (α, 38).]

STŒCHIOLOGIA (Lat.), n. f. Ste^{2}k(sto^2-e^{2}ch^2)-i^2(e)-o(o^3)-loj-(lo^{2}g)′i^2-a^3. Fr., *stœchiologie.* See STOICHIOLOGY.

STŒCHIOMETRIA (Lat.), n. f. Ste^{2}k(sto^2-e^{2}ch^2)-i^2(e)-o(o^3)-me^{2}t′ri^2-a^3. Fr., *stœchiométrie.* See STOICHIOMETRY.

STŒCHION (Lat.), n. n. Ste^{2}k(sto^2-e^{2}ch^2)-i(e)′o^{2}n. Gr., στοιχεῖον. See ELEMENT.

STOFF (Ger.), n. Sto^{3}f. See MATERIAL and MATTER.—**Ausgeschiedener S., Auswurfss'.** Excretion, waste matter. [K, 16.]—**Einfache Stoffe.** Elements. [B.]—**Krankheitss'.** See MATERIES *morbi* (2d def.).—**Riechs'.** Any substance which acts as a stimulus to the olfactory nerves. [Gruenhagen (K).]—**Schmecks'.** Any substance which acts as a stimulus to the nerves of taste. [Gruenhagen (K).]—**S'austausch.** See *S'umsatz.*—**S'bilanz.** The balance of nutrition in the body. [K, 16.]—**S'spender.** The blood considered as the agent in effecting tissue-changes. [K, 16.]—**S'umsatz.** Interchange of material.—**S'wechsel.** 1. See METABOLISM. 2. Change of matter. [K.]—**S'wechselbilanz.** The balance or equalization of the tissue-changes in the animal economy.

STOICHIOLOGY, n. Stoik-i^2-o^{2}l′o-ji^2. Lat., *stœchiologia* (from στοιχεῖον, an element, and λόγος, understanding). Fr., *stœchiologie.* Ger., *Elementenlehre.* The scientific investigation of elements (especially of the chemical elements) or of elementary principles. [α, 48.]

STOICHIOMETRY, n. Stoik-i^2-o^{2}m′e^{2}t-ri^2. Lat., *stœchiometria* (from στοιχεῖον, an element, and μετρεῖν, to measure). Fr., *stœchiométrie.* Ger., *Stöchiometrie, Elementenmessung.* The determination of the proportions in which elements combine to form compounds. [B, 38, 48 (α, 14).]

STOLE, n. Stol. See STOLON.

STOLLBEULE (Ger.), n. Stol′boil-e^2. See SPAVIN.

STOLON, n. Stol′o^{2}n. From *stolo,* a shoot. Fr., *s.* Ger., *Sprosser, Stengelsprosse.* 1. Any basal branch striking root; in phanerogams, a slender runner piercing the soil; in *Musci,* a shoot running along or beneath the soil and finally turning upward and producing fully-leaved shoots. [α, 35.] 2. A process or structure resembling the s. of a plant. [α, 27.]

STOLONIFEROUS, adj. Stol-o^{2}n-i^{2}f′e^{2}r-u^{3}s. From *stolo,* a shoot, and *ferre,* to bear. Furnished with stolons.

STOLPERGANG (Ger.), n. Stolp′e^{2}r-ga^{3}n^2. A stumbling gait.

STOMA (Lat.), n. n. Stom(sto^{2}m)′a^3. Gen., *stom′atos* (*-atis*). Gr., στόμα. Fr., *stomate.* Ger., *S., Mündung, Spaltöffnung* (2d def.). 1. A mouth or opening. 2. A breathing pore; one of the organized apertures in the epidermis of plants, most abundant on the lower surface of leaves, consisting each of a pair of cells (guard-cells) between the opposed concave sides of which is a slit forming a medium of communication between an intercellular space within and the air without. [α. 35.] 3. A minute opening in a serous membrane, surrounded by a ring of small cuboidal cells and leading into a lymph-vessel. [J.] 4. See under STIGMA (6th def.).—**False s'ta.** See PSEUDOSTOMATA.

STOMACACE (Lat.), n. f. Sto^{2}m-a^{2}k(a^{3}k)′a^{2}s(a^{3}k)-e(a). Gen., *-ac′aces.* Gr., στομακάκη (from στόμα, the mouth, and κακός, evil). Fr., *s.* Ger., *Mundfäule, Mundfäulniss, Mundkrankheit.* Any severe form of stomatitis.—**S. aphthosa.** See APHTHÆ.—**S. gangrænosa.** See *Gangrenous* STOMATITIS.—**S. universalis.** Of Sauvages, purpura hæmorrhagica. [α, 34.]

STOMACH, n. Stu^{3}m′a^{2}k. Gr., στόμαχος. Lat., *stomachus.* Fr., *estomac.* Ger., *Magen.* 1. A somewhat conical hollow viscus, with rounded ends, constituting the largest dilatation of the alimentary canal. It is concave above, convex below, with its larger end (the cardia) directed to the left side and situated higher than its smaller extremity (the fundus). On the left side it connects with the œsophagus, on the right with the duodenum. It lies close beneath the diaphragm, and extends on the right side nearly to the liver and below to a point about midway between the diaphragm and the umbilicus. When moderately distended it is about 12 inches long and about 5 inches wide at its widest part. It consists of four coats, known as the serous, muscular (made up of longitudinal, circular, and oblique fibres), submucous, and mucous, and is provided with glands concerned in digestion. In ruminants the s. proper is the abomasum, or rennet, for in the rumen, reticulum, and omasum the food is merely macerated and, to a certain extent, triturated. The slightly masticated food passes into the rumen and reticulum, where it is thoroughly mixed with the saliva and is macerated and softened. After remaining there for a variable length of time it is regurgitated and again masticated, the animal making one movement of the jaw from right to left or left to right, and then a number of movements in the reverse direction until the food is finely triturated. It next passes into the omasum, being prevented by the œsophageal groove from entering the rumen or reticulum, and then, grasped by the folds of the omasum, it is submitted to further trituration and maceration. Thence it enters the abomasum, where the true digestion takes place. The s's of the lower animals, except ruminants, do not differ very materially from that of man, except in shape and size. In *Carnivora* the s. is relatively large, secreting gastric juice throughout its whole extent, while in *Omnivora* but a smaller proportion of surface secreting the gastric juice is found. The smaller the secreting surface of the s. is in any animal, the greater are the surface and extent of the intestines. Thus, in *Carnivora* the intestines are relatively smaller than in ruminants, etc. For the s. in birds see PROVENTRICULUS. [L.] 2. Popularly, the abdomen.—**Honey-comb s.** See RETICULUM (3d def.).—**Hour-glass s.** Ger., *sanduhrförmiger Magen.* An hour-glass-shaped distortion of the s. from constriction of its median portion by a band of exudation. [G. Ciarrecchi, "Gazz. degli. ospit.," 1884, p. 101; "Ctrlbl. f. klin. Med.," Mar. 14, 1885, p. 189.]—**S'ache.** See CARDIALGIA.—**S.-bucket.** Of Einhorn, a small silver acorn-like vessel to which is attached a silk thread; used to obtain a specimen of the gastric contents. [α, 34.]

STOMACHAL, adj. Stu^{3}m′a^3-k′l. Fr., *stomacal.* See GASTRIC.

STOMACHALGIA (Lat.), n. f. Sto^{2}m-a^{2}k(a^{3}ch^2)-a^{2}lj(a^{3}lg)′-i^2-a^3. From στόμαχος, the stomach, and ἄλγος, pain. See CARDIALGIA.

STOMACHIC, adj. Sto^{2}m′a^{2}k′i^{2}k. Gr., στομαχικός. Lat., *stomachicus.* Fr., *stomachique.* 1. Gastric. 2. Acting as a digestive tonic. [α, 17.]

STOMACHICUM (Lat.), n. n. Sto^{2}m-a^{2}k(a^{3}ch^2)′i^{2}k-u^{3}m(u^{4}m). A stomachic remedy. [α, 17.]—**S. Poterii.** See *Cerussa* ANTIMONII *solaris* and ANTIMONIUM *diaphoreticum martiale.*

STOMACH-PUMP, n. Stu^3′m′k-pu^{3}mp. See under PUMP.

STOMÆMORRHAGIA (Lat.), n. f. Stom(sto^{2}m)-e^{2}m(a^3-e^{2}m)-o^{2}r-raj(rag)′i^2-a^3. From στόμα, the mouth, αἷμα, blood, and ῥήγνυσθαι, to burst forth. Fr., *stomémorrhagie.* Ger., *Mundblutung.* Hæmorrhage from the mouth. [L, 50 (α, 14).]

STOMATALGIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-a^{2}lj(a^{3}lg)′i^2-a^3. From στόμα, the mouth, and ἄλγος, pain. Fr., *stomalgie.* Ger., *Mundschmerz.* Pain in the mouth. [L, 41 (α, 14).]

STOMATELCIA (Lat.), **STOMATELCOSIS** (Lat.), n's f. Sto^{2}m-a^{2}t(a^{3}t)-e^{3}ls(e^{2}lk)′i^2-a^3, -e^{2}lk-os′i^{2}s. Gen., *-elc′iæ, -os′eos* (*-is*). From στόμα, the mouth, and ἕλκος, an ulcer. Fr., *stomatelcie, stomatelcosie.* Ulceration of the mouth. [E.]

STOMATIC, adj. Sto^{2}m-a^{2}t′i^{2}k. Gr., στοματικός (from στόμα, the mouth). Lat., *stomaticus.* Fr., *stomatique.* Pertaining to a stoma or mouth; as a n., a medicine for affections of the mouth.

STOMATITE (Fr.), n. Stom-a^{3}t-et. See STOMATITIS.—**S. charbonneuse.** See *Gangrenous* STOMATITIS.—**S. couenneuse.** See *Buccal* DIPHTHERIA.—**S. crémeuse.** See APHTHÆ.—**S. des casernes.** A form of stomatitis, probably scorbutic, observed in garrisons.—**S. du muguet.** See APHTHÆ.—**S. épizootique.** See *Epizootic* STOMATITIS.

STOMATITIS (Lat.). n. f. Stom(sto^{2}m)-a^{2}t(a^{3}t)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). From στόμα, the mouth. Fr., *stomatite.* Ger., *Mundentzündung.* Inflammation of the mouth. [D.]—**Aphthous s.** See APHTHÆ.—**Catarrhal s.** Inflammatory redness and swell-

ing of the oral mucous membrane without ulceration. [α, 34.]—**Corrosive s.** 1. See *Gangrenous s.* 2. S. produced by the action of corrosive substances. [D, 48.]—**Diabetic s.** S. caused by diabetes.—**Diphtheritic s.** See *Buccal* DIPHTHERIA.—**Epithelial s.** See LEUCOPLAKIA *buccalis*.—**Epizootic s.** Of Hardy, aphthæ epizooticæ. [α, 34.]—**Erythematous s.** See *Simple s.*—**Follicular s.** See APHTHÆ.—**Gangrenous s.** S. accompanied by gangrene.—**Mercurial s.** S. due to mercurial poisoning. [α, 34.]—**Pseudo-membranous s.** See *Buccal* DIPHTHERIA.—**Pultaceous s.** See APHTHÆ.—**Saturnine s.** S. due to lead poisoning. [α, 34.]—**Scorbutic s.** S. occurring in and due to scurvy. [α, 34.]—**Simple s.** An erythematous inflammation of the mouth, especially of its mucous membrane, which occurs in patches, and may be due to heat, cold, irritation of the teeth, etc. It is also caused at times by gastric derangement. [D, 1.]—**S. aphthosa, S. aphthophyta, S. cremosa.** See APHTHÆ.—**S. crouposa.** See *Buccal* DIPHTHERIA.—**S. epidemica.** An acute infectious s. occurring epidemically. [α, 34.]—**S. erythematosa.** See *Simple s.*—**S. exsudativa.** Of Löwenstamm, s. associated with exudation. [α, 34.]—**S. exulcerans.** See *Ulcerative s.*—**S. follicularis, S. fungosa.** See APHTHÆ.—**S. intertropica.** See APHTHÆ *tropicæ*.—**S. leucæmica.** S. caused by leucæmia. [α, 34.]—**S. materna.** S. occurring during pregnancy or lactation, due to the enfeeblement of the system incident to those conditions. [α, 34.]—**S. membranacea, S. membranosa.** See *Buccal* DIPHTHERIA.—**S. mercurialis.** See *Mercurial s.*—**S. nodosa.** S. with the formation of small nodes in the buccal mucosa. [α, 34.]—**S. parasitica.** See APHTHÆ.—**S. pustulosa acarosa.** Aphthæ epizooticæ caused by an *Acarus*. [α, 34.]—**S. pustulosa contagiosa.** A contagious form of aphthæ epizooticæ observed in horses. [α, 34.]—**S. septica.** S. due to septic infection.—**S. ulcerosa idiopathica.** See *Gangrenous s.*—**S. vesicularis.** See APHTHÆ.—**Toxic s.** S. due to the local application or ingestion of a poison or to the action of a poison generated in the system. [α, 34.]—**Ulcerative s.** S. with ulceration.—**Ulcero-membranous s.** Buccal diphtheria with ulceration.—**Vesicular s.** See APHTHÆ.

STOMATIUM (Lat.), n. n. Sto^{2}m-a(a^3)'shi^2(ti^2)-u^{3}m(u^{4}m). See STOMA (2d def.).

STOMATOCACE (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o^{2}k'a^{2}s(a^{3}k)-e(a). Gen., *-oc'aces*. See STOMACACE.

STOMATOCATHARSIS (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-ka^{2}th(ka^{3}th)-a^{3}rs'i^{2}s. Gen., *-ars'eos* (*-is*). From στόμα, the mouth, and κάθαρσις, a cleansing. Fr., *stomatocatharsie*. Ger., *Mundauswurf*. Salivation. [L, 50 (α, 48).]

STOMATOCATHARTICUM (Lat.), n. n. Sto^{2}m''a^{2}t(a^{3}t)-o(o^3)-ka^{2}th(ka^{3}th)-a^{3}rt'i^{2}k-u^{3}m(u^{4}m). See STOMOCATHARTICUM.

STOMATODYNIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-di^{2}n(du^{6}n)'-i^2-a^3. From στόμα, the mouth, and ὀδύνη, pain. See STOMATALGIA.

STOMATOIATRIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-i^2-a^{2}t(a^{3}t)-ri(re)'a^3. From στόμα, the mouth, and ἰατρεία, medical treatment. The therapeutics of diseases of the mouth. [α, 34.]

STOMATOLOGY, n. Sto^{2}m-a^{3}t-o^{2}l'o-ji^2. From στόμα, the mouth, and λόγος, understanding. The pathology, etc., of the mouth. ["N. Y. Med. Jour.," Mar. 17, 1888, p. 290 (α, 48).]

STOMATOMALACIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-ma^{2}l-(ma^{3}l)-as(a^{3}k)'i^2-a^3. From στόμα, the mouth, and μαλακία, softness. Fr., *stomatomalacie*. A morbid softening of the structures of the mouth. [L, 50 (α, 14).]

STOMATOMENIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-men(man)'-i^2-a^3. From στόμα, the mouth, and μήν, a month. Fr., *stomatoménie*. Vicarious menstruation by the mouth. [L, 50 (α, 14).]

STOMATOMIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-om(o^{2}m)'i^2-a^3. From στόμα, the mouth, and τομή, a cutting. Incision of a mouth (*e. g.*, the os uteri). [α, 34.]

STOMATOMYCOSIS (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-mi(mu^6)-kos'i^{2}s. Gen., *-os'eos* (*-is*). From στόμα, the mouth, and μύκης, a fungus. Any mycotic affection of the mouth.—**S. oidica.** S. caused by *Oidium albicans*.—**S. sarcinica.** S. caused by *Sarcina*. [α, 34.]

STOMATONECROSIS (Lat.), **STOMATONOMA** (Lat.), n's f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-ne^{2}k-ros'i^{2}s, -o^{2}n'o^{2}m-a^3. Gen., *-ros'eos* (*-is*). From στόμα, the mouth, and νέκρωσις, necrosis, or νομή, a corroding ulcer. Fr., *stomatonécrose*, *stomatonome*. See *Gangrenous* STOMATITIS.

STOMATOPANUS (Lat.), n. m. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-pan-(pa^{3}n)'u^{3}s(u^{4}s). From στόμα, the mouth, and *panus* (*q. v.*). Fr., *stomatopane*. Swelling of the glands of the mouth. [L, 50 (α, 14).]

STOMATOPATHIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-pa^{2}th-(pa^{3}th)-i(e)'a^3. From στόμα, the mouth, and πάθος, disease. Fr., *stomatopathie*. Any disease of the mouth. [α, 34.]

STOMATOPHYMA (Lat.), n. n. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-fi(fu^6)'-ma^3. Gen., *-phym'atos* (*-atis*). From στόμα, the mouth, and φῦμα, a growth. Fr., *stomatophyme*. Ger., *Mundgeschwulst*. Any tumor of the mouth. [L, 50 (α, 14).]

STOMATOPLASTY, n. Sto^{2}m'a^{2}t-o-pla^{2}st-i^2. From στόμα, the mouth, and πλάσσειν, to mold. Fr., *stomatoplastie*. Ger., *Stomatoplastik*. The plastic surgery of the mouth, also of the os uteri. [E ; α, 34.]

STOMATOPOIESIS (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-poi-e(a)'-si^{2}s. Gen., *-es'eos* (*-is*). From στόμα, the mouth, and ποίησις, production. 1. See STOMATOPLASTY. 2. Any operation for establishing an aperture of communication.

STOMATOPYRA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o^{2}p'i^{2}r(u^{6}r)-a^3. From στόμα, the mouth, and πῦρ, fire. See APHTHÆ.

STOMATORRHAGIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o^{2}r-raj-(ra^{3}g)'i^2-a^3. From στόμα, the mouth, and ῥήγνυσθαι, to burst forth. Ger., *Mundblutung*. Hæmorrhage from the mouth. [E.]

STOMATORRHŒA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o^{2}r-re'(ro^2'e^2)-a^3. From στόμα, the mouth, and ῥεῖν, to flow. Fr., *stomatorrhée*. Ger., *Mundfluss*. Any morbid discharge from the mouth.

STOMATOSCOPE, n. Sto^{2}m'a^{2}t-o-skop. From στόμα, the mouth, and σκοπεῖν, to examine. Fr., *s.* Ger., *Stomatoskop*. An apparatus for the visual examination of the mouth-cavity.

STOMATOSEPSIS (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-se^{2}ps-(saps)'i^{2}s. Gen., *-seps'eos* (*-is*). From στόμα, the mouth, and σῆψις, putrefaction. See *Septic* STOMATITIS.

STOMATOSIS (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-os'i^{2}s. Gen., *-os'eos* (*-is*). From στόμα, the mouth. Any disease of the mouth.

STOMATOSPASMUS (Lat.), n. m. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-spa^{2}z-(spa^{3}s)'mu^{3}s(mu^{4}s). From στόμα, the mouth, and σπασμός, a spasm. Fr., *stomatospasme*. See TRISMUS.

STOMATOTYPHUS (Lat.), n. m. Sto^{2}m-a^{2}t(a^{3}t)-o(o^3)-tif-(tu^{6}f)'u^{3}s(u^{4}s). From στόμα, the mouth, and τῦφος, typhus. Fr., *s.* Ger., *Mundtyphus*. Of Eisenmann, a form of typhus ushered in by lesions of the mouth. [A, 322.]

STOMATURIA (Lat.), n. f. Sto^{2}m-a^{2}t(a^{3}t)-u^{2}r(ur)'i^2-a^3. From στόμα, the mouth, and οὖρον, urine. Fr., *stomaturie*. Metastasis of the urine to the mouth. [L, 50 (α, 14).]

STOMENCEPHALUS (Lat.), n. m. Sto^{2}m-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)'-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From στόμα, the mouth, and ἐγκέφαλος, the brain. See STOMOCEPHALUS.

STOMOCATHARTERIUM (Lat.), **STOMOCATHARTICUM** (Lat.), n's n. Sto^{2}m-o(o^3)-ka^{2}th(ka^{3}th)-a^{3}rt-e(a)'ri^2-u^{3}m(u^{4}m), -a^{3}rt'i^{2}k-u^{3}m(u^{4}m). From στόμα, the mouth, and καθαρτήριος, or καθαρτικός, purificative. Fr., *stomocathartique*. A mouth-cleansing medicine. [L, 50 (α, 48).]

STOMOCEPHALUS (Lat.), n. m. Sto^{2}m-o(o^3)-se^{2}f(ke^{2}f)'a^{2}l-(a^{3}l)-u^{3}s(u^{4}s). From στόμα, the mouth, and κεφαλή, the head. Fr., *stomocéphale*. A cyclocephalus in which the upper portion of the face resembles that of a rhinocephalus, while in the lower portion of the face the jaws are rudimentary. There is more or less complete absence of the buccal cavity, with a tuberosity or proboscis-like formation where the mouth should be. [Geoffroy St.-Hilaire.]

STOMODÆUM (Lat.), n. n. Stom(sto^{2}m)-o^{2}d-e'(a^3'e^2)-u^{3}m-(u^{4}m). Ger., *Kopfdarm*, *Mundbucht*, *Mundöffnung*, *primitive Mundhöhle*. The primitive mouth of the embryo, being the common cavity of the mouth, the nose, and the pharynx. [A, 5.]

STOMOMANICON (Lat.), n. n. Stom(sto^{2}m)-o(o^3)-ma^{2}n-(ma^{3}n)'i^{2}k-o^{2}n. See PLATYSMA *myoides*.

STOMOSCHISIS (Lat.), n. f. Sto^{2}m-o^{2}sk(o^{2}sch^2)'i^{2}s-i^{2}s. Gen., *-schis'eos* (*-osch'isis*). From στόμα, the mouth, and σχίσις, a cleaving. Fr., *stomoschisie*. Fissure of some oral structure, especially cleft palate. [L, 50 (α, 14).]

STOMOTICUS (Lat.), adj. Sto^{2}m-o^{2}t(ot)'i^{2}k-u^{3}s(u^{4}s). From στόμα, the mouth. Pertaining to the mouth or to inosculation.

STOMOTOSYRINX (Lat.), n. f. Sto^{2}m-o^{2}t(ot)-o(o^3)-si^{2}r(su^{6}r)'-i^{2}n^{2}x. Gen., *-ing'os* (*-ing'is*). From στόμα, the mouth, οὖς, the ear, and σῦριγξ, a tube. See *Eustachian* TUBE.

STOMURIA (Lat.), n. f. Sto^{2}m-u^{2}r(ur)'i^2-a^3. See STOMATURIA.

STONE, n. Sto^{3}n. Gr., λίθος. Lat., *lapis*. Fr., *pierre*. Ger., *Stein*. 1. An aggregated mass of more or less firmly cohesive mineral matter, especially of siliceous matter. 2. A calculus; also the condition of being affected with vesical calculi. [α, 48.] 3. See PUTAMEN (2d def.).—**Blue s.** See COPPER *sulphate*.—**Gall-s.** See *Biliary* CALCULUS.—**Livers'.** A mixture of heavy spar (barium sulphate) and bitumen. [α, 35.]—**Philosopher's s.** Lat., *lapis philosophicus*, *lapis philosophorum*. Fr., *pierre philosophale*. Ger., *Stein der Weisen*. A hypothetical substance sought after by the alchemists as a panacea and a restorer of youth, also as an agent for transmuting baser matter into the precious metals. [α, 48.]—**S.-crusher.** See LITHOTRITE.—**S.-oil.** See PETROLEUM.—**Sun-s.** See LAPIS *solis*.

STONECROP, n. Sto^{3}n'kro^{2}p. The genus *Sedum*, especially *Sedum acre*. [α, 35.]

STONE-POX, n. Sto^{3}n'po^{2}x. Ger., *Steinpocken*. 1. Varicella solidescens. 2. Variola vaccina atrophica. 3. Acne. [G.]

STONEWORT, n. Sto^{3}n'wu^{5}rt. See CHARA (2d def.).

STOOL, n. Stul. Gr., καταβολή (2d def.), ἀποβολή (2d def.), κοιλία (3d def.). Lat., *dejectio* (2d def.), *fæces* (3d def.). Fr., *garde-robe* (1st def.), *selle*. Ger., *Stuhl*, *Stuhlgang* (2d def.). 1. A seat or chair, especially one arranged for evacuation of the bowels. 2. The discharge of fæces. 3. The matter evacuated from the bowels. 4. A plant used for propagation by having its branches bent down into the ground. [α, 35.]—**Bilious s's.** Discharges in bilious diarrhœa, and also after the purgative use of calomel. When bile is in abundance in the s's their color is yellowish or yellowish-brown; this becomes darker after exposure to the air. If the alimentary tube is in a decidedly acid condition the bilious s's are green. [D, 25.]—**Caddy s's.** The evacuations in yellow fever, which resemble fine, dark, sandy mud. [D, 1.]—**Fatty s's.** S's in which fat is present, observed in diseases of the pancreas.—**Mucous s's.** S's consisting entirely or partly of mucus; observed in certain intestinal inflammations. [α, 34.]—**Rice-water s's.** Watery s's of serum containing detached epithelium and liquid fæces, resembling rice-water; observed in cholera.

STOPCOCK, n. Sto^{2}p'ko^{2}k. Fr., *robinet*. Ger., *Hahn*. A key for regulating the flow of liquid or gas from a reservoir. [α, 48.]

STOPFEND (Ger.), adj. Sto^{2}pf'e^{2}nd. 1. Constipating. 2. Styptic. [L, 521 (α, 48).]

STOPFWACHS (Ger.), n. Sto^{2}pf'va^{3}ch^{2}s. See PROPOLIS.

STOPPAGE, n. Sto^{2}p'e^{2}j. A colloquialism for the obstruction of some natural discharge. [α, 34.]

STOPPING, n. Sto^{2}p'i^{2}n. The operation of plugging a dental cavity. [α, 34.]

STORAX (Lat.), n. m. and f. Stor(sto^{2}r)'a^{2}x(a^{3}x). Gen., *stor'acis.* Fr., *s. sec* (1st def.). Ger., *fester S.* (1st def.). 1. True s.; a fragrant solid resin, somewhat like benzoin, obtained from the stem of *Styrax officinalis.* It was highly esteemed by the ancients, but does not now occur in commerce. [α, 35.] 2. See *Liquid s.*—**Amygdaloid s.** Lat., *styrax amygdaloides.* Fr., *s. amygdaloïde.* Ger., *Mandels'.* A variety with a vanilla-like odor, consisting of dry, brittle masses composed chiefly of yellowish, agglutinated tears; produced, according to some, by the *Styrax officinalis;* according to others, identical with amygdaloid benzoin. [α, 35.]—**Balsamum storacis.** 1. See *S.* (1st def.). 2. See *Liquid s.* 3. The balsam of *Liquidambra altingiana.* [α, 35.]—**Liquid s.** Fr., *styrax liquide* (ou *purifié*). Ger., *flüssiger S., gemeiner S.* Sp., *estoraque liquido* [Sp. Ph.]. A half-fluid, opaque, viscid, grayish-brown resin, of pungent aromatic taste and a pleasant balsam-like smell, obtained from the bark [Norw. Ph., Swed. Ph., Austr. Ph.] (the branches [Gr. Ph.], the inner bark [U. S. Ph., Br. Ph., Ger. Ph., Roum. Ph.]) of *Liquidambar orientalis.* The purified s. of the Br. Ph. is translucent and of a yellow-brown color. The Fr. Cod. recognizes two grades of s., one of which, the *s. purifié,* is purified by melting and straining; and several other ph's order that the s. be purified before use. In its recent state it smells of bitumen or naphthalin. It is soluble in an equal weight of alcohol, is melted by a moderate degree of heat, and at a higher temperature takes fire and burns with a white flame. It contains storesin, styracin, and several other compound ethers, about 0·4 per cent. of an essential oil, small proportions of a fragrant substance (vanillin) and benzoic acid, and a hydrocarbon which exists both as a liquid (styrol) and as a solid (metastyrol). Liquid s. is stimulant and expectorant, but is now rarely used, except, mixed with linseed oil, as an application in scabies and as an ingredient of the compound tincture of benzoin. [B, 5, 180 (α, 35); B, 95 (α, 38).]—**Liquid s. plant.** See LIQUIDAMBAR *orientale.*—**Pilulæ storacis.** Fr., *pilules d'opium balsamiques.* A pill-mass consisting essentially of 15 parts of s. with 5 each of opium and saffron or with 7 each of extract of opium, mastic, olibanum, and benzoin, 11 of licorice-juice, and 4 of saffron, worked up with oil of amber. [B, 119 (α, 38).]—**Prepared s.** See *Liquid s.*—**Resina storacis, Solid s.** See *S.* (1st def.).—**S.-bark.** The foliaceous, brown, fragrant bark remaining after the expression of liquid storax; formerly common in European pharmacy as *cortex thymiamatis.* [α, 35.]—**S. in grains.** Lat., *styrax in granis.* Fr., *s. en larmes.* Ger., *körniger S.* A variety, not now found in commerce, consisting of soft, adhesive tears as large as a pea. [α, 35.]—**S. isaurica.** According to some, liquid s.; according to others, the resin of *Styrax officinalis.* [α, 35.]—**S.-plant.** See STYRAX (1st def.).—**S. von Bogotá** (Ger.). See STYRAX *bogotensis.*—**S. vulgaris.** See *Liquid s.*

STORESIN, n. Sto^{2}r'e^{2}s-i^{2}n. A substance, $C_{36}H_{58}O_3$, forming an important constituent of liquid storax and occurring in two isomeric forms, both of them colorless and amorphous. [α, 35; B, 5, 270 (α, 38).]

STORKBILL, STORK'S-BILL, n's. Sto^{2}rk'bi^{2}l, sto^{2}rkz'bi^{2}l. See PELARGONIUM, GERANIUM *maculatum,* and ERODIUM *cicutarium.*

STÖRUNG (Ger.), n. Stu^{5}r'un^2. See DERANGEMENT.—**Geistess'.** See *Mental* ABERRATION.—**S. des organischen Baues.** See DISORGANIZATION.—**S'entwickelung.** See CENOGENESIS.

STOSS (Ger.), n. Sto^{3}s. See SHOCK (2d def.).—**Herzspitzens'.** See *Apex*-BEAT.—**Herzs'.** See *Heart*-BEAT.

STÖSSEL (Ger.), n. Stu^{5}s'se^{2}l. See PESTLE.

STÖSSER (Ger.), n. Stu^{5}s'se^{2}r. A thruster or pusher. [A, 315 (α, 48).]—**Schlunds'.** See PROBANG.

STOTTERN (Ger.), n. Sto^{2}t'te^{2}rn. See STUTTERING.

STOTTERNHEIM (Ger.), n. Sto^{2}t'te^{2}rn-him. A place in Saxe-Weimar where there is a saline spring. [L. 30, 57 (α, 14).]

STOUT, n. Stu^5'u^{4}t. A strong variety of porter.

STOVE, n. Stov. Fr., *poêle.* Ger., *Ofen.* A hollow stand (generally closed) within which fuel is burned for heating purposes. [α, 48.]—**Salt-water s.** Ger., *Salzwasserofen.* A s. for boiling water that has had its boiling point raised by the addition of common salt or some other saline substance, for the purpose of securing a high temperature for the destruction of micro organisms. [Dobroslawin, "Vratsch.," No. 32, 1885; "St. Petersb. med. Wochenschrift," Jan. 4 (16), 1886, p. 5.]

STRABILISMUS (Lat.), n. m. Stra^{2}b(stra^{3}b)-i^{2}l-i^{2}s'mu^{3}s(mu^{4}s). See STRABISMUS.

STRABISMIC, adj. Stra^{2}b-i^{2}s'mi^{2}k. Fr., *louchant* (1st def.), *strabique* (2d def.), *louche* (2d def.). Ger., *strabitisch, schielend* (2d def.). 1. Pertaining to strabismus. 2. Affected with strabismus.

STRABISMOMETER, n. Strab-i^{2}s-mo^{2}m'e^{2}t-u^{6}r. From στραβισμός, a squinting, and μέτρον, a measure. An instrument for measuring the amount or degree of deviation from the normal position in a squinting eye. [F.]—**Galezowski's binocular s.** A s. consisting of a graduated horizontal bar, on which slide two needles which, when placed opposite the centres of the corneæ, indicate by means of a scale on the bar the degree of deviation. The transverse bar is held on a level with the eyelids, the handle of the instrument upward and the fork of the bar against the root of the nose. [F.]—**Laurence's s.** A s. consisting of an ivory plate molded to the conformation of the lower lid, having a scale of lines and half-lines on its border. The plate is applied to the border of the lower lid of the squinting eye. [F.]

STRABISMUS (Lat.), n. m. Stra^{2}b(stra^{3}b)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). Gr., στραβισμός. Fr., *strabisme.* Ger., *S., Strabosität, Schielen.* Squinting; an inability to bring the visual axes of both eyes to bear simultaneously on one point, the axis of vision of one eye always deviating in a certain direction from the object. It may be the result of over-action, or faulty insertion, weakness, or of paralysis of a muscle. [F.]—**Absolute latent s. divergens.** S. in which the latent divergence is present for all distances, though more marked for the near point. [F.]—**Apparent s.** Convergent or divergent s. in which neither eye moves when the other is closed; due to retinal incongruence. [α, 34.]—**Concomitant s.** S. in which the movements of the squinting eye accompany those of the normal one. When the affected eye is used for fixation, the associated deviation of the eye generally used for fixation is equal to the usual deviation of the squinting eye. [F.]—**Convergent s.** That variety of s. in which the one eye deviates inward toward the nose, so that its visual axis, when prolonged, crosses that of the other eye in front of the point of fixation. [F.]—**Divergent s.** S. in which one eye deviates outward toward the temple, so that the optic axes never meet, but continually diverge from one another if prolonged. [F.]—**Downward s.** See *S. deorsum vergens.*—**Dynamic s.** A tendency or inclination to convergence or divergence, which, under ordinary circumstances, is overcome in the interest of binocular single vision, but which can be detected by the help of vertically refracting prisms. [F.] See INSUFFICIENCY *of an ocular muscle* and HETEROPHORIA.—**External s.** See *Divergent s.*—**Intermittent s.** Of Noyes, s. in which there are periods during which the axes of the eyes are normal. [α, 34.]—**Internal s.** See *Convergent s.*—**Latent s. convergens, Latent s. divergens.** See *Dynamic s.*—**Monolateral s.** See *Unilateral s.*—**Paralytic s.** S. due to paralysis of an ocular muscle. It is distinguished from ordinary or concomitant s. by the fact that the deviation occurs only when the eye is turned in the direction in which the paralyzed muscle would turn the eye, and that this deviation, instead of being constant, increases more and more as the eye is turned in this direction. Later on, a further deviation occurs from spastic contracture of the antagonist of the paralyzed muscle. [B.]—**Periodic s.** S. observed in hypermetropia or myopia, occurring only when accommodation is made for near points, but not when fixation is made for distance. [B; α, 34.]—**Relative latent s. divergens.** Exophoria in which the latent divergence is only present in near vision, while for all other distances, even under the covering hand, the axes of the eyes are parallel. [F.]—**S. adnatus.** Congenital s.; rarely observed. [α, 34.]—**S. alternans.** Concomitant s. in which sometimes one eye deviates, sometimes the other. [α, 34.]—**S. convergens.** See *Convergent s.*—**S. convergens inconstans, S. convergens periodicus.** A periodic convergent s. [B.]—**S. convergens spasticus.** A form of periodic convergent squint so called from the sudden, spasmodic appearance of the deviation. [F.]—**S. deorsum vergens.** S. in which the squinting eye turns downward below the point of fixation of the other eye. [F.]—**S. divergens, S. externus.** See *Divergent s.*—**S. incongruens.** Of von Graefe, s. due to incongruity of the retina. [Stellwag (α, 34).]—**S. internus.** See *Convergent s.*—**S. muscularis.** S. due to muscular action. [α. 34.]—**S. necessarius.** Of Cullen, s. caused by some change in the form or tissues of the eye. [α, 34.]—**S. paralyticus.** See *Paralytic s.*—**S. periodicus.** See *Periodic s.*—**S. spasticus.** S. due to spastic contraction of an ocular muscle; occurring either as a symptom of epilepsy or other central nervous affection, or due to the contracture of the antagonist of a paralyzed muscle. [B.]—**S. supernus, S. sursumvergens, Upward s.** S. in which the squinting eye turns upward beyond the point of fixation of the other eye. [F.]—**Unilateral s.** S. in which the transfer of the squint from one eye to the other does not occur spontaneously, but is artificially induced by covering the eye ordinarily employed in fixation. [F.]

STRABOMETER, n. Stra^{2}b-o^{2}m'e^{2}t-u^{6}r. From στραβός, oblique, and μέτρον, a measure. Fr., *stabomètre.* Ger., *S.* See STRABISMOMETER.

STRABOSITAS (Lat.), n. f. Stra^{2}b(stra^{3}b)-o^{2}s(os)'i^{2}t-a^{2}s(a^{3}s). Gen., *-at'is.* From στραβός, oblique. See STRABISMUS.

STRABOTOMY, n. Stra^{2}b-o^{2}t'om-i^2. From στραβός, oblique, and τομή, a cutting. Fr., *strabotomie.* Ger., *Strabotomie.* The operation for the cure of squint. It consists in dividing the conjunctiva over the line of insertion of the tendon of the contracted muscle, opening the sheath more or less extensively with scissors, passing a strabismus-hook beneath the tendon of the muscle, separating it from the underlying eyeball, and dividing it with scissors close to the line of implantation in the sclerotic. [F.]

STRAFF (Ger.), adj. Stra^{3}f. Stretched, extended; in botany, strict. [L, 31; α, 35.]

STRAGULA (Lat.), **STRAGULUM** (Lat.), n's f. and n. Stra^{2}g(stra^{3}g)'u^{2}l(u^{4}l)-a^3, -u^{3}m(u^{4}m). From *sternere,* to spread out. Fr., *stragule.* A glumella. [α, 35.]

STRAHL (Ger.), n. Stra^{3}l. See RAY (1st def.), BARBULE (2d def.), and FROG (2d def.).—**Flossens'.** See *Fin*-RAY.—**Kiemenhauts'en.** See *Branchiostegal* BONES.—**Marks'.** See *Medullary* RAY.—**Marks'en der Nieren.** See *Medullary* RADII.—**S'enbrechung.** See REFRACTION.—**S'enbündel** [Frommann]. A bundle of interlacing nerve-fibres in the posterior columns of the cord in the vicinity of the sensory nerve-roots. [I, 6 (K).—**S'enkörper.** See *Ciliary* BODY.—**S'enpilz.** See ACTINOMYCES.—**S'ensonne.** See CORONA *radiata.*

STRAHLEND (Ger.), adj. Stra^{3}l'e^{2}nd. See RADIATE (2d def.) and RADIATIFORM.

STRAHLUNG (Ger.), n. Stra^{3}l'un^2. See RADIATION.—**Marks', Peripherische S.** [Tiedemann]. See CORONA *radiata* (2d def.).—**S. des Balkens.** Those fibers at the extremities of the corpus callosum which are prolonged into the cerebral lobes. [K.]—**S. des hinteren Längsbündels.** The radiation of the posterior longitudinal fibres of the tegmentum into the cortex cerebri. [K.]

STRAIN, n. Stran. From *stringere,* to draw tight. The action or effect of bringing to bear on a structure an amount of force sufficient to endanger or impair its integrity, or of throwing on an

organ too great or too long-continued an amount of work.—**Cardiac s.** Cardiac irritability due to severe or protracted exercise or labor. [α, 34.]

STRAIT, n. Strat. Gr., *στενοχωρία*. Lat., *angustia*. Fr., *détroit*. Ger., *Enge*. A contracted passage. [α, 48.]—**Inferior s. of the pelvis.** Fr., *détroit inférieur du bassin*. The lower contracted portion of the pelvic canal; bounded in front by the lower extremity of the symphysis pubis, behind by the tip of the coccyx, and on each side by the lower border of the ischium.—**Superior s. of the pelvis.** Fr., *détroit supérieur du bassin*. The brim, or inlet, of the pelvis; the upper boundary of the true pelvis.

STRAMOINE (Fr.), n. Stra^{3}-mwa^{3}n. See STRAMONIUM; of the Fr. Cod., see DATURA *stramonium*.—**Alcoolature de s.** See *Tinctura* STRAMONII *ex herba recente*.—**Cigarettes de s.** See *Cigarettæ* STRAMONII.—**Emplâtre d'extrait de s.** [Fr. Cod.]. A plaster consisting of 18 parts of extract of stramonium-seeds, 2 of purified elemi, and 4 of compound lead plaster. [B, 95 (α, 38).]—**Extrait de s. (feuille).** See *Extractum* STRAMONII.—**Huile de s.** See *Oleum* STRAMONII.—**Poudre de s.** Stramonium-leaves dried at 40° C., powdered in an iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.]; or sifted through a 1,600-mesh sieve [Russ. Ph.] (leaving one quarter residue [Swed. Ph.]). [B, 95 (α, 38).]—**Sirop de s.** [Fr. Cod.]. A mixture of 3 parts of tincture of stramonium-leaves and 37 of syrup. [B, 95 (α, 38).] Cf. *Sirop de* DATURA.—**S. (semence).** See STRAMONIUM-*seed*.—**Teinture de s.** See *Tinctura* STRAMONII (1st def.).

STRAMONIN, n. Stra^{2}m'o^{2}n-i^{2}n. Fr., *stramoine*. Ger., *S.* A substance obtained from *Datura stramonium*; occurring as small white crystals. [B, 270 (α, 38).]

STRAMONIUM (Lat.), n. n. Stra^{2}m(stra^{3}m)-on'i^{2}-u^{3}m(u^{4}m). Fr., *stramoine, pomme épineuse* (3d def.). Ger., *Dornapfel* (3d def.), *Stechapfel* (3d def.). 1. Of Tournefort, the genus *Datura*. 2. Of Baillon, a section of *Datura*. 3. The *Datura s.* (see *S.-leaves* and *S.-seed*). 4. Of the Austr. Ph., Hung. Ph., and Netherl. Ph., s.-leaves. [α, 35.]—**Candelæ stramonii.** Candles designed for the administration of s. by inhalation, made of 150 parts of pulverized s.-leaves, 70 of potassium nitrate, and 3 of balsam of Peru. [B, 270.]—**Cigarettæ stramonii** [Belg. Ph.], **Cigarræ stramonii.** Fr., *cigarettes de stramoine* [Fr. Cod.]. Cigarettes containing each 1 gramme of the leaves of s. [B, 95 (α, 38).]—**Cigarettæ stramonii compositæ.** Sp., *cigarros de estramonio compuestos* [Sp. Ph.]. Cigarettes containing each 1 gramme of a mixture of 3 grammes of the leaves of s. and 1 gramme each of the leaves of belladonna and *Tussilago farfara*. [B, 95 (α, 38).]—**Emplastrum stramonii** [Belg. Ph.]. A plaster consisting of 14 parts of Burgundy-pitch plaster, 2 of oil of s., and 4 of extract of s.-leaves. [B, 95 (α, 38).]—**Extractum stramonii.** Fr., *extrait de stramoine*. Ger., *Stechapfelsamenextrakt*. An extract made from the seeds [U. S. Ph., Br. Ph., Finn. Ph.] of s., or from the leaves [Ger. Ph. (1st ed.), Belg. Ph., Dan. Ph., Gr. Ph., Swiss Ph.], or from either [Russ. Ph., Netherl. Ph., Fr. Cod.]. [B, 95.]—**Extractum stramonii alcoholicum.** An alcoholic extract made from the dried leaves of s. [B, 119 (α, 38).]—**Extractum stramonii fluidum** [U. S. Ph.]. An extract made by treating 100 grammes of s.-seed in No. 40 powder with a mixture of 3 parts of alcohol and 1 part of water in a percolator till exhausted, reserving 90 c. c., evaporating the rest to a soft extract, mixing the two, and bringing up to 100 with the menstruum. [B, 95 (α, 38).]—**Extractum stramonii foliorum.** Extract of s.-leaves. [B, 95.]—**Extractum stramonii seminis (seu seminum).** Extract of s.-seeds. [B, 95.]—**Extractum stramonii spirituosum** [Netherl. Ph.]. Alcoholic extract of s.-leaves. [B.]—**Folia stramonii.** See *S.-leaves*.—**Fotus stramonii.** Sp., *fomentación de estramonio*. A poultice made by boiling 35 parts of s.-leaves in water enough to make 1,000 [Belg. Ph. (1st ed.)]; or by treating 15 parts of s.-leaves with 520 of water [Sp. Ph.]. [B, 95 (α, 38).]—**Herba stramonii.** See *S.-leaves*.—**Infusum stramonii** [Russ. Ph.]. An infusion made by boiling 18 parts of s.-leaves five minutes in water enough to make 3,000. [B, 95 (α, 38).]—**Oleum stramonii.** Fr., *huile de datura*. Sp., *aceite de estramonio* [Sp. Ph.]. A preparation made by boiling s.-leaves with twice as much olive-oil until the moisture is dissipated, expressing, and filtering. [B, 95 (α, 38).]—**Oleum stramonii compositum.** Sp., *aceite de estramonio compuesto* [Sp. Ph.]. A preparation made by boiling 115 parts each of the leaves of hyoscyamus, tobacco, *Solanum nigrum*, and s., and 230 each of belladonna and poppy leaves, with 1,725 of olive-oil until the moisture is dissipated, expressing, adding 29 parts each of the flowering tops of wormwood, *Balsamita suaveolens*, hypericum, hyssop, lavender, sweet marjoram, crisped mint, rosemary, rue, sage, and thyme, and of elder-flowers, digesting for four days, straining, expressing, and, when settled, filtering. [B, 95 (α, 38).] See also BALSAMUM *tranquillans*.—**Semen (seu semina) stramonii.** See *S.-seed*.—**S. fœtidum.** The *Datura s.* [α. 35.]—**S.-leaves.** Lat., *stramonii folia* [U. S. Ph., Br. Ph.], *folia stramonii* [Ger. Ph.], *herba stramonii*. Fr., *feuilles de stramoine* [Fr. Cod.]. Ger., *Stechapfelblätter, Stachelnussblätter, Dornapfelblätter*. Thorn-apple-leaves; the leaves of *Datura s.* [α, 35.]—**S.-seed.** Lat., *stramonii semen* [U. S. Ph. (seu *semina* [Br. Ph.]), *semen stramonii* [Ger. Ph.]. *s. semina* [Hung. Ph. (1st def.), Netherl. Ph.]. Fr., *semence* (ou *graines*) *de stramoine, stramoine* (*semence*) [Fr. Cod.]. Ger., *Tollkörner, Stechapfelsamen, Igelkolbensamen, Nagwartsamen*. The seeds of *Datura s.* [α, 35.]—**S. spinosum, S. vulgare, S. vulgatum.** The *Datura s.* [α, 35.]—**Tinctura seminis stramonii.** See *Tinctura stramonii* (2d def.).—**Tinctura stramonii.** Fr., *teinture de stramoine* [Fr. Cod.] (1st def.). Ger., *Stechapfelsamentinktur*. 1. A tincture made by macerating s.-leaves with five times as much 60-per-cent. alcohol for three days [Belg. Ph.] (ten days [Fr. Cod.]). 2. Of the U. S. Ph., Br. Ph., Ger. Ph. (1st ed.), Dan. Ph., Swiss Ph., Hung. Ph. (1st ed.), and Swed. Ph., a tincture made from powdered s.-seed by treating in a percolator with alcohol of sp. gr. 0·928 [U. S. Ph.](0·920 [Br. Ph.]), or by macerating or digesting it for some days with from five to ten times as much dilute alcohol. [B, 95 (α, 38).]—**Tinctura stramonii ætherea.** Fr., *teinture éthérée de datura*. A preparation made by treating s.-seed with four times as much ether for a week, and filtering. [B, 119 (α, 38).]—**Tinctura stramonii ex herba recente.** Fr., *alcoolature de stramoine*. A preparation made by macerating fresh s.-leaves with an equal amount of 90-per-cent. alcohol for ten days [Fr. Cod.] (of 92-per-cent. alcohol for three days [Belg. Ph.]), expressing, and filtering. [B, 95 (α, 38).]—**Tinctura stramonii seminum.** See *Tinctura stramonii* (2d def.).—**Unguentum stramonii** [U. S. Ph.]. An ointment made by boiling 60 parts of s.-leaves with 168 of lard till the moisture is consumed, expressing, and adding 2 parts of yellow wax for each 12 of the mixture. [B, 119 (α, 38).]—**Vinum stramonii.** A preparation made by treating 6 parts of s.-seed with 24 of Malaga wine and 3 of alcohol for some days, and filtering. [B, 119 (α, 38).]

STRANG (Ger.), n. Stra^{2}n^{2}. A cord. [α, 17.]—**Burdach'scher S.** See *Cuneate* FUNICULUS.—**Follicularstränge.** See *Lymphoid* CORDS.—**Goll'scher Keils', Goll'scher S.** See COLUMN *of Goll*.—**Grenzs'.** See *Great gangliated* CORD.—**Harnstränge.** See *Superior false* LIGAMENTS *of the urinary bladder*.—**Hinterer Rückenmarks', Hinterer weisser S., Hinters'.** See *Posterior white* COLUMN.—**Hülsenstränge.** See FUNICULI *siliquæ*.—**Keils'.** See *Cuneate* FUNICULUS.—**Knorpels'.** A cartilaginous cord (*e. g.*, the notochord).—**Markstränge.** See *Lymphoid* CORDS.—**Medialer Keils', Medialer S.** See *Cuneate* FUNICULUS.—**Olivenkerns'.** See FASCICULUS *nuclei olivæ*.—**Quintusstränge.** Of Meynert, groups of nerve-fibres which arise from the trigeminal nuclei and run downward through the medulla. [I (K).]—**Rückenmarkseitens'.** See *Lateral* COLUMN.—**Rückenmarksstränge.** See COLUMNS *of the spinal cord*.—**Rückens'.** See *Spinal* CORD.—**Runder S.** See *Restiform* BODY.—**Samens'.** See *Spermatic* CORD.—**Segmentalstränge.** See *Tubuliferous* TISSUE.—**Seitens', Seitlicher S.** See *Lateral* COLUMN.—**Vorderstränge.** See *Anterior* COLUMNS *of the spinal cord*.—**Zarter S.** See COLUMN *of Goll*.

STRANGALIS (Lat.), n. f. Stra^{2}n^{2}g(stra^{3}n^{2}g)'a^{2}l(a^{3}l)-i^{2}s. Gr., *στραγγαλίς*. An induration, especially in a woman's breast.

STRANGLES, n. Stra^{2}n^{2}'g'ls. Ger., *Strengel, Strenge*. In the horse, a febrile disease generally attacking young animals and terminating in the formation of an abscess or abscesses in the areolar tissue of the submaxillary space. The symptoms of choking give rise to this name. [α, 34.]—**Bastard s.** An acute suppurative inflammation of the lymphatics of the submaxillary region and sometimes of the salivary glands, with a tendency to suppurative inflammation of the lymphatic system of other parts. [α, 34.]

STRANGULATE, adj. Stra^{2}n^{2}g'u^{2}l-at. In botany, irregularly contracted and expanded. [α, 35.]

STRANGULATED, adj. Stra^{2}n^{2}g'u^{2}l-at-e^{2}d. Fr., *strangulé*. Ger., *strangulirt*. In a state of strangulation.

STRANGULATIO (Lat.), n. f. Stra^{2}n^{2}g(stra^{3}n^{2}g)-u^{2}l(u^{4}l)-a(a^{3})'shi^{2}(ti^{2})-o. Gen., *-on'is*. See STRANGULATION.—**S. uteri.** An old term for hysteria. [A, 42.]

STRANGULATION, n. Stra^{2}n^{2}g-u^{2}l-a'shu^{3}n. Gr., *πνιγμός* (1st def.), *πνίξ* (2d def.). Lat., *strangulatio* (from *strangulare*, to choke), *strangulismus*. Fr., *s., étranglement*. Ger., *S., Erdrosselung*. 1. The act of choking; the state of being asphyxiated by choking. 2. A constriction; the state of being constricted so as to endanger the life of the part shut off by the stricture. [E.]—**Internal s.** Interference with the normal functions of an organ or part by means of mechanical pressure, *e. g.*, such as may be brought to bear in twists of the intestines and by twisting the pedicle of a tumor. [D, 47.]—**Intrasaccular s.** Fr., *étranglement intrasacculaire*. S. of a hernia by a constriction situated within the sac.

STRANGURIA (Lat.), n. f. Stra^{2}n^{2}g(stra^{3}n^{2}g)-u^{2}r(ur)'i^{2}-a^{3}. See STRANGURY.—**S. cruenta.** See CYSTORRHAGIA.

STRANGURY, n. Stra^{2}n^{2}'u^{2}r-i^{2}. Gr., *στραγγουρία* (from *στράγξ*, a drop, and *οὖρον*, urine). Lat., *stranguria*. Fr., *strangurie*. Ger., *Harnbeschwerde, Harnzwang, Strangurie*. Urination by painful, spasmodic effort. [α, 48.]

STRAPPER, n. Stra^{2}p'u^{5}r. An apparatus for binding up a part by means of strips of flexible material. [α, 48.]—**Miliano's ready s.** A suspensory bandage of webbing fitted with tapes for drawing it tightly around the scrotum. [E.]

STRAPPING, n. Stra^{2}p'i^{2}n^{2}. 1. The process of applying straps; specifically, that of subjecting a part to compression or giving it support by the methodical application of strips of adhesive plaster. 2. Strips of adhesive plaster, also any material for use as straps.

STRATHPEFFER, n. Stra^{2}th-pe^{2}f'u^{5}r. A place in Ross-shire, Scotland, where there is a chalybeate and sulphurous spring. [L, 49, 57 (α, 14).]

STRATIFICATION, n. Stra^{2}t-i^{2}-fi^{2}-ka'shu^{3}n. From *stratum*, a layer, and *facere*, to make. The condition of being stratified; the arrangement of the elements of a body in layers. [α, 35.]

STRATIOTES (Lat.), n. m. Stra^{2}t(stra^{3}t)-i^{2}-ot'ez(as). Gen., *-ot'u*. Gr., *στρατιώτης*. Fr., *stratiote*. Ger., *Wasserfeder, Wasserscheer, Krebsscheer*. Water-soldier; a genus of the *Stratioteæ*, or *Stratiotideæ* (a tribe of the *Hydrocharideæ*). [α, 35.]—**S. aloides.** Fr., *s. à feuilles d'aloès*. Water-houseleek (or -aloe, or -soldier, or -sengreen), knight's pondwort, soldiers' yarrow, wading pondweed; used by the ancients in erysipelas and as a vulnerary. The leaves are emollient and refrigerant, and in India are applied to hæmorrhoids. [α, 35.]

STRATUM (Lat.), n. n. Strat(stra^{3}t)'u^{3}m(u^{4}m). From *sternere*, to spread out. Fr., *strate, couche*. Ger., *S., Schicht*. See LAYER (1st def.).—**External molecular s.** A thin layer of fibrillæ, with intervening granular matter, connected with the lateral branches of Müller's fibres. [L, 31, 332, 352.]—**Flesh-s.** See *Parietal* MESOBLAST.—**Granular s.** See *S. granulosum*.—**Intermediate s. of**

the blastoderm. See MESOBLAST (1st def.).—**Interolivary s.** Of Spitzka, a tract of fibres which extends between the internal accessory olivary body, the rhaphe, and the pyramidal tract; surmised by him to be continuous with the columns of Goll and Burdach in the spinal cord. ["Med. Record," Oct. 18, 1884, p. 421 (K).] —**Kernels'** (Ger.). See *S. granulosum*.—**Ligamenti sacrococcygei postici longi s. profundum** [Barkow]. See LIGAMENTUM *sacrococcygeum posticum*.—**Ligamentum sacrococcygei postici longi s. superficiale.** See LIGAMENTUM *sacrococcygeum posticum superficiale*.—**Ligneous s.** Lat., *s. ligneum*. Fr., *couche ligneuse*. One of the layers (observed on cross-section of the trunk of a tree as annual rings) forming the woody, solid portion of a dicotyledonous plant. [α, 35.]—**Medullary s.** Lat., *s. medullare*. Ger., *Markschicht*. In the stratified thallus of lichens, a colorless layer developed upon the hypothallus. It consists sometimes of simple or branched filaments, sometimes of molecular granulations intermixed with crystals of lime, and sometimes of variously shaped tissues containing gonidia. [α, 35.]—**Mucous s.** See HYPOBLAST (1st def.), LAMELLA *mucosa*, and RETE *mucosum*.—**Serous s., Skin-s.** See EPIBLAST.—**S. adiposum.** A layer of subcutaneous tissue containing fat. [L, 351.]—**S. arymembranosum.** See THYREO-ARYTÆNOIDEUS *superior medialis*.—**S. arysyndesmicum.** See SYNDESMO-ARYTÆNOIDEUS.—**S. bacillatum retinæ.** See *Bacillary* LAYER *of the retina*.—**S. bacillorum.** See *Bacillary* LAYER.—**S. basale.** See under *S. corneum (epidermidis)*.—**S. Bowmani.** See *Bowman's* LAYER.—**S. cellularum pyramidalium.** 1. See *Claustral* FORMATION. 2. The fifth (according to some, the sixth) layer of the hippocampus major, made up of pyramidal ganglion cells. [L, 332.]—**S. cellulosum (placentæ).** The cellular layer of the maternal placenta, as distinguished from the s. spongiosum.—**S. cellulosum of the cochlea.** The cellular layer found in the spiral canal of the cochlea, which brings about the connection of the nerve-bundles entering the cochlea with those in the lamina spiralis. [F, 32.]—**Strata cerebelli primaria.** The principal laminæ, or folia, of the cerebellum. [I, 3 (K).]—**Strata cerebelli secundaria** [Gordon]. The secondary laminæ of the cerebellum. [I, 3 (K).]—**S. cerebelli tertiarium** [Gordon]. One of the smallest subdivisions of the cerebellar laminæ. [I, 3 (K).]—**S. choriocapillare.** See CHORIOCAPILLARIS.—**S. ciliare.** The portion of the orbicularis palpebrarum that is situated along the margin of the lid. [L, 332.]—**S. cinereum.** The second layer of gray matter in the anterior corpora quadrigemina, sometimes described as the nucleus. It is composed largely of neuroglia, containing numbers of small ganglion cells. [I, 17 (K).]—**S. complexum et profundum pontis.** Of Edinger, those fibres from the pes that dip in between the fibres of the crusts. [α, 34.]—**S. complexum pontis.** See *S. superficiale pontis*.—**S. conjunctivum extra peritonæum.** The continuation of the peritonæum in the region of the uterus. [L, 115 (α, 50).]—**S. convolutum.** An important layer of large pyramidal cells seen in a section through the hippocampus major. It is prolonged into the pes hippocampi, its free border forming the point of the uncus. [I, 11 (K).]—**S. corneum (epidermidis).** Fr., *couche cornée* (ou *cornéenne*). Ger., *eigentliche Epidermis, Hornschicht*. The true epidermis; the corneous or most superficial layer of the epidermis, consisting of transparent flattened cells, closely packed together and devoid both of nuclei and of granules. Unna divided the s. corneum into four layers, according to their different color reactions under perosmic acid, etc. They are the (1) superficial (Ger., *Endschicht*), (2) middle, (3) superficial basement (*s. superbasale*), and (4) basement (*s. basale*) layers. The fourth, the s. lucidum of Oehl, is subdivided into two layers, the first of which is the thicker and denser. [G.]—**S. corticale.** 1. See *Cerebral* CORTEX. 2. Any one of the layers of the bark of plants. 3. In a stratified thallus, a layer of pseudo-parenchyma forming the upper surface in crustaceous lichens, the upper and lower surfaces in some foliaceous lichens, or the entire external surface in filamentose and fruticulose lichens. [α, 35.]—**S. cutaneum.** The external dermic layer of the membrana tympani. [L.]—**S. cylindricum.** Ger., *Cylinderzellenschicht*. The layer of columnar cells in the rete mucosum next the corium. [J.]—**S. cylindrorum.** See *Bacillar* LAYER *of the retina*.—**S. dentatum.** See *S. spinosum*.—**S. epitrichiale** [Kerbert]. The special outer or ectal layer of the embryonic epidermis in vertebrates; a kind of envelope inclosing the whole body, and not supposed to take part in the formation of appendages, except, perhaps, feathers. In some animals it is composed of from two to five layers of cells; typically, however, it is supposed to consist of a single layer of very large polygonal cells. In birds and mammals it is shed before or after birth, and is never renewed. In animals which molt it is renewed after birth and is present throughout life. [J, 23: Kerbert, "Arch. f. mikr. Anat.," Bd. xiii. p. 205; Jeffries, "Proc. of the Bost. Soc. of Nat. Hist.," xxii. p. 203; Minot, "Proc. of the Am. Assoc. for the Adv. of Sci.," xxxv, 1885 (J).]—**S. externum orbicularis oris.** The subcutaneous portion of the orbicularis oris. [L.]—**S. externum ovuli Graafiani.** See THECA *folliculi*.—**S. fibrillosum.** Ger., *Nervenfaserschicht, Opticusfaserschicht*. The innermost s. of the retina, made up of fibres of the optic nerve consisting of axis-cylinders only. [L.]—**S. gangliosum (retinæ).** A layer of multipolar, nucleated ganglion cells external to the expansion of the optic nerve. [L, 31, 142, 332.]—**S. gelatinosum.** The fourth layer in the olfactory bulb, consisting of large ganglion-cells with branching processes. [I, 17 (K).]—**S. germinativum.** See *Germinal* SPOT.—**S. globulosum retinæ.** See *S. gangliosum*.—**S. glomerulosum.** Fr., *zone de papilles*. Ger., *Knäuelschicht*. The second layer of the olfactory lobe, counting from the ventral side. It is between the s. olfactorium and the s. gelatinosum, and is characterized by the olfactory glomeruli (see GLOMERULUS *olfactorius*). [J, 10, 30, 35.]—**S. gonimicum.** Ger., *Brutschicht*. In lichens, a greenish s. situated immediately beneath the cortical s. and consisting of gonidial granules (gonimia). [α, 35.]—**S. granulosum.** Fr., *couche rouillée*. Ger., *Körnerschicht, Zellenschicht, Zellenzone, Kernels', rostfarbene Schicht*. A layer of very small cells or of cells containing many granules, such as (1) the layer of minute cells in the cerebellum between the cells of Purkinje and the medullary substance; (2) a layer of minute ganglion-cells imbedded in a mass of medullated nerve-fibres, found in the olfactory lobe between the medullary ring and the s. gelatinosum; (3) the s. of small cells in the cerebral cortex between the formation of the cornu Ammonis and the claustral formation; (4) the s. granulosum epidermidis. [J, 10, 31, 35.]—**S. granulosum epidermidis.** Ger., *Körnchenzellenschicht*. A layer of lozenge-shaped or trapezoid-shaped cells containing numerous coarse roundish granules of eleidin that strongly refract light and render the epidermis more or less opaque. It covers the rete mucosum, and is itself covered by the s. lucidum. [J.]—**S. granulosum (retinæ) externum.** Ger., *äussere Körnerschicht, Schicht der Nervenaussätze*. A layer of several strata of oval nuclei contained in a reticulated matrix immediately internal to the membrana limitans externa, which have processes connected with a retinal rod or cone. [L, 31, 332, 351.]—**S. granulosum (retinæ) internum.** See *Internal granule* LAYER.—**S. horizontale.** That portion of the arciform fibres which covers the surface of the anterior pyramids immediately adjacent to the anterior median fissure. [I, 6 (K).]—**S. horizontale superius.** See *S. musculare superius urethræ*.—**S. inferius constrictoris urethræ.** See *Guthrie's* MUSCLE.—**S. intermedium.** Ger., *Zwischenschicht* (1st def.). 1. Of Meynert, a band of nerve-fibres in the substantia nigra. [I, 17 (K).] 2. The mesoderm. 3. See *S. lucidum*.—**S. intermedium pedunculi.** See *S. intermedium* (1st def.).—**S. intermedium thalami.** One of the subdivisions of the subthalamic regions. [L.]—**S. internum circulare.** See *S. musculare circulare urethræ*.—**S. internum orbicularis oris.** The deep portion of the orbicularis oris. [L.]—**S. laciniosum, S. lacunosum** [Meynert]. A layer of loose nerve-fibres and lymph-spaces seen in a section made through the hippocampus major, continuous with the s. radiatum. [I, 28 (K).]—**S. lemnisci (tegmenti).** See *Inferior* LEMNISCUS.—**S. ligneum.** See *Ligneous s.*—**S. lucidum.** Of Oehl, a translucent layer of the epidermis, consisting of from four to six layers of clear transparent cells, with indefinite outlines and traces of a nucleus. It forms the deeper portion of the s. corneum proper, and separates it from the s. granulosum. [G; J, 30, 31, 32.]—**S. malpighianum, S. Malpighii.** See RETE *mucosum*.—**S. marginale** [Meynert]. A thin medullary lamina of nerve-substance on the upper free surface of the fascia dentata. [I, 17 (K).]—**S. medianum** [Arnold]. A layer of nerve-fibres which pass horizontally through the spinal cord, connecting the anterior and posterior extremities of the arciform fibres. [I, 6 (K).]—**S. medianum horizontale.** See *S. horizontale*.—**S. medianum horizontale pontis Varolii.** The rhaphe of the pons Varolii. [L.]—**S. medium cutis.** See CORIUM (1st def.).—**S. medullare.** See *Medullary s.*, *S. fibrosum*, and *S. olfactorium*.—**S. medullare medium.** See *S. lacunosum*.—**S. moleculare.** Ger., *zellenfreier Rindensaum* (3d def.). 1. Any layer appearing to be composed of minute granules without definite structure. 2. A thin layer of finely reticulated neuroglia, devoid of nerve-cells, between the s. lacunosum and the superficial medullary lamina in the hippocampus major. [J, 10, 35.] 3. The second layer of the cerebral cortex, consisting mainly of neuroglia and fine nerve-fibres, with but few ganglion-cells. [I, 17 (K).]—**S. mortificatum** [Wendt]. The outermost layer of epidermis, consisting of the flat, dead epithelia. [L, 31.]—**S. mucosum (epidermidis).** See RETE *mucosum*.—**S. musculare circulare urethræ.** Muscular fibres beneath the constrictor urethræ, surrounding the membranous portion of the urethra. [L, 142, 332.]—**S. musculare linguæ longitudinale.** See LINGUALIS *inferior*.—**S. musculare linguæ perpendiculare.** Vertical muscular fibres in the tongue. [L, 332.]—**S. musculare linguæ transversum.** See TRANSVERSUS *linguæ*.—**S. musculare transversum urethræ inferius.** See TRANSVERSUS *perinæi profundus*.—**S. musculare urethræ (seu transversum) superius.** Muscular fibres embracing the prostate, continuous with the s. musculare circulare urethræ. [L, 332.]—**S. nigrum.** See LOCUS *niger*.—**S. of Oehl.** See *S. lucidum*.—**S. of Remak.** A narrow layer of medullated nerve-fibres just beneath the first layer of the cortex cerebri. [J, 1 (K).]—**S. of visual cells.** A retinal layer, subdivided into the bacillary layer, the membrana limitans externa, and the internal granule layer. [L, 31.]—**S. olfactorium.** Ger., *Nervenfaserschicht*. The ventral layer of the olfactory bulb, consisting of olfactory nerve-fibres. [L, 332.]—**S. opticum.** The third layer of fine nerve-fibres in the corpora quadrigemina. [I, 17 (K).]—**S. orbitale.** See ORBICULARIS *oculi, pars orbitalis*.—**S. oriens.** Scattered fusiform cells that are representations of the cells of the fifth layer of the cerebral cortex, forming, according to Obersteiner, the sixth layer of the cornu Ammonis. [α, 34.]—**S. palpebrale.** See ORBICULARIS *oculi, pars palpebralis*.—**S. profundum pontis.** Deep transverse fibres of the pons Varolii. [L.]—**S. proligerum.** Fr., *couche proligère*. 1. The discus proligerus, including the cumulus proligerus. [A, 45.] 2. See MEMBRANA *granulosa*.—**S. radiatum.** Of Kupfer, one of the deep layers of the hippocampus major, consisting of radiating nerve-fibres. [I, 28 (K).]—**S. reticulare.** See *Reticular* FORMATION.—**S. reticulare cutis.** See CORIUM (1st def.) and cf. *Reticular* LAYER *of the corium*.—**S. reticulatum.** See *Reticular* FORMATION.—**S. semilunare (cochleæ).** See LIGAMENTUM *spirale*.—**S. spinosum.** Ger., *Stachelschicht*. A layer of prickle-cells. [J.]—**S. spinosum epidermidis.** The rete mucosum, especially the portion of it made up of prickle cells. [L.]—**S. spongiosum (placentæ).** The spongy layer of the maternal placenta.—**S. striatum.** A layer of nerve-fibres forming the inner lamina of the hippocampal gyrus. [J, 6 (K).]—**S. subpapillare.** See *S. vasculosum cutis*.—**S. subthalamicum.** See *Subthalamic* REGION.—**S. superbasale.** See under *S. corneum*.—**S. superficiale pontis.** Ger., *oberflächliche Brückenfasern*. Transverse bundles of fibres upon the ventral surface of the pons Varolii. [L.]—**S. superius constrictoris urethræ.** See

S. musculare superius urethræ.—**S. supravasculare.** See *S. uteri supravasculare.*—**S. thyreo-ary-epiglotticum.** See DEPRESSOR *epiglottidis.*—**S. thyreomembranosum.** See THYREO-EPIGLOTTICUS.—**S. transversale, S. transversum.** See *Arciform* FIBRES.—**S. transversum urethrale.** See *S. musculare superius urethræ.*—**S. uteri infravasculare.** The portion of the inner muscular layer of the uterus internal to the s. vasculare. [L, 332.]—**S. uteri submucosum.** The portion of the inner muscular layer of the uterus immediately beneath the mucous membrane. [L, 332.]—**S. uteri subserosum.** The outer muscular layer of the uterus. [L, 332.]—**S. uteri supravasculare.** The portion of the inner muscular layer of the uterus consisting principally of longitudinal fibres. [L, 332.]—**S. (uteri) vasculare.** The middle portion of the inner muscular layer of the uterus, made of interlacing fibres and blood-vessels. [L, 332.]—**S. vasculosonerveum.** See *S. fibrillosum.*—**S. vasculosum.** See TUNICA *vasculosa.*—**S. vasculosum cutis.** That portion of the corium just beneath the papillæ, occupied by a network of blood-vessels which run parallel to the surface and from which vascular loops are distributed to the papillæ. [G.]—**S. zonale.** Ger., *Gürtelschicht* (2d def.). 1. Of Arnold, the layer formed by the annular arrangement of the arciform fibres around each half of the spinal cord. 2. A layer of reticular substance in the subthalamic tegmental region ; it consists of bundles of white fibres which extend from the crura. [I, 6, 23 (K).]—**S. zonale corporis quadrigemini.** A thin layer of white nervous tissue upon the outer surface of the corpus quadrigeminum. [L. 332.]—**S. zonale corporis striati.** A thin layer of intercrossing nerve-fibres and bundles on the free surface of the striatum and callosum. [J, 67.]—**S. zonale thalami.** See *S. zonale* (2d def.).—**Vascular s.** See *Visceral* MESOBLAST.

STRAUCH (Ger.), n. Stra^3'u^{4}ch^2. See SHRUB.

STRAUSS (Ger.), n. Stra^3'u^{4}s. See THYRSE and STRUTHIO *camelus.*

STRAVADIUM (Lat.), n. n. Stra^2(stra^3)-vad(wa^{3}rd)'i^2-u^{3}m-(u^{4}m). Fr., *stravadie.* The genus *Barringtonia.* [α, 35.]

STRAWBERRY, n. Stra^4'be^{2}r-i^2. The genus *Fragaria,* especially the *Fragaria vesca ;* also the fruit of that and other species. [α, 35.]

STREAK, n. Strek. Lat., *stria.* Fr., *strie, ligne.* Ger., *Streif, Streifen, Rinne.* A line or stripe. [α. 48.]—**Abdominal s's.** See under *Linear* ATROPHY *of the skin.*—**Germinal s.** See *Primitive s.*—**Medullary s.** See *Medullary* GROOVE.—**Primitive s.** Lat., *nota primitiva.* Fr., *ligne primitive* (ou *axiale*). Ger., *Primitivstreif, Primitivstreifen, Axenstreifen* [His]. Syn. : *axial plate, primitive trace.* In embryology, a temporary structure consisting of a sickle-shaped opacity (which becomes a strap-like thickening) of the germinal disc of the blastoderm, starting from that side of the disc which afterward becomes the narrow end, and gradually extending to or beyond the centre of the transparent area ; a linear or strap-like mass of cells formed by direct proliferation from the lower (inner) cells of the epiblast, constituting the origin of the mesoblast. It is the first indication of the lineaments of the future embryo. Supposed by some writers to be the vestige of a blastopore. [A, 5.]—**Purkinje's elliptical light-s's.** An appearance seen by Purkinje while looking at a glowing sponge in darkness. When the image of the sponge lay on the inner side of the point of fixation, there appeared two horns running transversely outward from the margin of the illuminating image, with the convexities upward and downward, so as to inclose an ellipse between the object and the entrance of the optic nerve. [Graefe u. Saemisch (F).]

STREAMING, n. Strem'i^{2}n^2. The passage to and fro of currents in protoplasm. [L, 121.]

STREAMLESS, adj. Strem'le^{2}s. Ger., *stromlos.* Devoid of electrical currents (said of fresh, intact muscles, which do not manifest the active phenomena of dying muscles . [Landois (K).] Cf. *Difference* THEORY.

STREBEN (Ger.), n. Strab'e^{2}n. See NISUS.

STREBLOSIS (Lat.), n. f. Stre^{2}b-los'i^{2}s. Gen., *-los'eos* (*-is*). Gr., στρέβλωσις (from στρεβλός, twisted). See DISLOCATION.

STREBLUS (Lat.), n. m. Stre^{2}b'lu^{3}s(lu^{4}s). From στρεβλός, twisted. Fr., *stréblus.* A genus of the *Urticaceæ.* The *Strebleæ* are a tribe of the *Moroideæ.* [α. 35.]—**S. asper.** Ger., *Schweifbeere.* A tropical Asiatic tree or shrub. The root is used in epilepsy and inflammatory swellings, and is applied to boils and, in fevers, to the whole body. The juice is astringent and antiseptic. [α, 35.]

STRECKBETT (Ger.), n. Stre^{2}k'be^{2}t. An extension-bed. [α, 48.]

STRECKBEWEGUNG (Ger.), n. Stre^{2}k'be^2-vag-un^2. Extension. [L.]

STRECKER (Ger.), n. Stre^{2}k'e^{2}r. See EXTENSOR.—**Aeusserer S. des Vorarmes.** See HUMERO-OLECRANIUS *externus.*—**Aeusserer Unterschenkels'.** See VASTUS *externus.*—**Daumens'.** An extensor muscle of the thumb. [L.]—**Dicker S. des Vorarmes.** See SCAPULO-OLECRANIUS *major.*—**Eigener S. des kleinen Fingers.** See EXTENSOR *digiti minimi proprius.*—**Eigener S. des Zeigefingers.** See EXTENSOR *indicis.*—**Ellenbogens' der Hand.** See EXTENSOR *carpi ulnaris.*—**Fesselbeins'.** See CUBITO-PRÆPHALANGEUS.—**Gemeinschaftlicher Fingers'.** See EXTENSOR *digitorum manus communis.*—**Gemeinschaftlicher langer Zehens'.** See EXTENSOR *digitorum pedis longus.*—**Grosser Daumens'.** See EXTENSOR *ossis metacarpi pollicis.*—**Hinterer S.** See ANCONÆUS (3d def.).—**Hinterer S. des Vorarmes.** See HUMERO-OLECRANIUS *minor.*—**Innerer S. des Vorarmes.** See HUMERO-OLECRANIUS *internus.*—**Kleiner Daumens'.** See EXTENSOR *pollicis brevis* (1st def.).—**Kleiner S. des Vorarmes.** See HUMERO-OLECRANIUS *minor* and ANCONÆUS (3d def.).—**Knies'.** See EXTENSOR *metacarpi obliquus.*—**Kurzer äusserer S.** See ANCONÆUS (3d def.).—**Kurzer äusserer S. des Vorarmes.** See HUMERO-OLECRANIUS *minor.*—**Kurzer Daumens'.** See EXTENSOR *pollicis brevis.*—**Kurzer Speichens'.** See EXTENSOR *carpi radialis brevis.*—**Kurzer S. der grossen Zehe.** See EXTENSOR *hallucis brevis.*—**Kurzer S. des Vorarmes.** See HUMERO-OLECRANIUS *internus.*—**Kurzer Zehens'.** See EXTENSOR *digitorum pedis brevis.*—**Langer Daumens'.** See EXTENSOR *ossis metacarpi pollicis.*—**Langer gemeinschaftlicher Zehens'.** See EXTENSOR *digitorum pedis longus.*—**Langer Speichens'.** See EXTENSOR *carpi radialis longus.*—**Langer S. der Daumens.** See EXTENSOR *pollicis longus.*—**Langer S. des Fesselkron- und Hufbeins.** See FEMORO-PRÆPHALANGEUS.—**Langer S. des grossen Zehe.** See EXTENSOR *hallucis longus.*—**Langer S. des Vorarmes.** See SCAPULO-OLECRANIUS.—**Mittlerer S. des Vorarmes.** See HUMERO-OLECRANIUS *externus.*—**Schenkelbindens'.** See TENSOR *fasciæ latæ.*—**Schiefer S. des Vorderknies.** See EXTENSOR *metacarpi obliquus.*—**S. des Ellenbogengelenks.** See *Triceps* EXTENSOR *cubiti.*—**S. des Fesselbeins.** See CUBITO-PRÆPHALANGEUS.—**S. des Fesselkron- und Hufbeins.** See EPICONDYLO-PRÆPHALANGEUS.—**S. des Knies.** See EXTENSOR *metacarpi obliquus.*—**S. des Kopfs.** See DORSO-MASTOIDEUS.—**S. des Schienbeins.** See EXTENSOR *metacarpi magnus.*—**S. des Vorderfussmuskels.** See EXTENSOR *metacarpi obliquus.*—**S. des Zeigefingers.** See EXTENSOR *indicis.*—**Tiefer Unterschenkels'.** See VASTUS *medius.*—**Vierköpfiger Schenkels'** (oder **Unterschenkels'**). See EXTENSOR *cruris quadriceps.*—**Vorderarms'.** See *Triceps* EXTENSOR *cubiti.*—**Vorderer S. des Fesselkron- und Hufbeins.** See FEMORO-PRÆPHALANGEUS.—**Zweibäuchiger Sprunggelenks'.** See BIFEMORO-CALCANEUS.

STRECKFLÄCHE (Ger.). n. Stre^{2}k'flach^2-e^2. The surface of the tibia from which the extensor muscles arise. [L.]

STRECKMUSKEL (Ger.), n. Stre^{2}k'musk-e^{2}l. See EXTENSOR.—**Gemeinschaftlicher langer S. der Fusszehen.** See EXTENSOR *digitorum pedis longus.*—**Kleiner S. des Vorderarms.** See ANCONÆUS (3d def.).—**Kurzer gemeinschaftlicher S.** See EXTENSOR *digitorum pedis brevis.*—**S. der Zehen.** See EXTENSOR *digitorum pedis.*—**S. des Fusses.** See EXTENSOR *pedis ;* of Theile and Henle, see GASTROCNEMIUS.

STRECKUNG (Ger.), n. Stre^{2}k'u^{2}n^2. Extension. [L.]

STREICHEN (Ger.), n. Strich^2'e^{2}n. Stroking or friction movements in massage. [L, 57 (α, 14).]

STREIF (Ger.), n. Strif. See STREIFEN.

STREIFEN (Ger.), n. Strif'e^{2}n. A stripe, streak, or stria. [A, 521.]—**Baillarger'sche S.** The gray laminæ, separated by layers of white nerve-substance, into which the cerebral cortex is divisible ; best seen in a vertical section of the superior frontal convolution. [I, 17 (K).] Cf. *Vicq d'Azyr'sche S.*—**Gürtels'.** See ZONE.—**Grenzs'.** 1. See TÆNIA *semicircularis.* 2. As a pl., see CORPUS *fimbriatum.*—**Horns'.** See TÆNIA *semicircularis* and LAMINA *cornea* (1st def.).—**Hörs'.** See *Acoustic* STRIÆ.—**Knorpels'.** A streak of cartilage. [L.]—**Lancisi'scher S.** See STRIÆ *longitudinales mediales.*—**Marks'.** See the major list.—**Medianer Sehnens'.** See LINEA *alba* (1st def.).—**Primitivs'.** See *Primitive* STREAK.—**Riechs'.** See STRIA *olfactoria.*—**Schwangerschafts'.** See STRIÆ *gravidarum.*—**Vicq d'Azyr'sche S.** The white laminæ in the cerebral cortex which separate the layers of gray matter. [I, 1 (K).] Cf. *Baillarger'sche S.*—**Weisslicher S. des Schlundkopfes.** See RHAPHE *of the pharynx.*

STREIFENHÜGEL (Ger.), n. Strif'e^{2}n-hu^{6}g-e^{2}l. See CORPUS *striatum.*—**S.-Brückenbahn, S. Brückensystem.** The system of nerve-fibres connecting the pons Varolii and the corpora striata. [I, 27 (K).]—**S'kopf.** See CAPUT *corporis striati.*

STREIFFARN (Ger.), n. Strif'fa^{3}rn. See ASPLENIUM.

STREIFIG (Ger.), adj. Strif'i^{2}g. See STRIATE.

STREIFKRAUTWURZEL (Ger.). n. Strif'kra^3-u^{4}t-vurts-e^{2}l. The root of *Rumex crispus, Rumex obtusifolius,* and related species. [α, 35.]

STREIFSCHUSS (Ger.). n. Strif'shus. A grazing gunshot wound [A, 521 (α, 48).]—**Lufts'.** A contusion ascribed to the wind of a shot. [E.]

STREIFWURZ (Ger.), n. Strif'vurts. The *Rumex crispus.*

STREMMA (Lat.). n. n. Stre^{2}m'ma^3. Gen., *strem'matos* (*-atis*). Gr., στρέμμα (from στρέφειν, to twist). See SPRAIN.

STRENGEL (Ger.), n. Stre^{2}n^2'e^{2}l. See STRANGLES.

STRENGFLÜSSIG (Ger.), n. Stre^{2}n^2'flu^{6}s-si^{2}g. See REFRACTORY.

STRÉPHENDOPODIE (Fr.), n. Stra-fa^{3}n^2-do-po-de. From στρέφειν, to turn, ἔνδον, inward, and πούς, the foot. Of Duval, varus.

STRÉPHOPODIE (Fr.). n. Stra-fo-po-de. Of Duval, any lateral deviation of the foot constituting a deformity. ["Rev. de Chir.," June, 1882, p. 443.]

STREPHOTOME, n. Stre^{2}f'o-tom. From στρέφειν, to turn, and τέμνειν, to cut. An instrument resembling a corkscrew. The spiral shaft is flattened. and has an eye near its point. The handle may be detached. It is used for maintaining invagination of the sac of an inguinal hernia, and at the same time approximating the tendinous structures which it transfixes in its screw-like passage, for the cure of the hernia. [W. D. Spanton, "Ann. of Anat. and Surg.," Oct.. 1882, p. 155.]

STREPITOSUS (Lat.). adj. Stre^{2}p-i^{2}t-os'u^{3}s(u^{4}s). Noisy, strident. See ANGINA *strepitosa.*

STREPITUS (Lat.), n. m. Stre^{2}p'i^{2}t-u^{3}s(u^{4}s). Gen., *strep'itus.* From *strepere,* to make a noise. A noise, a sound. [L, 50 (α. 14).]—**S. aurium.** See TINNITUS *aurium.*—**S. coriaceus.** A sound like the creaking of leather heard on auscultation. [A, 319 (α, 34).]—**S. uterinus.** See *Uterine* SOUFFLE.

STREPSIS (Lat.), n. f. Stre^{2}ps'i^{2}s. Gen., *streps'eos* (*-is*). Gr., *στρέψις*. See Torsion.

STREPTOCOCCUS (Lat.), n. m. Stre^{2}pt-o(o^3)-ko^{2}k'u^{3}s(ku^{4}s). From *στρεπτός*, twisted, and *κόκκος*, a kernel. Fr., *streptocoque*. Ger., *S*. Of Billroth, a micrococcus forming with other micrococci chaplet-like chains. In Saccardo's system, it is distinguished as a genus from *Micrococcus*, not only by the moniliform threads, but especially by the presence of arthrospores instead of endospores. [B, 238. 316 (α, 35).]—**Bonome's s.** A s. obtained from the exudations of the cerebro-spinal meninges and from hæmorrhagic extravasations in the lungs in cases of epidermic cerebro-spinal meningitis. It does not grow upon blood-serum or readily upon any artificial culture medium, and soon loses its pathogenic power when cultivated through a few successive generations. [α, 35.]—**S. acidi lactici.** Of Grotenfeld, a spherical or oval coccus, from 0·5 to 1 μ long and ½ to ⅔ of a μ thick; a non-liquefying s. forming spherical white colonies on gelatin plates. It is found in coagulated milk in Finland. [α, 34.]—**S. aethebius.** A species occurring in human urine. The spheres are 1·25 to 2 μ in diameter, and form chains composed of from 3 to 10 cocci. It liquefies gelatin. On gelatin plates, after two days, small white points appear, which somewhat slowly become disc-shaped and of a dark-gray color. [α, 35.]—**S. albus.** Of Maschek, an aerobic liquefying s. growing in flat circular colonies; found in Freiburg water. [α, 34.]—**S. alvearis.** See Cryptococcus *alveareus*.—**S. ambratus.** A species found in the exudations of the lungs, pus from the nose, and other secretions of sucking calves infected with a form of pneumonia (*pneumonitis vitulorum lactantium*). It consists of more or less elongated filaments composed of colorless, spherical cocci 1 μ in diameter. In gelatin cultures it forms club-shaped colonies. Its inoculations are innocuous to rabbits and guinea-pigs, but reproduce the pneumonia in calves. [α, 35.]—**S. aphthicola.** A species occurring among the epidermic cells and blood-globules and in the milk of domestic animals with the foot-and-mouth disease (formerly supposed to be caused by *Saccharomyces albicans*). The filaments are composed of pale, globular cocci 2 μ in diameter. [α, 35.]—**S. articulorum.** Ger., *S. bei Diphtherie*. The micrococcus of diphtheria; a species composed of spherical cocci from 0·3 to 1 μ in diameter, arranged in chains, often very long, containing each 100 or more cocci. It occurs on and in the diseased mucous membrane in various forms of diphtheria, but, according to its discoverer, Loeffler, is an accidental accompaniment, and not the cause of the disease, although it may produce local or general complications. On gelatin plates, which it does not liquefy, it forms small, light-grayish, hyaline colonies, with small curly lines (chains of cocci) at the border. It is pathogenic to mice, proving fatal in more than one half of the cases in which subcutaneous inoculations or injections of the cultivations are made. If the cultivations are injected into the veins of rabbits, suppuration of the joints is produced in from four to six days, and in the majority of cases death gradually ensues. Guinea-pigs are not affected. [α, 35.]—**S. bombycis.** An organism consisting of oval cocci having a maximum length of 1·5 μ, single or united in straight or curved chains of from 2 to 8; found in great numbers in the juices of the stomach and intestines of silkworms having an infectious disease in which the larva after death becomes soft and finally filled with gases and a blackish-brown putrid fluid. It is not positively ascertained that this s. is the exciting agent of the malady, as other bacteria accompany it. [α. 35.]—**S. brevis.** Of von Lingelsheim, an aerobic and facultative anaerobic, non-liquefying s. growing more rapidly in the usual culture media than *S. pyogenes*. It occurs solitary, in pairs, or in short chains. At the end of twenty-four hours it forms punctiform colonies on gelatin plates; in gelatin stick cultures after three or four days a funnel-like cavity forms near the surface, that finally extends downward for a distance of 4 to 5 mm. It is obtained from normal human saliva. [α, 34.]—**S. cadaveris.** Of Sternberg, an aerobic and facultative anaerobic, non-liquefying s. growing in a decidedly acid medium at ordinary temperatures. It occurs in short chains and has a diameter of 0·5 μ. It was found in the liver of a person that had died of yellow fever. [α, 34.]—**S. Charrini.** Fr., *microbe de la septicémie consécutive au charbon*. A species found by Charrin in the blood of all the viscera, in the urine, and in the fæces of rabbits which had died of anthrax. The filaments are composed of spherical or oval hyaline cocci (as many as 20 in some of the chains). Subcutaneous inoculations kill rabbits in from 18 to 48 hours, producing œdema at the point of injection and great swelling of the spleen. Sparrows and sometimes cats are also affected; dogs and fowls are not. [α, 35.]—**S. cinnabareus.** A species consisting of short chains of spherical cocci, often found on old cultivations. The colonies grow very slowly, forming in about eight days on gelatin, without liquefying it, a knob-like elevation of a cinnabar color. [α, 35.]—**S. coli gracilis.** See *S. gracilis*.—**S. conglomeratus.** A s. occurring in masses made up of chains of cocci and forming firm white scales at the bottom of the tube of a bouillon culture. It is very pathogenic for mice. It is obtained from scarlet-fever patients. [α, 34.]—**S. coronatus.** A species obtained from cultures of air at Göttingen, Germany. The cocci are spherical, about 1 μ in diameter, and united in short chains or sometimes in zooglœa. In gelatin, which it liquefies, this s. forms after two days whitish-yellow points surrounded by a depressed zone. [α, 35.]—**S. coryzæ contagiosæ equorum.** See Schuetzia *equi*.—**S. desidens.** A s. observed in cultures at Göttingen, Germany, occurring as very small, spherical cocci united in short chains. After two days the colonies are punctiform and whitish-yellow; they somewhat slowly become disc-shaped, ovate, with one margin often sinuous, and granular superficially. It softens gelatin at first, and eventually liquefies it. [α, 35.]—**S. diphtheriticus.** See *S. articulorum*.—**S. endocarditicus.** One of the micro-organisms found in ulcerative endocarditis and other diseased states of the heart. It occurs as spherical cocci, 0·5 to 1 μ in diameter, arranged in chains often accumulated compactly in large heaps. [α, 35.] Cf. Bacilli *of endocarditis*.—**S. equi.** See Schuetzia *equi*.—**S. erysipelatis, S. erysipelatos.** The exciting agent of erysipelas. It occurs as very minute cocci, 0·3 to 0·4 μ in diameter, hardly distinguished from *S. pyogenes* except that in stroke cultivations the colonies are more opaque and whitish and show at the periphery numerous projecting chains which give to the cultivation a dendritic appearance. The organism occurs, however, only in erysipelas, while *S. pyogenes* is present in about half of all forms of suppuration. Inoculations of pure cultivations in man and animals produce erysipelas without suppuration; such inoculations have been made with good therapeutic results on patients suffering from malignant tumors, which have improved or entirely disappeared after recovery from the induced attack of erysipelas. [α, 35.]—**S. fermenti.** A species consisting of spherical cocci, 0·2 μ in diameter, arranged chiefly in the form of chains, found in wine and various other saccharine liquids, which it converts into a thick, tenacious mass by developing a form of gum called by Bechamp *viscose*. [α, 35.]—**S. flexuosus.** A s. found in the buccal cavity and in pus in cases of erysipelas. It forms in bouillon cultivations long serpentine chains with a non-coherent sediment. After division the cells are circular or oval. ["Ctrlbl. f. Bakt. u. Parasit.," Apr. 16, 1892, p. 509 (α, 50).]—**S. giganteus urethræ.** Of Lustgarten, a spherical coccus, 0·8 to 1 μ in diameter, occurring in chains often united in thick tangled masses. It is aerobic and forms elongated drop-like colonies on gelatin plates; found in the normal urethra. [α, 34.]—**S. gracilis.** A non-pathogenic species consisting of spherical cocci often arranged in the form of the letter S, found in the intestines and excrement of carnivorous animals and also of new born children. It rapidly liquefies gelatin plates, forming very small dark colonies with well-defined borders. [α, 35.]—**S. hæmatosaprus.** A s. found in putrefying blood, etc. It occurs as spherical cocci, 0·7 to 0·8 μ in diameter, rather loosely united in long flexuose chains. [α. 35.]—**S. havaniensis.** Of Sternberg, a micrococcus from 0·6 to 0·9 μ in diameter, occurring in long chains of cocci in pairs. It was found in the vomit of a yellow-fever patient. [α. 34.]—**S. hydrophoborum.** Ger., *S. bei Rabies*. A common organism in the brain of rabid animals. The cocci are spherical, from 0·5 to 0·7 μ in diameter, and are arranged in very short chains. In the lowest layer of agar-agar it slowly forms whitish points at the temperature of the body. In gelatin, which it liquefies, the colonies grow very slowly, forming heaps which are dense in the middle and loose at the periphery of the cultivation. [α, 35.]—**S. influentiæ.** A s. consisting of numerous filaments composed of very small, globular, hyaline cocci from 0·5 to 0·8 μ in diameter; found in the blood and exudations of horses and asses affected with influenza. [α, 35.]—**S. insectorum.** A s. occurring as oval cocci 0·7 to 1 μ long by 0·55 μ wide, disposed in necklace-shaped filaments, frequently aggregated in zooglœa. It has been observed in the digestive apparatus of the *Blissum leucopterum* when affected with a peculiar infectious disease. [α, 35.]—**S. Kochii.** A species found in the blood, especially in the capillary vessels, of rabbits and mice infected with septicæmia from an injection of an infusion of putrid flesh. The cocci, which are oval, from 0·8 to 1 μ long, and collected in masses, adhere laterally to the blood-corpuscles. [α, 35.]—**S. Krausei.** See *S. pyogenes*.—**S. lacteus.** A species found on gelatin cultivations and in the dust of sleeping apartments. It occurs as spherical cocci, about 0·5 μ in diameter, in chains of from 4 to 16, forming minute, milky-white, rounded drops, which on drying change into white crusts. [α, 35.]—**S. lanceolatus Pasteuri.** Of Gamaleia, the *Micrococcus Pasteuri*. [α, 34.]—**S. liquefaciens.** Of Sternberg, an aerobic and facultative anaerobic liquefying s. obtained from the liver and intestines of yellow-fever patients; not pathogenic to rabbits or guinea-pigs. [α, 34.]—**S. longus.** Of von Lingelsheim, the *S. pyogenes*. [α, 34.]—**S. Lucæ.** A s. found by De Luca in simple chancres, occurring in very minute cocci arranged in chains, which often form zooglœa masses. The colonies in cultures are of a bright-yellowish color. Inoculations with the cultivations induce the typical soft chancre. [α, 35.]—**S. malignus.** The *S. pyogenes malignus* of Flügge, who cultivated it from necrotic embola in a leucocythæmic spleen. The minute cocci, which are not distinguishable from *S. erysipelatos* and *S. pyogenes*, form on gelatin plates (which they do not liquefy) and in puncture cultivations colonies similar to those of *S. erysipelatos* and *S. pyogenes*, except that they are slightly smaller and grow more slowly. Subcutaneous inoculations with small quantities of the cultivations are fatal to mice in from three to five days. Inoculation of the ear of a rabbit produces at first an erysipelas like that from *S. erysipelatos* or *S. pyogenes*, but also in two or three days a general infection which results in death on the fourth day. [α, 35.]—**S. Manfredii.** Of Trevisan, a s. occurring in the sputum of patients with lobar pneumonia. The hyaline, ellipsoid cocci (1 by 0·4 to 0·8 μ in diameters) are disposed in more or less elongated chains. Dogs, rabbits, and guinea-pigs, when inoculated, show the characteristic symptoms of the disease and usually die. [α, 35.] Cf. Micrococci *of pneumonia*.—**S. margaritaceus.** A s. found in putrid blood and other fluids; somewhat large, spherical cocci, rather loosely united into chains of from 10 to 20. [α, 35.]—**S. meningitidos.** A species consisting of globoso-ovoid cocci in long tortuous chains, found by Bonome in the intrameningeal exudations of cerebro-spinal meningitis and in pulmonary hæmorrhagic foci. It differs from *S. erysipelatos* in being evolved neither in blood-serum nor in gelatin. It is pathogenic to mice, rabbits, guinea-pigs, and dogs, but not to pigeons. [α, 35.]—**S. merdarius.** Fr., *streptocoque des selles*. A s. found in human and animal fæces, consisting of very small, slightly curved cocci, forming on gelatin plates, which it does not liquefy, rounded, granular colonies of a deep-brown color. [α. 35.]—**S. morbillosus.** An anaerobic species occurring in young persons, dogs, and hogs affected with measles as spherical cocci, from 1·2 to 1·5 μ in diameter, mostly solitary, sometimes loosely united in short chains. It forms on potatoes, at a temperature of from 27° to 35° C., milky-white, prominent, subhemispherical colonies. [α, 35.]—**S. murisepticus.** Of von Lingelsheim, a variety of *S. longus* that grows scantily on ox serum and is especially virulent when inoculated in mice. [α, 34.]—**S. Nocardi.** A

s. occurring in the milk of cows affected with contagious mammitis as oval cocci, from 1 to 1·2 μ long, arranged in irregular elongated chains. The milk becomes viscid and yellow, and soon coagulates, showing an acid reaction, and, if mixed with the milk of a healthy cow, coagulates that also. Inoculations of the cultivations induce the disease in cows and goats. [*a*, 35.]—**S. nomæ.** Fr., *microcoque du noma.* Spherical cocci, from 0·3 to 0·4 μ in diameter, in closely associated chains, occurring in the liquid of the peripheric œdema of gangrenous stomatitis following infectious diseases, especially measles and pertussis in children. [*a*, 35.]—**S. ochroleucus.** A species found in human urine; spherical, mobile cocci, from 0·2 to 0·8 μ in diameter, forming on the surface of gelatin colonies of a sulphur color. In cultures on coagulated albumin it lives half an hour at a temperature of 100° C. On the same medium or in a saccharine infusion it develops arthrospores from 1·6 to 1·78 μ in diameter. It shows an ultimate acid reaction in inorganic or saccharine infusions. In the presence of urea and in other media, even in an acid medium, the reaction is alkaline. [*a*, 35.]—**S. perniciosus (psittacorum).** An imperfectly known species found as cocci in short chains, usually in zooglœa masses, in the eyes, kidneys, etc., of parrots infected with a very contagious and fatal disease (*mycosis psittacorum*) in which nodules are formed on the surface of the lungs, spleen, kidneys, etc. [*a*, 35.]—**S. phosphoreus.** See MICROCOCCUS *Pflügeri.*—**S. pneumoniæ.** See *S. pyogenes.*—**S. putrefaciens.** A micro-organism frequent in various putrefying substances; spherical cocci, from 0·2 to 0·3 μ in diameter, forming short moniliform threads. [*a*, 35.]—**S. pyogenes.** See Plate iii, Fig. 9. Ger., *Eiterkettencoccus.* A s. occurring as spherical cocci, about 1 μ in diameter, united in fours, fives, or even groups up to twenties (Saccardo) in filaments (chains), which are often united in delicate loops and form larger heaps. Sometimes there is a difference in the size of the cocci composing a chain. Diplococci are also often observed. On gelatin plates, which it does not liquefy, it forms punctiform colonies spreading out on the surface and appearing in the earlier stages of growth, under a low power of the microscope, as yellow spots of regular contour, and afterward as darker, nearly brown spots with chains, sometimes looped, projecting here and there at the borders. In punctures in gelatin, minute, whitish, nearly transparent colonies are developed, and appear as a delicate layer along the track of the puncture. On agar-agar the cultivations are thickest in the middle, thinning gradually in the form of a terrace toward the periphery, where at irregular intervals colonies occur in punctiform masses. A similar growth takes place on solidified blood-serum. The organism does not appear to develop on potatoes. Subcutaneous inoculations and intravenous injections of the cultivations have in the majority of cases no effect on healthy animals. Inoculations on the ears of rabbits cause usually only a temporary redness and swelling. This s. is common in human pus, especially in lymphangeiitis and peritonitis, and, according to Flügge, is the only species developed in cultivations from pus in acute inflammatory gangrene. Though it generally induces less rapid suppuration and destruction of tissue than *S. pyogenes*, "it can penetrate farther into the tissue and infiltrate it before suppuration and destruction" (Flügge). It is pathogenic for mice and rabbits. [*a*, 35.]—**S. radiatus.** A species occurring in cultivations, so called from the radial arrangement of the threads in the colonies in gelatin. It is less than 1 μ in diameter, is sometimes arranged in chains, but oftener in small masses. [*a*, 35.]—**S. Rindfleischii.** A s. consisting of colorless cocci in chains, found in the capillaries in mycosis fungoides and by some regarded as its specific cause. [*a*, 35.]—**S. rubiginosus.** Of Edington, a coccus, having a diameter of 0·4 μ, that grows as yellow points beneath, but as white points upon the surface of gelatin; not pathogenic to rabbits, guinea-pigs or pigs; obtained from the cast-off epidermis and from the blood of scarlatina patients. [*a*, 34.]—**S. saprogenes.** A s. found in putrefied substances, especially in blood; spherical cocci, 1·3 to 1·5 μ in diameter, closely united in short chains. [*a*, 35.]—**S. scarlatinæ.** See *S. rubiginosus.*—**S. Seiferti.** A s. (not to be confounded with *S. influentiæ*) found in the sputum and nasal secretions of persons affected with influenza. It occurs as oval, colorless cocci, 1·5 to 2 μ long by 1 μ broad, in long filaments collected into very numerous glomerules. According to Seifert, it is never found in pneumonia, laryngitis, or pertussis. [*a*, 35.]—**S. septicus.** A s. found in impure earth, not distinguishable under the microscope from *S. pyogenes*, though it has never been observed in man. It forms chains less readily than the latter species, and grows more slowly in cultivations. On gelatin, which it does not liquefy, the colonies (as fine points) do not become visible till after three or four days, and in puncture cultivations not till the fifth or sixth day. Subcutaneous inoculations of minute quantities of the cultivations are fatal to mice in from two to three days. Inoculation on the ear of rabbits sets up a redness, followed by general infection, and death in two or three days. Accumulations of cocci are found in the internal organs of the dead animals, sometimes obstructing the vessels and forming necrotic foci. [*a*, 35.]—**S. septo-pyæmicus.** A s. consisting of spherical cocci, from 0·7 to 0·8 μ in diameter, found in the saliva of persons affected with erysipelas of the throat. On gelatin plates, which it does not liquefy, it slowly forms oval, yellowish-gray colonies, coarsely cut at the border. [*a*, 35.]—**S. suspectus.** A s. said to be common in northern Italy in the blood and spleen of cattle affected with hæmaturia. It forms filaments composed of colorless, spherical cocci, about 1 μ in diameter. [*a*, 35.]—**S. toxicatus.** A s. found in macerations of the poison oak (*Rhus toxicodendron*); spherical cocci, 0·5 μ in diameter, in chains. Inflammation produced by the poison of the plant has been ascribed to this. [*a*, 35.]—**S. ureæ.** Fr., *torule ammoniacale.* Ger., *Harnstoffmicrococcus, Harnpilz.* A s. consisting of spherical cocci, 0·8 μ to 1 μ in diameter, in short chains. It occurs in urine, inducing ammoniacal fermentation. [*a*, 35.] Cf. BACILLUS *ureæ.*—**S. varicellæ.** A s. found in the blood and fresh lymph of the vesicles of chicken-pox; spherical cocci, more than twice as large as *S. variolæ*, and rarely loosely united in short chains. [*a*, 35.]—**S. variolæ.** Spherical cocci, 0·5 μ in diameter, usually loosely united in chains, found in the blood and in the fresh lymph of the vesicles in variola. On potatoes, at a temperature between 22° and 35° C., this s. forms prominent hemispherical yellowish colonies. [*a*, 35.]—**S. vermiformis.** Of Maschek, an aerobic liquefying s. that shows a slow, vermiform progressive movement. Upon gelatin plates it forms yellowish-white colonies that sink into the gelatin as liquefaction occurs. Found by Tils in Freiburg water. [*a*, 34.]—**S. violaceus.** A s. accidentally found on boiled potatoes; short, ovoid cocci, in chains, forming bluish-violet droplets running together to form larger spots 6 mm. or less broad. [*a*, 35.]—**S. Weissii.** See SCHUETZIA *Weissii.*—**S. zythi.** A s. always found in malt liquors having a peculiar odor and acidity; colorless, spherical cocci, 1·2 to 1·5 μ in diameter, in chains. [*a*, 35.]

STREPTOPUS (Lat.), n. n. Stre^{2}pt'o(o^3)-pu^{3}s(pus). From στρεπτός, twisted, and πούς, the foot. Fr., *streptope.* Twisted foot (or stalk); a genus of the *Liliaceæ.* [*a*, 35.]—**S. amplexicaulis, S. amplexifolius, S. distortus.** Fr., *lourier Alexandrien des Alpes.* The ἰδαῖα ῥίζα of Dioscorides; an herb of southern and central Europe, Canada, and the middle United States. The refrigerant, mildly astringent leaves are used in gargles, and the young root is eaten as a salad. [*a*, 35.]

STREPTOTHRIX (Lat.). n. f. Stre^{2}pt'o^{2}th-ri^{2}x. Gen., *-ot'richos* (*-ot'richis*). From στρεπτός, twisted, and θρίξ, the hair. A genus of hyphomycetous *Fungi.* [*a*, 35.]—**S. de Cohn, S. Fœrsteri.** An organism, consisting of fine colorless filaments, found by Cohn in the concretions in the lacrymal ducts. The threads are usually straight, sometimes twisted, and rarely distinctly branched. Its mode of growth and its botanical position are, according to Flügge, unknown. [*a*, 35.]

STRETCHER, n. Stre^{2}ch'u^{5}r. Fr., *brancard.* Ger., *Tragbahre.* 1. A hand-litter. 2. An extension apparatus. [*a*, 17.]—**Ambulance s.** A portable folding s. that may be carried in an ambulance. [*a*, 34.]—**Hospital s.** A folding, rigid, or wheeled hand s. used for transportation of the sick in the hospital. [*a*. 34.]—**Primary s.** See *Ambulance s.*—**Secondary s.** See *Hospital s.*

STREUPULVER (Ger.), n. Stroi'pulf-e^{2}r. Dusting powder, sometimes called lycopodium powder. [G; *a*, 35.]

STRIA (Lat.), n. f. Stri(stri^2)'a^3. Fr., *strie.* Ger., *Streif, Streifen.* A fine line (*e. g.*, a delicate groove, ridge, or streak of color; especially one of a number of such lines when they are parallel). [*a*, 35.]—**Acoustic striæ, Auditory striæ.** Lat., *striæ acusticæ.* Fr., *stries auditives.* Ger., *Hörstreifen.* A series of transverse white lines on the floor of the fourth ventricle at its lower part. They arise near the median line and extend outward, uniting with the auditory nerve-roots. [J, 29 (K).]—**Brown parallel striæ** [Retzius]. See *Colored* LINES *of the enamel.*—**Medullary striæ.** See *Auditory striæ.*—**Meningitic s.** See *Cerebral* MACULÆ.—**Striæ acusticæ.** See *Auditory striæ.*—**S. alba tuberis.** A bundle of fibres, about 1 mm. broad, stretching quite superficially from the corpus mamillare over the tuber cinereum and disappearing beneath the chiasm some 4 or 5 mm. from the mesal border of the crusta. It turns outward beneath the optic tract to the fornix, of which it should be regarded as a detached fasciculus. [*a*, 34.]—**S. anæsthetica.** Of E. Veiel, neurodermatrophia. [L, 57 (*a*, 34).]—**Striæ atrophicæ (cutis).** See *Linear* ATROPHY *of the skin.*—**Striæ ciliares.** An old term for the furrows between the ciliary processes. [F.]—**S. cornea.** See TÆNIA *semicircularis.*—**Striæ corporis callosi externæ.** See *Striæ longitudinales laterales.*—**Striæ cutis.** See *Linear* ATROPHY *of the skin.*—**Striæ externæ.** See *Striæ longitudinales laterales.*—**S. germinativa.** See *Genital* RIDGE.—**Striæ gravidarum.** Ger., *Schwangerschaftstreifen.* Lineæ albicantes due to pregnancy (see under *Linear* ATROPHY *of the skin*).—**Striæ Lancisii.** See *Striæ longitudinales mediales.*—**S. lateralis.** See *S. olfactoria lateralis.*—**Striæ liberæ.** See *Striæ longitudinales mediales.*—**Striæ longitudinales cordis.** Nearly vertical muscular fibres in the upper half of the posterior longitudinal furrow of the heart. [L, 31.]—**Striæ longitudinales corporis callosi.** See *Striæ longitudinales Lancisii.*—**Striæ longitudinales internæ.** See *Striæ longitudinales mediales.*—**Striæ longitudinales Lancisii** (**seu liberæ, seu mediales**). The nerves of Lancisi; antero-posterior white fibres on the upper surface of the corpus callosum on each side of the rhaphe, continuous with the peduncles of the sæptum lucidum. [L, 332.]—**Striæ longitudinales laterales.** Longitudinal white fibres near the margins of the corpus callosum parallel to the striæ longitudinales mediales. [L.]—**Striæ medullares (ventriculi quarti).** See *Auditory striæ.*—**S. medullaris ascendens.** Ger., *Klangstab, aufsteigender Markstreifen.* A white s. at the upper part of the floor of the fourth ventricle, regarded as an accessory motor root of the trigeminal nerve or of the auditory nerve. [L.]—**S. medullaris thalami.** An oblique furrow on the upper surface of the optic thalamus. [I, 17 (K).]—**Striæ obtectæ.** See *Striæ longitudinales laterales.*—**Striæ of Heidenhain.** See RODS *of Heidenhain.*—**Striæ of Retzius.** Brown stripes parallel to the edge of a tooth, probably indicating the formation of the layers of enamel. [L, 351.]—**S. olfactoria.** Ger., *Riechstreifen.* One of the roots of the olfactory nerve. [J, 17 (K).]—**S. olfactoria lateralis.** The external root of the olfactory nerve. [L.]—**S. olfactoria medialis.** The internal root of the olfactory nerve. [L.]—**S. pinealis.** The anterior peduncle of the pineal gland. [*a*, 34.]—**S. semicircularis, Striæ semilunares.** See TÆNIA *semicircularis.*—**Striæ tectæ.** See *Striæ longitudinales laterales.*—**S. terminalis.** See TÆNIA *semicircularis.*—**Striæ transversales (Willisii).** Transverse ridges upon the upper surface of the corpus callosum marking the general direction of its fibres. [L.]—**S. vascularis.** The concave surface of the membranous cochlear canal where it is connected with the spiral ligament of the cochlea. [L, 332.]

STRIATE, STRIATED, adj's. Stri'at, -at-e^{2}d. Lat., *striatus.* Fr., *strié.* Ger., *gestreift.* Striped, streaked, marked with striæ.

STRIATION, n. Stri-a'shu^{3}n. 1. The state of being striate. 2. A striated structure. [*a*, 17, 35.]—**S's of Heidenhain.** See Rods *of Heidenhain.*

STRIATUM (Lat.), n. n. Stri(stri^2)-at(a^{3}t)'u^{3}m(u^{4}m). From *striare*, to furrow. Of Wilder, the corpus striatum. [J, 80 (K).]

STRIBLING SPRINGS, n. Stri^{2}b'li^{2}n^2. A place in Augusta County, Virginia, where there are mineral springs. [*a*, 14.]

STRICKFÖRMIG (Ger.), adj. Stri^{2}k'fu^{5}rm-i^{2}g. See Restiform.

STRICT, adj. Stri^{2}kt. Lat., *strictus* (from *stringere*, to draw tight). Fr., *roide.* Ger., *straff* (1st def.). 1. Of stems, etc., more or less rigid. 2. Very upright or straight. The *Strictæ* of Scopoli are a tribe of plants comprising three gentes, the first including genera (*Circæa*, *Ludwigia*, etc.) with dry fruit, the second genera (*Protium*, *Ribes*, etc.) with succulent fruit, and the third genera (*Hedera*, *Aralia*, etc.) related to the *Umbelliferæ.* [*a*, 35.]

STRICTURA (Lat.), n. f. Stri^{2}kt-u^{2}r(ur)'a^3. See Stricture.—**S. præputii.** See Phimosis.

STRICTURE, n. Stri^{2}kt'u^{2}r. Lat., *strictura* (from *stringere*, to draw tight), *angustia.* Fr., *s. rétrécissement.* Ger., *Striktur*, *Zusammenschnürung*, *Verengerung.* A contracted part of a narrow tube or passage. [E.]—**Cicatricial s.** A s. due to cicatricial contraction. [*a*, 34.]—**Impassable s.** Fr., *rétrécissement infranchissable.* A s. in which the passage is so tortuous and contracted that a filiform bougie can not be passed through it. [*a*, 34.]—**Pelvic-inlet s.** [Lahs]. See *Bandl's* ring.—**Spasmodic s.** A s. due to muscular spasm and not to organic change. [E.]—**S. of the rectum.** Lat., *strictura* (seu *angustatio*) *intestini recti.* Ger., *Aftersperre.* A decrease in the calibre of the rectum, due to the growth of new tissue or to cicatricial contraction. [E.]

STRICTURE-CUTTER, STRICTUROTOME, n's. Stri^{2}kt'-u^{2}r-ku^{3}t''u^{5}r, -u^{2}r-o-tom. From *strictura*, a stricture, and τέμνειν, to cut. An instrument for incising a stricture. [*a*, 34.]

STRICTUROTOMY, n. Stri^{2}kt-u^{2}r-o^{2}t'om-i^2. Fr, *stricturotomie.* The division of a stricture by a cutting operation. [Chibret, "Rec. d'ophth.," June, 1882, p. 321.] See Urethrotomy.

STRIDOR (Lat.), n. m. Strid(stred)'o^{2}r. Gen., *-or'is.* From *stridere*, to make a creaking sound. Fr., *strideur.* Ger., *Schall.* A harsh, shrill sound. [D.]—**Congenital laryngeal s.** Of Suckling, s. produced by spasmodic muscular contraction of the larynx in very young infants. ["Edin. Med. Jour.," xxxviii, p. 205 (*a*, 34).]—**Inspiratory s.** The shrill sound heard in inspiration when the glottis is spasmodically closed or nearly closed. [D.]—**Laryngeal s.** S. produced by temporary or permanent laryngeal stenosis. [*a*, 34.]—**S. dentium.** See Arabos and Brygmus.—**S. serraticus.** Fr., *bruit serratique.* A sound like that produced in sharpening a saw, sometimes heard after tracheotomy, in expiration, as the air traverses the tracheotomy tube. [D, 72.]

STRIDULOUS, adj. Stri^{2}d'u^{2}l-u^{3}s. Lat., *stridulus.* Fr., *stridulant*, *striduleux.* Ger., *knisternd.* Harsh, shrill, or creaking (said of the respiration). [D.]

STRIE (Fr.), n. Stre. See Stria.—**S's de Frommann.** See *Frommann's* lines.—**S. intermédiaire.** See *Hensen's* disc.—**S. obscure.** See *Dark* disc.—**S. optique.** See *Optic* tract.

STRIEGELHAARIG (Ger.), **STRIEGELIG** (Ger.), adj's. Streg'e^{2}l-ha^{3}r-i^{2}g, -e^{2}l-i^{2}g. See Strigose.

STRIEME (Ger.), n. Strem'e^2. Written also *Striemen.* A stripe, a wheal. See Vibex (1st def.) and Vitta (3d def.).—**Rückens'n.** See Vittæ *dorsales.*

STRIGA (Lat.), n. f. Strig(stri^{2}g)'a^3. From *stringere*, to draw tight. Fr., *s.* Ger., *Striegel*, *Striegelhaar.* In botany, a rigid, sharp-pointed, and appressed hair or bristle. [*a*, 35.]

STRIGIL, n. Stri^{2}j'i^{2}l. Gr., στλεγγίς, στλέγγιστρον. Lat., *strigilis* (from *stringere*, to strip off). A scraper used by the ancient bathers. [A, 312 (*a*, 30).] See under *Roman* bath.

STRIGILATION (Fr.), n. Strezh-el-a^3-se-o^{2}n^2. Friction by means of a brush, etc., in massage. [A, 385 (*a*, 48).]

STRIGMENTUM (Lat.), n. n. Stri^{2}g-me^{2}nt'u^{3}m(u^{4}m). From *stringere*, to strip off. Literally, that which is scratched or scraped off; filth or dirt scraped off, especially from the skin after a bath or athletic exercise. [B, 70.]—**S. capitis.** See Pityriasis.

STRIGOSE, STRIGOUS, adj's. Strig-os', -u^{3}s. Lat., *strigosus* (from *striga* [*q. v.*]). Fr., *strigueux.* Ger., *striegelig*, *striegelhaarig.* Covered with strigæ. [*a*, 35.]

STRIKTUR (Ger.), n. Stri^{2}kt-ur'. See Stricture.

STRING-HALT, n. Stri^{2}n^2'ha^{4}lt. See Spring-halt.

STRIOLA (Lat.), n. f. Stri(stri^2)'o^{2}l-a^3. Dim. of *stria*, a furrow. Fr., *striole.* Ger., *Streifchen.* A very delicate stria. [*a*, 35.]

STRIOLATED, adj. Stri'o^{2}l-at-e^{2}d. Lat., *striolatus.* Fr., *striolé.* Marked with striolæ. [B, 38 (*a*, 14).]

STROBILA (Lat.), n. f. Stro^{2}b-i^{2}l(el)'a^3. From στρόβιλος, a pine-cone. An adult tape-worm with its generative segments or proglottides. [B, 28 (*a*, 27).]

STROBILACEOUS, adj. Stro^{2}b-i^{2}l-a'shu^{3}s. Lat., *strobilaceus.* Fr., *strobilacé.* 1. See Strobiliform. 2. Pertaining to a strobile; belonging to or having the characters of the *Strobilaceæ* (of Reichenbach, the *Coniferæ*). [*a*, 35.]

STROBILE, n. Strob'i^{2}l. Gr., στρόβιλος. Lat., *strobilus.* Fr., *s.* Ger., *Zapfen*, *Fruchtzapfen*, *Zapfenfrucht.* A cone (2d def.) of a pine or fir; also the fruit of the hop. [*a*, 35.]

STROBOSCOPE, n. Stro^{2}b'o-skop. From στρόβος, a whirling round, and σκοπεῖν, to examine. Ger., *Stroboskop.* See Zoetrope.

STROKE, n. Strok. Gr., πληγή. Lat., *ictus.* Fr., *coup.* Ger., *Schlag.* 1. A blow. 2. A sudden attack of disease, especially of paralysis or apoplexy. [*a*, 48.]—**Heat s.** See Hyperpyrexia and Insolation (2d def.).—**Paralytic s., S. of apoplexy.** See Apoplexy.

STROM (Ger.), n. Stro^{3}m. See Current.—**Drucks'.** Lit., pressure stream; of Niemeyer, the current produced in a blood-vessel just beyond the point at which an artificial stenosis has been produced. [K, 16.]—**Haupts'.** See *Primary* current.—**Hauts'.** See *Cutaneous* current.—**Nebens'.** See *Faradaic* current.—**Neigungss'.** Of Dubois-Reymond, the natural current in a muscle-rhombus which has its positive pole at or near one of the obtuse angles, the neighborhood of the adjacent acute angle being positive. [K, 16.]—**Nervens'.** See Nerve-current.—**Schleimhauts'.** Of Rosenthal, a natural electrical current existing in the mucous membrane lining the alimentary canal. [K, 16.]—**S'geber.** See Electrode.—**S'uhr.** See Rheometer (2d def.).—**S'wechsler, S'wender.** See Rheotrope.

STROMA (Lat.), n. n. Strom'a^3. Gen., *stro'matos* (*-atis*). Gr., στρῶμα (from στρωννύναι, to spread). Fr., *s.* Ger., *S.*, *Grundgewebe.* 1. The tissue or combination of tissues forming the principal mass of an organ and serving as a kind of matrix or support for its special anatomical elements. According to Littré, the term should be applied to a covering and not to the supporting framework of an organ. 2. The connective-tissue framework of serous membranes exclusive of the endothelium. 3. The cell-body of nucleated red blood-corpuscles, or, in mammalian red blood-corpuscles, the entire mass of the corpuscle exclusive of the coloring matter. [J, 30, 32, 35.] 4. A body, variously shaped, composed of compactly arranged hyphal tissue, bearing the perithecium in pyrenomycetous *Fungi.* [*a*, 35.]—**S. Hisii.** See Hilum *of the ovary.*

STROMBIDÆ (Lat.), n. f. pl. Stro^{2}mb'i^{2}d-e(a^3-e^2). Ger., *Flügelschnecken.* See under Strombus.

STROMBUS (Lat.), n. m. Stro^{2}mb'u^{3}s(u^{4}s). Gr., στρόμβος (from στρέφειν, to twist). 1. Anything twisted up. 2. A spiral snail-shell. [A, 312 (*a*, 21).] 3. A genus of the *Strombidæ*, or wing-shells, which are a family of gasteropodous molluscs. [*a*, 48.]—**S. lentiginosus.** Ger., *fleckige Flügelschnecke*, *Sommersprossen.* A species the operculum of which, with that of *Murex inflatus*, etc., was formerly official as *unguis odoratus*, *blatta byzantina*, etc. [*a*, 35.]

STRONGYLUS (Lat.), n. m. Stro^{2}n(stro^{2}n^2)'ji^{2}l(gu^{6}l)-u^{3}s(u^{4}s). From στρογγύλος, round. Fr., *strongle*, *strongyle.* A genus of entozoic worms. The *Strongylidæ* of Dujardin are an order of the *Nematoda.*—**S. armatus (minor).** See Sclerostoma *equinum.*—**S. bronchialis.** A yellowish viviparous worm, from $\frac{1}{35}$ to $\frac{1}{50}$ inch broad, the male being $\frac{1}{2}$ inch long and the female of double that length. It has been found occasionally in the lungs and bronchial glands of man. [L.]—**S. cernuus.** See Sclerostoma *hypostomum.*—**S. duodenalis.** See Sclerostoma *duodenale.*—**S. elongatus.** A species found in the trachea and bronchi of the hog. [L, 18.]—**S. equinus.** See Sclerostoma *equinum.*—**S. filaria.** A species found in the trachea and bronchi of the sheep, goat, and other ruminants. [L, 17.]—**S. gigas.** See Eustrongylus *gigas.*—**S. hypostomus.** See Sclerostoma *hypostomum.*—**S. longevaginatus.** A species found in the kidney and urinary ducts of man, and once in the parenchyma of the lung of a child. [Diesing (L, 17); L, 57 (*a*, 50).]—**S. lupi.** See Spiroptera *sanguinolenta.*—**S. micruris, S. micrurus.** A species the immature form of which is found in the lungs of young sheep and calves, producing hoose. [L.]—**S. ovinus.** See *S. contortus.*—**S. quadridentatus.** See Sclerostoma *duodenale.*—**S. renalis.** See Eustrongylus *gigas.*

STRONTIA (Lat.), n. f. Stro^{2}n'shi^2(ti^2)-a^3. Fr., *strontiane.* Ger., *Strontian.* Strontium oxide, SrO; a grayish or whitish, porous substance, analogous in structure and chemical properties to lime. [B.]

STRONTIUM (Lat.), n. n. Stro^{2}n'shi^2(ti^2)-u^{3}m(u^{4}m). A bivalent element allied to calcium, found in various minerals and in some mineral waters. It is a yellow metal, rather harder than lead and readily malleable. Sp. gr., 2·5; atomic weight, 87·2; symbol, Sr. [B, 3.] Several of its salts are antiseptic. [*a*. 50.]—**Ammonium and s. arsenate.** The compound $2Sr(NH_4)AsO + H_2O$. [B, 2.]—**S. acetate.** A compound of s. and acetic acid; crystallizing in different forms according to the amount of water which the crystals contain, and having respectively the formulæ $2Sn(C_2H_3O_2)_2 + H_2O$ and $Sn(C_2H_3O_2)_2 + 2H_2O$. [B, 2.]—**S. acrylate.** The compound $Sr(C_2H_3O_2)_2$. [B.]—**S. antimonate.** The compound $Sr(SbO_3)_2 + 6H_2O$. [B, 2.]—**S. arsenate.** A compound of s. and arsenic acid. The monohydric s. arsenate, $Sr.HAsO_4$, is known. [B, 2.]—**S. arsenite.** See *S. metarsenite.*—**S. carbonate.** A substance, $SrCO_3$, occurring in nature as the mineral strontianite and also prepared artificially. [B, 3.]—**S. chloride.** A body, $SrCl_2 + 6H_2O$, forming long, acicular, efflorescent crystals which, on heating, lose their water of crystallization and are reduced to a white powder. [B, 3.]—**S. cyanide.** A substance, $Sr(CN)_2$, prepared by the decomposition of s. ferrocyanide or by the action of hydrocyanic acid on s. hydrate. It is very readily decomposed by the action of carbonic acid. [B.]—**S. ferrocyanide.** A substance, $Sr_2Fe(C_3N_3)_2 + 15H_2O$, produced by the action of s. hydrate on a ferrocyanide of a heavy metal, like copper. [B.]—**S. gallate.** A substance, $(C_7H_5O_5)_2Sr + 4H_2O$, occurring in acicular crystals. [B, 46 (*a*, 14).]—**S. hydroxide.** A white pulverulent substance, $Sr(OH)_2$. [B, 3.]—**S. lactate.** A compound of s. and lactic acid; a diuretic. [*a*, 50.]—**S. metarsenite.** The compound $Sr(AsO_2)_2 + 4H_2O$. [B, 2.]—**S. nitrate.** A crystalline substance, $Sr(NO_3)_2$, or $Sr(NO_3)_2 + 4H_2O$. [B, 3.]—**S. oxalate.** The compound SrC_2O_4. [B, 4.]—**S. oxide.** See Strontia.—**S. pyrothioarsenate.** Neutral s. sulpharsenate, $Sr_2As_2S_7$. [B, 2.]—**S. sulpharsenate.** See *S. pyrothioarsenate* and *S. thioarsenate.*—**S. sulphate.** The compound $SrSO_4$, occurring in nature as the mineral celestine. It forms large, rhombic, light-blue crystals. [B, 3.]—**S. thioarsenate.** Basic s. sulpharsenate, a whitish powder, $Sr_3(AsS_4)_2$. [B, 2.] See also *S. pyrothioarsenate.*

STROPHANTHEIN, n. Stro^{2}f-anth'e-i^{2}n. A substance insoluble in water, formed along with sugar by the decomposition of strophanthin by weak acids. [B.]

STROPHANTHIN, STROPHANTIN, n's. Stro^{2}f-a^{2}nth'i^{2}n, -a^{2}nt'i^{2}n. Fr., *strophantine, strophanthine*. Ger., *S.* A crystallizable glucoside, $C_{20}O_{34}H_{10}$, very bitter and feebly acid, obtained from the seeds, leaves, and bark of *Strophanthus hispidus*. By boiling with dilute acids, it is converted into sugar and strophanthein. It acts, like digitalin, as a cardiac tonic and a diuretic. [B.]

STROPHANTHUS (Lat.), n. m. Stro^{2}f-a^{2}nth(a^{3}nth)'u^{3}s(u^{4}s). From **στρόφος**, a twisted cord, and ἄνθος, a flower. Fr., *strophante*. A genus of the *Apocynaceæ*. [α, 35.]—**S. hispidus.** A Gaboon species identified by some with *S. kombé*. The seeds contain strophanthin, and probably do not differ in properties from those of *S. kombé*. [α, 35.]—**S. kambé, S. kombé.** A weedy climber of Gaboon, where the seeds and those of other species are used as an arrow-poison (*kombé inée*, or *onage*), which acts directly on the heart muscle. They contain strophanthin (the active principle) and ineine. The tincture is used as a heart tonic, like digitalis, though more stimulant and less permanent in its effects. It is considered superior to digitalis as a diuretic, and is recommended in renal complaints with secondary heart-failure. [α, 35.]—**S.-seed.** Lat., *semen strophanthi*. The seed of several species of *S.* Those of *S. kombé* are from 1½ to 2½ ctm. in length and from 4 to 5 mm. in breadth, and have a keel-shaped ridge on each of the flattened sides, one much more prominent than the other. They are covered with appressed silky hairs, varying in color from grayish-green to brown. Those of *S. hispidus* are brown. Another sort, known as white s.-seed, are more densely covered with nearly white hairs. [α, 35.]

STROPHIOLE, n. Stro^{2}f'i^2-ol. Gr., **στρόφιον** (dim. of **στρόφος**, a twisted band). Lat., *strophiola, strophiolum*. Fr., *s.* Ger., *Nabeldecke*. See Appendix *funicularis* and Caruncle (2d def.).

STROPHIUM (Lat.), n. n. Strof(stro^{2}f)'i^2-u^{3}m(u^{4}m). Gr., **στρόφιον** (dim. of **στρόφος**, a band). 1. A bandage. 2. See Strophiole.

STROPHOCEPHALIA (Lat.), n. f. Stro^{2}f-o(o^3)-se^{2}f(ke^{2}f)-al(a^{3}l)'i^2-a^3. From **στρόφος**, a twisted band, and **κεφαλή**, the head. The condition of a strophocephalus. [α, 34.]

STROPHOCEPHALUS (Lat.), n. m. Stro^{2}f-o(o^3)-se^{2}f(ke^{2}f)'-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). Of Geoffroy St.-Hilaire, a rare form of monster having ectopia of the different organs and parts forming the head and face. [α, 34.]

STROPHULUS (Lat.), n. m. Stro^{2}f'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Probably from *strophus* (*q. v.*), since s. has often been ascribed to gastric disorders. Fr., *strophule, dartre poussée, poussée, ébullition, taches de lait*. Ger., *rothes Ausfahren, Schalknötchen, Hitzblätterchen, Wiebeln*. Gum-rash, red-gum, gown, red-gown, tooth-rash, milk-spots, lichen of infants; an obsolescent term for certain papular, erythematous, and eczematous skin eruptions in infants, usually of an evanescent character. [G.]—**S. albidus.** Ger., *weisse Gesämte*. White-gum. The affection described by Willan and others under this name does not correspond to the other varieties of s., but rather to milium. [G, 28.]—**S. candidus.** "Pallid-gown"; s. in which the papules are pale-red or whitish and usually of larger size than in the ordinary forms; probably a form of urticaria. [G, 28.] Cf. Urticaria *papulosa*.—**S. confertus.** Rank red-gum; a variety in which the papular lesions are closely packed together or aggregated in clusters. [G, 28.]—**S. dentitionis.** See *Tooth*-rash.—**S. intertinctus.** A form in which the pimples are distributed over the surface so as to give it a mottled appearance, most commonly on the face, neck, hands, and arms. [G, 28.]—**S. juvenalis.** A variety affecting young persons; the lichen simplex of Willan. [G, 5.]—**S. neonatorum.** The s. of new-born children. Fuchs describes the following varieties: *albidus, intertinctus*, and *lenticularis* (*candidus*). [G, 5.] See *S. albidus*, etc.—**S. pruriginosus.** A form of eruption consisting of rather large, disseminated papules, some of a red color and accompanied with erythema, others not differing in hue from the surrounding skin, which occasion intense itching, especially at night, and show little black crusts on their summits. The disease occurs in infants and young persons, affecting especially the upper portions of the body, less frequently the legs. Its duration varies from a few days to several months. [G, 51.]—**S. simple** (Fr.). Of Hardy, the ordinary forms, except s. pruriginosus. [G, 51.]—**S. volaticus.** "Wildfire rash"; an obsolete term for an ephemeral eruption in infants, sometimes erythematous and sometimes vesicular. [G, 28.]

STROPHOS (Lat.), n. m. Stro^{2}f'o^{2}s. Gr., **στρόφος** (from **στρέφειν**, to twist). See Volvulus.

STROTZEN (Ger.), n. Stro^{3}t'tse^{2}n. Turgescence. [A, 521 (α, 48).]

STROYL, n. Stroil. The *Triticum repens*. [A, 505 (α, 21).]

STRUCTURAL, adj. Stru^{3}kt'u^2-r'l. From *struere*, to build. Pertaining to or affecting structure (cf. *S.* disease. [α, 48.]

STRUMA (Lat.), n. f. Stru^{2}m(strum)'a^3. Fr., *strume* (2d def.). Ger., *S.*, *Kropf* (2d def.). 1. Scrofula. 2. Goître. [E.] 3. In botany, a cushion-like swelling or protuberance. [α, 35.]—**S. amyloides.** See *Amyloid* degeneration.—**S. aneurysmatica.** See *Aneurysmal* goître.—**S. colloides.** See *Colloid* goître.—**S. congenita.** See *Congenital* goître.—**S. cystica (parenchymatosa).** See *Cystic* goître.—**S. cystica pulsans.** See *Pulsating* goître (2d def.).—**S. fibrosa.** See *Fibroid* goître.—**S. follicularis.** Ger., *Drüsenkropf*. See *Follicular* goître.—**S. gangliosa.** See *Ganglionary* goître.—**S. gelatinosa.** See *Colloid* goître.—**S. hyperplastica.** 1. See Goître. 2. Goître in which the gland becomes tattered and nodular. [L, 57 (α, 50).]—**S. hyperplastica aneurysmatica.** See *Aneurysmal* goître.—**S. hyperplastica fibrosa.** See *Fibroid* goître.—**S. hyperplastica follicularis.** See *Follicular* goître.—**S. hyperplastica varicosa.** Goître with dilated veins.—**S. hyperplastica vascularis.** A vascular goître in which there is hyperplasia of the connective tissue. [α, 34.]—**S. hypertrophica simplex.** Simple hyperplasia of the thyreoid gland. [α, 34.]—**S. intrathoracica.** A goitre occupying the anterior mediastinum. [α, 34.]—**S. intrauterina congenita.** Of Spiegelberg, a simple parenchymatous hyperplasia of the thyreoid gland in the new-born; to be distinguished from the transitory enlargement caused by the fact of a face presentation. [A, 15.]—**Strumæ lipomatodes aberratæ renis.** Of Grawitz, small fatty tumors having a connective-tissue network, found beneath the renal capsule. ["Jour. de l'anat. et de la phys.," 1891, p. 454 (α, 34).]—**Strumæ lipomatodes suprarenales.** Neoplasms resembling strumæ lipomatodes aberratæ renis found within the suprarenal capsule. [α, 34.]—**S. lymphatica.** Of Walther, see *Lymphatic* goître.—**S. maligna.** Cancer of the thyreoid gland. [Braun, "Ctrlbl. f. Chir.," July 22, 1882, Beilage, p. 42.]—**S. mollis.** See *Soft* goître.—**S. ossea, S. petrosa.** See *Calcareous* goître.—**S. pulsans.** See *Pulsating* goître.—**S. varicosa.** See *Varicose* goître.—**S. vascularis aneurysmatica.** See *Aneurysmal* goître.—**S. vasculosa.** See *Pulsating* goître.

STRUMATOMIE (Ger.), **STRUMECTOMIE** (Ger.), n's. Strum-a^3-tom-e', -e^{2}k-tom-e'. Excision of the thyreoid gland. [B.]

STRUMIPRIVUS (Lat.), adj. Stru^{2}m(strum)-i^2-pri(pre)'vu^{3}s-(wu^{4}s). From *struma* (*q. v.*), and *privus*, deprived of. Fr., *strumiprive*. Deprived of the thyreoid gland; of a morbid condition, due to loss of the thyreoid gland (cf. Cachexia *strumipriva* and Myxœdema).

STRUMITIS (Lat.), n. f. Stru^{2}m(strum)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). See Thyreoitis.

STRUMODERMA (Lat.), n. n. Stru^{2}m(strum)-o(o^3)-du^{6}rm-(de^{2}rm)'a^3. Gen., *-derm'atos* (*-atis*). From *struma* (*q. v.*), and δέρμα, the skin. See Scrofuloderma.

STRUMOSIS (Lat.), n. f. Stru^{2}m(strum)-os'i^{2}s. Gen., *-os'eos* (*-is*). From *struma* (*q. v.*). See Strumositas.

STRUMOSITAS (Lat.), n. f. Stru^{2}m(strum)-o^{2}s(os)'i^{2}t-a^{2}s(a^{3}s). Gen., *-tat'is*. From *struma* (*q. v.*). Fr., *strumosité*. The goîtrous or the scrofulous diathesis. [α, 34.]

STRUMOUS, adj. Stru^{2}m'u^{3}s. Lat., *strumosus* (from *struma* [*q. v.*]). Fr., *strumeux*. Ger., *strumös, kropfig*. Pertaining to, affected with, or of the nature of struma. [D.]

STRUMPFIA (Lat.), n. f. Strumpf'i^2-a^3. Fr., *strumpfie*. A genus of the *Rubiaceæ*. [α, 35.]—**S. maritima.** Fr., *faux romarin*. A West Indian shrub. The stimulant and tonic flowers and leaves are used for snake-bites and as a febrifuge. [α, 35.]

STRUPPIG (Ger.), adj. Strup'pi^{2}g. See Hirsute.

STRUTHIN, n. Stru^{2}th'i^{2}n. Fr., *struthine*. See Saponin.

STRUTHIO (Lat.), n. m. Stru^{2}th(struth)'i^2-o. Gen., *-on'is*. Gr., **στρουθίων**. The ostrich. [A, 312 (α, 21).]—**S. camelus.** Written also *struthiocamelus*. Gr., **στρουθιοκάμηλος**. Ger., *Strauss, Vogelstrauss*. The African ostrich. The shells of its eggs, *testæ ovorum struthionis* (Ger., *Strausseierschalen*), were formerly official. [α, 35, 39.]

STRUTHIOPTERIS (Lat.) n. f. Stru^{2}th(struth)-i^2-o^{2}pt'e^{2}r-i^{2}s. Gen., *-pter'idos* (*-idis*), *-pter'eos*. From **στρουθίων**, the ostrich, and **πτερίς**, a kind of fern. Fr., *struthioptère, struthioptéris*. A genus of ferns. The *Struthiopterideæ* are a section of the *Polypodiaceæ*. [α, 35.]—**S. germanica.** Ostrich-fern; a species growing in Canada and in the northern United States. [α, 35.]

STRUTHIUM (Lat.), n. n. Stru^{2}th(stru^{3}th)'i^2-u^{3}m(u^{4}m). Gr., **στρουθίον**. The genus *Gypsophila*; of the ancients, see Gypsophila *s.* [α, 35.]

STRYCHNÉ (Fr.), adj. 1. Containing strychnine. 2. Consisting in the use of strychnine (said of a course of medication).

STRYCHNIA (Lat.), n. f. Stri^{2}k(stru^{6}ch^2)'ni^2-a^3. See Strychnine.—**Strychniæ sulphas.** See Strychnine *sulphate*.

STRYCHNIC ACID, n. Stri^{2}k'ni^{2}k. Fr., *acide strychnique*. See Igasuric acid.

STRYCHNINA (Lat.), n. f. Stri^{2}k(stru^{6}ch^2)-nin(nen)'a^3. See Strychnine.—**Granula strychninæ** [Belg. Ph., Fr. Cod.]. Fr., *granules de strychnine* [Fr. Cod.]. Pellets made of strychnine incorporated with sugar or milk-sugar and gum arabic, tragacanth, or honey, and containing each 1 milligramme of the drug. [B, 95 (α, 38).]—**Liquor strychninæ hydrochloratis** [Br. Ph.]. A preparation made by dissolving 2 parts (by measure) of pure strychnine crystals in a mixture of 4 parts of hydrochloric acid of sp. gr. 1·052 and 48 of water, and adding 48 of alcohol of sp. gr. 0·838 and 98 of water. [B, 95 (α, 38).]—**Pilulæ strychninæ.** A mass of 5 centigrammes of strychnine and 96 of confection of rose, divided into 12 pills. [B, 119 (α, 38).]—**Strychninæ sulphas, Sulphas strychninæ.** See Strychnine *sulphate*.

STRYCHNINE, n. Stri^{2}k'nen. Lat., *strychnina* [U. S. Ph., Br. Ph., Belg. Ph., Dan. Ph., Swed. Ph.], *strychninum* [Ger. Ph. (1st ed.), Austr. Ph., Gr. Ph., Hung. Ph. (1st ed.), Netherl. Ph., Russ. Ph., Swiss Ph.], *strychnia* [U. S. Ph., 1870]. Fr., *s.* [Fr. Cod.]. Ger., *Strychnin*. It., *stricnina*. Sp., *estricnina* [Sp. Ph.]. An alkaloid, $C_{21}H_{22}N_2O_2$, obtained from the seeds of *Strychnos nux vomica*, occurring as small, four-sided prisms or rectangular octaedra or as a crystalline powder, having neither color nor odor, but an exceedingly bitter and persistent taste. [B, 95 (α, 38).]—**Alcoolé de s.** (Fr.). See *Tinctura* strychnini.—**Azotate de s.** (Fr.). See *S. nitrate*.—**Granules de s.** (Fr.). See *Granula* strychnini.—**Pilules de s.** (Fr.). See *Pilulæ* strychninæ.—**Sirop de sulfate de s.** [Fr. Cod.] (Fr.). Sp., *jarabe de sulfato estricnico* [Sp. Ph.]. A solution of 5 centigrammes of s. sulphate in 4 grammes [Fr. Cod.] (the necessary amount [Sp. Ph.]) of water, mixed with 196 grammes [Fr. Cod.] (200 [Sp. Ph.]) of syrup. [B, 95 (α, 38).]—**S. hydrate.** A substance, $C_{21}H_{22}N_2O + H_2O$, obtained as a white precipitate by boiling s. in a solution of caustic soda with alcohol,

evaporating, and directing a jet of carbonic-acid gas upon the residuum after dissolving it in water. ["Am. Jour. of Pharm.," Nov., 1888, p. 504 (α, 50).]—**S. nitrate.** Lat., *nitras strychnini* [Netherl. Ph.] (seu *strychnicus* [Dan. Ph., Finn. Ph., Norw. Ph., Swed. Ph.]), *strychninum nitricum* [Ger. Ph., Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph. (2d ed.), Russ. Ph.]. Fr., *azotate de s.* [Fr. Cod.]. Ger., *Strychninnitrat* [Ger. Ph.]. A compound of s. and nitric acid, $C_{21}H_{22}N_2O_2.NHO_3$. [B, 95 (α, 38).]—**S. plant.** See STRYCHNOS *nux vomica*.—**S. sesquiiodide.** The compound $(C_{21}H_{22}N_2O_2)_2I_3$. [B, 10.]—**S. sulphate.** Lat., *strychninæ sulphas* [U. S. Ph.], *strychninum sulfuricum* [Gr. Ph., Russ. Ph.], *sulphas strychninæ* [Belg. Ph.]. Fr., *sulfate de s.* [Fr. Cod.]. Sp., *sulfato estrícnico* [Sp. Ph.]. A substance, $(C_{21}H_{22}N_2O_2)_2SH_2O_4 + 7H_2O$, occurring as colorless, transparent, prismatic or acicular crystals, or as a white, crystalline powder, having no odor but a very bitter taste. S. sulphate is the s. salt usually employed in medicine. It is soluble in 10 [U. S. Ph., Roum. Ph.] (40 [Gr. Ph.], 42 [Russ. Ph.]) parts of cold water, in 1 part [Russ. Ph.] (2 parts [U. S. Ph.]) of boiling water or boiling alcohol, in 60 [U. S. Ph.] (80 (Gr. Ph.], 82 [Russ. Ph.]) parts of cold alcohol, is insoluble in ether, and melts at 135° C., losing 14·1 per cent. of its water of crystallization [U. S. Ph.]. [B, 95 (α, 38).]—**Teinture de s.** (Fr.). See *Tinctura* STRYCHNINI.

STRYCHNINIC ACID, n. Stri2k-ni2n'i2k. Fr., *acide strychninique.* A substance produced by the oxidation of strychnine, occurring in colorless needles, of acid reaction, and forming crystallizable salts. [B, 93 (α, 14).]

STRYCHNINUM [Ger. Ph. (1st ed.), Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph. (1st ed.), Netherl. Ph., Russ. Ph.] (Lat.), n. n. Stri2k'-(stru6ch2)-nin(nen)'u3m(u4m). See STRYCHNINE.—**Nitras strychnini, S. nitricum.** See STRYCHNINE *nitrate.*—**S. sulfuricum.** See STRYCHNINE *sulphate.*—**Tinctura strychnini.** A tincture made with 16 centigrammes of strychnine and 30 grammes of 36-per-cent. alcohol. [B, 119 (α, 38).]

STRYCHNISATION (Fr.), n. Strek-ne-za3-se-o2n2. The state of being under the influence of strychnine.

STRYCHNISM, n. Stri2k'nizm. Lat., *strychnismus.* Fr., *strychnisme.* Of M. Hall, the associated phenomena produced by the administration of large doses of strychnine. [α, 34.]

STRYCHNIUM (Lat.), n. n. Stri2k(stru6ch2)'ni2-u3m(u4m). A univalent radicle, $C_{21}H_{23}N_2O_2$, bearing the same relation to strychnine that ammonium bears to ammonia. The addition compounds of strychnine with acids may be regarded as substitution compounds of s. with acids. [B, 2.]

STRYCHNOL, n. Stri2k'no2l. See STRYCHNINE *hydrate.*

STRYCHNOMANIA (Lat.), n. f. Stri2k(stru6ch2)-no(no3)-man-(ma3n)'i2-a3. From στρύχνος, nightshade, and μανία, madness. Ger., *Strychnomanie.* An old term for the delirium resulting from eating belladonna. [A, 540 (α, 34).]

STRYCHNOS (Lat.), n. f. Stri2k(stru6ch2)'no2s. Gr., στρύχνος. Fr., *s., vomiquier.* Ger., *S., Krähenaugenbaum.* A genus of the *Loganiaceæ.* The *Strychnaceæ* are an order of the *Hypanthæ,* consisting of *S.*; the *Strychneaceæ* are a family of plants comprising *S., Fagræa,* etc.; the *Strychneæ* (Fr., *strychnées*) are an order of the *Corolliflora,* now included in the *Loganiaceæ*; and the *Strychnideæ* are a family of the *Jasminarieæ* consisting of the *Carisseæ* and *Strychneæ.* [α, 35.]—**Aqua strychni Rademacheri.** See *Aqua* NUCUM VOMICARUM.—**Extractum strychni.** See *Extractum* NUCIS VOMICÆ.—**Extractum strychni aquosum** [Ger. Ph., 1st ed., Russ. Ph.]. Syn.: *extractum nucis vomicæ aquosum* [Gr. Ph., Swiss Ph.]. An aqueous extract made from the seed of *S. nux vomica* by exhaustion with boiling (hot [Swiss Ph.]) water and evaporation to dryness (thickness [Gr. Ph.]). [B, 95 (α, 38).]—**Extractum strychni fluidum.** See *Extractum* NUCIS VOMICÆ *fluidum.*—**Extractum strychni siccum.** See *Extractum* NUCIS VOMICÆ *spirituosum pulveratum.*—**Extractum strychni spirituosum.** See *Extractum* NUCIS VOMICÆ.—**Extractum strychni spirituosum cum dextrino.** See *Extractum* NUCIS VOMICÆ *spirituosum pulveratum.*—**Semen** (seu **semina**) **strychni.** See NUX VOMICA.—**Semen strychni pulveratum.** The dried, powdered, and sifted seeds of *S. nux vomica.* [B, 95 (α, 38).]—**S. axillaris.** An East Indian species. The leaves are used for ulcers and the poisonous seeds for fevers. [α, 35.]—**S. bicirrhosa.** An East Indian species. The bitter root is used in abdominal pains and rheumatic affections of the joints, and the fruit-pulp in flatulent colic. [α, 35.]—**S. brachiata.** The *comida de venado* of Peru; probably poisonous, though its fruits are said to be eaten by certain animals. [α, 35.]—**S. castelnæana.** A species growing on the upper Amazon, furnishing an ingredient of curare. [α, 35.]—**S. cogens.** A British Guiana species yielding a constituent of curare. [α, 35.]—**S. colubrina.** Fr., *bois* (ou *racine*) *de couleuvre.* Ger., *Schlangenholzbaum.* The snakewood of the East Indies, where the wood (*lignum colubrinum* [seu *serpentarium officinale,* seu *serpentum,* seu *mungos*]), especially that of the root, is used for snake-bites, as a febrifuge and anthelminthic, and in certain skin diseases. The bark and wood are said to contain respectively nearly 1 and 6 per cent. of mixed alkaloids (strychnine and brucine). [α, 35.]—**S. crevauxiana, S. Crevauxii.** A species found in French Guiana, where it is used in the preparation of curare. [α, 35.]—**S. gaultheriana.** The *hoang-nan* (or *nang*) of the Chinese, who use the poisonous bark in leprosy and hydrophobia. [α, 35.]—**S. Gubleri.** A species found on the upper Orinoco; used in making curare. [α, 35.]—**S. ignatia, S. Ignatii.** Fr., *s. de Saint-Ignace.* Ger., *bitterer Ignatiusbaum.* St. Ignatius's bean; a tree indigenous to the Philippine Islands. The hard, bony, inodorous, bitter seeds, the *ignatia* of the U. S. Ph., which have the same properties as nux vomica, contain 1·2 per cent. of strychnine and 0·5 per cent. of brucine, combined, according to Caldwell, with igasuric acid. [α, 35.]—**S. innocua.** Fr., *s. non nuisible.* An Egyptian and Senegal species said not to be poisonous. The acidulous pulp of the fruit is eaten. [α, 35.]—**S. ligustrina.** A tree of the Eastern Archipelago, yielding a lignum colubrinum used like that of *S. colubrina.* It is thought to be the source of *bidara laut* (of the Indian bazaars), the wood of which contains 2·26 per cent. of brucine without strychnine. [α, 35.]—**S. minor.** A Malabar species. The fruit is used externally in mania. The root is used in diarrhœa and colic and externally in rheumatism. [α, 35.]—**S. muricata.** Ger., *stachelfrüchtiger Krähenaugenbaum.* A species of Timor and neighboring islands, yielding a lignum colubrinum. All parts, especially the fruit, are bitter. The root is used as a febrifuge. [α, 35.] Cf. *S. ligustrina.*—**S. nux vomica.** Fr., *noix vomique.* Ger., *ächter Krähenaugenbaum, gemeiner Brechnussbaum.* The source of nux vomica; a tree indigenous to the East Indies, Indian Archipelago, etc., and found also in northern Australia. The bitter wood and root are used as a febrifuge and in snake-bites. The bark, false angustura-bark, official in the Sp. Ph. as *angustura falsa,* contains brucine. In the East Indies it is the chief ingredient in medicated oils applied to obstinate eruptions, such as those of leprosy and syphilis. The leaves are used externally in paralysis and rheumatism. [B, 95; α, 35.]—**S. potatorum.** Fr., *s. des buveurs.* Clearing (or water-filter) nut of the East Indies; a species that is not poisonous. The nut is rubbed on the inside of vessels to clarify foul water. The fruit is emetic and antidysenteric. The seeds are used in gonorrhœa and diabetes, and, pulverized and mixed with honey, are applied to boils to hasten suppuration. [α, 35.]—**S. pseudo-china.** Fr., *faux quina.* Brazilian copalchi-plant. The bark, which is said to contain extractive, resin, gum, an acid, and a nitrogenous body, but neither strychnine nor brucine, is used in Brazil, under the names of *quina de campo* and *quina de mendanha,* as a substitute for cinchona. [α, 35.]—**S'samen** (Ger.). See NUX VOMICA.—**S. Schomburgkii.** A species of British Guiana, where it enters into the composition of curare. [α, 35.]—**S. spinosa.** Fr., *s. épineux.* Ger., *dorniger Krähenaugenbaum.* A Madagascar tree. The berries are used to prepare a vinous, mildly laxative beverage. The unripe fruit is bitter and poisonous. [α, 35.]—**S. tieute.** Fr., *upas tieuté.* Ger., *javanischer Krähenaugenbaum, Tschettik.* The most poisonous species, a Javanese shrub. The root-bark contains strychnine and is used to prepare an arrow-poison known as *upas tieute* (not to be confounded with the upas antiar of the *Antiaris toxicaria*). The dry seeds are said to contain strychnine and a trace of brucine. [α, 35.]—**S. toxicaria, S. toxifera.** A tree indigenous to British Guiana and the upper regions of the Orinoco and Amazon. The bark is used as an ingredient of curare. [α, 35.]—**S. yapurensis.** A poisonous species of the upper Amazon, believed to enter into the composition of curare. [α, 35.]—**Tinctura strychni.** See *Tinctura* NUCIS VOMICÆ.—**Tinctura strychni ætherea** [Ger. Ph., 1st ed., Russ. Ph.]. A preparation made by macerating the coarsely powdered seeds of *S. nux vomica* with ten times as much spiritus ætheris for 8 days (5 days [Russ. Ph.]). [B, 95 (α, 38).]—**Tinctura strychni Rademacheri** [Russ. Ph.]. See *Tinctura* NUCUM VOMICARUM *Rademacheri.*

STRYPHNODENDRON (Lat.), n. n. Stri2f(stru6f)-no(no3)-den2d'ro2n. From στρυφνός, harsh, and δένδρον, a tree. Fr., *s.* A genus of leguminous trees of the *Adenanthereæ.* [α, 35.]—**S. barbatimão.** The *barbatimão* of Brazil, where the bark, which is highly astringent, is used in wounds, burns, and even hernias. [α, 35.]—**S. jurema.** A species furnishing a bark (see *Jurema* BARK) similar in properties to that of *S. barbatimão.* Baillon identifies it with *Acacia niopo.* [α, 35.]—**S. polyphyllum.** The *angico* of Brazil, by some authors identified with *S. barbatimão.* It yields a translucent, brownish-red gum, which is used as a pectoral. ["Proc. of the Am. Pharm. Assoc.," xxxi (α, 50); α, 25.]

STRYPHNUS (Lat.), adj. Stri2f(stru6f)'nu3s(nu4s). Gr., στρυφνός (from στύφειν, to contract). See ASTRINGENT.

STUBITZA, n. A place in Agram County, Croatia, where there are warm gaseous and alkaline springs. [α, 14.]

STUBNYA, n. A place in Thurócz County, Hungary, where there are warm alkaline and sulphurous springs. [L, 30, 57 (α, 14).]

STÜCK (Ger.), n. Stu6k. A piece, a part, a fragment. [L, 46 (α, 21).]—**Scheibenförmiges S. des Schläfenbeins.** See *Quadrato-jugal* BONE (1st def.) and *Metapterygoid* BONE.—**S'chen.** See FRUSTULE.

STUFENJAHR (Ger.), n. Stuf'e2n-ya3r. See CLIMACTERIUM.

STUFFED, adj. Stu3ft. Of the stem of a *Fungus,* filled with a spongy mass. [α, 35.]

STUHL (Ger.), n. Stul. See CHAIR and STOOL.—**S'ausleerung, S'entleerung, S'gang.** See DEFECATION (2d def.).—**S'verstopfung.** See OBSTIPATION.—**S'zäpfchen.** See SUPPOSITORY.

STUMM (Ger.), adj. Stum. See DUMB.

STUMMEL (Ger.), n. Stum'me2l. See STUMP.

STUMP, n. Stu3mp. Fr., *moignon.* Ger., *Stumpf, Stummel.* The part that is left after a portion of an organ has been removed by amputation or otherwise. [α, 48.]—**Conical s.** A troublesome condition, the result of insufficient flap, of sloughing, or of retraction of muscles, by which the bone is left after an amputation to be covered by granulation tissue. In a s. of this sort the cicatrix possesses very little vitality and is constantly liable to ulceration. The remedy is reamputation. [E.]

STUMPFSICHTIG (Ger.), adj. Stumpf'zi2ch2t-i2g. See AMBLYOPIC.

STUPA (Lat.), n. f. Stu2p(stup)'a3. Gr., στύπη. Fr., *étoupe.* Ger., *Werg.* 1. A tuft or mat of long hairs; tow. 2. A web consisting of simple or branched filaments forming the medullary stratum of the thallus of some lichens. [α, 35.]—**S. picis liquidæ.** Tow impregnated with fresh tar; used as an antiseptic dressing.

STUPACEOUS, adj. Stu2p-a'shu3s. Lat., *stupaceus.* Resembling stupa; tow-like. [α, 35.]

STUPE, n. Stu2p. From *stupa,* tow. Flax or cloth dipped in a liquid to be applied in fomentation. [α, 48.]

STUPEFACIENT, adj. Stu^{2}p-e^2-fa'sh'nt. Gr., *ναρκωτικός*. Lat., *narcoticus*. Fr., *stupéfiant*. Ger., *betäubend*. Producing stupor.

STUPEFACTION, n. Stu^{2}p-e^2-fa^{2}k'shu^{3}n. From *stupefacere*, to make numb. Gr., *νάρκωσις*. Fr., *stupéfaction*. Ger., *Betäubung*. 1. The act of making or becoming stupefied or insensible. 2. Stupor, narcosis. [D.]

STUPEMANIA (Lat.), n. f. Stu^{2}p(stu^{4}p)-e^2-man(ma^{3}n)'i^2-a^3. From *stupor*, numbness, and *μανία*, madness. Mental stupor. [α, 34.]

STUPHA (Lat), n. f. Stu^{3}f(stuf)'a^3. Gr., *στύπη*. See STUPA, STUPE, and *Sweat* BATH.

STUPOR (Lat.), n. m. Stu^{2}p(stup)'o^{2}r. Gen., *-or'is*. Gr., *νάρκη, νάρκωσις*. Fr., *stupeur*. Ger., *S.*, *Benommenheit*, *Betäubung*. A state of apathy with drowsiness.—**Anergic s.** Of Clouston, acute dementia. [α, 34.]—**Delusional s.** See MELANCHOLIA *with s.*—**Digitorum s. a gelu.** See ONGLÉE.—**Epileptic s.** S. following an attack of epilepsy. [D, 36.]—**Lethargic s.** See TRANCE.—**Post-convulsive s.** S. following a convulsion, especially an epileptic convulsion. [D, 36.]—**S. a pressione.** Of Sauvages, apoplectic s. [α, 34.]—**S. formicans.** Of Sauvages, formication. [α, 34.]—**S. melancholicus.** See MELANCHOLIA *with s.*—**S. miliaris.** Paræsthesia of the fingers and toes occurring before the eruption of miliary fever. [α, 34.]—**S. vigilans.** See CATALEPSY.

STUPOROUS, adj. Stu^{2}p'o^{2}r-u^{3}s. 1. In a state of stupor. 2. Attended with stupor.

STUPOSE, adj. Stu^{2}p'os. Lat., *stuposus* (from *stupa*, tow). Fr., *stupeux*. Ger., *wergig*. Having a stupa (in either sense). [α, 35.]

STUPPA (Lat.), n. f. Stu^{2}p(stup)'pa^3. See STUPA.

STUPPEUS (Lat.), adj. Stu^{2}p(stup)'e^2-u^{3}s(u^{4}s). See STUPACEOUS.

STUPRATION, n. Stu^{2}p-ra'shu^{3}n. Lat., *stuprum*. Fr., *stupre*. See RAPE.

STURDY, n. Stu^{5}rd'i^2. See GID.

STURGEON, n. Stu^{6}r'j'n. Fr., *esturgeon*. Ger., *Stör*. See ACIPENSER.

STURMEISENHUT, STURMHUT (Ger.), n's. Sturm'iz-e^{2}n-hut, sturm'hut. See ACONITE.

STURZGEBURT (Ger.), n. Sturts'ge^2-burt. Sudden, unexpected delivery; sometimes while the mother is standing. [L, 57 (α, 14).]

STUTTERING, n. Stu^{3}t'u^{6}r i^{2}n^2. Gr., *τραυλισμός*. Lat., *balbuties*. Fr., *balbutie*, *bégaiement*. Ger., *Stottern*, *Stammeln*. A defect in speech in which there is a spasmodic repetition of the same syllable. [α, 34.]—**Aphasic s.** The s. of aphasic persons. It is more or less spasmodic in characters. [D, 18.]

STÜTZE (Ger.), n. Stu^{6}ts'e^2. See FULCRUM.

STÜTZGEWEBE (Ger.), n. Stu^{6}ts'ge^2-vab-e^2. Supporting tissue, usually connective tissue. [J.]

STY, n. Sti. See HORDEOLUM.

STYCERIC ACID, n. Sti^{2}s-e^{2}r'i^{2}k. Fr., *acide stycérique*. Ger., *Stycerinsäure*. Phenylglyceric acid; an acid, $C_6H_5.CH(OH)$-$CH(OH)CO.OH$, crystallizing from ether as shining plates, melting and decomposing at about 144° C. [B, 3 (α, 38).]

STYCERIN, n. Sti^{2}s'e^{2}r-i^{2}n. Fr., *stycérine*. Ger., *S.* A triatomic alcohol, $C_9H_{12}O_3 = C_3H_4(C_6H_5)(OH)_3$, of the aromatic series, derived from glycerin. It forms a light-yellow, gummy, bitter mass. [B, 93 (α, 14).]

STYCEROL, n. Sti^{2}s'e^{2}r-o^{2}l. Fr., *stycérol*. Phenylglycerol; a substance, $C_6H_5.CH(OH)CH(OH)CH_2.OH$, occurring as a bitter, gum-like mass decomposing when heated. [B, 3 (α, 38).]

STYLAGRA (Lat.), n. f. Stil(stu^{6}l)'a^{2}g(a^{3}g)-ra^3. From *στῦλος*, a pillar, and *ἄγρα*, a seizure. Ger., *Stielzange*. See ANTHOCORYNIUM.

STYLATE, adj. Stil'at. Having a persistent style. [α, 35.]

STYLE, n. Stil. Gr., *στῦλος*. Lat., *stylus*. Fr., *s.* Ger., *Griffel*. 1. The stalk of the stigma; the usually attenuated part of a pistil or carpel, inclosing one or more canals usually filled with thin-walled cellular tissue, connecting the ovary with the stigma. [α. 35.] 2. See STYLET.—**Apical s.** A s. arising from the top of the ovary. [α, 35.]—**Basal s., Basilar s.** A s. attached to the base of the ovary. [α, 35.]—**Lacrymal s.** A stylet made of lead or flexible silver, usually solid, though sometimes tubular, which is introduced through the lacrymal canaliculus and sac into the nasal duct. It is intended to be worn for a length of time in order to maintain the calibre of the duct after a stricture has been divided. [F.]—**Lateral s.** A s. inserted on one side of the ovary. [α, 35.]

STYLET, n. Stil-e^{2}t'. From *stylus*, a pointed instrument. Fr., *s.*, *stilet*, *stilette*. Ger., *Stilett*. 1. A probe. 2. A wire or slender rod passed through a trocar or catheter, for purposes of perforation or of stiffening. [α, 48.]

STYLIDIUM (Lat.), n. n. Stil(stu^{6}l)-i^{2}d'i^2-u^{3}m(u^{4}m). From *στῦλος*, a pillar. Ger., *Fadensäulchen* (1st def.). 1. In certain *Fungi* (*Podaxinei*), a column, formed by the stipe, traversing the peridium. 2. Of Loureiro, the genus *Marlea*. 3. Of Swartz, the principal genus of the styleworts (*Stylideæ*, *Stylidiaceæ*, or *Stylideæ*), an order of monopetalous dicotyledonous plants of the cohort *Campanales*, chiefly Australian herbs. [α, 35.]

STYLINE, adj. Stil'i^{2}n. Lat., *stylinus*. Pertaining to the style. [α. 34.]

STYLISCUS (Lat.), n. m. Stil(stu^{6}l)-i^{2}sk'u^{3}s(u^{4}s). Gr., *στυλίσκος* (dim. of *στῦλος*, a pillar). Fr., *stylisque*. Ger., *Säulchen*. 1. See COLUMELLA (5th def.). 2. The channel leading into the ovary of a flower from the stigma through the style. [α, 35.]

STYLO-AURICULARIS (Lat.), n. m. Stil(stu^{6}l)''o(o^3)-a^{4}r-(u^3-u^{4}r)-i^{2}k-u^{2}l(u^{4}l)-a(a^3)'ri^{2}s. From *στῦλος* (see STYLOID) and *auricula*, the external ear. An anomalous muscle which arises from the styloid process of the temporal bone, and is inserted into the cartilage of the external auditory meatus. [L, 332.]

STYLOCERATOHYOIDEUS (Lat.), n. m. Stil(stu^{6}l)'''o(o^3)-se^{2}r(ke^{2}r)''a^{2}t(a^{3}t)-o(o^3)-hi(hu^6)-o(o^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). From *στῦλος* (see STYLOID), *κέρας*, a horn, and *ὑοειδής*, hyoid. Fr., *stylocératohyoïdien*. See STYLOHYOIDEUS.

STYLOCHONDROHYODES (Lat.), n. m. Stil(stu^{6}l)'''o(o^3)-ko^{2}nd(ch^{2}o^{2}nd)''ro(ro^3)-hi(hu^6)-od'ez(as). From *στῦλος* (see STYLOID), *χόνδρος*, cartilage, and *ὑοειδής*, hyoid. An anomalous muscle which arises from the styloid process of the temporal bone and is inserted into the lesser cornu of the hyoid bone. [L, 332.]

STYLOCORYNA (Lat.), n. f. Stil(stu^{6}l)-o(o^3)-ko^{2}r'i^{2}n(u^{6}n)-a^3. From *στῦλος*, a pillar, and *κορύνη*, a club. A genus of the *Rubiaceæ*. [α, 35.]—**S. Rheedii.** A Malabar tree. The root-bark is used as an emmenagogue and to expel the placenta, and the astringent unripe fruit in diarrhœa, dysentery, etc. [α, 35.]

STYLO-GLOSSAL, adj. Stil-o-glo^{2}s's'l. From *στῦλος* (see STYLOID), and *γλῶσσα*, the tongue. Pertaining to the styloid process of the temporal bone and to the tongue. [α, 48.]

STYLOGLOSSUS (Lat.), n. m. Stil(stu^{6}l)-o(o^3)-glo^{2}s(glos)'su^{3}s-(su^{4}s). Fr., *stylo-glosse*. Ger., *Griffelzungenmuskel*. A muscle which arises from the styloid process of the temporal bone and the stylomaxillary ligament and is inserted into the side and lower surface of the tongue nearly to its tip. [L, 31, 142, 332.]

STYLOHYAL, adj. Stil-o-hi''l. See STYLO-HYOID.

STYLO-HYOID, adj. Stil-o-hi'oid. From *στῦλος* (see STYLOID), and *ὑοειδής*, hyoid. Fr., *stylo-hyoïdien*. Pertaining to the styloid process of the temporal bone and to the hyoid bone. [α. 48.]

STYLOHYOIDEUS (Lat.), n. m. Stil(stu^{6}l)-o(o^3)-hi(hu^6)-o(o^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). Fr., *stylo-hyoïdien*. Ger., *Griffelhornzungenbeinmuskel*, *Griffelzungenbeinmuskel*. A muscle which arises from the styloid process of the temporal bone and is inserted into the body or great cornu of the hyoid bone. [L.]—**S. accessorius, S. alter, S. minor, S. novus, S. profundus, S. secundus.** See STYLOCHONDROHYODES.

STYLO-HYOÏDIEN (Fr.), adj. Ste-lo-e-o-e-de-a^{3}n^2. Stylohyoid; as a n., the stylo-hyoideus muscle. [α, 17.]

STYLOID, adj. Stil'oid. From *στῦλος*, a pillar, and *εἶδος*, resemblance). Lat., *styloideus*, *graphidioides*. Fr., *styloïde*. Ger., *stielförmig*. Resembling a style or pointed instrument (said of certain osseous processes). [α, 48.]

STYLOÏDE (Fr.), adj. Ste'lo-ed. Styloid; as a n., a styloid process or bone. [A, 385 (α, 48).]—**S. de l'os hyoïde** [Agassiz]. See *Stylo-hyal* BONE.

STYLOLARYNGEUS (Lat.), n. m. Stil(stu^{2}l)-o(o^3)-la^{2}r(la^{3}r)-i^{2}n(u^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From *στῦλος* (see STYLOID), and *λάρυγξ*, the larynx. See PHARYNGOEPIGLOTTICUS.

STYLOMASTOID, adj. Stil-o-ma^{2}st'oid. For deriv., see STYLOID and MASTOID. Ger., *stylomastoidisch*. Pertaining to the styloid and mastoid processes of the temporal bone. [α, 48.]

STYLOMAXILLARIS (Lat.), n. m. Stil(stu^{6}l)-o(o^3)-ma^{2}x-(ma^{3}x)-i^{2}l-la(la^3)'ri^{2}s. Fr., *stylo-maxillaire*. 1. See DIGASTRICUS (2d def.). 2. An anomalous muscle which arises from the styloid process of the temporal bone and is inserted into the stylo-maxillary ligament. [L.]

STYLO-MAXILLARY, adj. Stil-o-ma^{2}x'i^{2}l-a-ri^2. From *στῦλος* (see STYLOID), and *maxilla* (*q. v.*). Pertaining to the styloid process of the temporal bone and to the jaw. [α, 48.]

STYLOPHARYNGEUS (Lat.), n. m. Stil(stu^{6}l)-o(o^3)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From *στῦλος* (see STYLOID), and *φάρυγξ*, the pharynx. Fr., *stylo-pharyngien*. Ger., *Griffelschlundkopfmuskel* (1st def.), *oberer Zungenbeinastmuskel des Schlundkopfes* (2d def.). 1. A muscle which arises from the base of the styloid process of the temporal bone and is inserted into the side of the pharynx, the margin of the glottis, and the pharyngo-epiglottidean ligament. [L, 31, 142, 332.] 2. A muscle of the lower animals arising from the styloid bone and inserted into the side of the pharynx, of which it is a constrictor. [L.]—**S. internus.** An anomalous duplication of the s. [L, 332.]

STYLOPHARYNGOLARYNGEUS (Lat.), n. m. Stil(stu^{6}l)'''o-(o^3)-fa^{2}r(fa^{3}r)-i^{2}ng^2''o(o^3)-la^{2}r(la^{3}r)-i^{2}n(u^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From *στῦλος* (see STYLOID), *φάρυγξ*, the pharynx, and *λάρυγξ*, the larynx. See STYLOPHARYNGEUS (1st def.).

STYLOPODIUM (Lat.), n. n. Stil(stu^{6}l)-o(o^3)-pod(po^{2}d)'i^2-u^{3}m-(u^{4}m). From *στῦλος*, a pillar, and *πούς*, the foot. Fr., *stylopode*. Ger., *Griffelfuss*, *Griffelpolster*. A disc-like enlargement at the base of some styles. [α, 35.]

STYLOSANTHES (Lat.), n. f. Stil(stu^{6}l)-os-a^{2}nth(a^{3}nth)'ez(as). From *στῦλος*, a pillar, and *ἄνθος*, a flower. A genus of the *Leguminosæ*. The *Stylosantheæ* are a subtribe of the *Hedysareæ*. [α, 35.]—**S. procumbens, S. viscosa.** A laxative and diuretic species found in Brazil. [α, 35.]

STYLOSPORE, n. Stil'o-spor. From *στῦλος*, a pillar, and *σπόρος*, a seed. Fr., *s.* A spore borne upon a filament; in lichens, a colorless, usually oblong, body abjointed from a sterigma in a special conceptacle (pycnide). [α, 35.]

STYLO-STAPHYLIN (Fr.), adj. Ste-lo-sta^3-fe-la^{2}n^2. Pertaining to the styloid process of the temporal bone and to the velum of the palate. [α, 48.]

STYLOSTEGIUM (Lat.), n. n. Stil(stu^{6}l)-o(o^3)-stej(ste^{2}g)'i^2-u^{3}m(u^{4}m). From *στῦλος*, a pillar, and *στέγος*, a house. Ger., *Griffeldeckel*. See GYNOSTEGIUM.

STYLOSTEMON, n. Stil-o-stem'o2n. From στῦλος, a pillar, and στήμων, a thread. Of Mönch, a stamen inserted on the style. [a, 35.]

STYLOSTEMUS (Lat.), adj. Stil(stu6l)-o(o3)-stem(stam)'u4s-(u4s). From στῦλος, a pillar, and στήμων, a thread. Fr., *stylostème*. Ger., *griffelstaubfädig*. Having a style and stamens; of Desvaux, hermaphrodite. [a, 35.]

STYLOSTEOPHYTUM (Lat.), n. n. Stil(stu6l)-o2st-e2-o2f'i2t-(u6t)-u3m(u4m). From στῦλος, a pillar, ὀστέον, a bone, and φυτόν, a plant. A style-shaped exostosis. [L, 50 (a, 48).]

STYLOSTIXIS (Lat.), n. f. Stil(stu6l)-o(o3)-sti2x'i2s. Gen., *-stix'eos (-is)*. From στῦλος, a pillar, and στίξις, a pricking. See Acupuncture.

STYLOSUS (Lat.), adj. Stil(stu6l)-os'u3s(u4s). Having very long or numerous styles. [a, 35.]

STYLO-THYRO-PHARYNGIEN (Fr.), n. Ste-lo-te-ro-fa3-ra2n2-zhe-a3n2. See Stylopharyngeus.

STYLOTONSILLARIS (Lat.), n. m. Stil(stu6l)-o(o3)-to2ns-(tons)-i2l-la(la3)'ri2s. From στῦλος (see Styloid), and *tonsilla*, a tonsil. Of Luschka, fibres of the stylopharyngeus that are inserted into the fibrous covering of the tonsil. [L, 332.]

STYMA (Lat.), n. n. Stim(stu6m)'a3. Gen., *stym'atos (-atis)*. Gr., στῦμα (from στύειν, to erect). Fr., *styme*. See Priapism.

STYMATOSIS (Lat.), n. f. Sti2m(stu6m)-a2t(a3t)-os'i2s. Gen., *-os'eos (-is)*. From στῦμα, priapism. Ger., *Harnröhrenblutung*. Hæmorrhage from the penis, especially when associated with priapism. [L, 50 (a, 14); a, 34.]—**S. prostatica.** Ger., *Vorsteherdrüsenharnröhrenblutung*. S. originating in the prostate. [L, 50 (a, 14).]—**S. seminalis.** S. originating in the seminal vesicles. [L, 50 (a, 14).]—**S. testicularis.** S. originating in the testicles. [L, 50 (a, 14).]

STYPHAGE (Fr.), n. Ste-fa3zh. 1. A process for modifying the action of an energetic external revulsive (or refrigerant) by interposing some textile substance. ["Sem. méd.," 1887, p. 419 (a, 18).] 2. Of Bailly, local refrigeration by the application of pledgets of lint steeped in methyl chloride. ["Lancet," Mar. 10, 1888, p. 489 (a, 50).]

STYPHELIA (Lat.), n. f. Sti2f(stu6f)-el(e2l)'i2-a3. From στυφελός, rough. Fr., *styphélie*. A genus of the *Stypheliaceæ* or *Styphelieæ* (a division of the *Epaerideæ*). [a, 35.]—**S. humifusa.** See Astroloma *humifusum*.

STYPHNIC ACID, n. Sti2f'ni2k. Fr., *acide styphnique*. Ger., *Styphninsäure*. Trinitroresorcinol, $C_6H(NO_2)_3(OH)_2$, crystallizing from dilute alcohol as large, sulphur-yellow hexagons. [B, 3 (a, 38).]

STYPSIS (Lat.), n. f. Sti2ps(stu6ps)'i2s. Gen., *styps'eos (-is)*. Gr., στῦψις (from στύφειν, to contract). Fr., *s*. 1. The application or the action of a styptic. [a, 17.] 2. See Constipation.

STYPTERIA (Lat.), n. f. Sti2pt(stu6pt)-e(a)'ri2-a3. Gr., στυπτηρία. See Alum.—**S. ægyptia.** Egyptian alum; the best sort of alum known to the ancients. It was recommended by Hippocrates as an application to painful swellings of the gums, and, mixed with goose-grease, made into a pessary with wool "and applied to the os uteri with a view of promoting fecundity." It is uncertain whether this was a true alum or an iron sulphate. It was made from a stone called chalcitis (χαλκῖτις), thought by some to be rock-alum. [B, 115, 200.]

STYPTIC, adj. Sti2pt'i2k. Gr., στυπτικός. Lat., *stypticus*. Fr., *styptique*. Ger., *styptisch*. Astringent, hæmostatic; as a n., a remedy which arrests hæmorrhage by its local astringent action or by coagulating the blood. [a, 17.]—**Eaton's s.** French brandy highly impregnated with calcined green vitriol. [L, 84.]—**Pagliari's s.** See Aqua *hæmostatica*.

STYRACIFLUUS (Lat.), n. f. Sti2r(stu6r)-a2s(a3k)-i2f'lu2(lu4)-u3s(u4s). From στύραξ, storax, and *fluere*, to flow. Fr., *styraciflue*. Yielding storax (see Liquidambra *styraciflua*).

STYRACIN, n. Sti2r'a2s-i2n. Fr., *styracine*. Ger., *S*. Cinnyl cinnamate, $C_9H_7O_2(C_9H_9)$; the chief constituent of liquid storax, occurring as brilliant white bundles of crystals. [B, 3 (a, 38).]

STYRACOL, n. Sti2r'a2k-o2l. The cinnamic ether of guaiacol. It has been recommended as an antiseptic and as a remedy in pulmonary tuberculosis and in chronic gastric, intestinal, and vesical catarrh. [Squibb, "Ephemeris," etc., Feb., 1893.]

STYRACONE, n. Sti2r'a2k-on. Fr., *s*. See Cinnamic *alcohol*.

STYRAX (Lat.), n. m. and f. Stir(stu6r)'a2x(a3x). Gen., *styr'acos (-acis)*. Gr., στύραξ. Fr., *aliboufier* (1st def.), *aligoufier* (1st def.). Ger., *Storaxbaum* (1st def.). 1. A genus of plants forming, with *Symplocos*, *Halesia*, etc., an order (the *Styracaceæ* [Fr., *styracacées*] or storaxworts) of gamopetalous dicotyledons, of the cohort *Ebenales*. The *Styraceæ* (Fr., *styracées*) are: Of Sprengel and others, the *Styracaceæ*; of Wood and others, a tribe of the latter. The *Styracinæ* are: Of Humboldt, Bonpland, and Kunth, the *Styracaceæ*; of Bartling, a class including the orders *Styraceæ*, *Ebenaceæ*, and *Sapoteæ*. The *Styracineæ* are: Of Nees and Martius, the *Styracaceæ*; of Spach, the *Styracinæ* of Bartling. [a, 35.] 2. Of the U. S. Ph., see *Liquid* storax. 3. See Storax (1st def.).—**Emplastrum styracis compositum.** Sp., *emplasto de estoraque compuesto* [Sp. Ph.]. A plaster consisting of 690 parts of yellow wax, 1,035 of turpentine, 100 each of ladanum and mastic, 80 each of liquid storax and benzoin, 518 of olibanum, 130 of pimenta, and 7 each of the oils of mint and wormwood. [B, 95 (a, 38).]—**Linimentum styracis** [Swiss Ph.]. A liniment consisting of 30 parts of liquid storax dissolved in 10 of alcohol, strained, and mixed with 5 of oil of sesame. [B, 95 (a, 38).]—**Liquid s.** See *Liquid* storax.—**Onguent de s.** (Fr.). See *Unguentum styracis*.—**Pilulæ styracis thebaicæ** [Swed. Ph.]. Sp., *píldoras de estoraque opiadas* [Sp. Ph.]. A pill-mass consisting of 2 grammes of powdered opium, 4 of s., and 6 of powdered licorice [Swed. Ph.] (or of 1 gramme of extract of opium, 10 grammes of s., and the necessary amount of powdered licorice [Sp. Ph.]), divided into 100 pills. [B, 95 (a, 38).]—**Sapo styracis.** Ger., *Styraxseife*. A mixture of 100 parts of liquid storax, 250 of common soap, and 16 of balsam of Peru. [B, 108 (a, 14).]—**Solid s.** See Storax (1st def.).—**Styracis benzoini balsamum.** See Benzoin.—**S. alba, S. albus.** 1. White balsam of Peru. [B.] 2. A translucent, yellowish-red variety of storax, not now found in commerce. [B, 180 (a, 35); B, 200.]—**S. alcool** (Fr.). See Cinnamic *alcohol*.—**S. americana.** A shrub found in the southern United States and in the West Indies; said to yield an aromatic stimulant resin. [a, 35.]—**S. aureus.** Fr., *aliboufier doré*. A Brazilian species yielding a fragrant balsam resembling storax. [a, 35.]—**S. benzoin.** Fr., *aliboufier* (ou *aligoufier*) *officinal*, *alibousier*. Ger., *gebräuchlicher Benzoëbaum*. The gum-benzoin shrub or tree; indigenous to Sumatra, Java, Borneo, Laos, and Siam. It is the source of benzoin. [a, 35.]—**S. bogotensis.** Ger., *Storax von Bogotá*. A balsamic product of an undetermined tree, probably a species of *S.*, growing in Bogotá. [a, 35.]—**S. calamita, S. calamites.** Fr., *storax calamite*, *storax en pains* (2d def.). 1. Of the Gr. Ph., a variety of storax, probably produced by *S. officinalis*, consisting of dry brittle masses of yellowish agglutinated tears having the odor of vanilla; not now found in commerce. 2. A modern product found in the shops as a coarse dark powder mixed with a few friable lumps, said to be prepared at Trieste, Venice, and Marseilles by mixing coarsely powdered storax-bark with liquid storax. Sometimes common sawdust is used in place of the storax-bark, and sometimes olibanum, honey, and earthy substances are added. [a, 35.]—**S. ferrugineus.** Fr., *aliboufier ferrugineux*. A Brazilian species said to yield a product similar to that of *S. officinalis*. [a, 35.]—**S. in granis.** See Storax *in grains*.—**S. liquida.** See *Liquid* storax.—**S. liquida folio minore.** Of Ray, probably the *Liquidambra formosana*. [a, 35.]—**S. liquide** (Fr.), **S. liquidus (orientalis).** See *Liquid* storax.—**S. officinalis.** Fr., *aliboufier* (*officinal*), *alibousier*. Ger., *gebräuchlicher* (oder *officineller*) *Storaxbaum*. The στύραξ of Dioscorides; a tall bush or small tree growing in countries on the Mediterranean, yielding storax and perhaps amygdaloid storax. [a, 35.]—**S. præparatus.** See *Liquid* storax.—**S. punctatus.** A Veragua species. After the tree is cut down and allowed to remain several years on the ground, a gum-resin is collected from it and used as frankincense. [a, 35.]—**S. purifié** (Fr.). See *Liquid* storax.—**S. reticulatus.** A Brazilian species yielding a fragrant storax-like balsam. [a, 35.]—**S'seife** (Ger.). See Sapo *styracis*.—**S. subdenticulata.** A species found in southwestern Sumatra, where it is known by the same name (*kajoe keminjan*) as the *S. benzoin*; possibly the source of a variety of benzoin known as *Penang benjamin* (storax-smelling benjamin). [a, 35.]—**Unguentum cum styrace** [Fr. Cod.], **Unguentum styracis** [Gr. Ph., Swiss Ph.] (**compositum** [Belg. Ph.]). Fr., *onguent de s.* [Fr. Cod.]. Sp., *ungüento de estoraque* [Sp. Ph.]. An ointment consisting of 150 [Fr. Cod.] (149 [Belg. Ph.], 120 [Sp. Ph., Gr. Ph.]) parts each of s., yellow wax, and elemi, with 270 of colophony and 225 of olive-oil [Fr. Cod.] (with 319 of larch turpentine and 234 of olive-oil [Belg. Ph.], with 240 each of colophony and olive-oil and 30 of mutton suet [Gr. Ph.], with 240 of colophony and 180 of walnut-oil [Sp. Ph.]); or of 300 parts of s. with 100 of yellow wax, 50 each of colophony and elemi, and 400 of olive-oil [Swiss Ph.]. [B, 95 (a, 38).]

STYROGENIN, n. Sti2r-o2j'e2n-i2n. A crystalline compound, $C_{26}H_{40}O_3$, produced by the action of sulphuric acid on storax. [Mylius, "Pharm. Ctrlbl.," 1882, p. 79; "Am. Jour. of Pharm.," July, 1882, p. 370 (B).]

STYROL, STYROLENE, n's. Stir'o2l, -en. Fr., *styrolène*. Ger., *Styrol*. Cinnamene obtained from liquid storax; a very refractive aromatic liquid, boiling at 144·5° C. [B, 3 (a, 38).]—**Styrolene alcohol.** Phenylglycol; a crystalline substance, $C_6H_5.CH(OH)CH_2OH$. [B, 3 (a, 38).]

STYROLIC ACID, n. Sti2r-o2l'i2k. Fr., *acide styrolique*. See Cinnamic *acid*.

STYRONE, n. Stir'on. Fr., *s*. Ger., *Styron*. 1. See Cinnamic *alcohol*. 2. An antiseptic compound of storax and balsam of Peru. ["N. Y. Med. Jour.," June 11, 1892, p. 666 (a, 50).]

STYRONYL, n. Stir'o2n-i2l. 1. See Phenethyl. 2. Phenylallyl, $C_6H_5.CH.CH.CH_2$, the triatomic radicle of cinnamic alcohol. [B; B, 93 (a, 14).] Cf. Cinnyl.—**S. alcohol.** See Cinnamic *alcohol* and Phenethyl *alcohol*.—**S. chloride.** A liquid, $C(C_6H_5)H_2.CH_2Cl$. [B, 4.]

STYRYL, n. Stir'i2l. Fr., *styryle*. Ger., *S*. See Styronyl.—**S. alcohol.** See Styronyl *alcohol*.—**S. ether.** The compound $(C_9H_9)_2O$. [B, 4.]

STYRYLIC ACID, n. Sti2r-i2l'i2k. Fr., *acide styrylique*. See Cinnamic *alcohol*.

STYSIS (Lat.), n. f. Stis(stu6s)'i2s. Gen., *stys'eos (-is)*. From στύειν, to erect. See Priapism.

SUÆDA (Lat.), n. f. Su2-ed'(swa3'e2d)-a3. Fr., *suéda*. A genus of chenopodiaceous herbs and shrubs. The *Suædeæ* and the *Suædineæ* are a subdivision (tribe) of the *Spirolobeæ*. [a, 35.]—**S. fruticosa.** Shrubby saltwort of Arabia, Persia, Egypt, Senegal, Europe, and California; burned for barilla. [a, 35.]—**S. maritima.** Fr., *blanchette*, *blanquette*. Sea-blithe, sea-side goosefoot, white glasswort; growing in Europe and Siberia; used to prepare soda and as salad. [a, 35.]—**S. maxima, S. salsa.** Soda-yielding species growing in Russia and on the Mediterranean coasts. [a, 35.]—**S. setigera.** A species found on the southern coasts of Spain and France; used in the preparation of a superior soda (*barilla fina* or *d'Alicante*). [a, 35.]

SUAVEOLENS (Lat.), adj. Swa2(swa3)-ve(we2)'o2l-e2nz(ans). Gen., *-ent'is*. From *suavis*, sweet, and *olere*, to smell. See Fragrant.

SUBACETAS (Lat.), n. m. Su^{3}b(su^{4}b)-a^{2}s(a^{3}k)-et(at)'a^{2}s(a^{3}s). Gen., *-at'is.* See SUBACETATE.—**Aqua subacetatis plumbici.** See *Liquor* PLUMBI *subacetatis dilutus.*—**Ceratum cum subacetate plumbico.** See *Ceratum* PLUMBI *subacetatis.*—**Liquor subacetatis plumbicl.** See *Liquor* PLUMBI *subacetatis.*—**Solutio subacetatis ferrici.** See *Liquor* FERRI *acetatis.*—**Solutio subacetatis plumbici.** See *Liquor* PLUMBI *subacetatis.*—**Solutio subacetatis plumbici diluta.** See *Liquor* PLUMBI *subacetatis dilutus.*—**S. cupricus.** See COPPER *subacetate.*—**S. plumbicus.** See LEAD *subacetate.*—**S. plumbicus liquidus.** See *Liquor* PLUMBI *subacetalis.*—**Unguentum subacctatis plumbici.** See *Unguentum* PLUMBI.

SUBACETATE, n. Su^{3}b-a^{2}s'e^{2}t-at. Lat., *subacetas.* Fr., *sous-acétate.* A basic acetate. [B.]—**Cupric s.** See COPPER *subacetate.*

SUBACROMIAL, adj. Su^{3}b-a^{2}k-rom'i^2-'l. From *sub*, under, and ἀκρωμία, the acromion. Fr., *sous-acromial.* Situated below the acromion. [α, 48.]

SUBACROMIOTROCHITERIUS (Lat.), n. m. Su^{3}b(su^{4}b)-a^{2}k(a^{3}k)-rom''i^2-o(o^3)-trok(tro^{2}ch^2)-i^{2}t-e(a)'ri^2-u^{3}s(u^{4}s). For deriv., see *Sub-*,* ACROMION, and TROCHITER. See INFRASPINATUS.

SUBACUTE, adj. Su^{3}b-a^{2}k-u^{2}t'. From *sub-*, somewhat, and *acutus*, sharpened. Fr., *subaigu.* Ger., *halbhitzig.* Of disease, showing symptoms less pronounced than in the acute type. [α, 34.]

SUBALARIS (Lat.), adj. Su^{3}b(su^{4}b)-a^{2}l(a^{3}l)-a(a^3)'ri^{2}s. Fr., *subalaire.* From *sub*, under, and *ala*, a wing. Situated below the axilla. [α, 48.]

SUBALBUMINIZATION, n. Su^{3}b-a^{2}l-bu^{2}m-i^{2}n-i^{2}z-a'shu^{3}n. From *sub*, under, and *albumin* (*q. v.*). Fr., *subalbuminisation.* Diminution in the quantity of contained albumin. [B, 146.]

SUBANAL, adj. Su^{3}b-a'n'l. Situated below the anus. [α, 48.]

SUBANCONÆUS (Lat.), n. m. Su^{3}b(su^{4}b)-a^{2}n^2(a^{3}n^2)-ko^{2}n(kon)-e'(a^3'e^2)-u^{3}s(u^{4}s). From *sub*, under, and *anconæus* (*q. v.*). Fr., *sous-anconé.* Scattered muscular fibres extending between the lower posterior surface of the humerus and the capsule of the elbow. [L.]

SUBAPICULARIS (Lat.), adj. Su^{3}b(su^{4}b)-a^{2}p(a^{3}p)-i^{2}k-u^{2}l-(u^{4}l)-a(a^3)'ri^{2}s. From *sub*, under, and *apex* (*q. v.*). Fr., *sous-apiculaire.* Of the arista of grasses, inserted immediately under the apex of the pale. [α, 35.]

SUBARACHNOID, adj. Su^{3}b-a^{2}r-a^{2}k'noid. Fr., *sous-arachnoïdien.* Situated beneath the arachnoid membrane. [α, 48.]

SUBARBORESCENT, adj. Su^{3}b-a^{3}rb-o^{2}r-e^{2}s'e^{2}nt. Lat., *subarborescens* (from *sub-*, somewhat, and *arborescere*, to grow to be a tree). Somewhat tree-like in appearance. [α, 35.]

SUBAREOLAR, adj. Su^{3}b-a^{2}r-e'o-la^{3}r. Lat., *subareolaris.* Fr., *sous-aréolaire.* Situated beneath the areola of the nipple.

SUBASTRAGALAR, adj. Su^{3}b-a^{2}s-tra^{2}g'a^{2}l-a^{3}r. Pertaining to what is below the astragalus (cf. *S.* AMPUTATION). [α, 48.]

SUBASTRINGENT, adj. Su^{3}b-a^{2}s-tri^{2}n'j'nt. From *sub-*, somewhat, and *astringere*, to draw close. Slightly astringent.

SUBATLOIDEUS (Lat.), n. m. Su^{3}b(su^{4}b)-a^{2}t(a^{3}t)-lo(lo^2)-i^{2}d-(ed)'e^2-u^{3}s(u^{4}s). See INFRA-ATLOIDEUS.

SUBAXIAL, adj. Su^{3}b-a^{2}x'i^2-'l. Situated below the axis.

SUBAXILLARY, adj. Su^{3}b-a^{2}x'i^{2}l-a-ri^2. Lat., *subaxillaris.* Fr., *sous-axillaire.* 1. Situated beneath the axllla. [α, 17.] 2. See INFERAXILLARIS.

SUBAXOIDEUS (Lat.), n. m. Su^{3}b(su^{4}b)-a^{2}x(a^{3}x)-o(o^2)-i^{2}d-(ed)'e^2-u^{3}s(u^{4}s). See INFRA-AXOIDEUS.

SUBBASAL, adj. Su^{3}b-ba's'l. Situated near the base. [L.]

SUBBRACHYCEPHALIC, adj. Su^{3}b-bra^{2}k-i^2-se^{2}f-a^{2}l'i^{2}k. From *sub-*, somewhat, βραχύς, short, and κεφαλή, the head. Slightly brachycephalic; having the length-breadth index between 78 and 79. [L, 332.]

SUBCÆCAL, adj. Su^{3}b-se'k'l. Situated below the cæcum. [α, 48.]

SUBCARBONAS (Lat.), n. m. Su^{3}b(su^{4}b)-ka^{3}rb-on'a^{2}s(a^{3}s). Gen., *-al'is.* See SUBCARBONATE.—**S. ammonicus.** Ammonium sesquicarbonate. [B, 119 (α, 38).] See under AMMONIUM *carbonate.*—**S. ferroso-ferricus.** See IRON *carbonate.*—**S. kalicus.** See POTASSIUM *carbonate.*

SUBCARBONATE, n. Su^{3}b-ka^{3}rb'o^{2}n-at. Lat., *subcarbonas.* Fr., *sous-carbonate.* 1. As formerly used, a normal carbonate (as distinguished from a bicarbonate). 2. A neutral or basic carbonate, so called because it contains with relation to its basic constituent less of the carbonic-acid radicle than the normal carbonate. [B.]

SUBCARBONIC, adj. Su^{3}b-ka^{3}rb-o^{2}n'i^{2}k. Lat., *subcarbonicus.* Containing a smaller amount of carbon than normal carbonic compounds; of basic carbonates, containing a smaller relative amount of the carbonic-acid radicle than the normal carbonates. [B.]

SUBCARBONICUS (Lat.), adj. Su^{3}b(su^{4}b)-ka^{3}rb-o^{2}n'i^{2}k-u^{3}s-(u^{4}s). Subcarbonic, containing a subcarbonate; with the name of a base, the subcarbonate of the base. [B.]

SUBCAUDAL, adj. Su^{3}b-ka^4'd'l. From *sub*, under, and *cauda*, the tail. Situated under the tail or cauda (said in embryology of a rudimentary prolongation of the intestine below the anus).

SUBCENTRAL, adj. Su^{3}b-se^{2}nt'r'l. From *sub-*, somewhat, and *centrum*, the centre. Nearly central. [α, 27.]

SUBCEREBELLAR, adj. Su^{3}b-se^{2}r-e^2-be^{2}l'a^{3}r. Situated below the cerebellum. [α, 48.]

SUBCEREBRAL, adj. Su^{3}b-se^{2}r'e^2-br'l. Situated below the cerebrum. [α, 48.]

SUBCHLORIDE, SUBCHLORURET, n's. Su^{3}b-klor'i^{2}d(id), -u^{2}r-e^{2}t. Lat., *subchloridum.* Fr., *sous-hydrochlorure.* A chloride containing less chlorine than another compound considered as the normal chloride; as sometimes used, an oxychloride. [B.]

SUBCHORIONIC, adj. Su^{3}b-kor-i^2-o^{2}n'i^{2}k. Situated beneath the chorion. [α, 48.]

SUBCLASS, n. Su^{3}b'kla^{3}s. A grade immediately subordinate to a class and of higher rank than an order or cohort. [α, 35.]

SUBCLAVIAL, SUBCLAVIAN, SUBCLAVICULAR, adj's. Su^{3}b-klav'i^2-'l, -'n, -kla^{2}v-i^{2}k'u^{2}l-a^{3}r. Lat., *subclavius.* Fr., *sous-clavier, sous-claviculaire.* Situated beneath the clavicle. [L, 343.]

SUBCLAVIUS (Lat.), adj. Su^{3}b(su^{4}b)-kla(kla^3)'vi^2(wi^2)-u^{3}s(u^{4}s). Subclavian; as a n. m. (Fr., *sous-clavier;* Ger., *Schlüsselbeinmuskel, Unterschlüsselbeinmuskel*), a muscle which arises from a groove on the lower surface of the clavicle and is inserted into the first costal cartilage; also, of Bardeleben, a rare muscle, arising from the clavicle and inserted into the superficial fascia of the pectoralis major. [L, 332.]—**S. posticus.** See STERNOSCAPULARIS (1st def.).

SUBCONJUNCTIVAL, adj. Su^{3}b-ko^{2}n-ju^{3}n^{2}kt-i'v'l. Lat., *subconjuuctivalis.* Situated beneath the conjunctiva. [α, 48.]

SUBCONTINUAL, SUBCONTINUOUS, adj's. Su^{3}b-ko^{2}n-ti^{2}n'u^2-'l, -u^{3}s. From *sub-*, somewhat, and *continuus*, uninterrupted. Ger., *halbanhalteud.* Continuous except for slight intermissions.

SUBCORDATE, adj. Su^{3}b-ko^{2}rd'at. From *sub-*, somewhat, and *cor*, the heart. Nearly heart-shaped. [α, 35.]

SUBCOSTAL, adj. Su^{3}b-ko^{2}s't'l. Lat., *subcostalis* (from *sub*, under, and *costa*, a rib). Fr., *sous-costal.* Situated beneath the ribs or beneath a rib. [α, 48.]

SUBCOTYLEDONARY, adj. Su^{3}b-ko^{2}t-i^{2}l-ed'o^{2}n-a-ri^2. Situated beneath the cotyledons (said of the connective tissue of the uterine mucous membrane situated beneath the maternal cotyledons of the placenta).

SUBCRANIAL, adj. Su^{3}b-kran'i^2-'l. Situated below the skull (cf. *S.* PLATES). [α, 48.]

SUBCREPITANT, adj. Su^{3}b-kre^{2}p'i^2-t'nt. From *sub-*, somewhat, and *crepitare*, to crackle. Fr., *sous-crépitant.* Indistinctly crepitant, crackling. [D.]

SUBCRUENTUS (Lat.), adj. Su^{3}b(su^{4}b)-kru^2(kru^4)-e^{2}nt'u^{3}s-(u^{4}s). From *sub-*, somewhat, and *cruentus*, stained with blood. Somewhat like blood in color. [A, 325 (α, 48).]

SUBCRURÆUS (Lat.), **SUBCRURALIS** (Lat.), n's n. Su^{3}b-(su^{4}b)-kru^2(kru)-re'(ra^3'e^2)-u^{3}s(u^{4}s), -ral(ra^{3}l)'i^{2}s. From *sub*, under, and *crus*, the leg. Fr., *sous-crural.* Ger., *unterer Schenkelmuskel, Kniegelenkspanner.* A small muscle lying beneath the cruræus and inserted into the capsule of the knee joint. [L.]

SUBCULTURE, n. Su^{3}b-ku^{3}lt'u^{2}r. From *sub*, under, and *cultura*, cultivation. Of Buchanan, a continued cultivation of a virulent microphyte. ["Practitioner," Mar., 1885, p. 232.]

SUBCUNEUS (Lat.), n. m. Su^{3}b(su^{4}b)-ku^{2}n(ku^{4}n)'e^2-u^{3}s(u^{4}s). From *sub*, under, and *cuneus*, a wedge. Ger., *Unterzwickel.* A small group of cerebral convolutions on the lower surface of the occipital lobe, in front of the third occipital convolution, continuous with the gyrus fornicatus. [J, 6 (K).]

SUBCURRENS (Lat.), adj. Su^{3}b(su^{4}b)-ku^{5}r(ku^{4}r)'re^{2}nz(rans). Gen., *-ren'tis.* From *succurrere*, to run under. See SUCCUBOUS.

SUBCUTANEOUS, adj. Su^{3}b-ku^{2}t-an'e^2-u^{3}s. Lat., *subcutaneus* (from *sub*, under, and *cutis*, the skin). Fr., *sous-cutané.* Ger., *subcutan.* 1. Situated immediately beneath the skin. [G.] 2. Of an injection, thrown under the skin.

SUBCUTANEUS (Lat.), adj. Su^{3}b(su^{4}b)-ku^{2}t(ku^{4}t)-an(a^{3}n)'e^2-u^{3}s(u^{4}s). Subcutaneous; as a n., a subcutaneous muscle. [α, 17.]—**S. colli.** See PLATYSMA *myodes.*—**S. nuchæ.** A muscle arising from the lower surface of the occipital bone and blending with the upper portion of the fascia of the back. [L, 332.]

SUBCUTICULAR, adj. Su^{3}b-ku^{2}t-i^{2}k'u^{2}l-a^{3}r. See SUBEPIDERMIC.

SUBDELIRIUM (Lat.), n. n. Su^{3}b(su^{4}b)-de^{2}l(dal)-i^{2}r(er)'i-u^{3}m-(u^{4}m). From *sub*, under, and *delirium*, madness. Fr., *subdélirium.* A mild delirium in which the attention of the patient may be aroused for a longer or shorter interval. [α, 34.]

SUBDENTAL, adj. Su^{3}b-de^{2}n't'l. From *sub*, under, and *dens*, a tooth. Situated below the teeth. [α, 48.]

SUBDERMAL, adj. Su^{3}b-du^{5}r'm'l. From *sub*, under, and δέρμα, the skin. See SUBCUTANEOUS.

SUBDICROTIC, adj. Su^{3}b-di-kro^{2}t'i^{2}k. For deriv., see *Sub-** and DICROTIC. Obscurely dicrotic. [α, 34.]

SUBDIVIDED, adj. Su^{3}b-di^2-vid'e^{2}d. Lat., *subdivisus* (from *sub*, under, and *dividere*, to divide). Fr., *subdivisé.* Divided again, having secondary divisions. [α, 35.]

SUBDOLICHOCEPHALIC, adj. Su^{3}b-do^{2}l-i^{2}k-o-se^{2}f-a^{2}l'i^{2}k. From *sub-*, somewhat, δολιχός, long, and κεφαλή, the head. Fr., *subdolichocéphate.* Having the length-breadth index between 75 and 77·9. ["Arch. f. Anthrop.," xx, p. 310 (α, 32); L.]

SUBDORSO-ATLOIDEUS (Lat.), n. m. Su^{3}b(su^{4}b)-do^{2}rs''o-(o^3)-a^{2}t(a^{3}t)-lo(lo^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). From *sub*, under, *dorsum*, the back, ἄτλας, the atlas, and εἶδος, resemblance. See LONGUS *colli.*

SUBDURAL, adj. Su^{3}b-du^2'r'l. From *sub*, under, and *dura* (*q. v.*). Fr., *sous-dure-mérien.* Situated beneath the dura. [α, 18.]

SUBECTOPIC, adj. Su^{3}b-e^{2}k-to^{2}p'i^{2}k. From *sub-*, somewhat, and ἔκτοπος, out of place. Moderately displaced.

SUBENCEPHALON (Lat.), n. n. Su^{3}b(su^{4}b)-e^{2}n(e^{2}n^2)-se^{2}f-(ke^{2}f)'a^{2}l(a^{3}l)-o^{2}n. From *sub*, under, and ἐγκέφαλος, the brain. Ger., *Unterhirn.* The medulla oblongata, pons Varolii, and corpora quadrigemina. [L, 332.]

SUBENDOTHELIAL, adj. Su³b-e²nd-o-thel'i²-'l. Fr., *sous-endothélial.* Situated beneath an endothelium. [J.]

SUBEPENDYMSCLEROSE (Ger.). n. Zub-e²p-e²n-du⁴m'-sklar-oz-e². Sclerosis beneath the ependyma. [α, 34.]

SUBEPIDERMAL, SUBEPIDERMIC, adj's. Su³b-e²p-i²-du⁶r'm'l, -mi²k. Fr., *sous-épidermique.* Situated beneath the epidermis. [α, 48.]

SUBÉPINEUX (Fr.), adj. Su⁶b-ap-en-u⁵. See INFRASPINOUS.

SUBEPITHELIAL, SUBEPITHELIAN, adj's. Su³b-e²p-i²-thel'i²-'l, -'n. Situated beneath the epithelium.

SUBER (Lat.), n. n. (1st def.), m. (2d def.). Su²b(sub)'u⁶r(e²r). Gen., *sub'eris.* 1. See CORK (1st def.). 2. A tree that yields cork. —**Cortex suberis.** See *S.* (1st def.).—**S. primus.** See QUERCUS *s.*—**S. secundus.** See QUERCUS *ilex.*

SUBERAMIC ACID, n. Su²b-e²r-a²m'i²k. Fr., *acide suberamique.* A substance, $C_6H_{12}(CO.OH)(CO.NH_2)$, formed by the action of heat on ammonium suberate. [B, 93 (α, 14).]

SUBERANILIC ACID, n. Su²b''e²r-a²n-i²l'i²k. Fr., *acide subéranilique.* Ger., *Suberanilsäure.* A crystallizable substance, $C_6H_{12}(CO.OH)(CO.NH.C_6H_5)$, found in the alcoholic solution from which suberanilide has been precipitated; an oily liquid which solidifies when cold. [B, 93 (α, 14).]

SUBERANILIDE, n. Su²b-e²r-a²n'i²l-i²d(id). Fr., *subéranilide.* A substance, $C_6H_{12}(CO.NH.C_6H_5)_2$, produced by the action of aniline on suberic acid under the influence of heat. It forms microscopic crystals. [B, 93 (α, 14).]

SUBERIC, adj. Su²b-e²r'i²k. Derived from cork. [B.]—**S. acid.** Fr., *acide subérique.* Ger., *Suberinsäure, Suberylsäure, Korksäure.* A dibasic acid, $C_6H_{12}(CO.OH)_2 = C_8H_{14}O_4$, obtained from cork by prolonged boiling with nitric acid or by the saponification of castor-oil and other oils and fats. It occurs as long acicular or irregular tabular crystals. [B; B, 3 (α, 38).]

SUBERICERIN, n. Su²b-e²r-i²s-er'i²n. Fr., *subéricérine.* Cerin obtained from cork. [B, 93 (α, 14).]

SUBERIFICATION, n. Su²b-e²r-i²-fl²-ka'shu³n. See CUTINIZATION.

SUBERIMIDE, n. Su²b-e²r'i²m-i²d(id). Fr., *subérimide.* Of Arppe, a white crystalline powder obtained by heating suberamic acid to 170° C. [B, 93 (α, 14).]

SUBERIN, n. Su²b'e²r-i²n. Fr., *subérine.* Ger., *Korkstoff.* A modification of cellulose obtained from cork, resembling (according to some, identical with) cutin; used as a dusting powder. [B, 93 (α, 14); α, 35.]

SUBERONE, n. Su²b'e²r-on. Fr., *subérone.* A ketone, $C_7H_{12}O$, derived from suberic acid; a liquid of the odor of peppermint. [B, 2, 3, 93 (α, 38).]

SUBEROSE, SUBEROUS, adj's. Su²b'e²r-os, -u³s. Lat., *suberosus.* Fr., *subéreux.* Ger., *korkig, korkartig.* Resembling cork, having a corky texture. [α, 35.]

SUBETH (Ar.), n. See COMA.

SUBFAMILY, n. Su³b-fa²m'i²l-i². From *sub,* under, and *familia,* a family. Ger., *Subfamilie, Unterfamilie.* A group immediately subordinate to a family. [α, 48.]

SUBFLAVUS (Lat.), adj. Su³b(su⁴b)-fla(fla³)'vu³s(vu⁴s). From *sub-,* somewhat, and *flavus,* yellow. Yellowish. [α, 35.]

SUBFLUORIDE, n. Su³b-flu²'o²r-i²d(id). A fluoride containing a smaller amount of fluorine than the ordinary fluoride. [B, 2.]

SUBFRIGIDUS (Lat.), adj. Su³b(su⁴b)-fri²j(freg)'i²d-u³s(u⁴s). From *sub-,* somewhat, and *frigidus,* cold. See CHILLY.

SUBFRONTAL, adj. Su³b-fru³n't'l. From *sub,* under, and *frons,* the forehead. Situated below the frontal bone. [α, 48.]

SUBGENUS (Lat.), n. n. Su³b(su⁴b)'je²n-u³s(u⁴s); in Eng., su³b-jen'u³s. Gen., *-gen'eris.* Fr., *sous-genre.* Ger., *Untergattung.* A group nearly as important as a genus and immediately subordinate to it, comprising a section or sections of species. [α, 35.]

SUBGERMINAL, adj. Su³b-ju⁶rm'i²-n'l. From *sub,* under, and *germen,* a germ. Situated beneath a germinal structure.

SUBGLENOID, adj. Su³b-glen'oid. Fr., *sous-glénoïdien.* See INFRAGLENOID.

SUBGLENOIDALIS (Lat.), n. m. Su³b(su⁴b)-gle²n(glan)-o(o²)-i²d(ed)-al(a³l)'i²s. See SUBSCAPULARIS *minor.*

SUBGLOTTIC, adj. Su³b-glo²t'i²k. See INFRAGLOTTIC.

SUBGRONDATION (Fr.), n. Su⁶b-gro²n²d-a²-se-o²n². An old term for a fracture of the skull. [L, 41 (α, 14).]

SUBHEPATIC, adj. Su³b-he²p-a²t'i²k. From *sub,* under, and ἧπαρ, the liver. Fr., *sous-hépatique.* Beneath, on the lower surface of, or in the lower portion of the liver. [L, 41 (α, 14).]

SUBHYDROCHLORAS (Lat.), **SUBHYDROCHLORETUM** (Lat.), n's m. and n. Su³b(su⁴b)-hid(hu⁶d)-ro(ro³)-klor(ch²lor)'-a²s(a³s), -klor(ch²lor)-et(at)'u³m(u⁴m). Gen., *-at'is, -et'i.* See SUBCHLORIDE.

SUBHYDROSULPHATE, n. Su³b-hid-ro-su³lf'at. Lat., *subhydrosulphas.* Fr., *sous-hydrosulfate.* A compound of a base with a smaller amount of hydrogen sulphide than the base can take up; also a subsulphide or oxysulphide. [B.]

SUBHYOID, adj. Su³b-hi'oid. Fr., *sous-hyoïdien.* See INFRAHYOID.

SUB-ICTERIC, adj. Su³b-i²k-te²r'i²k. From *sub-,* somewhat, and ἴκτερος, jaundice. Fr., *subictérique.* Pertaining to icterus in a modified form or degree. [B.]

SUBICULUM (Lat.), n. n. Su³b(su⁴b)-i²k'u²l(u⁴l)-u³m(u⁴m). Dim. of *subex,* a support. Fr., *subicule.* Ger., *Unterlage* (1st def.), *Fadenboden* (1st def.). 1. The filamentous mycelium of certain *Fungi.* [α, 35.] 2. See *Uncinate* GYRUS.—**S. cornu Ammonis** [Burdach]. See *Uncinate* GYRUS.

SUBINFLAMMATION, n. Su³b-i²n-fla²m-a'shu³n. Lat., *subinflammatio* (from *sub-,* somewhat, and *inflammatio,* inflammation). Fr., *s.* Ger., *gelinde Entzündung.* A slight inflammation of slow progress. [α, 34.]

SUBINTESTINAL, adj. Su³b-i²n-te²st'i²-n'l. From *sub,* under, and *intestinum,* a gut. Situated below the intestine. [α, 48.]

SUBINTRANT, adj. Su³b-i²nt'r'nt. Lat., *subintrans* (from *subintrare,* to go into secretly). Fr., *s.* Ger., *vorhereintretend, zwischeneintretend.* Of a fever, having a second paroxysm begin before the first has wholly subsided. [L, 41 (α, 14).]

SUBINVOLUTION, n. Su³b-i²n-vo²l-u²'sh'n. Lat., *subinvolutio* (from *sub-,* defectively, and *involutio,* a rolling up). Defective involution (as of the uterus). [α, 48.]—**Menstrual s.** S. of the endometrium after menstruation. [M. P. Jacobi, "Am. Jour. of Obstet.," Sept., 1885, p. 915.]

SUBIODIDE, n. Su³b-i'od-i²d(id). A compound of an element or radicle with iodine, containing a smaller proportionate amount of iodine than the ordinary iodide; also, as sometimes used, on oxyiodide. [B.]

SUBIRATS (Sp.), n. Su'be-ra³ts. A place in Barcelona, Spain, where there are hot sulphurous springs. [L, 49 (α, 14).]

SUBJECT, n. Su³b'je²kt. From *subjicere,* to throw under. 1. An individual subjected to observation, treatment, or experiment. 2. A cadaver used for dissection. [α, 17.]

SUBJECTIVE, adj. Su³b-je²kt'i²v. Lat., *subjectivus.* Fr., *subjectif.* Ger., *subjectiv.* Of symptoms, discernible by the patient, but not patent to physical examination (cf. OBJECTIVE).

SUBKINGDOM, n. Su³b-ki²n²'du³m. A series, a division of a kingdom. In botany there are two, phanerogams and cryptogams. [α, 35.] Cf. PHYLUM and CLASSIFICATION.

SUBLACRYMAL [G. St.-Hilaire] (Fr.), n. Su⁶b-la³-kre-ma³l. See *Splenial* BONE.

SUBLATIO (Lat.), n. f. Su³b(su⁴b)-la(la³)'shi²(ti²)-o. Gen., *-on'is.* From *sublatum,* the supine of *tollere,* to lift up. Removal. [α, 48.]—**S. cataractæ.** See DEPRESSIO *cataractæ.*—**S. chorioideæ.** Subchorioid dropsy. [α, 34.]—**S. retinæ.** Detachment of the retina. [α, 34.]

SUBLIGACULUM (Lat.), n. n. Su³b(su⁴b)-li²g-a²k(a³k)'u²l-(u⁴l)-u³m(u⁴m). From *sub,* under, and *ligare,* to bind. See TRUSS.

SUBLIGATOR (Lat.), n. m. Su³b(su⁴b)-li²g-at(a³t)'o²r. From *subligare,* to tie below. See HYPODESMEUS.

SUBLIGATURA (Lat.), n. f. Su³b(su⁴b)-li²g-a²t(a³t)-u²r(ur)'a³. See TRUSS.

SUBLIGNEOUS, adj. Su³b-li²g'ne²-u³s. Lat., *sublignosus* (from *sub,* under, and *lignum,* wood). Fr., *sous-ligneux.* Of plants, woody at the base and herbaceous at the top. [α, 35.]

SUBLIMAT (Ger.), n. Zub-lem-a³t'. See SUBLIMATE and *Corrosive* SUBLIMATE.—**S'albuminat.** See HYDRARGYRUM *bichloratum albuminatum.*—**S'holzwolle.** Wood-wool impregnated with corrosive sublimate.—**S'räucherung.** Fumigation with corrosive sublimate. [B, 108 (α, 14).]—**S'seide.** Silk for sutures made aseptic by boiling for 15 minutes in a 1-to-500 solution of corrosive sublimate. [B, 108 (α, 14).]—**S'seife.** Castile soap containing 1 per cent. of corrosive sublimate. [B, 108 (α, 14).]

SUBLIMATE, n. Su³b'li²m-at. Lat., *sublimatum, sublimatus.* Fr., *s., sublimé.* Ger., *Sublimat.* 1. In sublimation, that portion of a substance which volatilizes and subsequently condenses and assumes the solid form. 2. Any substance usually obtained by sublimation. [B.]—**Corrosive s.** Fr., *sublimé* (*corrosif*) [Fr. Cod.]. Ger., *ätzendes Quecksilbersublimat, Sublimat.* Mercury bichloride; so called on account of its acrid properties and its preparation by sublimation. [B.]—**Corrosive-s. gauze.** Gauze impregnated with a preparation made by dissolving 1 part of mercury bichloride in 100 parts of alcohol, and adding 150 of distilled water, 50 of glycerin, and a little fuchsine. ["Proc. of the Am. Pharm. Assoc.," xxxv (α, 14).]

SUBLIMATION, n. Su³b-li²m-a'shu³n. Lat., *sublimatio* (from *sublimare,* to lift up on high). Fr., *s.* Ger., *S., Sublimirung.* The act or process of vaporization of a solid body by means of heat, with subsequent recondensation in a purified but essentially unaltered form. [B.]

SUBLIMATUM (Lat.), n. n. Su³b(su⁴b)-li²m(lem)-at(a³t)'u³m-(u⁴m). See SUBLIMATE.—**Liquor sublimati corrosivi.** See *Liquor* HYDRARGYRI *perchloridi.*—**S. dulce.** See MERCURY *chloride.*

SUBLIMATUS (Lat.), n. m. Su³b(su⁴b)-li²m(lem)-at(a³t)'u³s-(u⁴s). See SUBLIMATE.—**S. corrosivus.** See MERCURY *bichloride.*

SUBLIME, v. tr. and intr. Su³b-lim'. From *sublimare,* to raise on high. Fr., *sublimer.* Ger., *sublimiren.* 1. To subject to sublimation. 2. To undergo sublimation. [B.]

SUBLIME (Fr.), n. Su⁶b-lem. See SUBLIMIS.—**S. des doigts.** See FLEXOR *sublimis digitorum.*

SUBLIMÉ (Fr.), adj. Su⁶b-le-ma. See SUBLIMED; as a n., see SUBLIMATE and *Corrosive* SUBLIMATE.—**Émulsion de s. corrosif.** An emulsion consisting of 12 centigrammes of corrosive sublimate, 4 grammes of ether, 150 grammes of peppermint water, 30 grammes of syrup of marsh-mallow, and the yolks of two eggs. [B, 119 (α, 38).]—**Éthérolé de s. corrosif.** See ÆTHER *mercurialis.*—**Pommade de s. corrosif.** See POMMADE *de Cirillo.*—**Solution aqueuse de s. corrosif.** See LIQUOR *mercurialis.*—**S. corrosif.** See MERCURY *bichloride.*—**S. doux.** See MERCURY *chloride.*—**Trochisques de s. corrosif.** See *Trochisci muriatis oxygenati* HYDRARGYRI.

SUBLIMIRUNG (Ger.), n. Zub-lem-er'un^2. See SUBLIMATION.

SUBLIMIS (Lat.), adj. Su^{3}b(su^{4}b)-lim(lem)'i^{2}s. Lit., elevated; superficial; as a n. (Fr., *sublime*), a superficial muscle. [C.]—**S. phalangorum.** See EPITROCHLEOPHALANGEUS and FLEXOR *sublimis digitorum.*

SUBLINGUAL, adj. Su^{3}b-li^{2}n^2'gw'l. Fr., *sous-lingual.* Situated beneath the tongue. [C.]

SUBLOBULAR, adj. Su^{3}b-lo^{2}b'u^{2}l-a^{3}r. Fr., *sublobé* (1st def.), *sous-lobulaire* (2d def.). 1. Indistinctly lobular. 2. Situated beneath a lobule.

SUBLUMBAR, adj. Su^{3}b-lu^{3}mb'a^{3}r. From *sub*, under, and *lumbus*, a loin. Fr., *sous-lombaire.* Situated under the loins. [α, 48.]

SUBLUMBO-ILIACUS (Lat.), **SUBLUMBOPUBIALIS** (Lat.), n's. m. Su^{3}b(su^{4}b)-lu^{3}mb(lu^{4}mb)''o(o^3)-i^{2}l(el)-i(i^2)'a^{2}k(a^{3}k)-u^{3}s(u^{4}s), -pu^{2}b(pub)-i^2-al(a^{3}l)'i^{2}s. For deriv., see *Sub-*, LUMBUS, ILIACUS, and PUBES. See PSOAS *parvus.*

SUBLUMBOTIBIALIS (Lat.), n. m. Su^{3}b(su^{4}b)-lu^{3}mb-(lu^{4}mb)''o(o^3)-ti^{2}b(teb)-i^2-al(a^{3}l)'i^{2}s. From *sub*, under, *lumbus* (*q. v.*), and *tibia* (*q. v.*). See *Long* ADDUCTOR *of the leg.*

SUBLUMBOTROCHANTINEUS (Lat.), n. m. Su^{3}b(su^{4}b)-lu^{3}mb(lu^{4}mb)''o(o^3)-trok(tro^{2}ch^2)-a^{2}nt(a^{3}nt)-i^{2}n'e^2-u^{3}s(u^{4}s). From *sub*, under, *lumbus* (*q. v.*), and τροχαντήρ (see TROCHANTER). See PSOAS *magnus.*

SUBLUXATION, n. Su^{3}b-lu^{3}x-a'shu^{3}n. Lat., *subluxatio* (from *sub-*, somewhat, and *luxare*, to dislocate). Fr., *s.* Ger., *S.*, *Gelenkdistorsion.* A partial dislocation of a bone. [E; L, 30, 41 (α, 14).]

SUBMALLÉAL [G. St.-Hilaire] (Fr.), n. Su^{6}b-ma^3-la-a^{3}l. The articular bone in fishes. [L, 14.]

SUBMAMMARY, adj. Su^{3}b-ma^{2}m'ar-i^2. Ger., *submammär.* See INFRAMAMMARY.

SUBMARGINAL, adj. Su^{3}b-ma^{3}rj'i^2-n'l. From *sub*, under, and *margo*, a margin. Situated near the border. [α, 35.]

SUBMATITÉ (Fr.), n. Su^{6}b-ma^3-te-ta. Dullness on percussion. [D, 51.]

SUBMAXILLARY, adj. Su^{3}b-ma^{2}x'i^{2}l-a-ri^2. From *sub*, under, and *maxilla*, the jaw. Fr., *sous-maxillaire.* Ger., *submaxillär.* Situated beneath the jaw; as a n., the inferior mandible in birds. [L, 343.]

SUBMAXILLOCUTANEUS (Lat.), n. m. Su^{3}b(su^{4}b)-ma^{2}x-(ma^{3}x)''i^{2}l-lo(lo^3)-ku^{2}t(ku^{4}t)-an(a^{3}n)'e^2-u^{3}s(u^{4}s). From *sub*, under, *maxilla* (*q. v.*), and *cutis* (*q. v.*). Fr., *sous-maxillo-cutané.* See PLATYSMA *myodes.*

SUBMAXILLOLABIALIS (Lat.), n. m. Su^{3}b(su^{4}b)-ma^{2}x-(ma^{3}x)-i^{2}l''lo(lo^3)-lab(la^{3}b)-i^2-al(a^{3}l)'i^{2}s. From *sub*, under, *maxilla*, the jaw, and *labium*, the lip. Fr., *sous-maxillo-labial.* See DEPRESSOR *anguli oris.*

SUBMEDIAL, adj. Su^{3}b-med'i^2-'l. From *sub*, under, and *medius*, middle. Situated beneath the middle of a structure.

SUBMENTAL, adj. Su^{3}b-me^{2}n't'l. Fr., *sous-mental.* Ger., *s.* Situated beneath the chin. [C.]

SUBMERGÉ (Fr.), adj. Su^{6}b-me^{2}r-zha. Submerged, drowned.

SUBMERGED, SUBMERSED, adj's. Su^{3}b-mu^{5}rjd', -mu^{5}rst'. Lat., *submersus.* Fr., *submergé.* Ger., *untergetaucht.* Sunk beneath the surface of a liquid; of plants, growing beneath the surface of water. [α, 35.]

SUBMETALLIC, adj. Su^{3}b-me^{2}t-a^{2}l'i^{2}k. From *sub-*, somewhat, and *metallum.* a metal. Somewhat metallic. [B.]

SUBMICROSCOPIC, adj. Su^{3}b-mi^{3}k-ro^{2}s-ko^{2}p'i^{2}k. From *sub*, under, μικρός, small, and σκοπεῖν, to examine. Nearly microscopic; requiring a weak lens for its proper discernment. [B; L, 41 (α, 14).]

SUBMISSIO (Lat.), n. f. Su^{3}b(su^{4}b)-mi^{2}s'shi^2(si^2)-o. Gen., *-on'is.* From *submittere.* to place under. A lowering. [A, 312 (α, 48).]—**S. cordis.** Cardiac systole. [L, 50 (α, 48).]

SUBMORPHOUS, adj. Su^{3}b-mo^{3}rf'u^{3}s. From *sub*, under, and μορφή, form. Intermediate in structure between a crystal and an amorphous body (said of small, rounded bodies having on section a concentrically laminated and radiated appearance, occurring when an insoluble crystalline salt is thrown down in a colloidal medium, and due to the union, molecule by molecule, of the crystal with the colloid). [B, 11.]

SUBMUCOSA (Lat.), n. f. Su^{3}b(su^{4}b)-mu^{2}k(muk)-os'a^3. The areolar tissue immediately beneath a mucous membrane. [L.]

SUBMUCOUS, adj. Su^{3}b-mu^{2}k'u^{3}s. From *sub*, under, and *mucosus*, mucous. Situated immediately beneath the mucous membrane. [L.]

SUBMURIAS (Lat.), n. m. Su^{3}b(su^{4}b)-mu^2(mu^4)'ri^2-a^{2}s(a^{3}s). Gen., *-at'is.* A subchloride or oxychloride. [B.]—**S. ammoniaco-hydrargyricus.** See *Ammoniated* MERCURY.

SUBNASAL, adj. Su^{3}b-na's'l. From *sub*, under, and *nasus*, the nose. Situated below the nose. [α, 48.]

SUBNITRAS (Lat.), n. m. Su^{3}b(su^{4}b)'ni^{2}t-ra^{2}s(ra^{3}s). Gen., *-rat'is.* See SUBNITRATE.—**S. bismuthicus.** See BISMUTH *subnitrate.*—**S. hydrargyrosus.** See MERCURY *subnitrate.*—**Tabellæ cum subnitrate bismuthico.** See *Trochisci* BISMUTHI.—**Unguentum subnitratis hydrargyrici.** See *Unguentum* HYDRARGYRI *oxidi rubri.*

SUBNITRATE, n. Su^{3}b-nit'rat. Lat., *subnitras.* Fr., *sous-azotate, sous-nitrate.* A basic nitrate. [B.]

SUBNORMAL, adj. Su^{3}b-no^{2}r'm'l. From *sub*, under, and *norma*, a rule. Slightly less than normal. [α, 48.]

SUBNUCLEUS [Spitzka] (Lat.), n. m. Su^{3}b(su^{4}b)-nu^2(nu^4)'kle^2-u^{3}s(u^{4}s). From *sub*, under, and *nucleus*, a nucleus. One of the parts into which the larger collections of nerve-cells are divided by the passage of delicate intersecting fasciculi through them. ["Med. Record," Oct. 11, 1884, p. 421 (K).]

SUBOCCIPITAL, adj. Su^{3}b-o^{2}k-si^{2}p'i^2-t'l. Lat., *suboccipitalis.* See INFRA-OCCIPITAL.

SUBOCCIPITALIS (Lat.), adj. Su^{3}b(su^{4}b)-o^{2}k-si^{2}p(ki^{2}p)-i^{2}t-a-(a^3)'li^{2}s. See INFRA-OCCIPITAL; as a n., in the m., an anomalous muscle which arises from the external occipital protuberance and is inserted into the superior curved line or blends with the posterior portion of the insertion of the sterno-cleido-mastoideus. [L, 332.]

SUBOCCIPITO-BREGMATIC, adj. Su^{3}b-o^{2}k-si^{2}p''i^{2}t-o-bre^{2}g-ma^{2}t'i^{2}k. For deriv., see *Sub* *, OCCIPUT, and BREGMA. Extending between the inferior occipital region and the bregma. [L.]

SUBOCULARE (Lat.), n. n. Su^{3}b(su^{4}b)-o^{2}k-u^{2}l(u^{4}l)-ar(a^{3}r)'e(e^2). From *sub*, under, and *oculus*, the eye. See *Malar* BONE.

SUBORBITAL, SUBORBITAR, SUBORBITARY, adj's. Su^{3}b-o^{2}rb'i^2-t'l, -ta^{3}r, -ta-ri^2. From *sub*, under, and *orbis*, the orbit See INFRA-ORBITAL.

SUBORDER, n. Su^{3}b-o^{2}rd'u^{5}r. Lat., *subordo.* Ger., *Unterordung.* A group immediately subordinate to an order. [α, 35.]

SUBOXIDE, n. Su^{3}b-o^{2}x'i^{2}d(id). Lat., *suboxidum, suboxydum.* Fr., *suboxyde, sous-oxide, sous-oxyde.* Ger., *Suboxyd.* An oxide which contains less oxygen than the ordinary oxide. [B.]

SUBPARALYTIC, adj. Su^{3}b-pa^{2}r-a^3-li^{2}t'i^{2}k. From *sub-*, somewhat, and παραλυτικός, paralytic. Slightly paralytic. [α, 34.]

SUBPARIETAL, adj. Su^{3}b-pa^{2}r-i'e^2-t'l. From *sub*, under, and *paries*, a wall. Situated below the parietal bone, convolution, or fissure. [α, 48.]

SUBPATELLAR, adj. Su^{3}b-pa^{2}t-e^{2}l'a^{3}r. From *sub*, under, and *patella* (*q. v.*). Situated below the patella. [α, 48.]

SUBPECTORAL, adj. Su^{3}b-pe^{2}kt'o^2-r'l. From *sub*, under, and *pectus*, the chest. Placed below the chest or breast.

SUBPEDUNCULAR, SUBPEDUNCULATE, adj's. Su^{2}b-pe^{2}d-u^{3}n^{2}k'u^{2}l-a^{3}r, -at. From *sub*, under, and *pedunculus*, a foot-stalk. Fr., *subpédiculé* (1st def.), *sous-pédonculaire* (2d def.). 1. Indistinctly pedunculate. 2. Situated beneath a peduncle.

SUBPERICARDIAL, adj. Su^{3}b-pe^{2}r-i^2-ka^{3}rd'i^2-'l. From *sub*, under, and *pericardium* (*q. v.*). Fr., *sous-péricardique.* Situated beneath the pericardium. [L, 41 (α, 14).]

SUBPERIOSTEAL, adj. Su^{3}b-pe^{2}r-i^2-o^{2}st'e^2-'l. From *sub*, under, and *periosteum* (*q. v.*). Fr., *sous-périosté.* Beneath the periosteum. [α, 48.]

SUBPERITONEAL, adj. Su^{3}b-pe^{2}r-i^2-to^{2}n-e''l. From *sub*, under, and *peritonæum* (*q. v.*). Fr., *sous-péritonéal.* Ger., *subperitonäal.* Situated beneath the peritonæum. [L, 41 (α, 14).]

SUBPETIOLAR, adj. Su^{3}b-pe^{2}t'i^2-o-la^{3}r. Lat., *subpetiolaris.* Fr., *sous-pétiolaire.* Ger., *unterblattstielständig.* Situated under the petiole. [α, 35.] See *S.* BUD.

SUBPHOSPHORICUS (Lat.), adj. Su^{3}b(su^{4}b)-fo^{2}s(fos)-fo^{2}r'-i^{2}k-u^{3}s(u^{4}s). Of the Gr. Ph., containing a dihydric phosphate; with the name of a base, the dihydric phosphate of the base. [B.]

SUBPHRENIC, adj. Su^{3}b-fre^{2}n'i^{2}k. From *sub*, under, and φρήν, the diaphragm. Situated beneath the diaphragm. [α, 34.]

SUBPLACENTA (Lat.), n. f. Su^{3}b(su^{4}b)-pla^{2}s(pla^{3}k)-e^{2}nt'a^3. From *sub*, under, and *placenta* (*q. v.*). See DECIDUA *vera.*

SUBPLEURAL, adj. Su^{3}b-plu^2'r'l. From *sub*, under, and πλευρά (see PLEURA). Situated beneath the pleura. [L.]

SUBPONTINE, adj. Su^{3}b-po^{2}nt'i^{2}n. From *sub*, under, and *pons*, a bridge. Situated below the pons Varolii. [α, 48.]

SUBPOPLITEUS (Lat.), n. m. Su^{3}b(su^{4}b)-pop-li^{2}t-e(a)'u^{3}s-(u^{4}s). From *sub*, below, and *poplis*, the ham. See POPLITEUS.

SUBPUBIC, adj. Su^{3}b-pu^{2}b'i^{2}k. From *sub*, under, and *pubes* (*q. v.*). Fr., *sous-pubien.* Situated below the pubic arch. [C.]

SUBPUBIOFEMORALIS (Lat.), n. m. Su^{3}b(su^{4}b)-pu^{2}b(pub)'-i^2-o(o^3)-fe^{2}m-o^{2}r-al(a^{3}l)'i^{2}s. From *sub*, under, *pubes* (*q. v.*), and *femur* (*q. v.*). See ADDUCTOR *femoris brevis.*

SUBPUBIOPROSTATICUS (Lat.), n. m. Su^{3}b(su^{4}b)-pu^{2}b-(pub)''i^2-o(o^3)-pro^{2}s-ta^{2}t(ta^{3}t)'i^{2}k-u^{3}s(u^{4}s). From *sub*, under, *pubes* (*q. v.*), and *prostata*, the prostate. See COMPRESSOR *prostatæ.*

SUBPUBIOTIBIALIS (Lat.), n. m. Su^{3}b(su^{4}b)-pu^{2}b(pub)''i^2-o(o^3)-ti^{2}b(teb)-i^2-al(a^{3}l)'i^{2}s. From *sub*, under, *pubes* (*q. v.*), and *tibia* (*q. v.*). See *Short* ADDUCTOR *of the leg.*

SUBPUBIOTROCHANTERIUS (Lat.), n. m. Su^{3}b(su^{4}b)-pu^{2}b(pub)''i^2-o(o^3)-trok(tro^{2}ch^2)-a^{2}nt(a^{3}nt)-e(a)'ri^2-u^{3}s(u^{4}s). From *sub*, under, *pubes* (*q. v.*), and τροχαντήρ, a trochanter. A subpubic muscle attached to a femoral trochanter.—**S. externus.** See OBTURATOR *externus.*—**S. internus.** See OBTURATOR *internus.*

SUBRAMOSE, adj. Su^{3}b-ra^{2}m'os. From *sub-*, somewhat, and *ramosus*, full of boughs. Slightly branching. [α, 35.]

SUBREGULARIFLORUS (Lat.), adj. Su^{3}b(su^{4}b)-re^{2}g(rag)-u^{2}l(u^{4}l)-a^2(a^3)-ri^2-flor'u^{3}s(u^{4}s). From *sub-*, somewhat, *regularis*, regular, and *flos*, a flower. Fr., *subrégulariflore.* Of the calathidium and disc, composed of flowers in which the corollas are nearly regular. [α, 35.]

SUBRETINAL, adj. Su^{3}b-re^{2}t'i^2-n'l. From *sub*, under, and *retina*, the retina. Fr., *sous-rétinien.* Situated beneath the retina.

SUBRUPÉAL [G. St.-Hilaire] (Fr.), n. Su^{6}b-ru^6-pa-a^{3}l. The articular bone of the crocodile. [L, 14.]

SUBSALT, n. Su^{3}b'sa^{4}lt. Fr., *sous-sel.* See *Basic* SALT.

SUBSCAPULAR, adj. Su^{3}b-ska^{2}p'u^{2}l-a^{3}r. Lat., *subscapularis* Situated beneath or on the anterior aspect of the scapula.

SUBSCAPULARIS (Lat.), adj. Su^{3}b(su^{4}b)-ska^{2}p(ska^{3}p)-u^{2}l-(u^{4}l)-ar(a^{3}r)′i^{2}s. See SUBSCAPULAR; as a n. (Fr., *sous-scapulaire*; Ger., *Unterschulterblattmuskel*), a muscle arising from nearly the whole of the ventral surface of the scapula and inserted into the lesser tuberosity of the humerus. [L.]—**S. minor.** An anomalous muscle arising from the margin of the scapula and inserted into the capsule of the scapulo-humeral articulation, or into the humerus. [L, 31, 332.]

SUBSCAPULO-CAPSULARIS (Lat.), n. m. Su^{3}b(su^{4}b)-ska^{2}p-(ska^{4}p)″u^{2}l(u^{4}l)-o(o^3)-ka^{2}ps(ka^{3}ps)-u^{2}l(u^{4}l)-a(a^3)′ri^{2}s. From *sub*, under, *scapula* (*q. v.*), and *capsula*, a capsule. See SUBSCAPULARIS *minor*.

SUBSCAPULOHUMERALIS (Lat.), n. m. Su^{3}b(su^{4}b)-ska^{2}p-(ska^{3}p)″u^{2}l(u^{4}l)-o(o^3)-hu^{2}m(hu^{4}m)-e^{2}r-al(a^{3}l)′i^{2}s. From *sub*, under, *scapula* (*q. v.*), and *humerus* (*q. v.*). See SUBSCAPULARIS *minor*.

SUBSCAPULOHYOIDEUS (Lat.), n. m. Su^{3}b(su^{4}b)-ska^{2}p-(ska^{3}p)′u^{2}l(u^{4}l)-o(o^3)-hi(hu^6)-o(o^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). From *sub*, under, *scapula* (*q. v.*), and ὑοειδής, hyoid. Of Percivall, see OMOHYOIDEUS (2d def.).

SUBSCAPULOTROCHINEUS (Lat.), n. m. Su^{3}b(su^{4}b)-ska^{2}p-(ska^{3}p)″u^{2}l(u^{4}l)-o(o^3)-tro^{2}k(tro^{2}ch^2)-i^{2}n′e^2-u^{3}s(u^{4}s). From *sub*, under, *scapula* (*q. v.*), and τροχός, a runner. See SUBSCAPULARIS.

SUBSCRIPTIO (Lat.), n. f. Su^{3}b(su^{4}b)-skri^{2}p(skrep)′shi^2(ti^2)-o. Gen., *-on′is*. From *subscribere*, to write underneath. In a prescription, the directions to the pharmacist, showing how the ingredients are to be compounded and prepared. [B, 10.]

SUBSECTION, n. Su^{3}b-se^{2}k′shu^{3}n. Lat., *subsectio* (from *sub*, under, and *secare*, to divide). A group immediately subordinate to a section. [a, 35.]

SUBSEROUS, adj. Su^{3}b-ser′u^{3}s. From *sub*, under, and *serum* (*q. v.*). Fr., *sous-séreux*. Situated beneath a serous membrane. [L, 56 (a, 43).]

SUBSESSILE, adj. Su^{3}b-se^{2}s′i^{2}l. Lat., *subsessilis* (from *sub-*, somewhat, and *sessilis*, sessile). Fr., *s.* Having a very short support or stalk; nearly sessile. [a, 35.]

SUBSPECIES (Lat.), n. f. Su^{3}b(su^{4}b)-spe(spe^2)′si^2(ki^2)-ez(as); in Eng., su^{3}b-spe′shez. Gen., *-e′i*. From *sub*, under, and *species* (*q. v.*). A variety having such decided characteristics as nearly to have the characters of a distinct species. [a, 35.]

SUBSTANCE, n. Su^{3}b′st′ns. Gr., οὐσία, ὕλη. Lat., *substantia* (from *substare*, to be present). Fr., *s.* Ger., *Substanz*. 1. That of which anything is composed or of which it consists. [a, 48.] 2. In histology, a general term for tissue, etc. [J.]—**Adamantine s.** See ENAMEL.—**Adenoid s.** See *Adenoid* TISSUE.—**Alible s.** That portion of the chyme that is destined for the nourishment of the body. [L, 42.]—**Alimentary s.** An article of food in the crude form as supplied by Nature. [K, 14.]—**Basis-s.** [Heitzmann]. 1. See *Ground-s.* (1st def.). 2. In connective tissue, etc., the entire s., except protoplasmic bodies or cells. [J, 26.]—**Bony basis-s.** See *Osseous basis-s.*—**Cancellated** (or **cancellous**) **osseous s.** See *Spongy bone s.*—**Cartilaginous basis-s.** Of Heitzmann, chondrin. [J, 26.]—**Cell-s.** See PROTOPLASM.—**Central gelatinous s.** See SUBSTANTIA *gelatinosa*.—**Chondrogenous basis-s.** See CHONDRIN.—**Cineritious s.** See ALA *cinerea* and LAMINA *cinerea*.—**Compact osseous s.** Ger., *dichte Knochensubstanz*. The more compact tissue found in long bones and forming the superficial portion of flat or short bones. [L, 332.]—**Conglobate gland s.** The adenoid tissue of conglobate glands. [J.]—**Connective s.** See *Connective* TISSUE.—**Contractile s.** 1. Any living s. or tissue capable of contraction (*e. g.*, undifferentiated protoplasm, muscular tissue, cilia, etc.). [J.] 2. The contractile portion of a muscle fibre (*i. e.*, that within the sarcolemma). [L, 332.] 3. See *Dark* DISC.—**Cork s.** Cutin. [a, 35.]—**Cortical s. of a hair.** The bundles of fibres cemented together which constitutes the larger portion of a hair. In colored hairs they contain pigment granules. [L.]—**Cortical s. of the kidney.** The portion of the kidney immediately beneath its fibrous covering. It is of a light crimson-brown color and about two lines in thickness, sends numerous processes (columns of Bertini) between the pyramids, and contains the Malpighian corpuscles and the terminals of the renal artery. [L.]—**Cortical s. of the suprarenal capsule.** The s. forming the external and greater portion of the suprarenal capsule. It consists of a fibrous stroma containing column-like groups of polyedral cells. [L.]—**Fibrinoplastic s.** Paraglobulin. [B.]—**Fibrous basis-s.** Of Heitzmann, the fibrous or laminated s. of striated or fibrous connective tissue, yielding glue or a glue-like body on being boiled. [J, 26.]—**Fused ganglion-cell s.** See NEUROGLIA.—**Gelatinous central s.** See SUBSTANTIA *gelatinosa centralis*.—**Gelatinous ganglion-cell s.** See NEUROGLIA.—**Gelatinous s.** See SUBSTANTIA *gelatinosa*.—**Gelatinous s. of Rolando.** See SUBSTANTIA *gelatinosa Rolandi*.—**Germinal s.** See *Germ* PLASMA.—**Ground s.** Fr., *s. intercellulaire*. Ger., *Grundsubstanz*, *Zwischensubstanz* (1st def.), *Kittsubstanz* (1st def.). 1. The homogeneous s. or matrix in which the structural elements (cells and fibres) are imbedded, or which cements them together. Cf. *Cell*-CEMENT. 2. The homogeneous hyaline material in the substance of cells in which is imbedded the network of protoplasm. [J.] See PLASM, ENCHYLEMA, and STROMA.—**Horny s.** See *Corneous* TISSUE.—**Hyaline s.** See CYTOBLASTEMA (1st def.).—**Hyaloid s.** See CORPUS *vitreum*.—**Intercellular s.** 1. See CYTOBLASTEMA (1st def.). 2. See *Ground-s.* (1st def.).—**Interfibrillar s.** See ENCHYLEMA.—**Interglobular s.** Of Czermak, the s. of dentin which appears to contain irregular cavities when a cross-section is dried in the air. It is most marked next the cementum. [J, 30, 35.]—**Intermediate s.** See *Ground-s.* (1st def.) and *Lateral* DISC.—**Interstitial osseous s.** Osseous tissue between the lamellæ of bone. [L, 332.]—**Interstitial s.** See ACHROMATIN, CYTOCHYLEMA, and ENCHYLEMA.—**Intertubular s.** The homogeneous matrix of dentin in which the dentinal canals are situated. [L, 351.]—**Intervertebral s.** See *Intervertebral* CARTILAGES.—**Isotrope s.** See *Lateral* DISC.—**Living s.** See PROTOPLASM.—**Medullary s.** Lat., *tela medullaris*. Fr., *tissu médullaire*. Ger., *Markgewebe*. 1. The s. forming the medulla of a part, as of bone; the tissue forming the medullary in contradistinction to the cortical part of an organ, as of the kidney. [G.] 3. In botany, pith. [a, 35.]—**Medullary s. of hair.** The hair-pith. [L.] See under HAIR.—**Medullary s. of the kidney.** The portion of the kidney internal to and denser and more distinctly striated than the cortical s. It consists mainly of the pyramids of Ferrein and the papillæ. [L.]—**Medullary s. of the suprarenal capsules.** The internal portion of the suprarenal capsules. It consists of a reticular fibrous stroma inclosing irregularly shaped cells and venous capillaries. [L.]—**Middle perforated s.** See *Posterior perforated* SPACE.—**Molecular (ganglion-cell) s.** See NEUROGLIA.—**Mucoid basis-s., Myxomatous basis-s.** Of Heitzmann, the non-glue-yielding, translucent s. which distinguishes the form of connective tissue called by him myxomatous or mucoid. [J, 26.]—**Nervous s.** See *Nervous* TISSUE.—**Nuclear s.** See CHROMATIN and NUCLEOPLASM.—**Nucleoplasmic s.** See *Nucleoplasmic* BODY.—**Osseous basis-s.** Of Heitzmann, "a dense, opaque, glue-yielding s. of striated or laminated appearance, infiltrated with lime salts" which serves to distinguish bone. [J, 26.]—**Osseous s. of a tooth.** See DENTIN.—**Osteogenic s.** See OSTEOGEN.—**Osteoid s.** See CEMENT (2d def.).—**Parietal s.** Of Remak, the matrix of cartilage. [J, 35.]—**Proteic s.** See PROTEID.—**Reticular s.** See *Reticular* FORMATION.—**Reticular s. of bone.** See *Spongy bone s.*—**Reticulated white s.** Lat., *substantia reticularis alba*. A reticulated layer of white nervous tissue on the anterior half of the uncinate gyrus. [L, 31, 142.]—**Rolando's gelatinous s.** See SUBSTANTIA *gelatinosa Rolandi*.—**Sarcodic s.** See SARCODE.—**Secondary s.** See *Lateral* DISC.—**Solid nutritive s's.** Solid materials (*e. g.*, eggs, slices of potatoes and of carrots, gelatin, gelose, and gelatinized blood-serum) used in bacteriological cultures. [L, 164 (a. 27).]—**Spongy bone** (or **osseous**) **s.** Bone tissue containing numerous cavities, giving it a cancellated appearance; found in the articular ends of long bones and in the interior of the short and flat bones. [B; L, 332.]—**Spongy s. of the nerve-centres.** See NEUROGLIA.—**S. amorphe** (Fr.). See ACHROMATIN.—**S. blanche perforée de Vicq d'Azyr** (Fr.). See ESPACE *perforé latéral*.—**S. cellulaire** (Fr.). Cellular tissue. [a, 35.]—**S. cendrée** (Fr.). See LAMINA *cinerea*.—**S. centrale** (Fr.). The central gray matter of the brain. [I, 36 (K).]—**S. conjonctive** (Fr.). See *Connective* TISSUE.—**S. criblée antérieure** (Fr.). See *Anterior perforated* SPACE.—**S. criblée postérieure.** See *Posterior perforated* SPACE. [I, 39.]—**S. de soutien** (Fr.). See *Connective* TISSUE.—**S. éburnée** (Fr.). See DENTIN.—**S. émaillée** (Fr.). See ENAMEL.—**S. gélatineuse centrale** (Fr.). See SUBSTANTIA *gelatinosa*.—**S. herbacée** (Fr.). Cellular tissue. [a, 35.]—**S. noire** (**de Sömmerring**) (Fr.). See LOCUS *niger*.—**S. perforée antérieure** (Fr.). See *Anterior perforated* SPACE.—**S. perforée médiane** (Fr.). See *Posterior perforated* SPACE.—**S. perforée médiane antérieure** (Fr.). See *Anterior perforated* SPACE.—**S. perforée (médiane) moyenne** (ou **postérieure**) (Fr.). See *Posterior perforated* SPACE.—**S. rhomboïdale** (Fr.). See CORPUS *dentatum*.—**S. striée** (Fr.). See ENAMEL.—**S. ternaire** (Fr.). A non-nitrogenous principle composed of three elements. [a, 18.]—**S. tubuleuse** (Fr.). See DENTIN.—**S. vitrée** (Fr.). See ENAMEL.—**Supporting s.** Ger., *Stützsubstanz*. A supporting tissue or s. (*e. g.*, neuroglia, connective tissue, etc.). [J.]—**Ventricular gray s.** Ger., *grauer Boden*. Of Meynert, the gray matter immediately adjacent to one of the ventricles of the brain; also the floor of the fourth ventricle. [J, 31 (K).]—**Vitreous s.** See ENAMEL.—**White s. of Schwann.** The medullary sheath of a nerve. [L.]

SUBSTANTIA (Lat.), n. f. Su^{3}b(su^{4}b)-sta^{2}n(sta^{3}n)′shi^2(ti^2)-a^3. See SUBSTANCE.—**S. adamantina.** See ENAMEL.—**S. antica media.** See *Anterior perforated* SPACE.—**S. callosa, S. candida.** The medullary cerebral substance. [I, 3 (K).]—**S. cinerea.** Gray nervous matter. [L.]—**S. cinerea gelatinosa.** See *S. gelatinosa*.—**S. cineritia.** The gray substance of the brain. [I, 3 (K).]—**S. conjunctoria.** See *Connective* TISSUE.—**S. corticalis (cerebri).** The cortex cerebri. [L.]—**S. corticalis lentis.** The peripheral portion or cortex of the lens, as distinct from the nucleus. [F.]—**S. corticalis pili.** See *Cortical* SUBSTANCE *of a hair*.—**S. corticalis renis.** See *Cortical* SUBSTANCE *of the kidney*.—**S. cribrosa lateralis.** See *Anterior perforated* SPACE.—**S. cribrosa media.** See LAMINA *cinerea*.—**S. dentalis ossea.** The cement of a tooth. [L.]—**S. dentalis tubulosa.** See DENTIN.—**S. dentis.** The tissue forming the teeth (enamel, cement, and dentin). [J.]—**S. dentis propria** (seu **tubulosa**), **S. eburnea.** See DENTIN.—**S. ferruginea.** 1. See *S. grisea*. 2. The gray substance of the locus cæruleus. [J, 6 (K).]—**S. ferruginea Arnoldii.** See *S. ferruginea* (2d def.).—**S. ferruginea superior.** See NUCLEUS *of the tegmentum*.—**S. fibrosa pili.** See *Cortical* SUBSTANCE *of a hair*.—**S. filamentosa.** See ENAMEL.—**S. flava.** Ger., *gelbe Substanz*. The yellow nerve substance of the brain. [J, 3 (K).]—**S. fundamentalis dentis.** See *Intertubular* SUBSTANCE.—**S. fusca.** See *S. nigra*.—**S. gelatinosa.** Neuroglia having a transparent, jelly-like appearance when fresh. [J.]—**S. gelatinosa centralis.** Ger., *centrales Höhlengrau*, *grauer Centralkern*, *Ringcommissur*. Syn.: *central ependymal thread*, *gray central nucleus*. The hollow, cylindrical or ellipsoidal mass of neuroglia surrounding the central canal of the myel and forming a kind of membrane upon which rests the epithelium of the central canal. It is composed of an amorphous substance, granules, fine fibres, and a few neuroglia cells, and in the fresh state appears translucent like jelly. [J, 10, 21, 30.]—**S. gelatinosa columnæ posterioris, S. gelatinosa Rolandi.** Neuroglia of a peculiarly transparent appearance found in the tip of the posterior gray cornu in the myel. It is supposed to contain very few true nerve-elements. [J, 10, 30, 32.]—**S. glandulosa.** Of Vieussens, the gray substance of the cortex cerebri. [I, 3 (K).]—**S. glomerulosa.** The cortical substance of the kidney. [J, 16.]—**S. grisea.** The central gray nervous matter of the spinal cord. [J, 6 (K).]—**S. hepatis brunnea** (seu **corti-**

calis). The outer and darker-colored portion of the liver. [L.]—**S. hepatis flava** (seu **medullaris**). The yellowish or deeper substance of the liver in contradistinction to the brown or cortical substance. [L, 50 (*a*, 50).]—**S. innominata.** Of Reil, see ANSA *of Reil.*—**S. hyalina.** See CYTOBLASTEMA (1st def.).—**S. intermedia.** Of Sömmerring, the layer of nerve-substance in the cerebellum interposed between the central and cortical gray zones. [I, 3 (K).]—**S. intertubularis dentis.** See *Intertubular* SUBSTANCE.—**S. lentis corticalis.** The cortex of the lens. [L.]—**S. lienis pulposa** (seu **rubra,** seu **vasculosa**). See *Splenic* PULP.—**S. medullaris.** See *Medullary* SUBSTANCE.—**S. medullaris pili.** The hair-pith (see under HAIR).—**S. medullaris renis.** See *Medullary* SUBSTANCE *of the kidney.*—**S. nigra Soemmerringii.** See LOCUS *niger.*—**S. ochracea.** See *Yellow* NUCLEUS *of the corpus striatum.*—**S. opaca.** Of Leydig, see PROTOPLASM.—**S. ossea.** See DENTIN.—**S. ossium compacta.** See *Compact osseous* SUBSTANCE.—**S. ossium corticalis.** Ger., *Knochenrinde.* The more condensed layer forming the outer surface of bone. [L, 332.]—**S. ostoidea.** See CEMENT (2d def.).—**S. parenchymatosa.** See PARENCHYMA.—**S. perforata anterior** (seu **antica**). See *Anterior perforated* SPACE.—**S. perforata cinerea.** See *Posterior perforated* SPACE.—**S. perforata lateralis.** See *Anterior perforated* SPACE.—**S. perforata media** (seu **posterior**). See *Posterior perforated* SPACE.—**S. primaria.** Of Stenson, the medullary substance of the central nervous system. [I, 3 (K).]—**S. propria corneæ.** The parenchyma or true tissue of the cornea. [L.]—**S. propria dentis.** See DENTIN.—**S. propria of the membrana tympani.** See LAMINA *propria of the membrana tympani.*—**S. pulposa dentis.** See *Dental* PULP.—**S. pulposa lienis.** See *Splenic* PULP.—**S. renis cineritia** (seu **fibrosa,** seu **glandulosa,** seu **interna,** seu **medullaris,** seu **tubulosa**). See *Medullary* SUBSTANCE *of the kidney.*—**S. renis corticalis** (**externa,** seu **glandulosa,** seu **rubicunda**). The cortical substance of the kidney. [L, 7.]—**S. reticularis.** See *Reticular* FORMATION.—**S. reticularis alba.** See *Reticulated white* SUBSTANCE.—**S. Rolandi.** See *S. gelatinosa Rolandi.*—**S. rubra (lienis).** See *Splenic* PULP.—**S. secundaria.** Of Carus, the gray matter of the cortex cerebri. [I, 3 (K).]—**S. Soemmerringii.** See LOCUS *niger.*—**S. striata.** See ENAMEL.—**S. subalbida.** See *S. flava.*—**S. tubulosa renis.** See *Medullary* SUBSTANCE *of the kidney.*—**S. tubulosa dentis.** See DENTIN.—**S. vasculosa (lienis).** See *Splenic* PULP.—**S. vasculosa renalis.** See *Cortical* SUBSTANCE *of the kidney.*—**S. visceralis.** See PARENCHYMA.—**S. vitrea.** See *S. gelatinosa Rolandi*, CYTOBLASTEMA, and ENAMEL.—**S. vitrea dentis.** See ENAMEL.—**S. vitrea ossis.** See *Compact osseous* SUBSTANCE.

SUBSTANZ (Ger.), n. Zub-sta^{3}nts'. See SUBSTANCE.—**Braune S.** Of Gordon, the gray matter of the brain. [J, 3 (K).]—**Centrale S. des Aquäducts.** The gray matter surrounding the aqueduct of Sylvius. [I, 17 (K).]—**Dichte Knochens'.** Compact osseous substance. [L.]—**Conglobirte S.** See *Adenoid* TISSUE.—**Gallerts'.** See *Gelatinous* TISSUE.—**Geformte S.** See *Formed* MATERIAL.—**Gelatinöse S.** See SUBSTANTIA *gelatinosa.* [I, 6.]—**Gelbe S.** See SUBSTANTIA *flava.*—**Graue gelatinöse S.** A thin layer of nerve-cells and neuroglia on the dorsal aspect of the olfactory bulb. [I, 17 (K).]—**Kerns'.** See *Nuclear* SUBSTANCE.—**Knochengrunds'.** The ground substance of bone. [J.]—**Knochens'.** Osseous tissue. [L.]—**Mittlere durchlöcherte S.** See *Posterior perforated* SPACE.—**Mutter-S.** That substance which is supposed to give rise to the active principle of the digestive fluids. [K, 16.] Cf. PEPSINOGEN and ZYMOGEN.—**Periphere graue S.** See STRATUM *cinereum.*—**Punkts'.** See NEUROSPONGIUM.—**Rindige S.** Cortical substance. [L.]—**Rostfarbige S., Rothbraune S., Rothgelbgraue S.** See ALA *cinerea.*—**Schwammige Knochens', Schwammige S.** See *Spongy osseous* SUBSTANCE.—**Sömmerring'sche S.** See LOCUS *niger.*—**Spongiöse Knochens'.** See *Spongy osseous* SUBSTANCE.—**Stützs'.** See *Supporting* SUBSTANCE.—**S'inseln.** The masses of interstitial tissue intervening between the blood-vessels of the germinal area of the ovum. [A, 8.]—**Vordere durchlöcherte S.** See *Anterior perforated* SPACE.—**Weisse reticuläre S.** See FORMATIO *reticularis alba.*—**Zwischens'.** See MATRIX (2d def.).

SUBSTERNAL, adj. Su^{3}b-stu^{5}r'n'l. See INFRASTERNAL.

SUBSTITUTION, n. Su^{3}b-sti^{2}t-u^{2}'shu^{3}n. Lat., *substitutio* (from *substituere*, to substitute). 1. In chemistry, the process of replacing one or more atoms in a molecule by other atoms or molecules. [B.] 2. In physiology and pathology, compensatory or vicarious action; a manifestation of disease in alternation with another and especially a nervous disorder; of French writers, replacement of the tissue of an organ by an inflammatory product. ["Edinb. Med. Jour.," Apr., 1888, p. 895 (*a*, 17).]—**S. parenchymateuse** (Fr.). Of Luton, the process of producing local artificial inflammation by subcutaneous injections of common salt or silver-nitrate solution. [L, 57 (*a*, 14).]—**S. product.** In chemistry, a product of the reaction of two bodies in which a molecule of the one replaces a portion of the molecule of the other. [B.]

SUBSTRATUS (Lat.), adj. Su^{3}b(su^{4}b)-strat(stra^{3}t)'u^{3}s(u^{4}s). From *substernere*, to spread beneath. Ger., *untergebreitet.* Spread under; so placed beneath another part as to form a substratum. [*a*, 35.]

SUBSULFAS (Lat.), n. m. Su^{3}b(su^{4}b)-su^{3}lf(su^{4}lf)'a^{2}s(a^{3}s). Gen., *-fat'is.* See SUBSULPHATE.—**S. hydrargyricus.** See MERCURY *subsulphate.*

SUBSULFUROSUS (Lat.), adj. Su^{3}b(su^{4}b)-su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-os'u^{3}s(u^{4}s). Hyposulphurous; with the name of a base, the hyposulphite (thiosulphate) of the base. [B.]

SUBSULPHAS (Lat.), n. m. Su^{3}b(su^{4}b)-su^{3}lf(su^{4}lf)'a^{2}s(a^{3}s). Gen., *-phat'is.* See SUBSULPHATE.—**Pilulæ subsulphatis ammonico-cuprici.** See *Pilulæ ammoniareti* CUPRI.—**S. chinicus.** See QUININE *sulphate.*—**S. cinchonicus.** See CINCHONINE *sulphate.*—**S. cinchonidicus.** See CINCHONIDINE *sulphate.*—**S. quinicus.** See QUININE *sulphate.*—**S. quinidicus.** See QUINIDINE *sulphate.*

SUBSULPHATE, n. Su^{3}b-su^{3}lf'at. Lat., *subsulfas, subsulphas.* Fr., *soussulfate.* A basic sulphate. [B.]

SUBSULPHIDE, n. Su^{3}b-su^{3}lf'i^{2}d(id). A sulphide which contains a relatively smaller amount of sulphur than an ordinary sulphide. [B.]

SUBSULTUS (Lat.), n. m. Su^{3}b(su^{4}b)-su^{3}lt(su^{4}lt)'u^{3}s(u^{4}s). From *subsilire*, to leap up. Fr., *soubresaut.* Ger., *Hüpfen.* A jerking or twitching. [*a*, 17.]—**S. tendinum.** Ger., *Sehnenhüpfen.* Trembling of the tendons caused by involuntary twitchings of the muscles, especially of the face and arms. [D, 1.]

SUBTEGMEN (Lat.), n. m. Su^{3}b(su^{4}b)-te^{2}g'me^{2}n. Gen., *-teg'minis.* From *subtexere*, to weave under. Weft. [A, 312 (*a*, 48).]—**S. fornicis.** The layer of nerve-fibres in the fornix cerebri under the superficial bundles of longitudinal fibres. [I, 3 (K).]

SUBTEMPORAL, adj. Su^{3}b-te^{2}mp'o^{2}-r'l. See INFRATEMPORAL.

SUBTERCUTANEUS (Lat.), n. m. Su^{3}b(su^{4}b)-tu^{5}r(te^{2}r)-ku^{2}t-(ku^{4}t)-an(a^{3}n)'e^{2}-u^{3}s(u^{4}s). From *subter*, beneath, and *cutis*, the skin. See PLATYSMA *myodes.*

SUBTERRANEOUS, adj. Su^{3}b-te^{2}r-an'e^{2}-u^{3}s. Lat., *subterraneus* (from *sub*, under, and *terra*, the earth). Fr., *souterré, souterrain.* Ger., *unterirdisch.* Growing beneath the surface of the soil. [*a*, 35.]

SUBTHALAMIC, adj. Su^{3}b-tha^{2}l'a^{2}m-i^{2}k. From *sub*, under, and *thalamus* (*q. v.*). Situated below the optic thalamus. [*a*, 48.]

SUBTHALAMICUM (Lat.), n. n. Su^{3}b(su^{4}b)-tha^{2}l(tha^{3}l)-a^{2}m-(a^{3}m)'i^{2}k-u^{3}m(u^{4}m). See *Subthalamic* NUCLEUS.

SUBTHORACIC, adj. Su^{3}b-tho^{2}r-a^{2}s'i^{2}k. See INFRATHORACIC.

SUBTHYREOIDEUS (Lat.), n. m. Su^{3}b(su^{4}b)-thir(thu^{6}r)-e^{2}-o(o^{2})-i^{2}d(ed)'e^{2}-u^{3}s(u^{4}s). For deriv., see *Sub-** and THYREOID. An anomalous bundle of muscular fibres uniting the thyreo-arytænoidei inferior and lateralis. [L, 332.]

SUBTRIBE, n. Su^{3}b'trib. Lat., *subtribus* (from *sub*, under, and *tribus*, a tribe). A group ranking between the tribe and the genus. [*a*, 35.]

SUBTROCHANTERIC, adj. Su^{3}b-trok-a^{2}nt-e^{2}r'i^{2}k. Fr., *soustrochantérien.* See INFRATROCHANTERIC.

SUBTROCHLEAR, adj. Su^{3}b-tro^{2}k'le^{2}-a^{3}r. See INFRATROCHLEAR.

SUBTROPICAL, adj. Su^{3}b-tro^{2}p'i^{2}-k'l. From *sub-*, near to, and τροπικός, of the solstice. Of plants, growing in countries approximating to the tropics in climatic conditions. [*a*, 35.]

SUBULA (Lat.), n. f. Su^{2}b(sub)'u^{2}l(u^{4}l)-a^{3}. Ger., *Pfriemspitze.* One of the prickles, formed by the hymenium, covering the lower surface of the pileus in certain *Fungi* (*Hydnum*). [*a*, 35.]

SUBULATE, adj. Su^{2}b'u^{2}l-at. Lat., *subulatus* (from *subula*, an awl). Fr., *subulé.* Ger., *pfriemenartig, pfriemig.* Awl-shaped, styloid. [L, 221.]

SUBULIFORM, adj. Su^{2}b-u^{2}l'i^{2}-fo^{2}rm. Lat., *subbuliformis* (from *subula*, an awl, and *forma*, form). Subulate, styloid (said of solid bodies). [*a*, 35.]

SUBULOSE, adj. Su^{2}b'u^{2}l-os. Lat., *subulosus.* Ger., *pfriemspitzig.* Covered with or consisting of subulæ. [*a*. 35.]

SUBUNGUAL, SUBUNGUIAL, adj's. Su^{3}b-u^{3}n^{2}'gw'l, -gwi^{2}-'l. From *sub*, under, and *unguis*, a hoof. Fr., *sous-unguéal, sous-ongulaire.* Situated beneath a nail. [*a*, 48.]

SUBVAGINAL, adj. Su^{3}b-va^{2}j'i^{2}-n'l. See INFRAVAGINAL.

SUBVARIETY, n. Su^{3}b-va^{2}r-i'e^{2}t-i^{2}. Lat., *subvarietas.* Ger., *Unterspielart.* One of the more or less divergent groups into which some varieties may be divided. [*a*, 35.]

SUBVERTEBRA (Lat.), n. f. Su^{3}b(su^{4}b)-vu^{5}rt(we^{2}rt)'e^{2}b-ra^{3}. From *sub*, under, and *vertebra* (*q. v.*). See SACRUM.

SUBVOLA (Lat.), n. f. Su^{3}b(su^{4}b)'vo^{2}l(wo^{2}l)-a^{3}. 1. The space between the second and fifth fingers. [L, 50 (*a*, 14).] 2. See HYPOTHENAR.

SUBVOMÉRAL [G. St.-Hilaire] (Fr.), n. Su^{6}b-vo-ma-ra^{3}l. The splenial bone in fishes. [L, 14.]

SUBZONAL, adj. Su^{3}b-zo'n'l. From *sub*, under, and ζώνη, a belt. Situated beneath the zona pellucida. [L.]

SUBZYGOMATIC, adj. Su^{3}b-zi^{2}g-o^{2}m-a^{2}t'i^{2}k. From *sub*, below, and ζύγωμα, a bolt. Fr., *sous-zygomatique.* Situated below the zygoma. [L, 41 (*a*, 14).]

SUC (Fr.), n. Su^{6}k. 1. Juice, sap. 2. See SUCCUS (2d def.).—**Extrait de s.** An extract made by condensing a fruit juice. [L, 41 (*a*, 14).]—**Sirop de s. d'herbes.** See SIROP *laxatif d'Amussat.*—**S. antiscorbutique.** See SUCCUS *antiscorbuticus.*—**S. cancéreux.** See CANCER *juice.*—**S. cellulaire.** See CELL-*fluid.*—**S. de la liqueur végétale.** Of the alchemists, grape-juice. [L. 41 (*a*, 14).]—**S. entérique.** See *Intestinal* JUICE.—**S. gastrique.** See *Gastric* JUICE.—**S's huileux fixes.** Vegetable juices containing fixed oils. [L, 49 (*a*, 14).]—**S. lacté.** See CHYLE.—**S. nourricier.** See *Nutrient* JUICE.—**S. nucléolaire.** See ACHROMATIN.—**S. pancréatique.** See *Pancreatic* JUICE.—**S. pylorique.** See SUCCUS *pyloricus.*—**S. stomacal.** See *Gastric* JUICE.—**S's sucrés.** Saccharine vegetable juices, such as those of the sugar cane, beetroot, maple, etc. [L, 41 (*a*, 14).]—**S's végétaux** [Fr. Cod.]. Juices prepared from the green part, especially the fresh leaves, or from the fruit of various vegetable substances. [B, 95 (*a*, 38).]

SUCCADE (Ger.), n. Zuk-ka^{3}d'e^{2}. See CITRONNAT.

SUCCEDANEUM (Lat.), n. n. Su^{3}k(su^{4}k)-se^{2}d(kad)-an(a^{3}n)'-e^{2}-u^{3}m(u^{4}m). From *succedaneus*, substituted. Fr., *succédané.* Ger., *stellvertretendes Mittel, Surrogat.* A substitute. [L, 49, 50 (*a*, 43).]

SUCCEDANEUS (Lat.), adj. Su^{3}k(su^{4}k)-se^{2}d(kad)-an(a^{3}n)'e^2-u^{3}s(u^{4}s). From *succedere*, to succeed. Fr., *succédané*. Ger., *allmälig* (1st def.), *stellvertretend* (2d def.). 1. Taking place by degrees or through a long period of time. 2. Vicarious. [a, 35.]

SUCCENTURIATUS (Lat.), adj. Su^{3}k(su^{4}k)-se^{2}nt(ke^{2}nt)-u^{2}r-(u^{4}r)-i^2-at(a^{3}t)'u^{3}s(u^{4}s). From *succentuariare*, to receive as a recruit or substitute. Fr., *succenturié*. 1. Substituted. 2. Accessory (see PLACENTA *succenturiata*); as a n., an accessory muscle. —**S. recti.** Of Sylvius, see PYRAMIDALIS *abdominis*.

SUCCESSIVE, adj. Su^{3}k-se^{2}s'i^{2}v. Lat., *successivus* (from *succedere*, to follow). Fr., *successif*. Ger., *nachfolgend*. In botany, developed first after another similar part or organ. [a, 35.]

SUCCHOLATA (Lat.), n. f. Su^{3}k(su^{4}k)-ko^{2}l(ch^{2}o^{2}l)-at(a^{3}t)'a^3. See CHOCOLATE.

SUCCIN (Fr.), n. Su^{6}k-sa^{2}n^2. See AMBRA *flava*.—**Alcoolé de s.** See *Tinctura* SUCCINI (1st def.).—**Baume de s.** See *Balsam of* AMBER.—**Épyrèle de s. ammoniacale.** See *Spiritus* AMMONIÆ *cum succino*.—**Éthérolé de s.** See *Tinctura* SUCCINI (2d def.).—**Huile** (**volatile**) **de s.** See *Oleum* SUCCINI (2d def.).—**Poudre de s.** See SUCCINUM *pulveratum*.—**Sel volatil de s.** See SUCCINIC *acid*.—**S. noir.** See AMBRA *nigra*.—**Teinture (alcoolique) de s.** See *Tinctura* SUCCINI (1st def.).—**Teinture éthérée de s.** See *Tinctura* SUCCINI (2d def.).

SUCCINAMIC ACID, n. Su^{3}k-si^{2}n-a^{2}m'i^{2}k. Fr., *acide succinamique*. Ger., *Succinaminsäure*. A monobasic acid, $C_4H_7NO_3$, occurring as large tabular crystals of agreeable acid taste. [B, 3 (a, 38); B, 4.]

SUCCINAMIDE, n. Su^{3}k-si^{2}n'a^{2}m-i^{2}d(id). Fr., *s*. Ger., *Succinamid*. The compound $C_4H_8N_2O_2$. [B, 3 (a, 38).]

SUCCINANILIC ACID, n. Su^{3}k-si^{2}n-a^{2}n-i^{2}l'i^{2}k. Fr., *acide succinanilique*. An acid, $C_{10}H_{11}NO_3 = C_4H_4O_2(NH.C_6H_5)(OH)$. [B, 93 (a, 14).]

SUCCINANILIDE, n. Su^{3}k-si^{2}n-a^{2}n'i^{2}l-i^{2}d(id). Fr., *s*. Ger., *Succinanilid*. A substance, $C_{16}H_{16}N_2O_2 = C_4H_4O_2(NH.C_6H_5)_2$, obtained by heating a mixture of succinic acid and aniline or by the action of aniline on succinyl chloride. [B, 93 (a, 14).]

SUCCINAS (Lat.), n. m. Su^{3}k(su^{4}k)'si^{2}n(ki^{2}n)-a^{2}s(a^{3}s). Gen., *-at'is*. See SUCCINATE.—**Liquor succinatis ammonici** (**pyroleosi**), **Solutio succinatis ammonici pyro-animalis, Spiritus succinatis ammonici.** See *Liquor* AMMONII *succinici*.

SUCCINATE, n. Su^{3}k'si^{2}n-at. Lat., *succinas*. Fr., *s*. Ger., *Succinat*, *Bernsteinsalz*. A salt of succinic acid. [B.]

SUCCINATED, adj. Su^{3}k'si^{2}n-at-e^{2}d. Lat., *succinatus* (from *succinum*, amber). Fr., *succiné*. Combined, mixed with, or containing amber or succinic acid. [B, 92; L, 56.]

SUCCINCTUM (Lat.), **SUCCINCTURA** (Lat.), n's n. and f. Su^{3}k(su^{4}k)-si^{2}n^{2}kt(ken^{2}kt)'u^{3}m(u^{4}m), -si^{2}n^{2}kt(ken^{2}kt)-u^{2}r(ur)'a^3. From *succingere*, to gird below. See DIAPHRAGM (1st def.).

SUCCINIC, adj. Su^{3}k-si^{2}n'i^{2}k. Lat., *succinicus* (from *succinum*, amber). Fr., *succinique*. Derived from or contained in amber. [B.]—**S. acid.** Lat., *acidum succinicum*. Fr., *acide succinique*. Ger., *Bernsteinsäure*, *Succinsäure*. An acid, $C_2H_4(CO.OH)_2 = C_4H_6O_4$, obtained by the dry distillation of amber, from the products of fermentation of sugar and of malic and tartaric acids, and from fossil wood, and occurring in the spleen and acinous glands and in the urine after the ingestion of a considerable quantity of fruit. It forms monoclinic tabular or prismatic crystals of slightly acid taste. [B; B, 3 (a, 38).]—**S. aldehyde.** Fr., *succinaldéhyde*. A colorless liquid, $C_4H_6O_2$, derived from succinic acid. [B, 4.]—**S. anhydride.** Fr., *anhydride succinique*. Ger., *Bernsteinsäureanhydrid*, *Succinanhydrid*. A colorless crystalline body, $C_4H_4O_3$. [B, 4.]

SUCCINIFER (Lat.), adj. Su^{3}k(su^{4}k)-si^{2}n(ki^{2}n)'i^2-fu^{6}r(fe^{2}r). From *succinum*, amber, and *ferre*, to bear. Productive of amber.

SUCCINIMIDE, n. Su^{3}k-si^{2}n'i^{2}m-i^{2}d(id). A substance, $C_4H_5NO_2$, occurring as transparent crystals. [B, 3 (a, 38).]

SUCCININ, n. Su^{3}k'si^{2}n-i^{2}n. 1. A dark-brown substance, $C_3H_5 \langle {}^{OH}_{C_4H_4O}$, obtained by heating equal parts of succinic acid and glycerin to about 230° C. 2. The part of amber which is insoluble in most solvents. [B, 270 (a, 38).]

SUCCINIT (Ger.), n. Zuk-tsen-et'. Amber. [a, 35.]

SUCCINONE, n. Su^{3}k'si^{2}n-on. A brown, oily liquid of empyreumatic odor, obtained in the dry distillation of calcium succinate. [B, 38, 93 (a, 14).]

SUCCINUM (Lat.), n. n. Su^{3}k(su^{4}k)'si^{2}n(ki^{2}n)-u^{3}m(u^{4}m). From *succus*, juice. Fr., *succin*, *karaké*, *ambre jaune* [Fr. Cod.]. Ger., *Bernstein*. Sp., *succino*, *ambar amarillo* [Sp. Ph.]. Amber. See AMBRA *flava*.—**Acidum succini.** See SUCCINIC *acid*.—**Ætheroleum succini.** See *Oleum succini* (2d def.).—**Alcohol cum succino.** See *Tinctura succini* (1st def.).—**Balsamum succini** Ger., *Bernsteinbalsam*. See *Balsam of* AMBER.—**Essentia succini.** See *Tinctura succini* (1st def.).—**Oleosaccharum succini.** Ger., *Bernsteinölzucker*. A mixture of two drops of oil of amber with 4 grammes of sugar, triturated together. [B, 119 (a, 38).]—**Oleum succini.** Fr., *huile* (*volatile*) *de succin*, *oléule de succin* (2d def.). Ger., *Bernsteinöl*, *Ambraöl*. 1. Of the Pruss. Ph., 6th ed., crude oil of amber, a thick, brown oil, of strong, disagreeable bituminous odor, produced by the dry distillation of amber. 2. Of the U. S. Ph. and Swiss Ph., rectified oil of amber, a nearly or quite colorless, thin oil, becoming thick and dark with time and having a penetrating, fiery odor and taste. It is a crude mixture of two separate oils formed at different stages in the distillation, and is obtained by repeated distillation and the addition of water. It is a local irritant, and in large doses toxic. It is used as an excitant and antispasmodic, in flatulent dyspepsia, globus hystericus, and hiccough, and externally in rheumatism, convulsions, earache, and toothache. [A, 1; B, 95 (a, 38); L, 57 (a, 50); W. Murrell, "Brit. Med. Jour.," Apr. 1, 1893 ("N. Y. Med. Jour.," Apr. 15, 1893, p. 417).]—**Oleum succini æthereum** (**seu depuratum**). See *Oleum succini* (2d def.).—**Oleum succini crudum.** See *Oleum succini* (1st def.).—**Oleum succini empyreumaticum.** See *Oleum succini* (2d def.).—**Oleum succini empyreumaticum cum crudum.** See *Oleum succini* (1st def.).—**Oleum succini oxydatum.** See *Artificial* MUSK.—**Oleum succini pyrogenæum.** See *Oleum succini* (1st def.).—**Oleum succini rectificatum.** See *Oleum succini* (2d def.).—**Pilulæ de succino.** A pill-mass consisting of 10 parts of Socotrine aloes with 6 of amber, 4 of mastic, and 1 part of round birthwort, made up with tincture of amber and sometimes with 3 parts of agaric lozenges; or of 6 parts of aloes, 3 of amber, 2 each of birthwort and agaric, made up with syrup of betonica. [B, 119 (a, 38).]—**Potestates succini.** An obsolete preparation of amber, sal ammoniac, and antimonial wine. [L, 94.]—**Pyroleum succini.** See *Oleum succini* (2d def.).—**Pyroleum succini crudum.** See *Oleum succini* (1st def.).—**Pyroleum succini rectificatum.** See *Oleum succini* (2d def.).—**Rasura succini.** Very small fragments of amber (*ambra flava*), amber shavings. [a, 35.]—**Resina succini balsamica.** See *Artificial* MUSK.—**Sal succini** (**volatile**). See SUCCINIC *acid*.—**S. album et citrinum, S. electricum.** See AMBRA *flava*.—**S. factitium.** See *Factitious* AMBER.—**S. flavum.** See AMBRA *flava*.—**S. griseum.** See AMBRA *grisea*.—**S. marinum.** Spermaceti. [a, 35.]—**S. oxygenatum.** See *Artificial* MUSK.—**S. pulveratum.** Fr., *poudre de succin*. Amber triturated in an iron mortar and sifted through a No. 100 silk sieve [Fr. Cod.] (a 1,000-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).]—**Tinctura succini.** Fr., *teinture de succin* [Fr. Cod.] (1st def.). Ger., *Bernsteinauszug*, *Bernsteinessenz*, *Bernsteintinctur*. 1. Of the Gr. Ph. and Netherl. Ph., a tincture made by digesting or macerating powdered amber with four times as much alcohol of sp. gr. 0·820 to 0·830 [Gr. Ph.], with eight times as much alcohol of sp. gr. 0·829 [Netherl. Ph.], with ten times as much 80-per-cent. alcohol [Fr. Cod.]. 2. Of the Swed. Ph., a preparation made by macerating powdered amber with five times as much spiritus ætheris for five days. [B, 95, 119 (a, 38).]—**Tinctura succini ætherea.** See *Tinctura succini* (2d def.).—**Tinctura succini alcalisata.** Ger., *alkalische Bernsteintinctur*. A mixture of 12 parts of amber and 3 of aqueous solution of potassium carbonate with 48 of alcohol, filtered after some days.—**Tinctura succini alcoholica.** See *Tinctura succini* (1st def.).—**Tinctura succini aromatica** [Swed. Ph.]. A solution of 1 part each of the oils of cloves, cassia, lavender, and mace in 100 parts of ethereal tincture of amber. [B, 95 (a, 38).]—**Tinctura succini balsamica.** An alcoholic solution of artificial musk (see *Tinctura* MOSCHI *artificialis*). [a, 38.]—**Trochisci succini.** Ger., *Bernsteintäfelchen*. Troches containing opium, amber, and other ingredients. [B, 48.]

SUCCINURIC ACID, n. Su^{3}k-si^{2}n-u^{2}r'i^{2}k. Fr., *acide succinurique*. Ger., *Succinursäure*. A body, $C_5H_8N_2O_4$, forming laminar crystals. [B, 4.]

SUCCINYL, n. Su^{3}k'si^{2}n-i^{2}l. Fr., *succinyle*. The radicle of succinic acid, not yet isolated. [B, 4.]—**S. chloride.** A substance, $C_4H_4O_2.Cl_2$, obtained by distilling succinic acid with phosphorus perchloride; a fuming oil of highly refractive power and of suffocating smell, crystallizing at 0° C. and boiling at 190° C. [B, 48, 93 (a, 14).]—**S. diamide.** See SUCCINAMIDE.

SUCCISA (Lat.), n. f. Su^{3}k(su^{4}k)-sis(kes)'a^3. 1. The *Scabiosa s.* 2. Of Mönch, the genus *Scabiosa*. [a, 35.]

SUCCISE, adj. Su^{3}k-sis'. Lat., *succisus* (from *succidere*, to cut away below). Fr., *succis*. In botany, having the appearance of being broken or cut off at the lower end. [a, 35.]

SUCCISTEARIN, n. Su^{3}k-si^2-ste'a^{2}r-i^{2}n. Fr., *succistéarène*. 1. The white crystalline portion of a waxy substance obtained by the dry distillation of amber; inodorous and insipid. 2. Improperly, idrialin. [B, 93 (a, 14).]

SUCCORY, n. Su^{3}k'o-ri^2. See CHICORY.—**Wild s.** See SABBATIA *angularis*.—**Yellow s.** See CATANANCHE *lutea*.

SUCCOSE, adj. Su^{3}k'os. Lat., *succosus* (from *succus*, juice). Ger., *saftvoll*. See SUCCULENT.

SUCCUBA (Lat.), n. f. Su^{3}k(su^{4}k)'ku^{2}b(ku^{4}b)-a^3. From *succubare*, to lie under. Fr., *succube*. See under INCUBUS (1st def.).

SUCCUBOUS, adj. Su^{3}k'u^{2}b-u^{3}s. Lat., *succubus*. Ger., *unterschlächtig*. Having the anterior margin of each leaf passing under the posterior margin of the leaf immediately succeeding it on the branch. [a, 35.] Cf. INCUBOUS.

SUCCUBUS (Lat.), n. m. Su^{3}k(su^{4}k)'ku^{2}b(ku^{4}b)-u^{3}s(u^{4}s). Nightmare with the hallucination of the presence of a succuba.

SUCCULENT, adj. Su^{3}k'u^2-l'nt. Lat., *succulentus* (from *succus*, juice). Fr., *s*. Ger., *saftig*. Juicy, abounding in juice. The *Succulentæ* are: Of Linnæus, an order comprising *Cactus*, *Mesembryanthemum*, *Sedum*, etc.; of Ventenat, the *Crassulaceæ*.

SUCCUS (Lat.), n. m. Su^{3}k(su^{4}k)'ku^{3}s(ku^{4}s). From *sugere*, to suck. Fr., *suc*. Ger., *Saft*. 1. A juice. 2. A pharmacopœial preparation made by squeezing out the juice from green plants and adding enough alcohol to preserve it. [D, 6.]—**Aqua succorum vegetabilium vulneraria.** See AQUA *pontificalis*.—**Ater s.** See ATRABILIS.—**S. antiscorbuticus.** Fr., *suc antiscorbutique*. Sp., *zumo antiescorbútico* [Sp. Ph.]. 1. A preparation made by crushing equal parts of the leaves of *Nasturtium officinale*, *Menyanthes trifoliata*, and either *Cochlearia officinalis* or *Lepidium latifolium* and radix armoraciæ, expressing, adding a little water to the residue, repeating the process, mixing the two liquids, and filtering when settled. [B, 95 (a, 38).]—**S. carnis.** See MEAT *juice*.—**S. cyrenaicus antiquorum.** See ASAFŒTIDA.—**S. entericus.** See *Intestinal* JUICE.—**S. gastricus.** See *Gastric* JUICE.—**S. hispanicus.** Licorice (extract). [a, 35.]—**S. inspissatus.** An old name for a pharmaceutical preparation made by inspis-

sating a vegetable juice till it had attained a solid consistence. Preparations of this class are now included under the head of extracts. [B, 5.]—**S. japonicus.** Catechu. [B, 119 (α, 38).]—**S. lacteus.** See *Vegetable* MILK.—**S. nerveus.** See *Nervous* FLUID.—**S. osseus.** In ancient surgery, a hypothetical juice of the bone which was supposed to coagulate to form the callus of a uniting fracture. [L, 57 (α, 14).]—**S. pancreaticus.** See *Pancreatic* JUICE.—**S. pyloricus.** An alkaline fluid secreted by the pyloric end of the stomach; said by Klemensiewicz to convert starch into sugar. [K, 10.]—**S. thebaicus.** See OPIUM.

SUCCUSSION, n. Su³k-ku³sh'u³n. Lat., *succussio* (from *succutere*, to shake, to jolt). Fr., *s.* Ger., S., *Rütteln.* A method of physical examination to ascertain the presence of fluid in a cavity, performed by shaking the individual from side to side. [α, 34.]

SUCHER (Ger.), n. Zuch²'e²r. See PROBE.

SUCHNADEL (Ger.), n. Zuch²'na³d-e²l. See *Exploring* NEEDLE.

SUCHRÖHRCHEN (Ger.), n. Zuch²'ru⁵r-ch²e²n. An exploring tube.

SUCHT (Ger.), n. Zuch²t. Disease, especially chronic disease. [A, 521 (α, 48).]—**Ackerbaus'.** See AGROMANIA.—**Bleichs'.** See CHLOROSIS.—**Bleichs' mit Schwinds'.** See CHLOROPHTHISIS.—**Fetts'.** See ADIPOSIS.—**Fress'.** See BULIMIA.—**Galls'.** See ATRABILIS.—**Gähns'.** An inclination to yawn frequently. [α, 34.]—**Gelbs'.** Jaundice.—**Grillens'.** See HYPOCHONDRIASIS.—**Kleiens'.** See PITYRIASIS.—**Manns'.** See NYMPHOMANIA.—**Misels'.** Leprosy. [α, 34.]—**Reises'.** See ECDEMIOMANIA.—**Ripps'.** See HYPOCHONDRIASIS.—**Rückens'.** See RHACHITIS.—**Schwarzs'.** See MELANISM.—**Schweisss'.** See MILIARIA (1st def.).—**Staars'.** See CATALEPSY.—**Stehls'.** See CLEPTOMANIA.—**Steifs'.** See CATALEPSY.—**Sticks'.** See ATELECTASIS *pulmonum.*—**Stiers'.** Cattle plague. [L, 80.]—**Tanzs'.** See *Epidemic* CHOREA.—**Tobs'.** See HYPERPHRENIA and MANIA.—**Wachschlafs'.** See COMA-*vigil.*—**Wassers'.** See the major list.—**Zweifels'.** See FOLIE *du doute.*

SÜCHTIG (Ger.), adj. Zu⁶ch²t'i²g. 1. Diseased or causing disease; in this sense only used in compound words. 2. Inclined to ulceration. [L, 30 (α, 14).]

SUCKER, n. Su³k'u⁶r. Fr., *suçoir* (1st def.). Ger., *Sauger* (1st def.). 1. See HAUSTORIUM. 2. In botany, an ascending branch from an underground stem. [α, 35.]

SUÇON (Fr.), n. Su⁶-so²n². See SUGGILLATION.

SUCRATE, n. Su²k'rat. Sometimes improperly called *saccharate.* A compound of saccharose (sucrose) with a base. [B, 9.]

SUCRE (Fr.), n. Su⁶kr'. See SUGAR and SACCHARUM.—**Eau-de-vie de s.** See RUM.—**Poudre de s.** [Fr. Cod.]. Very white sugar crushed in a marble mortar, dried, powdered, and sifted through a No. 140 silk sieve. [B, 95 (α, 38).]—**Poudre de s. de lait** [Fr. Cod.]. Sugar of milk coarsely powdered in a marble mortar, dried in the oven, powdered more finely, and sifted through a No. 140 silk sieve. [B, 113 (α, 38).]—**Sirop de s. (à froid).** See SYRUPUS.—**S. à la vanille** [Fr. Cod.]. See *Poudre de* VANILLE *sucrée.*—**S. anthelmintique.** See HYDRARGYRUM *saccharatum.*—**S. brut.** See *Brown* SUGAR.—**S. de diabète.** See *Diabetic* SUGAR.—**S. de fruits.** See *Grape* SUGAR.—**S. de gland.** See QUERCITE.—**S. de goudron, S. de houille.** See SACCHARIN.—**S. de lait.** See *Milk* SUGAR.—**S. de raisins.** See *Grape* SUGAR.—**S. de réglisse.** See GLYCYRRHIZIN.—**S. des boutiques.** The *Saccharum officinarum.* [α, 35.]—**S. des urines.** See GLUCOSE.—**S. en pains.** See *Cane* SUGAR.—**S. ferrugineux.** A compound of 20 parts of sugar and 1 part of gelatinous ferric hydrate. [B, 93 (α, 14).]—**S. mercuriel.** See HYDRARGYRUM *saccharatum.*—**S. mercuriel composé.** See SACCHARUM *mercuriale compositum.*—**S. noir.** See *Extractum* GLYCYRRHIZÆ.—**S. urinaire.** See GLUCOSE.—**S. vermifuge.** See HYDRARGYRUM *saccharatum.*—**S. violet.** See SACCHARUM *violaceum.*

SUCRÉ (Fr.), adj. Su⁶-kra. Sweetened with sugar.

SUCROCARBONATE, n. Su²k-ro-ka³rb'o²n-at. A combination of a carbonate with sucrose. [B.]

SUCROSE, n. Su²k'ros. Ger., *S.* See SACCHAROSE.

SUCTION, n. Su³k'shu³n. Lat., *suctio* (from *sugere*, to suck). Fr., *s.* Ger., *Saugen.* The process of sucking. [α, 48.]—**S. of cataract.** Lat., *suctio lentis.* See *Teale's operation by s.* under *Cataract* EXTRACTION.

SUCTORIAL, adj. Su³kt-or'i²-'l. From *sugere*, to suck. Adapted for sucking. [α, 27.]

SUCTUS (Lat.), n. m. Su³kt(sukt)'u³s(u⁴s). Gen., *suct'us.* See SUCTION.—**S. voluptabilis.** Ger., *Wonnesaugen.* Pleasurable sucking; of Vogel, the addiction of children to sucking their fingers, toes, arms, etc. Such children in middle and southern Germany are called *Daumenlutscher* or *Ludler.* [D, 29.]

SUDAMEN (Lat.), n. n. Su²d(sud)-a(a³)'me²n. Gen., *-am'inis.* From *sudare*, to perspire. Commonly used in the plural, *sudamina* (*q. v.*).

SUDAMINA (Lat.), n. n., pl. of *sudamen.* Su²d(sud)-a²m(a³m)'i²n-a³. Vesicles produced by sweat retained beneath the cuticle in consequence of occlusion of the orifices of the sweat ducts. [G.] See MILIARIA *crystallina.*—**S. alba.** See MILIARIA *alba.*—**S. balneantium.** The s. of bathers. [G.] See MILIARIA *rubra.*—**S. crystallina.** See MILIARIA *crystallina.*—**S. maligna.** See MILIARIA (1st def.).—**S. rubra.** See MILIARIA *rubra.*

SUDARIUM (Lat.), n. n. Su²d(sud)-ar(a³r)'i²-u³m(u⁴m). See SUDATORIUM.

SUDATIO (Lat.), n. f. Su²d(sud)-a(a³)'shi²(ti²)-o. Gen., *-on'is.* See SUDATION.—**S. morbosa.** See HYPERIDROSIS.

SUDATION, n. Su²d-a'shu³n. Lat., *sudatio* (from *sudare*, to perspire). Cf. HIDROSIS and EPHIDROSIS.

SUDATORIUS (Lat.), adj. Su²d(sud)-a²t(a³t)-or'i²-u³s(u⁴s). From *sudare*, to perspire. Fr., *sudatoire.* Sudatory, pertaining to perspiration; as a n., in the f., *sudatoria*, see EPHIDROSIS; as a n., in the n., *sudatorium*, a hot-air bath, a sweating-room.

SUDOLORRHŒA (Lat.), n. f. Su²d(sud)-o²l-o²r-re'(ro²'e²)-a³. From *sudare*, to perspire, *oleum*, oil, and ῥοία, a flow. Of Piffard, eczema seborrhoicum. [G.]

SUDOR (Lat.), n. m. Su²d(sud)'o²r. Gen., *-or'is.* Fr., *sueur.* Ger., *Schweiss.* Sweat.—**S. anglicus.** 1. The sweating sickne s. 2. See MILIARIA (1st def.).—**S. arenosus.** See URIDROSIS *crystallina.*—**S. cruentus.** See HÆMATIDROSIS.—**S. cruentus e catameniis suppressis.** See MENIDROSIS.—**S. febrilis criticus.** See EPHIDROSIS *febrilis.*—**S. lacteus.** See GALACTIDROSIS.—**S. miliaris.** See MILIARIA (1st def.).—**S. nocturnus.** See NIGHT-SWEAT.—**S. sabulosus.** See URIDROSIS *crystallina.*—**S. sanguineus.** See HÆMATIDROSIS.—**S. urinosus.** See URIDROSIS.—**Sudoris nullitas (seu privatio).** See ANIDROSIS.

SUDORALIS (Lat.), adj. Su²d(sud)-e²r(or)-al(a³l)'i²s. From *sudor*, sweat. Fr., *sudoral.* Pertaining to perspiration.

SUDORIC ACID, n. Su²d-o²r'i²k. Fr., *acide sudorique.* See HIDROTIC *acid.*

SUDORIFEROUS, adj. Su²d-o²r-i²f'e²r-u³s. From *sudor*, sweat, and *ferre*, to bear. Fr., *sudorifère.* Conveying perspiration. [G.] Cf. SUDORIPAROUS.

SUDORIFIC, adj. Su²d-o²r-i²f'i²k. From *sudor*, sweat, and *facere*, to make. Fr., *sudorifique.* Ger., *schweisstreibend.* Producing perspiration. [α, 48.]

SUDORIPAROUS, adj. Su²d-o²r-i²p'a²r-u³s. Lat., *sudoriparus* (from *sudor*, sweat, and *parere*, to produce). Fr., *sudoripare.* Ger., *schweisserzeugend.* Producing or secreting sweat.

SUET, n. Su²'e²t. Gr., στέαρ. Lat., *sevum, sebum.* Fr., *suif.* Ger., *Talg.* The hard fat obtained from the inside of the abdomen of any ruminant. [α, 17.] Cf. SEBUM and SEVUM.—**Beef s.** See SEBUM *bovinum.*—**Mutton s.** See SEVUM (1st def.).—**Prepared s.** Lat., *sevum præparatum.* Fr., *suif préparé.* Ger., *gereinigter Talg.* S. purified for pharmaceutical purposes. [B.]

SUETTE (Fr.), n. Su⁶-e²t. See *Sweating* FEVER (1st def.) and MILIARIA (1st def.).—**S. anglaise.** See SUDOR *anglicus.*—**S. de Picardie, S. miliaire (moderne), S. militaire, S. millet.** See MILIARIA (1st def.).

SUEUR (Fr.), n. Su⁶-u⁶r. Sweat.—**S. d'Angleterre.** See SUDOR *anglicus.*—**S. de sang.** See HÆMATIDROSIS.—**S. rentrée.** Suppressed perspiration.—**S. urineuse.** See URIDROSIS.

SUFFERSURÆ (Lat.), n. f. pl. Su³f(su⁴f)-fu⁶r(fe²r)-su²r-(sur)'e(a³-e²). From *suffervere*, to boil gently. The exanthemata.

SUFFIMENTUM (Lat.), n. n. Su³f(su⁴f)-fi²(fe)-me²nt'u³m-(u⁴m). From *suffire*, to fumigate. See FUMIGATION (2d def.).

SUFFITUS (Lat.), n. m. Su³f(su⁴f)-fit(fet)'u³s(u⁴s). Gen., *-fit'us.* From *suffire*, to fumigate. See FUMIGATION (2d def.).—**S. oxymuriaticus.** See *Fumigatio* CHLORI.

SUFFOCATIO (Lat.), n. f. Su³f(su⁴f)-fo²k(fok)-a(a³)'shi²(ti²)-o. Gen., *-on'is.* See ASPHYXIA (2d def.).—**S. hysterica.** See GLOBUS *hystericus.*—**S. matricis.** An old term for hysteria. [A, 42; B, 117.]—**S. stridula.** See CROUP.

SUFFOCATION, n. Su³f-fo²k-a'shu³n. Lat., *suffocatio* (from *suffocare*, to choke). Fr., *s.* Ger., *Erstickung.* See ASPHYXIA (2d def.).—**Stridulous laryngic s.** See LARYNGISMUS *stridulus.*—**S. of the womb.** See SUFFOCATIO.

SUFFRAGO (Lat.), n. f. Su³f(su⁴f)-frag(fra³g)'o. Gen., *-frag'inis.* 1. See HOCK (3d def.). 2. The tibiotarsal joint of a bird. [L, 341 (α, 27).]

SUFFRUTESCENT, adj. Su³f-fru²t-e²s'e²nt. Lat., *suffrutescens.* Fr., *s.* Ger., *halbstrauchig.* Somewhat shrubby, less woody than an undershrub. [α, 35.]

SUFFRUTEX (Lat.), n. m. Su³f(su⁴f)'fru²t(fru⁴t)-e²x. Gen., *-frut'icis.* From *sub*, under, and *frutex*, a shrub. See UNDERSHRUB.

SUFFRUTICOSE, adj. Su³f-fru²'ti²-kos. Lat., *suffruticosus.* Ger., *halbstrauchig, staudig.* Low in stature and shrubby at the base; having the habit of an undershrub. [α, 35.]

SUFFULCIENS (Lat.), **SUFFULTORIUS** (Lat.), **SUFFULTUS** (Lat.), adj's. Su³f(su⁴f)'fu³l(fu⁴l)'si²(ki²)-e²nz(ans), -fu³lt-(fu⁴lt)-or'i²-u³s(u⁴s), -fu³lt(fu⁴lt)'u³s(u⁴s). Gen., *-ent'is, -tor'ii, -fult'i.* Fr., *appuyé.* Ger., *stützend, unterstützend.* Serving as a support for another part or organ. [α, 35.] Cf. FULCRATE.

SUFFUMIGATIO (Lat.), n. f. Su³f(su⁴f)-fu²m(fum)-i²g-a(a³)'-shi²(ti²)-o. Gen., *-on'is.* See FUMIGATION (2d def.).—**S. guytoniana.** See *Fumigatio* CHLORI.—**S. sulfurosa.** See *Fumigation à l'*ACIDE SULFUREUX.

SUFFUSIO (Lat.), n. f. Su³f(su⁴f)-fu²(fu)'zhi²(si²)-o. Gen., *-on'is.* From *suffundere*, to pour over. Gr., ὑπόχυσις. 1. See SUFFUSION. 2. An old term for cataract. [Laboulbène, "Union méd.," Mar. 19, 1885, p. 469.]—**Fellis s., S. auriginosa, S. bilis.** See JAUNDICE.—**S. colorans.** See CHROMATOPSIA.—**S. dimidians.** See HEMIOPIA.—**S. exclarans.** See OXYOPIA.—**S. fellis.** Jaundice.—**S. lentis (crystallinæ).** See CATARACT.—**S. multiplicans.** See DIPLOPIA and POLYOPIA.—**S. myodes.** See METAMORPHOPSIA.—**S. nigra.** See AMBLYOPIA.—**S. oculorum.** An old term for an opacity in the eye, especially in the crystalline lens. [F.]—**S. sanguinis.** See ECCHYMOSIS.

SUFFUSION, n. Su³f-fu²'zhu³n. Lat., *suffusio.* Fr., *s.* Ger., *Ergiessung.* 1. The act or process of overspreading or the state of being overspread (*e. g.*, by a film or by moisture); also, that which overspreads. [α, 48.] 2. See SUGGILLATION (1st def.).

SUGAR, n. Shu^{4}g'r. Gr., σάκχαρον. Lat., *saccharum.* Fr., *sucre.* Ger., *Zucker.* It., *zucchero.* Sp., *azúcar.* A name at first applied only to cane s. and beet s.; subsequently to any sweet crystalline substance, and more definitely to a class of chemical compounds of the general composition $C_mH_{2n}O_n$ (see SACCHAROSE and GLUCOSE). [B.]—**Acid s. of milk.** Mucic acid. [B.]—**Acorn s.** See QUERCITE.—**Arabin s.** See ARABINOSE.—**Barley s.** See under SACCHAROSE.—**Beet s.** Fr., *sucre de betterave.* Ger., *Rübenzucker.* Saccharose obtained from species of *Beta,* especially from *Beta vulgaris.* [B.]—**Brown s.** Cane s. not entirely freed from impurities and coloring matters; obtained in the first stages of the process of manufacture of s. from s.-cane juice. [B.]—**Burnt s.** Caramel. [B.]—**Cane s.** Lat., *saccharum* (*purificatum*). Fr., *sucre de canne.* Ger., *Rohrzucker.* Sp., *azúcar de caña.* S. obtained from the juice of *Saccharum officinarum.* [B.]—**Cellulose s.** S. derived from cellulose; identical with glucose. [Flechsig, "Ztschr. f. phys. Chem.," xii, p. 525 (B).]—**Chestnut s., Diabetic s.** Glucose. [B, 2.]—**Ferment s.** S. formed from starch, glycogen, and other carbohydrates by the action of the animal ferments. It was at one time held to be identical with glucose, but is now considered by some to be a different body, probably maltose. [B, 12; Kratschmer and Seegen, "Wien. med. Wchnsch.," Feb. 19, 26, Mar. 5, Apr. 2, 9, 1881 (B).] Cf. INVERTIN.—**Fruit s.** See LEVULOSE.—**Granular s.** Glucose. [B, 2.]—**Grape s.** Fr., *sucre de raisin.* Ger., *Traubenzucker.* Glucose, especially when obtained in the solid form. [B.]—**Gum s.** See ARABINOSE.—**Honey s.** Glucose. [B, 2.]—**Invert s.** Fr., *sucre interverté.* Ger., *Invertzucker.* A product of the prolonged action of heat upon a solution of cane s. It is a mixture of dextrose and levulose, and receives its name because its solution rotates the plane of polarization to the left, while the solution of cane s. from which it is produced rotates that plane to the right. [B.]—**Jaggery s.** See JAGGERY.—**Liver s.** Glucose; so called because it is the form of s. elaborated in the liver from glycogen. [B.]—**Manna s.** Ger., *Mannazucker.* See MANNITE.—**Maple s.** Fr., *sucre d'érable.* Ger., *Ahornzucker.* S. obtained from *Acer saccharinum.* It is identical with saccharose, but contains a certain amount of coloring matter. [B, 5.]—**Milk s.** Lat., *saccharum lactis, lactis saccharum.* Fr., *sucre de lait.* Ger., *Milchzucker.* See LACTOSE.—**Muscle s.** See INOSITE.—**Nest s.** See under *Larinus nidificans.*—**Oil s.** See ELÆOSACCHARUM.—**Open-pan s.** S. prepared by concentration of the cane-juice in vessels under the ordinary atmospheric pressure. [B, 5.]—**Palm s.** See JAGGERY.—**Pectin s.** See ARABINOSE.—**Rag s.** Glucose. [B, 2.]—**Refined s.** Fr., *sucre raffiné.* Ger., *Hutzucker, Raffinade.* White s.; cane s. purified and deprived of coloring matter. [B.]—**Starch s.** See GLUCOSE.—**S. candy.** Ger., *Candizucker.* See *Rock* CANDY.—**S. of lead.** See LEAD *acetate.*—**S. of milk.** See LACTOSE.—**S. of urine.** Glucose. [B, 2.]—**S. pods.** Carob beans. [B.]—**Uncrystallizable s.** See LEVULOSE.—**Vacuum-pan s.** S. prepared by concentration of the cane-juice under a pressure much less than that of the atmosphere; effected by the employment of closed vessels in which a partial vacuum can be produced by exhaustion of the air. [B, 5.]—**White s.** See *Refined s.*

SUGAR-CANE, n. Shu^4-g'r-kan. The *Saccharum officinarum* and other species of *Saccharum.* [α, 35.]—**Chinese s.-c.** The *Sorghum vulgare.* [α, 35.]—**Common s.-c.** The *Saccharum officinarum.*

SUGGESTIBLE (Fr.), adj. Su^{6}g-zhe^{2}s-te-bl'. Of hypnotized persons, subject to the power of suggestion. ["N. Y. Med. Jour.," June 11, 1887, p. 659 (α, 50).]

SUGGESTION, n. Su^{3}g-je^{2}st'yu^{3}n. Lat., *suggestio* (from *suggerere,* to excite). Fr., *s.* Ger., *S., Eingebung.* 1. The act of suggesting. 2. The thing suggested. 3. See *Hypnotic s.*—**Hypnotic s.** Fr., *s. hypnotique.* The process by which a hypnotized person is made to accept a hint or statement, although it may be unfounded, and to act accordingly.

SUGGILLATION, n. Su^{3}g-ji^{2}l-a'shu^{3}n. More correctly, *sugillation.* Lat., *sugillatio* (from *sugillare,* to beat black and blue). Fr., *s. suçon.* Ger., *S., Blutunterlaufung.* A black-and-blue mark, as of a bruise. [G, 49.] See VIBEX and LIVOR *emortualis.*

SUGGRUNDIUM (Lat.), n. n. Su^{3}g(su^{4}g)-gru^{3}nd(gru^{4}nd)'i^2-u^{3}m(u^{4}m). Fr., *s.* The lower border of a roof, the eaves. [A, 312.]—**S. oculi.** See *Superciliary* RIDGE.

SUGILLATION, n. Su^{3}j-i^{2}l-a'shu^{3}n. A preferable form of *suggillation* (*q. v.*).

SUICIDAL, adj. Su^2-i^2-si'd'l. Ger., *selbstmörderisch.* Characterized by a tendency to suicide. [D, 1.]

SUICIDE, n. Su^2'i^2-sid. From *sui,* of himself, and *cædere,* to kill. Gr., αὐτόχειρ (1st def.), αὐτοχειρία (2d def.). Fr., *s.* Ger., *Selbstmörder* (1st def.), *Selbstmord* (2d def.). 1. One who takes his own life. 2. The act of self-murder. [D, 1.]

SUIE (Fr.), n. Swe. See SOOT.—**Collyre de s.** A solution of 40 centigrammes of extract of soot and 4 drops of lemon-juice in 125 grammes of infusion of red roses; used for ophthalmia neonatorum. [B, 38, 92 (α, 14).]—**Crystal de s.** See FULIGO *splendens.*—**Eau de s., Essence de s.** See *Tinctura* FULIGINIS *alcalina.*—**Extrait de s.** See *Extractum* FULIGINIS.—**Infusion de s.** See *Tinctura* FULIGINIS *alcalina.*

SUIF (Fr.), n. Swef. See SUET.—**Savon de s.** Tallow soap. [B.]—**S. de bœuf.** Beef suet. [B.]—**S. de mouton.** See SEVUM (1st def.).—**S. de veau.** Veal suet. [B.]

SUILLA (Lat.), n. f. Su^2(su^4)-i^{2}l'la^3. From *sus,* a hog. See SCROFULA.

SUILLUS (Lat.), adj. Su^2(su^4)-i^{2}l'lu^{3}s(lu^{4}s). From *sus,* a hog. Obtained from the hog (see ADEPS *s.*); as a n. m., see BOLETUS.

SUINT (Fr.), n. Swa^{2}n^2. The sweat of sheep. It contains about one third of its weight of alkaline potassium salts, and is a source of the potash of commerce (which is obtained from the s. by washing the sheep), also of a fatty matter (see LANOLIN). [B.] Cf. ŒSYPUM.

SUINTEMENT (Fr.), n. Swa^{2}n^2-t'-ma^{2}n^2. See ÉCOULEMENT.—**S. par le mamelon.** See GALACTORRHŒA.

SUITES DE COUCHES (Fr.), n. pl. Swet d'kush. See *Puerperal* PERIOD.

SULCATE, adj. Su^{3}lk'at. Lat., *sulcatus* (from *sulcare,* to furrow). Fr., *sillonné.* Ger., *gefurcht.* Grooved, furrowed. [α, 35.]

SULCATURE (Fr.), n. Su^{6}l-ka^3-tu^{6}r. A mark or furrow produced by pressure or erosion. [A, 385 (α, 48).]

SULCULUS (Lat.), n. m. Su^{3}lk(su^{4}lk)'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *sulcus,* a furrow. Fr., *sulcule.* A small furrow or sulcus. [L, 50 (α, 14).]—**S. labii superioris.** See SULCUS *nasolabialis.*

SULCUS (Lat.), n. m. Su^{3}lk(su^{4}lk)'u^{3}s(u^{4}s). Gr., ὁλκός (from ἕλκειν, to draw). Fr., *sillon.* Ger., *Furche, Rinne.* A groove or furrow; a fissure, especially of the cerebrum. [C.]—**Anterior occipital s.** A s. separating the central fissure from the first occipital gyrus, connecting with the parietal fissure. [α, 34.]—**Anterior s. of Reil.** See *Pre-insular s.*—**Antero-temporal s.** See *Parallel* FISSURE.—**Ascending frontal s.** See *Precentral* FISSURE.—**Central s.** See *Central* FISSURE.—**Cerebral sulci.** See *Secondary* FISSURES (2d def.) and FISSURE *of the cerebrum.*—**Ciliary sulci.** See STRIÆ *ciliares.*—**Crucial s.** See *Cruciate* FISSURE.—**External perpendicular s.** See *Occipital* FISSURE (2d def.).—**External s. of Reil.** A fissure separating the insula from the precentral, postcentral, and subfrontal gyri. [J; L.]—**Fronto-marginal s.** Of Wernicke, a small longitudinal fissure on the ventral surface of the frontal lobe, which separates the orbital and frontal lobes. [I, 17 (K).]—**Inferior frontal s.** Lat., *s. frontalis inferior.* Fr., *scissure frontale inférieure.* Ger., *untere Stirnfurche.* See *Subfrontal* FISSURE.—**Inferior occipital s.** See *Inferior occipital* FISSURE.—**Inferior temporo-sphenoidal s.** See *Meditemporal* FISSURE.—**Infero-frontal s.** See *Subfrontal* FISSURE.—**Infra-insular s.** A fissure separating the insula from the temporo-sphenoidal lobe. [L, 14.]—**Infra-orbital s.** See *Suborbital* FISSURE.—**Intermediate temporal s.** See *Meditemporal* FISSURE.—**Intraparietal s.** See *Parietal* FISSURE.—**Lateral olivary s.** See *S. olivæ externus.*—**Middle temporo-sphenoidal s.** An unimportant fissure parallel to and below the parallel fissure. [L, 14.]—**Occipito-parietal s.** See *Occipital* FISSURE (2d def.).—**Occipito-temporal s.** See *Collateral* FISSURE.—**Oculomotor s.** See *Oculomotor* FURROW.—**Olfactory s.** See *Olfactory* FISSURE.—**Orbital s.** See *Orbital* FISSURE.—**Paramedian s.** See SILLON *médian postérieur intermédiaire.*—**Parietal s.** See *Parietal* FISSURE.—**Peduncular s.** Fr., *sillon circonférentiel* (ou *circulaire*). A transverse s. which commences close to the middle peduncle of the cerebellum around the outer border of which it passes backward. [L, 31, 142.]—**Postcentral s.** See *Postcentral* FISSURE.—**Posterior s. of Reil.** See *Infra-insular s.*—**Postero-parietal s.** See *Central* FISSURE.—**Postero-temporal s.** See *Collateral* FISSURE.—**Postfrontal s.** See *Cruciate* FISSURE.—**Precentral s.** See *Precentral* FISSURE.—**Pre-insular s.** A fissure in front of the insula and separating it from the posterior orbital convolution. [L, 142.]—**Primitive sulci.** See *Primitive* FISSURES (2d def.).—**Secondary sulci.** See *Secondary* FISSURES.—**Straight s.** See *Olfactory* FISSURE.—**Subparietal s.** A shallow depression or inconstant fissure that is a continuation upward and outward of the calloso-marginal fissure. [α, 34.]—**S. ad aquæductum vestibuli.** See FOSSULA *sulciformis.*—**S. alaris.** The furrow just above the ala nasi. [α, 34.]—**S. alveolaris anterior.** See *Anterior dental* CANAL.—**S. alveolo-buccalis.** The s. between the gums and the inside of the cheek. [α, 34.]—**S. alveolo-lingualis.** The s. between the gums and the mucous membrane of the tongue. [α, 34.]—**S. anterior corporum candicantium.** A furrow between the corpora albicantia and the tuber cinereum. [L, 7.]—**S. antero-temporalis** [Huxley]. See *Supertemporal* FISSURE.—**S. antebrachii radialis.** A s. on the radial side of the forearm, between the pronator and flexor muscles and the supinator longus. [α, 34.]—**S. antebrachii ulnaris.** A s. on the ulnar side of the forearm, between the flexor sublimis digitorum and the flexor carpi ulnaris. [α, 34.]—**S. aorticus.** A depression on the median surface of the left lung for the descending aorta. [L, 332.]—**S. arcuatus.** Of Arnold, an embryonic fissure to which the s. corporis callosi corresponds. [α. 34.]—**S. arcuatus præcunei.** An inconstant fissure on the mesal surface of the cerebral hemisphere, between the parietal gyrus and the gyrus fornicatus. [L, 332.]—**S. arteriæ occipitalis.** A groove on the inner side of the internal aspect of the mastoid process of the temporal bone, which lodges the occipital artery. [L, 332.]—**S. arteriæ subclaviæ.** See *S. subclavius* (1st and 2d defs.).—**Sulci arteriosi.** Ger., *Arterienfurchen.* Furrows on the ental surfaces of the cranial bones for lodging arteries. [L, 31.]—**S. articulationis primæ manus.** A transverse furrow in the palm, seen in flexion, over the articulations between the two rows of carpal bones. [L, 332.]—**S. articulationis secundæ manus.** A transverse furrow in the palm of the hand, seen in flexion, extending from the level of the upper margin of the pisiform bone to the upper end of the first carpal bone. [L, 332.]—**S. atrioventricularis.** See *Auriculo-ventricular* GROOVE.—**S. auris anterior.** See INCISURA *trago-helicina.*—**S. auris posterior.** See INCISURA *anthelicis.*—**S. basilaris** (**pontis**). The antero-posterior groove on the lower median surface of the pons Varolii. [I, 3 (K).]—**S. basilaris ossis occipitis.** A shallow depression in the occipital bone at the side of the clivus Blumenbachii. [L, 332.]—**S. bicipitalis.** See *Bicipital* GROOVE.—**S. bicipitalis internus.** A furrow between the brachialis internus and the anconæus tertius. [L.]—**S. cæcus.** See FORAMEN *cæcum posterius.*—**S. calcanei.** A furrow separating the two posterior articular surfaces of the sustentaculum tali. [L, 332.]—**S. calcarinus.** See *Calcarine* FISSURE.—**S. callosomarginalis.** See *Supercallosal* FISSURE (1st def.).—**S. callosus.** See *Callosal* FISSURE.—**S. caroticotympanicus** (**ossis temporis**). A groove leading into the canalis caroticotympanicus. [L.]

—**S. caroticus.** See *Carotid* GROOVE.—**Sulci carotidei.** Depressions on each side of the larynx. [L, 31.]—**S. centralis.** See *Central* FISSURE.—**S. centralis insulæ** [Guldberg]. The transinsular fissure ; a fissure following the same general direction as the central fissure, which divides the insula into two parts. ["Anthrop.," 1891, p. 715 (L).]—**S. centralis modioli.** A shallow groove on the free margin of the lamina spiralis ossea. [L, 31.]—**S. centralis Rolandi.** See *Central* FISSURE.—**S. cerebelli curvatus.** A fissure separating the biventral lobe of the cerebellum from the amygdala. [L.]—**S. cerebelli dividens anterior.** See *S. cerebelli superior anterior.*—**S. cerebelli dividens posterior.** See *S. cerebelli superior posterior.*—**S. cerebelli horizontalis.** See *Peduncular s.*—**S. cerebelli inferior.** A fissure between the posterior inferior lobe and the slender lobe of the cerebellum. [I, 3 (K).]—**S. cerebelli inferior anterior.** A s. beginning in the s. flocculi and extending across the inferior surface of the cerebellum to the s. longitudinalis inferior. [α, 34.]—**S. cerebelli inferior externus.** A fissure between the biventral lobe and the posterior inferior lobe of the cerebellum. [I, 3 (K).]—**S. cerebelli inferior posterior.** A s. commencing in the s. superior posterior and extending across the inferior surface of the cerebellum to the s. horizontalis magnus. [α, 34.]—**S. cerebelli peduncularis** (seu **superior**). See *Peduncular s.*—**S. cerebelli superior anterior.** A s. beginning on the middle peduncle of the cerebellum and crossing the vermis to join the s. on the opposite side. [α, 34.]—**S. cerebelli superior posterior.** A s. beginning in the peduncular s., a little in front of the postero-external angle of the cerebellum, and crossing the upper surface, where it almost reaches the s. horizontalis as the latter passes on to the vermis. [α, 34.]—**S. cerebralis magnus.** See *Great longitudinal* FISSURE *of the brain.*—**S. cerebri.** See FISSURE *of the cerebrum.*—**S. cerebri cruciformis.** See *Orbital* FISSURE.—**S. chiasmatis.** See *Optic* GROOVE.—**S. chorioideus.** A longitudinal fissure on the upper surface of the optic thalamus. [I, 17 (K).]—**Sulci ciliares.** See STRIÆ *ciliares.*—**S. cinguli.** A s. separating the gyrus cinguli and the corpus callosum. [L, 332.]—**S. circularis** (**cordis**). See *Auriculo-ventricular* GROOVE.—**S. circularis Reilii.** Fr., *rigole de l'insula.* A s. which separates the insula from the adjacent portions of the brain. [I, 17 (K).]—**S. collateralis.** See *Collateral* FISSURE.—**S. collateralis anterior medullæ spinalis.** See *Antero-lateral* GROOVE.—**S. collateralis cerebri.** See *Collateral* FISSURE.—**S. collateralis inferior.** See FISSURA *cerebelli longitudinalis.*—**S. collateralis posterior.** See *Postero-lateral* GROOVE.—**S. collateralis postremus.** See *S. intermedius posterior.*—**Sulci condyloidei.** See FOSSÆ *condyloideæ.* —**S. coronalis** (**cordis**). See *Auriculo-ventricular* GROOVE.—**S. coronarius glandis.** See *S.* GLANDIS.—**S. corporis callosi.** See *Callosal* FISSURE.—**S. corporum quadrigeminorum frontalis.** See *S. corporum quadrigeminorum transversus.*—**S. corporum quadrigeminorum longitudinalis.** A longitudinal fissure separating the two anterior tubercles of the corpora quadrigemina. [L, 7 (α, 50).]—**S. corporum quadrigeminorum posterior.** A transverse fissure found behind the two posterior tubercles of the corpora quadrigemina. [L, 7 (α, 50).]—**S. corporum quadrigeminorum transversus.** A transverse s. crossing the median fissure at right angles and separating the anterior from the posterior tubercles of the corpora quadrigemina. [α, 34.] —**S. costalis inferior.** See *Inferior costal* FOSSA.—**S. costalis superior.** See *Superior costal* FOSSA.—**S. cruciatus** (seu **cruciformis**). See *Cruciate* FISSURE.—**Sulci cubitales.** Sulci on the anterior surface of the forearm, one on either side of the biceps tendon. [α, 34.]—**S. deltoideopectoralis.** A furrow indicating the demarcation between the deltoideus and pectoralis major muscles. [L.]—**S. dentatus.** See *Hippocampal* FISSURE.—**S. digitalis.** Ger., *Fingerfurche.* A furrow of the palm of the hand.—**S. digitalis anterior.** Ger., *vordere Fingerfurche.* The furrow in the palm of the hand that runs from the root of the index finger to the ulnar border. [L, 30 (α, 14).]—**S. digitalis posterior.** Ger., *hintere Fingerfurche.* A furrow running from the radial to the ulnar border of the hand, caused by the general flexion of the fingers. [L, 30 (α, 14).]—**S. digitatus.** Fr., *sillon digité.* A furrow on the floor of the descending cornu of the lateral ventricle of the brain, separating the collateral eminence from the hippocampus major. [L, 41 (α, 14).]—**S. ethmoidalis.** A groove on the posterior surface of the nasal bone. [L.]—**S. flexoris hallucis longus.** Ger., *Rinne des Calcaneus.* See INCISURA *astragali.*—**S. flocculi.** A s. separating the flocculus and the middle in erior lobe of the cerebellum. [α, 34.]—**S. fornicatus inferior.** The callosal and hippocampal fissures taken as one. [L.] —**S. fornicatus superior.** See *Supercallosal* FISSURE (1st def.). —**S. foveæ rhomboidalis longitudinalis** (seu **medius**). See FISSURA *fossæ rhomboidalis longitudinalis media.*—**S. frontalis.** See *Frontal* FISSURE and *S. longitudinalis ossis frontis.* — **S. frontalis inferior.** See *Subfrontal* FISSURE. — **S. frontalis secundus.** See *Medifrontal* FISSURE.—**S. frontalis superior.** See *Superfrontal* FISSURE. — **S. frontolateralis.** See *Lateral* FISSURE. — **S. frontomarginalis.** See *Fronto-marginal s.* — **S. frontoparietalis internus.** See *Calloso-marginal* FISSURE.—**S. glandis.** Ger., *Eichelfurche.* The furrow behind the glans penis. [L.]—**S. gracilis cerebelli.** See *S. cerebelli inferior posterior.* —**S. habenæ** [Wilder], **S. habenulæ.** A small fissure on the upper surface of the optic thalamus, which extends from the trigonum habenulæ obliquely forward and inward, terminating at the stria medullaris. [I, 17 (K).]—**S. hamuli pterygoidei.** A groove in the hamular process of the sphenoid bone for the tendon of the tensor palati. [L.]—**S. hepatis intermedius.** See *Transverse* FISSURE *of the liver.*—**S. hippocampi.** See *Hippocampal* FISSURE.—**S. horizontalis aortæ.** A furrow marking the boundary of the elevation of the right coronary artery above the surface of the heart.—**S. horizontalis cordis.** See *Auriculo-ventricular* GROOVE.—**S. horizontalis magnus.** See *Calcarine* FISSURE.— **S. horizontalis Reilii.** See *Peduncular s.*—**S. horizontalis tibiæ.** A groove on the head of the tibia behind the internal articular surface. [L, 332.]—**S. iliacus.** A s. over which the psoas tendon emerges from the pelvis. [α, 34.]—**S. inferior lateralis.** See *S. cerebelli inferior externus.*—**S. inferior medialis.** A fissure separating the tonsilla cerebelli and the restiform body. [L, 332.]—**S. infrainsularis.** See *Infra-insular s.*—**S. infranates.** See FOLD *of the buttock.*—**S. infra-orbitalis.** See *Infraorbital* GROOVE.—**S. infrapalpebralis.** The furrow beneath the lower eyelid. [L, 332.]—**S. inguinalis.** See FOLD *of the groin.*—**S. insulæ primus.** The principal fissure in the insula. [I, 9 (K).]—**S. interarticularis calcanei.** See *S. calcanei.*—**S. interarticularis calcanei accessorius.** A groove on the os calcis between the two anterior surfaces which articulate with the astragalus. [L, 332.]—**S. interarticularis tali.** See *S. tali.*—**S. interarticularis tali accessorius** (seu **anterior**). A furrow between the two articular surfaces (when they exist) on the astragalus which articulate with the os calcis. [L, 332.]—**S. interbrachialis.** A continuation of the transverse furrow separating the brachia conjunctiva. [α, 34.]—**S. intercruralis lateralis.** Of Wilder, a small furrow in the brain of the cat, behind and to the side of the posterior perforated space. [I, 80 (K).]—**S. intercruralis mesalis.** Of Wilder, a small mesal fissure in the brain of the cat, just behind the posterior perforated space. [J, 80 (K).]—**S. interhelicem et anthelicem.** See *Scaphoid* FOSSA (1st def.).—**S. interinsularis.** See *Transinsular* FISSURE.—**S. intermedius.** 1. Of Jensen, a fissure between the upper end of the Sylvian fissure and the posterior extremity of the superfrontal fissure. 2. Of His, a transverse depression on the ventral side of the primitive thalamencephalon (its thalamic segment). [I, 17, 87 (K).] 3. See *Transverse* FISSURE *of the liver.*—**S. intermedius anterior.** See *Anterior median* FISSURE *of the spinal cord.*—**S. intermedius posterior** (seu **posticus**). The posterior longitudinal fissure of the spinal cord. [I, 6 (K).]—**S. internus olivæ.** See *S. olivæ internus.* —**S. interpapillaris.** A furrow between the rows of papillæ of the skin. [L.]—**S. interparietalis.** See *Parietal* FISSURE.—**S. intertubercularis** (**humeri**). See *Bicipital* GROOVE.—**S. intraparietalis.** See *Parietal* FISSURE.—**S. Jacobsonii.** A small groove on the promontory of the middle ear that lodges branches of the tympanic plexus (Jacobson's nerve). [α, 34.]—**S. jugularis.** A groove for the lateral sinus on the upper surface of the jugular process of the occipital bone. [L, 332.]—**S. lacrimalis.** 1. See *Lacrymal* GROOVE. 2. A depression in the lacrymal bone aiding in the formation of the lacrymal groove ; also a similar depression in the nasal process of the superior maxilla. 3. A groove on the superior maxilla continuous with the nasal end of the nasal duct. [L, 332.]—**S. laminæ modioli.** See *S. centralis modioli.*—**S. lateralis anterior.** See *Antero-lateral* FISSURE.—**S. lateralis circularis** (seu **communis**). See *Peduncular s.*—**S. lateralis dorsalis.** See *Postero-lateral* GROOVE.—**S. lateralis magnus.** See *Peduncular s.*—**S. lateralis medullæ spinalis.** See *Antero-lateral* GROOVE.—**S. lateralis mesencephali.** A small lateral groove on the upper surface of the crus cerebri. [I, 17 (K).]—**S. lateralis posterior.** See *Postero-lateral* GROOVE.—**S. lateralis ventralis.** See *Antero-lateral* GROOVE.—**S. ligamenti spiralis.** A furrow between the lamina spiralis and the ligamentum spirale. [L, 31.]—**S. limitans.** Of Wilder, the fissure between the corpus striatum and the optic thalamus. [I, 80 (K).]—**S. lobi olfactorii.** See *Olfactory* FISSURE.—**Sulci longitudinales cordis.** See *Longitudinal* GROOVES *of the heart.*—**S. longitudinalis.** 1. See *Olfactory* FISSURE. 2. One of the longitudinal grooves of the heart. [L.]—**S. longitudinalis corporum candicantium.** A fissure separating the two corpora albicantia. [L, 7.]—**S. longitudinalis externus.** The external of the two anterior limbs of the orbital fissure. [I, 17 (K).]—**S. longitudinalis fossæ rhomboideæ.** See FISSURA *fossæ rhomboidalis longitudinalis media.* —**S. longitudinalis medianus ventriculi quarti.** A longitudinal s. running along the centre of the floor of the fourth ventricle. [α, 34.]—**S. longitudinalis medius.** The inner of the two anterior limbs of the orbital fissure. [I, 17 (K).]—**S. longitudinalis mesencephali.** A s. between the brachium corporum quadrigeminorum, the velum medullare anterius, and the pedunculus cerebri. [α, 34.]—**S. longitudinalis ossis frontis.** A furrow on the inner surface of the frontal bone for the superior longitudinal sinus. [L.] —**S. longitudinalis ossis occipitis.** A furrow on the inner surface of the tabular portion of the occipital bone for the reception of the superior longitudinal sinus. [L, 332.]—**S. longitudinalis ossis parietalis.** A furrow on the upper margin of the parietal bone which, with a similar one on the opposite bone, lodges the superior longitudinal sinus. [L, 31.]—**S. longitudinalis posterior.** See *Posterior median* FISSURE *of the spinal cord.*—**S. longitudinalis substantiæ perforatæ mediæ.** See *S. basilaris.*—**S. longitudinalis superior.** See *Intercerebral* FISSURE.—**S. longitudinalis superior cerebelli.** A s. separating the superior vermis from the lateral lobes of the cerebellum. [α, 34.]—**S. longitudinalis ventriculi cerebelli.** Of Gordon, see FISSURA *fossæ rhomboidalis longitudinalis media.*—**S. magnus.** See *Calcarine* FISSURE.—**S. magnus (cerebelli) horizontalis.** See *Peduncular s.*—**S. malleolaris.** A furrow in the anterior and upper part of the tympanic ring the terminal points of the boundary of which are the spinæ tympanicæ, and which finally becomes the posterior boundary of the petrotympanic fissure. [F.]—**S. malleoli (externi) lateralis.** A shallow furrow behind the external malleolus. [L.]—**S. malleoli interni** (seu **medialis**). A shallow furrow behind the internal malleolus. [L.]—**S. marginalis foraminis magni.** An anomalous furrow along the posterior margin of the foramen magnum. [L.]—**S. medialis frontoparietalis.** See *Calloso-marginal* FISSURE and *Central* FISSURE.—**S. medianus anterior medullæ spinalis.** See *Anterior median* FISSURE *of the spinal cord.*—**S. medianus fossæ rhomboideæ.** See FISSURA *fossæ rhomboidalis longitudinalis media.*—**S. medianus longitudinalis sinus rhomboidalis.** See *S. longitudinalis medianus ventriculi quarti.*—**S. medianus maxillæ inferioris.** A vertical furrow upon the outer surface of the inferior maxilla in the middle line. [L, 332.]—**S. medianus posterior medullæ spinalis.** See *Posterior median* FISSURE *of the spinal cord.*

—**S. medius substantiæ perforatæ anterioris.** A fissure extending between the anterior perforated space and the rostrum of the corpus callosum. [L.]—**S. medullæ oblongatæ.** See *Basilar* GROOVE.—**S. medullæ oblongatæ cæcus.** A depression between the pons Varolii and the anterior extremities of the olivary bodies. [L, 7 (*a*, 50).]—**S. medullæ oblongatæ decussatorius.** The upper part of the ventral median fissure of the medulla oblongata, where it is interrupted by the decussation of the pyramids. [L, 7.]—**S. medullæ spinalis intermedius anterior.** Fr., *sillon intermédian antérieur.* An ill-defined furrow between the ventral and ventro-lateral fissures of the spinal cord. [L, 7.]—**S. medullæ spinalis intermedius posterior.** See *Postero-intermediary* FISSURE.—**S. medullæ spinalis lateralis.** See *Antero-lateral* GROOVE.—**Sulci meningei.** Furrows for blood-vessels on the ental surface of the cranial bones. [L.]—**S. mentalis.** Fr., *sillon du menton.* Ger., *Kinnrinne.* The furrow separating the lower lip from the prominence of the chin. [L, 41 (*a*, 14).]—**S. mentolabialis.** A transverse depression between the lower lip and the chin. [L, 332.]—**Sulci minores pontis.** See *Sulci transversi pontis.*—**S. Monroi.** A furrow (also called aulix) on the mesal aspect of the thalamus between the foramen of Monro and the aqueduct and ventrad of the medicommissure; regarded by His and Minot as the boundary between the "dorsal and ventral zones of His." [I, 110.]—**S. muscularis flexoris longi hallucis.** See Incisura *astragali.*—**S. muscularis tympani.** See Canalis *pro tensore tympani.*—**S. musculi peronei longi.** A vertical groove lined with cartilage on the outer border of the cuboid bone, for the tendon of the peroneus longus. [L.]—**S. musculosus (ossis temporis).** See Canalis *pro tensore tympani.*—**S. mylo-hyoideus.** See *Mylo-hyoid* GROOVE.—**S. nasalis posterior.** A shallow depression behind the posterior pillar of the fauces. [L.]—**S. nasolabialis.** The transverse groove between the nose and the upper lip. [L.]—**S. nasopalatinus.** The furrow for the nasopalatine nerve on the side of the vomer. [L, 31.]—**S. navicularis.** See Fossa *navicularis.*—**S. nervi petrosi profundi minoris (ossis temporis).** A groove in the petrous portion of the temporal bone, lodging the nervus petrosus profundus minor. [L.]—**Sulci obliqui pontis.** See *Sulci transversi pontis.*—**S. obturatorius (ossis coxæ).** See Incisura *obturatoria.*—**S. occipitalis anterior.** Of Wernicke, a small vertical fissure in the anterior part of the occipital lobe. [I, 17 (K).]—**S. occipitalis (longitudinalis) inferior** (seu **medius**). See *Inferior occipital* FISSURE.—**S. occipitalis superior** (seu **transversus**). See *Transverse occipital* FISSURE.—**S. occipito-interparietalis, S. occipito-parietalis.** See *Occipital* FISSURE.—**S. occipito-temporalis.** See *Collateral* FISSURE.—**S. occipito-temporalis inferior.** See *Inferior occipital* FISSURE.—**S. occipito-temporalis lateralis.** Of Fowler, see *Collateral* FISSURE.—**S. oculomotorius.** See *Oculomotor* FURROW.—**S. of Monro.** See *S. Monroi.*—**S. of the corpus callosum.** See *Callosal* FISSURE.—**S. olfactorius.** See *Olfactory* FISSURE.—**S. olivæ externus.** A furrow on the outer side of the olivary body. [L. 7.]—**S. olivæ internus.** A fissure, lying to the inner side of the olivary body, from which arise the roots of the hypoglossal nerve. [I, 6 (K).]—**S. opticus.** See *Optic* GROOVE.—**S. orbitalis (cerebri).** See *Orbital* FISSURE.—**S. orbitalis lateralis.** See *Subfrontal* FISSURE.—**S. orbitalis medialis.** See *Olfactory* FISSURE.—**S. orbitopalpebralis inferior.** The depression below the margin of the lower lid. [L.]—**S. orbitopalpebralis superior.** The depression immediately below the upper margin of the orbit. [L.]—**S. ossis carpalis primi.** A groove on the ulnar palmar side of the trapezium, for the tendon of the flexor carpi radialis. [L, 332.]—**S. ossis cuboidei.** See *S. musculi peronei longi.*—**S. ossis multanguli.** See *S. ossis carpalis primi.*—**S. ossis navicularis.** A shallow groove on the plantar surface of the scaphoid bone. [L, 332.]—**S. ossis tarsalis quarti.** See *S. musculi peronei longi.*—**S. palatinus medianus.** An anomalous furrow over the intermaxillary suture. [L, 332.]—**S. palpebromalaris.** See *Oculo-zygomatic* LINE.—**S. paracentralis.** See under *Paracentral* FISSURE.—**S. paramedianus dorsualis.** See *Postero-intermediary* FISSURE.—**S. parapyramidalis.** A s. forming an acute angle with the anterior fissure at the hinder end of the medulla oblongata and extending forward as far as the border of the pons Varolii. [*a*, 34.]—**S. parietalis.** See *Parietal* FISSURE.—**S. parietofrontalis.** See *Central* FISSURE.—**S. parieto-occipitalis.** See *Occipital* FISSURE (2d def.).—**S. peduncularis** [Wilder]. See *Oculomotor* FURROW.—**S. pedunculi lateralis.** The s. separating the crusta pedunculi from the tegmentum. [*a*, 34.]—**S. pedunculi medialis.** See *Oculomotor* FURROW.—**S. peronei.** See *S. musculi peronei longi.*—**S. perpendicularis.** See *Anterior occipital s.*—**S. perpendicularis externus.** See Fissura *perpendicularis externa.*—**S. petrosquamosus.** A furrow over the petrosquamosal fissure. [L.]—**S. petrosus inferior ossis temporis.** See Groove *for the inferior petrosal sinus.*—**S. petrosus superficialis ossis temporis.** A groove on the anterior surface of the petrous portion of the temporal bone, running forward from the hiatus Falloppii. [L, 332.]—**S. petrosus superior.** See Groove *for the superior petrosal sinus* and Groove *for the superior longitudinal sinus.*—**S. pharyngeus lateralis.** See Fossa *laryngopharyngea.*—**S. pinnalis.** See *S. alaris.*—**S. pollicis.** A s. between the thenar eminence and the palm. [*a*, 34.]—**S. pontis basilaris.** See *S. basilaris.*—**S. postcentralis.** See *Postcentral* FISSURE.—**S. postolivaris.** See *S. olivæ externus.*—**S. postrolandicus.** See *Postcentral* FISSURE.—**S. præauricularis (ossis coxæ).** See Fossa *præauricularis.*—**S. præcentralis.** See *Precentral s.*—**S. præcentralis inferior.** 1. The portion of the precentral fissure below the middle frontal convolution. [L. 332.] 2. See *Precentral* FISSURE.—**S. præcentralis superior.** The portion of the precentral fissure above the middle frontal convolution. [L. 332.] See *Precuneal* FISSURE.—**S. præinsularis.** See *Pre-insular s.*—**S. præoccipitalis.** See *Anterior occipital s.*—**S. prærolandicus.** See *Precentral* FISSURE.—**S. præsylvius.** In certain *Carnivora*, a fissure lying anterior to the fissure of Sylvius. [J, 17 (K).] Cf. *Presylvian* FISSURE.—**S. promontorii.** See *S. Jacobsonii.*—**S. pro tuba eustachiana.** See Groove *for the Eustachian tube.*—**S. pterygoideus, S. pterygopalatinus.** Ger., *Flügelgaumenfurche.* A term applied indifferently to a groove on the anterior surface of the pterygoid process of the sphenoid bone, one upon the superior maxilla, or one on the nasal portion of the palate bone, all of which form the pterygo-palatine canal. [L.]—**S. pulmonalis.** Ger., *Lungenfurche.* The depression on either side of the vertebral column formed by the backward curvature of the ribs. [L, 31.]—**S. radialis humeri.** See *Musculo-spiral* GROOVE.—**S. radio-ulnaris.** A groove on the anterior surface of the wrist at the lower ends of the radius and ulna, seen only in flexion. [L, 332.]—**S. rami auricularis (vagi).** A furrow in the jugular fossa for the auricular branch of the pneumogastric nerve. [L, 31.]—**S. rectus.** See *Olfactory* FISSURE.—**S. retroglandularis.** See *S. glandis.*—**S. Rolandi, S. rolandica.** See *Central* FISSURE.—**S. rolandicus anterior.** See *Precentral* FISSURE.—**S. sagittalis.** The combined sulci longitudinales of the os frontis, os occipitis, and os parietale. [L.]—**S. scleræ, S. scleroticæ.** Ger., *Scleralrinne.* A depression of the anterior margin of the sclera at its junction with the cornea. [L, 332.]—**S. sigmoideus.** See Fossa *sigmoidea ossis temporalis* and *Cavernous* GROOVE.—**S. sinus petrosi superioris.** See *S. petrosus superior.*—**S. sinus transversi.** See Fossa *sigmoidea ossis temporalis.*—**S. spheno-ethmoidalis.** A groove at the articulation of the sphenoid and ethmoid bones. [*a*, 34.]—**S. spiralis (cochleæ).** The groove between the labium tympanicum and labium vestibulare. [L, 31.]—**S. spiralis externus.** See *S. ligamenti spiralis.*—**S. spiralis internus.** See *S. spiralis.*—**S. stapedis.** A slight concavity on the outer surface of the crus of the stapes. [L, 7.]—**S. subclaviæ.** See *S. subclavius* (1st and 2d def's).—**S. subclavius.** 1. A groove on the first rib in which the subclavian artery rests, close to the tubercle for the insertion of the scalenus anticus. 2. A furrow on the apex of the lung formed by the subclavian artery. 3. A depression in the clavicle into which the subclavius muscle is inserted. [L, 31.]—**S. subfrontalis.** 1. Of Pansch, a small fissure on the mesal surface of the frontal lobe in the *Carnivora.* [I, 17 (K).] 2. See *Subfrontal* FISSURE.—**S. subparietalis.** Of Broca, a small fissure which forms the lower boundary of the præcuneus. [I, 17 (K).]—**S. subpinealis.** A transverse s. behind and below the pineal gland, crossing the upper surface of the optic thalamus. [I, 17 (K).]—**S. substantiæ perforatæ mediæ longitudinalis.** See *S. basilaris.*—**S. supercentralis.** See *Supercentral* FISSURE.—**S. superior anterior.** See *S. cerebelli superior anterior.*—**S. superior cerebelli.** See *Peduncular s.*—**S. superior posterior.** See *S. cerebelli superior posterior.*—**S. supracallosus.** See *Calloso-marginal* FISSURE.—**S. supra-insularis.** See *External s. of Reil.*—**S. supra-orbitalis.** Of Schwalbe, a s. arising from the calloso-marginal fissure at the point where it turns around the genu, and running horizontally forward to the anterior extremity of the frontal lobe. [J, 17 (K).]—**S. supra-orbitalis longitudinalis.** An anomalous longitudinal furrow replacing a missing orbital fissure. [L, 332.]—**S. supra-orbitalis transversus.** An anomalous fissure replacing the transverse element of the orbital fissure. [L. 332.]—**S. suprasylvius.** See *Supersylvian* FISSURE.—**S. tali.** A deep furrow on the lower surface of the astragalus, dividing its articular surface into two portions. [L.]—**S. temporalis inferior** [Ecker]. See *Collateral* FISSURE.—**S. temporalis intermedius.** Of Jensen, a s. extending between the upper end of the Sylvian fissure and the posterior extremity of the superfrontal fissure. [J, 17 (K).]—**S. temporalis medius** (seu **secundus**). A s. between the middle and inferior temporal convolutions. [*a*, 34.]—**S. temporalis primus.** See *Supertemporal* FISSURE.—**S. temporalis superior.** See *Supertemporal* FISSURE and *Parallel* FISSURE.—**S. temporalis transversus.** Of Schwalbe, any one of certain secondary sulci in the parietal lobe which have a general direction transverse to the Sylvian fissure. [I, 17 (K).]—**Sulci tertiarii.** Those secondary fissures that are subject to individual variations in number and direction. [*a*, 34.]—**S. tractus olfactorii.** See *Olfactory* FISSURE.—**S. transversalis.** See *Peduncular s.*—**Sulci transversi pontis.** Certain isolated transverse fissures on the inferior surface of the pons Varolii. [L, 7 (*a*, 50).]—**S. transversus.** See *Orbital* FISSURE.—**S. transversus ossis occipitis.** The groove in the occipital bone for the lateral sinus. [L, 31.]—**S. transversus ossis parietalis.** A broad flat groove on the inner surface of the postero-inferior angle of the parietal bone for the lateral sinus. [L, 332.]—**S. transversus ossis temporis.** See Fossa *sigmoidea ossis temporalis.*—**S. triradiatus.** See *Orbital* FISSURE.—**S. tubæ (Eustachii), S. tubarius.** See Groove *for the Eustachian tube.*—**S. tympanicus.** Ger., *Paukenring.* The groove-like furrow in the bony tympanic ring for the reception of the margin of the tympanic membrane. It exists on the perfect temporal bone only to the extent of the part taken by the tympanic ring in the formation of that bone. In the region of the Rivinian segment it is wanting altogether. [F, 32.]—**S. ulnaris (humeri).** The groove on the posterior surface of the internal condyle of the humerus for the ulnar nerve. [L.]—**S. venæ cavæ.** An anomalous furrow on the right lung for the vena cava superior. [L, 332.]—**Sulci venosi.** See *Cranial* SINUSES.—**S. ventriculi cerebelli** (seu **quarti**). See Fissura *fossæ rhomboidalis longitudinalis media.*—**S. vermicularis.** A s. separating the vermis from a lobe of the cerebellum. [*a*, 34.]—**Sulci vertebrales.** Ger., *Wirbelfurchen.* The grooves seen on either side of the spinous processes of the vertebræ when viewed from behind. [L, 14.]—**S. vertebralis lateralis atlantis.** See Sinus *atlantis.*—**S. vomeris.** See Incisura *vomeris.*—**Superior frontal s.** See *Superfrontal* FISSURE.—**Superior temporo-sphenoidal s.** See *Parallel* FISSURE.—**Supero-frontal s.** See *Superfrontal* FISSURE.—**Transverse s.** See *Cruciate* FISSURE.—**Triradiate s.** See *Orbital* FISSURE.

SULFACÉTAMIDE (Fr.), n. Su^{6}l-fa^3-sa-ta^3-med. See SULPHACETAMIDE. For various words in *Sulf-*, not here given, see the corresponding forms in *Sulph-*.

SULFAMMON (Fr.), n. Su^{6}l-fa^3-mo^{2}n^2. See SULPHAMIC ACID.

SULFANTIMONIAS (Lat.), n. m. Su^{3}lf(su^{4}lf)-a^{2}nt(a^{3}nt)-i^2-mon′i^2-a^{2}s(a^{3}s). Gen., *-at′is.* A thioantimonate. [B.]—**S. sesquikalicus.** Potassium thioantimonate. [B.]

SULFANTIMONITE (Fr.), n. Su^{6}l-fa^{3}n^2-te-mo-net. A thioantimonite, also a thioantimonate. [B, 119.]

SULFARSÉNIATE (Fr.), n. Su^{6}l-fa^{3}r-sa-ne-a^{3}t. See SULPHARSENATE.

SULFARSENITE (Fr.), n. Su^{6}l-fa^{3}r-sa-net. See SULPHARSENITE.—**S. calcique.** See LIQUOR *probatorius wirtembergicus.*

SULFAS [Fr. Cod.] (Lat.), n. m. Su^{3}lf(su^{4}lf)′a^{2}s(a^{3}s). Gen., *-fat′is.* See SULPHATE, and for subheadings not here given, see under SULPHAS.—**Collyrium cum sulfate zincico.** See *Collyre au sulfate de* ZINC.—**Collyrium cum sulfate zincico ex Sanchez.** A collyrium made by dissolving 2 parts of zinc sulphate in 500 of water, adding 4 of powdered Florentine iris-root, macerating for 3 days, and filtering. [A, 447 (*a*, 21).]—**Liquor sulfatis ferrici.** See *Liquor* FERRI *tersulphatis.*—**S. aluminicus.** Aluminium sulphate. [B.]—**S. aluminopotassicus.** Potassium-alum; ordinary alum. [B.]—**S. aluminopotassicus desiccatus.** See ALUMEN *exsiccatum.*—**S. cadmicus.** See CADMIUM *sulphate.*—**S. cupro-ammonicus.** See COPPER *ammoniosulphate.*—**S. eserinus.** See ESERINE *sulphate.*—**S. hydrargyricus.** See MERCURY *sulphate* (2d def.).—**S. potassicus.** Normal potassium sulphate. [B.]—**S. quinicus, S. quininicus.** Quinine bisulphate. [B.]—**S. strychnicus, S. strychninicus.** See STRYCHNINE *sulphate.*—**Syrupus cum sulfate quinico.** See *Sirop de sulfate de* QUININE.—**Syrupus cum sulfate strychnico.** See *Sirop de sulfate de* STRYCHNINE.

SULFAT (Ger.), n. Zulf-a^{3}t′. See SULPHATE.

SULFATE (Fr.), n. Su^{6}lf-a^{3}t. See SULPHATE.—**S. acide.** An acid sulphate. [B.]—**S. aluminico-potassique.** Potash alum. See ALUM.—**S. ammonico-ferrique.** See IRON *and ammonium sulphate* (2d def.).—**S. antimonique.** Antimony sulphate. [B 119.]—**S. barytique.** Barium sulphate. [B, 119 (*a*, 38).]—**S. basique.** A basic sulphate. [B.]—**S. biquinique.** See QUININE *sulphate.*—**S. cuprico-ammonique tribasique.** See COPPER *ammoniosulphate.*—**S. ferreux.** See IRON *sulphate* (1st def.) and FERRI *sulphas.*—**S. ferreux desséché.** See FERRI *sulphas exsiccatus.*—**S. ferreux du commerce.** See FERRUM *sulfuricum crudum.*—**S. ferreux officinal.** See under FERRI *sulphas.*—**S. ferreux précipité.** See FERRI *sulphas præcipitatus.*—**S. ferrique.** See IRON *sulphate* (2d def.).—**S. ferrique ammoniacal.** See IRON *and ammonium sulphate* (2d def.).—**S. ferrique liquide.** See *Liquor* FERRI *tersulphatis.*—**S. mercurique.** See MERCURY *sulphate* (2d def.).—**S. mercurique basique, S. trimercurique.** See MERCURY *subsulphate.*

SULFHYDANTOÏNE (Fr.), n. Su^{6}l-fe-da^{3}n^2-to-en. See THIOHYDANTOIN.

SULFHYDRATE (Fr.), n. Su^{6}l-fe-dra^{3}t. See SULPHYDRATE.—**S. ammonique.** Ammonium hydrosulphide. [B, 119 (*a*, 38).]—**S. persulfuré.** See LIQUOR *fumans Beguini.*

SULFHYDROMÈTRE (Fr.), n. Su^{6}l-fe-dro-me^{2}tr′. A device for testing the amount of sulphureted hydrogen in the air of an inhalation chamber; consisting of papers impregnated with a solution of a salt of lead, arranged with other papers so tinted as to serve as a gauge of the blackening of the former by the sulphur compound; proposed by Isoard as a means of regulating patients' stay in these chambers. ["Nouv. rem.," Oct. 1, 1885, p. 297.]

SULFID (Ger.), n. Zulf-ed′. A sulphide (used generally in composition and applied to those sulphides which act as acids). [B.] Cf. SULFURET.—**Antimoniges S.** [Berzelius]. Antimony tetrasulphide. [B.]—**Arseniges S.** [Berzelius]. Arsenic trisulphide. [B.]—**Unterarseniges S.** Arsenic disulphide. [B.]

SULFIDE (Fr.), n. Su^{6}l-fed. See SULPHIDE.—**S. antimonieux.** Antimony pentasulphide. [B, 119.]—**S. arsénieux.** Orpiment. [B, 119.]—**S. carbonique.** See CARBON *disulphide.*—**S. hydrique.** See HYDROSULPHURIC ACID.—**S. hyparsénieux.** Realgar. [B, 119.]—**S. hypoantimonieux.** Antimony trisulphide. [B, 119.]

SULFIS (Lat.), n. m. Su^{3}lf(su^{4}lf)′i^{2}s. Gen., *-fit′is.* See SULPHITE.—**S. kalicus.** See POTASSIUM *sulphite.*—**S. natricus.** See SODIUM *sulphite.*—**S. potassicus.** See POTASSIUM *sulphite.*—**S. sodicus.** See SODIUM *sulphite.*

SULFIT (Ger.), **SULFITE** (Fr.), n's. Zulf-et′, su^{6}l-fet. See SULPHITE.

SULFOÆTHYLICUS (Lat.), adj. Su^{3}lf(su^{4}lf)-o(o^3)-e^{2}th(a^3-e^{2}th)-i^{2}l(u^{6}l)′i^{2}k-u^{3}s(u^{4}s). Sulphovinic (ethylsulphuric); with the name of a base, the ethylsulphate of the base. [B, 95.]

SULFOBENZOLÈNE (Fr.), n. Su^{6}l-fo-ba^{3}n^2-zo-le^{2}n. See SULPHOBENZIDE.

SULFOCARBOLICUS (Lat.), adj. Su^{3}lf(su^{4}lf)-o(o^3)-ka^{3}rb-o^{2}l′-i^{2}k-u^{3}s(u^{4}s). Sulphocarbolic; with the name of a base, the sulphocarbolate of the base. [B.]

SULFOCARBOMÈTRE (Fr.), n. Su^{6}l-fo-ka^{3}r-bo-me^{2}tr′. An instrument for estimating the amount of carbon disulphide contained in the alkaline sulphocarbonates. [Gélis and Thommeret-Gélis, "Compt. rend. de l'acad. des sci.," xv, p. 967 (B).]

SULFODIPHTHÉROSE (Fr.), **SULFOMUCOSE** (Fr.), n's. Su^{6}l-fo-def-ta-roz, -mu^6-koz. See BAREGIN.

SULFONALUM (Lat.), n. n. Su^{3}lf(su^{4}lf)-o^{2}n′a^{2}l(a^{3}l)-u^{3}m(u^{4}m). See SULPHONAL.

SULFONAPHTIDE (Fr.), n. Su^{6}l-fo-na^{3}f-ted. See SULPHONAPHTHALENE.

SULFONBERNSTEINSÄURE (Ger.), n. Zulf on′be^{2}rn-stin-zoir-e^2. Sulphonsuccinic acid. [B.]

SULFONSÄUREBENZOL (Ger.), n. Zulf-on′zoir-e^2-be^{2}n-tso^{2}l. Benzenesulphonic acid. [B.]

SULFONZIMMTSÄURE (Ger.), n. Zulf-on′tsi^{2}mt-zoir-e. Sulphocinnamic acid. [B.]

SULFOPHENAS (Lat.), n. m. Su^{3}lf(su^{4}lf)-o(o^3)-fen(fan)′a^{2}s-(a^{3}s). Fr., *sulfophénate.* Gen., *-at′is.* See SULPHOCARBOLATE.

SULFOPHÉNIQUE (Fr.), adj. Su^{6}l-fo-fa-nek. Sulphocarbolic. [B.]

SULFOSEL (Fr.), n. Su^{6}l-fo-se^{2}l. See SULPHOSALT.

SULFOXYSMUS (Lat.), n. m. Su^{3}lf(su^{4}lf)-o^{2}x-i^{2}z(u^{6}z)′mu^{3}s-(mu^{4}s). Poisoning with sulphuric acid. [A, 326 (*a*, 21).]

SULFUR (Lat.), n. n. Su^{3}lf(su^{4}lf)′u^{6}r(u^{4}r). Gen., *sulf′uris.* See SULPHUR.—**Hepar sulfuris.** See POTASSA *sulphurata* (1st def.).—**Hepar sulfuris calcareum.** Calcium sulphide; calx sulphurata. [B, 270.]—**Ioduretum sulfuris.** Sulphur iodide. [*a*, 38.]—**Pastilla sulfuris.** See *Tabellæ* SULPHURIS.—**S. depuratum.** Washed sulphur. [B.]—**S. jodatum.** See *Sulphur iodide.*—**S. lotum.** Washed sulphur. [B, 95 (*a*, 38).]—**S. præcipitatum.** Precipitated sulphur. [B.]—**S. sublimatum.** 1. Of the Ger. Ph., Finn. Ph., Hung. Ph., 2d ed., and Russ. Ph., sublimed sulphur. 2. Of the Austr. Ph., washed sulphur. [B, 95 (*a*, 38).]—**S. sublimatum elotum** [Finn. Ph., Russ. Ph.] (seu et **lotum** [Fr. Cod.], seu **lotum** [Hung. Ph., 2d ed.]). Washed sulphur. [B, 95 (*a*, 38).]—**—Tabellæ cum sulfure, Trochisci sulfuris.** See *Tabellæ* SULPHURIS.—**Unguentum sulfuris compositum.** See *Unguentum* SULPHURIS *compositum.*

SULFURATION (Fr.), n. Su^{6}l-fu^6-ra^3-se o^{2}n^2. Fumigation and disinfection with sulphur. [*a*, 18.] Cf. *Fumigation à l'*ACIDE SULFUREUX.

SULFURATUS (Lat.), adj. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-at(a^{3}t)′u^{3}s-(u^{4}s). Sulphureted; with the name of a base, the sulphide of the base.

SULFURE (Fr.), n. Su^{6}l-fu^{6}r. See SULPHIDE.—**S. ammonique.** Liquor fumans Boylii. [B, 119 (*a*, 38).]—**S. antimonique.** An antimony sulphide, especially antimony trisulphide. [B, 119.]—**S. cuivreux.** See *Æs combustum.*—**S. ferreux.** See IRON *monosulphide.*—**S. mercurique.** See *Red* MERCURY *sulphide.*—**S. plombique.** Lead sulphide. [B, 119 (*a*, 38).]

SULFURÉ (Fr.), adj. Su^{6}l-fu^{6}r-a. See SULPHURATED.

SULFURÉE (Fr.), n. Su^{6}lf-u^{6}r-a. Sulphurea; thiourea. [B.]

SULFURET (Ger.), n. Zulf-ur-e^{2}t′. A sulphide, more particularly a lower or basic sulphide. [B.] Cf. SULFID.

SULFURETUM (Lat.), n. n. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-et(at)′u^{3}m-(u^{4}m). See SULPHIDE and cf. SULPHURETUM.—**S. arsenicosum.** See ARSENIC *trisulphide.*—**S. carbonicum.** See CARBON *disulphide.*—**S. hydrargyricum.** See *Red* MERCURY *sulphide.*—**S. natricum, S. sodicum.** Sodium monosulphide. [B.]—**S. stibicum.** See ANTIMONY *sulphide.*—**S. stibicum auratum.** See ANTIMONY *pentasulphide.*

SULFUREUS (Lat.), adj. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)′e^2-u^{3}s(u^{4}s). Sulphur-yellow. [*a*, 35.]

SULFUREUX (Fr.), adj. Su^{6}l-fu^6-ru^6. See SULPHUROUS.

SULFURICUS (Lat.), adj. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)′i^{2}k-u^{3}s(u^{4}s). Sulphuric; with the name of a base, the sulphate of the base. [B.]

SULFUROSUS (Lat.), adj. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-os′u^{3}s(u^{4}s). Sulphurous; with the name of a base, the sulphite of that base. [B.]

SULPHACETAMIDE, n. Su^{3}lf-a^{2}s-e^{2}t′a^{2}m-i^{2}d(id). Fr., *sulfacétamide.* A substance, $S(CH_2.CO.NH_2)_2$, obtained by adding an alcoholic solution of ammonium sulphide to an alcoholic solution of chloracetamide. [B, 93 (*a*, 14).]

SULPHACETIC ACID, n. Su^{3}lf-a^{2}s-e^{2}t(et)′i^{2}k. Fr., *acide sulfacétique.* See SULPHONACETIC ACID.

SULPHACETYLIC ACID, n. Su^{3}lf-a^{2}s-e^{2}t-i^{2}l′i^{2}k. See ETHIONIC *anhydride.*

SULPHALDEHYDE, n. Su^{3}lf-a^{2}l′de^2-hid. Fr., *sulfaldéhyde.* See THIOALDEHYDE.

SULPHAMETHYLANE, n. Su^{3}lf-a^2-me^{2}th′i^{2}l-an. Fr., *sulfaméthylane.* A substance, $SO\left\{\begin{matrix}NH_2\\O.CH_3\end{matrix}\right.$, obtained by passing a current of dry ammonia gas over methyl sulphate. [B, 93 (*a*, 14).]

SULPHAMIC ACID, n. Su^{3}lf-a^{2}m′i^{2}k. Fr., *acide sulfamique, sulfammon.* Ger., *Sulfamidsäure.* A substance, SO_3NH_3, not yet isolated, but existing in neutral ammonium sulphate. [B, 93 (*a*, 14).] See also *Amic* ACIDS.

SULPHAMIDE, n. Su^{3}lf′a^{2}m-i^{2}d(id). Fr., *sulfamide.* Ger., *Sulfamid, schwefligsaures Amid.* An old name for ammonium sulphate. [B, 93 (*a*, 14).]

SULPHAMINEBARBITURIC ACID, n. Su^{3}lf-a^{2}m-en-ba^{3}rb-i^{2}t-u^2′ri^{2}k. See THIONURIC ACID.

SULPHAMINEBENZOIC ACID, n. Su^{3}lf-a^{2}m-en-be^{2}nz-o′-i^{2}k. Ger., *Sulfaminbenzoësäure.* One of the products formed in the excretion of saccharin, found in the urine. [E. Salkowski, "Ctrlbl. f. d. med. Wssnsch.," April 23, 1887, p. 307 (B).]

SULPHAMINOL, n. Su^{3}lf-a^{2}m′i^{2}n-o^{2}l. Ger., *Sulfaminol.* Thioxydiphenylamine; a substance, $C_{12}H_9NSO_2 = NH : (C_6H_3.OH)_2 : S$, forming a yellowish, tasteless, and odorless powder, insoluble in water, soluble in solutions of the alkalies. In the liquids of the animal organism it decomposes with the evolution presumably of sulphur and phenol. According to Moritz, it acts like iodoform in diminishing suppuration. ["Ann. di chim. e di farmacol.," July, 1890, p. 44 (B).]

SULPHAMYLIC ACID, n. Su^{3}lf-a^{2}m-i^{2}l′i^{2}k. See AMYL *sulphate.*

SULPHANILIC ACID, n. Su^{3}lf-a^{2}n-i^{2}l'i^{2}k. Fr., *acide sulfanilidique* (ou *sulfanilique*). Ger., *Sulfanilsäure, Sulfonanilsäure.* Paramidobenzenesulphonic acid (see under AMIDOBENZENESULPHONIC ACID). It is slightly soluble in water, and is used internally to prevent iodism. [B; Ehrlich, "Pharm. Rundsch." ("Am. Jour. of Pharm.," May, 1886); "N. Y. Med. Jour.," May 22, 1886, p. 594 (*a*, 50).]

SULPHANTIMONIC ACID, n. Su^{3}lf-a^{2}n-ti^2-mo^{2}n'i^{2}k. Fr., *acide sulfantimonique.* Ger., *Sulfantimonsäure.* See THIOANTIMONIC ACID.—**Anhydrous s. a.** See ANTIMONY *pentasulphide.*

SULPHANTIMONIOUS ACID, n. Su^{3}lf-a^{2}n-ti^2-mon'i^2-u^{3}s. Antimony tetrasulphide. [B.]

SULPHANTIMONIOUS ANHYDRIDE, n. Antimony trisulphide. [B, 159.]

SULPHANTIMONITE, n. Su^{3}lf-a^{2}n-ti^{2}m'o^{2}n-it. See THIOANTIMONITE.

SULPHARSENATE, n. Su^{3}lf-a^{3}rs'e^{2}n-at. Fr., *sulfarséniate.* See THIOARSENATE.—**Basic s.** See *Tribasic s.*—**Diammonic s.** See AMMONIUM *thioarsenate.*—**Dibasic s's.** Of Watts, a class of salts now known as the pyrothioarsenates. [B.]—**Monammonic s.** See AMMONIUM *thioarsenate.*—**Monobasic s's.** Of Watts, a class of salts now known as metathioarsenates. [B.]—**Neutral s.** See *Dibasic s.*—**Triammonic s.** See AMMONIUM *thioarsenate.*—**Tribasic s's.** Of Watts, the class of salts known now as the thioarsenates or orthothioarsenates. [B.]

SULPHARSENIC ACID, n. Su^{3}lf-a^{3}rs-e^{2}n'i^{2}k. Fr., *acide sulfarsénique.* Ger., *Sulfarsensäure.* An improper term for arsenic pentasulphide; properly thioarsenic acid (*q. v.*). [B.]

SULPHARSENIOUS ACID, n. Su^{3}lf-a^{3}rs-e^{2}n'i^2-u^{3}s. Fr., *acide sulfarsénieux.* Ger., *Sulfarsenigsäure.* An improper term for arsenic trisulphide; properly thioarsenious acid (*q. v.*). [B.]

SULPHARSENITE, n. Su^{3}lf-a^{3}rs'e^{2}n-it. See THIOARSENITE.

SULPHAS (Lat.), n. m. Su^{3}lf(su^{4}lf)'a^{2}s(a^{3}s). Gen., *-phat'is.* See SULPHATE and cf. subheadings under SULFAS.—**Liquor sulphatis magnesici carbonicus.** See *Liquor* MAGNESII *carbonatis.*—**Solutio sulphatis atropici** [Norw. Ph.]. A solution of 1 part of atropine sulphate in 200 parts of distilled water. [B, 95.] Cf. *Liquor* ATROPINÆ *sulphatis.*—**Solutio sulphatis ferrici.** See *Liquor* FERRI *tersulphatis.*—**Solutio sulphatis magnesici carbonica.** See *Liquor* MAGNESII *carbonatis.*—**S. æthylicus acidus cum alcohole.** See MIXTURA *sulphurica acida.*—**S. aluminaris.** See ALUM.—**S. aluminico-kalicus (crudus).** Crude alum. [B, 95 (*a*, 38).]—**S. aluminico-kalicus depuratus.** Alum purified by recrystallization. [B, 95 (*a*, 38).]—**S. aluminico-kalicus siccatus (seu ustus).** Burnt alum. [B, 95.]—**S. aluminico-natricus.** See ALUMINIUM *and sodium sulphate.*—**S. aluminico-potassicus.** See ALUMINIUM *and potassium sulphate.*—**S. ammonico-ferricus.** See IRON *and ammonium sulphate* (2d def.).—**S. ammonicus.** See AMMONIUM *sulphate.*—**S. atropicus.** See ATROPINE *sulphate.*—**S. calcicus nativus.** Gypsum. [B.]—**S. calcicus ustus.** See CALCIUM *sulfuricum ustum.*—**S. chinicus.** See QUININE *sulphate.*—**S. cinchonicus.** See CINCHONINE *sulphate.*—**S. cuprico-ammoniacus (basicus).** See COPPER *ammoniosulphate.*—**S. cupricus.** See COPPER *sulphate.*—**S. cupricus ammoniacalis.** See COPPER *ammoniosulphate.*—**S. cupricus purus.** See COPPER *sulphate.*—**S. cupricus venalis.** See CUPRUM *sulfuricum crudum.*—**S. cuproammoniacalis.** See COPPER *ammoniosulphate.*—**S. ferricus.** See IRON *sulphate* (2d def.).—**S. ferrosus.** See FERRI *s.* and IRON *sulphate* (1st def.).—**S. ferrosus exsiccatus (seu siccatus).** See FERRI *s. exsiccatus.*—**S. hydrargyricus flavus.** See MERCURY *subsulphate.*—**S. kalico-aluminicus.** Crude alum. [B, 95 (*a*, 38).]—**S. kalico-aluminicus exsiccatus.** Burnt alum. [B, 95.]—**S. kalicus.** See POTASSIUM *sulphate.*—**S. magnesicus.** See MAGNESIUM *sulphate.*—**S. manganosus.** See MANGANESE *sulphate* (1st def.).—**S. mercuricus.** See MERCURY *sulphate* (2d def.).—**S. morphicus, S. morphinicus.** See MORPHINE *sulphate.*—**S. natricus.** See SODIUM *sulphate.*—**S. natricus siccatus (seu siccus).** See *Dried* SODIUM *sulphate.*—**S. quinicus.** See QUININE *sulphate.*—**S. sodicus.** See SODIUM *sulphate.*—**S. stibicus.** Antimony sulphate. [B.]—**S. superammoniaco-cupreus (seu -cupricus).** See COPPER *ammoniosulphate.*—**S. zincicus.** See ZINC *sulphate.*

SULPHATE, n. Su^{3}lf'at. Lat., *sulphas* (cf. SULPHURICUS). Fr., *sulfate.* Ger., *Sulfat, schwefelsaures Salz.* A salt of sulphuric acid (cf. *Normal s.* and *Acid s.*).—**Acid s.** A salt of sulphuric acid in which only one atom of hydrogen in the molecule of the acid is replaced by a metal or radicle. The general formula of the acid s's is $R_n(HSO_4)_n$, where R_n is a radicle whose combining power is n. [B.]—**Basic s.** A compound of a s. with an oxide or hydroxide. [B.]—**Dimetallic s.** A normal s. so called because two atoms of a univalent metal are required to replace completely the hydrogen of the acid. [B.]—**Ferrous s.** See IRON *sulphate* (1st def.).—**Monohydric s.** See *Acid s.*—**Normal s.** A s. in which all of the hydrogen of the acid is replaced by a metal or radicle. The general formula of these s's is $R_2'SO_4$, $R''SO_4$, or $R_2'''(SO_4)_3$. [B.]—**Test solution of ferrous s.** A freshly prepared solution of ferrous s. in ten times [U. S. Ph., Br. Ph.] (twice [Ger. Ph.]) as much water. [B, 81 (*a*. 38).]

SULPHAZOTIC ACID, n. Su^{3}lf-a^{2}z-o^{2}t'i^{2}k. See HYDROXYLAMINE*disulphonic acid.*

SULPHAZOTIZED, adj. Su^{3}lf-a^{2}z'o-tizd. Fr., *sulfazoté.* Containing sulphur and nitrogen. [A, 385 (*a*, 48).]

SULPHETHERIN, n. Su^{3}lf-e^{2}th'e^{2}r-i^{2}n. Of Löwig and Weidmann, ethylene sulphide. [B, 3 (*a*, 38).]

SULPHETHIONIC ACID, n. Su^{3}lf-e^{2}th-i^2-o^{2}n'i^{2}k. See ETHIONIC *anhydride.*

SULPHETHYSULPHURIC ACID, n. Su^{3}lf-e^{2}th-i^{2}l-su^{3}lf-u^2'ri^{2}k. See ETHYLSULPHONIC ACID.

SULPHHYDRATE, n. Su^{3}lf-hid'rat. See SULPHYDRATE.

SULPHIDE, n. Su^{3}lf'i^{2}d(id). Lat., *sulphidum, sulphuretum* (cf. SULPHURATUS). Fr., *sulfure, sulfide.* Ger., *Sulphid, Schwefel.* A compound consisting of an element or radicle united directly with sulphur. [B.]—**Arsenious s.** See ARSENIC *trisulphide.*

SULPHIDUM (Lat.), n. n. Su^{3}lf(su^{4}lf)'i^{2}d-u^{3}m(u^{4}m). See SULPHIDE.—**S. stibicum.** Antimony pentasulphide. [B.]—**S. stibiosum.** Antimony tetrasulphide. [B.]

SULPHINDIGOTATE, n. Su^{3}lf-i^{2}n'di^2-go^{2}t-at. Fr., *céruléosulfate.* A salt of sulphindigotic acid. [*a*, 17.]

SULPHINDIGOTIC ACID, SULPHINDYLIC ACID, n's. Su^{3}lf-i^{2}n-di^2-go^{2}t'i^{2}k. -i^{2}nd-i^{2}l'i^{2}k. An acid, $C_{16}H_8N_2O_2(SO_3H)_2$, occurring as an amorphous blue mass produced by the action of sulphuric acid upon indigo. [B, 4 (*a*, 38).]

SULPHINE, n. Su^{3}lf'en. Ger., *Sulfin.* Any one of a class of radicles, analogous to the amines, in which sulphur is present as a quadrivalent body. Such radicles have the composition $\equiv R'' : S :$ or $- S.R.'''$, in which R'' and R''' represent respectively bivalent and trivalent single radicles or combinations of radicles. [B.]

SULPHINIC ACIDS, n. pl. Su^{3}lf-i^{2}n'i^{2}k. Ger., *Sulfinsäuren.* Monobasic acids, which may be regarded as derived from sulphurous acid by the replacement of one molecule of hydroxyl in the latter by a univalent radicle. Formula, $H.R.'S.O_2$. [B.]

SULPHIODIDE, n. Su^{3}lf-i'od-i^{2}d(id). A compound of sulphur and iodine with the same base. [B.]

SULPHIS (Lat.), n. m. Su^{3}lf(su^{4}lf)'i^{2}s. Gen., *-phit'is.* See SULPHITE.—**S. calcicus.** See CALCIUM *sulphite.*—**S. magnesicus.** See MAGNESIUM *sulphite.*—**S. natricus, S. sodicus.** See SODIUM *sulphite.*—**S. stibicus.** Antimony sulphite. [B.]

SULPHITE, n. Su^{3}lf'it. Lat., *sulphis.* Fr., *sulfite.* Ger., *Sulfit.* A salt of sulphurous acid. In the *normal s's* all the hydrogen of the acid is replaced by a metal or radicle; in the *acid s's* only one atom of hydrogen is so replaced. [B.]

SULPHMETHYLATE, n. Su^{3}lf-me^{2}th'i^{2}l-at. See THIOMETHYLATE.

SULPHOACETIC ACID, n. Su^{3}lf-o-a^{2}s-et(e^{2}t)'i^{2}k. See SULPHONACETIC ACID.

SULPHOARSENITE, n. Su^{3}lf-o-a^{3}rs'e^{2}n-it. See THIOARSENITE, and for various words in *Sulpho-* not here given, see the corresponding forms in *Thio-*.

SULPHO-AZOTIZED, adj. Su^{3}lf-o-a^{2}z'ot-izd. See SULPHAZOTIZED.

SULPHOBACTERIA (Lat.), n. n. pl. Su^{3}lf(su^{4}lf)-o(o^2)-ba^{2}kt-(ka^{3}kt)-e(a)'ri^2-a^3. For deriv., see SULPHUR and BACTERIUM. Fr., *sulfobactéries.* See *Schwefel*BACTERIEN.

SULPHOBASE, n. Su^{3}lf'o-bas. See *Sulpho-*BASE.

SULPHOBENZENIC ACID, n. Su^{3}lf-o-be^{2}nz-e^{2}n'i^{2}k. Benzenesulphonic acid. [B.]

SULPHOBENZIDE, n. Su^{3}lf-o-be^{2}nz'i^{2}d(id). Fr., *sulfobenzide.* Ger., *Sulfobenzid.* See DIPHENYLSULPHONE.

SULPHOBENZIDIC ACID, n. Su^{3}lf-o-be^{2}nz-i^{2}d'i^{2}k. See DIPHENYLSULPHONIC ACID.

SULPHOBENZOIC ACID, n. Su^{3}lf-o-be^{2}nz-o'i^{2}k. Fr., *acide sulfobenzoïque.* Ger., *Sulfobenzoësäure.* An acid, $C_7H_6SO_5 = C_6H_4\langle{}^{SO_3H}_{CO.OH}$, known in three isomeric forms: *Orthos' acid*, monoclinic tabular crystals; *metas' acid*, a colorless crystalline mass; and *paras' acid*, acicular crystals. [B, 3 (*a*, 38).]

SULPHOBENZOLIC ACID, n. Su^{3}lf-o-be^{2}nz-o^{2}l'i^{2}k. Fr., *acide sulfobenzolique.* Benzenesulphonic acid. [B.]

SULPHOBROMIDE, n. Su^{3}lf-o-brom'i^{2}d(id). A compound of sulphur and bromine with the same base. [B, 2.]

SULPHOBUTYLIC ACID, n. Su^{3}lf-o-bu^2-ti^{2}l'i^{2}k. Fr., *acide sulfobutylique.* See BUTYL *sulfate.*

SULPHOCAMPHIC ACID, n. Su^{3}lf-o-ka^{2}mf'i^{2}k. Fr., *acide sulfocamphique.* See *Sulphocymenic* ACID.

SULPHOCAMPHORIC ACID, n. Su^{3}lf-o-ka^{2}m-fo^{2}r'i^{2}k. Fr., *acide sulfocamphorique.* Ger., *Sulfocamphersäure.* Of Walter, sulphocamphylic acid.

SULPHOCAMPHYLIC ACID, n. Su^{3}lf-o-ka^{2}m-fi^{2}l'i^{2}k. Fr., *acide sulfocamphylique.* A strong dibasic acid, $C_9H_{16}SO_6 + 2H_2O$, occurring as hexagonal asymmetric prisms. [B, 3 (*a*, 38).]

SULPHOCARBAMIDE, n. Su^{3}lf-o-ka^{3}rb'a^{2}m-i^{2}d(id). Fr., *sulfocarbamide.* Ger., *Sulfocarbamid.* See THIOUREA.

SULPHOCARBANILIDE, n. Su^{3}lf-o-ka^{3}rb-a^{2}n'i^{2}l-i^{2}d(id). Fr., *sulfocarbanilide.* See DIPHENYLTHIOUREA.

SULPHOCARBOL, n. Su^{3}lf-o-ka^{3}rb'o^{2}l. See ASEPTOL.

SULPHOCARBOLATE, n. Su^{3}lf-o-ka^{3}rb'o^{2}l-at. Lat., *sulphocarbolas.* Fr., *sulphophénate.* Ger., *phenylschwefelsaures Salz.* A salt of sulphocarbolic acid. [B.]

SULPHOCARBOLIC ACID, n. Su^{3}lf-o-ka^{3}rb-o^{2}l'i^{2}k. Fr., *acide sulfocarbolique* (ou *sulfo-phénique*). See PHENOL*sulphuric acid.*

SULPHOCARBONIC ACID, n. Su^{3}lf-o-ka^{3}rb-o^{2}n'i^{2}k. Fr., *acide sulfocarbonique.* 1. Thiocarbonic acid. 2. Carbon dioxide.

SULPHOCARBOVINIC ACID, n. Su^{3}lf-o-ka^{3}rb-o-vin'i^{2}k. Fr., *acide sulfocarbovinique.* See XANTHIC ACID.

SULPHOCHLORIDE, n. Su^{3}lf-o-klor'i^{2}d(id). Fr., *sulfochlorure.* A compound of sulphur and chlorine with the same base. [B.]

SULPHOCRESYLIC ACID, n. Su^{3}lf-o-kre^{2}s-i^{2}l'i^{2}k. Fr., *acide sulfocrésylique.* Ger., *Kresylschwefelsäure.* A monobasic acid, $C_6H_3(CH_3).OH.SO_2.OH$. [B.]

SULPHOCUMINIC ACID, n. Su^{3}lf-o-ku^2-mi^{2}n'i^{2}k. Fr., *acide sulfocuminique.* An acid, $SO(O.C_9H_{11})(OH)$, obtained by the action of sulphuric acid on cumene; known only in its salts.

SULPHOCYANHYDRIC ACID, SULPHOCYANIC ACID, n's. Su^{3}lf-o-si-a^{2}n-hid'ri^{2}k, -a^{2}n'i^{2}k. See THIOCYANIC ACID.

SULPHOCYANIC ANHYDRIDE, n. See CYANOGEN *sulphide.*

SULPHOCYANIDE, n. Su^{3}lf-o-si'a^{2}n-i^{2}d(id). See THIOCYANIDE.

SULPHOCYANOGEN, n. Su^{3}lf-o-si-a^{2}n'o-je^{2}n. A hypothetical radicle, CNS, of thiocyanic acid. [B, 93 (a, 14).]

SULPHOCYMENIC ACID, n. Su^{3}lf-o-si-me^{2}n'i^{2}k. An acid, $C_6H_3)SO_2.OH)(CH_3)(C_3H_7)$, derived from cymene. [B.]

SULPHODIAZOBENZENE, n. Su^{3}lf-o-di-a^{2}z-o-be^{2}nz'en. See DIAZOBENZENE*sulphonic acid.*

SULPHOËSSIGSÄURE (Ger.), n. Zulf-o-e^{2}s'si^{2}g-zoir-e^2. See SULPHONACETIC ACID.

SULPHOFORM, n. Su^{3}lf'o-fo^{2}rm. Fr., *sulfoforme.* Ger., *Sulfoform.* A yellowish crystalline substance, $(CH)_2S_3$, obtained by heating iodoform with sulphur in a closed vessel. [B, 93 (a, 14).]

SULPHOGLUCIC ACID, n. Su^{3}lf-o-glu^2'si^{2}k. Fr., *acide sulfoglucique* (ou *sulfoglycosique*, ou *sulfosaccharique*). Dextrose sulphuric acid; an unstable body, $C_{12}H_{24}O_{12}.SO_3$, formed by dissolving glucose (dextrose) in concentrated sulphuric acid. [B, 4, 9, 93.]

SULPHOGLYCERIC ACID, n. Su^{3}lf-o-gli^{2}s-e^{2}r'i^{2}k. Fr., *acide sulforglycérique.* See GLYCERIN*sulphuric acid.*

SULPHOGLYCOLLIC ACID, n. Su^{3}lf-o-gli^{2}k-o^{2}l'i^{2}k. Fr., *acide sulfoglycolique.* Basic ethylene sulphate. [B.]

SULPHOHYDRAS (Lat.), n. m. Su^{3}lf(su^{4}lf)-o(o^3)-hid(hu^{6}d)'-ra^{2}s(ra^{3}s). Gen., *-rat'is.* A hydrosulphide. [B, 95.]

SULPHOLEIC ACID, SULPHOLINIC ACID, n's. Su^{3}lf-o^{2}l-e'i^{2}k. -i^{2}n'i^{2}k. Fr., *acide sulfoléique.* An acid obtained by the action of sulphuric acid on vegetable oils. When concentrated it is a yellowish liquid with a neutral reaction. It possesses remarkable properties as a solvent, and has been recommended as a substitute for vaseline, oleic acid, glycerin, etc., for external use. ["Therap. Gaz.," Nov., 1889, p. 763 (a, 50).]

SULPHOMANNITIC ACID, n. Su^{3}lf-o-ma^{2}n-i^{2}t'i^{2}k. Fr., *acide sulfomannitique.* A substance obtained by treating the product of the reaction of sulphuric acid on mannite with barium carbonate. [B, 38 (a, 14).]

SULPHONACETIC ACID, n. Su^{3}lf-on-a^{2}s-et(e^{2}t)'i^{2}k. Fr., *acide sulfo-acétique* (ou *sulf-acétique*). Ger., *Sulfonacetsäure, Sulfoëssigsäure.* A dibasic acid, $C_3H_4SO_5$, obtained by the action of sulphuric anhydride on hot acetic acid. [B, 4; B, 3 (a, 14, 38).]

SULPHONAL, n. Su^{3}lf'o^2-n'l. Ger., *Sulfonal.* Diethylsulphonedimethylmethane, $C_7H_{16}S_2O_4 = \frac{C_2H_5SO_2}{C_2H_5SO_2} \!> C <\! \frac{CH_3}{CH_3}$, occurring as colorless prismatic crystals. It is odorless and nearly or quite tasteless, and has decided hypnotic qualities. [B, 270 (a, 38); "Am. Jour. of Pharm.," June, 1888, p. 273; "N. Y. Med. Jour.," July 7, 1888, p. 9.]

SULPHONE, n. Su^{3}lf'on. 1. A bivalent radicle, $(SO_2)''$, in which the sulphur is a hexad, $>S^{vi}\genfrac{}{}{0pt}{}{=O}{=O}$. 2. A compound of s. (1st def.) in which both free valences are satisfied by radicles containing carbon. [B; B, 270 (a, 38).]

SULPHONIC ACIDS, n. pl. Fr., *acides sulfoniques.* Ger., *Sulfonsäuren.* See *Sulphonic* ACIDS.

SULPHOPHENATE, n. Su^{3}lf-o-fe^{2}n'at. Lat., *sulphophenas.* Fr., *sulphophénate.* See SULPHOCARBOLATE.

SULPHOPHÉNOL (Fr.), n. Su^{6}l-fo-fa-nol. See ASEPTOL.

SULPHOPHENOLIC ACID, n. Su^{3}lf-o-fe^{2}n-o^{2}l'i^{2}k. Phenolsulphonic acid. [B, 2.]

SULPHOPURPURIC ACID, n. Su^{3}lf-o-pu^{5}r-pu^2'ri^{2}k. Fr., *acide sulfopurpurique* (ou *sulfophénicique*). Ger., *Phönicinschwefelsäure, Purpurschwefelsäure,* Phœnicinsulphuric acid, $C_{16}H_9N_2O_2(SO_3H)$, a reddish-purple powder. [B, 93, 270 (a, 38).]

SULPHOQUINIC ACID, n. Su^{3}lf-o-kwi^{2}n'i^{2}k. See QUININE*sulphuric acid.*

SULPHOSALICYLIC ACID, n. Su^{3}lf-o-sa^{2}l-i^{2}s-i^{2}l'i^{2}k. Fr., *acide sulfosalicylique.* Ger., *Sulfosalicylsäure.* An acid, $C_6H_3(SO_3H)(OH)CO.OH = C_7H_6SO_6$, occurring as long, thin, hygroscopic, acicular crystals. [B, 3, 93 (a, 14, 38).]

SULPHO-SALT, n. Su^{3}lf'o-sa^{4}lt. Fr., *sulfosel.* A salt in which sulphur replaces an equivalent amount of oxygen. Designated by the prefix *sulpho-* or *thio-*. [B.]

SULPHOSINAPIC ACID, n. Su^{3}lf-o-si^{2}n-a^{2}p'i^{2}k. Fr., *acide sulfosinapique.* Ger., *Sulfosenfsäure.* See ALLYL*dithiocarbamic acid.*

SULPHOSTIBIAS (Lat.), n. f. Su^{3}lf(su^{4}lf)-o(o^3)-sti^{2}b'i^2-a^{2}s-(a^{3}s). Gen., *-at'is.* See THIOANTIMONATE. [B.]—**S. calcicus.** See CALCIUM *thioantimonate.*—**S. natricus cum aqua.** See SODIUM *thioantimonate.*

SULPHOSULPHATE, n. Su^{3}lf-o-su^{3}lf'at. A thiosulphate. [B.]

SULPHOSULPHURIC, adj. Su^{3}lf-o-su^{3}lf-i^2'ri^{2}k. See THIOSULPHURIC.

SULPHOVINATE, n. Su^{3}lf-o-vin'at. Fr., *sulfovinate.* A salt of sulphovinic acid. [a, 14.]

SULPHOVINIC, adj. Su^{3}lf-o-vin'i^{2}k. Produced by the action of sulphuric acid upon wine or alcohol. [B.]—**S. acid.** See under ETHYL *sulphate.*

SULPHOXAMIDE, n. Su^{3}lf-o^{2}x'a^{2}m-i^{2}d(id). See CYANOGEN *disulphydrate.*

SULPHOXIARSENIC ACID, n. Su^{3}lf-o^{2}x-i^2-a^{3}rs-e^{2}n'i^{2}k. See ARSENIC *oxysulphide.*

SULPHOXYBENZOIC ACID, n. Su^{3}lf-o^{2}x-i^2-be^{2}nz-o'i^{2}k. Benzoic acid in which one atom of hydrogen is replaced by hydroxyl and another by the radicle $SO_2.OH$. *Orthos' acid* is sulphosalicylic acid (*q. v.*). *Paras' acid* is also known. [B.]

SULPHOXYMETHYLIC ACID, n. Su^{3}lf-o^{2}x-i^2-meth-i^{2}l'i^{2}k. Fr., *acide sulfoxyméthylique.* A very stable substance, $CH_2.OH.SO_3H$, isomeric with methylsulphuric acid. [B, 93 (a, 14).]

SULPHUME, n. Su^{3}lf'u^{2}m. A proprietary name for a preparation which is "little else than an aqueous solution of some of the higher sulphides of sodium and potassium saturated with sulphur." [Squibb, "Ephemeris," etc., Feb., 1893, p. 63.]

SULPHUR (Lat.), n. n. Su^{3}lf(su^{4}lf)'u^{5}r(u^{4}r). Gen., *sulph'uris.* Gr., *θεῖον.* Fr., *soufre.* Ger., *Schwefel.* It., *zolfo.* Sp., *azufre.* Written also *sulfur.* 1. A non-metallic element occurring in nature both free and combined. As obtained in nature it forms yellow transparent rhombic crystals, insoluble in water, and only slightly soluble in alcohol or ether, but very soluble in carbon disulphide, in benzene, in petroleum, and in oil of turpentine. It has a slight taste, and on rubbing acquires a peculiar odor. The sp. gr. of this variety of s. is 2·05, and it melts at 114·5° C. to form a clear yellow liquid. When this liquid is cooled till a crust has formed over its surface, and the underlying liquid is poured off, the s. lining the sides of the vessel recrystallizes in long, thin, transparent, monoclinic prisms, constituting *monoclinic s.*, which has a sp. gr. of 1·96 and melts at 120° C. The s. of commerce (cf. *S. caballinum*) is obtained by fusing native s., and this in turn is purified by sublimation, condensing to form flowers of s. When s. is heated to over 200° C., the molten substance becomes dark and viscid (cf. *Plastic s.*), but the viscidity diminishes on subsequently increasing the temperature. S. unites directly with many elements and radicles to form the sulphides. In combination with oxygen it enters into the formation of sulphurous, sulphuric, hyposulphurous, thiosulphuric, dithionic, trithionic, and pentathionic acids, as well as of the salts of these acids. In composition it acts usually as a bivalent radicle, and the compounds so formed have a marked analogy to the compounds of oxygen. In other cases s. acts as a quadrivalent and sexvalent radicle. Atomic weight, 31·98; symbol, S. [B, 3, 5.] See also *Insoluble s.*, *Roll s.*, and *Washed s.* 2. Of Paracelsus, the combustible part of the human body. [H.]—**Acidum sulphuris volatile.** See ANTIMONII *clyssus.*—**Alcohol of s., Alcohol sulphuris.** 1. Carbon disulphide. [B, 81, 97.] 2. Flowers of s. in fine powder. [Sir H. Davy (B, 39).]—**Alkaline s. ointment.** See *Unguentum sulphuris alkalinum.*—**Astrum sulphuris.** See *Sulphuris* ASTRUM.—**Balsam of s.** Lat., *balsamum sulphuris.* Fr., *baume de soufre.* A solution of s. in linseed-oil. [B.]—**Balsamum sulphuris anisatum.** A solution of s. in oil of aniseed. [B, 119.]—**Balsamum sulphuris Rulandi.** A solution of s. in linseed-oil or nut-oil. [L, 45.]—**Balsamum sulphuris simplex.** A preparation made by digesting flowers of s. with from four to ten times as much almond-oil, nut-oil, or olive-oil, and straining; or by digesting 2 parts of flowers of s., 18 of oil of poppy, and 6 of wine for eight days, and boiling till the moisture is dissipated. [B, 119 (a, 38).]—**Balsamum sulphuris terebinthinatum.** See *Oleum* TEREBINTHINÆ *sulfuratum.*—**Beguin's volatile spirit of s.** See LIQUOR *fumans Boylii.*—**Ceratum e sulphure.** See CÉRAT *soufré* and cf. *Unguentum sulphuris.*—**Confectio (seu Electuarium) sulphuris** [Br. Ph.]. Fr., *électuaire de soufre, opiat de soufre.* Ger., *Schwefellatwerge.* A preparation made by rubbing together 4 oz. of sublimed s., 1 oz. of acid potassium tartrate in powder, 4 fl. oz. of syrup of orange-peel, and 18 grains of powdered tragacanth. [B, 81 (a, 21); B, 95.]—**Emplastrum sulphuris.** A plaster made by melting together 3 parts of flowers of s., 12 of olive-oil, and 15 of yellow wax, and adding 30 of myrrh; or by melting together 3 parts each of oleum terebinthinæ sulphuratum, yellow wax, and colophony, and adding 9 of myrrh. [B, 119 (a, 38).]—**Flores sulphuris.** See *Flowers of s.*—**Flores sulphuris loti.** See *Washed s.*—**Flowers of s.** Fr., *fleurs de soufre.* Ger., *Schwefelblumen.* Sublimed s. obtained in the form of light powdery flakes. [B, 3.]—**S. dioxide.** Fr., *dioxyde de soufre.* Sulphurous oxide, sulphurous anhydride ; a colorless gas, SO_2, of suffocating and irritating odor, formed by the combustion of sulphur and by the action of certain metals on sulphuric acid. It may be condensed into a liquid boiling at −8° C., and has also been obtained in the solid form. Water dissolves 80 times its volume of the gas at 0° C. and 40 times its volume at 20° C., the solution having an acid reaction and containing sulphurous acid. S. dioxide has a strong affinity for the oxygen of water, decomposing the latter with evolution of hydrogen ; and, owing to the energy with which the nascent hydrogen combines with organic substances, s. dioxide in the presence of moisture acts as a powerful bleaching and disinfecting agent. [B, 3.]—**S. diphosphide.** A highly inflammable, yellow liquid, SP_2, which fumes when exposed to the air and has a very disagreeable odor. [B, 3.]—**S. diselenide.** A yellow substance, SSe_2. [B.]—**S. embryonatum.** Antimony pentasulphide. [B, 200.]—**S. fluoride.** A compound of s. and fluorine ; a colorless fuming gas which possesses the property of etching glass. [B.]—**S. griseum.** See *S. caballinum.*—**S. hexiodide.** A crystalline substance, SI_6. [B, 3.]—**S. hydride.** A compound of s. and hydrogen. Two are known : sulphureted hydrogen, H_2S, and hydrogen persulphide, H_2S_2 (see these under HYDROGEN). [B.]—**S. in baculis.** See *Roll s.*—**S. iodide.** Lat., *sulphuris iodidum.* A compound of s. and iodine. Two s. iodides are known : *S. monoiodide*, *s. subiodide*, the iodide of s. of the various pharmacopœias, S_2I_2 (also known as iodine disulphide), a dark-gray crystalline substance ; and *s. hexiodide.* [B.]—**Sulphuris flores.** See *Flowers of s.*—**S. lotum.** See *Washed s.*—**S. lozenge.** Of Garrod, a lozenge containing 5 grains of s. and 1 grain of cream of tartar ; used in hepatic colic, hæmorrhoids, and rectal hæmorrhage. ["N. Y. Med. Jour.," July 13, 1889, p. 47 (*a*, 50).]—**S. monochloride.** A substance, S_2Cl_2, forming a dark-yellowish oily liquid which readily dissolves s. [B, 3.]—**S. monoiodide.** See *S. iodide.*—**S. ointment.** See *Unguentum sulphuris.*—**S. oxide.** See *S. dioxide*, *S. trioxide*, and *S. sesquioxide.*—**S. oxytetrachloride.** A substance, $S_2O_3Cl_4$, occurring as a white crystalline body, of very pungent, irritating odor. It readily decomposes under the action of heat or of moisture. [B, 3.]—**S. phosphide.** See *S. tetraphosphide* and *S. diphosphide*, and cf. PHOSPHORUS *sulphide.*—**S. præcipitatum.** See *Precipitated s.*—**S. purgans universale.** See PANACEA *antimonialis.*—**S. rubrum.** Kermes mineral. [B, 119.]—**S. sesquioxide.** A crystalline substance, S_2O_3, of a bluish-green color. [B, 3.]—**S. stibiatum aurantiacum.** Antimony pentasulphide. [B, 48.]—**S. stibiatum rubrum.** See ANTIMONY *trisulphide.*—**S. subchloride.** See *S. monochloride.*—**S. subiodide.** See *S. iodide.*—**S. sublimatum.** 1. Of the U. S. Ph., Netherl. Ph., Norw. Ph., and Swed. Ph., sublimed s. 2. Of the Br. Ph. and Dan. Ph., washed s. [B, 95 (*a*, 38).]—**S. sublimatum elotum.** See *Washed s.*—**S. sublimatum venale.** See *Sublimed s.*—**S. tetrachloride.** An unstable yellowish-brown liquid, SCl_4. [B, 3.]—**S. tetraphosphide.** A colorless, transparent, highly inflammable, oily liquid, SP_4, which fumes when exposed to the air, and has the odor of phosphorus. It may also be obtained in a solid form. [B, 3.]—**S. trioxide.** Sulphuric anhydride ; a substance, SO_3, which under ordinary circumstances forms transparent prismatic crystals melting at 16° C. and boiling at 46° C., but may also be obtained in the form of acicular crystals melting at 50° C. It is very hygroscopic, absorbing water from the atmosphere with the evolution of white fumes, and when thrown into water combines with it energetically, forming sulphuric acid. [B, 3.]—**S. venale.** See *Roll s.*—**S. vivum.** Native s. [A, 325 (*a*, 48).]—**Tabellæ sulphuris.** Fr., *tablettes de soufre.* Sp., *tabletas de azufre.* Ten-centigramme lozenges consisting of 100 parts of washed s. with 900 of sugar, 10 of tragacanth, and 90 of orange-flower water [Fr. Cod., Swiss Ph.], or with 892 of sugar, 8 of tragacanth, and enough water [Belg. Ph.] ; or 125-milligramme lozenges consisting of 12½ parts of washed s., 75 of sugar, and enough tragacanth and rose-water [Sp. Ph.]. [B, 95 (*a*, 38).]—**Uguentum sulphuris.** Fr., *pommade soufrée.* Ger., *Schwefelsalbe.* Sp., *pomada de azufre.* An ointment consisting of 3 parts of sublimed s. mixed with 7 of benzoinated lard [U. S. Ph.] ; or of 2 of sublimed s. mixed with 8 of benzoinated lard [Br. Ph.[; or of 1 part of washed s. mixed with 1 of sweet-almond-oil and 8 parts of benzoinated lard (if for veterinary use, 1 part of sublimed s. mixed with 3 parts of lard) [Fr. Cod.]. The Fr. Cod. has also an ointment called *pommade au soufre précipité*, in which precipitated s. takes the place of the washed s. in the formula just given. The Belg. and Swiss preparations consist of 6 parts of washed s. with 21 of lard and 3 of olive-oil [Belg. Ph.] (10 of lard and 4 of olive-oil [Swiss Ph.]). The other ph's direct the use of washed s. mixed with from two to four times as much lard ; the older ph's ordered flowers of s. in the same proportions, and sometimes a little oil of bergamot. [B, 95, 119 (*a*, 38).]—**Unguentum sulphuris alkalinum** [U. S. Ph.]. Fr., *pommade antipsorique* [Fr. Cod.]. Sp., *pomada antipsórica* [Sp. Ph.]. Helmerich's ointment ; a preparation consisting of 20 parts of washed s. and 10 of potassium carbonate rubbed up with 5 of water and mixed with 65 of benzoinated lard [U. S. Ph.]. The Fr. and Sp. Ph's order 10 parts each of potassium carbonate, water, and olive-oil, 20 of washed s., and 70 of lard ; and the Belg. Ph. orders 174 parts of washed s., 87 of potassium carbonate, 44 of water, and 695 of lard. [B ; B, 95 (*a*, 38).]—**Unguentum sulphuris compositum.** An ointment of 30 parts of washed s. (sublimed s. [Norw. Ph., Swed. Ph., Finn. Mil. Ph.]) with 20 of prepared chalk, 60 each of lard and potash soap, and 30 of tar [Austr. Ph., Norw. Ph., Swed. Ph., Finn. Mil. Ph.] (with 20 each of prepared chalk and yellow wax, 40 of lard, 60 of potash soap, and 30 of tar [Hung. Ph.] ; with 240 of lard [Ger. Ph.], or 195 of lard and 45 of olive-oil [Swiss Ph.], or 210 of lard and 30 of laurel-berries [Russ. Ph.] and 30 of zinc sulphate [Ger. Ph., Swiss Ph., Russ. Ph.]) ; or consisting of 32 parts of sublimed s., 16 of zinc sulphate, and 144 of lard [Netherl. Ph.]. [B, 95 (*a*, 38).]—**Unguentum sulphuris iodidi** [Br. Ph.]. An ointment of 5 parts of s. iodide, 15 of solid paraffin, and 55 of petrolatum. [B, 95 (*a*, 38).]—**Vegetable s.** See LYCOPODIUM (2d def.).—**Virgin s.** Native s. forming transparent crystalline masses. [B, 3.]—**Volcanic s.** Native s. forming opaque crystalline masses found in the volcanic districts of Sicily. [B, 3.]—**Washed s.** Lat., *s. lotum* [U. S. Ph.], *sulfur depuratum* [Ger. Ph.] (seu *sublimatum et lotum* [Fr. Cod.]). Fr., *soufre sublimé lavé.* Ger., *gereinigter Schwefel.* Sublimed s. freed from traces of sulphuric acid, etc., by washing with dilute ammonia water. [B.]

SULPHURARIA (Lat.), n. n. pl. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-a(a^{3})′-ri^{2}-a^{3}. Fr., *sulfuraires.* Filamentous *Algæ*, of the *Cyanophyceæ* (including *Beggiatoa*, *Oscillaria*, *Ulothrix*, etc.), that grow in sulphurous springs and partly constitute baregin. [B, 93 (*a*, 14).]

SULPHURATED, adj. Su^{3}lf′u^{2}r-at-e^{2}d. Lat., *sulphuratus.* Fr., *sulfuré.* Ger., *geschwefelt*, *schwefelig.* Containing or combined with sulphur. [*a*, 38.]

SULPHURATO-STIBIATUS (Lat.), adj. Su^{3}lf(su^{4}lf)-u^{2}r-(u^{4}r)-at(a^{3}t)″o(o^{3})-sti^{2}b-i^{2}-at(a^{3}t)′u^{3}s(u^{4}s). Combined with sulphur and containing antimony. [B.]

SULPHURATO-TEREBINTHINATUS (Lat.), adj. Su^{3}lf-(su^{4}lf)-u^{2}r(u^{4}r)-at(a^{3}t)″o(o^{3})-te^{2}r-e^{2}bi^{2}nth-i^{2}n-at(a^{3}t)′u^{3}s(u^{4}s). Containing sulphur and turpentine. [B.]

SULPHURATUM (Lat.), n. n. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-at(a^{3}t)′u^{3}m-(u^{4}m). A sulphide.

SULPHURATUS (Lat.), adj. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-at(a^{3}t)′u^{3}s-(u^{4}s). Sulphurated ; with the name of a base, the sulphide of that base.

SULPHUREA (Lat.), n. f. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-e(a)′a^{3}. See THIOUREA.

SULPHUREO-ACIDUS (Lat.), adj. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)″e^{2}-o(o^{3})-a^{2}s(a^{3}k)′i^{2}d-u^{3}s(u^{4}s). Acid and containing sulphur. [B.]

SULPHURET, n. Su^{3}lf′u^{2}-re^{2}t. See SULPHIDE.

SULPHURETED, adj. Su^{3}lf′u^{2}r-e^{2}t-e^{2}d. Combined with sulphur. [B.]

SULPHURETUM (Lat.), n. n. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-et(at)′u^{3}m-(u^{4}m). See SULPHIDE.—**S. calcicum.** See CALX *sulphurata.*—**S. ferrosum.** Iron monosulphide obtained by melting sulphur in a vessel and stirring it with an iron rod heated to white heat [Swed. Ph.] ; or by heating a bar of iron to white heat, applying sulphur, allowing the product to drop into water, and drying [Finn. Ph.]. [B. 95 (*a*, 38).]—**S. hydrargyricum.** See *Red* MERCURY *sulphide.*—**S. hydrargyricum et sulphidum stibiosum.** See ÆTHIOPS *antimonialis.*—**S. hydrargyricum et sulphur, S. hydrargyricum nigrum.** See *Black* MERCURY *sulphide.*—**S. hydrargyricum rubrum** (seu **sublimatum**). See *Red* MERCURY *sulphide.*—**S. stibico-hydrargyricum.** See MERCURY *and antimony sulphide.*—**Unguentum sulphureti calcici.** A mixture of calcium sulphide with eight times as much lard. [B, 95 (*a*, 38).]

SULPHURIC, adj. Su^{3}lf-u^{2}r′i^{2}k. Lat., *sulphuricus*, *sulfuricus.* Fr., *sulfurique.* Containing sulphur combined with three atoms of oxygen. [B.]—**S. anhydride.** The anhydride of s. acid ; sulphur trioxide. [B.]—**S. ether.** See ETHYL ETHER.

SULPHURIC ACID, n. Su^{3}lf-u^{3}r′i^{2}k. Lat., *acidum sulphuricum* (seu *sulfuricum*). Fr., *acide sulfurique* (ou *vitriolique*). Ger., *Schwefelsäure.* Oil of vitriol. The name was originally applied to sulphur trioxide (SO_3), still sometimes called anhydrous s. a., but is now given to the compound, H_2SO_4, of this substance with water. When obtained perfectly pure and free from water, by strongly cooling the distilled acid, s. a. forms crystals, melting at 105° C., and after fusion remaining liquid even when cooled below 0° C. As ordinarily obtained by distillation, it contains about 2 per cent. of water. It is a colorless, oily liquid, of strongly acid reaction, powerfully corrosive, and fuming when raised to a temperature of 30° C. It has a strong affinity for water, absorbing it from the atmosphere and from solids, with considerable evolution of heat. When hot, the strong acid attacks many metals (silver, mercury, copper, lead, tin, bismuth, and antimony), but does not affect gold or platinum. The dilute acid dissolves zinc, iron, manganese, etc. S. a. also combines with many organic radicles. In forming compounds with metals or radicles, s. a. acts as a powerful dibasic acid, producing a series of sulphates. *Commercial s. a.* (Lat., *acidum sulfuricum crudum* [Ger. Ph.] ; Fr., *acide sulfurique du commerce* [Fr. Cod.]) contains various impurities, chiefly lead sulphate and other sulphates, arsenic, traces of other elements, various oxides of nitrogen, and an excess of water. Official s. a. (Lat., *acidum sulphuricum* [U. S. Ph., Br. Ph.], *acidum sulfuricum* [Ger. Ph.] ; Fr., *acide sulfurique officinal ;* Ger., *reine Schwefelsäure*) is distilled from the commercial acid, and contains not less than 96 per cent. [U. S. Ph.] (96·8 per cent. [Br. Ph.], 94 to 97 per cent. [Ger. Ph.]) of the pure acid. The Fr. preparation is repre-

sented as nearly absolutely pure, but is probably of about the strength of the Br. s. a. The sp. gr. of these several preparations is 1·843 (Br. Ph., Fr. Cod.), and not below 1·840 [U. S. Ph.]. [B.]—**Anhydrous s. a.** See SULPHUR *trioxide.*—**Aromatic s. a.** See ACIDUM SULPHURICUM *aromaticum.*—**Dilute s. a.** Lat., *acidum sulphuricum* (seu *sulfuricum* [Ger. Ph., Fr. Cod.]) *dilutum* [U. S. Ph., Br. Ph.]. Fr., *acide sulfurique dilué* [Fr. Cod.]. Ger., *verdünnte Schwefelsäure.* A solution of pure s. a. in water. The U. S. and Fr. preparations contain about 9·8 per cent. of the pure anhydrous acid (10 per cent. of the official acid), the Br. preparation contains 14·5 per cent. of the pure acid (about 15 per cent of the official acid), and the Ger. preparation about 16 per cent. of the pure acid. The sp. gr. of the U. S. and Fr. preparations is 1·067, that of the Br. preparation 1·094. [B.]—**English s. a.** Ordinary s. a.; so called to distinguish it from the Nordhausen s. a. [B.]—**Fuming s. a., Nordhausen s. a.** Ger., *Nordhäuser Schwefelsäure, Vitriolöl.* Fuming s. a., Nordhausen oil of vitriol; a substance prepared at Nordhausen, in the Hartz Mountains, Germany, by roasting ferrous sulphate. It is a thick, oily liquid, colorless when pure, but usually brownish from a slight admixture of organic matter. It consists essentially of ordinary s. a. containing a variable amount of dissolved sulphur trioxide, and it owes its name of fuming s. a. to the fact that this trioxide readily volatilizes and forms dense white fumes on coming into contact with the aqueous vapor of the air. [B.]—**S.-a. beer.** Lat., *cerevisia acidi sulphurici, cerevisia anticolica.* 1. Treacle beer or other mild beer with the addition of a drachm of concentrated s. a. to every gallon. 2. A beer made by mixing 14 lbs. of treacle, ½ lb. of bruised ginger, ½ oz. of coriander, 12½ gallons of water, and 1 pint of yeast, and adding 1½ oz. of s. a. mixed with 12 oz. of water and 1½ oz. of sodium bicarbonate. [B, 199.]

SULPHURICUS (Lat.), adj. Su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)'i^{2}k-u^{3}s(u^{4}s). Containing sulphuric acid; with the name of a base, the sulphate of that base.

SULPHUROCARBOLIC ACID, n. Su^{3}lf''u^{2}r-o-ka^{3}rb-o^{2}l'-i^{2}k. A combination of sulphuric and carbolic acids. [a, 48.] Cf. PHENOL*sulphonic acid* and ASEPTOL.—**Red s. a.** Of Laplace, a mixture of equal parts of 25-per-cent. red carbolic acid and red sulphuric acid; a black, thick fluid, very soluble in water, and an energetic antiseptic. ["N. Y. Med. Jour.," May 4, 1889, p. 500 (a, 50).]

SULPHUROUS, adj. Su^{3}lf'u^{2}r-u^{3}s. Lat., *sulphurosus, sulfurosus.* Fr., *sulfureux.* Ger., *schweflig.* Resembling sulphur; containing sulphur as a quadrivalent radicle. [B.]—**S. anhydride, S. oxide.** See SULPHUR *dioxide.*

SULPHUROUS ACID, n. Su^{3}lf'u^{2}r-u^{3}s. Lat., *acidum sulphurosum* (seu *sulfurosum*). Fr., *acide sulfureux.* Ger., *Schwefligsäure.* A name formerly applied to sulphur dioxide, or sulphurous anhydride, SO_2, but now applied to the compound of this substance with water, H_2SO_3. This is known only in the form of an aqueous solution, which is prepared by passing into water the gas evolved by the action of wood-charcoal on sulphuric acid. A saturated aqueous solution contains rather less than 20 per cent. by weight (69 parts by volume) of the gas at 0° C., and a little more than 10 per cent. by weight (about 36 parts by volume) at 20° C. The official solution of the U. S. Ph. contains about 3·5 per cent. of the gas, and has a sp. gr. of 1·022; that of the Br. Ph. has a sp. gr. of 1·04 and contains 7·5 per cent. of the gas. The solution is a colorless liquid of sulphurous odor, acid sulphurous taste, and strongly acid reaction. In composition s. a. acts as a dibasic acid, forming salts called sulphites. [B.]—**Anhydrous s. a., S.-a. gas.** Sulphur dioxide. [B.]

SULPHUR SPRING, n. Su^{3}l'u^{6}r. A place in Inyo County, California, where there is a gaseous and sulphurous spring. [Anderson (a, 14).]

SULPHURYL, n. Su^{3}lf'u^{2}r-i^{2}l. A bivalent radicle, SO_2'', contained in sulphuric acid, which may be regarded as s. dihydrate (dihydroxide), $SO_2{<}^{OH}_{OH}$. [B.]—**S. bromide.** A white crystalline substance, SO_2Br_2. [B, 3.]—**S. chloride.** A colorless liquid, SO_2Cl_2, of pungent odor, emitting fumes when exposed to the air, and decomposing on coming into contact with water. [B, 3; B, 270 (a, 38).]—**S. hydroxychloride.** Chlorosulphonic acid; so called because it may be regarded as s. combined with a molecule of hydroxyl and an atom of chlorine. [B.]

SULPHYDRATE, n. Su^{3}lf-id'rat. 1. See HYDROSULPHIDE. 2. A compound of a metal or radicle with the univalent radicle (SH)'; so called because such compounds were regarded as salts of sulphydric acid. [B.]

SULPHYDRIC ACID, n. Su^{3}lf-id'ri^{2}k. Lat., *acidum sulfhydricum* [Fr. Cod.]. Fr., *acide sulfhydrique.* Ger., *Schwefelwasserstoffsäure.* Sulphureted hydrogen, especially in aqueous solution. [B.]

SULPHYDRIN, n. Su^{3}lf-id'ri^{2}n. A compound of glycerin in which sulphydryl replaces hydroxyl. *Monosulphydrin* (*glyceryl thiodioxyhydrate*), $C_3H_5(SH)(OH)_2$, is a thick, colorless liquid which when warmed emits an exceedingly disagreeable odor. *Disulphydrin* (*q. v.*) and *trisulphydrin* (*thioglycerin*), $C_3H_5(SH)_3$, are also liquids. [B, 4.]

SULPHYDRYL, n. Sulf-id'ri^{2}l. A univalent radicle, SH'. [B.]

SULPHYPOSULFURIC, adj. Su^{3}lf-ip-o-su^{3}lf-u^{3}r'i^{2}k. See THIONIC.

SULZ (Ger.), n. Zults. 1. A place in the Black Forest district, Germany, where there is a saline spring. 2. A place in Eisenburg County, Hungary, where there is a gaseous and saline spring. [a, 14.]

SULZA (Ger.), n. Zults'a^3. A place in Saxe-Weimar, Germany, where there are bromine and iodine springs. [a, 14.]

SULZBACH (Ger.), n. Zults'ba^{3}ch^2. 1. A place in Baden, Germany, where there is a gaseous and saline spring. 2. A place in Alsace-Lorraine where there are gaseous and ferruginous springs.

SULZBAD (Ger.), n. Zults'ba^{3}d A place in Alsace-Lorraine where there are gaseous and saline springs. [L, 37, 49 (a, 14).]

SULZBRUNN (Ger.), n. Zults'brun. A climatic resort in Suabia where there are gaseous and saline springs. [L, 30, 57 (a, 14).]

SULZBURG (Ger.), n. Zults'burg. A place in Baden, Germany, where there is a saline spring. [L, 30, 37 (a, 14).]

SULZE (Ger.), **SÜLZE** (Ger.), n's. Zults'e^2, zu^{6}lts'e^2. See GELATINA (2d def.).—**Wharton'sche S.** See GELATIN *of Wharton.*

SULZMATT (Ger.), n. Zults'ma^{3}t. A place in Alsace-Lorraine where there are gaseous and alkaline springs. [L, 49, 57 (a, 14).]

SUMAC, n. Su^{2}m'a^{2}k. Lat., *s.* Fr., *s.* See SUMACH.—**Extrait liquide de fruit de s.** (Fr.). See *Extractum* RHOIS *glabræ fluidum* (under RHUS).—**Folia et baccæ** (seu **semina**) **s.** See under RHUS *coriaria.*—**S. à la gale** (Fr.). See RHUS *toxicodendron.*—**S. des corroyeurs** (Fr.). See RHUS *coriaria.*—**S. pernicieux** (Fr.). See RHUS *perniciosa.*

SUMACH, n. Su^{2}m'a^{2}k. Lat., *s., sumac. sumachus.* Fr., *sumac.* Ger., *S.* See RHUS (2d def.).—**American s.** See CÆSALPINIA *coriaria* and RHUS *typhina.*—**Dwarf s.** See RHUS *pumila.*—**Gifts'** (Ger.). **Poison s.** See RHUS *toxicodendron* and RHUS *venenata.*—**Scarlet s.** See RHUS *glabra.*—**Sweet s.** See RHUS *aromatica.*

SUMBUL, n. (treated as Lat. in the ph's). Sum'bul. From Ar. *s.*, an ear or spike. Fr., *racine de s., somboul.* Ger., *S'wurzel, Moschuswurzel.* Of the U. S. Ph., musk-root (the root of *Ferula s.*), found in commerce in light, spongy transverse sections, having a pleasant musk-like smell and a bitter balsamic taste; used chiefly as an antispasmodic and nervine. It contains a soft, translucent balsamic resin, soluble in ether; a volatile oil having the taste of peppermint; another resin soluble in alcohol; a bitter substance soluble in water and alcohol; angelic acid accompanied by a small amount of valerianic acid; wax; gum; and starch. S. is also the name of various other fragrant roots or rhizomes, especially Indian nard. [a, 35.]—**Bombay s.** The root of *Dorema ammoniacum.* [a, 24.]—**Tinctura s.** A tincture made by macerating 1 part of s. in No. 30 powder for a day with alcohol, then treating in a percolator with alcohol enough to make 10 parts of filtered percolate [U. S. Ph.]; by macerating 2½ oz. of s. in No. 40 powder for two days with alcohol, then treating in a percolator with enough more alcohol to obtain 20 fl. oz. of filtrate [Br. Ph.]; or by macerating s. with five times as much 70-per-cent. alcohol for five days [Russ. Ph.]. [B, 95 (a, 38).]—**Racine de s.** (Fr.), **Radix s., S. radix.** See *S.*

SUMBULIC ACID, n. Sum-bul'i^{2}k. Fr., *acide sumbulique.* Ger., *Sumbulsäure.* See ANGELIC *acid.*

SUMBULINE, n. Sum'bu^{2}l-i^{2}n. Fr., *s.* Ger., *Sumbulin.* An alkaloid obtained from sumbul; a whitish, semi-transparent, amber-like mass. [B, 18; B, 93 (a, 14).]

SUMBULOLIC ACID, n. Sum'bul-o^{2}l'i^{2}k. Fr., *acide sumbulolique.* Ger., *Sumbulolsäure.* See ANGELIC *acid.*

SUMEN (Lat.), n. n. Su^{2}m(sum)'e^{2}n. Gen., *sum'inis.* See HYPOGASTRIUM (1st def.).

SUMMATION, n. Su^{2}m-a'shu^{3}n. From *summare*, to sum up. Fr., *sommation.* Ger., *S., Summirung.* The production of tetanic contraction in a muscle by the combination of a number of single contractions. [K.]

SUMMEN (Ger.), n. Zum'me^{2}n. A buzzing or tingling.

SUMMITAS (Lat.), n. f. Su^{3}m(su^{4}m)'mi^{2}t-a^{2}s(a^{3}s). Gen., *-at'is.* A top or flowering top of a plant. [a, 35.]—**Summitates acetariæ.** The flowering tops of *Artemisia dracunculus.* [a, 35.]

SUMMIT MINERAL SPRING, n. Su^{3}m'i^{2}t. An alkaline spring at Harrison, Cumberland County, Maine. [A, 363 (a, 21).]

SUMMIT SODA SPRINGS, n. Chalybeate springs in Placer County, California. [A, 363 (a, 21).]

SUMMUS (Lat.), adj., superl. of *superus.* Su^{3}m(su^{4}m)'mu^{3}s-(mu^{4}s). Highest; as a n., the uppermost muscle of a group (cf. ARMI *s.*).

SUMPFBEERE (Ger.), n. Zumpf'bar-e^2. The *Vaccinium oxycoccos* and *Vaccinium uliginosum.* [B, 48 (a, 14); a, 35.]

SUMPFBEWOHNEND, SUMPFIG (Ger.), adj. Zumpf'be^2-von-e^{2}nd, -i^{2}g. See PALUDOSE.

SUMPFPORST (Ger.), n. Zumpf'po^{2}rst. See SEDUM *palustre.*

SUMPFSCHIRM (Ger.), n. Zumpf'sherm. The genus *Helosciadium.* [a, 35.]

SUMPFSILGE (Ger.), n. Zumpf'zi^{2}lg-e^2. The genus *Thysselinum.* [a, 35.]

SUMPFWURZ (Ger.), n. Zumpf'vurts. The genus *Epipactis.*

SUMPFZIEST (Ger.), n. Zumpf'tsest. See STACHYS *palustris.*

SUNBURN, n. Su^{3}n'bu^{5}rn. A popular term for chloasma caloricum and for erythema caloricum. [G.]

SUNFLOWER, n. Su^{3}n'flu^5-u^4-u^{5}r. The genus *Helianthus*, especially *Helianthus annuus*, also the *Chrysanthemum segetum, Inula helenium, Calendula officinalis*, etc. [a, 35.]—**S.-oil.** See under HELIANTHUS *annuus* and HELIANTHUS *perennis.*

SUN-ROSE, n. Su^{3}n'roz. See HELIANTHEMUM (1st def.).

SUNSTROKE, n. Su^{3}n'strok. Lat., *insolatio.* Fr., *coup de soleil.* Ger., *Sonnenstich.* A morbid state due to exposure to great solar heat. It is usually of sudden onset, though it may be preceded by dizziness or a sensation of fullness in the head. In mild attacks there are faintness, syncope, nausea, and vomiting, marked muscular weakness, rapid and feeble pulse, and pyrexia. In severe cases there are loss of consciousness, a tense and irregular pulse, quickened or stertorous respiration, hyperpyrexia, and death from interference with the medullary centres. [a, 34.] Cf. INSOLATION.

SUPELLECTILE DIOGENIS (Lat.), n. n. Su2p(su4p)-e2l-le2kt'i2l-e(a) di(de)-o2j(o2g)'e2n-i2s. Gen., *-lect'ilis.* The palm of the hand. [A, 322 (α, 21).]

SUPERABDUCTION, n. Su2p-u5r-a2b-du3k'shu3n. From *super*, in excess, and *abductio*, abduction. Excessive abduction. [α, 34.] For various words in *Super-*, not here given, see the corresponding forms in *Supra-*.

SUPERALIMENTATION, n. Su2p-u5r-a2l-i2-me2nt-a'shu3n. From *super*, in excess, and *alimentum*, nourishment. Fr., *suralimentation.* Ger., *Uebernährung.* Of Debove, see *Forced* ALIMENTATION (2d def.).

SUPERAXILLAIRE (Fr.), adj. Su5p-e2r-a3x-el-la2r. See SUPRA-AXILLARY.

SUPERBINE, n. Su2p-u5rb'en. Ger., *Superbin.* A poisonous, amorphous alkaloid, $C_{52}H_{60}N_2O_{17}$, obtained from the bulb of *Gloriosa superba.* [B, 270 (α, 38).]

SUPERBUS (Lat.), adj. Su2p(su4p)-u5rb(e2rb)'u3s(u4s). From *super*, above. Fr., *superbe.* Proud, haughty ; as a n. m., of Leber, the rectus oculi superior muscle, so called because its action gives the face a haughty expression. [L, 41 (α, 14).]

SUPERCARBONAS (Lat.), n. m. Su2p(su4p)-u5r(e2r)-ka3rb-on'a2s(a3s). Gen., *-at'is.* See SUPERCARBONATE.—**Liquor supercarbonatis ammonici pyroleosi.** See *Liquor* AMMONII *carbonici pyro-oleosi.* — **Solutiosupercarbonatis natrici.** See *Liquor* SODÆ *effervescens.*—**S. ammonicus.** Ammonium sesquicarbonate. See under AMMONIUM *carbonate.*—**S. ammonicus pyroleosus.** See AMMONIUM *carbonicum pyro-oleosum.*

SUPERCARBONATE, n. Su2p-u5r-ka3rb'o2n-at. Lat., *supercarbonas.* Fr., *surcarbonate.* See BICARBONATE.

SUPERCHLORIDUM (Lat.), n. n. Su2p(su4p)-u5r(e2r)-klor-(ch2lor)'i2d-u3m(u4m). See PERCHLORIDE.

SUPERCILIARIS (Lat.), n. m. Su2p(su4p)-u5r(e2r)-si2l(ki2l)-i2-ar(a3r)'i2s. Fr., *surcilier.* See CORRUGATOR *supercilii.*

SUPERCILIUM (Lat.), n. n. Su2p(su4p)-u5r(e2r)-si2l(ki2l)'i2-u3m(u4m). From *super*, above, and *cilium*, an eyelid or eyelash. Fr., *sourcil.* Ger., *Augenbraue.* The eyebrow ; an arched eminence of integument which surmounts the upper border of the orbit and supports numerous short, thick hairs, directed obliquely to the surface. It consists of thickened integument connected beneath with the orbicularis palpebrarum, corrugator supercilii, and occipitofrontalis. [F.]—**S. acetabuli.** The lip or elevated margin of the acetabulum. [L.]

SUPERCOSTALES (Lat.), n. m. pl. Su2p(su4p)-u5r(e2r)-ko2st-al(a3l)'ez(as). From *super*, above, and *costa*, a rib. See TRANSVERSOCOSTALES.

SUPERDISTENTION, n. Su2p-u5r-di2s-te2n'shu3n. From *super*, in excess, and *distentio*, a stretching out. Excessive distention. [α, 34.]

SUPEREXTENSION, n. Su2p-u5r-e2x-te2n'shun. From *super*, in excess, and *extensio*, a stretching. Excessive extension. [α, 34.]

SUPER-FAMILY, n. Su2p-u5r-fa2m'i2l-i2. From *super*, above, and *familia*, a family. A group containing one or more families, yet not of ordinal rank. [L, 343.]

SUPERFECUNDATION, n. Su2p-u5r-fe2k-u3nd-a'shu3n. Lat., *superfœcundatio* (from *super*, in excess, and *fœcundare*, to make fruitful). Fr., *superfécondation, super-imprégnation.* Ger., *Ueberschwängerung.* The fecundation of more than one ovule of the same ovulation as the result of separate acts of coitus with one or more males. [A, 61.] Cf. SUPERFŒTATION.

SUPERFIBRINATION, n. Su2p-u5r-fib-ri2n-a'shu3n. From *super*, in excess, and *fibrina*, fibrin. See HYPERINOSIS (2d def.).

SUPERFICIALIS (Lat.), adj. Su2p(su4p)-u5r(e2r)-fi2s(fi2k)-i2-al(a3l)'i2s. Superficial ; as a n., in the m. or f., an organ situated on or close to the surface. [α, 48.]—**S. colli.** See PLATYSMA *myoides.*—**S. costarum.** See LUMBOCOSTALIS, n.

SUPERFICIES (Lat.), n. f. Su2p(su4p)-u5r(e2r)-fi2'shi2(ki2)-ez-(as). Gen., *-e'i.* From *super*, above, and *facies*, a face. Fr., *superficie.* See SURFACE.—**S. articularis arytænoidea.** The surface upon the cricoid cartilage for articulation with the arytænoid cartilage. [L, 34.]—**S. articularis externa.** See *S. articularis thyreoidea.*—**S. articularis fibularis (lateralis).** A rounded or triangular articular surface on the tibia for articulation with the fibula. [L.]—**S. articularis superior.** See *S. articularis arytænoidea.*—**S. articularis thyreoidea.** A depression on the cricoid cartilage for articulation with the thyreoid cartilage. [L, 31.]—**S. auricularis.** Fr., *face* (ou *facette*) *auriculaire.* 1. The ear-shaped area by which the sacrum articulates with the ilium. 2. The corresponding area of the ilium.—**S. cardiaca.** The inner surface of the lung. [L.]—**S. convexa. S. costalis.** The outer surface of the lung. [L.]—**S. diaphragmatica.** The lower surface of the lung. [L.]—**S. externa.** See *S. convexa.*—**S. inferior.** See *S. diaphragmatica.*—**S. mediastinalis.** See *S. cardiaca.*—**S. lunata (ossis coxæ).** That part of the acetabulum that is covered with cartilage. [L, 31 (α, 50).]—**S. lunata radii.** The sigmoid cavity of the radius. [L.]—**S. peronea.** See *S. articularis lateralis.*—**S. petro-occipitalis (ossis temporis).** The deepened surface covered with cartilage, between the pyramidal portion of the temporal bone and the occipital bone. [L.]—**S. symphyseos pubis.** The surface of the horizontal ramus of the os pubis where it unites with its fellow of the opposite side in the symphysis. [L, 332.]

SUPERFLEXION, n. Su2p-u5r-fle2k'shu3n. From *super*, in excess, and *flexio*, a bending. Excessive flexion. [α, 34.]

SUPERFŒTATION, n. Su2p-u5r-fe2t-a'shu3n. Written, also, *superfetation.* Lat., *superfœtatio* (from *super*, in excess, and *fœtus* [*q. v.*]). Fr., *superfétation.* Ger., *Ueberfruchtung, Nachempfängniss.* The supposed fecundation (now held to be impossible) of an ovule proceeding from one ovulation while a fecundated ovum proceeding from a previous ovulation is still in course of utero-gestation. [A, 61.] Cf. SUPERFECUNDATION.

SUPERFUSIO (Lat.), n. f. Su2p(su4p)-u5r(e2r)-fu2(fu)'zhi2-(si2)-o. Gen., *-on'is.* From *super*, in excess, and *fusio*, a pouring out. See SUFFUSION.—**Fellis s.** Jaundice.

SUPERGENUAL, adj. Su2p-u5r-je2n'u2-'l. Lat., *supergenualis* (from *super*, above, and *genu*, the knee). Situated above the knee. [α, 48.]

SUPÉRIEUR (Fr.), adj. Su5p-a-re-u5r. See SUPERIOR.—**S. de l'oreille.** See ATTOLLENS *aurem.*

SUPERIMPOSED, adj. Su2p-u5r-i2m-pozd'. Lat., *superimpositus* (from *superimponere*, to place upon). Fr., *surimposé.* Ger., *übereinandergestellt.* Placed one above the other. [α, 35.]

SUPERINVOLUTION, n. Su2p-u5r-i2n-vo2l-u2'shu3n. From *super*, in excess, and *involutio*, a rolling up. See HYPERINVOLUTION.

SUPERIOR, adj. Su2p-er'i2-o2r. Lat., *s.* (comp. of *superus*) [1st def.], *superus* (2d and 3d def's). Fr., *supère, supérieur.* Ger., *obere* (1st def.), *oberständig* (2d def.). 1. Situated on the upper portion of a part or organ ; situated on the side next the axis. 2. Placed above another organ ; of floral organs, epigynous ; of an ovary, not at all adherent to the calyx. [α, 35.] 3. As a Lat. n. m., a muscle occupying a relatively high position. [α, 48.]—**Half-s.** Lat., *semisuperus.* Ger., *halboberständig.* Partially superior (said of the floral whorls when the ovary is half-inferior). [α, 35.]—**S. auriculæ, S. auris.** See ATTOLLENS *aurem.*—**S. mallei.** See LAXATOR *tympani minor.*

SUPERLACTATION, n. Su2p-u5r-la2kt-a'shu3n. From *super*, in excess, and *lactare*, to give suck. Excessive lactation.

SUPERLIGAMEN (Lat.), n. n. Su2p(su4p)-u5r(e2r)-li2g-a(a3)'-me2n. Gen., *-ami'nis.* From *super*, above, and *ligare*, to bind. See EPIDESMUS.

SUPERLIGULA (Lat.), n. f. Su2p(su4p)-u5r(e2r)-li2g'u2l(u4l)-a3. From *super*, above, and *ligula* (*q. v.*). See EPIGLOTTIS (1st def.).

SUPERMAXILLOLABIALIS (Lat.), n. m. Su2p(su4p)-u5r-(e2r)-ma2x(ma3x)-i2l''lo(lo3)-lab(la3b)-i2-al(a3l)'i2s. From *super*, above, *maxilla*, the jaw, and *labium*, the lip. Fr., *surmaxillo-labial, sus-maxillo-labial.* The analogue of the levator labii superioris proprius of man found in most of the lower mammals. [L.]

SUPERMAXILLONASALIS (Lat.), n. m. Su2p(su4p)-u5r(e2r)-ma2x(ma3x)-i2l''lo(lo3)-na2s(na3s)-al(a3l)'is. From *super*, above, *maxilla*, the jaw, and *nasus*, the nose. Fr., *sus-maxillo-nasal.* Ger., *grosser* (oder *pyramidenförmiger*) *Kiefer der Nase.* Connected with the nose and upper jaw ; as a n., a muscle so connected. [L.]—**S. magnus.** 1. See DILATATOR *naris lateralis.* 2. The analogue of the levator anguli oris in man found in most of the lower mammals. [L.]—**S. parvus.** A small muscle of the lower mammals, arising from the supermaxillary bone or the internal face of the supernasolabialis, and inserted into the skin of the false nostril and into the inferior turbinated bone. It dilates the nostril. [L, 13.]

SUPERNASOLABIALIS (Lat.), n. m. Su2p(su4p)-u5r(e2r)-nas(na3s)''o(o3)-lab(la3b)-i2-al(a3l)'i2s. From *super*, above, *nasus*, the nose, and *labium*, the lip. Fr., *sus-naso-labial.* The analogue of the levator labii superioris alæque nasi of man found in most of the lower mammals. [L.]

SUPERNIDATION, n. Su2p-u5r-ni2d-a'shu3n. From *super*, in excess, and *nidus*, a nest. See HYPERNIDATION.

SUPERNUTRITION, n. Su2p-u5r-nu2t-ri2'shu3n. From *super*, in excess, and *nutrire*, to nourish. See HYPERTROPHY.

SUPER-ORDER, n. Su2p-u5r-o2rd'u5r. From *super*, above, and *ordo*, an order. A group containing one or more orders, yet not of the taxonomic rank of a class. [L, 343.]

SUPEROXALAS (Lat.), n. m. Su2p(su4p)-u5r(e2r)-o2x'a2l(a3l)-a2s(a3s). Gen., *-at'is.* See SUPEROXALATE.—**S. kalicus, S. potassicus.** See POTASSIUM *binoxalate.*

SUPEROXALATE, n. Su2p-u5r-o2x'a2l-at. Lat., *superoxalas.* Fr., *suroxalate.* An acid oxalate. [B.]

SUPEROXIDIZED, adj. Su2p-u5r-o2x'i2d-izd. Fr., *sur-oxygené.* Containing an excess of oxygen (said of certain bodies which contain more oxygen united with other elements than the ordinary combining capacities of those elements will allow of). [C. A. Cameron, "Dublin Jour. of Med. Sci.," June, 1882 (B).]

SUPEROXYDUM (Lat.), n. n. Su2p(su4p)-u5r(e2r)-o2x'i2d(u6d)-u3m(u4m). Fr., *suroxyde.* See PEROXIDE.—**S. manganicum.** See MANGANESE *dioxide.*—**S. plumbosum.** See *Red* LEAD *oxide.*

SUPEROXYGENATED, adj. Su2p-u5r-o2x'i2-je2n-at-e2d. See SUPEROXIDIZED.

SUPERPHOSPHATE, n. Su2p-u5r-fo2s'fat. A dihydric phosphate. [B.]

SUPERPOSED, adj. Su2p-u5r-pozd'. Lat., *superpositus* (from *superponere*, to place over). Fr., *superposé, surposé.* Ger., *obenstehend, darübergestellt.* Placed above another ; of a member of a flower, placed vertically over another member. [α, 35.]

SUPERPOSITION, n. Su2p-u5r-po2z-i2'shu3n. Lat., *superpositio* (from *superponere*, to place over). Ger., *Uebergreifen.* 1. See CHEVAUCHEMENT. 2. The opposition of successive flower-whorls normally alternate. [α, 35.]

SUPERPUBIOFEMORALIS (Lat.), n. m. Su2p(su4p)-u5r-(e2r)-pu2b(pub)-i2-o(o3)-fe2m-o2r-al(a3l)'i2s. From *super*, above, *pubes* (*q. v.*), and *femur* (*q. v.*). Fr., *sus-pubio-fémoral.* In solipeds, a muscle representing the pectineus and adductor femoris brevis of man. [L, 13.]

SUPERSALT, n. Su^{2}p'u^{5}r-sa^{4}lt. From *super*, in excess, and *sal*, salt. Fr., *sursel.* A salt containing an excess of acid.

SUPERSATURATED, adj. Su^{2}p-u^{5}r-sa^{2}t'u^{2}r-at-e^{2}d. From *super*, in excess, and *saturare*, to saturate. Fr., *sursaturé.* More than saturated (said of certain solutions, *e. g.*, a solution of sodium sulphate, which contain, as the result of dissolving by heat and subsequent cooling, more of a given substance than they are capable of dissolving at an ordinary temperature). [*a*, 38.]

SUPERSATURATION, n. Su^{2}p-u^{5}r-sa^{2}t u^{2}r-a'shu^{3}n. From *super*, in excess, and *saturatio*, a filling. Fr., *sursaturation.* The process or state of being supersaturated. [*a*, 38.]

SUPERSECRETION, n. Su^{2}p-u^{5}r-se-kre'shu^{3}n. From *super*, in excess, and *secernere*, to separate. Fr., *supersécrétion.* Excessive secretion. [*a*, 34.]

SUPERSPINALIS (Lat.), n. m. Su^{2}p(su^{4}p)-u^{5}r(e^{2}r)-spin(spen)-al(a^{3}l)'i^{2}s. From *super*, above, and *spina*, the spine. See Spinalis *cervicis.*—**S. colli.** See *S.*

SUPERSPINATUS (Lat.), n. m. Su^{2}p(su^{4}p)-u^{5}r(e^{2}r)-spin(spen)-at(a^{3}t)'u^{3}s(u^{4}s). From *super*, above, and *spina*, the spine. A muscle of solipeds and other domesticated animals, arising from the cartilaginous prolongation of the scapula and the subscapular fossa, and attached by two heads, one going to the external tubercle and the other to the internal tuberosity of the humerus. It is an extensor of the humerus, and has no exact analogue in man. [L, 13.]

SUPERSTIBIAS (Lat.), n. m. Su^{2}p(su^{4}p)-u^{5}r(e^{2}r)-sti^{2}b'i^2-a^{2}s-(a^{3}s). Gen., *-at'is.* An acid antimonate. [B.]—**S. potassicus.** 1. Potassium antimonate. [B, 92.] 2. Of the Fr. Cod., see Antimonium *diaphoreticum totum.*

SUPERTENSION, n. Su^{2}p-u^{5}r-te^{2}n'shu^{3}n. From *super*, in excess, and *tensio*, a stretching. Excessive tension. [*a*, 34.]

SUPERVACUATION, n. Su^{2}p-u^{5}r-va^{2}k-u^2-a'shu^{3}n. From *super*, in excess, and *vacuare*, to make empty. See Hypercrisis (1st def.).

SUPERVOLUTE, SUPERVOLUTIVE, adj's. Su^{2}p-u^{5}r-vo^{2}l-u^{2}t', -vo^{2}l'u^{2}t-i^{2}v. Lat., *supervolutus*, *supervolutivus* (from *supervolvere*, to roll over). Fr., *supervolutif.* Ger., *übergerollt*, *übereinandergerollt.* Of plaits, convolute. [*a*, 35.] See *S.* Æstivation.

SUPERVOMITUS (Lat.), n. m. Su^{2}p(su^{4}p)-u^{5}r(e^{2}r)-vo^{2}m-(wo^{2}m)'i^{2}t-u^{3}s(u^{4}s). Gen., *-vom'itus.* From *super*, in excess, and *vomitus*, a vomiting. See Hyperemesis.

SUPIER (Fr.), n. Su^6-pe-a. See Sambucus *niger.*

SUPINATION, n. Su^{2}p-i^{2}n-a'shu^{3}n. Gr., ὑπτιότης. Lat., *supinatio* (from *supinare*, to bend backward). Fr., *s.* Ger., *Zurückdrehung.* 1. That posture of the body in which, while it is recumbent, the face looks upward ; of the hand, that posture in which the palm is directed upward. 2. The act of assuming or producing such a posture.

SUPINATOR (Lat.), n. m. Su^{2}p(su^{4}p)-i^{2}n(en)-at(a^{3}t)'o^{2}r. Gen., *-or'is.* Fr., *supinateur.* Ger., *Rücklingswender*, *Rückwärtsdreher*, *Rückwärtswender.* A muscle that effects or assists in supination of the forearm. [L, 343.]—**S. brevis.** See *S. radii brevis.*—**S. brevis accessorius.** See Brachiofascialis.—**S. longus.** See *S. radii longus.*—**S. longus accessorius.** An offshoot of the s. longus inserted independently into the radius or occasionally into the ulna. [L, 332.]—**S. radii brevis.** Ger., *kurzer Rückwärtsdreher.* A muscle which arises from the outer and lower portion of the ulna and the adjacent ligaments and, after passing around the upper portion of the radius, is inserted into the outer and palmar surfaces of that bone in its middle third. [L, 31, 142, 332.]—**S. radii longus.** Fr., *élévateur épicondylo-radial.* Ger., *langer Rückwärtswender*, *Armspeichenmuskel.* A muscle arising from the external supracondylar ridge of the humerus and inserted into the lower end of the radius near the styloid process. [L, 31, 142, 332.]—**S. superior.** See *Biceps* flexor *cubiti.*

SUPINE, adj. Su^{2}p-in'. Gr., ὕπτιος. Lat., *supinus.* Ger., *rücklingsgelegt.* 1. Of a part or organ, lying flat with face upward. 2. Procumbent. [*a*, 35.]

SUPPLÉANCE (Fr.), n. Su^{6}p-pla-a^{3}n^{2}s. Performance of the function of an organ by a different organ. [*a*, 18.]

SUPPORT, n. Su^{3}p-port'. From *sub*, under, and *portare*, to carry. Gr., ὑπόστασις. Lat., *sustentaculum.* Fr., *soutien.* Ger., *Erhaltung*, *Unterstützung.* 1. The act of holding anything up in its place. 2. Anything acting as a supporter. [*a*, 48.]—**S. of the perinæum.** Fr., *soutien du périnée.* Ger., *Unterstützung des Dammes* (oder *des Mittelfleisches*). The act or process of supporting the perinæum with the hand during the expulsion of the fœtal head, to prevent or moderate its laceration.

SUPPORTER, n. Su^{3}p-port'u^{5}r. Lat., *sustentator.* Fr., *supporteur.* That by means of which anything is supported or held up in its place. [*a*, 48.]—**Abdominal s.** See *Abdominal* belt.—**Hypogastric s.** See *Hypogastric* belt.—**Pile s., Prolapsus ani s.** A pad worn over the anus and strapped over the perinæum and around the waist. [E.]—**Trousseau's pile s.** A pear-shaped plug with a handle, which is passed into the rectum. [E.]

SUPPOSITOR, n. Su^{3}p-po^{2}z'i^{2}t-o^{2}r. From *supponere*, to place under. An instrument for putting suppositories high into the rectum. [A. B. Taylor, "Am. Jour. of Pharm.," xxxiii, p. 202 (B).]

SUPPOSITORY, n. Su^{3}p-po^{2}z'i^{2}t-or-i^2. Gr., πεσσός. Lat., *suppositorium*, *suppositorius.* Fr., *suppositoire.* Ger., *Suppositorium*, *Stuhlzäpfchen*, *Stechpille.* A preparation designed for introduction into the rectum, urethra, vagina, etc., consisting of a medicinal substance incorporated with an absorbable solid excipient which softens at the temperature of the body. This is usually cacao butter (with soap or tallow [Fr. Cod.] or with a mixture of beef tallow and wax [Russ. Ph.]). The s. is generally molded into a conical (sometimes a cylindrical or spherical) shape. [B, 5, 95 (*a*, 38).]—**Mercurial suppositories.** See *Suppositoria* hydrargyri.

SUPPRESSION, n. Su^{3}p-pre^{2}sh'u^{3}n. Gr., ὑπόστασις (3d def.). Lat., *suppressio* (from *supprimere*, to press down). Fr., *s.* 1. In botany, the non-appearance of organs normally present. [*a*, 35.] 2. Repression of the outward manifestations of a morbid condition. 3. The discontinuance of the formation of discharges, especially of secretions or of the menses. [A, 326 (*a*, 21).]—**S. of the menses.** 1. That variety of amenorrhœa in which menstruation, after having once been established, ceases from some other cause than impregnation or the climacteric. 2. Suspension of menstruation from pregnancy.—**S. of urine.** A condition in which the secretion of urine is interfered with in consequence of renal disorder. [*a*, 34.]

SUPPRESSION (Fr.), n. Su^{6}p-pre^{2}s-e-o^{2}n^2. 1. See Suppression (Eng.). 2. The discontinuance of the use of a therapeutical measure.

SUPPURATING, adj. Su^{3}p'u^{2}r-at-i^{2}n^2. Lat., *suppurans.* Fr., *suppurant.* Ger., *eiternd.* See Purulent.

SUPPURATION, n. Su^{3}p-u^{2}r-a'shu^{3}n. Gr., ἐμπύη, ἐμπύημα, ἐμπύησις. Lat., *suppuratio* (from *suppurare*, to form pus). Fr., *s.* Ger., *Eiterung.* The process by which the leucocytes and embryonal cells of an inflammatory product are converted into pus corpuscles. [*a*, 34.]—**Blue s.** S. caused by the *Bacillus pyocyaneus.* [*a*, 34.]—**Follicular s.** S. limited to a mucous follicle. [*a*, 34.]—**Orange s.** Fr., *s. orangée.* Of Verneuil, s. in which the pus is orange-colored. [*a*, 34.]

SUPPURATIVE, adj. Su^{3}p'u^{2}r-at-i^{2}v. Lat., *suppurans.* Fr., *suppuratif.* Ger., *eiterig*, *suppurativ.* 1. Pertaining to suppuration. 2. See Purulent. 3. Promoting suppuration. [*a*, 17.]

SUPRA-ACROMIAL, adj. Su^{2}p-ra^3-a^{2}k-rom'i^2-'l. From *supra*, above, and *acromion* (*q. v.*). Situated above the acromion.

SUPRA-ACROMIO-TROCHITERIUS [Girard] (Lat.), n. m. Su^{2}p(sup)-ra^3-a^{2}k(a^{3}k)-rom''i^2-o(o^3)-trok(tro^{2}ch^2)-i^{2}t-e(a)'ri^2-u^{3}s-(u^{4}s). For deriv., see *Supra-**, Acromion, and Trochiter. See Superspinatus.

SUPRA-AURICULAR, adj. Su^{2}p-ra^3-a^{4}r-i^{2}k'u^{2}l-a^{3}r. From *supra*, above, and *auricula*, the external ear. Ger., *s.-a.* Situated above the ear. [*a*, 48.]

SUPRA-AXILLARY, adj. Su^{2}p-ra^3-a^{2}x'i^{2}l-ar-i^2. Lat., *supra-axillaris* (from *supra*, above, and *axilla* [*q. v.*]). Fr., *suraxillaire*, *superaxiliaire.* Ger., *oberwinkelständig.* Situated above the upper angle formed by the leaf with the stem. [*a*, 35.]

SUPRACHORIOIDAL, adj. Su^{2}p-ra^3-kor-i^2-oi'd'l. From *supra*, above, and χοριοειδής (see Chorioid). Situated above the chorioid plexus or the chorioid. [*a*, 48.]

SUPRACHORIOIDEA (Lat.), n. f. Su^{2}p(sup)-ra^3-kor(ch^{2}o^{2}r)-i-o(o^2)-i^{2}d(ed)'e^2-a^3. See Lamina *s.*

SUPRACILIARBOGEN (Ger.), n. Zup-ra^3-tsel-e-a^{3}r'bog-e^{2}n. See *Supraciliary* ridges.

SUPRACILIARY, adj. Su^{2}p-ra^3-si^{2}l'i^2-ar-i^2. From *supra*, above, and *cilium*, the eyelid. Fr., *sourcilier.* Ger., *supraciliar.* Situated above the eyebrows.

SUPRACLAVICLE, n. Su^{2}p-ra^3-kla^{2}v'i^2-k'l. From *supra*, above, and *clavicula*, the clavicle. See *Supraclavicular* bone.

SUPRACLAVICULAR, adj. Su^{2}p-ra^3-kla^{2}v-i^{2}k'u^{2}l-a^{3}r. Lat., *supraclavicularis.* Fr., *sus-claviculaire.* Situated above the clavicle. [L, 41 (*a*, 14).]

SUPRACLAVICULARIS (Lat.), adj. Su^{2}p(sup)-ra^3-kla^2-(kla^3)-vi^{2}k(wi^{2}k)-u^{2}l(u^{4}l)-a(a^3)'ri^{2}s. See *Supraclavicular* ; as a n., see Sternoclavicularis *superior.*—**S. medialis, S. medius.** See Sternoclavicularis *superior.*—**S. proprius.** An anomalous muscle extending between the sternal and scapular extremities of the clavicle. [L. 332.]

SUPRA-COMPOUND, adj. Su^{2}p-ra^3-ko^{2}m-pu^5'u^{4}nd. Lat., *supracompositus* (from *supra*, above, and *componere*, to put together). Fr., *surcomposé.* Of a compound leaf, having the petiole divided several times. [*a*, 35.] Cf. Supra-decompound and Decomposite.

SUPRACONDYLAR, SUPRACONDYLOID, adj's. Su^{2}p-ra^3-ko^{2}nd'i^{2}l-a^{3}r, -oid. From *supra*, above, κόνδυλος, a knuckle, and εἶδος, resemblance. Above the condyles.

SUPRACONSTRICTOR [Coues] (Lat.), n. m. Su^{2}p(sup)-ra^3-ko^{2}n(kon)-stri^{2}kt(strek)'o^{2}r. Gen., *-or'is.* From *supra*, above, and *constringere*, to draw together. See *Superior* constrictor *of the pharynx.*

SUPRACOSTAL, adj. Su^{2}p-ra^3-ko^{2}s't'l. Lat., *supracostalis* (from *supra*, above, and *costa*, a rib). Fr., *surcostal.* Situated above the ribs or above a rib. [*a*, 48.]

SUPRACOSTALIS (Lat.), adj. Su^{2}p(sup)-ra^3-ko^{2}st-al(a^{3}l)'i^{2}s. See Supracostal ; as a n., in the pl., *supracostales*, see Levatores *costarum breves* and Levatores *costarum longi.*—**S. profundus.** An anomalous muscle extending from the outer surface of one rib to that of one some distance below it. [L, 332.]

SUPRA-DECOMPOUND, SUPRA-DECOMPOSITE, adj's. Su^{2}p-ra^3-de-ko^{2}m-pu^5'u^{4}nd, -po^{2}z'i^{2}t. Lat., *supra-decompositus* (from *supra*, above, *de*, from, and *componere*, to put together). Fr., *surdécomposé.* Ger., *vielfach-zusammengesetzt.* Of a decompound leaf, having an indefinite number of subdivisions.

SUPRADIAPHRAGMATIC, adj. Su^{2}p-ra^3-di-a^3-fra^{2}g-ma^{2}t'-i^{2}k. From *supra*, above, and *diaphragma*, the diaphragm. Fr., *susdiaphragmatique.* Situated above the diaphragm. [L, 13.]

SUPRA-FASTIGIATE, adj. Su^{2}p-ra^3-fa^{2}s-ti^{2}j'i^2-at. Lat., *suprafastigiatus* (from *supra*, above, and *fastigium*, the top of a gable). Ger., *übergipfelt.* Of a corymbose inflorescence, having the lower branches projecting not only beyond the upper branches, but beyond the apex of the primary axis. [*a*, 35.]

SUPRAFOLIACEOUS, adj. Su^{2}p-ra^3-fol-i^2-a'shu^{3}s. Lat., *suprafoliaceus* (from *supra*, above, and *folium*, a leaf). Situated above a leaf. [a, 35.]

SUPRAFOLIAR, adj. Su^{2}p-ra^3-fol'i^2-a^{3}r. From *supra*, above, and *folium*, a leaf. Growing upon a leaf. [a, 35.]

SUPRAGENUAL, adj. Su^{2}p-ra^3-je^{2}n'u^2-'l. From *supra*, above, and *genu*, the knee. Situated above the knee. [a, 48.]

SUPRAGLENOID, adj. Su^{2}p-ra^3-glen'oid. From *supra*, above, and γληνοειδής (see Glenoid). Situated above the glenoid cavity. [a, 48.]

SUPRAGLUTEAL, adj. Su^{2}p-ra^3-glu^2-te'a^{2}l. From *supra*, above, and γλουτός, the rump. Situated above the gluteal region.

SUPRAHYOID, adj. Su^{2}p-ra^3-hi'oid. From *supra*, above, and ὑοειδής, hyoid. Fr., *sus-hyoïdien*. Situated above the hyoid bone. [C.]

SUPRA-INGUINAL, adj. Su^{2}p-ra^3-i^{2}n^2'gwi^2-n'l. From *supra*, above, and *inguen*, the groin. Situated above the groin. [a, 48.]

SUPRALABIALIS [Coues] (Lat.), n. m. Su^{2}p(sup)-ra^3-lab-(la^{3}b)-i^2-al(a^{3}l)'i^{2}s. From *supra*, above, and *labium*, the lip. See Levator *labii superioris proprius*.

SUPRAMARGINAL, adj. Su^{2}p-ra^3-ma^{3}rj'i^{2}n'l. From *supra*, above, and *margo*, a margin. Situated above an edge or margin (said of a cerebral convolution or fissure). [L.]

SUPRAMAXILLARY, adj. Su^{2}p-ra^3-ma^{2}x'i^{2}l-ar-i^2. From *supra*, above, and *maxilla*, the jaw. Fr., *sus-maxillaire*. Ger., *supramaxillar*. Pertaining to the superior maxilla. [L, 41 (a, 14).]

SUPRA-OBLIQUUS [Coues] (Lat.), n. m. Su^{2}p(sup)-ra^3-o^{2}b-li-(le)'kwu^{3}s(kwu^{4}s). From *supra*, above, and *obliquus*, slanting. See Obliquus *oculi superior*.

SUPRA-OCCIPITAL, adj. Su^{2}p-ra^3-o^{2}k-si^{2}p'i^2-t'l. From *supra*, above, and *occiput* (*q. v.*). Situated above the occipital bone; as a n., the lower portion of the tabular part of the parietal bone. [C.]

SUPRA-OMPHALODYMIA (Lat.), n. f. Su^{2}p(sup)-ra^3-o^{2}mf-a^{2}l(a^{3}l)-o(o^3)-di^{2}m(du^{6}m)'i^2-a^3. From *supra*, above, ὀμφαλός, the navel, and δίδυμος, twin. See Thoracopagia.

SUPRA-ORBITAL, SUPRA-ORBITAR, adj's. Su^{2}p-ra^3-o^{2}rb'i^2-t'l, -ta^{3}r. Lat., *supraorbitalis* (from *supra*, above, and *orbita*, the orbit). Fr., *sus-orbitaire*. Situated above the orbit. [C.]

SUPRAPONTINE, adj. Su^{2}p-ra^3-po^{2}nt'i^{2}n. From *supra*, above, and *pons*, a bridge. Situated above the pons Varolii. [a, 48.]

SUPRAPUBIC, adj. Su^{2}p-ra^3-pu^{2}b'i^{2}k. From *supra*, above, and *pubes* (*q. v.*). Fr., *sus-pubien*. Situated above the pubes, affecting parts so situated. [a, 48.]

SUPRARECTUS [Coues] (Lat.), n. m. Su^{2}p(sup)-ra^3-re^{2}kt-(rakt)'u^{3}s(u^{4}s). From *supra*, above, and *rectus*, straight. See Rectus *oculi superior*.

SUPRARENAL, adj. Su^{2}p-ra^3-re'n'l. Lat., *suprarenalis* (from *supra*, above, and *ren*, the kidney). Fr., *surrénal*. 1. Situated above the kidney. 2. Pertaining to the s. capsule; as a n., the s. capsule.

SUPRARYGLOTTIDEUS [Coues] (Lat.), n. m. Su^{2}p(sup)-ra^{2}r(ra^{3}r)-i^2(u^6)-glo^{2}t(glot)-ti^{2}d'e^2-u^{3}s(u^{4}s). From *supra*, above, ἀρύταινα, a pitcher, γλωττίς, the glottis, and εἶδος, resemblance. See Arytæno-epiglottideus *superior*.

SUPRASCAPULA (Lat.), n. n. Su^{2}p(sup)-ra^3-ska^{2}p(ska^{3}p)'-u^{2}l(u^{4}l)-a^3. From *supra*, above, and *scapula*, the shoulder. Of Gegenbaur, the portion of the upper posterior portion of the scapula which arises from the centres of ossification distinct from those of the main portion of the bone. [L.]

SUPRASCAPULAR, adj. Su^{2}p-ra^3-ska^{2}p'u^{2}l-a^{3}r. From *supra*, above, and *scapula* (*q. v.*). Fr., *sus-scapulaire*. Situated above the scapula. [C.]

SUPRASCAPULARIS (Lat.), adj. Su^{2}p(sup)-ra^3-ska^{2}p(ska^{3}p)-u^{2}l(u^{4}l)-a(a^3)'ri^{2}s. See Suprascapular; as a n., see Supraspinatus.

SUPRASERRATUS [Coues] (Lat.), n. m. Su^{2}p(sup)-ra^3-se^{2}r-rat(ra^{3}t)'u^{3}s(u^{4}s). From *supra*, above, and *serra*, a saw. See Serratus *posticus superior*.

SUPRASPINAL, adj. Su^{2}p-ra^3-spi'n'l. Lat., *supraspinalis* (from *supra*, above, and *spina*, a spine). Fr., *sur-épineux*. Situated above or upon a spine or spinous process. [C.]

SUPRASPINATUS (Lat.), adj. Su^{2}p(sup)-ra^3-spin(spen)-at-(a^{3}t)'u^{3}s(u^{4}s). From *supra*, above, and *spina*, a spine. Supraspinal; as a n. (Ger., *Obergrätenmuskel*), a muscle which arises from the surface of the supraspinous fossa of the scapula and is inserted into the great tuberosity of the humerus. [L, 332.]

SUPRASPINOUS, adj. Su^{2}p-ra^3-spin'u^{3}s. See Supraspinal.

SUPRASTERNAL, adj. Su^{2}p-ra^3-stu^{6}r'n'l. Lat., *suprasternalis* (from *supra*, above, and *sternum* [*q. v.*]). Situated above the sternum. [a, 48.]

SUPRASTERNALIS (Lat.), adj. Su^{2}p(sup)-ra^3-stu^{6}rn(ste^{2}rn)-al(a^{3}l)'i^{2}s. See Suprasternal; as a n., see Sternalis.

SUPRATROCHLEAR, adj. Su^{2}p-ra^3-tro^{2}k'le^2-a^{3}r. From *supra*, above, and *trochlea* (*q. v.*). Situated above the trochlea.

SUPRAVAGINAL, adj. Su^{2}p-ra^3-va^{2}j'i^2-n'l. From *supra*, above, and *vagina* (*q. v.*). Fr., *sus-vaginal*. Situated above the vagina, affecting parts so situated. [a, 48.]

SURA (Lat.), n. f. Su^{2}r(sur)'a^3. 1. An old name for the calf of the leg. [L, 50 (a, 14).] 2. See Fibula.

SURAL, adj. Su^2'r'l. Lat., *suralis* (from *sura* [*q. v.*]). Fr., *s.* Pertaining to the sura. [C.]

SURALES (Lat.), n. m. pl. Su^{2}r(sur)-al(a^{3}l)'ez(e^{2}s). See Triceps *suræ*.

SURANAL (Fr.), adj. Su^{6}r-a^3-na^{3}l. Above the anus.

SURBANDE (Fr.), n. Su^{6}r-ba^{3}nd. An outer bandage to sustain a dressing. [L, 41 (a, 14).]

SURCILIER (Fr.), n. Su^{6}r-se-le-a. See Corrugator *supercilii*.

SURCINGLE, n. Su^{6}r'si^{2}n^2-g'l. For deriv., see *Sur-**, and Cingulum. The slender, loop-like prolongation of the corpus striatum described by Dalton as "running forward in the roof of the inferior horn of the ventricle, to reach the amygdala at the base of the brain." [I, 23 (K).]

SURCULATION, n. Su^{6}rk-u^{2}l-a'sh'n. From *surculus*, a sprout. Fr., *s.* Propagation by grafts or suckers. [a, 35.]

SURCULOSE, adj. Su^{6}rk'u^{2}l-os. Producing suckers (surculi). [Gray (a, 35).]

SURCULUS (Lat.), n. m. Su^{6}rk(su^{4}rk)'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Ger., *Pfropfreis* (1st def.), *Moosstengel* (3d def.), *Strünkchen* (3d def.). 1. A graft. 2. A sucker. 3. The stem of a moss or of a liverwort; also the creeping stem of a lycopod. [a, 35.]—**S. transversus.** A band of fibres that connects the two branches into which the processus medullaris divides after reaching the corpus striatum.

SURCURRENT, adj. Su^{6}r-ku^{6}r'nt. For deriv., see *Sur-**, and *currere*, to run. Running up upon a part (cf. Decurrent). [a, 48.]

SURDI-MUTISME (Fr.), **SURDI-MUTITÉ** (Fr.), n's. Su^{6}r-de-mu^6-tezm', -e-ta. See Deaf-*mutism*.

SURDITAS (Lat.), n. f. Su^{6}rd(su^{4}rd)'i^{2}t-a^{2}s(a^{3}s). Gen., *-tal'is*. From *surdus*, deaf. Fr., *surdité*. See Deafness.

SURDITÉ (Fr.), n. Su^{6}rd-et-a. See Deafness.—**S. paradoxale.** See Paracusis *Willisii*.—**S. verbale.** See *Word*-deafness.

SURDOMUTITAS (Lat.), n. f. Su^{6}rd(su^{4}rd)-o(o^3)-mu^{2}t(mut)'-i^{2}t-a^{2}s(a^{3}s). Gen., *-tat'is*. From *surdus*, deaf, and *mutitas*, dumbness. Fr., *surdo-mutité*. Ger., *Taubstummheit*. Deaf-mutism.

SURDUS (Lat.), adj. Su^{6}rd(su^{4}rd)'u^{3}s(u^{4}s). Fr., *sourd*. See Deaf.

SUREAU (Fr.), n. Su^{6}r-o. See Sambucus and *Fructus* sambuci.—**Eau de s., Eau distillée (de fleurs) de s.** See *Aqua* sambuci.—**Écorce de s.** See Elder-*bark*.—**Éléolé de s.** See *Oleum* sambuci.—**Fleurs de s.** See Elder-*flowers*.—**Fomentation avec la fleur de s.** Sp., *fomentación de flor de saúco*. A preparation made by pouring upon 30 grammes of elder-flowers enough boiling water to make a litre of infusion, to be filtered after standing an hour [Fr. Cod.]; or by pouring 345 parts of water upon 5 of elder-flowers and straining [Sp. Ph.]. [B, 95 (a, 38).]—**Grand s.** See Sambucus *nigra*.—**Huile de s.** See *Oleum* sambuci.—**Mellite de s.** See Diamoron.—**Miel de s.** See *Mel* sambuci.—**Petit s.** See Sambucus *ebulus*.—**Pommade de s.** See *Unguentum* sambuci.—**Suc d'écorce de s.** The reddish-brown, sweetish juice of the inner fleshy bark of fresh elder-roots; used as an emeto-cathartic in ascites. [B, 93 (a, 14).]—**Suc de s.** [Fr. Cod.]. Sp., *zumo de fruto de saúco* [Sp. Ph.]. The fermented and filtered juice of elder berries. Cf. *Succus* sambuci *inspissatus*.—**S. à grappes.** See Sambucus *racemosa*.—**S. commun.** See Sambucus *nigra*.—**S. d'eau.** The *Viburnum opulus*. [a, 35.]—**S. de montagne.** See Sambucus *racemosa*.—**S. du Canada.** See Sambucus *canadensis*.—**S. écorce** [Fr. Cod.]. The inner bark of *Sambucus nigra*. [a, 38.]—**S. en herbe, S. hièble.** See Sambucus *ebulis*.—**Tisane de s.** Sp., *infusión de flor de saúco*. A preparation made by infusing 2 parts of elder-flowers in 400 of boiling water for half an hour [Fr. Cod.] (in 345 of boiling water [Sp. Ph.]), and straining. [B, 95 (a, 38).]

SURELLE (Fr.), n. Su^{6}r-e^{2}l. 1. See Rumex *acetosa* and Rumex *acetosella*. 2. The *Oxalis acetosella* and other species of *Oxalis*. [a, 35.]

SURÉPINEUX (Fr.), adj. Su^{6}r-ap-en-u^6. See Supraspinous.

SURETTE (Fr.), n. Su^{6}r-e^{2}t. 1. The *Rumex acetosa*. 2. The *Oxalis acetosella*. [a, 35.]

SURFACE, n. Su^{6}r'fas. Gr., ἐπιφάνεια. Lat., *superficies*. Fr., *s.*, *superficie*. Ger., *Oberfläche*. The outside or limiting part of a solid body; hence the face or one of the faces of a body. [a, 35, 48.]—**Auricular s. (of the ilium or of the sacrum).** See Superficies *auricularis*.—**Demarcation s.** [Hermann]. The cut s. of a muscle, which is electro-negative to the uninjured portion of the muscle. [Landois (K).]—**Glenoid s.** See *Glenoid* cavity.—**Nasal s. (of the superior maxilla).** The s. of the superior maxilla that is directed toward the nose. [C.]—**Nuclear s.** An imaginary plane passing through the nuclear point, perpendicular to the visual direction. [F.]—**Orbital s. (of the superior maxilla).** The upper s. of the superior maxilla. [C.]—**Popliteal s. of the femur.** A triangular s. of the femur included between the internal and external supracondylar lines. It forms the floor of the upper part of the popliteal space. [C, 3.]—**Spheno-maxillary s.** The portion of the ala magna of the sphenoid bone that enters into the formation of the spheno-maxillary fossa. [L, 31.]—**Temporal s.** A somewhat flat surface on the parietal bone, bounded by the temporal line.

SURFEIT, n. Su^{6}r'fi^{2}t. From *super*, above, and *facere*, to make. Gr., πλῆθος, πλησμονή. Lat., *satietas*. Fr., *excès de table*. Ger., *Ueberladung*. Excess in eating or drinking; also, the condition of fullness and nausea occasioned thereby. [a, 48.]

SURGEON, n. Su^{6}r'ju^{3}n. Formerly spelled *chirurgeon* or *cheirurgeon*. Gr., χειρουργός (from χείρ, the hand, and ἔργον, work). Lat., *chirurgus*, *vulnerum medicus*. Fr., *chirurgien*. Ger., *Wundarzt*, *Chirurg*. One who practices surgery.—**S.-apothecary.** A medical practitioner that has passed the examinations of the Royal College of Surgeons and the London Apothecaries' Society. [a, 34.]—**S.-dentist.** An old term for a s. whose practice was limited to dentistry. [a, 34.]—**Veterinary s.** Fr., *vétérinaire*. Ger., *Thierarzt*. A s. who devotes himself to diseases of the domestic animals. [E.]

SURGERY, n. Su6rj'e2r-i2. Gr., χειρουργία. Lat., *chirurgia.* Fr., *chirurgie.* Ger., *Chirurgie.* 1. That department of medicine which deals with operative or manipulative treatment. 2. As used in Great Britain, a place in which a surgeon does minor operations and dispenses medicines.—**Anaplastic s.** See *Plastic s.*—**Antiseptic s.** S. practiced in accordance with antiseptic methods. [D, 87.]—**Conservative s.** S. which looks to the preservation of a part rather than its removal. [E.]—**Military s.** Fr., *chirurgie d'armée.* Ger., *Kriegschirurgie.* The s. which deals especially with the injuries received in war. [E.]—**Minor s.** S. which deals with minor operations and the dressing of wounds. [E.]—**Operative s.** S. which has to do with the performance of operations. [E.]—**Orthopædic s.** Fr., *orthopédie.* Ger., *Orthopädik.* That branch of s. that deals with the prevention and the mechanical and operative treatment of deformities. [a, 34.]—**Plastic s.** S. which effects the restoration of parts that have been lost or destroyed. [E.]—**Railway s.** The s. of those injured on railroads.—**Subcutaneous s.** S. in which the operation is performed beneath the skin, the instruments being introduced through a small cutaneous incision. [a, 34.]—**Veterinary s.** Fr., *chirurgie vétérinaire.* The s. of the domestic animals. [a, 34.]

SURGICAL, adj. Su6rj'i2-k'l. Gr., χειρουργικός. Lat., *chirurgicus.* Fr., *chirurgique, chirurgical.* Ger., *chirurgisch, wundärztlich.* Pertaining to, effected by, calling for, or due to surgery; in accordance with the rules of surgery.

SURHYDROSULFUROHYPOSULFITE (Fr.), n. Su6r-ed-ro-su6lf-u6r-o-ep-o-su6lf-et. A compound of hyposulphurous and hydrosulphuric acid containing an excess of sulphur. [B.]

SURINAMINE, n. Su5r-i2n'a2m-en. An alkaloid obtained from the bark of *Andira retusa.* [B, 270 (a, 38).]

SURLANGUE (Fr.), n. Su6r-la3n2g. Acute glossitis in domestic animals. [L, 41 (a, 14).]

SURLARYNGIEN (Fr.), adj. Su6r-la3r-a2n2-zhe-a3n2. See Epilaryngeus.

SURMENAGE (Fr.), n. Su6r-m'-na3zh. 1. Over-strain; exhaustion from over-exertion. 2. The state of exhaustion observed in domestic animals as the result of tedious parturition. [A, 15.]—**S. intellectuel.** An over-taxed state of the brain in school-children. ["Gaz. hebd. de méd. et de chir.," Apr. 30, 1886, p. 285.]

SURMÈNEMENT (Fr.), n. Su6r-me2n-ma3n2. Over-strain.

SUROS (Fr.), n. Su6r-o. An exostosis. [L, 41 (a, 14).]

SUROXIDE (Fr.), n. Su6r-ox-ed. See Peroxide.—**S. plumbique.** See *Red* lead *oxide.*

SUROXYGÉNÈSE (Fr.), n. Su6r-ox-e-zha-ne2z. An old term for a disease attributed to a superabundance of oxygen in the system. [L, 41 (a, 14).]

SURPEAU (Fr.), n. Su6r-po. See Epidermis.

SURPOSÉ (Fr.), adj. Su6r-po-za. See Superposed.

SURPRISE, n. Su6r-priz'. From *super,* over, and *prehendere,* to lay hold of. The feeling excited by an unexpected occurrence. [a, 48.]—**Cerebral s.** Of Trousseau, the stupor that occurs on the recovery of consciousness after cerebral hæmorrhage. [a, 34.]

SURRA, n. In India, a form of anæmia in animals, caused by *Ankylostoma* or some other parasite. [a, 34.]

SURSEL (Fr.), n. Su6r-se2l. See Supersalt.

SURSUMDUCTION, n. Su6r-su3m-du3k'shu3n. From *sursum,* upward, and *ducere,* to lead. The degree to which one eye can be carried above the other by voluntary effort; denoted as *right* or *left s.* according as the right or left eye is made the higher. [B.]

SUS (Lat.), n. com. Su3s(sus). Gen., *su'is.* Gr., ὗς. The typical genus of the *Suidæ,* or swine family. [a, 48.]—**S. scrofa.** A genus of the *Suidæ.* [L.]—**Vulva suis.** A sow's vulva; used formerly for incontinence of urine. [B, 117.]

SUS-ACROMIAL (Fr.), adj. Su6z-a3-kro-me-a3l. See Supra-acromial. For various words in *Sus-,* not here given, see the analogous forms under *Supra-, Super-, Sur-,* and *Hyper-.*

SUSCARPIEN (Fr.), adj. Su6-ka3r-pe-a3n2. Pertaining to the dorsal surface of the carpus. [L, 41 (a, 14).]

SUSCEPTIBILITY (Fr.), n. Su3s-se2pt-i2b-i2l'i2t-i2. From *suscipere,* to hold up. Fr., *susceptibilité.* Ger., *Empfänglichkeit.* 1. The capacity of receiving impressions that determine the production of organic action. 2. The inherent capacity to acquire disease. [a, 34.]

SUSCEPTIO (Lat.), n. f. Su3s(su4s)-se2p(ke2p)'shi2(ti2)-o. Gen., *-on'is.* From *suscipere,* to take up. See Intussusception.

SUSINUM (Lat.), n. n. Su2s(sus)'i2n-u3m(u4m). Gr., σούσινον. See Crinomyron.

SUS-MAXILLO-LABIAL (Fr.), n. Su6-ma3x-e-lo-la3-be-a3l. See Supermaxillolabialis.—**S.-m.-l. grand.** See Levator *labii superioris alæque nasi.*—**S.-m.-l. moyen.** See Levator *labii superioris major.*—**S.-m.-l. petit.** See Levator *anguli oris.*

SUS-MAXILLO-NASAL (Fr.), n. Su6-max-e-lo-na3-sa2l. Of Chaussier, see Compressor *naris.* [A, 313.] Cf. Supermaxillonasalis.

SUS-MÉTACARPO-LATÉRI-PHALANGIENS (Fr.), n. pl. Su6-ma-ta3 ka3r-po-la3-ta-re-fa3-la3n2-zhe-a3n2. Of Dumas, see Interossei *manus dorsales.*

SUS-MÉTATARSO-LATÉRI-PHALANGIENS (Fr.), n. pl. Su6-ma-ta3-ta3r-so-la3-ta-re-fa3-la3n2-zhe-a3n2. Of Dumas, see Interossei *pedis.*

SUS-OPTICO-PHÉNI-SCLÉROTICIEN (Fr.), n. Su6z-op-te-ko-fa-ne-skla-ro-te-se-a3n2. See Rectus *oculi superior.*

SUSOTOXINE, n. Su3s-o-to2x'en. Of F. G. Novy, a basic substance, or ptomaine, probably $C_{10}H_{26}N_{21}$, obtained from cultivations of the hog-cholera microbe; toxic only in large doses. [a, 34.]

SUSPENDED, adj. Su3s-pe2nd'e2d. Lat., *suspensus* (from *suspendere,* to suspend). Fr., *suspendu.* Ger., *aufgehängt* (1st def.). 1. Hanging; of an ovule, hanging from the top of the ovary wall. [a, 35.] 2. Interrupted (cf. *S.* animation).

SUSPENDICULUM (Lat.), n. n. Su3s(su4s)-pe2nd-i2k'u2l(u4l)-u3m(u4m). See Cremaster.

SUSPENSEUR (Fr.), n. Su6s-pa3n2s-u6r. See Suspensor.—**S. du duodénum.** Syn.: *muscle de Trietz.* A thin, flat, trapezoidal muscle, composed of unstriped fibres which arise in the connective tissue around the cœliac axis and terminate in the lower extremity of the duodenum. ["Bull. de la soc. anat.," Feb., 1889, p. 95 (a, 18).]

SUSPENSION, n. Su3s-pe2n'shu3n. Lat., *suspensio* (from *suspendere,* to hang). Fr., *s.* Ger., *S.* 1. The act of diffusing a substance in a state of fine mechanical division through a liquid in which it does not dissolve, and preventing it from settling. [B.] 2. The state of being thus diffused. 3. In orthopædics, a method of treating painful inflammations of the extremities in which the parts are raised by means of an apparatus and held in an elevated position. [A, 326 (a, 21).] 4. The same procedure applied to the whole body for the purpose of stretching the spinal cord.

SUSPENSOIR (Fr.), n. Su6s-pa3n2-swa3r. See Suspensorium.—**S. des mamelles.** See *Breast*-bandage.

SUSPENSOR (Lat.), n. m. Su3s(su4s)-pe2ns'o2r. From *suspendere,* to hang up. Fr., *suspenseur.* 1. In botany, a chain or elongated mass of cells at the extremity of which is situated the developing embyro. It is formed in the embryo-sac by division of the germ-cell. [a, 35.] 2. A muscle the function of which is to suspend a part. [a, 48.]—**S. testiculi.** See Cremaster.

SUSPENSORIUM (Lat.), n. n. Su3s(su4s)-pe2ns(pans)-or'i2-u3m-(u4m). Fr., *suspensoir.* Ger., *S.* A suspensory structure or apparatus. [a, 17.]—**S. (apicis) dentis epistrophei.** See *Middle odontoid* ligament.—**S. hepatis.** See *Broad* ligament *of the liver.*—**S. incudis.** See *Suspensory* ligament *of the incus.*—**S. mallei.** See *Superior* ligament *of the malleus.*—**S. mammæ.** See *Breast*-bandage.—**S. testis.** See Cremaster.—**S. vesicæ.** See *Superior false* ligament *of the urinary bladder.*

SUSPENSORIUS (Lat.), adj. Su3s(su4s)-pe2ns(pans)-or'i2-u3s-(u4s). Suspensory; as a n., see Suspensorium.—**S. hepatis.** See *Broad* ligament *of the liver.*—**S. testis.** See Cremaster.

SUSPENSORY, adj. Su3s-pe2ns'or-i2. Lat., *suspensorius* (from *suspendere,* to hang up). Suspending, sustaining; as a n. (Fr., *suspensoir*), a supporting bandage for the scrotum. [a, 17.]

SUSPENSUM (Lat.), n. n. Su3s(su4s)-pe2ns(pans)'u3m(u4m). From *suspendere,* to hang up. In pharmacy, a liquid holding an insoluble medicinal substance in suspension.

SUSPIRATION, n. Su3s-pi2r-a'shu3n. Lat., *suspiratio, suspiratus* (from *suspirare,* to draw a deep breath). See Sighing, n.

SUSPIRIOSUS (Lat.), adj. Su3s(su4s)-pi2r-i2-os'u3s(u4s). Sighing.

SUSPIRIUM (Lat.), n. n. Su3s(su4s)-pi2r(per)'i2-u3m(u4m). From *suspirare,* to draw a deep breath. See Sigh.

SUS-PUBIO-FÉMORAL (Fr.), n. Su6-pu6-be-o-fa-mo-ra3l. See Superpubiofemoralis.

SUS-SCAPULO-TROCHITÉRIEN (Fr.), adj. Su6-ska3 pu6-lo-tro-ke-ta-re-a3n2. Pertaining to or connected with the dorsal surface of the scapula and a tuberosity of the humerus; as a n., a muscle so connected. [L.]—**S.-s.-t. grand.** See Infraspinatus. **S.-s.-t. petit.** See Supraspinatus.

SÜSSESSEN (Ger.), n. Zu6s'e2s-se2n. See Glycyphagia.

SÜSSHOLZ (Ger.), n. Zu6s'ho3lts. See Licorice and Glycyrrhiza (1st def.).—**Flüssiges S'extract.** See *Extractum* glycyrrhizæ *fluidum.*—**Igelfruchtiges S.** See Glycyrrhiza *echinata.*—**Indisches S.** See Abrus *precatorius.*—**Russisches S.** [Ger. Ph.]. See *Radix* glycyrrhizæ.—**Spanische S'wurzel.** See Glycyrrhiza (2d def.).—**S'saft.** See *Extractum* glycyrrhizæ.—**S'wurzel.** See Glycyrrhiza (2d def.) and *Radix* glycyrrhizæ.—**S'wurzelsyrup.** See *Syrupus* liquiritæ.—**S'zucker.** See Glycyrrhizin.

SÜSSHÜLSENBAUM (Ger.), n. Su6s-hu6lz'e2n-ba3-um. The genus *Prosopis.* [a, 35.]

SUS-SPINI-SCAPULO-TROCHITÉRIEN (Fr.), n. Su6-spe-ne-ska3-pu6-lo-tro-ke-ta-re-a3n2. See Supraspinatus.

SUSTENTACULAR, adj. Su3s-te2nt-a2k'u2l(u4l)-a3r. Supporting, connective. [J.]

SUSTENTACULUM (Lat.), n. n. Su3s(su4s)-te2nt-a2k(a3k)'u2l-(u4l)-u3m(u4m). See Support and Aliment.—**S. lienis.** See *Costocolic* ligament.

SUSTENTATOR (Lat.), n. m. Su3s(su4s)-te2nt-at(a3t)'o2r. Gen., *-or'is.* From *sustentare,* to hold up. See Supporter.—**S. clitoridis, S. penis.** See Ischio-cavernosus.—**S. tunicæ mucosæ.** See Corrugator *cutis ani.*

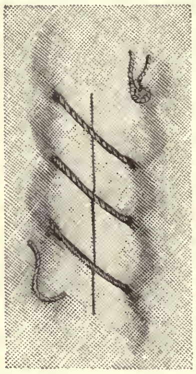
SUSUM (Lat.), n. n. Sus'u3m(u4m). Fr., *s.* A genus of the *Flagellarieæ.* [a, 35.]—**S. anthelminthicum.** A Java species having an anthelminthic root. [a, 35.]

SUSUMBER, n. Su2s'u3mb-u6r. The *Solanum bacciferum.* The berries are poisonous. [a, 35.]

SUSURRUS (Lat.), n. m. Su3s(su4s)-u6r(u4r)'ru3s(ru4s). See Murmur.—**Muscular s.** See Bruit *musculaire.*—**S. aurium.** See Tinnitus *aurium.*

SUTELA (Lat.), n. f. Su2t(sut)-el(al)'a3. From *suere,* to sew. See Suture.

SUTORIUS (Lat.), n. m. Su^{2}t(sut)-or'i^2-u^{3}s(u^{4}s). From *sutor*, a shoemaker. See SARTORIUS.

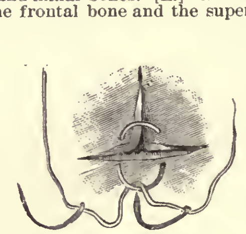


SUTUR (Ger.), n. Zut-ur'. See SUTURE.—**Schuppens'.** See *Squamosal* SUTURE.

SUTURA (Lat.), n. f. Su^{2}t(sut)-u^{2}r(ur)'a^3. See SUTURE.—**S. abdominalis.** See GASTRORRHAPHY (1st def.).—**S. arcualis.** See *Coronal* SUTURE.—**S. bimaxillaris.** See *Intermaxillary* SUTURE.—**S. binasalis.** See *Internasal* SUTURE.—**S. biparietalis.** See *Sagittal* SUTURE.—**S. bregmatomastoidea.** See *Occipito-mastoid* SUTURE.—**S. bursæ.** See *S. scroti.*—**S. chirurgica.** See SUTURE (2d def.).—**S. circumvoluta.** See *Twisted* SUTURE.—**S. clavata.** See *Quilled* SUTURE.—**S. coronalis.** See *Coronal* SUTURE.—**S. corporis callosi.** See STRIA *longitudinalis medialis.*—**S. cruenta.** Fr., *suture sanglante.* Ger., *blutige Sutur.* 1. The closure of a wound by sutures actually passed through the tissues, as distinguished from the dry suture. 2. Suture after refreshing the surfaces that are to be brought together (*e. g.*, the borders of a fistulous opening).—**S. cutanea.** See *Palatine* RHAPHE.—**S. dentata.** See *Dentated* SUTURE.—**S. dorsalis.** See *Dorsal* SUTURE.—**S. ethmoideomaxillaris.** The articulation between the ethmoid bone and the superior maxilla. [L.]—**S. externa corporis callosi.** See STRIÆ *longitudinales laterales.*—**S. harmonialis.** See HARMONY (1st def.).—**S. imperfecta Weberi.** See *S. longitudinalis imperfecta.*—**S. incisiva.** See *Incisor* FISSURE.—**S. infra-orbitalis (longitudinalis).** See *Infra-orbital* SUTURE.—**S. infra-orbitalis transversa.** In young subjects, the remains of a furrow separating the lower border of the orbit from the rest of the superior maxilla. [L.]—**S. interparietalis.** See *Sagittal* SUTURE.—**S. interscissa.** See *Interrupted* SUTURE and *Button* SUTURE.—**S. jugalis.** See *Sagittal* SUTURE.—**S. lacrimomaxillaris.** The suture between the lacrymal bone and the superior maxilla. [L.]—**S. lambdoidea.** See *Lambdoidal* SUTURE.—**S. lepidoides.** See *Squamo-parietal* SUTURE.—**S. limbosa.** Ger., *Saumnaht.* A variety of articulation by suture in which the bones are beveled at their line of junction.—**S. longitudinalis.** See *Sagittal* SUTURE.—**S. longitudinalis imperfecta.** A groove upon the outer surface of the frontal process of the superior maxilla in front of the lacrymal crest, usually lodging a small vein. [L.]—**S. mastoidea.** See *Occipito-mastoid* SUTURE.—**S. mendosa.** See *False* SUTURE.—**S. naso-frontalis.** See *Fronto-nasal* SUTURE.—**S. nodosa.** See *Interrupted* SUTURE and *Button* SUTURE.—**S. notha.** See *False* SUTURE.—**S. obelæa.** See *Sagittal* SUTURE.—**S. occipitalis.** See *Lambdoidal* SUTURE.—**S. occipitis transversa.** A transverse or oblique fissure between the superior and inferior part of the tabular portion of the occipital bone, found in infants until the third or fourth year. [L, 57 (*a*, 50).]—**S. occipitomastoidea.** See *Occipito-mastoid* SUTURE.—**S. palatina (longitudinalis).** See *Palatine* SUTURE.—**S. palatina transversa.** See *Palatine transverse* SUTURE.—**S. parietomastoidea.** See *Parieto-mastoid* SUTURE.—**S. parietotemporalis.** See *Temporo-parietal* SUTURE.—**S. pellionum.** See *Glover's* SUTURE.—**S. petrobasilaris, S. petrosobasilaris.** See FISSURA *petrobasilaris.*—**S. petrososquamosa.** A suture on the upper wall of the tympanic cavity in the infant, formed by the meeting of the roof of the tympanic cavity with the inner lamella of the squamous portion of the temporal bone. In the adult it is firmly closed. [F.] Cf. *Petro-squamosal* SUTURE.—**S. petrosphenobasilaris.** See FISSURA *petrobasilaris.*—**S. pinnata.** See *Quilled* SUTURE.—**S. proræ.** See *Lambdoidal* SUTURE.—**S. punctata.** See *Bertrandi's s.*—**S. puppis.** See *Coronal* SUTURE.—**S. recta, S. rhabdoides.** See *Sagittal* SUTURE.—**S. scroti.** The rhaphe of the scrotum. [L, 349.]—**S. sicca.** See *Dry s.*—**S. serrata.** See *Serrated* SUTURE.—**S. sinuosa.** See *True* SUTURE.—**S. spheno-ethmoidalis.** See *Ethmo-sphenoidal* SUTURE.—**S. sphenofrontalis.** See *Fronto-sphenoidal* SUTURE.—**S. sphenozygomatica.** The suture between the ala magna of the sphenoid bone and the malar bone. [L, 31.]—**S. spuria.** See *False* SUTURE.—**S. squamosa.** See *Squamo-parietal* SUTURE and *False* SUTURE.—**S. ventralis.** See *Ventral* SUTURE.—**S. vera.** See *True* SUTURE.—**S. wormiana anterior.** In the fœtus, the upper part of the lambdoid suture. [L, 332.]—**S. wormiana posterior.** See *S. occipitis transversa.*—**S. zygomaticofrontalis.** See *Fronto-malar* SUTURE.—**S. zygomaticomaxillaris.** The suture between the malar bone and the superior maxilla. [L.]—**S. zygomaticosphenoidalis.** See *S. sphenozygomatica.*

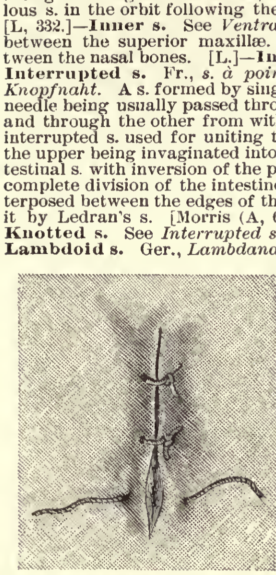
SUTURAL, adj. Su^{3}t-u^2'r'l. Lat., *suturalis* (from *sutura*, a suture). Fr., *s.* Ger., *nahtständig.* Pertaining to a suture or taking place along a suture. [*a*, 35.]

SUTURATUS (Lat.), adj. Su^{2}t(sut)-u^{2}r(ur)-at(a^{3}t)'u^{3}s(u^{4}s). Ger., *benähtet.* Provided with a suture or with sutures. [*a*, 35.]

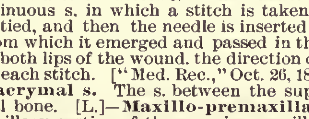


SUTURE, n. Su^{2}t'u^{2}r. Gr., ῥαφή. Lat., *sutura* (from *suere*, to sew), *sutela*, *rhaphe.* Fr., *s.*, *engrenure.* Ger., *Sutur*, *Fuge* (1st def.), *Naht*, *Verbindung* (2d def.). 1. That variety of synarthrosis in which the bones are articulated by their edges, generally by means of serrations; a dovetail joint. 2. The procedure of stitching parts together, particularly the lips of a wound. 3. The thread or other like material, together with the method of inserting it, in the operation of stitching parts together. 4. In botany, a line of junction or of opening; a seam, especially of a capsule or pod. [*a*, 35.]—**Antiseptic s.** See *Antiseptic* LIGATURE.—**Appolito's s.** An intestinal s. made with a double-threaded needle, the first stitch being passed from within outward and the first longitudinal running stitch being made in the opposite side parallel with the line of the wound. The needle is then carried to the opposite side and a similar longitudinal stitch made, and so on back and forth. [R. P. Harris, "Med. News," Aug. 28, 1886, p. 236 (*a*, 34).]—**Baseball s.** A continuous s. all around a wound, in the case of the intestine penetrating the entire intestinal coat. ["Med. Record," Nov. 5. 1892, p. 551 (*a*, 34).]—**Basilar s.** The s. between the occipital bone and the body of the sphenoid bone. [L, 172.]—**Béclard's s.** A modification of Bertrandi's s. in which the needle is threaded with both a black and a white thread, so that, when it is removed, the threads are pulled in opposite directions. [Morris (A, 63).]—**Bertrandi's s.** Fr., *s. à points passés.* A continuous s. passed "through and through," as in basting.—**Bifrontal s.** See *Coronal s.*—**Biparietal s.** See *Sagittal s.*—**Buried s's.** Ger., *versenkte Nähte.* S's (2d def.) that are completely covered by skin and do not involve that structure at all. [*a*, 34.]—**Button s.** Ger., *Knopfnaht.* A modification of the quilled s. in which buttons are used instead of quills. [E.]—**Circular s.** Fr., *s. circulaire.* Ger., *circuläre Naht.* A s. applied to the entire circumference of a divided organ (*e. g.*, the intestine). [*a*, 34.]—**Circumvoluted s.** See *Twisted s.*—**Clamp s.** Ger., *Klammernaht.* A modification of the quilled s. in which two pieces of perforated lead or silver are used, through which the wire s's are passed. [E.]—**Clavate s.** Ger., *Flockennaht.* See *Quilled s.*—**Coaptation s.** Ger., *Vereinigungsnaht.* A uniting or coaptating s., as distinguished from a s. intended to relieve tension. Cf. *Relief s.*—**Cobbler's s.** A form of s. in which a double-threaded needle is passed through both lips of a wound and one end of the thread is caught, pulled through the needle, and withdrawn; when the needle is passed back in taking a second stitch the remaining thread is removed from the needle and the thread left on the opposite side is inserted and the needle withdrawn. [*a*, 34.]—**Compound s.** See *Quilled s.*—**Continued s., Continuous s.** The closure of a wound by means of one continuous thread, usually by transfixing first one lip and then the other, alternately, from within outward.—**Coronal s.** Lat., *sutura coronalis.* Fr., *s. coronale* (ou *fronto-pariétale*). Ger., *Kranznaht*, *Kronennaht.* The s. between the frontal and parietal bones. [L.]—**Cranial s's.** The s's between the bones of the skull. [L.]—**Cuneal s.** See *Fronto-sphenoidal s.*—**Czerny-Lembert s.** An intestinal s. in which the Czerny s. is employed to unite the mucous and the Lembert s. to unite the peritoneal coat. [*a*. 34.]—**Czerny's s.** An intestinal s. in which the thread passes through the mucous membrane alone, so as to bring that membrane and the connective tissue upon which it rests together. [*a*, 34.]—**Dentated s., Dentate s.** Ger., *Zahnnaht.* An articulation by s. into the formation of which long and tooth-like processes and deep indentations enter.—**Dorsal s.** The somewhat prominent line or ridge, corresponding to the midrib of the carpellary leaf, opposite to the ventral s. [*a*, 35.]—**Double s. de l'utérus** (Fr.). See *Sänger's s.*—**Duverger's s.** A variety of the s. des quatre maîtres in which a piece of prepared calf's trachea was used as the supporting body.—**Dry s.** Ger., *Trockennaht.* The application of adhesive plaster to each side of a wound and the subsequent stitching of the edges of the plasters together. [*a*, 34.]—**Ethmoido-frontal s.** The s. between the ethmoid and frontal bones. [L.]—**Ethmo-lacrymal s.** The s. between the ethmoid and lacrymal bones. [L.]—**Ethmo-sphenoidal s.** The s. between the ethmoid and sphenoid bones. [L.]—**False s.** Lat., *sutura notha.* Fr., *fausse s.* Ger., *falsche Naht.* Any form of s. (1st def.) in which the bones do not interlock by serrations.—**Figure-of-eight s.** See *Twisted s.*—**Frontal s.** Lat., *sutura frontalis.* Fr., *s. frontale.* Ger., *Stirnnaht.* An occasional s. in the frontal bone continued forward from the sagittal s. to the root of the nose. [L.]—**Fronto-ethmoidal s.** See *Ethmoido-frontal s.*—**Fronto-lacrymal s.** The s. between the frontal and lacrymal bones. [C, 3.]—**Fronto-malar s.** Ger., *Stirnbeinwangenbeinnaht.* The s. between the frontal and malar bones. [L.]—**Fronto-maxillary s.** The s. between the frontal bone and the superior maxilla. [C, 3.]—**Fronto-nasal s.** Ger., *Stirnnasennaht.* The s. between the frontal and nasal bones. [C, 3.]—**Fronto-parietal s.** See *Coronal s.*—**Fronto-sphenoidal s.** Lat., *sutura sphenofrontalis.* Ger., *Keilnaht.* The s. between the frontal bone and the alæ of the sphenoid bone. [L, 332.]—**Fronto-temporal s.** The s. between the frontal and temporal bones. [L.]—**Furrier's s.** See *Glover's s.*—**Gely's s.** A continuous s. for wounds of the intestine, made with a thread having a needle at each end, so that a succession of cross-stitches may be made to extend from one end of the wound to the other. [E, 4.]—**Glover's s.** Ger., *Kürschnernaht.* A continuous s. in which the needle is, after each stitch, passed through the loop of the preceding stitch. [*a*, 34.]—**Grande s.** (Fr.). See *Sagittal s.*—**Grooved s.** See SCHINDYLESIS.—**Hare-lip s.** Ger., *Hasenschartennaht.* See *Twisted s.*—**Harmonic s.** See HARMONY (1st def.).—**Implanted s.** A s. formed by implanting pins opposite each other on the two sides of a wound, and approximating the lips by winding thread or other similar material about the pins.—**Incisor s.** See *Incisor* FISSURE.—**India-rubber s.** A

CONTINUOUS SUTURE.

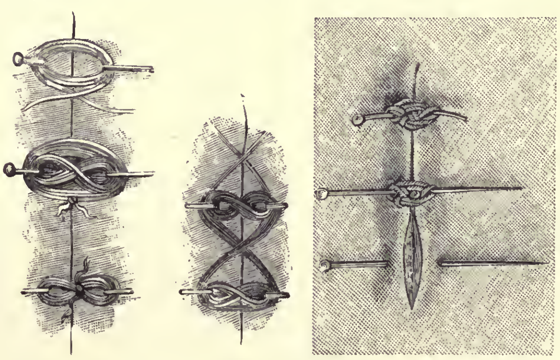


CROSS SUTURE.



DOUBLE-NEEDLED SUTURE.

variety of the twisted s. in which rubber rings are used instead of the figure-of-eight turns of silk, etc.—**Infra-orbital s.** An anomalous s. in the orbit following the course of the infra-orbital canal. [L, 332.]—**Inner s.** See *Ventral s.*—**Intermaxillary s.** The s. between the superior maxillæ. [L.]—**Internasal s.** The s. between the nasal bones. [L.]—**Interparietal s.** See *Sagittal s.*—**Interrupted s.** Fr., *s. à points séparés, s. entrecoupée.* Ger., *Knopfnaht.* A s. formed by single stitches inserted separately, the needle being usually passed through one lip from without inward, and through the other from within outward.—**Jobert's s.** 1. An interrupted s. used for uniting the cut ends of a divided intestine, the upper being invaginated into the lower. [E.] 2. A form of intestinal s. with inversion of the peritoneal coat. 3. A form of s. for complete division of the intestine in which a fold of omentum is interposed between the edges of the wound, which are united around it by Ledran's s. [Morris (A, 63).]—**Jugal s.** See *Sagittal s.*—**Knotted s.** See *Interrupted s.*—**Lambda s., Lambdoidal s., Lambdoid s.** Ger., *Lambdanaht, Hinterhauptsnaht.* The s. between the parietal bones and the two superior borders of the occipital bone. [C.]—**Lapeyronie's s.** A modification of Palfyn's s., in which the thread is passed through the mesentery and then attached to the skin. [Morris (A, 63).]—**Lead-plate s.** A s. consisting of a wire that is attached at each end to lead plates, about an inch in diameter, placed some distance from the edges of a wound. ["Med. Rec.," Oct. 26, 1889, p. 449 (a, 34).]—**Ledran's s.** A form of interrupted s. applied to wounds of the intestine. The threads, having all been introduced, were twisted together on each side of the wound, so as to pucker it, and then attached to the skin. [Morris (A, 63).]—**Lembert's s.** A method of uniting a divided intestine by means of s's so inserted as to invert the edges of the gut when traction is made, so that the serous surfaces are brought together.—**Lepidoid s.** See *Squamo-parietal s.*—**Littre's s.** Ligation of the inferior end of the intestine in cases of gangrene, in order to obliterate it, and the attachment of the upper end to the inguinal ring so as to form an artificial anus. [a, 34.]—**Longitudinal s.** See *Sagittal s.*—**Loop s.** See *Interrupted s.*—**Malo-maxillary s.** See SUTURA *zygomaticomaxillaris.*—**Masto-occipital s.** See *Occipito-mastoid s.*—**Masto-parietal s.** See *Parieto-mastoid s.*—**Mattress s.** Ger., *Matratzennaht.* A continuous s. in which a stitch is taken with a needle, the thread is tied, and then the needle is inserted upon the same side as that from which it emerged and passed in the opposite direction through both lips of the wound, the direction of the needle being reversed at each stitch. ["Med. Rec.," Oct. 26, 1889, p. 449 (a, 34).]—**Maxillo-lacrymal s.** The s. between the superior maxilla and the lacrymal bone. [L.]—**Maxillo-premaxillary s.** A s. between the premaxillary portion of the superior maxilla and the rest of the bone. [L, 153.]—**Medio-frontal s.** See *Frontal s.*—**Metallic plate s.** See *Button s.*—**Metallic s.** S. (2d def.) with wire.—**Metopic s.** See *Frontal s.*—**Naso-maxillary s.** The s. between the nasal bone and the superior maxilla. [L.]—**Nerve s.** The union of the divided ends of a nerve by fine thread or catgut s's. [a, 34.]—**Neurocentral s.** The cartilaginous interval separating the portion of the bodies of the dorsal vertebræ posterior to the points of the articulation of the ribs from the main portion. [L, 142.]—**Noose s.** See *Interrupted s.*—**Occipital s.** See *Lambdoidal s.*—**Occipito-mastoid s.** Ger., *Warzennaht.* The s. between the occipital bone and the mastoid portion of the temporal bone. [C.]—**Occipito-parietal s.** See *Lambdoidal s.*—**Outer s.** See *Dorsal s.*—**Palatine s.** Ger., *Gaumennaht.* A s. between the palate bones. [L.]—**Palatine transverse s.** A s. between the palate processes of the palate bone and the superior maxilla. [L, 332.]—**Palfyn's s.** That variety of interrupted s. of a partially divided intestine in which a loop is passed at the middle of the wound, and the threads are fixed to the skin with plaster, thus approximating the bowel to the external wound. [Morris (A, 63).]—**Pancoast's s.** See *Plastic s.*—**Parietal s.** See *Sagittal s.*—**Parieto-mastoid s.** The s. between the parietal bone and the mastoid portion of the temporal bone. [C.]—**Petro-occipital s.** The s. between the petrous portion of the temporal bone and the occipital bone. [L.]—**Petro-sphenoidal s.** The s. between the petrous portion of the temporal bone and the ala magna of the sphenoid bone. [L.]—**Pin s.** See *Twisted s.*—**Plastic s.** A form of s. devised by J. Pancoast, and so named by him, for use in his method of increasing the chances of union in superficial wounds by enlarging the extent of the surfaces approximated. A groove is formed along one lip of the wound, on its cut surface, and the other lip is beveled in such a manner that it will fit into the groove. The thread is passed from without inward through (1) the outer lip of the groove, (2) the beveled lip, (3) the deep lip of the groove; then, forming a loop on the deep surface of the grooved lip, it is passed through the same structures again, traversing them at a different place and in inverse order. The two free ends are then tied over a



INTERRUPTED SUTURE.

LEMBERT-CZERNY SUTURE.

small roll of adhesive plaster laid on the cutaneous surface of the grooved lip.—**Quilled s., Quill s.** Lat., *sutura clavata.* Fr., *s. enchevillée, s. emplumée, s. empennée.* Ger., *Balkennaht, Keilflügelnaht, Knopfzapfennaht, Zapfennaht.* An interrupted s. in which a double thread is passed deep into the tissues, even quite below the bottom of the wound, the needle being so withdrawn as to leave a loop hanging from one lip and the two free ends of the thread from the other. A quill, or, more commonly, a piece of bougie is passed through the loops, which are tightened upon it, and the free ends of each separate thread are then tied together over a second quill. The object is to bring the deep parts into firm coaptation.—**Ramdohr's s.** An intestinal s. in which the upper portion of the intestine is invaginated into the lower and the peritoneal surfaces are stitched together. [a, 34.]—**Rat-tail s's.** S. material made from fine fibres obtained from the rat's tail. ["Med. News.," Dec. 5, 1891, p. 660 (a, 34).]—**Relief s.** Ger., *Entspannungsnaht.* A row of supplementary s's including the tissues to the extent of 1 or 1¼ inch on each side of a fistula or a deep wound, for the purpose of lessening the strain on the coaptation s's. [A, 57.]—**Reybard's s.** An intestinal s. by means of thin oval wooden plates having threads and needles attached. The plates, placed within the intestine, served to keep the latter in apposition with the abdominal parietes, through which the needle and thread were passed. [a, 34.]—**Rigal's s.** India-rubber s., so called because first practiced by Rigal. [a, 34.]—**Royal s.** Fr., *point royal.* Ger., *königlicher Stich.* Syn.: *royal stitch.* An old operation for the cure of femoral hernia, consisting of ligation of the sac close to the ring. [a, 34.]—**Sabatier's s.** A variety of the s. des quatre maîtres in which a piece of card or of St. John's wort, smeared with oil of turpentine or varnished, was used for the supporting body. [Morris (A, 63).]—**Sagittal s.** Fr., *grande s.* Ger., *Pfeilnaht.* The s. between the upper margins of the parietal bones. [L.]—**Sänger's s.** In the Cæsarean operation, the insertion of eight or ten deep s's of soft silver wire through the incised uterine peritonæum and muscle in such a manner as to invert the serous surfaces and approximate them, after which twenty or more superficial s's are passed through the peritonæum alone. [a, 34.]—**Scaly s.** See *Squamous s.*—**Seminiferous s.** See *Ventral s.*—**Sero-serous button s.** See *Sänger's s.*—**Sero-serous s.** Fr., *s. séro-séreuse.* Ger., *symperitoneale Naht.* The s. of two peritoneal surfaces to each other. [A, 32.]—**Serrated s.** Ger., *Sägenaht.* An articulation by s. in which the bones are interlocked by small projections and indentations that are fine and delicate as compared

PIN SUTURES.

with those of the dentated s.—**Shotted s.** A form of s. in which both ends of a wire are passed through a perforated shot that is then compressed tightly over them. [a, 34.]—**Spheno-malar s.** See SUTURA *sphenozygomatica.*—**Spheno-parietal s.** The s. between the parietal bone and the ala magna of the sphenoid bone. [L.]—**Spheno-petrosal s.** See *Petro-sphenoidal s.*—**Spheno-squamous s.** See *Squamo-sphenoidal s.*—**Spheno-temporal s.** The s. between the sphenoid and temporal bones. [L, 88 (a, 50).]—**Spiral s.** See *Glover's s.*—**Spiroidal s.** A spiral continuous s. for wounds of the intestine. [Morris (A, 63).]—**Squamo-parietal s., Squamosal s.** Fr., *s. écailleuse.* Ger., *Schuppennaht, Schläfenschuppennaht.* The s. between the parietal bone and the squamous portion of the temporal bone. [L.]—**Squamo-sphenoidal s.** The s. between the squamous portion of the temporal bone and the great wing of the sphenoid bone. [L.]—**Squamous s.** See *Squamo-parietal s.*—**Staple s.** A sharpened wire shaped like a staple that is passed through both lips of a wound and then bent back. [a, 34.]—**Subcuticular s.** A buried continuous catgut s. in which the needle is passed horizontally beneath the epidermis into the cutis vera, emerging at the angle of the wound, then in a similar manner passed through the cutis vera of the opposite side of the wound, and so on until the other angle of the wound is reached. ["Brit. Med. Jour.," Feb. 22, 1890, p. 414 (a, 34).]—**Sunk s's.** See *Buried s's.*—**Superficial s.** 1. See HARMONY (1st def.). 2. A stitch passed merely through the skin to secure nice coaptation of the edges of a wound, in contradistinction to deep s's.—**S. à anse** (Fr.). Ger., *Schlingennaht.* A form of interrupted s. in which the ends of the threads are collected and tied in a single knot, instead of each being tied separately. [E.] Cf. *Ledran's s.*—**S. à étages** (Fr.). Ger., *Etagennaht.* See *Interrupted s.*—**S. à plaques** (Fr.). See *Button s.*—**S. à plaques latérales** (Fr.). See *Quilled s.*—**S. à points passés** (Fr.). See *Bertrandi's s.*—**S. à points séparés** (Fr.). See *Interrupted s.*—**S. by harmony.** See HARMONY (1st def.).—**S. continue en spirale** (Fr.). See *Glover's s.*—**S. cunéiforme** (Fr.). See *Fronto-sphenoidal s.*—**S. des quatre maîtres** (Fr.). A method of uniting a divided intestine practiced in the thirteenth century by four monks of Paris.

A hollow cylinder (of wood, or of the windpipe or dried intestine of an animal) was introduced into the intestine so as to support it, and the edges of the wound were stitched together over it. [Morris (A, 63).]—**S. empennée** (Fr.), **S. emplumée** (Fr.), **S. enchevillée** (Fr.). See *Quilled s.*—**S. en surjet** (Fr.). That form of continuous s. in which the thread is carried back after the last insertion and tied to the other end, left long for the purpose.—**S. entortillée** (Fr.). See *Twisted s.*—**S. entrecoupée** (Fr.). See *Interrupted s.* and *Button s.*—**S. of the four masters.** See *S. des quatre maîtres.*—**S. par cellules.** An anatomical s. such as that of the ethmoid with the adjacent bones. [A, 301 (α, 34).]—**S. par harmonie** (Fr.). See HARMONY (1st def.).—**S. perdue** (Fr.). See *Buried s.*—**S. primo-secondaire** (Fr.). Of Rohmer, the insertion of s's in a wound at the time of the operation, tamponing the wound, and fastening the s's from twelve to forty-eight hours later. ["Union méd.," June 19, 1888, p. 928 (α, 34).]—**S. sanglante** (Fr.). See SUTURA *cruenta.*—**S. sèche de Goyrand** (Fr.). A form of dry s. in which a strip of cloth saturated with collodion is placed on each side of the long axis of a wound, each strip having attached to it strings which, when tied together, approximate the edges of the wound. [α, 34.]—**S. sèche de Mazier.** A modification of the s. sèche de Goyrand in which the edges of the strips are stitched together. [α, 34.]—**S. séro-séreuse.** See *Sero-serous s.*—**S.-twister.** An instrument used to twist together the ends of a wire s. [α, 34.]—**Symperitoneal s.** Sero-serous s. of the peritonæum.—**Temporo-occipital s.** See *Occipito-mastoid s.*—**Temporo-parietal s.** The s. between the temporal and parietal bones, made up of the squamosal and parieto-mastoid s's. [L.]—**Transverse (frontal) s.** See *Coronal s.*—**Triangular s. of Simon.** A form of s. for closing lacerations of the perinæum involving the sphincter ani in which separate sets of s's are inserted in the rectal mucous membrane, the vaginal mucous membrane, and the skin.—**True s.** Lat., *sutura vera.* Fr., *vraie s.* Ger., *ächte Naht.* That form of s. (1st def.) in which the bones actually interlock by indentations and projections. See *Serrated s.* and *Dentated s.*—**Twisted s.** Fr., *s. entortillée.* A s. in which pins are passed through the opposite lips of a wound, at right angles to the direction of the wound, and thread, floss, or other like material is wound about the pins, crossing them first at one end and then at the other in a figure-of-eight fashion, thus holding the lips of the wound firmly together.—**Uninterrupted s.** See *Continuous s.*—**Uterine s.** See HYSTERORRHAPHY (1st def.).—**Utero-parietal s.** Of Pillore, suturing of the uterus to the internal surface of the abdominal wound after the Cæsarean operation. ["Gaz. des hôp.," 1854, p. 595 (α, 34).]—**Ventral s.** The inner s. on which the ovules are normally borne; the line of juncture of the edges of the carpel or adjacent carpels. [α, 35.]—**Viscero-parietal s.** The operation of stitching a wounded organ (like the uterus after the Cæsarean operation) to the abdominal incision.—**Wölfler's internal s.** An interrupted s. for the intestines in which three fourths of the threads are tied with the knot free in the lumen of the bowel and the rest with the knot outside. ["Med. Rec.," Oct. 26, 1889, p. 449 (α, 34).]—**Zygomatic s.** A s. between the zygomatic process of the superior maxilla and the temporal bone. [L.]

SUTURE, v. tr. Su[2]t'u[2]r. To sew up a wound.

SWAB-STICK, n. Swo[2]b'sti[2]k. A shaft one end of which is to be wrapped with cotton, for making applications of medicinal substances. It may be plain or notched at the end.

SWALLOW, n. Swo[2]l'o. See HIRUNDO.—**Chinese s's' nests.** The gelatinous, edible nests of *Hirundo esculenta*, formed of a secretion from the mouth of the bird. [B, 19 (α, 35).]

SWALLOWING, n. Swo[2]l'o-i[2]n[2]. See DEGLUTITION.

SWALLOWWORT, n. Swo[2]l'o-wu[4]rt. See ASCLEPIAS (2d def.) and CHELIDONIUM (1st def.).

SWAMPWOOD, n. Swa[4]mp'wu[4]d. See DIRCA *palustris* and CEPHALANTHUS *occidentalis.*

SWARTZIA (Lat.), n. f. Swa[3]rts'i[2]-a[3]. From *Swartz*, a Swedish botanist. Fr., *swartzie.* A genus of the *Leguminosæ.* The *Swartzieæ* are a tribe of the *Papilionaceæ.* [α, 35.]—**S. tomentosa.** A tree of the forests of Guiana, furnishing a bitter, sudorific bark (panococco-bark) which exudes a reddish sap hardening into a dark resin. The flowers are antispasmodic. [α, 35.]

SWEAT, n. Swe[2]t. A.-S., *swât.* Gr., ἱδρώς. Lat., *sudor.* Fr., *sueur.* Ger., *Schweiss.* 1. The product of secretion from the perspiratory glands, perspiration (3d def.); a clear, colorless, acid, and, when first secreted, odorless liquid, the chief constituents of which are water, chlorides (especially sodium chloride), fatty substances, and urea. 2. In popular language, sensible perspiration.—**Bloody s.** See HÆMATIDROSIS.—**Blue s.** Perspiration communicating a bluish or green tint to the underclothing. [L, 41 (α, 14).]—**Cold s.** Lat., *ephidrosis diaphoretica* (seu *syncoptica*). Perspiration accompanied with a sensation of cold, as in syncope.—**Colored s.** See CHROMIDROSIS and BLEPHARO-CHROMIDROSIS. — **Critical s.** See EPHIDROSIS *febrilis.*—**Diaphoretic s.** See *Cold s.*—**Night-s.** See the major list.—**S.-house.** An inclosed space containing means for subjecting an inmate to the sudorific effect of steam. [α, 34.]—**Syncopal s.** See *Cold s.*

SWEATING, n. Swe[2]t'i[2]n[2]. See PERSPIRATION (1st def.).—**Morbid s.** See EPHIDROSIS.—**Unilateral s.** Lat., *transpiratio unilateralis, hemidiaphoresis.* S. upon one lateral half of the body; usually due to nervous disease.

SWEET CHALYBEATE SPRINGS, n. Swet ka[2]l-i[2]b'e[2]-at. A place in Alleghany County, Virginia, where there are chalybeate springs. [Anderson (α, 14).]

SWEET SPRINGS, n. Swet. 1. A place in Monroe County, Virginia, where there are sulphurous springs. [L, 30, 57 (α, 14).] 2. Mineral springs in Saline County, Missouri. [A, 363 (α, 21).]

SWEET WILLIAM, n. Swet wi[2]l'y'm. See DIANTHUS *barbatus* and CHEIRANTHUS *cheiri.*

SWEET-WOOD, n. Swet'wu[4]d. The *Croton eleuteria* and certain other plants. [α, 35.]—**White s.-w.** See NECTANDRA *leucantha* and NECTANDRA *sanguinea.*

SWELLING, n. Swe[2]l'i[2]n[2]. Gr., ὄγκος, φῦμα. Lat., *tumiditas.* Fr., *gonflement.* Ger., *Geschwulst.* A traumatic, inflammatory, or other morbid enlargement. [α, 34.]—**Albuminous s.** See *Cloudy s.*—**Blennorrhagic s. of the knee.** See *Gonorrhœal* RHEUMATISM.—**Cloudy s.** Fr., *tuméfaction trouble.* Ger., *trübe Schwellung.* Of Virchow, a s. of cells due to nutritive irritation; they increase in bulk while the added material is not properly assimilated, but deposited in visible albuminous granules. [α, 34.]—**Dorsal s.** See *Medullary* RIDGES.—**Embryonic s.** Ger., *Keimwulst* [Kölliker], *Randwulst* [Götte], *Keimwall* [His]. A thickening of that portion of the blastoderm that forms the margin of the blastopore. [A, 5.]—**Glassy s.** Of Weber, amyloid degeneration and degeneration of muscular fibres, etc. [B; α, 34.]—**Lacteal s., Lactiferous s.** [Cooper]. A s. of the breast from obstruction of the lactiferous ducts. [α, 34.]—**White s.** See *Fungous* ARTHRITIS and SPINA *ventosa.*

SWERTIA (Lat.), n. f. Swe[2]rt'i[2]-a[3]. From *Swert*, an herbalist. Fr., *swertie, s.* A genus of herbs, of the *Swertieæ*, which are a tribe of the *Gentianaceæ.* [α, 35.]—**S. alata.** A Himalayan species said to be the source of a false chirata devoid of bitter properties. [α, 35.]—**S. angustifolia.** The *Agathotes angustifolia.* It furnishes a chirata inferior in bitterness to the true chirata. [α, 35.]—**S. chirata, S. chirayta.** True chiretta, the *Agathotes chirayta*; an herb furnishing the chirata of the U. S. Ph., a pure, bitter tonic consisting chiefly of the dried stems with portions of the root attached. The drug is recommended in gouty and other forms of indigestion; it does not constipate; it is a cholagogue; and it checks acidity of the stomach. In India it is also used, especially along with the seeds of *Cæsalpinia bonducella*, as a febrifuge. [α, 35.]—**S. difformis.** See FRASERA *Walteri.*—**S. elegans.** The *salaras* of India. The bitter stems are tonic and febrifuge. [α, 35.]—**S. multiflora.** An East Indian species substituted for chirata. The root is especially used. [α, 35.]—**S. perennis.** Fr., *s. vivace.* Marsh felwort (or gentian) of Europe. The leaves are used like those of *Pleurogyne rotata.* [α, 35.]—**S. rotata.** Fr., *s. en roue.* See PLEUROGYNE *rotata.*

SWIETENIA (Lat.), n. f. Swet-an'i[2]-a[3]. From *van Swieten*, an Austrian physician. Fr., *swieténie.* A genus of trees, of the *Swieteneæ* or *Swietenieæ*, which are a tribe of the *Meliaceæ.* [α, 35.]—**Cortex swieteniæ.** See under *S. mahagoni.*—**S. chloroxylon.** See CHLOROXYLON *s.*—**S. febrifuga.** See SOYMIDA *febrifuga.*—**S. mahagoni, S. mahogoni.** Fr., *acajou à bous, cèdre des Antilles.* Ger., *Mahagonibaum.* The mahogany-tree of Central America and the West Indies. The bitter, astringent bark, *cortex mahagoni* (seu *swieteniæ*, seu *ligni mahagoni*), contains catechin, and was formerly used in dysentery and as a febrifuge. The seeds yield a purgative fixed oil (caraba-oil). [α, 35.]—**S. senegalensis.** See KHAYA *senegalensis.*—**S. soymida.** See SOYMIDA *febrifuga.*—**S. sureni.** See CEDRELA *febrifuga* (1st def.).

SWIMMERET, n. pl. Swi[2]m'e[2]r-e[2]t. One of the limbs of the *Crustacea*, which are adapted for swimming. [B, 28 (α, 27).]

SWINEBREAD, n. Swin'bre[2]d. The *Tuber cibarium.* [α, 35.]

SWINE-POX, n. Swin'po[2]x. Lat., *variolæ suillæ.* Ger., *Schweinepocken.* 1. A disease peculiar to swine, characterized by hard inflammatory tubercles on the legs and thighs. 2. Varicella, especially varicella globata. [D, 1.]

SWING, n. Swi[2]n[2]. A seat suspended so as to admit of a to-and-fro motion. [α, 48.]—**Salter's s.** An apparatus for treating fractures of the lower extremity. It consists of a cradle attached by support to wheels that run along a horizontal rod on an iron framework. [α, 34.]

SWOLLEN, adj. Swo[4]ln. Gr., ἐμφυσώμενος. Lat., *inflatus.* Fr., *gonflé.* Ger., *geschwollen.* Affected with swelling. [D.]

SWOON, n. Swun. Gr., λειποθυμία. Lat., *animi deliquium.* Fr., *défaillance, évanouissement.* Ger., *Ohnmacht.* The act of swooning; syncope. [α, 34.]

SWOONING, n. Swun'i[2]n[2]. See SYNCOPE.

SYAGRUS (Lat.), n. f. Si(su[6])'a[2]g(a[3]g)-ru[3]s(ru[4]s). See COCOS (1st def.).

SYCAMORE, n. Si[2]k'a[3]-mor. From σῦκον, a fig, and μῶρα, the mulberry. Fr., *sycomore.* 1. The *Acer pseudo-platanus.* [α, 35.] 2. See FICUS *sycomoros.*—**American s.** See PLATANUS *occidentalis.*

SYCACARPUS (Lat.), n. m. Si[2]k(su[6]k)-a[3]-ka[3]rp'u[3]s(u[4]s). From σῦκον, a fig, and καρπός, fruit. A genus of *Meliaceæ*, referred to *Guarea.* [α, 35.]—**S. Rusbyi.** An undetermined species of *Guarea*; a Bolivian tree yielding cocillaña (*q. v.*, in Supplement). [α, 35.]

SYCE (Lat.), **SYCEA** (Lat.), n's f. Sis(su[6]k)'e(a), si[2]s(su[6]k)'e[2]-a[3]. Gr., συκῆ, συκέα. See FICUS (2d def.).

SYCÉPHALIE (Fr.), n. Se-sa-fa[3]-le. Of Geoffroy St.-Hilaire, a form of double monstrosity in which there are two bodies, distinct below the umbilicus and surmounted by two more or less incomplete heads intimately united. [L, 41, 49 (α, 14).]

SYCHNOCARPOUS, adj. Si[2]k-no-ka[3]rp'u[3]s. From συχνός, frequent, and καρπός, fruit. Capable of fruiting many times without perishing. [α, 35.]

SYCHNURESIS (Lat.), n. f. Si[2]k(su[6]ch[2])-nu[2]r(nur)-e(a)'si[2]s. Gen., *-es'eos* (*-is*). From συχνός, frequent, and οὔρησις, urination. Fr., *sychnurie.* Morbid frequency of urination. [A, 385 (α, 48).]

SYCITES (Lat.), n. m. Si[2]s(su[6]k)-it(et)'ez(as). Gen., *-it'u* (*-æ*). Gr., συκίτης (from σῦκον, a fig). See CATORCHITES.

SYCOCERYL ALCOHOL, SYCOCERYL HYDRATE, n's. Sik-os-er'i[2]l. An aromatic monatomic alcohol, $C_{18}H_{30}O$ (or $C_{18}H_{30} = C_{13}H_{29}.OH$); a natural crystalline acetic ether found in the resin

of *Ficus rubiginosa*, and occurring as thin crystals which melt at 90° C. [B, 2; B, 3, 270 (α, 38).]

SYCOCERYLIC ACID, n. Sik″os-e2r-i2l′i2k. Fr., *acide sycocérylique*. Ger., *Sycocerylsäure*. A dark-yellow resinous substance, $C_{18}H_{28}O_2$. [B, 38, 93 (α, 14).]

SYCOMA (Lat.), n. n. Si2k(su6k)-om′a3. Gen., *-om′atos* (*-atis*). Gr., σύκωμα (from σῦκον, a fig). See Ficus (1st def.).

SYCOMORE, n. Si2k′o-mor. See Sycamore.

SYCON (Lat.), n. n. Sik(su6k)′o2n. Gr., σῦκον. 1. A fig. 2. A large wart on the eyelids. 3. The pudenda muliebria.

SYCONE (Lat.), **SYCONIUM** (Lat.), **SYCONUS** (Lat.), n′s f., n., and m. Si2k(su6k)′o2n-e(a). si2k(su6k)-on′i2-u3m(u4m), si2k(su6k)′-o2n-u3s(u4s). From σῦκον, a fig. Fr., *sycone*, *endophéride*. Ger., *Feigenfrucht*. A fleshy hollow receptacle containing achænium-like fruits. [α, 35.]

SYCORRHETIN, n. Sik or-ret′i2n. From σῦκον, a fig, and ῥητίνη, resin. Fr., *sycorrhétine*. A colorless, amorphous substance found in the resin of *Ficus rubiginosa*. [B, 270 (α, 38).]

SYCOSIS (Lat.), n. f. Si2k(su6k)-os′i2s. Gen., *-os′eos* (*-is*). From σῦκον, a fig. Fr., *s.*, *sycose*, *s. non-parasitaire* (3d def.), *dartre pustuleuse*, *mentagre* (3d def.). Ger., *Feigwarzenkrankheit*, *Bartfinne*, *Bartflechte*, *Kieferaussatz* (all 3d def.). 1. See Ficus (1st def.). 2. A fungous ulcer. [E.] 3. Coccogenic or schizomycetous s.; a chronic follicular inflammation of the skin, affecting regions covered by the coarser hairs, most commonly the bearded portion of the face, and probably due to microbic infection of the hair follicles. It is characterized by an erup ion of pustules, papules, or tubercles occupying the sites of hair follicles and sometimes attended with the formation of adherent crusts. This affection has generally been known as non-parasitic s. in contradistinction to parasitic s. But the two forms are better distinguished as schizomycetous s. and hyphomycetous s. [G.]—**Bacillogenic s.** Of Tommasoli, a variety of so-called "non-parasitic" s.; said to be due to an organism called *Bacillus sycosiferus fœtidus*. In the one case observed the clinical appearances did not differ from those of ordinary coccogenic s. of a mild type. [Crocker (G).]—**Coccogenic s., Coccogenous s.** Of Unna, the so-called "non-parasitic" s., which is now known to be due to the presence of organisms belonging to the *Schizomycetes*, while the so-called "parasitic" form, being due to parasites of the nature of *Hyphomycetes*, is termed hyphogenic s.—**Hypertrophic s.** See *Keloid s.*—**Hyphogenic s., Hyphomycetous s.** Of Unna, s. parasitaria. [G.] See *Coccogenic s.*—**Keloid s.** Of Milton, a follicular inflammation affecting especially the bearded parts of the face, followed by cicatricial or keloidal atrophy and destruction of the hair follicles. The disease has been regarded as identical in its nature with the dermatitis papillaris capillitii of Kaposi. [G.]—**Lupoid s.** See *Keloid s.*—**Non-parasitic s.** See *S.* (3d def.).—**Parasitic s.** See *S. parasitaria.*—**Schizomycetic s., Schizomycetous s.** See *Coccogenic s.*—**S. barbæ.** S. of the beard. [G.]—**S. capillitii.** 1. See Dermatitis *papillaris capillitii.* 2. S. of the scalp. See *Kerion.* 3. Pustular eczema of the scalp. [G, 10, 28.]—**S. contagiosa.** See *S. parasitaria.*—**S. framboesiformis.** See Dermatitis *papillaris capillitii.*—**S. lupoïde** (Fr.). See Folliculitis *decalvans* (3d def.).—**S. mentagra.** See *S. barbæ.*—**S. nonparasitica.** See *S.* (3d def.).—**S. palpebræ marginalis.** S. apparently confined to the edge of the eyelid. [F.]—**S. parasitaria, S. parasitica.** Barber's itch; a parasitic disease due to the presence of the *Trichophyton tonsurans* in the hairs and hair follicles; occurring most commonly in the region occupied by the beard (ringworm of the beard), though the same disease may affect other regions covered by coarse hair (cf. Kerion). There is a superficial form, like ordinary ringworm, characterized by the production of red, scaly patches, and there is a deeper process with the formation of pustular or tuberous patches, sometimes exuding or covered by crusts, and often attended with the formation of abscesses. The hairs within the areas affected become dry and lustreless, sometimes break off, or more commonly are loosened in their follicles, drop out, or when plucked out offer little resistance. The affection is distinguished from ordinary s. by its frequent resemblance, at the beginning, to ringworm in other situations; by the fact that in the parasitic form the hairs are affected primarily, while in the common form they are affected secondarily; and by the more rapid extension and severer course of the former, together with a more marked involvement of the subcutaneous tissue and a greater tendency to the production of abscesses or prominent fleshy elevations. [G.]—**S. tarsi.** See *Palpebral* conjunctivitis.—**S. vulgaris.** See *S.* (3d def.).

SYCUM (Lat.), n. n. Sik(su6k)′u3m(u4m). Gr., σῦκον. See Ficus (1st def.).

SYDERATIO (Lat.), n. f. Si2d(su6d)-e2r-a(a3)′shi2(ti2)-o. Gen., *-on′is*. See Sideratio.

SYGGIGNOSCISM, n. Si2g-ji2g′no2s-si2zm. An erroneous formation for *Syngignoscism*. From συγγιγνώσκειν, to agree with. Of Hammond, hypnotism; strictly one of its phenomena, consisting in a complete sympathy on the part of the patient with the operator. [D.]

SYLLABLE-STUMBLING, n. Si2l′a2-b′l-stu3mb″li2n2. Dysphasia by elision of one or more syllables of a word. [α, 34.]

SYLLEPSIOLOGY, n. Si2l-le2ps-i2-o2l′o-ji2. Lat., *syllepsiologia* (from σύλληψις, conception, and λόγος, understanding). Fr., *syllepsiologie*. The physiology of conception. [L, 50 (α, 14).]

SYLLEPSIS (Lat.), n. f. Si2l(su6l)-le2ps(laps)′i2s. Gen., *-leps′eos* (*-is*). Gr., σύλληψις (from συλλαμβάνειν, to conceive). Fr., *s.* See Conception.

SYLVACROL, n. Si2lv′a2k-ro2l. Of Eberhardt, a soft, yellow, very acrid resin obtained from Stillingia-root. [α, 35.]

SYLVAN, n. Si2l′v′n. See Methyl*tetrol*.

SYLVANES (Fr.), n. Sel-va3n. A place in the department of the Aveyron, France, where there is a mineral spring. [α, 14.]

SYLVATICUS (Lat.), **SYLVESTRIS** (Lat.), adj′s. Si2l(su6l)-va2t(wa3t)′i2k-u3s(u4s), -ve2st(we2st)′ri2s. See Silvestris.

SYLVIAN, adj. Si2lv′i2-′n. Fr., *sylvien*. Investigated by or named from J. Sylvius (originally Du Bois), a French physician.

SYLVIC ACID, n. Si2l′vi2k. Fr., *acide sylvique* (ou *pyromarique*). Ger., *Sylvinsäure*. 1. A substance, $C_{20}H_{30}O_2$, forming, according to Unverdorben, the chief ingredient of colophony and crystallizing from alcohol as prisms. [α, 38.] 2. See Abietic *acid*.

SYLVINES, n. Si2l′venz. Ger., *Sylvin*. Native potassium chlorides occurring in salt mines in regular crystals. [B, 270 (α, 48).]

SYMBIOSIS (Lat.), n. f. Si2m(su6m) bi2-os′i2s. Gen., *-os′eos* (*-is*). Gr., συμβίωσις (from συμβιοῦν, to live with). Fr., *symbiose*. Ger., *Symbiose*. The normal association of dissimilar organisms, on account of their being mutually serviceable. [B; α, 35.] Cf. Commensalism.

SYMBLEPHARON (Lat.), n. n. Si2m(su6m)-ble2f′a2r(a3r)-o2n. From σύν, with, and βλέφαρον, the eyelid. Fr., *symblépharon*. Ger., *S.*, *Augenlidverwachsung*. Adhesion between the bulbar and palpebral conjunctivæ, and occasionally between the latter and the cornea; the result of injuries or burns. [F.] Cf. Ankyloblepharon.—**S. anterius.** S. of the anterior part of the conjunctival sac, in which the cicatricial bands stretch like a bridge between the lid and the eyeballs, permitting the passage of a sound between the lid and the globe. [A, 319 (α, 34).]—**S. posterius.** S. involving the posterior (peripheral) part of the conjunctival sac (the fold of transition). [B.]—**S. totale.** S. affecting the whole extent of the lid. [B.]

SYMBLEPHAROSIS (Lat.), n. f. Si2m(su6m)-ble2f-a2r(a3r)-os′i2s. Gen., *-os′eos* (*-is*). From σύν, with, and βλέφαρον, an eyelid. Adhesion of the eyelids to each other or to the eyeball. [F.] Cf. Ankyloblepharon and Symblepharon.

SYMBOL, n. Si2m′bu3l. Gr., σύμβολον (from συμβάλλειν, to compare). In chemistry, a letter or combination of letters used to designate the atom of an element. Thus, O is the s. of oxygen, denoting one atom of it. [B.]

SYMMELIA (Lat.), n. f. Si2m(su6m)-mel(me2l)′i2-a3. From σύν, with, and μέλος, a limb. Fr., *symélie*. Ger., *Symmelie*. A monstrosity in which the lower extremities are completely or almost completely united. [α, 34.]

SYMMELUS (Lat.), n. m. Si2m(su6m)′me2l-u3s. A monster exhibiting symmelia. [B.]

SYMMETRICAL, adj. Si2m-me2t′ri2-k′l. Gr., συμμετρικός (from σύν, with, and μέτρον, a measure). 1. Having the parts disposed in some regular order relatively to each other or relatively to an imaginary axis or medial plane in the organism. [α, 48.] 2. Of a flower, having the same number of members in the calyx, corolla, and androecium; also, according to recent German botanists, capable of division into "halves each of which is an exact reflex image of the other." [α, 35.] 3. Of a trisubstituted benzene compound, having all three of the replacing radicles attached to alternate atoms of carbon. [B.]—**Doubly s.** Of a flower, capable of being divided vertically into similar halves in two or more planes. [α, 35.]—**Simply s.** Of Sachs, see Monosymmetrical.

SYMMETRY, n. Si2m-me2t-ri2. Gr., συμμετρία. The condition of being symmetrical. [α, 35.]—**Antero-posterior s.** In zoology, the condition of having the anterior and posterior extremities corresponding symmetrically to each other. [L, 196.]—**Bilateral s.** In zoology, the condition of having the body or any part divisible into symmetrical halves. [L, 196.]

SYMPASMA (Lat.), n. n. Si2m(su6m)-pa2z(pa3s)′ma3. Gen., *-pas′matos* (*-is*). Gr., σύμπασμα (from συμπάσσειν, to besprinkle). See Catapasm.

SYMPATHEONEURITIS (Lat.), n. f. Si2m(su6m)-pa2th-(pa3th)-e2-o(o3)-nu2r-it(et)′i2s. Gen., *-it′idos* (*-is*). For deriv., see Sympathy and Neuritis. Inflammation of the sympathetic nerve.

SYMPATHETIC, adj. Si2m-pa2th-e2t′i2k. Gr., συμπαθής, συμπαθητικός. Lat., *sympatheticus*, *sympathicus*. Fr., *sympathique*. Ger., *sympathetisch*, *sympathisch*. Having sympathy with something else, due to sympathy, maintaining or promoting sympathy; pertaining to the sympathetic nerve; as a n., the s. nerve. [α, 17, 48.]—**Great s.** See *S.* nerve.

SYMPATHETICUS (Lat.), adj. and n. m. Si2m(su6m)-pa2th-(pa3th)-e2t(at)′i2k-u3s(u4s). See Sympathetic.—**S. minor.** See *Facial* nerve.

SYMPATHETIPLEX [Coues], n. Si2m-pa2th-e2t′i2-ple2x. From συμπαθητικός, sympathetic, and *plexus* (*q. v.*). A plexus of the sympathetic nerve. ["Med. Record," July 30, 1887 (L).]

SYMPATHICUS (Lat.), adj. and n. m. Si2m(su6m)-pa2th(pa3th)′i2k-u3s(u4s). See Sympathetic.

SYMPATHIKOASTHENIE (Ger.), n. Zu6m-pa3t-ek-o-a3s-tan-e′. Acute neurasthenia of the sympathetic nervous centres, especially those of the digestive and reproductive organs. [Averbeck, "Dtsch. Med.-Ztg.," Apr. 8, 1886, p. 313 (α, 34).]

SYMPATHY, n. Si2m′pa2th-i2. Gr., συμπάθεια. Fr., *sympathie*. Ger., *Sympathie*, *Gleichgefühl*. That relation of different parts of the system in virtue of which one part becomes diseased or disordered in consequence of disease or disorder existing in some other part, not because of actual extension of the morbid process.

SYMPEPSIS (Lat.), n. f. Si2m(su6m)-pe2ps′i2s. Gen., *-peps′eos* (*-is*). Gr., σύμπεψις (from συμπέσσειν, to soften by heat). Fr., *sympepsie*. 1. See Coction and Digestion. 2. The ripening of an abscess. [L, 50 (α, 14).]

SYMPETALICUS (Lat.), adj. Si2m(su6m)-pe2t-a2l(a3l)′i2k-u3s-(u4s). From σύν, with, and πέταλον, a leaf. Fr., *sympétalique*. Having the stamens growing to the petals so that the corolla appears to be monopetalous. [α, 35.]

SYMPETALOUS, adj. Si^{2}m-pe^{2}t'a^{2}l-u^{3}s. Lat., *sympetalus.* Fr., *sympétalé.* See GAMOPETALOUS. The *Sympetalœ* are the *Gamopetalœ.* [*a*, 35.]

SYMPEXION (Fr.), n. Sa^{2}n^2-pe^{2}x-e-o^{2}n^2. A concrement.

SYMPEXIS (Lat.), n. f. Si^{2}m(su^{6}m)-pe^{2}x(pax)'i^{2}s. Gen., *-ex'eos (-is).* Gr., σύμπηξις (from συμπηγνύναι, to put together). Fr., *sympexion.* See CONCRETION.

SYMPHORA (Lat.), n. f. Si^{2}m(su^{6}m)'fo^{2}r-a^3. Gr., συμφορά (from συμφέρειν, to bring together). See CONGESTION.

SYMPHOREMA (Lat.), n. n. Si^{2}m(su^{6}m)-fo^{2}r-em(am)'a^3. Gen., *-em'atos (-atis).* Gr., συμφόρημα. Fr., *symphorème.* The condition of being congested. [L, 50 (*a*, 48).]

SYMPHORESIS (Lat.), n. f. Si^{2}m(su^{6}m)-fo^{2}r-e(a)'si^{2}s. Gén., *-es'eos (-is).* Gr., συμφόρησις. Fr., *symphorèse.* See CONGESTION.

SYMPHORETICUS Lat.)), adj. Si^{2}m(su^{6}m)-fo^{2}r-e^{2}t(at)-i^{2}k-u^{3}s(u^{4}s). Caused by congestion. [L, 50 (*a*, 14).]

SYMPHORICARPUS (Lat.), n. m. Si^{2}m(su^{6}m)-fo^{2}r-i^2-ka^{3}rp'-u^{3}s(u^{4}s). From συμφορεῖν, to bear together, and καρπός, fruit. Fr., *symphorine, symphoricarpe.* Ger., *Petersstrauch.* A genus of caprifoliaceous shrubs, of the *Lonicereœ ;* snow-berry. [L, 35.]—**S. vulgaris.** Fr., *arbousier de l'Amérique.* Ger., *gemeiner Petersstrauch.* Coral-berry, Indian currant ; a shrub found in the central and southern parts of the United States. The root and branches are used as a febrifuge. [*a*, 35.]

SYMPHYCARPEUS (Lat.), adj. Si^{2}m(su^{6}m)-fi^2(fu^6)-ka^{3}rp'e^2-u^{3}s(u^{4}s). From συμφυής, growing together, and καρπός, fruit. Ger., *symphikarpisch.* See SYNCARPOUS.

SYMPHYSE (Fr., Ger.), n's. Sa^{2}n^2-fez, zu^{6}m-fu^{6}z'e^2. See SYMPHYSIS.—**S. cardiaque** (Fr.). See *Cardiac* SYMPHYSIS.—**S. utéropariétale** (Fr.). Of Segond, see HYSTEROPEXIA.

SYMPHYSEOTOMY, n. Si^{2}m-fi^{2}s-e^2-o^{2}t'o^{2}m-i^2. See SYMPHYSIOTOMY.

SYMPHYSION (Lat.), n. n. Si^{2}m(su^{6}m)-fi^{2}s(fu^{6}s)'i^2-o^{2}n. From σύμφυσις, a growing together. Of Török, the superior portion of the symphysis menti. [*a*, 34.]

SYMPHYSIOTOMY, n. Si^{2}m-fi^{2}s-i^2-o^{2}t'o^{2}m-i^2. Lat., *symphyseotomia, symphysiotomia* (from σύμφυσις [see SYMPHYSIS], and τομή, a cutting). Fr., *symphyséotomie.* Ger., *Symphyseotomie, Symphysiotomie.* The operation of cutting through a symphysis (2d def.) so as to separate the bones that it serves to join.—**Pubic s.** Ger., *Schamfugenschnitt.* The Sigaultian operation, proposed by Sigault in 1768 and soon almost abandoned, but recently revived ; division of the pubic symphysis during labor, for the purpose of allowing the ossa innominata to spread apart so as to increase the conjugate diameter of the pelvis in dystocia due to contraction (to not less than 2·6 inches). Morisani makes an incision from about 2 inches above the symphysis down to the articulation, and then cuts through the interosseous cartilage from below upward with a bistoury. [A, 15.]

SYMPHYSIS (Lat.), n. f. Si^{2}m(su^{6}m)'fi^{2}s(fu^{6}s)-i^{2}s. Gen., *-phys'eos, symph'ysis.* Gr., σύμφυσις (from συμφύειν, to grow together). Fr., *symphyse.* Ger., *Symphyse, Verwachsung.* 1. In general, any sort of articulation of bones. 2. More especially, that one of the three orders of articulation (arthrosis) which includes all joints, whether movable or immovable, in which the bones are held together by some structure interposed between them. As commonly employed, the word refers more particularly to the pelvic joints, especially to that formed by the two pubic bones. 3. The growing together of parts normally distinct. 4. In botany, see COALESCENCE.—**Cardiac s.** Fr., *symphyse cardiaque.* See CONCRETIO *pericardii.*—**Pubic s.** Lat., *s.* (*ossium*) *pubis.* Fr., *symphyse pubienne* (ou *du pubis*). Ger., *Schambeinverbindung, Schamfuge, Schambeinsymphyse.* The union of the pubic bones in the middle line. [L.]—**Renal s.** More or less complete fusion of the two kidneys. [*a*, 34.]—**Sacro-coccygeal s.** See *Sacro-coccygeal* ARTICULATION.—**Sacro-iliac s.** See *Sacro-iliac* ARTICULATION.—**S. cartilaginea.** See SYNCHONDROSIS.—**S. ligamentosa.** See SYNDESMOSIS.—**S. menti, S. of the inferior maxilla, S. of the jaw.** Ger., *Unterkieferfuge, Kinnnaht.* An anterior median vertical ridge upon the outer surface of the lower jaw indicating the line of union of its two halves. [L.]—**S. (ossium) muscularis.** See SYSSARCOSIS.—**S. (ossium) pubis.** See *Pubic s.*

SYMPHYSODACTYLIA (Lat.), n. f. Si^{2}m(su^{6}m)''fi^{2}s(fu^{6}s)-o-(o^3)-da^{2}kt(da^{3}kt)-i^{2}l(u^{6}l)'i^2-a^3. From συμφύειν, to grow together, and δάκτυλος, a finger. Fr., *symphysodactylie.* See SYNDACTYLISM.

SYMPHYSOPSIA (Lat.), n. f. Si^{2}m(su^{6}m)-fi^{2}s(fu^{6}s)-o^{2}ps'i^2-a^3. From σύμφυσις, a growing together, and ὄψις, the eye. Fr., *symphysopsie.* See CYCLOPIA.

SYMPHYSOSKELIA (Lat.), n. f. Si^{2}m(su^{6}m)-fi^{2}s(fu^{6}s)-o(o^3)-skel(ske^{2}l)'i^2-a^3. From σύμφυσις, a growing together, and σκέλος, the leg. The condition of a sympus. [*a*, 34.]

SYMPHYSOTOMY, n. Si^{2}m-fi^{2}s-o^{2}t'om-i^2. See SYMPHYSEOTOMY.

SYMPHYSTEMONOUS, adj. Si^{2}m-fi^2-ste^{2}m'o^{2}n-u^{3}s. From συμφύειν, to grow together, and στήμων, a filament. Having united stamens. [*a*, 35.]

SYMPHYTOS (Lat.), adj. Si^{2}m(su^{6}m)'fi^{2}t(fu^{6}t)-o^{2}s. Gr., σύμφυτος (from συμφύειν, to grow together). 1. Congenital, innate, natural. 2. Grown together. [A, 311 (*a*, 21).]

SYMPHYTUM (Lat.), n. n. Si^{2}m(su^{6}m)'fi^{2}t(fu^{6}t)-u^{3}m(u^{4}m). Gr., σύμφυτος. Fr., *consoude.* Ger., *Beinwell, Beinwelle.* A genus of the *Boraginaceœ ;* of the ph's, *S. officinale.* The *Symphyteœ* are a tribe of the *Borragineœ.* [*a*, 35.]—**Conserva symphyti.** A preparation made by boiling the root of *S. officinale* in water, pounding in a mortar, sifting through a silk sieve, and boiling with twice the amount of sugar. [B, 119 (*a*, 38).]—**Decoctum symphyti** [Belg. Ph.]. A decoction made by macerating 1 part of the root of *S. officinale* for an hour with water enough to make 20 parts after boiling for a quarter of an hour and straining. [B, 95 (*a*, 38).]—**Radix symphyti** [Belg. Ph.]. Fr., *consoude (grande, racine)* [Fr. Cod.]. Sp., *sinfito mayor, consuelda mayor* [Sp. Ph.]. The root of *S. officinale.* [B, 95 (*a*, 38).]—**S. maculosum.** See PULMONARIA *officinalis.*—**S. majus.** See *S. officinale.*—**S. medium.** See AJUGA *genevensis.*—**S. minimum.** See BELLIS *perennis.*—**S. minus.** See PRUNELLA *vulgaris.*—**S. officinale.** Fr., *consoude officinale, grande consoude* [Fr. Cod.] (ou *consyre*), *herbe à la coupure, langue de vache, pecton.* Ger., *gebräuchlicher* (oder *gemeiner*) *Beinwell, Wallwurz, Wallkraut, Schwarzwurzkraut, Heilwurzel, Beinwurzel.* The σύμφυτον ἕτερον of Dioscorides, alum, backwort, black root, boneset, knitback, common comfrey ; a mucilaginous plant of Europe and northern Asia, naturalized in North America. The root, leaves, and flowers, *radix, herba,* et *flores consolidœ* (seu *symphyti majoris*), are official, but the root is the part chiefly used. It was formerly reputed a vulnerary, but is now used as a demulcent and pectoral. [*a*, 35.]—**S. tuberosum.** Tuberous-root comfrey ; a European species used like *S. officinale.* [*a*, 35.]—**Syrupus symphyti.** Fr., *sirop de grande consoude.* A preparation made by macerating 8 parts of the root of *S. officinale* with 45 of cold water for twelve hours, straining, adding 250 parts of syrup, and boiling to a syrup. [B, 119 (*a*, 38).]

SYMPIESIS (Lat.), n. f. Si^{2}m(su^{6}m)-pi(pi^2)'e^{2}s-i^{2}s. Gen., *-es'eos (-i'esis).* Gr., συμπίεσις. Fr., *sympièse.* Ger., *Zusammendrücken.* Compression, pressure. [L, 50 (*a*, 14).]

SYMPIESOMETER, SYMPIEZOMETER, n's. Si^{2}m-pi-e^{2}s-o^{2}m'e^{2}t-u^{6}r, -e^{2}z-o^{2}m'e^{2}t-u^{6}r. Lat., *sympiesometrum* (from συμπιέζειν, to compress, and μέτρον, a measure). Fr., *sympiézomètre.* Ger., *Luftdruckmesser.* A barometer in which the changes of volume in a quantity of confined air indicate the fluctuations of the atmospheric pressure. [L, 49, 87 (*a*, 50).]

SYMPLAST, n. Si^{2}m'pla^{2}st. From σύν, with, and πλάσσειν, to mold. Fr., *symplate.* See PLASMODIUM.

SYMPLOCARPUS (Lat.), n. m. Si^{2}m(su^{6}m)-plo(plo^3)-ka^{3}rp'u^{3}s-(u^{4}s). From σύμπλοκος, entwined, and καρπός, fruit. Fr., *symplocarpe.* Ger., *Fachkolben.* A genus of the *Aroideœ.* [*a*, 35.]—**S. fœtidus.** Ger., *stinkender Fachkolben.* Skunk- (or meadow-, or polecat-) cabbage (or weed) of North America, the *dracontium* of the U. S. Ph., 1870. Its disgusting odor, due to an extremely volatile oil, is dissipated by heat. The rhizome, including the radicles, *radix symplocarpi* (seu *dracontii*), is stimulant, antispasmodic, and narcotic, and is used in chronic catarrh, rheumatism, chorea, hysteria, and dropsy. The acrid seeds are used in dropsy and rheumatism. The leaves are applied to ulcers. [*a*, 35.]

SYMPLOCIA (Lat.), n. f. Si^{2}m(su^{6}m)-plo(plo^2)'si^2(ki^2)-a^3. From σύν, with, and πλοκή, a twining. Fr., *symplocie.* Ger., *Verflechtung.* A morbid intertwining of parts. [L, 50 (*a*, 14).]

SYMPLOCIUM (Lat.), n. n. Si^{2}m(su^{6}m)-plo(plo^2)'si^2(ki^2)-u^{3}m-(u^{4}m). Fr., *symplocion.* The sporangeium of a fern. [*a*, 35.]

SYMPLOCOS (Lat.), n. f. Si^{2}m(su^{6}m)'plo^{2}k-o^{2}s. From σύμπλοκος, interwoven. Fr., *symploque.* A genus of trees and shrubs giving name to a tribe (the *Symploceœ,* or *Symplocineœ*) of the *Styracaceœ,* at first considered as a distinct order. [*a*, 35.]—**S. alstonia.** Fr., *thé de Santa Fé* (ou *de Bogotá*). A shrub of New Granada with leaves resembling tea leaves, for which they are substituted in South America. They are considered diaphoretic and stomachic. [*a*, 35.]—**S. racemosa.** An East Indian tree. The bark (lodh or lotur bark) is used as a mild astringent and in menorrhagia. [*a*, 35.]—**S. tinctoria.** Ger., *Süssblatt.* Horse-sugar, sweet-leaf of the southern United States ; a tree with a bitter aromatic root used as a digestive and alterative. [*a*. 35.]

SYMPODIA (Lat.), n. f. Si^{2}m(su^{6}m)-pod(po^{2}d)'i^2-a^3. From σύν, with, and πούς, the foot. Ger., *Sympodie, Sirenenbildung.* The condition of a sympus.

SYMPODIUM (Lat.), n. n. Si^{2}m(su^{6}m)-pod(po^{2}d)'i^2-u^{3}m(u^{4}m). Fr., *s.* A stem, resembling a simple axis, composed of a series of axes arising successively as branches one from the other. [*a*, 35.] Cf. MONOPODIUM.

SYMPTOM, n. Si^{2}mp't'm. Gr., σύμπτωμα (from συμπίπτειν, to fall together). Fr., *symptôme.* Ger., *S.* Any perceptible change in the body or its functions which may be taken as an indication of the nature, situation, severity, etc., of a morbid process. See also SIGN.—**Argyll Robertson s.** See *Robertson s.*—**Branch's s.** See *Romberg's* SIGN.—**Chevostek s.** In tetany, an increase of the mechanical excitability of the nerves elicited by stroking or pinching a muscle. [*a*, 34.]—**Direct s.** A s. that depends directly upon the disease. [D, 3.]—**Graefe's s.** See *Von Graefe's s.*—**Guyon's s.** Renal ballottement.—**Indirect s.** A s. which is the indirect consequence of the disease.—**Layrinthine s's.** A group or complex of s's supposed to be due to some disease of the internal ear and characterized by irritative phenomena, such as subjective sensations of hearing, hyperæsthesia acustica, giddiness, staggering, or vomiting, and by paralytic phenomena, such as diminution of the sharpness of hearing or total deafness. [F, 32.]—**Negatively pathognomonic s.** A s. which seldom or never occurs in a certain disease, and consequently, if present, shows that the case is not one of that disease.—**Parrot's s.** Dilatation of the pupil on pinching the skin ; observed in meningitis.—**Passive s.** See *Statical s.*—**Pathognomonic s.** A s. which undeniably indicates the existence of a certain disease. [D, 3.]—**Physical s's.** See *Physical* SIGNS.—**Robertson s.** Immobility of the pupil under the stimulus of light, associated with normal reaction to accommodative movements.—**Romberg's s.** See *Romberg's* SIGN.—**Rosenbach's s.** Abolition of the abdominal reflex.—**Statical s.** A s. which indicates only a condition localized in an organ. [D, 3.]—**Sympathetic s's.** S's which appear with the essential ones, but for the presence of which no cause can be assigned except that of sympathy.—**Von Graefe's s.** Dissociation of the movements of the globe of the eye and those of the upper lid.—**Westphal's s.** See *Westphal's* SIGN.—**Wintrich's percussion s.** Ger., *Schallwechsel.* The

change produced in the percussion note over a pulmonary cavity by the opening and shutting of the patient's mouth (the sound being rendered higher and louder when the mouth is open). A free communication between the cavity and the mouth is necessary to the production of this phenomenon. ["Wien. med. Wochenschr.," July 6, 1889 (α, 18).]

SYMPTOMATIATRIA (Lat.), n. f. Si²mp(su⁶mp)-to²m(tom)-a²t(a³t)-i²-a²t(a³t)-ri(re)'a³. From σύμπτωμα, a symptom, and ἰατρεία, medical treatment. Symptomatic treatment; of Leonhardi, homœopathy. [L, 50 (α, 14).]

SYMPTOMATIC, SYMPTOMATICAL, adj's. Si²mp-to²m-a²t'i²k, -a²t'i²-k'l. Gr., συμπτωματικός. Fr., *symptomatique.* Ger., *symptomatisch.* According to or pertaining to symptoms; of the nature of a symptom. [D, 20.]

SYMPTOMATOGRAPHY, SYMPTOMATOLOGY, n's. Si²mp-to²m-a²t-o²g'ra²f-i, -o²l'o-ji². From σύμπτωμα, a symptom, and γράφειν, to write, or λόγος, understanding. Fr., *symptomatographie, symptomatologie.* Ger., *Symptomatologie, Krankheitsfällebeschreibung, Krankheitszeichenlehre.* The science or study of symptoms.

SYMPTÔME (Fr.), n. Sa²n²p-tom. See SYMPTOM.—**S's procéduriers.** Of Lacassagne, such cerebral symptoms as develop in a person, usually an employee injured at his work or the victim of some accident, who is seeking indemnity for the real or supposed injury. These apparently morbid phenomena are most noticeable while the legal process (Fr., *procédure*) is pending, and usually disappear promptly when the indemnity claimed is awarded. ["Sem. méd.," Aug. 21, 1889, p. 305 (α, 18).]

SYMPTOSIS (Lat.), n. f. Si²m(su⁶m)-ptos'i²s. Gen., *-tos'eos (-is).* Gr., σύμπτωσις (from συμπίπτειν, to fall together). Fr., *symptose.* 1. See COLLAPSE. 2. Rapid emaciation. [L, 41, 50 (α, 14).]

SYMPUS (Lat.), n. m. Si²m(su⁶m)'pu³s(pus). From σύν, with, and πούς, the foot. A monster in which the lower extremities are more or less completely united. [α, 34.]—**S. apus.** A s. in which there is no trace of the feet. [α, 34.]—**S. dipus.** A s. in which there are two distinct feet. [α, 34.]—**S. monopus.** A s. in which there is but one distinct foot. [α, 34.]

SYNACMY, n. Si²n-a²k'mi². From σύν, with, and ἀκμή, maturity. See SYNANTHESIS.

SYNACTIC, adj. Si²n-a²kt'i²k. Gr., συνακτικός (from συνάγειν, to bring together). Lat., *synacticus.* Fr., *synactique.* Ger., *sammelnd, anhäufend.* Accumulative; condensing. [L, 50 (α, 48).]

SYNADELPHUS (Lat.), n. m. Si²n(su⁶n)-a²d(a³d)-e²lf'u³s(u⁴s). From σύν, with, and ἀδελφός, a brother. Fr., *synadelphe.* Of Geoffroy St.-Hilaire, a monster having one head and one trunk, but eight distinct limbs, instead of the normal four. [L, 41, 49 (α, 14).]

SYNÆREMA (Lat.), n. n. Si²n(su⁶n)-e²r(a³-e²r)-em(am)'a³. Gen., *-em'atos (-atis).* From συναιρεῖν, to bring together See CORRUGATION.

SYNAGOGE (Lat.), n. f. Si²n(su⁶n)-a²g(a³g)-o'je(ga). Gen., *-og'es.* Gr., συναγωγή (from συνάγειν, to bring together). See CONTRACTION.

SYNALGIA (Lat.), n. f. Si²n(su⁶n)-a²lj(a³lg)'i²-a³. From συναλγεῖν, to share in suffering. Fr., *synalgie.* Of Fromentel, sympathetic pain.

SYNANASTOMOSIS (Lat.), n. f. Si²n(su⁶n)-a²n(a³n)-a²st(a³st)-o²m-os'i²s. Gen., *-os'eos (-is).* For deriv., see *Syn-** and ANASTOMOSIS. Fr., *synanastomose.* Ger., *Synanastomose.* Of Galen, the anastomosis of several vessels. [L, 50 (α, 14).]

SYNANCHE (Lat.), n. f. Si²n(su⁶n)-a²n²k(a³n²ch²)'e(a). Gen., *-anch'es.* Gr., συνάγχη (from σύν, with, and ἄγχειν, to strangle). Fr., *synancie.* See CYNANCHE.

SYNANGEIUM (Lat.), n. n. Si²n(su⁶n)-a²n(a³n²)-ji'(ge²'i²)-u³m(u⁴m). From σύν, with, and ἀγγεῖον, a vessel. A compound sporangeium; a sorus formed of sporangeia growing together.

SYNANTHEÆ (Lat.), n. f. pl. Si²n(su⁶n)-a²nth(a³nth)'e²-e-(a³-e²). From σύν, with, and ἄνθος, a flower. Fr., *synanthées.* Of Viviani, plants the flowers and leaves of which are developed simultaneously. [α, 35.]

SYNANTHEMA (Lat.), n. n. Si²n(su⁶n)-a²nth(a³nth)-em(am)'-a³. Gen., *-em'atos (-atis).* From συνανθεῖν, to blossom together. Ger., *Synanthem.* A cluster of efflorescences on the skin. [G.]

SYNANTHERÆ (Lat.), **SYNANTHEREÆ** (Lat.), n's f. pl. Si²n(su⁶n)-a²nth(a³nth)-er(ar)'e(a³-e²), -er(ar)'e²-e(a³-e²). Fr., *synanthérées.* The *Compositæ.* [α, 35.]

SYNANTHEROUS, adj. Si²n-a²nth-er'u³s. From *syn-*, with, and *anthera*, an anther. Lat., *synanthereus, synantherieus.* Fr., *synanthérique.* Ger., *verwachsenbeutelig.* Having the stamens coalescent by their anthers. The *Synantheria* are a class so characterized. [α, 35.]

SYNANTHESIS (Lat), n. f. Si²n(su⁶n)-a²nth(a³nth)-e(a)'si²s. Gen., *-es'eos (-is).* From συνανθεῖν, to blossom together. The simultaneous ripening of the stamens and pistils of a flower. [α, 35.]

SYNANTHIE (Fr.), n. Sen-a³n²-te. The abnormal union of two or more flowers. [α, 35.]

SYNANTHOCARPOUS, adj. Si²n-a²nth-o-ka³rp'u³s. Lat., *synanthocarpus* (from σύν, with, ἄνθος, a flower, and καρπός, a fruit). Fr., *synanthocarpe.* Of a fruit, resulting from the aggregation of a number of flowers into one mass, as in the cone. [α, 35.]

SYNANTHROSE, n. Si²n-a²nth'ros. Ger., *S.* A carbohydrate, $C_{12}H_{22}O_{11}$, found in *Helianthus tuberosus* and other *Compositæ.* [B, 4.]

SYNAPHYMENITIS (Lat.), n. f. Si²n(su⁶n)-a²f(a³f)-i(u⁶)-me²n-i(e)'ti²s. Gen., *-it'idos (-idis).* From συναφή, connection, and ὑμήν, a membrane. An old term for conjunctivitis.

SYNAPTASE, n. Si²n-a²p'tas. From συνάπτειν, to bind together. See EMULSIN.

SYNARTHRODIA (Lat.), n. f. Si²n(s⁶un)-a³rth-rod'i²-a³. See SYNARTHROSIS.

SYNARTHRODIAL, adj. Si²n-a³rth-rod'i²-'l. Fr., *synarthrodial.* Ger., *synarthrodisch.* Having the character of synarthrosis.

SYNATHRŒSIS (Lat.), **SYNATHRŒSMUS** (Lat.), n's f. and m. Si²n(su⁶n)-a²th(a³th)-res'(ro²'e²s)-i²s, -mu³s(mu⁴s). Gr., συνάθροισις, συναθροισμός (from συναθροίζειν, to gather together). Fr., *synathroïsme.* See CONGESTION.

SYNARTHROSIS (Lat.), n. f. Si²n(su⁶n)-a³rth-ros'i²s. Gen., *-thros'eos (-is).* Gr., συνάρθρωσις (from σύν, with, and ἄρθρον, a joint). Fr., *synarthrose.* Ger., *Synarthrose, Gelenksunbeweglichkeit.* That one of the three orders of articulation (arthrosis) which includes the immovable joints. Its varieties are suture, harmony, and gomphosis. [L, 115.]—**Diarthrodial s.** See AMPHIARTHROSIS.

SYNCAMPE (Lat.), n. f. Si²n²(su⁶n²)-ka²mp(ka³mp)'e(a). Gen., *-camp'es.* Gr., συγκαμπή (from συγκάμπτειν, to bend). Fr., *s.* A very flexible joint; of Hippocrates, the elbow joint. [L, 50 (α, 14).]

SYNCANTHUS (Lat.), n. m. Si²n²(su⁶n²)-ka²nth(ka³nth)'u³s-(u⁴s). From σύν, with, and κανθός, a canthus. An old term for an abnormal adhesion between the ocular conjunctiva and the orbital margin. [F.]

SYNCARP, n. Si²n'ka³rp. Lat., *syncarpium* (from σύν, with, and καρπός, fruit). Fr., *syncarpe.* Ger., *Knäuelbeere* (1st def.), *Fruchthaufen* (1st def.). 1. See *Collective* FRUIT. 2. See *Aggregated* FRUITS (2d def.).

SYNCARPOUS, adj. Si²n-ka³rp'u³s. Fr., *syncarpé.* Of a pistil or fruit, made up of two or more united carpels. The *Syncarpæ* of Lindley are a cohort of the *Polypetalæ* consisting of the *Malvales, Meliales, Rhamnales, Euphorbiales,* and *Silenales.* [α, 35.]

SYNCARPY, n. Si²n'ka³rp-i². The accidental adhesion of several fruits. [α, 35.]

SYNCAUSIS (Lat.), n. f. Si²n²(su⁶n²)-ka⁴s'(ka³'u⁴s)-i²s. Gen., *-caus'eos (-is).* Gr., σύγκαυσις (from συγκαίειν, to burn up). Fr., *s.* Combustion. [A, 322, 325 (α, 48).]

SYNCEPHALUS (Lat.), n. m. Si²n(su⁶n²)-se²f(ke²f)'a²l(a³l)-u³s(u⁴s). From σύν, with, and κεφαλή, the head. Fr., *syncéphalien.* Of Veit, that variety of the cephalothoracopagus in which the heads are united. [α, 34.]

SYNCHEILIA (Lat.), n. f. Si²n²(su⁶n²)-kil'(ch²e²'i²l)-i²-a³. From σύν, with, and χεῖλος, a lip. Labial atresia. [α, 34.]

SYNCHITON (Lat.), n. m. Si²n²(su⁶n²)-kit(ch²et)'o²n(on). Gen., *-on'os (-is).* From σύν, with, and χιτών, a tunic. Fr., *s.* See CONJUNCTIVA.

SYNCHITONITIS (Lat.), n. f. Si²n(su⁶n)-kit(ch²et)-o²n-i(e)'-ti²s. Gen., *-it'idos (-idis).* See CONJUNCTIVITIS.

SYNCHONDROSIS (Lat.), n. f. Si²n²(su⁶n²)-ko²nd(ch²o²nd)-ros'i²s. Gen., *-os'eos (-is).* Gr., συγχόνδρωσις (from σύν, with, and χόνδρος, cartilage). Fr., *synchondrose.* Ger., *Synchondrose, Knorpelband, Knorpelverbindung, Knorpelbeinfügung.* That variety of symphysis in which the bones are articulated by means of cartilage interposed between them.—**Pubic s.** See *Pubic* SYMPHYSIS.—**Sacro-iliac s.** See *Sacro-iliac* ARTICULATION. As Luschka has shown it to be a movable joint, the use of the term should be given up.—**S. arycorniculata, S. arysantoriniana.** The s. between the arytænoid cartilages and the cartilages of Santorini. [L, 332.]—**S. intersphenoidalis.** The fœtal s. between the basisphenoid and presphenoid bones. [L.]—**S. pubis.** See *Pubic* SYMPHYSIS.—**S. sacrococcygea.** The s. between the sacrum and the coccyx. [L.]—**S. sphenobasilaris.** See *S. spheno-occipitalis.*—**S. sphenoidalis.** See *S. intersphenoidalis.*—**S. spheno-occipitalis.** The s. between the basilar process of the occipital bone and the body of the sphenoid bone. [L.]

SYNCHONDROTOMY, n. Si²n-ko²nd-ro²t'om-i². From σύν, with, χόνδρον, cartilage, and τομή, a cutting. Fr., *synchondrotomie.* Ger., *Knorpelschnitt.* 1. See SYMPHYSEOTOMY. 2. Section of a synchondrosis. [L, 41, 50 (α, 14).]

SYNCHRONISM, n. Si²n'kro²n-i²zm. Gr., συγχρονισμός (from σύν, with, and χρόνος, time). Simultaneousness.

SYNCHRONOUS, adj. Si²n'kro²n-u³s. Gr., σύγχρονος. Simultaneous.

SYNCHYSIS (Lat.), n. f. Si²n²(su⁶n²)'ki²s(ch²u⁶s)-i²s. Gen., *-chys'eos, synch'ysis.* Gr., σύγχυσις (from συγχεῖν, to pour together). Fr., *s.* Ger., *S.* Commixture, confusion. [A, 311 (α, 48).]—**S. corporis vitrei.** Ger., *Glaskörperauflösung.* Fluidity or liquefaction of the vitreous humor, a pathological condition found in many diseases of the interior coats of the eyeball. [F.]—**S. scintillans.** Ger., *Flimmers'.* A fluid condition of the vitreous humor in which it is filled with crystals of cholesterin that sparkle brilliantly under the ophthalmoscope. [F.]—**S. simplex.** A softened or fluid state of the vitreous humor with small floating opacities; very often a senile change. [F.]

SYNCHYTECPHLOGIA (Lat.), **SYNCHYTECPHLOGIOIS** (Lat.), n's f. Si²n²(su⁶n²)-kit(ch²u⁶t)-e²k-floj(flo²g)'i²-a³, -floj-(flo²g)-i²'o²-i²s. From συγχεῖν, to commingle, and ἐκφλέγειν, to set on fire. Fr., *synchytecphlogie.* Confluent small-pox. [L, 50 (α, 14).]

SYNCHYTRIUM (Lat.), n. n. Si²n²(su⁶n²)-ki²t(ch²u⁶t)'ri²-u³m-(u⁴m). From σύν, with, and χυτρίον, a little pot. A genus of the *Chytrideæ.* [α, 35.]—**S. aureum.** A species forming little orange-red spots on the leaves and stalks of plants. [A, 396 (α, 21).]—**S. miescherinum.** Ger., *Miescher'sche (Rainey'sche) Schläuche.* Ovoid bodies found in the muscles of many vertebrates (in swine sometimes mistaken for *Trichinæ*) consisting of a capsule including a granular substance with sickle- or kidney-shaped spores, regarded as belonging to the *Sporozoa.* [Braun (L).]

SYNCLEISIS (Lat.), n. f. Si2n2(su6n2)-klis'(kle2'i2s)-i2s. Gen., *-cleis'eos* (*-is*). Gr., σύγκλεισις (from συγκλείειν, to shut up). Fr., *syncléise.* See OCCLUSION.

SYNCLINAL, adj. Si2n-kli'n'l. From συγκλίνειν, to lean together. Fr., *synclitique.* Inclining toward each other.

SYNCLISTUS (Lat.). adj. Ger., *geschlossenfrüchtig.* Of fruits, not dehiscing at maturity. [*a*, 35.]

SYNCLITIC, adj. Si2n-kli2t'i2k. See SYNCLINAL.

SYNCLITISM, n. Si2n-kli2t-i2zm. See *Synclitic* MOVEMENT *of the fœtal head.*

SYNCLONESIS (Lat.), n. f. Si2n2(su6n2)-klo2n-e(a)'si2s. Gen., *-es'eos* (*-is*). From συγκλονεῖν, to dash together. Fr., *synclonèse.* See *General* CONVULSION.

SYNCLONUS (Lat.), n. m. Si2n2(su6n2)'klo2n-u3s(u4s). From σύν, with, and κλόνος, a violent confused motion. See *General* CONVULSION.—**S. ballismus.** Of J. M. Good, see PARALYSIS *agitans.*—**S. beriberia, S. indicus.** See BERIBERI.—**S. saltans.** See CHOREA *Sancti Viti.*—**S. tremens.** General tremor. [L, 50 (*a*, 14).]

SYNCOPAL, adj. Si2n'ko2-p'l. Pertaining to, affected with, or of the nature of syncope. [D, 36.]

SYNCOPE (Lat.), n. f. Si2n2(su6n2)'ko2p-e(a). Gen., *syn'copes.* Gr., συγκοπή (from συγκόπτειν, to cut short). Fr., *s.* Ger., *Synkope.* Fainting; pallor and loss of consciousness from sudden weakness of the heart's action.—**Laryngeal s.** See *Laryngeal* VERTIGO.—**Local s.** Syn.: *suspended life in local surfaces* [Richardson]. Of B. W. Richardson, a sudden and temporary blanching and loss of sensibility in a part, generally one or more of the fingers. ["Asclepiad," Jan., 1885, p. 1.] Cf. *Local* ASPHYXIA.—**S. (cardiaca) anginosa.** See ANGINA PECTORIS.

SYNCOPTIC, adj. Si2n-ko2pt'i2k. Gr., συγκοπτικός. Lat., *syncopticus.* Pertaining to or causing syncope.

SYNCOTYLEDONOUS, adj. Si2n-ko2t-i2l-e2d'o2n-u3s. From σύν, with, and κοτυληδών, a cavity. See CONFERRUMINATE.

SYNCRANIUS (Lat.), adj. Si2n2(su6n2)-kran(kra3n)'i2-u3s(u4s). From σύν, with, and κρανίον, the skull. Connected with the skull; as a n., the superior maxilla. [L, 50 (*a*, 14).]

SYNCRISIS (Lat.), n. f. Si2n2(su6n2)'kri2s-i2s. Gen., *-cris'eos, syn'crisis.* Gr., σύγκρισις (from συγκρίνειν, to compound). Fr., *syncrisie.* In ancient chemistry, the passage of a body from the liquid into the solid state. [B, 38, 78 (*a*, 14).]

SYNCRITIC, adj. Si2n-kri2t'i2k. Lat., *syncriticus.* Fr., *syncritique.* Ger., *verbindend.* Condensing, astringent. [*a*, 14.]

SYNCYTIUM (Lat.), n. n. Si2n(su6n2)-si2(ku6)'shi2(ti2)-u3m(u4m). From σύν, with, and κύτος, a hollow. 1. See PLASMODIUM. 2. Of Haeckel, the transparent ectoderm of a calcareous sponge at a time when the nucleated cells have become indistinct. [A, 12.]

SYNDACTYLE, adj. Si2n-da2kt'i2l. From σύν, with, and δάκτυλος, a finger. Fr., *s.* Affected with syndactylism (*q. v.*). [L.]

SYNDACTYLISM, n. Si2n-da2kt'i2l-i2zm. Lat., *syndactylia* (from σύν, with, and δάκτυλος, a finger). Fr., *syndactylie.* Ger., *Syndactylie.* A condition in which two or more fingers or toes are coherent for the greater part of their extent. [L, 221.]

SYNDECTOMY, n. Si2n-de2kt'om-i2. From σύνδεσμος, a bond, and ἐκτέμνειν, to cut out. Fr., *syndectomie.* Ger., *Syndektomie.* See PERITOMY.

SYNDENDRIUM (Lat.), n. n. Si2n(su6n)-de2nd'ri2-u3m(u4m). From σύν, with, and δένδρον, a tree. A quadrate disc beneath the umbrella of a *Hydrozoon* suspended by four pillars (dendrostyles) to which are attached the stomatodendra. [L, 147.]

SYNDESIS (Lat.), n. f. Si2n(su6n)'de2s-i2s. Gen., *-des'eos, synd'esis.* Gr., σύνδεσις (from συνδεῖν, to bind together). Mechanical union by means of a bandage or of ligaments. [L, 50 (*a*, 14).]

SYNDESMECTOPIA (Lat.), n. f. Si2n(su6n)-de2s-me2k-top(to2p)'i2-a3. From σύνδεσμος, a bond, and ἐκτόπιος, out of a place. Abnormal position of a ligament. [L, 50 (*a*, 14).]

SYNDESMITIS (Lat.), n. f. Si2n(su6n)-de2s-mi(me)'ti2s. Gen., *-mit'idos* (*-idis*). From σύνδεσμος, a bond. Fr., *syndesmite.* Ger., *S.* 1. See DESMITIS. 2. An old term for conjunctivitis. [F.]—**Blepharo-s.** See the major list.

SYNDESMODIASTASIS (Lat.), n. f. Si2n(su6n)-de2s"mo(mo3)-di(di2)-a2st(a3st)'a2s(a3s)-i2s. Gen., *-as'eos* (*-ast'asis*). From σύνδεσμος, a bond, and διάστασις, separation. Abnormal separation or divergence of ligaments. [L, 50 (*a*, 14).]

SYNDESMOGRAPHY, SYNDESMOLOGY, n's. Si2n-de2s-mo2g'ra2f-i2, -mo2l'o-ji2. Lat., *syndesmographia, syndesmologia* (from σύνδεσμος, a bond, and γράφειν, to write, or λόγος, understanding). Fr., *syndesmographie, syndesmologie.* See DESMOLOGY (1st def.).

SYNDESMOM (Ger.), n. Zu6n-de2s-mom'. A neoplasm in which there is a large amount of connective-tissue formation. [A, 319 (*a*, 34).]

SYNDESMOPATHIA (Lat.), n. f. Si2n(su6n)-de2s-mo(mo3)-pa2th(pa3th)-i(e)'a3. From σύνδεσμος, a bond, and πάθος, disease. See DESMOPATHY.

SYNDESMOPHARYNGEUS (Lat.), n. m. Si2n(su6n)-de2s"-mo(mo3)-fa2r(fa3r)-i2n(u6n2)'je2(ge2)-u3s(u4s). From σύνδεσμος, a bond, and φάρυγξ, the pharynx. Fr., *syndesmo-pharyngien.* A fasciculus of the constrictor pharyngis medius arising from the body of the hyoid bone and the thyreo-hyoid ligament. [L.]

SYNDESMOSIS (Lat.), n. f. Si2n(su6n)-de2s-mos'i2s. Gen., *-os'eos* (*-is*). Fr., *syndesmose.* Ger., *S.*, *Bandgelenk, Bandbeinfügung.* That variety of articulation by symphysis in which the bones are united by ligaments.—**S. basilaris.** The articulation of the petrous portion of the temporal bone with the basilar process of the temporal bone and the body of the sphenoid bone. [L, 332.]—**S. petro-occipitalis.** The occipital portion of the s. basilaris. [L, 31.]

SYNDESMO-THYREOIDEUS (Lat.), n. m. Si2n(su6n)-de2s-mo(mo3)-thir(thu6r)-e2-o(o2)-i2d(ed)'e2-u3s(u4s). From σύνδεσμος, a bond, and θυροειδής, thyreoid. An anomalous form of the subthyreoideus. [L, 332.]

SYNDESMOTOMY, n. Si2n-de2s-mo2t'om-i2. From σύνδεσμος, a bond, and τομή, a cutting. Fr., *syndesmotomie.* Ger., *Gelenkbandzertrennung.* Section or dissection of a ligament.

SYNDESMUS (Lat.), n. m. Si2n(su6n)-de2s'mu3s(mu4s). Gr., σύνδεσμος. See BANDAGE and LIGAMENT.

SYNDROME (Lat.), n. f. Si2n(su6n)'dro2m-e(a). Gen., *synd'romes.* Gr., συνδρομή. Fr., *s.* 1. A concomitant symptom, especially the concurrence of several symptoms not indicating a disease with well-determined anatomical lesions, as in fever, epilepsy, and seasickness. 2. Any well-defined complex of symptoms; the totality of symptoms characterizing a disease. [D; *a*, 18.]

SYNDYASMUS (Lat.), n. m. Si2n(su6n)-di(du6)-a2z(a3s)'mu3s(mu4s). Gr., συνδυασμός (from σύν, with, and δυάζειν, to couple). Fr., *syndiasme.* Of Hippocrates, copulation. [L, 50 (*a*, 14).]

SYNECHES (Lat.), adj. Si2n(su6n)'e2k(e2ch2)-ez(as). Gr., συνεχής (from συνέχειν, to hold together). Continuous; as a n., see *Continued* FEVER.—**S. Gorræi.** See AMPHEMERINA.

SYNECHIA (Lat.), n. f. Si2n(su6n)-e2k(e2ch2)-i(e)'a3. Gr., συνέχεια (from συνέχειν, to hold together). Fr., *synéchie.* Ger., *Synechie.* Continuity, union, adhesion. [L, 41, 50 (*a*, 14).]—**Anterior s.** Adhesion of the iris to the posterior surface of the cornea. [F.]—**Posterior s.** Adhesion of the posterior surface of the iris, usually the sphincter margin, to the anterior capsule of the lens. [F.]—**S. of the pericardium.** Union of the parietal and visceral layers of the pericardium by adhesive inflammation. [D, 70.]

SYNECHOTOMY, n. Si2n-e2k-o2t'om-i2. From συνεχής, continuous, and τομή, a cutting. Fr., *synéchotomie.* Ger., *Synechotomie.* The loosening or detachment of adherent parts of the membrana tympani from the inner wall of the tympanum by means of little rounded knives. [F.]

SYNECTENTEROTOME, n. Si2n-e2kt-e2n'te2r-o-tom. Lat., *synectenterotomus* (from συνέχειν, to confine, ἔντερον, an intestine, and τομή, a cutting). Fr., *synectentérotome.* Ger., *Synektenterotom.* A variety of Dupuytren's enterotome invented by Delpech.

SYNEDRAL, SYNEDROUS, adj's. Si2n-ed'r'l, -ru3s. From σύν, with, and ἕδρα, a seat. Growing on the angle of a stem. [*a*, 35.]

SYNEDREUONTA (Lat.), n. n. pl. Si2n(su6n)-e2d-ru2-o2nt'a3. From συνεδρεύειν, to sit together. Accidental and abnormal symptoms. [L, 50 (*a*, 14).]

SYNEMA (Lat.), n. n. Si2n(su6n)-em(am)'a3. Gen., *-em'atos* (*-atis*). From σύν, with, and νῆμα, a thread. Fr., *synème.* A column of united stamens: of Richard, that part of the column of orchids that represents the filaments of the stamens. [*a*, 35.]

SYNENCEPHALIA (Lat.), n. f. Si2n(su6n)-e2n(e2n2)-se2f(ke2f)-al(a3l)'i2-a3. From σύν, with, and ἐγκέφαλος, the brain. Fr., *synencéphalie.* Ger., *Synencephalie.* A form of double monstrosity in which there are two fully developed bodies with only a single head.

SYNENCEPHALOCELE (Lat.), n. f. Si2n(su6n)-e2n(e2n2)-se2f(ke2f)"a2l(a3l)-o(o3)-se(ka)'le(la); in Eng., si2n-e2n-se2f'a2l-o-sel. Gen., *-cel'es.* From σύν, with, ἐγκέφαλος, the brain, and κήλη, a tumor. Fr., *synencéphalocèle.* Of Spring, a fœtal encephalocele with adhesions to the placenta, the umbilical cord, or the membranes. [A, 301 (*a*, 34).]

SYNENCEPHALUS (Lat.). n. m. Si2n(su6n)-e2n(e2n2) se2f-(ke2f)'a2l(a3l)-u3s(u4s). From σύν, with, and ἐγκέφαλος, the brain. Fr., *synencéphale.* An individual affected with synencephalia.

SYNENERGIA (Lat.), n. f. Si2n(su6n)-e2n-u6rj(e2rg)-i(e)'a3. See SYNERGY.

SYNERGIDE, n. Si2n'u6rj-i2d. Lat., *synergida* (from συνεργός, working together). Fr., *s.*, *cellule adjuvante.* Ger., *Hülfszelle.* One of the two naked, nucleated bodies at the upper end of the embryo sac forming with the oosphere the egg-apparatus. [*a*, 35.]

SYNERGIST, adj. Si2n'u6rj-i2st. Co-operating; as a n., a muscle that co-operates with another, also a drug that acts like another drug. [L, 115 (*a*, 48).]

SYNERGY, n. Si2n'u6rj-i2. Gr., συνέργεια (from συνεργεῖν, to work together). Lat., *synenergia, synergia.* Fr., *synergie.* Ger., *Synergie, Mitwirkung.* Associated activity. [*a*, 17.]

SYNESTECOS (Lat.), adj. Si2n(su6n)-e2st-ek(ak)'o2s(os). From συνιστάναι, to set together. Firm, cohesive (said especially of fæces). [L, 50 (*a*, 14).]

SYNEUROSIS (Lat.), n. f. Si2n(su6n)-u2r-os'i2s. Gen., *-os'eos* (*-is*). Fr., *synévrose.* See SYNNEUROSIS.

SYNGENESIA (Lat.), n. f. Si2n(su6n2)-je2n(ge2n)-ez(e2s)'i2-a3. From σύν, with, and γένεσις, generation. Ger., *Blüthenverein* (2d def.). 1. Of Linnæus, a class of plants characterized by having the stamens united by their anthers. [*a*, 35.] 2. Of later taxonomists, *S. polygamia*; *S.* (1st def.) exclusive of the subdivision *Monogamia.* [*a*, 48.]—**S. æqualis, S. frustranea.** See under *S. polygamia.*—**S. monogamia.** See MONOGAMIA.—**S. necessaria.** See under *S. polygamia.*—**S. polygamia.** Ger., *Blüthenverein, Vereintkolbige.* S. in which the flowers are in heads, comprising five orders: *æqualis*, in which the florets are all hermaphrodite; *superflua*, in which the marginal flowers are pistillate only; *frustranea*, with the marginal flowers neutral, the others perfect; *necessaria*, with the marginal flowers pistillate and fertile, and the central staminate and sterile; and *segregata*, in which each floret has a separate involucre. [*a*, 35.]—**S. segregata, S. superflua.** See under *S. polygamia.*

SYNGENIC, adj. Si^{2}n-je^{2}n'i^{3}k. Gr., *συγγενικός* (from *συγγίγνεσθαι*, to be born with). Lat., *syngenicus*. See Congenital.

SYNGONIUM (Lat.), n. n. Si^{2}n^2(su^{6}n^2)-gon(go^{2}n)'i^2-u^{3}m(u^{4}m). From *σύν*, with, and *γίγνεσθαι*, to be born. Fr., *singonie*. A genus of the *Araceæ*. The *Syngoninæ* of Schott are a subtribe of the *Caladieæ*. [α, 35.]—**S. auritum, S. Plumieri.** West Indian five-fingers. The juice is used as an application to the bites of venomous serpents and as a remedy for dropsy. One variety, *S. neglectum*, is found in Mexico. [α, 35.]

SYNHYMENSIS (Lat.), n. f. Si^{2}n(su^{6}n)-him(hu^{6}m)-e^{2}ns'i^{2}s. Gen., *-en'seos* (*-is*). See Synymensis.

SYNIDROSIS (Lat.), n. f. Si^{2}n(su^{6}n)-i^{2}d(ed)-ros'i^{2}s. Gen., *-ros'eos* (*-is*). From *σύν*, with, and *ἱδρώς*, perspiration. Perspiration associated with some other condition. [α, 34.]

SYNIZESIS (Lat.), n. f. Si^{2}n(su^{6}n)-i^{2}z(ez)-e(a)'si^{2}s. Gen., *-es'eos* (*-is*). Gr., *συνίζησις* (from *συνίζειν*, to sit together). Fr., *synizèse*. Ger., *Augensperre*. See Corocleisis and Myosis (1st def.).

SYNKINESIS (Lat.), n. f. Si^{2}n^2(su^{6}n^2)-ki^{2}n(ken)-e(a)'si^{2}s. Gen., *-es'eos* (*-is*). From *σύν*, with, and *κίνησις*, motion. Of Ross, an involuntary movement of a paralyzed part; occurring in conjunctivitis with voluntary movements of other parts. [α, 34.]

SYNNEUROSIS (Lat.), n. f. Si^{2}n(su^{6}n)-nu^{2}r-os'i^{2}s. Gen., *-os'eos* (*-is*). From *σύν*, with, and *νεῦρον*, a nerve. Fr., *synnévrose*. Ger., *Synneurose*, *Bandbeinfügung*. 1. Of the ancients, any one of various white structures of the body, such as nerves, tendons, ligaments, and aponeuroses. [Plenck (A, 314).] 2. See Syndesmosis.

SYNOCHA (Lat.), n. f. Si^{2}n(su^{6}n)'o^{2}k(o^{2}ch^2)-a^3. Gr., *συνοχή* (from *συνέχειν*, to hold together). See Synochus.

SYNOCHORIUM (Lat.), n. n. Si^{2}n(su^{6}n)-o^{2}k(o^{2}ch^2)-or(o^{2}r)'i^2-u^{3}m(u^{4}m). From *σύνοχος*, joined together, and *χόριον*, a membrane. Fr., *synochorion*. See Diæresilis.

SYNOCHUS (Lat.), n. m. and f. Si^{2}n(su^{6}n)'o^{2}k(o^{2}ch^2)-u^{3}s(u^{4}s). From *συνέχειν*, to hold together. 1. Of Galen, putrid fever. 2. Any fever that lasts a certain time without well-marked remissions or intermissions. [α, 34.]—**S. anniversaria.** A s. that returns on the same date for several years. [α, 34.]—**S. ardens.** Typhoid fever. [α, 34.]—**S. a scabie.** S. caused by scabies. [α, 34.]—**S. biliosa.** Of Galen, s. ardens. [α, 34.]—**S. biliosus.** See *Typhoid* fever.—**S. dysenteriodes.** Of Sauvages, continued fever with diarrhœa. [α, 34.]—**S. pleuritica.** Of Sauvages, a disease prevalent at one time in Montpellier, in which the symptoms were those of continued fever and pleurodynia. [α, 34.]—**S. putris.** See *Typhoid* fever.—**S. rheumatisans.** Of Sydenham, a continued fever with general rheumatic pains. [α, 34.]—**S. sanguinea.** Of Galen, typhoid fever. [α, 34.]—**S. scorbutica.** Of Sennertus, s. caused by scurvy. [α, 34.]—**S. spermatica.** Of Sinibalde, s. attributed to the retention of semen in continent persons. [α, 34.]—**S. sudatoria.** See *Sweating* sickness.—**S. tarantata.** Of Sauvages, s. that is cured by music. [α, 34.]—**S. variolodes, S. variolosus.** See Variola.

SYNOCILS, n. pl. Si^{2}n'o-si^{2}lz. See PalpocILES.

SYNOCREATE, adj. Si^{2}n-o^{2}k're^2-at. From *σύν*, with, and *ocrea*, a sheath. Having the stipules united so as to form a sheath.

SYNŒCIOUS, SYNOICOUS, adj's. Si^{2}n-e'shu^{3}s', -oik'u^{3}s. Lat., *synoicus* (from *συνοικεῖν*, to dwell together). Fr., *synoïque*. Of cryptogams, having antheridia and archegonia on the same receptacle. [α, 35.]

SYNOLCE (Lat.), n. f. Si^{2}n(su^{6}n)-o^{2}ls(o^{2}lk)'e(a). Gen., *-olc'es*. Gr., *συνολκή* (from *συνέλκειν*, to draw together). A cramp, especially of the calf of the leg. [L, 50 (α, 14).]

SYNOPHRYS (Lat.), n. f. Si^{2}n(su^{6}n)'o^{2}f-ri^{2}s(ru^{6}s). Gen., *-oph'ryos* (*-oph'ryis*). From *σύν*, with, and *ὀφρύς*, the eyebrow. Union of the eyebrows by their growing continuously across the root of the nose. [F.]

SYNOPHTHALMIA (Lat.), n. f. Si^{2}n(su^{6}n)-o^{2}f-tha^{2}l(tha^{3}l)'mi^2-a^3. See Cyclopia (1st def.).

SYNOPHTHALMUS (Lat.), n. m. Si^{2}n(su^{6}n)-o^{2}f-tha^{2}l(tha^{3}l)'mu^{3}s(mu^{4}s). From *σύν*, with, and *ὀφθαλμός*, the eye. See Cyclops.

SYNOPHYTY, n. Si^{2}n-o^{2}f'i^{2}t-i^2. From *σύν*, with, and *φυτόν*, a plant. In botany, the union or adhesion of embryos. [α, 35.]

SYNOQUE (Fr.), n. Sen-ok. See Synocha.—**S. accompagnée.** Synocha accompanied with a local inflammation as distinguished from simple synocha. [Marrotte, "Union méd.," Jan. 1, 1885, p. 6.]

SYNORRHIZOUS, adj. Si^{2}n-o^{2}r-riz'u^{3}s. Lat., *synorrhizus* (from *σύν*, with, and *ῥίζα*, a root). Fr., *synorrhize*. Ger., *verwachsenwurzelig*. Having the radicle united or apparently united to the tissue of the albumen, as in the *Synorrhizæ* (of Richard, a subdivision of the *Embryonatæ*, consisting of the *Coniferæ* and *Cycadeæ*). [α, 35.]

SYNOSCHEOS (Lat.), n. m. Si^{2}n(su^{6}n)-o^{2}sk(o^{2}sch^2)'e^2-o^{2}s. From *σύν*, with, and *ὄσχεος*, the scrotum. The condition in which the skin of the penis is adherent to that of the scrotum. [α, 34.]

SYNOSTEOGRAPHY, SYNOSTEOLOGY, n's. Si^{2}n-o^{2}st-e^2-o^{2}g'ra^{2}f-i^2, -o^{2}l'o-ji^2. Lat., *synosteographia*, *synosteologia* (from *σύν*, with, *ὀστέον*, a bone, and *γράφειν*, to write, or *λόγος*, understanding). Fr., *synostéographie*, *synostéologie*. Ger., *Gelenkbeschreibung*, *Gelenklehre*. See Arthrology.

SYNOSTEOPHYTUM (Lat.), n. n. Si^{2}n(su^{6}n)-o^{2}st-e^2-o^{2}f'i^{2}t-(u^{6}t)-u^{3}m(u^{4}m). From *σύν*, with, *ὀστέον*, a bone, and *φυτόν*, a growth. Fr., *synostéophyte*. See Synostosis *congenita*.

SYNOSTEOSIS (Lat.), n. f. Si^{2}n(su^{6}n)-o^{2}st-e^2-os'i^{2}s. Gen., *-os'eos* (*-is*). From *σύν*, with, and *ὀστέον*, a bone. See Synostosis.

SYNOSTEOTOMY, n. Si^{2}n-o^{2}st-e^2-o^{2}t'om-i^2. Lat., *synosteotomia* (from *σύν*, with, *ὀστέον*, a bone, and *τομή*, a cutting). Incision into a joint. [E.]

SYNOSTOSIS (Lat.), n. f. Si^{2}n(su^{6}n)-o^{2}st-os'i^{2}s. Gen., *-os'eos* (*-is*). From *σύν*, with, and *ὀστέον*, a bone. This form is more commonly used than synosteosis, and is equally justifiable, since in many of the classical Greek derivatives of *ὀστέον* the *ε* is omitted. Fr., *synostose*. Ger., *Synostose*, *Knochenverwachsung*. 1. That variety of articulation by symphysis in which the bones actually become fused together without the intervention of any other structure. 2. Premature and abnormal obliteration of the cranial sutures as a cause of deformity and irregularity of the skull. [A, 313.]—**S. congenita.** Congenital bony ankylosis.—**S. iliopubica, S. puboiliaca.** The articulation of the os pubis with the ilium.—**S. puboischiadica.** The articulation of the os pubis with the ischium.

SYNOTIA (Lat.), n. f. Si^{2}n(su^{6}n)-o'shi^2(ti^2)-a^3. Fr., *synotie*. Ger., *Synotie*. The condition of a synotus. [α, 34.]

SYNOTUS (Lat.), n. m. Si^{2}n(su^{6}n)-ot'u^{3}s(u^{4}s). From *σύν*, with, and *οὖς*, the ear. Fr., *synote*. Of I. Geoffroy St.-Hilaire, a monster that has two bodies closely united above a common umbilicus, and an incompletely double head presenting a face on one side and one or two ears on the other. [A, 301 (α, 34).]

SYNOVECTOMIE (Fr.), n. Sen-ov-e^{2}kt-om-e. The operation of excising a portion of the synovial membrane. [α, 34.]

SYNOVIA (Lat.), n. f. Si^{2}n(su^{6}n)-o'vi^2(wi^2)-a^3. Fr., *synovie*. Ger., *Gelenkschmiere*, *Gelenksaft*, *Gelenkwasser*. A tenacious, colorless, stringy, alkaline fluid composed of water, sodium chloride, calcium phosphate, much mucin, albumin, and traces of fat, which lubricates a joint. [α, 34.]

SYNOVIAL, adj. Si^{2}n-ov'i^2-'l. 1. Pertaining to or resembling synovia. [C.] 2. Possessed of a s. membrane.

SYNOVIN, n. Si^{2}n'o^{2}v-i^{2}n. Fr., *synovine*. Of Hünefeld, mucosin obtained from synovia. [L, 41, 49 (α, 14).]

SYNOVITE (Fr.), n. Sen-ov-et. See Synovitis.—**S. à grains riziformes.** Synovitis in which corpora oryzoidea are formed. [α, 34.]—**S. fongueuse d'une gaîne tendineuse.** Inflammation of the synovial sheath of a tendon accompanied by the production of fungosities.—**S. podo-sésamoïdienne.** See Maladie *naviculaire*.—**S. sèche.** See *Dry* synovitis.—**S. tuberculeuse des gaînes tendineuses.** Tubercular synovitis. [Jamin, "Progr. méd.," May 13, 1882, p. 359.]

SYNOVITIS (Lat.), n. f. Si^{2}n(su^{6}n)-o-vi(we)'ti^{2}s. Gen., *-it'idos* (*-idis*). Fr., *synovite*. Ger., *S.*, *Gelenkentzündung*, *Gliedwasserentzündung*. Inflammation of the synovial sac of a joint or of that of a tendinous sheath.—**Chronic purulent s.** See *Fungous* arthritis.—**Chronic serous s.** See Hydrarthrosis.—**Crepitant s.** See Aï.—**Dry s.** S. in which the effusion is so small as to be imperceptible. [A, 520 (α, 29).]—**Exanthematous s.** S. due to the poison of the exanthemata, especially scarlatina and measles; generally mistaken for acute rheumatism. [E.]—**Fibrinous s.** See *Dry s.*—**Fungous s.** See *Fungous* arthritis.—**Gonorrhœal s.** See *Urethral s.*—**Metritic s.** S. due to some form of uterine disturbance which causes the absorption of deleterious materials in the blood. [E, 17.]—**S. cartilaginea, S. cicatricans.** S. that has resulted in intercartilaginous fibrous ankylosis. [α 34.]—**S. crouposa.** See *S. serofibrinosa crouposa*. [L, 8, 57, 221.]—**S. diphtheritica.** S. characterized by diphtheritic patches. [M. Schüller (A, 319 [α, 21]).]—**S. fungosa.** See *Fungous* arthritis.—**S. gonorrhoica.** See *Gonorrhœal* rheumatism.—**S. hyperplastica fungosa, S. hyperplastica granulosa.** See *Fungous* arthritis.—**S. hyperplastica pannosa.** A form of fungous arthritis in which the hypertrophied synovial membrane sends out processes which creep in over the cartilage as pannus does on the cornea. [A, 520 (α, 29).]—**S. lipomatosa.** S. with fatty degeneration of the neoplastic tissue. [α, 34.]—**S. papillaris.** S. with the formation of small papillæ on the diseased membranes. [α, 34.]—**S. prolifera simplex.** S. with the proliferation of fibrinous bands from the membranes of the joint. [α, 34.]—**S. puerperalis.** S. due to septic infection during the puerperium. [α, 34.]—**S. pseudomembranacea.** See *S. diphtheritica*.—**S. purulenta.** S. in which there is purulent degeneration of the synovia. [α, 34.]—**S. pyæmica.** S. due to pyæmic infection. [α, 34.]—**S. rheumatica ankylopoetica.** S. with incipient ankylosis caused by rheumatism. [α, 34.]—**S. scarlatinosa.** S. occurring during scarlet fever and usually affecting several joints. [α, 34.]—**S. septica.** S. caused by septic infection. [α, 34.]—**S. serofibrinosa.** S. in which there is a mixture of sero-fibrinous exudate with the synovia. [α, 34.]—**S. serofibrinosa crouposa.** S. in which a sero-fibrinous deposit forms on the synovial membrane. [α, 34.]—**S. seropurulenta.** S. in which the effusion is sero-purulent. [α, 34.]—**S. serosa.** See Arthrœdema and Hydrarthrosis.—**S. serosa tuberculosa.** Serous s. caused by tuberculosis. [α, 34.]—**S. suppurativa granulosa.** Chronic suppurative s. with the formation of granulation tissue. [α, 34.]—**S. vertebralis.** See Spondylarthritis.—**Syphilitic s.** S. caused by syphilitic inflammation. [α, 34.]—**Tendinous s.** Inflammation of the synovial sheath of a tendon. [L, 87 (α, 50).]—**Tubercular s.** S. attended by the deposit of tubercle.—**Tubercular tendinous s.** Tuberculosis of the sheath of a tendon. [L, 88 (α, 50).]—**Urethral s.** See *Gonorrhœal* rheumatism.

SYNSEPALOUS, adj. Si^{2}n-se^{2}p'a^{2}l-u^{3}s. See Gamosepalous.

SYNSOMATIA (Lat.), n. f. Si^{2}n(su^{6}n)-som-a(a^3)'shi^2(ti^2)-a^3. From *σύν*, with, and *σῶμα*, the body. Fr., *synsomatie*. Of Winterl, the combination of two or more bodies of the same class (*e. g.*, two acids or two bases). [B, 78 (α, 14).]

SYNSPERMY, n. Si^{2}n-spu^{6}rm'i^2. From *σύν*, with, and *σπέρμα*, seed. The union of seeds. [α, 35.]

SYNSPOREÆ (Lat.), n. f. pl. Si^{2}n(su^{6}n)-spor(spo^{2}r)'e^2-e(a^3-e^2). Fr., *synsporées*. *Algæ* which are reproduced by conjugation; the *Conjugatæ*. [B, 52.]

SYNTAGMA (Lat.), n. n. Si^{2}n(su^{6}n)-ta^{2}g(ta^{3}g)'ma^3. Gen., *-tag'matos* (*-atis*). Gr., *σύνταγμα*. Of Pfeiffer, a body composed of tagmata. [α, 35.]

SYNTASIS (Lat.), n. f. Si^{2}n(su^{6}n)'ta^{2}s(ta^{3}s)-i^{2}s. Gen., *-tas'eos, syn'tasis.* Gr., σύντασις (from συντείνειν, to stretch together). 1. Tension. 2. Of Galen, cohesion. [L, 50 (α, 14, 43).]

SYNTATIC, adj. Si^{2}n-ta^{2}t'i^{2}k. Gr., συντατικός. Lat., *syntaticus.* Tonic. [L, 50 (α, 14).]

SYNTAXIS (Lat.), n. f. Si^{2}n(su^{6}n)-ta^{2}x(ta^{3}x)'i^{2}s. Gen., *-tax'eos (-is).* Gr., σύνταξις (from συντάσσειν, to arrange). Fr., *syntaxe.* Ger., *S.* 1. See ARTICULATION. 2. See TAXIS. 3. Of Galen, the reduction of a dislocation or fracture. [L, 50 (α, 14).] 4. See SUTURE (2d def.).—**S. serrata.** See *Serrated* SUTURE.

SYNTECOPYRA (Lat.), n. f. Si^{2}n(su^{6}n)-te^{2}k(tak)-o^{2}p'i^{2}r(u^{6}r)-a^3. From συντήκειν, to waste away, and πυρά, fire. Fr., *syntécopyre.* See *Colliquative* FEVER.

SYNTENOSIS (Lat.), n. f. Si^{2}n(su^{6}n)-te^{2}n-os'i^{2}s. Gen., *-os'eos (-is).* From σύν, with, and τένων, a tendon. Fr., *synténose.* 1. See SYNDESMOSIS. 2. Of Spigel and Bartholin, the syndesmosis of the patella. [L, 41, 50 (α, 14).]

SYNTERESIS (Lat.), n. f. Si^{2}n(su^{6}n)-te^{2}r(tar)-e(a)'si^{2}s. Gen., *-es'eos (-is).* Gr., συντήρησις (from συντηρεῖν, to preserve closely). Ger., *Bewahren.* Conservation, preservation. [L, 50 (α, 14).]

SYNTERETICA (Lat.), n. f. Si^{2}n(su^{6}n)-te^{2}r(tar)-e^{2}t(at)'i^{2}k-a^3. From συντηρητικός, preservative. Ger., *Erhaltungskunst.* Of Blancardus, see HYGIENE and PROPHYLAXIS.

SYNTEXIS (Lat.), n. f. Si^{2}n(su^{6}n)-te^{2}x(tax)'i^{2}s. Gen., *-tex'eos (-is).* Gr., σύντηξις (from συντήκειν, to waste away). Fr., *syntexie.* See COLLIQUATION and CONSUMPTION.

SYNTHENA (Lat.), n. Of Paracelsus, a kind of epilepsy. [A, 325 (α, 48).]

SYNTHESIS (Lat.), n. f. Si^{2}n(su^{6}n)'the^{2}s-i^{2}s. Gen., *-thes'eos, syn'thesis.* Gr., σύνθεσις (from συντιθέναι, to place together). Fr., *synthèse.* Ger., *Synthese.* 1. An old term for any operation by which parts were united after division. [E.] 2. The building up of a single complex substance out of two or more substances. [B.]

SYNTHETICAL, adj. Si^{2}n-the^{2}t'i^2-k'l. Gr., συνθετικός. Fr., *synthétique.* Ger., *synthetisch.* Pertaining to or obtained by synthesis. [B.]

SYNTHETISMUS (Lat.), n. m. Si^{2}n(su^{6}n)-the^{2}t-i^{2}z(i^{2}s)'mu^{3}s-(mu^{4}s). Gr., συνθετισμός. Fr., *synthétisme.* The combination of operations necessary for reducing a fracture. [L. 41, 50 (α, 14).]

SYNTHORAX (Lat.), n. m. Si^{2}n(su^{6}n)-thor'a^{2}x(a^{3}x). Gen., *-ac'os (-ac'is).* From σύν, with, and θώραξ, the thorax. See THORACOPAGUS.

SYNTONIN, n. Si^{2}n'to^{2}n-i^{2}n. Fr., *syntonine.* Ger., *S., Muskelfibrin.* An acid albumin, especially that obtained from muscular tissue. It forms gelatinous, transparent flakes. [B, 4, 12.]

SYNTRIMMA (Lat.), **SYNTRIPSIS** (Lat.), n's n. and f. Si^{2}n-(su^{6}n)-tri^{2}m'ma^3, -tri^{2}ps'i^{2}s. Gen., *-trim'matos (-atis), -trips'eos (-is).* Gr., σύντριμμα, σύντριψις (from σύν, with, and τρίβειν, to rub). See COMMINUTION.

SYNTROPHICUS (Lat.), adj. Si^{2}n(su^{6}n)-tro^{2}f'i^{2}k-u^{3}s(u^{4}s). Gr., συντροφικός (from συντρέφειν, to feed together). Fr., *syntrophique.* Ger., *miethhäuslerisch.* Growing upon other plants without drawing sustenance from them (said of mosses, lichens, etc.). [α, 35.]

SYNULOSIS (Lat.), n. f. Si^{2}n(su^{6}n)-u^{2}l(ul)-os'i^{2}s. Gen., *-os'eos (-is).* Gr., συνούλωσις (from σύν, with, and οὐλή, a cicatrix). See CICATRIZATION.

SYNYMENSIS (Lat.), n. f. Si^{2}n(su^{6}n)-i(u^6)-me^{2}ns'i^{2}s. Gen., *-en'seos (-is).* From σύν, with, and ὑμήν, a membrane. Ger., *häutige Knochenverbindung.* 1. A connection of bones by membrane, as in the fœtal skull. 2. See SYNDESMOSIS.

SYNZYGIA (Lat.), n. f. Si^{2}n(su^{6}n)-zi^{2}j(zu^{6}g)'i^2-a^3. From σύν, with, and ζυγόν, a yoke. Fr., *synzigie.* Of Richard, the point of junction of two opposite cotyledons. [α, 35.]

SYPHILELCOS (Lat.), n. n. Si^{2}f(su^{6}f)-i^{2}l-e^{2}lk'o^{2}s. Gen., *-elc'eos.* From *syphilis (q. v.)*, and ἕλκος, an ulcer. A syphilitic ulcer. [L, 50 (α, 14).]

SYPHILELCOSIS (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-e^{2}lk-os'i^{2}s. Gen., *-cos'eos (-is).* Fr., *syphilélcose.* Syphilitic ulceration. [G, 5.]—**S. primaria.** See *Syphilitic* CHANCRE.—**S. secundaria.** Ulceration due to secondary syphilis. [G, 5.]

SYPHILICOME (Fr.), n. Se-fe-le-kom. From *syphilis (q. v.)*, and κομεῖν, to take care of. A hospital for syphilitic patients. [L, 41 (α, 14).]

SYPHILID (Ger.), n. Zu^{6}f-el-ed'. See SYPHILIDE.—**Fressendes Knotens'.** An ulcerating tubercular syphilide. [G.]—**Grossknotiges S.** See *Gummatous* SYPHILODERM.—**Hauts'.** See SYPHILODERM.—**Kleinknötchens'.** See *Miliary* SYPHILODERM.—**Knotens'.** See *Tubercular* SYPHILODERM.—**Pigments'.** See *Pigmentary* SYPHILODERM.—**Schuppens'.** See *Papulo-squamous* SYPHILODERM.

SYPHILIDE, n. Si^{2}f'i^{2}l-i^{2}d. Fr., *s.* Ger., *Syphilid.* 1. A cutaneous disease symptomatic of syphilis; a syphilitic disease of the skin. For various subheadings not here given, see the corresponding expressions under SYPHILODERM. [G.] 2. A syphilitic lesion on a mucous membrane, more especially near one of the mucous orifices. [G, 7.]—**Annular s.** See *Circinate papulo-squamous s.*—**Bullous s.** See under PEMPHIGUS *syphiliticus.*—**Circinate papulo-squamous s.** Lat., *syphiloderma papulosquamosum circinatum.* Fr., *s. circinée squameuse* (ou *psoriasiforme*). A squamous s. in which gyrate and circinate patches are formed resembling psoriasis. [G, 84.]—**Corymbiform s.** See *Corymbiform papular* SYPHILODERM.—**Erythematous s.** See *Syphilitic* ROSEOLA.—**Flat papular s.** See *Lenticular papular* SYPHILODERM.—**Follicular s.** See *Miliary* SYPHILODERM.—**Gyrate s.** See *Circinate papulo-squamous s.*—**Lichenoid s.** See *Miliary* SYPHILODERM.—**Macular s.** 1. See *Syphilitic* ROSEOLA. 2. Pigmentary stains following a syphilitic exanthem. [G.] 3. See *Pigmentary* SYPHILODERM.—**Maculo-papular s.** See *Papular syphilitic* ROSEOLA.—**Marmoraceous pigmentary s.** A form of pigmentary s. occurring, usually upon the sides of the neck, in persons of fair skin, and characterized by the appearance of whitish spots due to loss of pigment, while at the periphery of these spots the skin appears darkened, as though the pigment displaced from the central spots had accumulated at the borders. ["N. Y. Med. Jour.," Feb. 18, 1893, pp. 177, 179 (G).]—**Nodular s.** See *Tubercular* SYPHILODERM.—**Nummular s.** See *Circinate papulo-squamous s.*—**Orbicular s.** See *Circinate papulo-squamous s.*—**Papular s.** A papular syphilitic eruption affecting either the skin (see SYPHILODERMA *papulosum*) or the mucous membrane. [G.]—**Pustulo-crustaceous s.** See *Pustular* SYPHILODERM.—**Retiform pigmentary s.** Fr., *s. pigmentaire à dentelles.* A form of pigmentary s. that begins with the production of brown patches on the skin, most commonly of the neck, but also on other parts of the body, and is followed by disappearance of the superpigmentation in spots over the surface of the dark patches, producing a number of white areas which gradually increase in size, giving the part at first a dappled and later a retiform appearance. The disease may resemble vitiligo, but is said to differ from it in the absence of the sharply marked pigmented border that surrounds the leucodermatous spots in vitiligo. [G.]—**Scaling papular s.** See *Papulo-squamous* SYPHILODERM.—**Scaling papular s. of the palms and soles.** See *Squamous* SYPHILODERM *of the palms and soles.*—**Serpiginous tubercular s.** A tubercular s. having a serpiginous arrangement or mode of extension. [α, 34.]—**Subcutaneous circinate s.** Annular syphilitic roseola; so called because the efflorescences are not elevated. [G.]—**S. à forme d'eczéma** (Fr.). A variety of herpes-like syphiloderm in which the efflorescences are minute and very closely aggregated. [G, 84.]—**S. circinée psoriasiforme (ou squameuse)** (Fr.). See *Circinate papulo-squamous s.*—**S. cornée** (Fr.). See under SYPHILIS *cutanea cornea.*—**S. cutanée** (Fr.). See SYPHILODERM.—**S. en cocarde** (Fr.). Cockade s.; a variety of circinate papular syphiloderm in which two or more concentric papular rings are formed. [G, 84.]—**S's gommeuses ulcératives** [Fournier] (Fr.). See *Ulcerating tubercular* SYPHILODERM.—**S. granulée des ailes du nez** (Fr.). See under *Frambœsiaform papular* SYPHILODERM.—**S. hypertrophique de la vulve** (Fr.). Hypertrophy of the vulva due to syphilitic infiltration, often taking the form of an indurating œdema. [G.]—**S. muqueuse** (Fr.). Syphilitic lesions on a mucous membrane. [G.]—**S. muqueuse papulo-hypertrophique** (Fr.). See CONDYLOMA *latum.*—**S. papuleuse en nappe** (Fr.). A form of papular syphiloderm in which the papules are closely aggregated together or coalescent so as to form circumscribed reddish patches with a roughened surface resembling the texture of coarse cloth. [G, 85.]—**S. papuleuse humide** (Fr.). Mucous patches of the skin. [G, 85.]—**S. papulo-croûteuse** (Fr.). A papular syphiloderm in which the papules are covered by yellowish, brownish, or grayish friable crusts without ulceration beneath. When the crusts are removed the surface exposed is dry and not excoriated, or but very superficially eroded. Its most common situations are the face (especially the forehead and about the lips and alæ nasi) and the parts of the body covered by hair. [G, 85.]—**S. papulo-érosive** (Fr.). See *Mucous* PATCH.—**S. pigmentaire à dentelles** (Fr.). Of Fournier, see *Retiform pigmentary s.*—**S. pityriasique** (Fr.). A form of papulo-squamous syphiloderm attended with furfuraceous desquamation. [G.]—**S. puro-crustacée ulcéreuse** (Fr.). The deep variety of ecthymatous syphiloderm. [G.]—**S. pustulante** (Fr.). See SYPHILIS *pustulans.*—**S. pustuleuse exanthématique** (Fr.). A pustular syphiloderm occurring in an early stage of secondary syphilis and representing a pustular modification of the papular syphiloderm. [G.]—**S. squameuse cornée** (Fr.). See SYPHILIS *cutanea cornea.*—**S. tuberculeuse rongeante** (Fr.). Of Bonhomme, a serpiginous tubercular s. [α, 34.]—**S. tuberculeuse (résolutive)** (Fr.). See *Tubercular* SYPHILODERM.—**S's tuberculo-croûteuses et tuberculo-ulcéreuses** (Fr.). See *Ulcerating tubercular* SYPHILODERM.—**S. tuberculo-ulcérante gangréneuse** (Fr.). Lat., *carbunculus venereus.* A tubercular syphiloderm attended with gangrenous ulceration. A small black slough forms in the centre of the tubercle, extends rapidly, and, on being loosened by the secretions beneath, leaves a deep ulcer with hard, everted edges surrounded by a deep-red areola and discharging a foul secretion. It is said to be most common on the face, the extremities, the shoulders, and the buttocks. [G, 84.]—**Vegetating s., Verrucous s.** See *Frambœsiaform papular* SYPHILODERM.—**Wasting secondary s.** See *Abdominal* STREAKS.

SYPHILIDERMIE (Fr.), n. Se-fe-le-de^{2}r-me. See SYPHILODERM.—**S. dyschromateuse.** A pigmentary syphiloderm. [α, 34.]

SYPHILIDIATRIA (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-i^{2}d-i^2-a^{2}t(a^{3}t)-ri-(re)'a^3. From *syphilis (q. v.)*, and ἰατρεία, medical treatment. Fr., *syphilidiatrie.* The therapeutics of syphilis. [L, 50 (α, 14).]

SYPHILIDOCHTHUS (Lat.), n. m. Si^{2}f(su^{6}f)-i^{2}l-i^{2}d-o^{2}k-(o^{2}ch^2)'thu^{3}s(thu^{4}s). From *syphilis (q. v.)*, and ὄχθος, a tumor. See *Tubercular* SYPHILODERM.—**S. confertus.** See *Corymbiform papular* SYPHILODERM.—**S. disseminatus.** A disseminated tubercular syphiloderm. [G.]—**S. rodens.** An ulcerating tubercular or gummatous syphiloderm. [G.]—**S. serpiginosus.** An ulcerating serpiginous syphiloderm. [G, 5.]

SYPHILIDOCLINICE (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-i^{2}d-o(o^3)-kli^{2}n-(klen)'i^{2}s(i^{2}k)-e(a). Gen., *-clin'ices.* From *syphilis (q. v.)*, and κλινική, clinical medicine. Clinical instruction in regard to syphilis.

SYPHILIDOCOLPITIS (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-i^{2}d-o(o^3)-ko^{2}lp-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* From *syphilis (q. v.)*, and κόλπος, the vagina. Gonorrhœa in women. [L, 50 (α, 14).]

SYPHILIDOGRAPHY, SYPHILIDOLOGY, n's. Si^{2}f-i^{2}l-i^{2}d-o^{2}g'ra^{2}f-i, -o^{2}l'o-ji^2. Lat., *syphilidographia, syphilidologia* (from *syphilis [q. v.]*, and γράφειν, to write, or λόγος, understanding). The pathology, etc., of syphilis. [α, 48.]

SYPHILIDOMANIA (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-i^{2}d-o(o^3)-man(ma^{3}n)'i^2-a^3. See SYPHILOMANIA.

SYPHILIDOPHOBIA (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-i^{2}d-o(o^3)-fob(fo^{2}b)'i^2-a^3. See SYPHILOPHOBIA.

SYPHILIDOPHTHALMIA (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-i^{2}d-o^{2}f-tha^{2}l(tha^{3}l)'mi^2-a^3. Fr., *syphilidophthalmie.* Syphilitic ophthalmia. [L, 50 (*a*, 14).]

SYPHILIGRAPHIE (Fr.), n. Se-fe-le-gra^3-fe. See SYPHILIDOGRAPHY.

SYPHILIMANIE (Fr.), n. Se-fe-le-ma^3-ne. See SYPHILOMANIA.

SYPHILIONTHUS (Lat.), n. m. Si^{2}f(su^{6}f)-i^{2}l-i^2-o^{2}nth'u^{3}s(u^{4}s). See SYPHILOJONTHUS.

SYPHILIOSE [Piorry] (Fr.), n. Se-fe-le-oz. Any syphilitic disease. [A, 250 (*a*, 21).]

SYPHILIS (Lat.), n. f. Si^{2}f(su^{6}f)'i^{2}l-i^{2}s. Gen., *-il'idis.* This word, introduced into nosology by Sauvages, was originally used to designate the "morbus gallicus" by Fracastori, who, in a Latin poem published at Verona in 1521, represents his hero, *Siphilus*, *Syphilus*, or *Siphylus*, as smitten with the disease for disrespect shown to the gods. It seems to be formed from the personal name, the etymology of which is unknown; neither form nor meaning warrants any derivation from *σύν*, with, or *σῦς*, a swine, and *φιλεῖν*, to love. The bad (or specific, or venereal) disease. French pox (or crust, or disease), great pox; a chronic infectious disease of long duration, usually acquired by inoculation of the virus of the disease on an abraded surface (see *Syphilitic* CHANCRE), but also congenitally and (by the mother) from a syphilitic fœtus. It is especially characterized by cellular infiltrations in the connective tissue of the true skin, the bones, the mucous membranes, the brain and spinal cord and their meninges, and the solid viscera in the form of syphilomata and syphilides, by alopecia syphilitica, and by general cachexia. For its stages, see *Primary s.*, *Secondary s.*, and *Tertiary s.*, also INCUBATION *of s.* In Young's classification of diseases, s. is a genus of the *Epiphymata.* [G; *a*, 48.]—**Annulate erythematous s.** See *Annular syphilitic* ROSEOLA.—**Benign s.** Fr., *s. tempérée*, *s. mitigée.* S. unattended with serious impairment of the general health and having the symptoms usually mild and of short duration. [G.]—**Bullous dermato-s.** A bullous syphiloderm. [*a*, 34.]—**Congenital s.** Ger., *Zeugungss'.* S. that has existed in an individual from birth, either as hereditary s. (*q. v.*), or by having been communicated to the fœtus from the mother through the utero-placental circulation during intra-uterine life (intra-uterine or placental s.), or by contact with syphilitic lesions in the genital passages of the mother during parturition (*infectio per partum*). [G.]—**Constitutional s.** See *Secondary s.*—**Cutaneous s.** See SYPHILIDE (1st def.).—**Desquamative s. of the tongue.** A superficial desquamative disease of the tongue observed in certain children in a foundling asylum. It was believed to be due to inherited s., but was probably exfoliatio areata linguæ. [Parrot, "Ann. de derm. et de syph.," 1881, p. 370 (G).]—**Dry scaling patch of primary s.** [Otis]. See *Desquamative* CHANCRE.—**Encephalic s.** S. of the brain. [D, 1.]—**Equine s.** Fr., *s. équine*, *dourine*, *mal de coït.* A specific blood disease in the horse characterized in the early stages by morbid changes in the genito-urinary organs. There are swelling of the genitals, a vaginal or urethral discharge, a pustular eruption on the penis or vulva, a muco-purulent nasal discharge, enlargement of the lymph-glands, and general weakness usually terminating in paralysis of the hind extremities and sometimes in death. The disease usually lasts from three to four months. [*a*, 34.]—**Erythematous s.** See *Syphilitic* ROSEOLA.—**Extra-genital s.** See *S. insontium* (1st def.).—**Fausse s.** (Fr.). See *Simple* CHANCRE.—**Gehirns'** (Ger.). S. of the brain.—**Gonorrhœa-s.** Urethral chancre with a discharge resembling that of gonorrhœa. [J. Hutchinson, "Brit. Med. Jour.," Jan. 9, 1886, p. 55 (*a*, 34).]—**Hæmorrhagic s.** See *S. hæmorrhagica neonatorum.*—**Hereditary s.** Lat., *s. hereditaria* (seu *ingenita*, seu *congenita*). Fr., *s. héréditaire* (ou *par conception*). Ger., *Zeugungss'*, *Vererbungss'.* Properly, s. transmitted at the time of conception either through infected semen of the father or an infected ovum of the mother or through both. The term is often used for congenital s. [G.]—**Impfs'** (Ger.). See *Vaccination-s.*—**Infantile s.** See *Congenital s.* and *Hereditary s.*—**Inherited s.** See *Hereditary s.*—**Intra-uterine s.** See under *Congenital s.*—**Labyrinthine s.** Constitutional s. affecting the labyrinth of the internal ear. [F.]—**Latent s.** Any stage of s. in which there are no active manifestations of the disease.—**Malignant s.** Fr., *s. grave*, *s. galopante*, *s. maligne précoce.* S. in which the symptoms are of an unusually grave character and attended with serious injury to the general health, and in which lesions that commonly appertain to an advanced period (see *Tertiary s.*) occur prematurely. More especially it is characterized by the occurrence of extensive infiltrations in various parts of the body, which rapidly undergo degeneration with destruction of the tissues affected. [G.]—**Miliary s.** See *Miliary papular* SYPHILODERM.—**Post-conceptional s.** See CHOC *en retour* (1st def.).—**Primary s.** S. as it exists in an infected individual during the period intervening between the first appearance of the initial lesion (or syphilitic chancre) and the development of constitutional (secondary) s. [G.]—**Pseudo-s.** An antiquated term for certain morbid symptoms resembling syphilis (or the "venereal disease"), but differing from it chiefly in not responding in the same way to mercurial treatment. The term was chiefly in use in the period before syphilis was clearly differentiated from gonorrhœa and the simple (non-infecting) chancre. [G.]—**Secondary s.** S. during the period succeeding the second incubation, characterized by generalized manifestations of infection, chiefly in the form of superficial lesions of the skin and mucous membranes, together with various functional disturbances of the nervous and vascular systems, and preceding the occurrence of the symptoms of tertiary s. [G.]—**Sequelæ of s.** [Hutchinson]. See *Tertiary s.*—**Simple s.** Of Multon, a form of s. supposed to arise from a chancroid and to manifest itself by very slight constitutional symptoms. ["N. Y. Med. Jour.," June 23, 1888, p. 694 (*a*, 50).]—**S. corymbosa.** See *Corymbiform papular* SYPHILODERM.—**S. by conception.** Fr., *s. conceptionnelle*, *choc en retour.* S. acquired by a pregnant woman through the medium of the utero-placental circulation from a fœtus that inherits s. from the father. [G.]—**S. cutanea.** See SYPHILIDE (1st def.).—**S. cutanea bullosa.** See under PEMPHIGUS *syphiliticus.*—**S. cutanea cornea.** A syphiloderm affecting most commonly the soles of the feet and sometimes also, though to a lesser degree, the palms of the hands; marked by great thickening and roughness of the epidermis in the form of a callus-like or verrucous hypertrophy, sometimes attended with the production of little corneous masses or concretions in the epidermis which can be dug out, leaving little round depressions (*syphilide cornée*). [G.] Cf. *Squamous* SYPHILODERM *of the palms and soles.*—**S. cutanea maculosa.** See *Syphilitic* ROSEOLA.—**S. cutanea miliaris.** See *Miliary papular* SYPHILODERM.—**S. cutanea nodosa.** See *Tubercular* SYPHILODERM.—**S. cutanea papulosa.** See SYPHILODERMA *papulosum.*—**S. cutanea pustulosa.** See *Impetiginous* SYPHILODERM.—**S. cutanea rupiaformis.** See *Syphilitic* RUPIA.—**S. cutanea squamosa.** See *Papulo-squamous* SYPHILODERM.—**S. cutanea tuberculosa.** See *Tubercular* SYPHILODERM.—**S. cutanea vesiculosa.** See *Vesicular* SYPHILODERM.—**S. décapitée** (Fr.), **S. d'emblée** (Fr.). Constitutional s. occurring without previous chancre, as in s. by conception. [G.]—**S. exulcerans.** An ulcerating syphilide. [G, 7.]—**S. exulcerans excavata.** A deeply ulcerating syphilide. [G, 7.]—**S. exulcerans fissata.** A syphilide attended with fissures, as about the mucous orifices. [G, 7.]—**S. exulcerans serpiginosa.** An ulcerating serpiginous syphiloderm. [G, 7.]—**S. galopante** (Fr.), **S. grave** (Fr.). See *Malignant s.*—**S. hæmorrhagica neonatorum.** Of Behrend, hæmophilia in new-born children, so called on account of its frequent association with hereditary s. ["Med. Chron.," Dec., 1886, p. 239 (*a*, 50).]—**S. hereditaria.** See *Hereditary s.*—**S. hereditaria tarda.** Hereditary s. breaking out during adolescence. [L, 57 (*a*, 14).]—**S. imperceptible** (Fr.). 1. Of Diday, s. without symptoms but manifestly present, inasmuch as the person affected transmits it to the offspring. [G.] 2. See *S. by conception.*—**S. indica.** See FRAMBŒSIA.—**S. ingenita.** See *Hereditary s.*—**S. insontium.** 1. S. contracted otherwise than by coitus. 2. Of Munk, a variety of radesyge regarded as identical with sibbens (*q. v.*). [G.]—**S. inveterata.** See *Tertiary s.*—**S. lenticularis.** See *Lenticular papular* SYPHILODERM.—**S. locale** [Langlebert] (Fr.). See *Simple* CHANCRE.—**S. mitigée** (Fr.). See *Benign s.*—**S. modificata** [Behrend]. See RADESYGE.—**S. neonatorum.** See *Hereditary s.*—**S. occulta.** S. occurring in individuals that have no history or evidence of primary or secondary lesions. [*a*, 34.]—**S. œconomica.** Of Bulkley, s. transmitted through the incidental contact of social intercourse, such as by pipes, cigars, pins, etc. ["Arch. f. Dermat. u. Syphil.," 1893, p. 207 (*a*, 50).]—**S. of nurses.** S. contracted by nurses in giving suck to syphilitic children. [L, 87 (*a*, 50).]—**S. of the bones.** See *Gummatous* OSTEITIS.—**S. of the lung.** A rare form of pulmonary fibrosis due to s. [*a*, 34.]—**S. of the nerves.** Inflammation and degeneration of the nerves due to s. [*a*, 34.]—**S. of the spinal meninges.** See *Syphilitic* MENINGITIS.—**S. papulosa miliaris.** See *Miliary* SYPHILODERM.—**S. papulosquamosa.** See *Papulo-squamous* SYPHILODERM.—**S. pigmentosa.** See *Pigmentary* SYPHILODERM.—**S. papulosa gyrata.** A syphiloderm with papules grouped in gyrate lines. [G.]—**S. præcox.** See *Malignant s.*—**S. primigenia.** See *Primary s.*—**S. pustulans.** Fr., *syphilide pustulante.* Of Alibert, papular, pustular, and tubercular syphilides. [G, 7.]—**S. pustulans compressa.** Fr., *syphilide pustulante plate*, *pustules vénériennes plates.* Large flat syphilitic efflorescences occurring in the folds of the anus and upon the thighs of new-born children. [G, 7.]—**S. pustulans cerasiformis.** Fr., *syphilide pustulante merisée.* A tubercular syphiloderm with clustered tubercles resembling clusters of cherries. [G, 7.]—**S. pustulans crustacea.** See *Ecthymatous* SYPHILODERM.—**S. pustulans lenticularis.** See *Lenticular papular* SYPHILODERM.—**S. pustulans miliaris.** See *Miliary* SYPHILODERM.—**S. pustulans pemphigoides.** See PEMPHIGUS *syphiliticus.*—**S. pustulans racemiformis.** Fr., *syphilide pustulante en grappe.* See *Corymbiform papular* SYPHILODERM.—**S. pustulans scabioides.** A pustular syphiloderm resembling scabies. [G, 7.]—**S. pustulans serpiginosa.** See *Serpiginous* SYPHILODERM.—**S. pustulans squamosa.** See *Papulo-squamous* SYPHILODERM.—**S. pustulans tuberculosa.** See *Tubercular* SYPHILODERM.—**S. pustulans urticata.** See *Papular syphilitic* ROSEOLA.—**S. pustulans varioloides.** See *Variolaform* SYPHILODERM.—**S. technica.** S. insontium acquired in following one's vocation, as by physicians or midwives. [*a*, 34.]—**S. tempérée** (Fr.). See *Benign s.*—**S. universalis.** S. affecting the entire organism. [*a*, 34.]—**S. vaccinale** (Fr.), **S. vaccinata.** See *Vaccination-s.*—**S. vegetans.** Fr., *syphilide végétante.* See CONDYLOMA *latum* and CONDYLOMA *acuminatum.*—**S. vegetans condyloma.** S. with the formation of large pedunculated growths, probably condylomata acuminata. [G, 7.]—**S. vegetans crista galli, S. vegetans frambœsia.** See CONDYLOMA *acuminatum.*—**S. vegetans porriformis.** See CONDYLOMA *latum.*—**S. végétante framboisée** (Fr.). See CONDYLOMA *acuminatum.*—**Tertiary s.** S. in an advanced stage, characterized by localized deposits in the connective tissue of various parts of the body, chiefly in the form of syphilomata. It is attended with deep-seated ulceration of the skin or mucous membranes and syphilitic osteitis, together with organic affections of the viscera and of the nerves and blood-vessels. [G.]—**Unitarian doctrine of s.** The doctrine that all chancres are syphilitic. [G.] Cf. *Syphilitic* CHANCRE and *Simple* CHANCRE.—**Vaccination-s.** Ger., *Impfs'.* S. acquired by vaccination, either through vaccine virus obtained from a syphilitic subject or through syphilitic contamination of the wound during the operation, as by unclean instruments. The characteristic vaccine pustule is followed by an indurated chancre. [G.]—**Vererbungss'** (Ger.). See *Hereditary s.*—**Visceral s.** Tertiary or congenital s. in which the

viscera are especially subject to the inflammatory process. [a, 34.] —**Zeugungss'** (Ger.). See *Hereditary s.*

SYPHILISME (Fr.), n. Sef-el-es-m'. Susceptibility to inoculation with the syphilitic virus. [L, 41 (a, 14).]

SYPHILISMUS (Lat.), n. m. Si^{2}f(su^{6}f)-i^{2}l-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). See SYPHILIS.

SYPHILITIC, adj. Si^{2}f-i^{2}l-i^{2}t'i^{2}k. Lat., *syphiliticus.* Fr., *syphilitique.* Ger., *syphilitisch.* 1. Affected with syphilis. 2. Pertaining to or having the nature of syphilis. [G.]

SYPHILIZATION, n. Si^{2}f-i^{2}l-i^{2}z-a'sh'n. Fr., *syphilisation.* The act of inoculating the system with the virus of syphilis, or the condition of being thus inoculated. The practice of s. as employed by Sperino, Bidenkap, Boeck, and others, consisted in making multiple inoculations of virus (supposed at the time to be syphilitic, but now known to have been simply inoculable pus from soft venereal sores or from syphilitic chancres that had been irritated and made to suppurate freely), which were continued until the skin ceased to react and no further sores could be produced, when the individual was supposed to be syphilized and to be proof against further syphilitic effects. [G.]

SYPHILIZED, adj. Si^{2}f'i^{2}l-izd. Fr., *syphilisé.* Affected with hereditary or constitutional syphilis. [a, 34.] Cf. SYPHILIZATION.

SYPHILOCELIS (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-sel(kal)'i^{2}s(es). Gen., *-cel'idos (-idis).* See *Macular* SYPHILIDE.

SYPHILOCOMIE (Ger.), n. Zu^{6}f-el-o-kom-e'. See SYPHILICOME.

SYPHILODERM, n. Si^{2}f'i^{2}l-o-du^6-rm. Lat., *syphiloderma* (from *syphilis* [*q. v.*], and δέρμα, the skin). See SYPHILIDE (1st def.). —**Acneform s., Acneiform s.** Lat., *acne syphilitica, syphilojonthus lenticularis.* A pustular s. characterized by acuminate, usually discrete pustules, varying in size from that of a pin-head to that of a split pea, affecting especially the sites of the sebaceous follicles, and resembling acne, from which it differs in its more general distribution, in the presence of the characteristic syphilitic infiltrations at the bases of the pustules, in its tendency to more superficial suppuration and to rapid desiccation of the pus (forming little crusts), in the absence of comedones, and in leaving pigmented spots. [Julien (G, 84).]—**Corymbiform papular s.** Lat., *syphiloderma papulosum corymbiforme.* Fr., *syphilide en corymbes.* A papular s. in which the efflorescences are clustered in groups. [G.]—**Ecthymatous s.** Lat., *ecthyma syphiliticum, syphilojonthus latus.* Fr., *syphilide ecthymateuse.* A pustular s. characterized by large flat pustules of about the size of a finger-nail seated upon a deep-red base and tending rapidly to form dark-colored crusts. A "superficial" variety and a "deep" variety are described. Both occur most commonly on the legs. The superficial form also frequently occurs on the forehead and neck near the border of the hair, and on the back, nates, scrotum, labia majora, etc. Sometimes the efflorescences are disseminated, often clustered in curvilinear or circular forms. The deep variety, which usually belongs to a later period of the disease than the superficial form, occurs as irregularly distributed, roundish pustules which ulcerate and form thick, rough, brownish or greenish-black crusts (see *Syphilitic* RUPIA) followed by permanent cicatrices. [G.]—**Erythematous s.** See *Syphilitic* ROSEOLA.—**Frambœsiaform papular s.** Fr., *syphilide papuleuse végétante.* A circumscribed papular or tubercular s. in which the surface becomes irregularly elevated, with little warty prominences resembling the surface of a raspberry. The corneous layer of the epidermis has a granular or rugous appearance, and is sometimes covered by a viscid secretion that dries and forms a loosely adherent crust. Its most common situations are the back, the face, especially in the angle of the alæ nasi (the *syphilide granulee des ailes du nez* of Fournier), and the cheeks. [G, 85.]—**Gummatous s.** Fr., *syphilide gommeuse.* Ger., *tiefliegendes grossknotiges Syphilid.* A gummy tumor which, beginning in the subcutaneous connective tissue, tends to involve the true skin gradually. It appears first in the form of a small, deep-seated nodule, which gradually enlarges and approaches nearer the surface, which latter becomes of a dusky-red color, and when softening of the gumma takes place ulceration may occur and be followed by the production of a deeply excavated ulcer, or the tumor may disappear by resolution without perforation of the surface. [G.]—**Herpetiform s., Herpetoid s.** Fr., *syphilide herpétiforme.* A s. consisting of small, millet-sized papular efflorescences surmounted by minute vesicles or pustules, usually closely clustered or arranged in circular or other figures like the groups of herpes. The secretion rapidly dries up, leaving little adherent brownish or yellowish crusts. [G.]—**Impetiginiform s., Impetiginous s.** A form of pustular s. in which small, flat pustules surrounded by a red areola occur in clusters, most commonly about the face or scalp. They soon dry up, forming thick, granular, dark-colored crusts, beneath which there is usually an eroded surface, but slightly depressed, often somewhat elevated. [G.]—**Large flat pustular s.** See *Ecthymatous s.*—**Lenticular papular s.** An early syphilitic eruption, usually disseminated over the greater portion of the body, consisting of dark-red or copper-colored, round or oval papules, with a rounded or flat, smooth surface, upon which during the process of involution a thin whitish scale of epidermis is formed. [G.]—**Miliary (papular) s.** An eruption of small, dark-red, acuminate papules situated about the mouths of the hair follicles, frequently clustered, sometimes forming determinate figures; one of the earlier manifestations of secondary syphilis. [G.]—**Miliary pustular s.** See *Herpetiform s.* —**Palmar and plantar s.** See *Squamous s. of the palms and soles.*—**Papular s.** See SYPHILODERMA *papulosum.*—**Papulo-squamous s.** Lat., *syphilolepis, psoriasis syphilitica.* Ger., *Schuppensyphilid.* Scaling papular syphilide; a modified form of the papular s. in which the efflorescences are covered by whitish, adherent scales and have a certain resemblance to psoriasis. [G.] —**Pigmentary s.** A form of chromatosis of the skin observed in syphilitic patients and regarded by many as a symptom of syphilis. Its most frequent situation is upon the sides of the neck, and it occurs most commonly in women. It sometimes appears in the form of small spots or macules disseminated over the surface, producing a mottled appearance, or in larger patches of the character of chloasma. Between the pigmented portions the intervening skin may appear either normal or unusually white, as if from deficiency of pigment (see VITILIGO). [G.]—**Pustular eczemaform s.** See *Impetiginous s.*—**Pustular s.** See *Ecthymatous s.*, *Impetiginous s.*, and *Herpetiform s.*—**Serpiginous s.** A pustular or ulcerating s. that advances in a serpiginous or creeping manner. It may start from a pustule which gradually extends at the periphery while healing at the centre, presenting a ring of dark, greenish crust with ulceration beneath, while the centre is red, darkly pigmented, blanched, and atrophic. Sometimes the advance of the disease is only upon one side, with cicatrization upon the other. Another form, attended with deeper ulceration, usually starts from one of the later cutaneous lesions of syphilis, such as the tubercular, ecthymatous, or gummatous s., and the ulceration often assumes a horseshoe or kidney shape, with cicatrization in the centre. [G.] —**Small acuminated pustular s.** See *Herpetiform s.*—**Small flat pustular s.** See *Impetiginous s.*—**Squamous s.** See *Papulo-squamous s.*—**Squamous s. of the palms and soles.** A s. characterized by rough, dry, scaling patches on the palmar and plantar surfaces of the hands and feet. The patches may be roundish, circinate, or horseshoe-shaped, or may occur in irregular curved or gyrate lines, and often manifest a tendency to advance in one direction while healing in the others. The surface is usually most roughened at the periphery, where the process is sharply defined, and is generally marked by a line of ragged, partly detached epidermis. Other parts of the patch may be scaly or smooth, shiny, and somewhat reddened. [G.] Cf. SYPHILIS *cutanea cornea.*—**Tubercular s.** Lat., *syphilis cutanea nodosa* (seu *tuberculosa*), *tubercula syphilitica.* Fr., *syphilide tuberculeuse* (*résolutive*). Ger., *Knotensyphilid.* A form of cutaneous syphilis usually occurring at an advanced stage of the disease, characterized by circumscribed deep-seated infiltrations involving the entire thickness of the skin. The eruption is commonly confined to particular regions, and is not generally symmetrical. The efflorescences may be grouped in irregular clusters, in the form of rings or curves, or in horseshoe-shaped or kidney-shaped patches. [G.]—**Ulcerating tubercular s.** A tertiary or late manifestation of syphilis in which tubercular lesions, occurring in several more or less isolated patches, undergo ulceration, usually with a tendency to spread in a serpiginous manner and often producing thick, dark crusts. When of long duration it is sometimes called lupus syphiliticus. [G.]—**Varicellaform s.** A pustular (sometimes described as vesicular) s. characterized by rounded or globular, millet-sized efflorescences filled with sero-purulent fluid, which rapidly dries up and forms brown crusts. [G.] Cf. *Variolaform s.*—**Variolaform s.** A pustular s. in which the efflorescences begin in the form of red spots which turn into pustules, at first acuminated and afterward becoming slightly depressed or umbilicated in the centre, and are followed by greenish-brown crusts beneath which there is usually slight ulceration or erosion. [G.]— **Vesicular s.** Ger., *Blasensyphilid.* A s. characterized by the presence of vesicles or vesico-pustules. Herpetiform s., varicellaform s., and syphilitic eczema are examples. [G.]

SYPHILODERMA (Lat.), n. n. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-du^{5}rm-(de^{2}rm)'a^3. Gen., *-der'matos (-atis).* See SYPHILODERM.—**S. erythematosum.** See *Syphilitic* ROSEOLA.—**S. erythematosum palmare et plantare.** See *Squamous* SYPHILODERM *of the palms and soles.*—**S. maculosum.** See *Syphilitic* ROSEOLA.—**S. papulo-squamosum circinatum.** See *Circinate papulo-squamous* SYPHILIDE.—**S. papulosum.** A syphilitic exanthem of the skin occurring in the form of papular efflorescences, and produced by circumscribed cellular infiltrations in the corium. [G.]—**S. pigmentosum.**—See *Pigmentary* SYPHILODERM.—**S. pustulosum.** See *Pustular* SYPHILODERM —**S. roseolatum.** See *Syphilitic* ROSEOLA.

SYPHILOGRAPHY, n. Si^{2}f-i^{2}l-o^{2}g'ra^{2}f-i^2. See SYPHILIDOGRAPHY.

SYPHILOID, adj. Si^{2}f'i^{2}l-oid. Lat., *syphiloïdes* (from *syphilis* [*q. v.*], and εἶδος, resemblance). Relating to or resembling syphilis; as a n., any one of certain epidemic diseases more or less resembling syphilis. [G.]—**Canadian s.** Lat., *radesyge canadensis.* Fr., *mal anglais* (ou *des éboulements,* ou *de chicot*). A disease which prevailed in Canada "from 1760 to 1780 and upward," and was probably syphilis, though formerly believed to be an independent form of disease resembling syphilis. [G, 16.]—**Hessian s.** A disease resembling radesyge, observed in Hesse, Germany. [G.] —**Jutland s.** A disease resembling radesyge that at one time prevailed in Jutland, Denmark. [G.]—**S. of Courland.** A disease resembling radesyge observed in Courland, Russia. [G.]

SYPHILOJONTHUS (Lat.), n. m. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-jo^{2}nth-(yo^{2}nth)'u^{3}s(u^{4}s). From *syphilis* (*q. v.*), and ἴονθος (see IONTHUS). See *Pustular* SYPHILODERM.—**S. confertus.** See *Impetiginous* SYPHILODERM.—**S. latus.** See *Ecthymatous* SYPHILODERM.—**S. lenticularis.** See *Acneform* SYPHILODERM.

SYPHILOKELIS (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-kel(kal)'i^{2}s(es). Gen., *-kel'idos (-idis).* From *syphilis* (*q. v.*), and κηλίς, a spot. Fr., *syphilocèle.* See *Macular* SYPHILIDE.—**S. fugax.** See *Syphilitic* ROSEOLA.—**S. perstans.** A macular syphilide (2d def.); perhaps also the pigmentary syphiloderm (*q. v.*). [G.]

SYPHILOLEPIS (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o^{2}l'e^{2}p-i^{2}s. Gen., *-lep'idos (-idis).* From *syphilis* (*q. v.*), and λεπίς, a scale. See *Papulo-squamous* SYPHILODERM.—**S. exulcerans.** A pustulo-squamous syphiloderm attended with ulceration. [G.]—**S. exulcerans centralis.** A squamous syphiloderm attended with ulceration beneath the scale or crust. [G.]—**S. exulcerans peripherica.** A serpiginous ulcerating syphiloderm. [G.]—**S. guttata.** Papulo-squamous syphiloderm resembling psoriasis guttata. [G, 5.]—S.

palmaria. See *Squamous* SYPHILODERM *of the palms and soles.*—**S. palmaria cornea.** See SYPHILIS *cutanea cornea.*—**S. palmaria simplex.** See *Squamous* SYPHILODERM *of the palms and soles.*—**S. scutellata.** A papulo-squamous syphiloderm resembling psoriasis scutellata. [G, 5.]

SYPHILOLOGY, n. Si^{2}f-i^{2}l-o^{2}l'o-ji^2. See SYPHILIDOLOGY.

SYPHILOMA [Wagner] (Lat.), n. n. Si^{2}f(su^{6}f)-i^{2}l-om'a^3. Gen., *-om'atos* (*-atis*). Fr., *syphilome.* Ger., *Syphilom.* A neoplasm peculiar to syphilis, consisting of an accumulation of small, round cells inclosed in a capsule of new connective tissue. The cellular growth tends to undergo fatty degeneration and atrophy rapidly, with softening and the production of a cheesy substance or mucus-like fluid. Usually the tumor is sharply circumscribed, but it sometimes occurs in the form of a diffuse infiltration. Its most common situations are "the subcutaneous cellular tissue, the skin, in and upon the bones, the liver, the testicles, the brain, the kidneys, and, especially in children, the lungs" (Bäumler). In the periosteum the growth is known as *tophus syphiliticus.* [G.]—**Chancre-like s.** An ulcerating gummy tumor, usually of the genitals, resembling a chancre. [G.]—**S. of the skin.** See *Gummatous* SYPHILODERM.

SYPHILOMANIA (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-man(ma^{3}n)'-i^2-a^3. From *syphilis* (*q. v.*), and μανία, madness. Fr., *syphilimanie.* Ger., *Syphilomanie.* 1. A tendency to attribute diseases to syphilis. 2. A morbid belief that one is affected with syphilis. [L, 41, 50 (α, 14).] Cf. SYPHILOPHOBIA.

SYPHILOMYCES (Lat.), n. m. Si^{2}f(su^{6}f)-i^{2}l-o^{2}m'i^2(u^6)-sez(kas). Gen., *-et'os* (*-et'is*). From *syphilis* (*q. v.*), and μύκης, a fungus. Condyloma (including both forms). [G.]—**S. morus.** Exuberant condylomata resembling mulberries. [G, 5.]—**S. planus.** See CONDYLOMA *latum.*

SYPHILONYCHIA (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o^{2}n-i^{2}k(u^{6}ch^2)'-i^2-a^3. From *syphilis* (*q. v.*), and ὄνυξ, the nail. See ONYCHIA *syphilitica.*—**S. exulcerans.** Syphilitic onychia with ulceration. [G, 5.]—**S. sicca.** Syphilitic onychia with loss or deformity of the nails, and unattended with ulceration. [G, 5.]

SYPHILOPEMPHIS (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-pe^{2}mf'-i^{2}s(es). Gen., *-pemph'idos* (*-idis*). From *syphilis* (*q. v.*), and πεμφίς, a blister. See PEMPHIGUS *syphiliticus.*—**S. fungosa.** The name given by Fuchs to a case of syphilitic pemphigus in an infant, in which the eruption occurred upon the buttocks, the region of the genitals, the thighs, the abdomen, and the throat, and was followed, after rupture of the bullæ, by condylomatous growths. [G, 5.]—**S. vulgaris.** See PEMPHIGUS *syphiliticus.*

SYPHILOPEMPHIX (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-pe^{2}mf'i^{2}x. Gen., *-ig'os* (*-ig'is*). From *syphilis* (*q. v.*), and πεμφίξ, a blister. Fr., *s.* A syphilitic pustule. [L, 50 (α, 14).]

SYPHILOPHLYSIS (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o^{2}f'li^{2}s(lu^{6}s)-i^{2}s. Gen., *-phlys'eos* (*-oph'lysis*). From *syphilis* (*q. v.*), and φλύσις, breaking out. See *Vesicular* SYPHILODERM.

SYPHILOPHOBIA (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-fob(fo^{2}b)'-i^2-a^3. From *syphilis* (*q. v.*), and φόβος, fear. Fr., *syphilophobie.* Ger., *Syphilophobie.* A morbid fear of having syphilis. [α, 18.] Cf. SYPHILOMANIA (2d def.).

SYPHILOPHYMA (Lat.), n. n. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-fi(fu^6)'ma^3. Gen., *-phym'atos* (*-atis*). From *syphilis* (*q. v.*), and φῦμα, a growth. Syphiloma of the skin. [G.]—**S. circumscriptum.** Circumscribed gummy infiltration (tumor) of the skin. [G.]—**S. diffusum.** Diffuse syphilitic infiltration of the skin. [G, 5.]

SYPHILOPSILOMA (Lat.), n. m. Si^{2}f(su^{6}f)-i^{2}l-o^{2}ps-i^{2}l(el)-om'a^3. Gen., *-om'atos* (*-atis*). From *syphilis* (*q. v.*), and ψιλός, bare. See ALOPECIA *syphilitica.*

SYPHILOPSYDRAX (Lat.), n. m. Si^{2}f(su^{6}f)-i^{2}l-o^{2}ps'id(u^{6}d)-ra^{2}x(ra^{3}x). Gen., *-psyd'racos* (*-acis*). From *syphilis* (*q. v.*), and ψύδραξ, a pimple. Ger., *Knötchensyphilid.* A lichenoid syphilitic eruption. [G, 5.] See *Miliary* SYPHILODERM and *Tubercular* SYPHILODERM.—**S. acutus.** See *Miliary* SYPHILODERM.—**S. circumscriptus.** See *Corymbiform papular* SYPHILODERM.—**S. lenticularis.** See *Lenticular papular* SYPHILODERM.

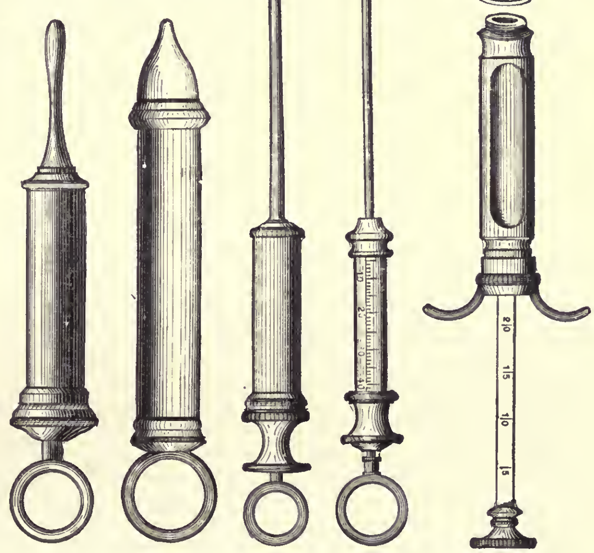
SYPHILOSCLEROMA (Lat.), n. n. Si^{2}f(su^{6}f)-i^{2}l-o(o^3)-skle^{2}r-(sklar)-om'a^3. Gen., *-om'atos* (*-atis*). From *syphilis* (*q. v.*), and σκλήρωμα, an induration. See *Syphilitic* CHANCRE.

SYPHILOSE (Fr.), n. Se-fe-loz. Of Mauriac, the assemblage of symptoms which belong to the tertiary stage of syphilis. [G, 93.]—**S. cutanée** [Mauriac]. Cutaneous syphilis of the tertiary stage, especially gummatous syphilodermata. [G, 93.]

SYPHILOSIS (Lat.), n. f. Si^{2}f(su^{6}f)-i^{2}l-os'i^{2}s. Gen., *-os'eos* (*-is*). From *syphilis* (*q. v.*). A syphilitic affection. [G.]—**S. of the hair** [Wilson]. See TRICHOSYPHILIS.

SYPHON, n. Sif'o^{2}n. See SIPHON.

SYPHONOMA (Lat.), n. n. Sif(su^{6}f)-o^{2}n-om'a^3. Gen., *-om'atos* (*-atis*). From σίφων, a tube. See SIPHONOMA.



SYREION, n. A malignant ulcer on the face or neck. [Paracelsus (H).]

SYRIGMOPHONIA (Lat.), n. f. Si^{2}r(su^{6}r)-i^{2}g-mo(mo^3)-fon'-i^2-a^3. From συριγμός, a shrill piping sound, and φωνή, the voice. Fr., *syrigmophonie.* The state of having a whistling or piping voice. [L, 50 (α, 14).]

SYRIGMUS (Lat.), n. m. Si^{2}r(su^{6}r)-i^{2}g'mu^{3}s(mu^{4}s). Gr., συριγμός. See TINNITUS *aurium.*

SYRINGA (Lat.), n. f. Si^{2}r(su^{6}r)-i^{2}n^{2}g'a^3. From σῦριγξ, a tube. Fr., *lilas.* Ger., *Lilak*, *S.* 1. Lilac, pipe-privet (or -tree); a genus of shrubs forming, with *Schrebera* and *Forsythia*, a tribe (the *Syringeæ*) of the *Oleaceæ*; also the genus *Philadelphus.* [α, 35.] 2. See SYRINGE.—**S. persica.** Ger., *blauer Hollund.* Persian lilac, a species having the properties of *S. vulgaris.* [α, 35.]—**S. vulgaris.** Fr., *lilas commun, lilac, queue de renard des jardins.* Ger., *gemeiner Lilak, blauer* (oder *spanischer*) *Holler* (oder *Hollunder*, oder *Flieder*), *Syrene, Syringen.* Common lilac. The fruit capsules (formerly official as *semen lilac*) and the flowers have been used as a tonic and antiperiodic. The wood yields an oil resembling in odor oil of rosewood and oil of sandal-wood. [α, 35.]

SYRINGE, n. Si^{2}r'i^{2}nj. Gr., σῦριγξ. Lat., *syrinx, sipho, siphunculus.* Fr., *seringue.* Ger., *Spritze.* An instrument consisting usually of a tube terminating in a small orifice and fitted with a piston by the action of which a liquid is first drawn in and then expelled in a stream, as for injecting animal bodies, cleansing wounds, and the like. [A, 301.]—**Blake's middle-ear s.** A s. used for washing out the middle ear, being introduced through a hole in the drum-head. It has a long, slender nozzle which can be bent to correspond to the curve of any external meatus. [F, 39.]—**Buttles's gonorrhœa s.** A hard-rubber s. with long tip and an arrangement over the nozzle for distending the urethra. [E.]—**Catheter s.** A combined catheter and s. for making applications to the bladder or urethra. [E.]—**Clover's s.** An exhausting s. in the form of a bulb of soft rubber attached to a catheter; used for emptying the bladder of fragments after lithotrity. [E.]—**Dick's caustic s.** A catheter with several fine holes at the tip for making applications to the bladder or urethra. [E.]—**Ear s.** Lat., *olenchyta, sipho auricularis.* Ger., *Ohrspritze, Gehörspritze.* A s. used to inject fluids into the ear. [F.]—**Enema s.** A s. for injecting liquids into the rectum.—**Fountain s.** A s. in which gravity is the propelling force, an elevated rubber bag serving as a reservoir. [E.]—**Hypodermic s.** A small s. with a delicate nozzle terminating in a sharp point, for injecting medicines under the skin.—**Lacrymal s.** See DACRYOSYRINX (2d def.).—**Pravaz's s.** Ger., *Pravaz'sche Spritze.* A variety of hypodermic s. having externally a nut working on a thread cut about the piston, so that the contained liquid may be extruded drop by drop. [α, 34.]—**Ricord's s.** Fr., *seringue priapique.* A hard-rubber s. for vaginal injections. [L, 41 (α, 14).]—**Van Buren's débris s.** A Davidson's s. with a hard-rubber bulbous tip perforated in many points, for removing débris from the bladder. [E.]—**Wheelock's reverse-flow s.** A s. with a cap over the nozzle to cause a reverse flow of the fluid; a variety of gonorrhœa s. [E.]

1 2 3 4 5

1, a rectal syringe; 2, a urethral syringe; 3, a uterine syringe; 4, Bumstead's urethral syringe; 5, a hypodermic syringe.

SYRINGEAL, adj. Si^{2}r-i^{2}nj'e^2-'l. Pertaining to the syrinx.

SYRINGICUS (Lat.), adj. Si^{2}r(su^{6}r)-i^{2}nj(i^{2}n^{2}g)'i^{2}k-u^{3}s(u^{4}s). See FISTULOUS.

SYRINGIN, n. Si^{2}r'i^{2}nj-i^{2}n. Fr., *syringine.* Ger., *S.* A glucoside, $C_{19}H_{28}O_{10} + H_2O$, obtained from the bark of *Syringa vulgaris* and from *Ligustrum vulgare.* It has been used in malarial disease. [B, 270 (α, 38).]

SYRINGITIS (Lat.), n. f. Si^{2}r(su^{6}r)-i^{2}nj(i^{2}n^{2}g)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From σῦριγξ, a tube. Inflammation of the Eustachian tube. [L, 50 (α, 14).]

SYRINGO-ADENOME (Ger.), n. pl. Zu^{6}r-i^{2}n^{2}g-o-a^{3}d-e^{2}n-om'-e^2. See HYDRADÉNOMES.

SYRINGOCYSTADENOMA (Lat.), n. n. Si^{2}r(su^{6}r)-i^{2}n^{2}g-o-(o^3)-si^{2}st(ku^{6}st)-a^{2}d(a^{3}d)-e^{2}n-om′a^3. Gen., *-om′atos* (*-atis*). From σῦριγξ, a pipe, κύστις, a bladder, and ἀδήν, a gland. Of Unna, a hydradénome. ["Dtsch. med. Ztg.," Nov. 4, 1889, p. 1023 (*a*, 34).]

SYRINGOID, adj. Si^{2}r-i^{2}n^{2}g′oid. Lat., *syringodes* (from σῦριγξ, a tube, and εἶδος, resemblance). See FISTULOUS.

SYRINGOMENINGOCELE (Lat.), n. f. Si^{2}r(su^{6}r)-i^{2}n^{2}g″o-(o^3)-me^{2}n(man)-i^{2}n^{2}g-o(o^3)-se(ka)′le(la); in Eng., si^{2}r-i^{2}n^{2}g″o-me^{2}n-i^{2}n^{2}g′o-sel. Gen., *-cel′es*. From σῦριγξ, a tube, μῆνιγξ, a membrane, and κήλη, a tumor. A meningocele presenting the characteristics of a syringo-myelocele. [*a*, 34.]

SYRINGOMYELIA (Lat.), n. f. Si^{2}r(su^{6}r)-i^{2}n^{2}g-o(o^3)-mi(mu^6)-el(e^{2}l)′i^2-a^3. From σῦριγξ, a fistula, and μυελός, marrow. Ger., *Syringomyelie*. See MYELOSYRINGOSIS.

SYRINGOMYELITIS (Lat.), n. f. Si^{2}r(su^{6}r)-i^{2}n^{2}g-o(o^3)-mi-(mu^6)-e^{2}l-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). See *Excavating* MYELITIS.

SYRINGOMYELOCELE (Lat.), n. f. Si^{2}r(su^{6}r)-i^{2}n^{2}g″o(o^3)-mi(mu^6)-e^{2}l-o(o^3)-se(ka)′le(la); in Eng., si^{2}r-i^{2}n^{2}g″o-mi′e^{2}l-o-sel. Gen., *-cel′es*. From σῦριγξ, a fistula, μυελός, marrow, and κήλη, a tumor. See HYDROMYELOCELE (1st def.).

SYRINGOTOME, n. Si^{2}r-i^{2}n^{2}g′o-tom. Gr., συριγγοτόμον, συριγγοτόμος. Lat., *syringotomus, syringotomum*. Fr., *s*. Ger., *Syringotom, Fistelmesser*. A curved bistoury with a flexible probe point for the operation on fistula in ano. [E.]

SYRINGOTOMY, n. Si^{2}r-i^{2}n^{2}g-o^{2}t′om-i^2. Gr., συριγγοτομία (from σῦριγξ, a fistula, and τέμνειν, to cut). Lat., *syringotomia*. Fr., *syringotomie*. Ger., *Syringotomie, Fistelschnitt*. A cutting operation for fistula in ano. [E.]

SYRINX (Lat.), n. f. Si^{2}r(su^{6}r)′i^{2}n^{2}x. Gen., *-ing′os* (*-ing′is*). Gr., σῦριγξ. 1. A tube. 2. A fistula. 3. The lower larynx of birds, where the voice is formed. It is at the bottom of the trachea, where the bronchi bifurcate. [L, 12, 343.]

SYRMA (Lat.), n. n. Su^{5}rm(su^{6}rm)′a^3. Gen., *syr′matos* (*-atis*). Gr., σύρμα (from σύρειν, to drag). The fæces in dysentery; so called because they were thought to contain scrapings or particles of the inner coat of the intestines. [L, 50 (*a*, 14).]

SYRMÆA (Lat.), n. f. Su^{5}rm(su^{6}rm)-e′(a^3/e^2)-a^3. Gr., συρμαία (from συρμός, vomiting). 1. The radish. Its juice, mixed with salt water, was used by the Egyptians as a purgative and emetic. 2. A purge. 3. A mixture of honey and suet. [A, 311 (*a*, 21).]

SYRMAISMUS (Lat.), n. m. Su^{6}rm(su^{6}rm)-a^3-iz′(i^{2}s)-mu^{3}s-(mu^{4}s). Gr., συρμαισμός. Fr., *syrmaïsme*. Of Hippocrates, catharsis or emesis. [L, 41, 50 (*a*, 14, 43).]

SYRO (Lat.), n. m. Sir(su^{2}r)′o. See SIRO.

SYRUP, n. Si^{2}r′u^{3}p. Lat., *syrupus*. Fr., *sirop*. Ger., *S., Sirop*. It., *siroppo*. Sp., *jarabe*. 1. A concentrated solution of cane sugar (saccharose) in water, forming a thick, ropy, transparent liquid of very sweet taste. See, also, SYRUPUS. 2. A class of pharmaceutical preparations consisting of ordinary s. containing some medicinal principle in solution. [B.]—**Amussat's laxative s.** See SIROP *laxatif d'Amussat*.—**Brauner S.** (Ger.). See *Syrupus* LIQUIRITIÆ and MOLASSES.—**Eaton's s.** See *Syrupus* FERRI, *quininæ et strychninæ phosphatum*.—**Gibert's s.** See SIROP *Gibert*.—**Hive s.** See *Syrupus* SCILLÆ *compositus*.—**Iodocalcic s.** Fr., *sirop iodocalcaire*. A s. containing soluble calcium phosphate and calcium iodide; employed in tuberculosis, scrofula, and rickets. [L, 41 (*a*, 14).]—**Simple s.** See SYRUPUS (1st def.).

SYRUPUS [U. S. Ph., Br. Ph.] (Lat.), n. m. Si^{2}r(su^{6}r)′u^{2}p(u^{4}p)-u^{3}s(u^{4}s). Fr., *sirop de sucre*, et *sirop de sucre à froid* [Fr. Cod.]. Sp., *jarabe simple* [Sp. Ph.]. 1. A concentrated solution of cane sugar in water, containing 10 parts of water and 20 [Br. Ph., Gr. Ph.] (18·57 [U. S. Ph.], 18·18 [Netherl. Ph.], 18 [Dan. Ph., Russ. Ph., Swed. Ph.], 17·78 [Belg. Ph.], 16$\frac{2}{3}$ [Hung. Ph.], 16$\frac{1}{4}$ [Swiss Ph.], 16 [Austr. Ph., Roum. Ph.], 15 [Ger. Ph., Norw. Ph., Finn. Ph.]) of sugar. The Fr. Cod. has two syrups: the *sirop de sucre*, prepared with 17 parts of sugar to 10 of water brought to a boil, and the *sirop de sucre à froid*, prepared with 18 parts of sugar to 10 of cold water. The Sp. Ph. also has two syrups, one containing 16$\frac{2}{3}$ parts of sugar to 10 of hot water, the other 18 of sugar to 10 of cold water. [B, 95 (*a*, 38).] 2. A medicinal preparation containing enough sugar to give it the consistence of syrup.—**S. aceticus.** See *S.* ACIDI ACETICI.—**S. albus.** See SYRUP (1st def.).—**S. alcalinus.** A solution of 11 parts of potassium carbonate in 180 of sugar. [B, 119 (*a*, 38).]—**S. anodynus.** A syrup made by treating 3 parts of the seeds of *Datura stramonium* with 36 of vinegar, straining, and adding 72 of sugar. [B, 119 (*a*, 38).]—**S. antiscorbuticus.** Fr., *sirop antiscorbutique de Portal* [Fr. Cod.]. Sp., *jarabe antiescorbútico* [Sp. Ph.]. A syrup made by expressing and filtering the juice of 100 parts each of cochlearia-leaves and cress and 30 of horseradish, adding to 120 parts of this juice 500 of a mixture of 5 of calisaya-bark, 20 of gentian-root, and 10 of the root of *Rubia tinctoria*, macerating for 12 hours with 500 parts of water, expressing, filtering, dissolving in the whole 1,180 of sugar, and straining when cold [Fr. Cod.]; or by macerating 100 parts each of brook-lime, cochlearia, cress, and horseradish, 6 of orange-peel, and 1 part of cinnamon in 300 of stronger white wine, expressing, clarifying, straining, and for each 5 parts adding 8 of sugar [Swiss Ph.]; or by macerating 3 parts of calisaya-bark, 12 of gentian-root, and 6 of the root of *Rubia tinctoria* in 340 of water, expressing, filtering, adding 8 parts of sugar for 5 of filtrate, straining, and adding 168 of compound syrup of cochlearia [Belg. Ph.]; or by dissolving 620 parts of sugar in 345 of succus antiscorbuticus. [B, 95 (*a*, 38).] See also *S.* ARMORACIÆ *compositus*.—**S. antiscorbuticus jodatus** [Swiss Ph.]. Sp., *jarabe de rábano yodado* [Sp. Ph.]. A syrup made by adding to 1,000 parts of s. antiscorbuticus 1$\frac{1}{4}$ part of iodine and $\frac{5}{8}$ part of potassium iodide [Swiss Ph.], or $\frac{1}{8}$ of iodine and 1 of potassium iodide [Sp. Ph.] triturated with [Swiss Ph.] (dissolved in [Sp. Ph.]) a little water. [B, 95 (*a*, 38).]—**S. aperiens compositus.** A preparation made by digesting 221 parts each of the purified juice of agrimony, *Chærophyllum sativum*, and *Pimpinella saxifraga* and the roots of iris, parsley, horseradish, and sulphurwort and 83 each of sassafras and the roots of elecampane and sweet flag in 996 of vinegar of squill, distilling 332 parts, and adding a syrup made of the expressed liquid from the residue with 1,992 of sugar. [B, 119 (*a*, 38).]—**S. aperiens Pechii.** A preparation made by boiling 28 parts each of the berries of alkekengi and the roots of *Apium graveolens*, asparagus, elecampane, burdock, comfrey, swallowwort, fennel, iris, strawberry, licorice, polypodium, and common eryngo in enough water, and adding 11 parts each of the juice of *Pimpinella saxifraga*, chicory, fennel, fumitory, parsley, and licorice, 496 of vinegar of squill, and 1,328 of sugar. [B, 119 (*a*, 38).]—**S. aperitivus.** See *Syrupus de quinque* RADICIBUS *compositus* (under RADIX).—**S. aromaticus.** See *S.* ARTEMISIÆ *compositus*.—**S. balsamicus (de Tolu).** See *S. tolutanus*.—**S. benzoinus.** A syrup made by digesting 250 grammes of benzoin with 1,000 of water for twelve hours, filtering, and adding twice as much white sugar. [B, 119 (*a*, 38).]—**S. cardiacus.** A syrup made of 11 parts of cinnamon, 4 of cloves, 2 of ginger, 75 of rose-water, 240 of strong wine, and 540 of sugar. [B, 199 (*a*, 38).]—**S. chalybeatus.** A syrup of 664 parts each of vinous tincture of iron and simple syrup and 14 of alcoholic cinnamon-water; or of 15 of aperient tincture of iron and 360 of syrup of chicory. [B, 119 (*a*, 38).]—**S. communis** [Pruss. Ph., 7th ed., Finn. Ph., Netherl. Ph.]. See MOLASSES.—**S. compositus Laffecteur.** See under *Syrupus* SARSAPARILLÆ *compositus*.—**S. copaivicus.** Fr., *sirop de baume de copahu*. Syrup of balsam of copaiba; made by mixing 3 parts of powdered gum arabic with enough water to form a mucilage, incorporating 12 parts of copaiba, and adding gradually 144 of syrup [Lipp. Disp., 1792]; or by stirring 1 part of tincture of copaiba into 24 parts of warm syrup [Frankf. Disp., 1791]. [B, 97 (*a*, 21).]—**S. cordialis.** A syrup made of 665 parts of Madeira wine, 1,320 of sugar, and 40 of cinnamon-water; or of 120 of sweet almonds, 45 of cinnamon, 900 of sugar, 360 of brandy, 720 of Madeira wine, and $\frac{9}{10}$ part each of musk and ambergris. [B, 119 (*a*, 38).] Cf. HIPPOCRAS.—**S. Cuisinieri.** See *S.* SARSAPARILLÆ *compositus*.—**S. cum monosulfureto sodico.** See *Sirop de monosulfure de* SODIUM.—**S. emeticus.** A syrup made by digesting 7 parts of powdered glass of antimony with 360 of white Rhine wine for three days at a gentle heat, adding 960 of white sugar, and boiling. [B, 119 (*a*, 38).]—**S. emulsivus.** See SIROP *amygdalin* and *S.* AMYGDALARUM.—**S. fuscus.** See MOLASSES.—**S. gummosus.** See *S.* ACACIÆ.—**S. hollandicus.** See MOLASSES.—**S. hordeatus.** See SIROP *amygdalin* and *S.* AMYGDALARUM.—**S. iodo-tannicus** [Netherl. Ph.]. A syrup made by dissolving 1 part of iodine in a little alcohol, and 4 parts of extract of rhatany in water, mixing the two, allowing the mixture to stand some days until it no longer turns starch-paste blue, filtering, bringing up to 170 parts by washing with water, and adding 330 of sugar. [B, 95 (*a*, 38).]—**S. kermesinus.** A syrup made by macerating kermes with three times as much sugar and expressing; or by boiling together equal parts of kermes-juice and sugar; or by macerating $\frac{48}{100}$ part of purified potassium carbonate, 28 parts of kermes, 166 of rose-water, and 111 each of water of lemon and water of cinnamon, and adding $\frac{3}{100}$ part of alum and 664 parts of sugar; or by infusing over night 15 parts of cochineal and $\frac{7}{10}$ part of purified potassium carbonate in 360 parts each of rose-water and cinnamon-water, and adding 960 of sugar and 360 of kermes-juice. [B, 119 (*a*, 38).]—**S. Lobelii.** See *Sirop d'*ÉRYSIMUM *composé*.—**S. longæ vitæ.** A syrup made by macerating 61 parts of fresh iris-root, 30 of dried gentian-root, and 367 of white wine, expressing, and adding 1,000 of mercurialis-juice, 345 each of the juice of borage and ox-tongue, and 1,500 of white honey. [B, 119 (*a*, 38).]—**S. magistralis** [Swiss Ph.]. A syrup consisting of 1 part of extractum ferri pomatum dissolved in 4 parts of alcoholic cinnamon-water, 20 of syrup of orange-peel, 50 of compound syrup of rhubarb, 24 of syrup, and 1 part of tincture of Chinese cinnamon. [B, 95 (*a*, 38).]—**S. mannatus.** See *Syrupus* SENNÆ *cum manna*.—**S. mastichinus.** A preparation made by infusing 3 parts of mastic in 18 of water of mastic, straining, and adding 24 of sugar. [B, 119 (*a*, 38).]—**S. mineralis.** See *S.* ACIDI SULPHURICI.—**S. opiatus, S. opii** [Belg. Ph.]. Fr., *sirop d'opium* (ou *thébaïque*). Sp., *jarabe de extracto de opio* [Sp. Ph.]. A syrup made of extract of opium [Swiss Ph., Russ. Ph.] (dissolved in water [Fr. Cod., Belg. Ph., Roum. Ph., Sp. Ph.], in strong wine [Ger. Ph., Gr. Ph.]), mixed with syrup and evaporated, so that the preparation contains in 100 grammes about 20 centigrammes of extract of opium (1 gramme of the tincture [Finn. Ph., Norw. Ph., Swed. Ph.]), or 2 grains of the wine [Netherl. Ph.] (1 grain of the extract [Gr. Ph.]) to the oz. [B, 95 (*a*, 38).]—**S. pectoralis** [Fr. Cod.]. Fr., *sirop d'espèces pectorales* [Fr. Cod.]. A syrup made by infusing 1,000 parts of species florum pectoralium in 12,000 of boiling water, expressing, filtering, adding to 10,000 parts of the product 3 of extract of opium dissolved in 500 of water of orange-flowers and 20,000 of sugar, and straining. [B, 95 (*a*, 38).]—**S. pectoralis comitis Christiani.** A syrup made by boiling 14 grammes each of sarsaparilla, china-root, *Smilax aspera*, and guaiac, 21 of pearl barley, and 3$\frac{3}{8}$ of ivory-filings in 1,992 of water until reduced one half, and adding a handful each of violets, ox-tongue, roses, and borage, and 664 grammes of white sugar. [B, 119 (*a*, 38).]—**S. sacchari.** See *S.*—**S. scilliticus.** See *Syrupus* SCILLÆ.—**S. simplex.** See *S.* (1st def.).—**S. spleneticus.** A syrup made by boiling 60 parts each of the roots of *Apium graveolens*, *Pimpinella saxifraga*, chicory, fennel, and parsley, the herbs of scolopendrium, cochlearia, water-cress, *Chærophyllum sativum*, and *Asperula odorata*, and the seeds of nettle and cress, 15 of the seeds of *Apium graveolens*, 22 of juniper, and 11 each of the roots of galangal and sweet flag in water enough to make 1,080, expressing, clarifying, adding 1,260 parts of white sugar, boiling, and adding 720 parts of a mixture made by boiling 90 parts of astacolith, 60 of cream of tartar, and 7 of hydrochloric acid in 720 of white Rhine wine. [B, 119 (*a*, 38).]—**S. temperans.** A mixture of equal parts of syrup of lemon-juice and syrup of poppy. [A, 447 (*a*, 38).]—**S. thebaicus.** See *S.*

opiatus.—**S. tolutanus.** Fr., *sirop de baume de Tolu.* Sp., *jarabe de bálsamo de tolú.* A syrup made by digesting 10 parts of balsam of Tolu in 250 of a solution of 162½ of sugar in 87½ of water at a temperature not higher than 82° C., straining when cold, and washing with water if necessary up to 250 parts [U. S. Ph.]; or by boiling 10 parts of the balsam in 160 of water, filtering when cold, and adding 256 parts of sugar [Br. Ph.]; or by heating to a boil 60 parts of the tincture of balsam of Tolu with water enough to make 400 of filtrate and adding 800 of sugar [Dan. Ph.]. The extraction of the balsam is done by somewhat different methods and the proportion of sugar varies somewhat according to the other ph's. Some of the older ph's ordered dilute alcohol. [B, 95, 119 (α, 38).]—**S. Vanier** [Belg. Ph.]. A syrup made by mixing an emulsion of 50 parts each of cod-liver oil and water, 4 of oil of anise, 25 of powdered gum arabic, 15 of extractum juglandis, 2½ of potassium iodide, and 50 of water with a solution of 300 parts of honey in 150 of syrup of yellow cinchona-bark and 404 of syrup, and reducing to 1,000 parts. [B, 95 (α, 38).]—**S. vitriolatus.** See *S.* ACIDI SULPHURICI.

SYSOME (Fr.), **SYSOMIEN** (Fr.), n's. Se-zom, -zo-me-a^{3}n^2. See SYNADELPHUS.

SYSPASIA (Lat.), n. f. Si^{2}s(su^{6}s)-paz(pa^{3}s)′i^2-a^3. Gr., συσπασία. See CONVULSION.

SYSSARCOSIS (Lat.), n. f. Si^{2}s(su^{2}s)-sa^{3}rk-os′l^{2}s. Gen., *-os′eos* (*-is*). Gr., συσσάρκωσις (from συσσαρκοῦσθαι, to be grown over with flesh). Fr., *syssarcose.* Ger., *Syssarkose, Fleischbeinfügung.* That variety of articulation in which the bones are connected with each other by means of muscles (*e. g.*, that of the scapula with the ribs).

SYSTALSIS (Lat.), n. f. Si^{2}s(su^{6}s)-ta^{2}ls(ta^{3}ls)′i^{2}s. Gen., *-als′eos* (*-is*). From συστέλλειν, to draw together. See SYSTOLE.

SYSTALTIC, adj. Si^{2}s-ta^{2}lt′i^{2}k. Gr., συσταλτικός. Lat., *systalticus.* Fr., *systaltique.* Ger., *systaltisch.* See SYSTOLIC.

SYSTASIS (Lat.), n. f. Si^{2}s(su^{6}s)′ta^{2}s(ta^{3}s)-i^{2}s. Gen., *-as′eos, syst′asis.* Gr., σύστασις. Consistence, density.

SYSTEM, n. Si^{2}st′e^{2}m. Gr., σύστημα (from συνιστάναι, to set together). Lat., *systema.* Fr., *système.* Ger., *S.* 1. A methodical arrangement of organisms, etc., according to their relationships. 2. A group or aggregation of organs or structures having special functions. [α, 35.] 3. The body as a whole. [B.] 4. See METHOD.—**Adipose s.** A general term for all parts resembling adipose tissue and for the organs at first formed of it.—**Arterio-ganglionic s.** Of M. Hall, that part of the sympathetic nervous s. that is distributed along and to the arteries. [α, 18.]—**Association s.** Of Meynert, a s. of association fibres. [α, 34.]—**Asymmetric s.** See *Triclinic s.*—**Axial-fibre s.** Of Spitzka, the bundles of nerve-fibres which belong to the lemniscus. ["Med. Record," Oct. 18, 1884, p. 421 (I).]—**Balkens′** (Ger.). See *Trabecular s.*—**Callosal s.** The s. of nerve-fibres in the corpus callosum which, according to Meynert and Arnold, unite symmetrical regions in the two hemispheres. [I, 3 (K).]—**Cellular s.** See *Fundamental s.*—**Central nervous s.** The brain and spinal cord. [L.]—**Commissural s.** See *Trabecular s.*—**Connective s. of the cerebellum.** Of Burdach, the superior peduncles of the cerebellum with the valve of Vieussens, which is included between them. [I, 31 (K).]—**Cortical s.** The bark or cortex of plants. [α, 35.]—**Cubic s.** See *Regular s.*—**Eingeweidenervens′** (Ger.). See *Sympathetic nervous s.*—**Epidermal s.** The group of tissues, consisting of the epidermis, hairs, etc., covering the framework and parenchyma of plants. Its cells are compactly arranged and their walls cutinized, this adapting it to its protective function. [α, 35.]—**Extraspinal ganglionic s.** Of M. Hall, the sympathetic nervous ganglia situated on each side of the spine. [α, 18.]—**Fascicular s., Fibro-vascular s.** The aggregation of fibro-vascular bundles (*q. v.*); the fibrous framework of a plant; in the leaf, the union of veins; in the stem and root, the tough resistant portion. [α, 35.]—**First association s.** The s. of associated fibres connecting the optic thalamus with the cortex cerebri. [α, 34.]—**First projection s.** Of Meynert, those tracts of nerve-fibres which extend between the great ganglionic masses of the brain and the convolutions. They include a portion or the whole of the corona radiata. ["Jour. of Nerv. and Ment. Dis.," 1878, p. 405 (K).]—**Fundamental s.** The cellular s.: the group of tissues surrounding the fibro-vascular bundles of plants, forming pith, medullary rays, pulp of fruits and leaves, etc. Its function is assimilative. [α, 35.]—**Ganglionic nervous s.** See *Sympathetic nervous s.*—**Gastrovascular s.** A s. having both digestive and circulatory functions. [L.]—**Gefässs′ des Fruchthofes** (Ger.). The vessels in which the first circulation takes place in the embryo. [Kölliker (H).]—**Goux s.** A s. of removing excreta by the use of a mixture of some vegetable or animal fibrous substance with a small proportion of iron or calcium sulphate pressed close on the bottom and sides of a tub or pail that is used to receive excreta. [α, 34.]—**Grosshirnrindenbrückens′** (Ger.). A tract of nerve-fibres extending from the pons Varolii to the cortex cerebri. [I, 27 (K).]—**Haversian s.** A Haversian canal, together with its lamellæ, lacunæ, and canaliculi.—**Hemmungss′** (Ger.). An inhibitory s. or group of nerves. [K, 16.]—**Hexagonal s.** A s. of crystallization characterized by the presence of four axes, three (the *secondary axes*) lying in the same plane and the fourth (the *principal axis*) at right angles to this. [B, 3.]—**Intermediary s.** The interolivary layer; of Flechsig, a longitudinal tract of nerve-fibres situated between the olivary bodies. It receives fibres from the termination of the fillet and from the postero-lateral columns, and is also connected with the corpus dentatum olivæ. [I, 1 (K).]—**Intraspinal ganglionic s.** Of M. Hall, the ganglia on the posterior roots of the trifacial and spinal nerves. [α, 18.]—**Intravisceral ganglionic s.** Of M. Hall, that portion of the sympathetic nervous s. that is distributed to the tissues composing the viscera. [α, 18.]—**Ligneous s.** See *Fibro-vascular s.*—**Longitudinal associating s.** Of Spitzka, the longitudinal bundles of nerve-fibres in Meynert's classification which connect dissimilar regions in the same hemisphere of the brain. [K.]—**Lymph-canalicular s.** Ger., *Lymphcanälchens′.* Intercommunicating lymph cavities in the connective tissue of organs continuous with the lymphatic capillaries. [L.]—**Middle s. of the fibræ arcuatæ.** The arciform fibres connected with the corpus dentatum olivæ. They form its capsule, and then enter it, being connected, according to Meynert, with its nerve-cells. [I, 31 (K).]—**Monoclinic s., Monosymmetric s.** A s. of crystallization characterized by the presence of three unequal axes, two (the *secondary axes*) being placed at right angles to each other, and one of them (the *orthodiagonal axis*) being also at right angles to the third (or *principal*) axis, while the second (or *clinodiagonal*) axis forms an oblique angle with the latter. [B, 3.]—**Nervous s.** The brain, spinal cord, sympathetic nervous s., and nerves. [L.]—**Organic nervous s.** See *Sympathetic nervous s.*—**Projection s.** Of Meynert, the sensory nerve-fibres of the body which originate in the cerebral cortex, pass through the central tubular gray matter after converging to the crura cerebri, and finally again diverge as peripheral sensory nerves; so called because an image of the external world is considered as projected upon the cerebral cortex by the aid of this s. [I, 31 (K).] See also *First projection s.* and *Second projection s.*—**Quadratic s.** A s. of crystallization characterized by the presence of three axes at right angles to each other, the two secondary axes being of equal length, while the length of the principal axis is different. [B, 3.]—**Regular s.** A s. of crystallization characterized by the presence of three equal axes at right angles to each other. [B, 3.]—**Rhombic s.** A s. of crystallization characterized by the presence of three axes at right angles to each other, all of unequal length, one (the *principal axis*) being that along which the crystal tends mostly to develop, the others (the *secondary axes*) being denominated respectively *brachydiagonal* and *macrodiagonal*, according to their length. [B, 3.]—**Second projection s.** Of Meynert, those nerve-fibres which unite the cerebral ganglia with the central gray substance of the brain and spinal cord. ["Jour. of Nerv. and Ment. Dis.," 1878, p. 405 (K).]—**Sexual s.** A botanical s. in which the genera are grouped in classes based on the number or arrangement of the stamens and pistils; especially the Linnæan s. [α, 35.]—**Spinal s. of nerves.** The nerves originating from the spinal cord in distinction with those having a cranial origin. [α, 34.]—**Subependymal mixed s.** Of Spitzka, a s. or column of nuclei ("cells") which, beginning at the lower portion of the medulla oblongata, is continuous above with the common superior nucleus of the vagus and spinal accessory nerves and the substantia ferruginea, and finally with the superior nucleus of the trigeminus. ["Jour. of Nerv. and Ment. Dis.," Apr., 1880, p. 208 (K).]—**Subependymal s., Subventricular motor s. of nuclei.** Of Spitzka, a chain of nuclei which begins with the hypoglossal nucleus and is prolonged along the side of the third ventricle to the infundibulum. ["Jour. of Nerv. and Ment. Dis.," 1880, p. 208 (K).]—**Superior s. of the fibræ arcuatæ.** The upper bundles of arcuate fibres of the medulla oblongata. [I, 31 (K).]—**Sympathetic (nervous) s.** The sympathetic nerves and ganglia and the plexuses connected with them. [L.]—**Trabecular s.** [Meynert], **Transverse associating s.** [Spitzka]. Ger., *Balkens′.* Those bundles of nerve-fibres (*e. g.*, the corpus callosum and the anterior commissure) which connect similar regions of the opposite hemispheres of the brain. [I, 31 (K).]—**Triclinic s.** A s. of crystallization characterized by the presence of three unequal axes, all obliquely inclined to each other, and denominated respectively *principal axis* and *secondary axes* (*macrodiagonal* and *brachydiagonal*) in the same way as in the rhombic s. [B, 3.]—**Vascular s.** 1. The s. of vessels concerned in the circulation of the blood. [α, 48.] 2. See *Fibro-vascular s.*

SYSTEMA (Lat.), n. n. Si^{2}st(su^{6}st)-em(am)′a^3. Gen., *-em′atos* (*-atis*). See SYSTEM.—**S. nervosum vegetativum.** See *Sympathetic* (*nervous*) SYSTEM.—**S. pontis Varolii.** See BRÜCKENS*ystem.*—**S. vitæ automaticæ** (seu vegetativæ). See *Sympathetic* (*nervous*) SYSTEM.

SYSTEMATIC, adj. Si^{2}st-e^{2}m-a^{2}t′i^{2}k. Lat., *systematicus.* Fr., *systématique.* Ger., *systematisch.* Pertaining to system; in accordance with system; methodical. [α, 35.]

SYSTEMATOLOGY, n. Si^{2}st-e^{2}m-a^{2}t-o^{2}l′o-ji^2. Lat., *systematologia* (from σύστημα, a system, and λόγος, understanding). The science of classification; taxonomy. [α, 48.]

SYSTÈME (Fr.), n. Se-ste^{2}m. See SYSTEM.—**Petit s. arciforme.** Bundles of arching nerve-fibres which connect adjacent convolutions of the brain; best seen, according to Huguenin, in sections perpendicular to the axis of a convolution. [I, 28 (K).]

SYSTEMIC, adj. Si^{2}st-e^{2}m′i^{2}k. Fr., *systématique.* Ger., *systemisch.* Pertaining to the organism as a whole. [α, 48.]

SYSTOLE (Lat.), n. f. Si^{2}st(su^{6}st)′o^{2}l-e(a). Gen., *syst′oles.* Gr., συστολή (from συστέλλειν, to draw together). Fr., *s.* Ger., *S.* 1. Contraction, especially that of the walls of the heart, occurring alternately with their diastole. [K.] 2. See under DIASTOLE (2d def.).—**Aborted s., Abortic s.** Fr., *s. avortée.* Of F. Franck, a cardiac s. that does not produce an elevation of pressure in the aortic system. It may be caused by mitral regurgitation, lack of ventricular distention, or deficient energy. [α, 34.]—**Anticipated s.** Fr., *s. anticipée.* Of F. Franck, an aborted s. due to a deficient quantity of blood in the ventricle. ["Compt. rend. de l'Acad. des sci.," 1877, lxxxiv, p. 786 (α, 34).]—**Arterial s.** The retraction of the arterial wall just subsequent to the cardiac s. [α, 34.]—**Auricular s.** Ger., *Vorhofss′.* The contraction of the auricles of the heart. [K.]—**Sphygmo-s.** The expansion of the pulse corresponding to the s. of the heart, as represented graphically by the sphygmograph. [B; K, 3.]—**Ventricular s.** The s. of the ventricles. [α, 34.]

SYSTOLIC, adj. Si^{2}st-o^{2}l′i^{2}k. Lat., *systolicus.* Fr., *systolique, systolaire.* Ger., *systolisch.* Pertaining to the systole. [K.]

SYSTOLOMETER, n. Si^{2}st-o^{2}l-o^{2}m′e^{2}t-u^{5}r. From συστολή, systole, and μέτρον, a measure. Of W. Whitla, a small saucer-shaped metal disc, ½ inch in diameter, from the concave surface of

which arises a hollow stem that receives a fine silver wire which may be held in place by a thumb-screw. The end of the wire is bent at an angle and tipped with a bead. The warmed convex side of the disc is attached over the region of the apex-beat of the heart by means of a plaster. The wire records the systole, and, tapping against a stethoscope, gives a systolic sound. ["N. Y. Med. Jour.," Mar. 10, 1888, p. 277 (α, 34).]

SYSTREMMA (Lat.), n. n. Si^{2}s(su^{6}s)-tre^{2}m′ma^3. Gen., *-trem′matos* (*-atis*). Gr., σύστρεμμα (from συστρέφειν, to twist up). 1. A glomerule; a convolution. 2. Cramp. [L, 50 (α, 14).]

SYSTROPHE (Lat.), n. f. Si^{2}s(su^{6}s)′tro^{2}f-e(a). Gen., *sys′trophes*. Gr., συστροφή. A sprain; also the resulting inflammation. [L, 50 (α, 14).]

SYZYGIUM (Lat.), n. n. Si^{2}z(su^{6}z)-i^{2}j(u^{6}g)′i^2-u^{3}m(u^{4}m). From συζύγιος, yoked (from σύν, with, and ζευγνύναι, to yoke). Fr., *syzygion*. Ger., *Mützenblume*. 1. A genus of the *Myrtaceœ*, regarded by some as a section of *Eugenia*. [α, 35.] 2. Conjunction of organisms in pairs, without fusion of substance. [L, 121.]—**S. belluta.** A Malabar tree with aromatic leaves which are used for diarrhœa and in baths for rheumatism. [α, 35.]—**S. caryophyllæum.** Ger., *gewürzreiche Mützenblume*. A Ceylon species. The mildly aromatic and astringent bark, East Indian clove-bark, formerly known in Europe as *cassia caryophyllata* seu *cortex cassiœ caryophyllatœ*, is used as a spice and as a medicine. [α, 35.]—**S. caryophyllifolium.** Ger., *nelkenbaumblättrige Mützenblume*. An East Indian species. The astringent, bitterish, aromatic bark is used in fevers and in abdominal diseases. The berries are of the shape and taste of olives. [α, 35.]—**S. guineense.** A species used in Senegal for rheumatism. The ripe fruits are edible. [α, 35.]—**S. jambolanum.** Fr., *myrte pédonculé*. Jambolan tree, Java plum; a species identified by some with *S. caryophyllifolium*. The root-bark is used as an astringent, the bark of the stem and branches in aphthæ, and the austere, acidulous berries in gargles and in preparing an astringent and stomachic syrup. The bark and the seed (called in India *jamboo*, or *jambol*) have been used in diabetes. [α, 35.]—**S. zeylanicum.** An edible-fruited Ceylon tree. The leaves, which have a pleasant, aromatic, somewhat astringent taste, are used in syphilis. [α, 35.] Cf. MARANDA.

SZALATHNYA, n. A place in Sohl County, Hungary, where there is an alkaline and saline spring. [L, 30, 49 (α, 14).]

SZCZAWNICZA, n. A place in Austrian Galicia where there are saline springs, with bathing and whey-cure establishments. [L, 30, 37, 49, 57 (α, 14).]

SZKLENO, n. A place in Bars County, Hungary, where there are hot sulphurous springs. [L, 30, 49, 57, 135 (α, 14).]

SZLIACS, n. A place in Zolyom County, Hungary, where there are warm gaseous, ferruginous, alkaline, and sulphurous springs. [L, 30, 37, 49, 57 (α, 14).]

SZOBRANCZ, n. A place in Ungh County, Hungary, where there are saline and sulphurous springs. [L, 30, 49, 57 (α, 14).]

SZOLYMA, n. A place in Marmaros County, Hungary, where there are sulphurous springs. [L, 30 (α, 14).]

SZOLYVA, n. A place in Bereg County, Hungary, where there is a gaseous and chalybeate spring. [L, 30 (α, 14).]

SZULIN, n. A place in Zips County, Hungary, where there is a ferruginous spring. [L, 30, 49 (α, 14).]

T

TABAC (Fr.), n. Ta^3-ba^{3}k. 1. The genus *Nicotiana*. [α, 35.] 2. Of the Fr. Cod., see TABACUM.—**Acétolé de t.** See *Acetum* NICOTIANÆ.—**Éléolé de t.** See *Oleum* NICOTIANÆ.—**Éthérolé de t.** See *Tinctura* NICOTIANÆ *œtherea*.—**Extrait de t.** See *Extractum* NICOTIANÆ.—**Grand t.** See NICOTIANA *tabacum*.—**Huile de t.** See *Oleum* NICOTIANÆ.—**Hydrolé de t., Infusion de t.** See *Infusum* NICOTIANÆ.—**Lavement de t.** See *Enema* TABACI.—**Œnolé de t.** See *Vinum* NICOTIANÆ.—**Oxéolé de t.** See *Acetum* NICOTIANÆ.—**Oxymel de t.** See *Oxymel* NICOTIANÆ.—**Petit t.** See NICOTIANA *rustica*.—**Sirop de t.** See *Syrupus* NICOTIANÆ.—**T. de montagne, T. des Savoyards, T. des Vosges.** The *Arnica montana*. [α, 35.]—**Teinture éthérée de t.** See *Tinctura* NICOTIANÆ *œtherea*.—**Vin de t.** See *Vinum* NICOTIANÆ.

TABACIC ACID, n. Ta^{2}b-a^{2}s′i^{2}k. Fr., *acide tabacique*. Ger., *Tabaksäure*. A substance obtained from tobacco-leaves, formerly considered a dibasic organic acid, but now known to be a mixture of malic and citric acids. [B, 38, 48, 93 (α, 14).]

TABACOSIS (Lat.), n. f. Ta^{2}b(ta^{3}b)-a^{2}k(a^{3}k)-os′i^{2}s. Gen., *-os′eos* (*-is*). From *tabacum*, tobacco. Infiltration of a part or region with tobacco-dust. [α, 34.]—**T. pulmonis, T. pulmonum.** Pulmonary atrophy caused by the inhalation of tobacco-dust. [α, 34.]

TABACUM [U. S. Ph.] (Lat.), n. n. Ta^{2}b(ta^{3}b)′a^{2}k(a^{3}k)-u^{3}m-(u^{4}m). Fr., *nicotiane*, *tabac* [Fr. Cod.]. Ger., *Tabak*, *Tabakblätter* [Ger. Ph.]. Sp., *nicociana* [Sp. Ph.]. The dried leaves of *Nicotiana t.* [B, 95 (α, 38).]—**Enema tabaci.** Fr., *lavement de tabac*. Ger., *Tabakklystier*. Sp., *clister de tabaco* [Sp. Ph.]. A preparation made by treating tobacco-leaves with 175 times as much boiling water for $\frac{1}{2}$ hour [Br. Ph.] (with 64 times as much boiling water for $\frac{1}{4}$ hour [Finn. Ph.], with 240 times as much boiling water for 1 hour [Sp. Ph.]), and straining. [B, 95 (α, 38).]

TABAGISME (Fr.), n. Ta^3-ba^3-zhez-m'. Chronic tobacco poisoning. [R. Longuet, "Union méd.," June 23, 1885, p. 1053.]

TABAK (Ger.), n. Ta^{3}b-a^{3}k′. 1. The genus *Nicotiana*. 2. Tobacco-leaves. [α, 35.]—**T'lunge.** See TABACOSIS *pulmonum*.—**T'-vergiftung.** See NICOTINISM.

TABANUS (Lat.), n. m. Ta^{2}b(ta^{3}b)′an(a^{3}n)-u^{3}s(u^{4}s). A genus of blood-sucking *Diptera*. [α, 48.]—**T. bovinus.** See ŒSTRUS *bovis*.

TABASHEER, n. Ta^{2}b-a^3-sher′. Said to be from Sans., *tavakshiri*, cow's milk. Written also *tabashir*, *tabaxir*, and *tabaschir*. Fr., *tabashir*. Ger., *Tabascheer*. A bluish-white substance found in the fruits of various species of the *Bambuseœ*. It consists of silica and small quantities of lime, potash, and vegetable matter. It is reputed astringent and tonic, and is used medicinally. [α, 35.]

TABATIÈRE (Fr.), n. Ta^{3}b-a^{3}t-e-e^{2}r. A snuff-box. [α, 14.]—**T. anatomique.** See FOVEOLA *radialis*.

TABEFACTIO (Lat.), n. f. Ta^{2}b(ta^{3}b)-e^2-fa^{2}k(fa^{3}k)′shi^2(ti^2)-o. Gen., *-on′is*. From *tabefacere*, to melt. See CHANCRE (1st def.).

TABELLA (Lat.), n. f. Ta^{2}b(ta^{3}b)-e^{2}l′la^3. Dim. of *tabula*, a board. See TABLET.—**Tabellæ carbonaceæ.** Fr., *tablettes de charbon*. Sp., *tabletas de carbón*. Lozenges of 600 parts of purified charcoal with 2,382 of sugar, 18 of tragacanth, and enough water [Belg. Ph.] (with 600 of sugar and 150 of tragacanth mucilage [Fr. Cod.], with 1,720 of sugar and enough tragacanth mucilage [Sp. Ph.]). The Belg. lozenges contain 20 centigrammes each, the Fr. 50 centigrammes each, and the Sp. 30 centigrammes each of charcoal. [B, 95 (α, 38).]—**Tabellæ manus Christi.** See *Conserva* ROSARUM *sicca*.—**Tabellæ martiales** (seu **restaurantes**). Lozenges consisting of 30 parts of iron-filings with 5 of cinnamon, 180 of sugar, and 120 of water, or with $7\frac{1}{2}$ of cinnamon and about 306 of sugar, each containing 12 centigrammes of iron; or of 28 parts of iron-filings with 7 of cinnamon and 332 of sugar, or with $3\frac{2}{3}$ of cinnamon, 138 of sugar, and enough tragacanth mucilage, each containing 9 centigrammes of iron; or of 32 parts each of iron-filings and cinnamon-water, 8 of powdered cinnamon, 4 of tragacanth, and 324 of sugar, each containing 5 centigrammes of iron; or of 19 parts of iron-filings, 6 of cinnamon, 180 of sugar, 30 of sweet almonds, and 2 each of cardamom and orange-peel. [B, 119 (α, 38).]—**Tabellæ rosatæ.** See *Conserva* ROSARUM *sicca*.

TABERNÆMONTANA (Lat.), n. f. Ta^{2}b(ta^{3}b)-u^{5}rn(e^{2}rn)-e-(a^3-e^2)-mo^{2}nt-an(a^{3}n)′a^3. From *Tabernœmontanus*, a German botanist. Fr., *taberne*, *tabernœmontane*. A genus of tropical apocynaceous trees and shrubs. The *Tabernœmontaneœ* are a tribe of the *Apocyneœ*. [α, 35.]—**T. alba.** Fr., *bois laiteux*. A West Indian species. The bark is used like that of *T. citrifolia*. [α, 35.]—**T. angustifolia.** A plant growing in South Carolina and Georgia. The root and bark are said to be antidysenteric. [α, 35.]—**T. citrifolia.** Fr., *bois de lait* (ou *laiteux franc*), *taberne à feuilles de citronnier*. 1. Of Linnæus, a West Indian tree with a caustic, poisonous juice. The bitter bark is used as a tonic, febrifuge, and anthelminthic, and the leaves are reputed vulnerary and febrifuge. [α, 35.] 2. Of Jacquin, see *T. alba*.—**T. coronaria.** Adam's apple, East Indian rose-bay, wax-flower plant. The juice is used in ophthalmia and skin diseases, and the root-bark as an anthelminthic and in odontalgia. [α, 35.]—**T. crispa.** An East Indian species. The acrid juice of the root-bark is used in diarrhœa and as an application to abscesses. [α, 35.]—**T. dichotoma.** Ger., *Evaapfelbaum*. A tree of Ceylon. Its fruit is poisonous. [α, 35.]—**T. mauritiana.** A shrub with a poisonous milky sap. ["Nouv. rem.," May 8, 1889, p. 242.]—**T. orientalis.** See *T. crispa*.—**T. persicariæfolia.** An Isle-of-France species. The juice is considered poisonous. [α, 35.]—**T. semperflorens.** A species found in the Philippine Islands; used in dysentery and for the stings of venomous reptiles. [α, 35.]—**T. utilis.** Fr., *arbre à lait*. Ger., *Milchbaum*. The *hya-hya* (or cow-tree) of British Guiana. The stem yields a sweet, milky juice, highly esteemed as food, though containing some caoutchouc. The bark is used medicinally. [α, 35.]

TABES (Lat.), n. f. Tab(ta^{3}b)′ez(as). Gen., *tab′is*. Gr., φθίσις. Fr., *t.* Ger., *Auszehrung*. 1. A wasting away, especially atrophy of the muscles; also t. dorsualis. [D.] 2. In botany, a wasting, a gradual decay of the powers of growth. [α, 35.]—**Painful t.** See *Abortive locomotor* ATAXIA.—**T. anglica.** Of De Garencières, pulmonary tuberculosis. [α, 34.]—**T. atactica, T. ataxique** (Fr.). See *Locomotor* ATAXIA.—**T. cerebellaris.** Of Remak, posterior spinal sclerosis associated with cerebellar symptoms. [A, 319 (α, 34).]—**T. cerebralis.** Of Remak, posterior spinal sclerosis associated with cerebral symptoms. [A, 319 (α, 34).]—**T. cervicalis.** Of Remak, posterior spinal sclerosis affecting the cervical segment of the cord. [A, 319 (α, 34).]—**T. combiné** (Fr.). Syn.: *t. ataxo-spasmodique*, *sclérose postéro-latérale de la moëlle*. Sclerosis of the posterior and lateral columns of the spinal cord. [Grasset, "Arch. de neurol.," July, 1886, p. 27.]—**T. coxaria.** Tuberculous coxitis. [α, 34.]—**T. diabetica.** See DIABETOPHTHISIS.—**T. dolorosa.** See *Abortive locomotor* ATAXIA.—**T. dorsalis, T. dorsualis.** Ger., *Rückenmarkszehrung*, *Darrsucht*, *Rückendarre*. Consumption of the spinal cord (see *Locomotor* ATAXIA); so called from the peculiar lesion in the posterior columns. [D.]—**T. dorsualis cervicalis.** See *T. cervicalis*.—**T. dorsualis illusoria.** A condition more or less completely simulating locomotor ataxia; acquired through fear of the disease, but not dependent on an anatomical lesion. [Knowalewsky, "Ctrlbl. f. Nervenheilk.," 1885, No. 15; "Ctrlbl. f. klin. Med.," Jan. 2, 1886, p. 15; "Irrenfreund," 1886, No. 7, p. 108.]—**T. dorsualis spasmodica.** See *Spasmodic spinal* PARALYSIS.—**T. fruste** (Fr.). A variety of locomotor ataxia which

may remain without change until death, or may develop into the ordinary form of locomotor ataxia. [Rummo, "Union méd.," June 5, 1884, p. 986 (D).]—**T. hæmorrhoidalis.** Neurasthenia with tabetic symptoms caused by hæmorrhoids. [α, 34.]—**T. incipiens.** The first stage of t. dorsualis. [L, 57 (α. 50).]—**T. lactea.** An impairment of the general health resulting from an excessive or too prolonged secretion of milk.—**T. lumbaris.** Of Remak, posterior sclerosis of the lumbar segment of the spinal cord. [A, 319 (α, 34).]—**T. mesenterica, T. meseraica.** See Phthisis *meseraica*.—**T. moteur** (Fr.). Of Dierret, t. caused by inflammation of the cerebral motor centres. ["Lyon méd.," June 12, 1887, p. 208 (α, 34).]—**T. neurasthenica.** See Neurasthenia.—**T. oculaire** (Fr.). T. dorsualis affecting especially the functions of the eye, amblyopia, ptosis, diplopia, lagophthalmia, nystagmus, etc., being developed. [α, 18.]—**T. peripherica.** See *Peripheric* neurotabes.—**T. pulmonalis.** See *Pulmonary* tuberculosis.—**T. purulenta.** See Arthropyosis.—**T. salivalis.** Marasmus associated with and attributed to salivation. [α, 34.]—**T. saturnina.** The general marasmus caused by saturnism. [α, 34.]—**T. scrofulosa.** See *T. meseraica*.—**T. spasmodica.** See *Spasmodic spinal* paralysis.—**T. ulcerosa.** See Apostematophthisis.—**T. urinalis.** See Diabetes *mellitus*.

TABESCENT, adj. Ta^{2}b-e^{2}s's'nt. Lat., *tabescens* (from *tabescere*, to melt gradually). Ger., *verkümmernd*. In botany, wasting; affected with tabes. [α, 35.]

TABETIC, adj. Ta^{2}b-e^{2}t'i^{2}k. Lat., *tabeticus*. Fr., *tabétique*. Ger., *tabetisch*, *abzehrend*. Pertaining to or affected with tabes dorsualis; as a n. (Ger., *Tabetiker*, *Tabiker*), a person so affected.

TABIANO (It.), n. Ta^{3}b-e-a^{3}n'o. A place in Parma, Italy, where there are alkaline and sulphurous springs. [L, 49, 57 (α, 14).]

TABID, adj. Ta^{2}b'i^{2}d. Lat., *tabidus*. Fr., *tabide*. Pertaining to or affected with tabes. [α, 48.]

TABIFIQUE (Fr.), adj. Ta^{3}-be-fek. Causing or inducing tabes. [L, 41 (α, 14).]

TABIKER (Ger.), n. Ta^{3}b-ek'e^{2}r. See Tabetic.

TABITUDO (Lat.), n. f. Ta^{2}b(ta^{3}b)-i^{2}-u^{2}d(ud)'o. Gen., *-ud'inis*. From *tabidus*, melting. The condition of being tabetic. [α, 48.]

TABLE, n. Ta'b'l. Gr., τράπεζα, πίναξ. Lat., *tabula*. Fr., *t*. Ger., *Tisch*, *Tafel*. A flat-topped article of furniture; a structure resembling a t. or its flat top. [α, 48.]—**Bed-t.** Of Isaacs, a t. fixed to the frame of an ordinary bedstead, so as to be folded away beneath it when necessary. ["Lancet," 1872, i, p. 764.]—**Inner t. (of the cranial wall).** The inner solid osseous part of the bones of the cranial wall. [C.]—**Operating t.** A chair or t. used in surgical operations. [E.]—**Outer t. (of the cranial wall).** The outer solid osseous portion of the bones of the walls of the cranium. [C.]—**T's of the skull.** The condensed inner and outer layers of the cranial bone which include the diploe. [L.]—**Vitreous t. of the skull.** See *Inner t.* (*of the cranial walls*).

TABLET, n. pl. Ta^{2}b'le^{2}t. Lat., *tabella*, *trochiscus*, *tabula*, *pastillus*. Fr., *tablette*. Ger., *Täfelchen*. Sp., *tableta*, *trocisco*. A lozenge having for its basis finely powdered sugar brought to the proper consistence with the aid of mucilage. The Ger. Ph., Finn. Ph., and Russ. Ph. sometimes order chocolate as a basis. [B; B, 95 (α, 38).] See also Lozenge, Pastille, and Troche.

TABLETTE (Fr.), n. Ta^{3}b-le^{2}t. See Tablet.—**T's antichlorotiques.** See Tabellæ *martiales*.—**T's antimoniales.** See Trochisci *stibiati*.—**T's antipériodiques.** See Morsuli *chinati*.—**T's chalybées.** See Tabellæ *martiales*.—**T's de Kunkel.** See Trochisci *stibiati*.—**T's de santonine.** See *Pastilli* (seu *trochisci*) santonini.—**T's de tribus.** See Saccharum *nitratum*.—**T's de Tronchin** [Swiss Ph.]. Lozenges containing each 4 milligrammes of extract of opium and 8 of kermes mineral, and made from a mass consisting of 2 grammes of extract of opium, 4 each of kermes mineral and anise, 8 of licorice-juice, 30 of gum arabic, 10 of tincture of balsam of Tolu, and 125 of sugar. [B, 95 (α, 38).] See also *Tronchin's anticatarrhal* lozenges.—**T's gommeuses kermétisées.** See *Tronchin's anticatarrhal* lozenges.—**T's impériales.** See Morsuli *imperatoris*.—**T's pectorales.** See *Tabellæ* sulphuris.—**T's vermifuges.** 1. Lozenges consisting of 14 parts of santonicum, 7 of myrrh, 166 of sugar, and enough mucilage; or of 15 parts each of santonicum and Corsican moss, 11 of æthiops mineral, 7 of cinnamon, 2½ of jalap resin, and 210 of sugar. 2. Lozenges consisting of 7 parts of calomel, 4 each of santonicum, burned stag's horn, and Caroline thistle, 2 of diacrydium sulphuratum, 30 of sugar, ⅜ part of cinnamon, and enough gum-arabic mucilage. [B, 119 (α, 38).]

TABLIER (Fr.), n. Ta^{3}b-le-a. See Apron.—**T. des Hottentotes.** See *Pudendal* apron.—**T. élastique.** See Tunica *abdominalis*.

TABLOID, n. Ta^{2}b'loid. A tablet. [B.]

TABOURET (Fr.), n. Ta^{3}-bu-ra. See Thlaspi.

TABULA (Lat.), n. f. Ta^{2}b(ta^{3}b)'u^{2}l(u^{4}l)-a^{3}. See Table and Tablet. [α, 17.]—**Tabulæ cranii.** The tables of the skull.

TABULAR, adj. Ta^{2}b'u^{2}l-a^{3}r. From *tabula*, a board. Resembling a table. [α, 48.]

TABULET, n. Ta^{2}b'u^{2}l-e^{2}t. A lozenge or troche. [B, 117.]

TABUM (Lat.), n. n. Tab(ta^{3}b)'u^{3}m(u^{4}m). From *tabes*, a wasting away. See Ichor (3d def.) and Sanies.

TAC (Fr.), n. Ta^{3}k. An old name for influenza. ["Rev. de thérap.," Mar., 1892, p. 117 (α, 50).]

TACAMAHAC, n. Ta^{2}k'a^{2}m-a^{3}-ha^{2}k. Lat., *tacamahaca*. Fr., *tacamaque*, *tacamahaque*, *tacamahaca*. Ger., *Takamahak*, *Takamahakharz*, *Hak und Tak*, *Schwammholzgummi*. 1. Any one of various bitter balsamic resins, especially American t. (1st def.) and East Indian t., analogous to the turpentines in properties; formerly much used, but now only as a constituent of plasters and ointments. [α, 35.] 2. See *North American t.*—**American t.** 1. A product of *Bursera tomentosa* or (according to some) of *Icica heptaphylla* and *Icica tacamahaca*. It occurs in light-yellowish or reddish-brown brittle pieces, irregularly shaped, varying in size from that of a mustard-seed to two inches in diameter, and often covered with powder. It consists of a resin and a small proportion of a volatile oil. [α, 35.] 2. See *West Indian t.* (2d def.). 3. See *North American t.*—**Bourbon t.** A soft, dark-green oleoresin said to be derived from *Calophyllum tacamahaca*; not now known to commerce. [α, 35.]—**East Indian t.** Lat., *tacamahaca orientalis* (seu *ostindica*, seu *in testis*, seu *sublimis*). Ger., *ostindisches Takamahak*, *Takamahak in Schalen*. A rather soft, yellowish or greenish variety, occurring rarely in commerce in gourd-shells covered with rush-leaves. It is ascribed to *Calophyllum inophyllum*. [α, 35.]—**North American t.** Lat., *tacamahaca communis* (seu *vulgaris*), *balsamum Focot* (seu *populi*). Ger., *nordamerikanisches Takamahak*. The balsamic resin obtained from the buds of *Populus balsamifera*. [α, 35.]—**West Indian t.** 1. See *American t.* (1st def.). 2. The resinous balsam of *Calophyllum calaba*. [α, 35.]

TACAMAHACA (Lat.), n. f. Ta^{3}k-a^{3}m-a^{3}-ha^{3}k'a^{3}. 1. Of Spach, a section of the genus *Populus*. 2. See Tacamahac.—**Emplastrum tacamahacæ.** Sp., *emplasto de tacamaca* [Sp. Ph.]. A plaster consisting of 2 parts of white wax, 4 of turpentine, and 8 of American tacamahac (1st def.). [B, 95 (α, 38).]—**Gummi t., Resina t.** See Tacamahac.—**T. communis.** See *North American* tacamahac and *American* tacamahac (1st def.).—**T. caragna.** See Caraña.—**T. in testis.** See *East Indian* tacamahac.—**T. occidentalis.** See *West Indian* tacamahac.—**T. orientalis.** See *East Indian* tacamahac.—**T. (résine)** [Fr. Cod.] (Fr.). Sp., *tacamaca*, *tacamaca oficinal ó rojiza* [Sp. Ph.]. See *American* tacamahac (1st def.).—**T. vulgaris.** See *North American* tacamahac (1st def.).

TACAMAHAQUE (Fr.), **TACAMAQUE** (Fr.), n's. Ta^{3}-ka^{3}-ma^{3}-a^{3}k, -ma^{3}k. See Tacamahac.—**Faux-t.** The *Calophyllum calaba*. [α, 35.]—**T. terreuse** [Fr. Cod.]. See Tacamahaca (*résine*).

TACCA (Lat.), n. f. Ta^{2}k(ta^{3}k)'ka^{3}. Fr., *t*. A genus of herbs, of the *Taccaceæ*, which are an order of monocotyledons closely related to the *Amaryllideæ*. [α, 35.]—**T. oceanica.** A Sandwich-Islands species furnishing Tahiti arrow-root. [α, 35.]—**T. palmata.** A species found in Java and the Moluccas. The tubers furnish a nourishing farina inferior to that of *T. pinnatifida*. [α, 35.]—**T. pinnatifida.** Fr., *t. pinnatifide*. Otaheite salep-plant, pi-plant; a species cultivated in the Oceanic Islands. Its tubers yield a variety of arrow-root especially suitable to cases of diarrhœa and dysentery. [α, 35.]

TACHE (Fr.), n. Ta^{3}sh. See Macula and Spot.—**Meningeal t's.** See *Cerebral* maculæ.—**T. acoustique, T. auditive.** See Macula *acustica*.—**T. aveugle.** See *Optic* disc.—**T's ardoisées.** See Maculæ *cœruleæ*.—**T's bleuâtres.** See Pelioma *typhosum*.—**T's bleues.** See Maculæ *cœruleæ*.—**T. café au lait.** See Nævus.—**T. brune.** See Locus *niger*.—**T. congéniale, T. congénitale.** See Nævus.—**T. criblée.** See Macula *cribrosa*.—**T. de brûlure.** See Ephelis *ab igne*.—**T. de feu.** See Nævus *flammeus*.—**T's de grossesse.** See Chloasma *gravidarum*.—**T. de la cornée.** See Macula *corneæ*.—**T's de lait.** See Strophulus.—**T. de Mariotte.** See *Optic* disc.—**T's de mort.** See Melasma *maculosum*.—**T. de naissance.** See Nævus.—**T's de rousseur.** See Lentigo.—**T. embryonnaire.** Of Coste, the embryonic area.—**T. germinative.** See *Germinal* spot.—**T. hémorrhagique.** See Nævus.—**T's hépatiques.** See Maculæ *hepaticæ*.—**T. jaune.** See Macula *lutea*.—**T's laiteuses.** 1. See *Lymphangeial* nodules. 2. Of Ranvier, the white spots found in the omentum of new-born rabbits, composed of groups of hæmatopoietic cells. [K, 17.] Cf. *Milk* spot.—**T's lenticulaires.** See Maculæ *lenticulares* (2d def.).—**T's médico-légales.** See Maculæ *medicinæ forensis*.—**T. mélanienne.** See Nævus and cf. Maculæ *nigræ*.—**T's méningitiques.** See *Cerebral* maculæ.—**T. motrice.** See *Motorial-nerve* end-plate.—**T. noirâtre, T. noire.** See Locus *niger*.—**T's ombrées.** See Maculæ *cœruleæ*.—**T. pigmentaire.** See Nævus *pigmentosus*.—**T's polaires.** See *Extrusion* globule.—**T's rosées (lenticulaires), T. rouges.** See Roseola *typhosa*.—**T. rudimentaire.** Of Bizot, a superficial yellow spot symptomatic of a beginning atheromatous arterial degeneration. [L, 57 (α, 50).]—**T. sanguine.** See Nævus.—**T. spermatique.** A spot or stain of semen on clothing, etc. [L, 49 (α, 14).]—**T's syphilitiques.** A pigmentary syphiloderm. [L, 87 (α, 50).]—**T. vasculaire, T. vineuse.** See Nævus *flammeus*.

TACHETÉ (Fr.), adj. Ta^{3}sh-ta. Spotted, macular.

TACHIA (Lat.), n. f. Ta^{2}k(ta^{3}ch^{2})'i^{2}-a^{3}. Fr., *tachie*, *tachi*. A genus of the *Gentianaceæ*. [α, 35.]—**T. gujanensis.** A shrub of Guiana and the Rio Negro. The root is used as a febrifuge. [α, 35.]

TACHISTOSCOPE, n. Ta^{2}k-i^{2}st'o-skop. From τάχιστος, most swift, and σκοπεῖν, to examine. Of Volkmann, a sort of stereoscope in which a falling lid or diaphragm opens for a moment one or both of the holes through which the observer looks. [F.]

TACHOMETER, n. Ta^{2}k-o^{2}m'e^{2}t-u^{6}r. From ταχύς, swift, and μέτρον, a measure. See Hæmotachometer.

TACHYCARDIA (Lat.), n. f. Ta^{2}k(ta^{3}ch^{2})-i^{2}(u^{6})-ka^{3}rd'i^{2}-a^{3}. From ταχύς, quick, and καρδία, the heart. Fr., *tachycardie*. Ger., *Tachycardie*. Abnormally rapid action of the heart; especially the over-action of the heart observed during digestion or as the result of dyspepsia, etc. [Ott, "Wien. med. Woch.," Apr. 15, 1882.]—**Essential paroxysmal t.** Fr., *tachycardie essentielle paroxystique*. Of Bouveret, t. due to a functional perturbation of cardiac innervation, and occurring in attacks of longer or shorter duration, the function of the heart becoming normal during the intervals between the attacks. ["Rev. de méd.," ix, 1889, p. 753 (α, 34).]—**Paroxysmal t.** T. occurring at intervals; it may be due to reflex irritation. [α, 34.]—**T. strumosa exophthalmica** [Lebert]. See *Exophthalmic* goître.

TACHYCARDIE (Fr.), n. Ta^3-ke-ka^{3}r-de. See TACHYCARDIA. —**T. atropinique.** Tachycardia due to the action of atropine. [α, 18.]—**T. fébrile.** Tachycardia with fever. [α, 18.]

TACHYGRAPH, n. Ta^{2}k'i^2-gra^{3}f. From ταχύς, swift, and γράφειν, to write. See HÆMOTACHOMETER.

TACHYIATRIA (Lat.), n. f. Ta^{2}k(ta^{3}k)-i^2(u^6)-i^2(e)-a^{2}t(a^{3}t)-ri-(re)'a^3. From ταχύς, swift, and ἰατρεία, medical treatment. Fr., *tachyiatrie.* The art of healing speedily. [L, 50 (α, 14).]

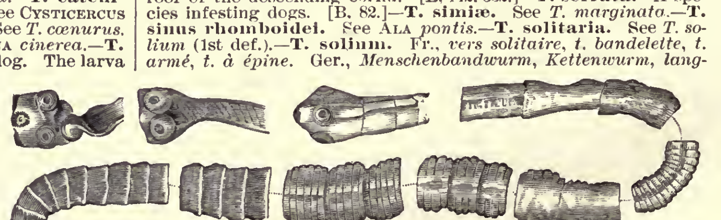
TACHYPHRASIA (Lat.), n. f. Ta^{2}k(ta^{3}ch^2)-i^2(u^6)-fraz(fra^{3}s)'-i^2-a^3. From ταχύς, rapid, and φράσις, speech. Ger., *Poltem* (2d def.), *Bruddeln* (2d def.), *Tachyphrasie.* 1. Great rapidity of speech; observed in some forms of mental disease. [α, 34.] Cf. PARAPHRASIA *præceps.* 2. Very rapid, stammering speech. [L, 57 (α, 50).]

TACHYPNŒA (Lat.), n. f. Ta^{2}k(ta^{3}ch^2)-i^{2}p(u^{6}p)-ne'(no^2'-e^2)-a^3. From ταχύς, swift, and πνοιά, breath. Fr., *tachypnée.* Ger., *Tachypnöe.* Abnormally rapid respiration.

TACHYTHANATOUS, adj. Ta^{2}k-i^2-tha^{2}n'a^{2}t-u^{3}s. Gr., ταχυθάνατος (from ταχύς, swift, and θάνατος, death). Lat., *tachythanatus.* Fr., *tachythanate.* 1. Of Hippocrates, killing quickly. 2. Dying suddenly. [L, 50 (α, 14).]

TACHYTOMY, n. Ta^{2}k-i^{2}t'om-i^2. From ταχύς, swift, and τομή, a cutting. The art of operating quickly. [E, 6.]

TACON (Fr.), n. Ta^3-ko^{2}n^2. A parasitic disease of the *Crocus sativus* in which the bulb is converted into a blackish powder; also a disease of the vine, produced, according to De Bary, by the mycelium of *Sphaceloma ampelinum* attacking the tissues. [α, 35.]



TACT (Fr.), n. Ta^{3}kt. See TOUCH.—**T. médicale.** Instinctive ability to judge of the character of a disease and the means of attacking it. [L, 41 (α, 14).]

TACTILE, adj. Ta^{2}kt'i^{2}l. Gr., ἁπτός. Lat., *tactilis* (from *tangere*, to touch). Fr., *t.*, *tangible.* Ger., *fühlbar*, *empfindbar.* Pertaining to the sense of touch. [L, 343.]

TACTUS (Lat.), n. m. Ta^{2}kt(ta^{3}kt)'u^{3}s. Gen., *tact'us.* From *tangere*, to touch. See TOUCH.

TÆDIUM (Lat.), n. n. Ted'(ta^3'e^{2}d)-i^2-u^{3}m(u^{4}m). From *tædet*, it wearies me. Ger., *Ekel*, *Ueberdruss.* Weariness, loathing. [L, 50 (α, 14).]—**T. vitæ.** The condition of being weary of life (a symptom of insanity). [α, 48.]

TÆNIA (Lat.), n. f. Ten'(ta^3'e^{2}n)-i^2-a^3. Gr., ταινία (from τείνειν, to stretch). Fr., *t.* Ger., *Leistchen*, *Leiste* (1st def.), *Bandwurm* (2d def.). 1. A ribbon or bandlet; a bandage; a tape-like structure; in the pl., *tæniæ*, the ligamenta coli. [E; I, 6 (K).] 2. The typical genus of the *Tæniada*, or *Tæniadæ* (Ger., *Bandwürmer*), which are a family, order, etc., of the *Cestoda*, characterized by a distinct head (or attached extremity) with four suctorial discs with or without a double or single row of hooks, and by a band-like body divided into segments which, when mature, are bisexual. The adults inhabit the intestinal canal of vertebrates, nearly every genus of which has its specific T. In their larval state (cysticercus) they are found in both vertebrates and invertebrates. [L.]—**T. à anneaux courts** (Fr.). See BOTHRIOCEPHALUS *latus.*—**T. abietina** [Weinland]. A doubtful species, properly referred to *T. solium* or *T. mediocanellata.* [L, 24.]—**T. acanthotrias.** An unknown species the cysticercus of which has been found in man. [L, 16.] Cf. CYSTICERCUS *acanthotrias.*—**Tæniæ acusticæ.** See *Auditory* STRIÆ.—**T. ægyptica.** See *T. nana* (1st def.).—**T. à épines** (Fr.), **T. à longs anneaux** (Fr.), **T. à longues articulations** (Fr.). See *T. solium* (1st def.).—**T. à mamelons ombilicaux** (Fr.). See BOTHRIOCEPHALUS *latus.*—**T. apri.** See *T. marginata.*—**T. armata (humana), T. armé** (Fr.), **T. articulos demittens, T. bandelette** (Fr.). See *T. solium* (1st def.).—**T. bovina.** See *T. marginata.*—**T. canina.** See *T. elliptica.*—**T. capensis.** See *T. solium* (1st def.).—**T. caprina.** See PENTASTOMA *denticulatum* and *T. marginata.*—**T. cateniformis.** See *T. elliptica.*—**T. cateniformis lupi.** See *T. marginata.*—**T. cellulosa.** See CYSTICERCUS *cellulosæ* and *T. solium* (1st def.).—**T. cerebralis.** See *T. cœnurus.*—**T. cinerea foveæ rhomboideæ.** See LAMINA *cinerea.*—**T. cœnurus.** A variety found in the intestine of the dog. The larva is the *Cœnurus cerebralis.* [B, 82; L, 16.]—**Tæniæ coli.** See LIGAMENTA *coli.*—**T. communis.** See *T. solium* (1st def.).—**T. cornea, T. corporis striati (fibrosa).** See *T. semicircularis.*—**T. cucumerina.** Ger., *Hundebandwurm*, *Hundekürbiswurm.* 1. See *T. elliptica.* 2. The *T. elliptica* as found in dogs, sometimes considered a distinct species or variety. [L.]—**T. cucumerina elliptica.** A species including both *T. cucumerina* (2d def.) and *T. elliptica* regarded as varieties of one species. [B, 82.]—**T. cucurbitina** [Block]. See *T. solium* (1st def.) and *T. marginata.*—**T. cucurbitina.** See *T. mediocanellata.*—**T. cucurbitina plana.** See *T. solium* (1st def.).—**T. cuneiceps.** See *T. elliptica.*—**T. degener.** See *T. solium* (1st def.).—**T. de la première espèce** (Fr.). See BOTHRIOCEPHALUS *latus.*—**T. de la seconde espèce** (Fr.). See *T. solium* (1st def.).—**T. dentata.** See BOTHRIOCEPHALUS *latus*, *T. mediocanellata*, and *T. solium* (1st def.).—**T. denticulata.** Fr., *t. du bœuf.* A species found in cattle in France and Germany. [L, 17.]—**T. des tropiques** (Fr.). See BOTHRIOCEPHALUS *tropicus.*—**T. du bœuf** (Fr.). See *T. denticulata.*—**T. du mouton** (Fr.). See *T. expansa.*—**T. e Capite Bonæ Spei.** See *T. solium* (1st def.).—**T. echinococcus (scolecipariens).** A small species inhabiting the dog and the wolf. The larva is the echinococcus of man. It is seldom more than ¼ inch long, and has only four segments. The head has a double row of hooks, thirty to forty in number, and four suckers. [L, 16.]—**T. elliptica.** Ger., *Katzenbandwurm*, *Einsiedlerwurm.* A species closely related to the *T. cucumerina* of the dog, and found in cats and dogs, also in one case (by Eschricht) in man. It is from six to eight inches long, with an uncinated head with four suckers. The reproductive organs are double in each segment and situated on the margin. The joints are ovoid. The scolices are probably found in insects. They have been found in the dog-louse. [L, 16.]—**T. eminentiæ pyriformis.** See *T. semicircularis.*—**T. en échelle** (Fr.). See *T. solium fenestrata.*—**T. en scie** (Fr.). See *T. serrata.*—**T. equina.** See *T. perfoliata.*—**T. ex cysticerco tenuicolli.** See *T. marginata.*—**T. expansa.** A species found in sheep in Germany. [L, 17.]—**T. felis.** See *T. elliptica.*—**T. fenestrata.** See *T. solium* (1st def.).—**T. fibrosa striati.** See *T. semicircularis.*—**T. finna.** See CYSTICERCUS *cellulosæ* and *T. solium* (1st def.).—**T. flavomaculata, T. flavopunctata.** A species with yellowish spots in the middle of the segments. Only incomplete specimens have been observed, and in one case only. [L.]—**T. fornicis.** The lateral edges of the body of the fornix. [L, 332.]—**T. fossæ (seu foveæ) rhomboideæ.** See ALA *pontis.*—**T. globosa.** See CYSTICERCUS *tenuicollis* and *T. marginata.*—**T. granulosa.** See ECHINOCOCCUS *hominis.*—**T. grisea.** See BOTHRIOCEPHALUS *latus.*—**T. hippocampi.** See CORPUS *fimbriatum.*—**T. hirudinacea.** See ECHINORRHYNCHUS *gigas.*—**T. humana armata.** See *T. solium* (1st def.).—**T. humana inermis.** See BOTHRIOCEPHALUS *latus.*—**T. hydatigena.** See *T. marginata* and CYSTICERCUS *cellulosæ.*—**T. hydatigena anomala (seu suilla).** See CYSTICERCUS *cellulosæ* and *T. solium* (1st def.).—**T. hydatula.** See *T. marginata.*—**T. lanceolata.** See PENTASTOMA *tænioides.*—**T. lata.** See BOTHRIOCEPHALUS *latus* and *T. solium* (1st def.).—**Tæniæ ligamentosæ coli.** See LIGAMENTA *coli.*—**T. lophosoma.** A species described by Cobbold, probably a deformed *T. solium* or *T. mediocanellata.* [L, 16, 20.]—**T. lupina.** See *T. marginata.*—**T. madagascariensis** [Davaine]. A species infesting man, found in Madagascar. [L, 24.]—**T. magna.** See *T. plicata.*—**T. mamillaria.** A species found in the large intestine of the horse. [L, 17.]—**T. marginata.** A species found in the dog and the wolf. The larval form is the *Cysticercus tenuicollis.* [L, 16.]—**T. mediocanellata.** Beef tapeworm; a species formerly regarded as a *T. solium* (1st def.), but it differs from that in being larger and having a non-uncinate head, with four large suckers surrounded by dark spots. Its cysticercus (*Cysticercus bovis*) inhabits the muscles of cattle. [L, 16.]—**Tæniæ medullares.** See *Auditory* STRIÆ.—**T. membranacea.** See BOTHRIOCEPHALUS *latus.*—**T. nain** (Fr.), **T. nana.** 1. Dwarf tapeworm; an Egyptian species found in the small intestine; it is from 8 to 10 lines long, and has from 150 to 170 segments, with an uncinated quadrangular head. Its cysticercus is unknown. [L, 16, 19.] 2. Of Van Beneden, see *T. echinococcus.*—**T. osculis marginalibus solitarius.** See *T. solium* (1st def.).—**T. ovilla.** See *T. marginata.*—**T. ovina.** See *T. expansa.*—**T. perfoliata.** A species found in the small intestine of the horse. [L, 17.]—**T. pinealis.** See *T. recessus suprapinealis.*—**T. plexus chorioidei ventriculi quarti.** See ALA *pontis.*—**T. plicata, T. plissé** (Fr.). A species found in the small intestine, and at times in the stomach, of the horse. [L, 17.]—**T. pontis.** Of Henle, a small lamina of white substance arising in the white centre of the cerebellum, encircling on each side the crus cerebri, at the anterior edge of the pons Varolii, and losing itself in the fibres of the crus on its medial surface. [I, 6 (K).]—**T. prima.** See BOTHRIOCEPHALUS *latus.*—**T. proglottina.** A species found in fowls. [L, 17.]—**T. quadrilobata.** See *T. perfoliata.*—**T. recessus pinealis.** The peduncle of the pineal gland. [I, 16 (K).]—**T. recessus suprapinealis.** The prolongation of the chorioid plexus of the third ventricle into the recessus pinealis. [L, 332.]—**T. rhinaria.** See PENTASTOMA *tænioides.*—**T. saginata.** See *T. mediocanellata.*—**T. sans épine** (Fr.). See BOTHRIOCEPHALUS *latus* and *T. solium* (1st def.).—**T. secunda.** See *T. solium* (1st def.).—**T. semicircularis.** Fr., *bandelette striée* (ou *démi-circulaire*). Ger., *Grenzstreif*, *Hornblatt.* A narrow, semi-transparent, light-colored streak in the lateral ventricle between the nucleus caudatus and the optic thalamus. It is continuous with the white tissue of the roof of the descending cornu. [L, 142, 332.]—**T. serrata.** A species infesting dogs. [B, 82.]—**T. simiæ.** See *T. marginata.*—**T. sinus rhomboidei.** See ALA *pontis.*—**T. solitaria.** See *T. solium* (1st def.).—**T. solium.** Fr., *vers solitaire*, *t. bandelette*, *t. armé*, *t. à épine.* Ger., *Menschenbandwurm*, *Kettenwurm*, *langgliedriger* (oder *kürbisförmiger*, oder *gezähnter*, oder *bewaffneter*) *Bandwurm.* 1. Solitary (or armed, or pork) tapeworm; an entozoon found in the intestines of man. In its mature condition it is said to have attained the length of over sixty yards. It has a globular head of about the size of a pin-head, provided with a double row of hooks and with four sucking discs. The neck is about half an inch long and continuous with the body, which is at first marked with transverse lines that, gradually separating more and more, leave interspaces. These parts finally become distinct segments, which when mature are twice as broad as they are long, and are each provided with complete male and female organs of generation. After impregnation of a segment, embryos are developed in its interior, and it passes out of the intestine, when the embryos are scattered by its rupture. The embryos, still in their

TÆNIA SOLIUM (WITH DIFFERENT VIEWS OF THE HEAD). [A, 327.]

envelopes, are swallowed by a pig, where they rupture their shells and bore in the tissues of their host, causing measles (*q. v.*, 2d def.). There, losing their hooks, they are quiescent, and are known as the *Cysticercus cellulosæ*. After being ingested by man, they develop hooks, and, having attached themselves to the intestinal walls, begin to grow, increasing at the free extremity until they assume the above-mentioned form. [L.] 2. Of Bremser, see *T. mediocanellata*.—**T. solium fenestrata** (seu **scalariformis**). A variety of *T. solium* (first observed by Mazars de Cazéles in 1780, and regarded by him as a distinct species) in which some of the segments are completely or partially perforated. The defect of substance is not associated with any demonstrable pathological change in the surrounding tissues, but the genital apparatus is wanting in the completely perforated segments. [M. Notta and Marfan, "Progr. méd.," 1886 ("Ctrlbl. f. d. med. Wssnschf.," Sept. 18, 1886, p. 616) (B).]—**T. stigmatibus lateralibus.** See *T. solium* (1st def.).—**T. striata.** See *T. semicircularis*.—**T. Tarini.** See LAMINA *cornea* (1st def.).—**T. tecta.** See LIGAMENTUM *tectum*.—**T. tenella.** 1. A species which, according to Cobbold, develops the *Cysticercus ovis*. According to Stein, it is only a variety of *T. solium*. [B, 82.] 2. Of Pallas, see BOTHRIOCEPHALUS *latus*.—**T. terminalis, T. thalami optici.** See *T. semicircularis*.—**Tæniæ Valsalvæ.** See LIGAMENTA *coli*.—**T. ventriculi tertii.** See CORPUS *fimbriatum*.—**T. vervicina.** See *T. marginata*.—**T. vesicularis.** See *T. cœnurus*.—**T. vesiculosa socialis cerebralis.** See CŒNURUS *cerebralis*.—**T. veterum.** See BOTHRIOCEPHALUS *latus*.—**T. visceralis socialis granulosa.** See *T. echinococcus*.—**T. vulgaris.** See *T. solium* and BOTHRIOCEPHALUS *latus*.—**Unarmed t.** See BOTHRIOCEPHALUS *latus*.

TÆNIACIDE, n. Ten'i²-a³-sid. From ταινία, a tapeworm, and *cædere*, to slay. A medicine destructive to tapeworms. [α, 35.]

TÆNIÆFORMIS (Lat.), adj. Ten(ta³-e²n)-i²-e²(a³-e²)-fo²rm'-i²s. From ταινία, a ribbon, and *forma*, form. Fr., *rubané* (1st def.). Ger., *bandförmig* (1st def.), *bandwurmförmig* (2d def.). 1. Resembling a narrow band or ribbon. 2. Flat, long, and constricted at intervals; shaped like a tapeworm. [α, 35.]

TÆNIAFUGE, n. Ten'i²-a³-fu²j. From ταινία, a tapeworm, and *fugare*, to put to flight. A medicine expelling tapeworms. [α, 35.]

TÆNIARRHYNCUS (Lat.), n. f. Ten(ta³-e²n)-i²-a²r(a³r)-ri²n²k-(ru⁶n²k)'u³s(u⁴s). From ταινία, a band, and ῥύγχος, a snout. See TÆNIA (2d def.).—**T. mediocanellata.** See TÆNIA *mediocanellata*.

TÆNICIDE, n. Ten'i²-sid. See TÆNIACIDE.

TÆNIFUGE, n. Ten'i²-fu²j. See TÆNIAFUGE.

TÆNIIN, n. Ten'i²-i²n. Fr., *tæniine*, *téniine*. Ger., *Täniin*. See KOSIN.

TÆNIOLA (Lat.), n. f. Te²n(ta³-e²n)-i(i²)'o²l-a³. Dim. of *tænia* (*q. v.*). 1. See FASCIOLA (1st def.). 2. The peduncle of the pineal gland. [I, 3 (K).] 3. The genus *Torula*. 4. The genus *Ornithogalum*. [α, 35.]—**T. cinerea.** Of Wenzel, a projection on the lower lateral boundary of the fourth ventricle. It is continuous with the restiform body just before its entrance into the cerebellum. [I, 6 (K).]—**T. conarii.** The peduncle of the pineal gland. [I, 2 (K).]—**Tæniolæ corporis callosi.** Ger., *Balkenleistchen*. The continuations forward of the peduncles of the sæptum lucidum to the striæ longitudinales. [L, 332.]

TÆNIOPHOBIA (Lat.), n. f. Ten(ta³e²n)-i²-o(o³)-fob(fo²b)'i²-a³. From ταινία, a tapeworm, and φόβος, fear. A morbid dread of being the subject of tapeworm. [α, 34.]

TAFEL (Ger.), n. Ta³f'e²l. See TABLE and TABLET.—**Lister's Schutzt'.** See *Listerian* DRESSING.—**Rückent'.** Of Remak, the upper wall of the protovertebral vesicle (the muscular plate) after its separation from the rest of the protovertebral structure. [A, 8.]

TÄFELCHEN (Ger.), n. Taf'e²l-ch²e²n. See PASTILLE, TABLET, and TROCHE.

TAFFET (Ger.), n. Ta³f'fe²t. See TAFFETA.—**Klebert', Klebt'.** See *Court* PLASTER.—**Schutzt'.** Protective silk. [α, 14.]

TAFFETA, n. Ta²f'e²t-a³. Lat., *taffetas*. Fr., *t.*, *taffetas*. Ger., *Taffet*, *Taft*. A thin silk fabric. [α, 48.]—**T. d'Angleterre** (Fr.). See *Court* PLASTER.

TAFFETAS (Lat.), n. n. Ta³f(ta³f)'e²t-a²s(a³s). Fr., *t.* See TAFFETA.—**T. adhæsivum.** See *Court* PLASTER.—**T. épispastique** (Fr.). See SPARADRAP *vesicans*.—**T. gommé** (Fr.). See *Court* PLASTER.—**T. vesicans.** See SPARADRAP *vesicans*.

TAFIA, n. Ta²f'i²-a³. Fr., *t.* An inferior kind of rum. [B, 97 (α, 14).]

TAFT (Ger.), n. Ta³ft. See TAFFETA.—**Gichtt'.** Taffeta covered with a layer of varnish prepared by mixing 1 part of turpentine, 2 parts of resin, 4 of minium, and 12 of litharge with 48 of boiling linseed-oil; used to cover limbs affected with gout. [B, 49 (α, 14).]

TAGETES (Lat.), n. f. Ta²j(ta³g)-et(at)'ez(as). From *Tages*, a Tuscan divinity. Fr., *tagète*. Ger., *Sammtblume*. Marigold; a genus of composite herbs. The *Tageteæ* (Fr., *tagétées*) are: Of Reichenbach, a division of the *Amphigynanthæ*; of De Candolle, a division of the *Tagetineæ* (a division of the *Heliantheæ* [Cassini] or a subtribe [Bentham and Hooker] of the *Helenioideæ*). [α, 35.]—**T. erecta.** Fr., *tagète droite*, *grand œillet* (ou *rose*) *d'Inde*. Sp., *flor de muerto*, *zempoalxochitl* [Mex. Ph.]. African marigold; indigenous to Mexico, but now widely cultivated. The capitules are stimulating, emmenagogue, and anthelminthic, and are often substituted for calendula. The roots and fruits are purgative. [α, 35.]—**T. glandulifera, T. glanduligera, T. glandulosa.** The *chinchi* of Peru. It contains a vermifuge oleoresin. The aromatic and bitter leaves are used as a tonic. [α, 35.]—**T. lucida.** Fr., *tagète luisante*. Sp., *periquillo*, *yerba de Santa Maria de tierra dentro* [Mex. Ph.]. Sweet-scented Mexican marigold; used as an antiperiodic and sometimes instead of hypericum. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601; α, 35.]—**T. patula.** Fr., *tagète touffue*, *petit œillet* (ou *rose*) *d'Inde*. Ger., *gemeine Sammtblume*, *Studentenblume*, *Todtenblume*. French marigold; a native of Mexico, used like *T. erecta*. The flowers were formerly official as *flores africani*. [α, 35.]

TAGMA (Lat.), n. n. Ta²g(ta³g)'ma³. Gen., *tag'matos* (*-matis*). From τάγμα, a company. Of Pfeffer, an aggregate of molecules (*e. g.*, a pleon or a micella). [α, 35.]

TAIE (Fr.), n. Te². See LEUCOMA (4th def.).

TAIL, n. Tal. Gr., κέρκος, οὐρά. Lat., *cauda*, *ura*. Fr., *queue*. Ger., *Schwanz*. In the human embryo, a conical caudal appendage visible during the fifth and sixth weeks; in other mammals, the vertebræ posterior to the sacrum, together with their muscles and integument; in birds, the t. feathers, or rectrices, taken collectively; in serpents, the part of the body posterior to the vent; in fishes, (usually) the part of the body posterior to the anal fin; in general, any slender terminal prolongation. [α, 27, 35.]—**T. of a muscle.** The portion near its insertion when considerably attenuated. [L.]—**T. of the epididymis.** See GLOBUS *minor of the epididymis*.—**T. of the pancreas.** The left and smaller portion of that gland. [C.]

TAILLADE (Fr.), n. Ta³-el-ya³d. A cut; a gash. [α, 34.]

TAILLE (Fr.), n. Ta³-el-y'. See CYSTOTOMY and LAPAROTOMY.—**T. biliaire.** See CHOLECYSTOTOMY.—**T. césarienne.** See *Cæsarean* OPERATION.—**T. du rein.** See NEPHROTOMY.—**T. hypogastrique.** See *Suprapubic* CYSTOTOMY.—**T. intestinale.** See COLOTOMY.—**T. latérale, T. lateralisée.** See *Lateral* CYSTOTOMY.—**T. périnéale médiane.** See *Median* CYSTOTOMY.—**T. postérieure.** See *Rectal* CYSTOTOMY.—**T. quadrilatérale.** An operation for large vesical calculi which consists in dividing the prostate obliquely. [E, 21.]—**T. rénale.** A variety of nephrotomy in which an opening is made into the pelvis of the kidney for the purpose of establishing a renal fistula. [D. Mollière, "Lyon méd.," Feb. 15, 1885, p. 207.]—**T. stomacale.** The operation of making a temporary opening into the stomach, as for the extraction of a foreign body or in order to dilate the pyloric orifice (as opposed to *gastrostomy*, in which the opening is designed to be permanent). [L. H. Petit, "Union méd.," April 10, 1886, p. 577.]—**T. suspubienne.** See *Suprapubic* CYSTOTOMY.—**T. vésicale.** See CYSTOTOMY.

TAKAMAHAK (Ger.), n. Ta³k-a³-ma³-ha³k'. See TACAMAHAC.

TALA, n. 1. In Brazil, the *Celtis tala* or a variety of it. 2. In Ceylon, the *Cassia absus*. 3. The genus *Opuntia*. [α, 35.]

TALALGIA (Lat.), n. f. Ta²l(ta³l)-a²lj(a³lg)'i²-a³. From *talus* the heel, and ἄλγος, pain. Fr., *talalgie*. A pain in the heel, caused by osteitis or rheumatism. [α, 34.]

TALAMONACCIO (It.), n. Ta³l-a³-mo²n-a³t'che-o. A place in Grosseto, Italy, where there is a sulphurous spring. [L, 49 (α, 14).]

TALAUMA (Lat.), n. f. Ta³l-a⁴m'(a³'u⁴m)-a³. Fr., *t.*, *talaume*. A genus of the *Magnolieæ*. [α, 35.]—**T. Plumieri.** Fr., *boiscachiman* (ou *-pin*). A West Indian tree. The bark and seed are used as tonics; the aromatic buds, shoots, and leaves in scurvy, gout, dropsy, etc.; and the flowers to aromatize liqueurs. The fruit-cones exude an acrid balsam used in catarrhs. [α, 35.]

TALC, n. Ta²lk. Lat., *talcus*, *talcum*. Fr., *t.* Ger., *Talk*. A mineral consisting chiefly of tetramagnesic pentasilicate, $Mg_4Si_5O_{16}$, and containing traces of iron and alumina. It is a colorless or grayish substance, unctuous to the touch, and insoluble in water and in alcohol. It is used, powdered, as a lubricant, as a polishing material, and as a constituent of dusting powders. [B.]

TALCIUM (Lat.), n. n. Ta²ls(ta³lk)'i²-u³m(u⁴m). Fr., *t.* Ger., *T.* See MAGNESIUM.

TALCUM (Lat.), n. n. Ta²lk(ta³lk)'u³m(u⁴m). See TALC.—**Pulvis talci salicylatus.** See PULVIS *salicylicus cum talco*.—**T. nephriticum.** See NEPHRITE.—**T. pulveratum.** See TALC.

TALG (Ger.), n. Ta³lg. See SUET and TALLOW.—**Gallent'.** See CHOLESTERIN.—**Ochsent'.** See SEBUM *bovinum*.—**T'artig.** See SEBACEOUS.—**T'säure.** Stearic acid. [B.]—**T'seife.** See SAPO *animalis*.—**T'stein.** See STEATITE.

TALGBAUM (Ger.), n. Ta³lg'ba³-u⁴m. 1. See MYRICA *cerifera*. 2. Any one of several species of *Stillingia*. [α, 35.]

TALGDRÜSE (Ger.), n. Ta³lg'dru⁶z-e². A sebaceous gland. [L.]—**Meibomische T'n.** See *Meibomian* GLANDS.

TALIERA (Lat.), n. f. Ta³l-i²-er(ar)'a³. See CORYPHA.—**T. silvestris.** A sago-yielding palm of the southern Asiatic islands. The juice of the leaves is used as an emetic, and the root-fibres, in combination with those of *Emilia sonchifolia*, are chewed in diarrhœa. [α, 35.]

TALIPEDIC, adj. Ta²l-i²-ped'i²k. Pertaining to or affected with talipes. [α, 48.]

TALIPES (Lat.), n. m. Ta²l(ta³l)'i²p-ez(as). Gen., *-ip'edis*. From *talus*, the ankle, and *pes*, the foot. Fr., *pied bot*. Ger., *Klumpfuss*. A distorted shape of the foot.—**Spasmodic t.** A variety of non-congenital t. due to the spasm or paralysis of certain muscles. [E, 14.]—**T. arcuatus.** See *T. cavus*.—**T. calcaneo-valgus.** The condition in which the foot is everted with depression of the heel. [E.]—**T. calcaneo-varus.** A variety in which the foot is inverted with depression of the heel.—**T. calcaneus.** See CALCANEUS.—**T. cavus.** An exaggerated curvature of the arch of the foot, the anterior part of the foot being drawn backward. [A, 520 (α, 29); "Arch. of Ped.," Nov., 1891, p. 864.]—**T. equino-valgus.** A variety in which the foot is everted as well as extended. [E.]—**T. equino-varus.** A deformity characterized by inversion, torsion, and depression of the forepart of the foot with elevation of the heel. [A, 520 (α, 29).]—**T. equinus.** Fr., *pied équin*. Depression of the anterior portion of the foot to a

greater or lesser degree, so that the patient walks without touching the ground with the heel. [a, 29.]—**T. planus, T. spuriovalgus.** See FLAT-FOOT.—**T. valgus.** Splay-foot; a deformity characterized by depression of the arch of the foot, so that the inner side of the sole touches the ground. The sole may be everted. The deformity is an alteration in the positions of the astragalus, the os calcis, and the scaphoid bone. [Reeves (a, 34).]—**T. varus.** Cross-foot; a t. in which the foot is twisted inward. [a, 34.]

TALIPOMANUS (Lat.), n. f. Ta^{2}l(ta^{3}l)-i^{2}p-o^{2}m'a^{2}n(a^{3}n)-u^{3}s(u^{4}s). From *talipes*, club-foot, and *manus*, the hand. Club-hand; a more or less permanent deviation of the hand at the wrist in flexion, extension, abduction, or some intermediate posture. [Reeves (a, 34).]—**Cubital t.** See *Ulnar t.*—**Dorsal t.** See *T. extensa.*—**Dorso-radial t.** T. in which the hand is in a state intermediate between extension and adduction. [a, 34.]—**Palmar t.** See *T. flexa.*—**Radial t.** T. in which the hand is in a state of adduction. [a, 34.]—**Radio-palmar t.** T. in which the hand is in a state intermediate between adduction and flexion. [a, 34.]—**T. extensa.** T. with the hand in a state of extension. [a, 34.]—**T. flexa.** T. with the hand in a state of flexion. [a, 34.]—**T. pronata.** T. with the hand in a state of pronation. [a, 34.]—**T. supinata, T. valga.** T. with the hand in the state of supination. [a, 34.]—**T. vara.** See *T. pronata.*—**Ulnar t.** T. with the hand in the state of abduction. [a, 34.]

TALKERDE (Ger.), n. Ta^{3}lk'e^{2}rd-e^2. See MAGNESIA.—**Kohlensaure T.** Medicinal magnesium carbonate. See under MAGNESIUM *carbonate.*—**Reine T.** See *Calcined* MAGNESIA.

TALLINE (Fr.), n. Ta^{3}l-en. Thalline.

TALLOIRES (Fr.), n. Ta^{3}l-lwa^{3}r. A place in the department of Haute-Savoie, France, where there is a sulphurous spring. [L, 49 (a, 14).]

TALLOW, n. Ta^{2}l'o. See SEBUM (1st def.).—**Chinese t.** The waxy substance covering the seeds of *Stillingia sebifera.* [a, 35.]—**Mafuna t.** See MAFUNA.—**T.-tree.** The *Stillingia sebifera* (of China) and the *Pentadesma butyracea* (of Sierra Leone). [a, 35.]—**Vegetable t.** A t.-like substance extracted from a plant. [a, 35.]

TALO-CALCANEAL, adj. Tal-o-ka^{2}l-kan'e^2-'l. From *talus*, the ankle, and *calcaneum* (*q. v.*). See ASTRAGALO-CALCANEAL.

TALON (Fr.), n. Ta^3-lo^{2}n^2. See HEEL.

TALONNIÈRE (Fr.), n. Ta^3-lo^{2}n-e-e^{2}r. A small cushion of hair, used to prevent pressure on the heel in treating fracture of the leg. [E.]

TALO-SCAPHOID, adj. Tal-o-ska^{2}f'oid. See ASTRAGALO-SCAPHOID.

TALPA (Lat.), n. f. Ta^{2}lp(ta^{3}lp)'a^3. Gr., σκάλοψ, σπάλαξ. Fr., *taupe.* Ger., *Maulwurf* (1st def.). A genus of soft-furred burrowing mammals of the *Talpidæ*, or moles (a family of the *Insectivora*). [a, 35.]—**T. europæa.** The common European mole. Formerly the entire animal carbonized (*talpæ combustæ*) was used in scrofula, goître, etc., and the blood (*sanguis talpæ*) in various diseases. [a, 35.]

TALPAFOLIE (Fr.), n. Ta^{3}l-pa^3-fo-le. For deriv., see TALPA and FOLIE. Of Guislain, a variety of mania in which the patient digs up the earth like a mole. [a, 34.]

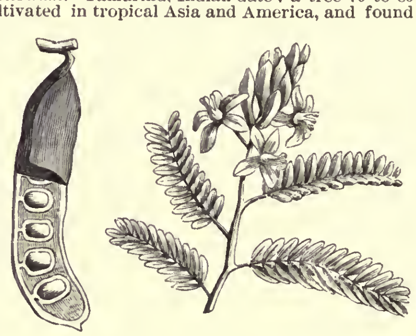
TALUS (Lat.), n. m. Tal(ta^{3}l)'u^{3}s(u^{4}s). See ASTRAGALUS (3d def.).

TALUSROLLE (Ger.), n. Ta^{3}l'us-ro^{3}l-le^2. See SPRUNGROLLE.

TAMARACK, n. Ta^{2}m'a^{2}r-a^{2}k. See LARIX *americana.*

TAMARICACEOUS, adj. Ta^{2}m-a^{2}r-i^{2}k-a'shu^{3}s. Resembling the genus *Tamarix*, of the *Tamaricaceæ, Tamariceæ, Tamaricinæ*, or *Tamaricineæ*, which are essentially the *Tamarisceæ* of Bentham and Hooker. [a, 35.]

TAMARIN (Fr.), n. Ta^3-ma^{3}r-a^{2}n^2. See TAMARIND and TAMARINDUS.—**Conserve de t's** [Fr. Cod.]. A preparation made by evaporating 50 parts each of purified pulp of tamarinds and water and 120 of powdered sugar till reduced to 200. [B, 95 (a, 38).]—**Pulpe brute de t's.** See TAMARINDUS (2d def.).—**Pulpe de t's.** See *Pulpa* TAMARINDORUM *depurata.*—**Tisane de t's.** See *Decoctum* TAMARINDORUM.



TAMARIND, n. Ta^{2}m'a^{2}r-i^{2}nd. Lat., *tamarindus.* Fr., *tamarin.* Ger., *Tamarinde.* The genus *Tamarindus;* also the fruit of *Tamarindus indica* or its preserved pulp. The *Tamarindeæ* are a division of the *Cassieæ*. [a, 35.]—**Bastard-t.** See ACACIA *Julibrissin.*—**Black t.** 1. See DIALIUM *guineense.* 2. See *East Indian t.*—**Brown t.** See *West Indian t.*—**East Indian t.** The fruit of *Tamarindus indica* preserved without the use of sugar, this giving it a strong acid taste. [a, 35.]—**Egyptian t's.** Flattened black cakes prepared in Arabia and on the upper Nile from the softer part of t's. [a, 35.]—**Guinea t.** The fruit of *Adansonia digitata.* [a, 35.]—**Manilla t.** The fruit of *Pithecolobium dulce.* [a, 35.]—**Red t.** See *West Indian t.*—**T. pulp.** 1. See TAMARINDUS (2d def.). 2. See *Pulpa* TAMARINDORUM *depurata.*—**T.-tree.** See TAMARINDUS *indica.*—**T. water.** A drink made by infusing West Indian t. in cold water; used to allay thirst in fevers.—**Velvet t.** See DIALIUM *guineense.*—**West Indian t.** The form of t. usually occurring in the shops, consisting of the pulpy internal portion of the fruit mixed more or less with syrup. The sugar with which it is preserved tempers the acidity of the pulp. [a, 35.]

TAMARINDA (Lat.), n. f. Ta^{2}m(ta^{3}m)-a^{2}r(a^{3}r)-i^{2}nd'a^3. See TAMARINDUS (2d def.).

TAMARINDE (Ger.), n. Ta^{3}m-a^{3}r-i^{2}nd'e^2. See TAMARINDUS.—**T'nmus.** See TAMARINDUS (2d def.).

TAMAR INDIEN (Fr.), n. Ta^3-ma^{3}r-a^{2}n^2-de-a^{3}n^2. A proprietary purgative confection consisting apparently of a pasty cake containing senna, inclosed in chocolate and sugared on the outside.

TAMARINDUS (Lat.), n. f. Ta^{2}m(ta^{3}m)-a^{2}r(a^{3}r)-i^{2}nd'u^{3}s(u^{4}s). Fr., *tamarin* (1st def.), *tamarinier* (1st def.), *tamarinier* (*pulpe*) (2d def.), *pulpe brute de tamarins* (2d def.). Ger., *Tamarinde* (1st def.), *Tamarindenbaum* (1st def.), *Tamarindenmus* (2d def.). Sp., *tamarindo.* 1. A genus of the *Leguminosæ.* 2. The preserved pulp of the fruit of *T. indica.* [B, 95 (a, 38); a, 35.]—**Conserva tamarindorum.** See *Pulpa tamarindorum depurata* and *Conserve de* TAMARINS.—**Decoctum tamarindorum.** Fr., *tisane de tamarins.* A decoction made by boiling 1 part of purified tamarind pulp for a quarter of an hour with water enough to make 20 parts [Belg. Ph.]; by digesting 1 part of East Indian tamarinds without the seeds for half an hour with water enough to make 12 parts [Finn. Ph.]; or by letting 1 part of tamarind pulp stand an hour after stirring in 50 parts of boiling water, and straining [Fr. Cod.]. [B, 95 (a, 38).]—**Decoctum tamarindorum compositum** [Belg. Ph.]. A decoction made by boiling 1 part of tamarinds without the seeds and 2 parts of Corinthian raisins with water enough to make 20 parts. [B, 95 (a, 38).]—**Electuarium tamarindorum Fulleri** [Belg. Ph.]. An electuary consisting of 21 parts each of the pulp of tamarinds and cassia, 40 of manna, 2 of cream of tartar, and 8 each of senna-leaves and water. [B, 95 (a, 38).]—**Fructus tamarindi** (seu **tamarindorum**). The fruit of *T. indica* or its pulp. [a, 35.]—**Fructus tamarindi crudus.** See *T.* (2d def.).—**Pulpa (e fructu) tamarindi** (seu **tamarindorum**). See *Pulpa tamarindorum depurata.*—**Pulpa tamarindorum cruda.** See *T.* (2d def.).—**Pulpa tamarindorum depurata.** Fr., *pulpe de tamarins.* Ger., *gereinigtes Tamarindenmus.* Sp., *pulpa de tamarindos.* The pulp of tamarinds purified by boiling or digesting with water, and evaporating. Most of the ph's add sugar at some stage in the process: 1 part to 3 parts of pulp, evaporating to the consistence of gruel [Austr. Ph., Hung. Ph., Norw. Ph., Roum. Ph.] (of tough pap [Dan. Ph.], of an extract [Swed. Ph.]); 1 part to 4 parts of pulp, evaporating to the consistence of a conserve [Swiss Ph.]; 1 to 5, evaporating to a thick extract [Ger. Ph., Finn. Ph.]; or 1 to 6, evaporating to a thick extract [Russ. Ph., Gr. Ph.] (to a pulp [Netherl. Ph.]). [B, 95 (a, 38).]—**T. amboinensis.** See INTSIA *amboinensis.*—**T. indica.** Fr., *tamarinier* (*des Indes*). Ger., *indischer Tamarindenbaum.* Tamarind, Indian date; a tree 70 to 80 feet in height, cultivated in tropical Asia and America, and found wild in northwestern Australia, but probably indigenous to eastern tropical Africa. The fruit (the tamarind), a broad, compressed, reddish ash-colored pod, from 2 to 6 inches in length, deprived of its brittle epicarp and preserved, constitutes the tamarind pulp of the ph's (see *East Indian* TAMARIND and *West Indian* TAMARIND), which is used as a laxative and refrigerant. It contains tartaric acid, acid potassium tartrate, traces of citric and malic acids, gum, jelly, etc. It weakens the action of the resinous cathartics, while increasing that of cassia and manna. In the Mauritius it is used, mixed with salt, as a liniment in rheumatism. In India the seeds and bark are reputed tonic and antidysenteric, and the cotyledons (which are sometimes eaten) are made into a paste for poultices. The acid leaves are used as an anthelminthic for jaundice, and for preparing a collyrium and a wash for foul ulcers. In Ceylon a confection prepared from the flowers is used in obstructions of the liver and spleen. [a, 35.]—**T. occidentalis.** The West Indian variety of *T. indica;* considered by De Candolle a distinct species. [a, 35.]—**T. officinalis.** See *T. indica.*

TAMARINDUS INDICA. [A, 327.]

TAMARINIER (Fr.), n. Ta^3-ma^3-re-ne-a. 1. See TAMARINDUS. 2. Of the Fr. Cod., see TAMARINDUS *indica.*—**T. (pulpe).** See TAMARINDUS (2d def.).—**T. des Indes.** See TAMARINDUS *indica.*

TAMARISCUS (Lat.), n. m. and f. Ta^{2}m(ta^{3}m)-a^{2}r(a^{3}r)-i^{2}sk'u^{3}s(u^{4}s). See TAMARIX, TAMARIX *gallica*, and MYRICARIA *germanica.*—**Cortex tamarisci.** Sp., *tamarisco, taray* (*corteza del tallo*). The bark of *Tamarix gallica.* [B, 95 (a, 38).]—**T. decandrus.** See MYRICARIA *germanica.*—**T. fruticosa, T. gallica, T. gallicus.** See TAMARIX *gallica.*—**T. germanica, T. germanicus.** See MYRICARIA *germanica.*—**T. pentandrus.** See TAMARIX *gallica.*

TAMARISK, n. Ta^{2}m'a^{2}r-i^{2}sk. See TAMARIX and TAMARIX *gallica.*—**Common t., French t.** See TAMARIX *gallica.*—**German t.** See MYRICARIA *germanica.*

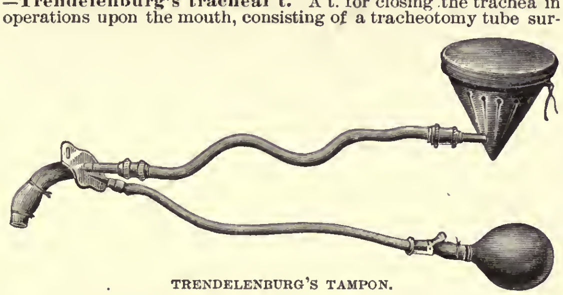
TAMARIX (Lat.), n. f. Ta^{2}m(ta^{3}m)'a^{2}r(a^{3}r)-i^{2}x. Fr., *tamaris, tamarisc.* Ger., *Tamariske.* Tamarisk; a genus of shrubs or undershrubs giving name to the *Tamariscineæ* (Fr., *tamariscinées*), which are: (1) The *Tamarisceæ;* (2) an order of dialypetalous dicotyledons (including the *Tamarisceæ, Reaumurieæ*, and *Fouquiereæ*) readily distinguished in the cohort *Caryophyllinæ* by the ovary containing three placentas, free in the centre of the cavity, or cohering with the walls or more or less with each other so as to form three imperfect cells, and by the erect seed being comose at the apex or all over the testa, or at the margin in the form of a wing. The *Tamarisceæ* (containing two genera [*T.* and *Myricaria*] with exalbuminous seed comose at the apex) are a distinct order or (Bentham and Hooker) a tribe of the *Tamariscineæ.*—**T. africana.** The *T. gallica*, var. γ., of Willdenow; a shrub of the Mediterranean regions having the same uses as *T. gallica mannifera.* [a, 35.]—**T. anglica.** See *T. gallica.*—**T. articulata.** See *T. orientalis.*—**T. decandra.** See MYRICARIA

germanica.—**T. gallica.** Fr., *tamarisc commun* (ou *de Narbonne*). Ger., *französische Tamariske.* Common (or French) tamarisk, the μυρίκη (*myrica*) of the ancients; found in southern Europe, northern and tropical Africa, and southern and eastern Asia. The bitter, balsamic, astringent bark and the leafy branches, *cortex* et *folia tamarisci* (*gallici*, seu *gallicæ*, seu *fruticosæ*), *cortex* et *folia myricis* (seu *myricæ*), were formerly used, especially in obstructions of the spleen. The leaves, together with the galls (see *Tamarisk* GALLS), were used in ophthalmia and hæmorrhages. One variety, *T. gallica*, var. *mannifera*, furnishes tamarisk manna. [α, 35.]—**T. germanica.** See MYRICARIA *germanica.*—**T. germanica caspica, T. herbacea.** See MYRICARIA *herbacea.*—**T. hispida.** Ger., *steifhaarige Tamariske.* A shrub growing on the Volga and other streams in Tartary, where the astringent branches are used in rheumatism and gout. [α, 35.]—**T. indica.** See *T. gallica.*—**T. mannifera.** The *T. gallica*, var. *mannifera.* [α, 35.]—**T. orientalis.** Fr., *tamarisc d'Orient.* Ger., *morgenländische Tamariske.* Atlee gall-tree, tamarisk salt-tree, of northern and middle Africa, Persia, etc., extending to the East Indies. It grows in saline soils, and, becoming incrusted with salt, is used to season food. The wood, which emits a fœtid odor when burned, is used in syphilis and skin diseases, and the leaves in splenic disorders. The bark is astringent and tonic. Astringent galls are formed on this species. [α, 35.]—**T. pentandra.** See *T. hispida.*

TAMBANGAN, n. A place in Java where there is a saline spring. [L, 49 (α, 14).]

TAMBOR, n. A Central American species of *Omphalea* yielding a purgative oil. [α, 35.]

TAMBOUR (Fr.), n. Ta^{3}n^2-bur. Ger., *T.* (2d def.), *Lufttrommel* (2d def.). 1. See DRUM (2d def.). 2. An apparatus devised by Bert to demonstrate the respiratory movements of small animals and other movements of great delicacy. It consists of a capsule-like metal dish covered with sheet rubber. On the centre of the rubber cover is placed a disc of aluminium, which in turn is connected with another disc. This last disc, being applied firmly against the part, communicates the movement to the rubber head and the air within is alternately increased and lessened in density. The interior of the t. being connected by a tube with a registering t., a tracing of the movements is obtained. For some purposes the t. is mounted upon one limb of a caliper-like apparatus. The limbs being adjusted to the diameter of a part, any variation in the diameter is registered by the registering t. [J, 3, 5.]—**Marey's t., Registering t.** Fr., *t. enrégistreur.* An instrument for registering on a kymograph various movements (*e. g.*, those of circulation and respiration). It consists essentially of a shallow metal dish covered by thin sheet rubber. On the centre of the rubber rests an aluminium disc connected by a rod to a lever bearing a style for making the tracing. The interior of the t. is connected by a tube with a receiving ampulla.



TAMIER (Fr.), n. Ta^3-me-a. The genus *Tamus*, especially *Tamus communis.* [α, 35.]

TAMNUS (Lat.), n. f. Ta^{2}m(ta^{3}m)'nu^{3}s(nu^{4}s). See TAMUS.

TAMPICIC ACID, n. Ta^{2}m-pi^{2}s'i^{2}k. Fr., *acide tampicique.* An acid, $C_{34}H_{60}O_{17}$, obtained from tampicin. [B, 93 (α, 14).]

TAMPICIN, n. Ta^{2}mp'i^{2}s'i^{2}n. Fr., *tampicine.* Ger., *T.* A purgative glucoside. $C_{34}H_{54}O_{14}$, obtained from the root of *Ipomœa simulans*, similar to convolvulin and jalapin. [B, 93, 270 (α, 14, 38).]

TAMPON, n. Ta^{2}mp'o^{2}n. Fr., *t.* Ger., *T.*, *Pfropfen.* A plug of some soft material for closing a wound, a cavity, or an orifice. [E.]—**Kite-tail t.** A t. consisting of a number of pledgets tied at intervals on a string, as in the tail of a kite. [α, 34.]—**Probet'** (Ger.). A vaginal t. impregnated with a solution of tannin in glycerin; used to collect the uterine discharge for examination. [L, 57 (α, 14).]—**T. de Gariel** (Fr.). An inflatable vaginal pessary. —**Trendelenburg's tracheal t.** A t. for closing the trachea in operations upon the mouth, consisting of a tracheotomy tube sur-

TRENDELENBURG'S TAMPON.

rounded by a bag of rubber which can be inflated by a bulb at the end of a rubber tube. The tracheotomy tube with its rubber casing is introduced into the tracheal wound, and the rubber casing is then inflated sufficiently to close the trachea completely and prevent the passage of blood by the side of the tube. [E.]

TAMPON-CANNULA, n. Ta^{2}mp-o^{2}n-ka^{2}n'u^{2}l-a^3. A tracheotomy tube devised by Semon, having a distensible rubber attachment at the inner end of the outer tube, which, being inflated, fills the trachea and tends to prevent erosion.

TAMPONING, n. Ta^{2}mp'o^{2}n-i^{2}n^2. Gr., ἐμφραξις, στέγνωσις. Lat., *obturatio.* Fr., *tamponnement.* Ger., *Tamponiren*, *Tamponade.* The process of plugging by the use of a tampon. [α, 48.]

TAMUS (Lat.), n. f. Tam(ta^{3}m)'u^{3}s(u^{4}s). Fr., *tamne*, *tamier*, *taminier.* Ger., *Schmeerwurz.* A genus of the *Dioscoreaceæ.* [α, 35.]—**T. communis.** Fr., *tamier*, *taminier commun*, *racine vierge*, *sceau Notre-Dame* (ou *de la Vierge*), *herbe aux femmes battues*, *vigne noire.* Ger., *gemeine Schmeerwurz*, *schwarze Zaunrübe.* The ἄμπελος ἄγρια of Dioscorides, beaten woman's herb, black bryony, murrain-berries, ox-berry; a climbing plant of Europe, northern Africa, and temperate Asia. The acrid tuberous root, *radix tami* (seu *bryoniæ nigræ*), is diuretic and purgative and in large doses emetic, and was formerly considered resolvent. The fruits, steeped in gin, are applied to chilblains. The shoots are eaten after being boiled. [α, 35.]

TANACETIC ACID, n. Ta^{2}n-a^{2}s-et'i^{2}k. Fr., *acide tanacétique.* Ger., *Tanacetsäure.* An acid obtained from the flowers of *Tanacetum vulgare.* [B, 48, 93 (α, 14).]

TANACETIN, n. Ta^{2}n-a^{2}s'e^{2}t-i^{2}n. Fr., *tanacétine.* Ger., *T.* A bitter principle, $C_{11}H_{16}O_4$, contained in the leaves and flowers of *Tanacetum vulgare.* [B, 48, 93 (α, 14).]

TANACETOL, n. Ta^{2}n-a^{2}s'e^{2}t-o^{2}l. A liquid, $C_{10}H_{16}O$, obtained from oil of tansy. [B, 3 (α, 38).]

TANACETUM (Lat.), n. n. Ta^{2}n(ta^{3}n)-a^{2}s(a^{3}k)-et(at)'u^{3}m(u^{4}m). For deriv., see TANSY. Fr., *tanaisie* [Fr. Cod.], *herbe aux vers* (2d def.). Ger., *Rainfarn*, *Wurmkraut* (2d def.). 1. A genus of plants included by some authors in *Chrysanthemum.* The *Tanaceta* are a section of the *Compositæ.* The *Tanaceteæ* are: Of Cassini, a subdivision of the *Chrysanthemeæ*; of Schultz, a division of the *Senecionideæ.* 2. The leaves and tops [U. S. Ph.] (tops [Finn. Ph.], flowering tops [Sp. Ph.], herb [Belg. Ph.], flowering herb [Gr. Ph.], flowering plant [Fr. Cod.]) of *Chrysanthemum vulgare*; an aromatic, bitter, and irritant narcotic. It contains tanacetin, tartaric, citric, malic, and metarabic acids, a variety of tannic acid, traces of oxalic and gallic acids, a wax-like substance, a resin, parabin, and a volatile oil (oil of tansy). [α, 35.]—**Aqua tanaceti.** Fr., *eau* (ou *hydrolat*) *de tanaisie.* A preparation made by distilling 2 parts of a mixture of 1 part of tansy and 4 parts of water. [B, 119 (α, 38).]—**Flores tanaceti.** The flowers of *T. vulgare.* [B, 95 (α, 38).]—**Flores tanaceti pulverati.** The powdered flowering tops of *T. vulgare.* [B, 95 (α, 38).]—**Oleum tanaceti.** See *Oil of* TANSY.—**Summitates tanaceti.** The tops of *Chrysanthemum vulgare* and *Chrysanthemum balsamita.*—**T. annuum.** See CHRYSANTHEMUM *annuum.*—**T. balsamita, T. fœmina, T. gentilis.** The *Chrysanthemum balsamita.* [α, 35.] —**T. vulgare.** See CHRYSANTHEMUM *vulgare.*

TANACETYL ALCOHOL, n. Ta^{2}n-a^{2}s'e^{2}t-i^{2}l. A liquid, $C_{10}H_{18}O$, obtained from oil of tansy. [B, 3 (α, 38).]

TANACETYL HYDRIDE, n. See TANACETOL.

TANÆCIUM (Lat.), n. n. Ta^{2}n(ta^{3}n)-es'(a^3'e^{2}k)-i^2-u^{3}m(u^{4}m). Fr., *tanécie.* A genus of bignoniaceous shrubs. The *Tanæcieæ* are a subtribe of the *Crescentineæ.* [α, 35.]—**T. albiflorum.** A Jamaica species. The fruits are used for poultices. [α, 35.]—**T. jaroba.** The *jaroba* of the West Indies and Brazil. The fruits are pectoral. [α, 35.]

TANAISIE [Fr. Cod.] (Fr.), n. Ta^3-ne^2-ze. See TANACETUM.—**Huile volatile de t.** [Fr. Cod.]. See *Oil of* TANSY.—**T. commune.** See CHRYSANTHEMUM *vulgare.*—**T. sauvage.** The *Potentilla anserina* and other species of *Potentilla.* [α, 35.]

TANASIMONOSOPHOBOMANIE (Fr.), n. Ta^3-na^3-ze-mo-no-so-fo-bo-ma^3-ne. Of Michéa, hypochondriasis. [A, 540 (α, 34).]

TANG, n. Ta^{2}n^2. Ger., *T.* See FUCUS *vesiculosus.*—**Hautt'** (Ger.). See HALYMENIA.—**Knorpelt'** (Ger.). See CHONDRUS *crispus.*—**Riement'** (Ger.). See LAMINARIA (1st def.).—**Schwarzt'e** (Ger.). See FUCOIDEÆ.—**T'asche** (Ger.). See KELP.—**T'soda** (Ger.). See KELP.—**Wurmt'** (Ger.). Helminthochorton.

TANGHIN, n. Ta^{2}n^2'gi^{2}n. Lat., *tanghinia.* Fr., *t.*, *tanghuin.* 1. See CERBERA *t.* 2. Its seed, the ordeal bean of Madagascar. It increases reflex excitability, produces convulsions, and affects the activity both of the heart and of respiration. It has been used in paralysis and visceral atony. [B; α, 35.]

TANGHINIA (Lat.), n. f. Ta^{3}n^2-gi^{2}n'i^2-a^3. Fr., *tanghinie* (1st def.). 1. A genus of plants referred by Bentham and Hooker to *Cerbera.* [α, 35.] 2. See TANGHIN. [α, 35.]—**T. madagascariensis, T. venenifera.** Fr., *tanghinie vénéneuse.* See CERBERA *tanghin.*

TANGHININ, n. Ta^{2}n'gi^{2}n-i^{2}n. Fr., *tanghinine*, *tanghine*, *tanghuine.* Ger., *T.* The active principle of tanghin (the seed), obtained as bitter colorless scales, efflorescing in air and dissolving in alcohol, in ether, and in acetic acid. It acts as a cardiac and respiratory poison, and destroys the muscular irritability. [B, 5, 93 (α, 14, 35).]

TANG-KWANG (Chin.), n. Gamboge. [α, 35.]

TANGLE, n. Ta^{2}n^2'g'l. See LAMINARIA *conica.*—**Sweet t.** See LAMINARIA *saccharina.*

TANGUIN, n. Ta^{2}n^2'gi^{2}n. See TANGHIN.

TÄNIE (Ger.), n. Tan'i^2-e^2. See TÆNIA.

TANIN (Fr.), n. Ta^3-na^{2}n^2. See TANNIN.

TANNAS (Lat.), n. m. Ta^{2}n(ta^{3}n)'na^{2}s(na^{3}s). Gen., *-nat'is.* See TANNATE.—**T. pelletierinus** [Fr. Cod.]. See PELLETIERINE *tannate.*—**T. plumbicus.** See LEAD *tannate.*—**T. quinicus.** See QUININE *tannate.*—**Unguentum tannatis plumbici.** See *Glycerinum tannatis* PLUMBI.

TANNASPIDIC ACID, n. Ta^{2}n-a^{2}sp-i^{2}d'i^{2}k. See FILICITANNIC ACID.

TANNATE, n. Ta^{2}n'at. Lat., *tannas.* Fr., *t.* Ger., *Tannat.* A salt of tannic acid. [B.]

TANNE (Fr.), n. Ta^{3}n. 1. See COMEDO. 2. The oil of *Camellia oleifera.* [α, 35.]

TANNE (Ger.), n. Ta^{3}n'ne^2. See ABIES.—**T'nstoff.** See DADYL. —**T'nzapfenöl.** Oil of pine-cones. [L, 57 (α, 14).]

TANNECORTEPINIC ACID, n. Ta2n-e2-ko2rt-e2-pin'i2k. Fr., *acide tannecortépinique.* A variety, $C_{28}H_{26}O_{12}$, of tannin obtained from the bark of *Pinus silvestris.* [B, 93 (*a*, 14).]

TANNENHARZ (Ger.), n. Ta3n'ne2n-ha3rts. See *Burgundy* PITCH.—**T'säure.** Abietic acid.

TANNES (Fr.), n. pl. Ta3n. See ACNE *punctata.*

TANNIC, adj. Ta2n'i2k. Lat., *tannicus.* Fr., *tannique.* Ger., *gerbstoffartig.* Derived from tan; containing t. acid.

TANNIC ACID, n. Ta2n'i2k. Fr., *acide tannique.* Ger., *Gerbsäure, Tanninsäure.* Tannin, gallotannic acid; an acid, $C_{14}H_{10}O_9 = C_6H_2(OH)_3CO.OC_6H_2(OH)_2CO.OH$, obtained from nut-galls and sumach-leaves, and occurring as a colorless amorphous mass, brittle and glassy when evaporated, turning yellow in the light, having a very astringent taste, easily soluble in water, less soluble in alcohol, nearly insoluble in absolute ether, and decomposing at 215° C. It has been used as a dressing. In a wider sense, the term t. a., or tannin, comprehends a large number of vegetable astringent principles, all of them glucosides, resembling each other in properties, and designated by a prefix indicative of their origin, *e. g.*, caffeotannic acid, quercitannic acid, etc. [B, 3 (*a*, 38); B, 14.] See also ACIDUM TANNICUM and subheadings there.

TANNICUS (Lat.), adj. Ta2n(ta3n)'ni2k-u3s(u4s). See TANNIC; as a n., in the neut., *tannicum,* an astringent that contains tannic acid.—**Tannicum amarum.** An astringent containing tannic acid and bitter principles.—**Tannicum anthelminthicum.** An astringent containing tannic acid and having anthelminthic properties.—**Tannicum mucilaginosum.** An astringent containing tannic acid and mucilaginous substances.—**Tannicum purum.** A pure astringent containing tannic acid.

TANNIN, n. Ta2n'i2n. Lat., *tanninum.* Fr., *t.* Ger., *T.* Tannic acid; more particularly, crude tannic acid as it occurs in vegetable tissues combined with glucose. [B, 5.]—**Crayons de t.** [Fr. Cod.]. Cylindrical sticks made by mixing t. with $\frac{1}{20}$ of its weight of powdered gum arabic, adding glycerin and water in equal amounts, and rolling into shape. [B.]—**Glycéré de t.** (Fr.), **Glycérole de t.** (Fr.). See *Glyceritum* ACIDI TANNICI.—**Pommade de t.** (Fr.). See *Unguentum* ACIDI TANNICI.—**Suppositoires de t.** (Fr.). See *Suppositoria* ACIDI TANNICI.—**T. lozenges.** See *Trochisci* ACIDI TANNICI.—**T. officinal** (Fr.). See TANNIC ACID.—**T. oriental** (Fr.). See BABLAH.—**T'säure** (Ger.). See TANNIC ACID.—**T'stäbchen** (Ger.). See BACILLI *tannico-opiati.*

TANNINBLEI (Ger.), n. Ta3n-nen'bli. See LEAD *tannate.*—**T'salbe.** See *Glycerinum tannatis* PLUMBI.

TANNINGENIC ACID, TANNINGIC ACID, n's. Ta2n-i2nj-e2n'i2k, -i2nj'i2k. Ger., *Tanningensäure, Tanningerbsäure.* See CATECHUTANNIC ACID.

TANNINUM (Lat.), n. n. Ta2n(ta3n)-nin(nen)'u3m(u4m). See TANNIC ACID.—**Bacilli tannini.** See *Crayons de* TANNIN.—**Glyceritum cum tannino.** See *Glyceritum* ACIDI TANNICI.

TANSY, n. Ta2nz'i2. From ἀθανασία, immortality. The genus *Tanacetum,* especially *Tanacetum vulgare* (*Chrysanthemum vulgare*) and its leaves and tops; also *Potentilla anserina, Senecio jacobœa, Achillea millefolium,* etc. [*a*, 35.]—**Common t.** The *Chrysanthemum vulgare.* [*a*, 35.]—**Dog's t., Goose-t.** See POTENTILLA *anserina.*—**Oil of t.** Lat., *oleum tanaceti.* Fr., *huile volatile de tanaisie.* Ger., *Rainfarnöl.* A volatile oil obtained from tanacetum (2d def.). The Fr. Cod. directs the tops to be used, the Russ. Ph. the flowers, the Pruss. Ph. the flowers and herb, and the Gr. Ph. the flowering herb. It consists of 1 per cent. of a terpene ($C_{10}H_{16}$), boiling at 155° to 160° C., 70 per cent. of an aldehyde ($C_{10}H_{16}O$), boiling at 195° to 196° C., and 26 per cent. of an alcohol ($C_{10}H_{18}O$), boiling at 203° to 205° C. In large doses it produces violent convulsions, coma, and even death. [B, 95 (*a*, 38); Bruylants (*a*, 35).]

TANTAL (Ger.), n. Ta3nt'a3l. See TANTALUM.—**T'erde, T'säure.** See TANTALIC ACID.

TANTALATE, n. Ta2nt'a2l-at. Fr., *colombate.* A salt of tantalic acid. [B.]

TANTALIC ACID, n. Ta2nt-a2l'i2k. Fr., *acide tantalique.* Ger., *Tantalsäure.* A monobasic acid, $HTaO_3$ (or $Ta_2O_5 + H_2O = 2HTaO_3$), occurring as a crystalline powder. [B.]

TANTALUM (Lat.), n. n. Ta2nt(ta3nt)'a2l(a3l)-u3m(u4m). Fr., *tantale.* Ger., *Tantal.* A metallic element discovered by Ekeberg in 1802. It occurs in several minerals, and is almost always associated with niobium. It has not been isolated in a perfectly pure state, but has been obtained approximately free from admixture as a black powder, capable of assuming a metallic lustre, and readily oxidizing on the application of heat. It is not attacked by any acid except hydrofluoric, and to this immunity it owes its name, from the fable of Tantalus being unable to quench his thirst. In composition it acts usually as a pentad radicle, occasionally as a tetrad. Symbol, Ta; atomic weight, 182. [B, 3.]

TANZ (Ger.), n. Ta3nts. See DANCE.—**T'krämpfe.** Choreic spasm. [L, 57 (*a*, 30).]—**T'sucht, T'wuth.** See *Epidemic* CHOREA.

TAPEINOCEPHALUS (Lat.), n. m. Ta2p(ta3p)-in(e2-i2n)-o(o3)-se2f(ke2f)'a2l(a3l)-u3s(u4s). A person characterized by tapeinocephaly.

TAPEINOCEPHALY, n. Ta2p-in-o-se2f'a2l-i2. From ταπεινός, low, and κεφαλή, the head. Fr., *tapinocéphalie.* The condition of having the vault of the skull depressed. [L, 149 (*a*, 50).]

TAPETAL, adj. Ta2p-e't'l. Pertaining to the tapetum. [*a*, 35.]

TAPETE (Ger.), n. Ta3p-at'e2. See TAPETUM.—**Farbent'.** See LAMINA *pigmenti.*—**T. der Seitenhöhlen.** The chorioid plexus of the lateral ventricle. [I, 30 (K).]

TAPETUM (Lat.), n. n. Ta2p(ta3p)-et(at)'u3m(u4m). From *tapete,* a carpet. Fr., *tapis.* Ger., *Tapete, T.* 1. A layer or lamina. [*a*, 17.] 2. The epithelium lining the pollen sac. [*a*, 35.] Cf. *Tapetal* CELL. 3. A layer made up of bundles of nerve-fibres which curve backward from the body of the fornix to the posterior portion of the hemisphere. [I, 6 (K).]—**Augent'** (Ger.). See LAMINA *pigmenti* (*retinæ*).—**T. alveoli.** See *Peri-odontal* MEMBRANE.—**T. cerebri.** See *T.* (3d def.) and *T. corporis callosi.*—**T. chorioideæ** (seu **nigrum**). See LAMINA *pigmenti* (*retinæ*).—**T. corporis callosi.** Fr., *étui de l'hippocampe.* Of Reil, radiating fibres of the corpus callosum which are prolonged into the posterior cornua of the lateral ventricles. [J, 28 (K).]—**T. der Mittelhöhle** (Ger.). The chorioid plexus of the third ventricle. [I, 30 (K).]—**T. nigrum.** See LAMINA *pigmenti* (*retinæ*).—**T. Reilii.** See *T. corporis callosi* and cf. TAPIS *de Reil.*

TAPEWORM, n. Tap'wu5rm. See TÆNIA (2d def.).—**Armed t.** See TÆNIA *solium* (1st def.).—**Beef t.** See TÆNIA *mediocanellata.*—**Broad t.** See BOTHRIOCEPHALUS *latus.*—**Common t.** See TÆNIA *solium* (1st def.).—**Dwarf t.** See TÆNIA *nana.*—**Hydatid t.** See TÆNIA *echinococcus.*—**Long t., Pork t., Solitary t.** See TÆNIA *solium* (1st def.).—**Swiss t.** See BOTHRIOCEPHALUS *latus.*—**T. plant.** See BRAYERA *anthelminthica.*—**Unarmed t.** See TÆNIA *mediocanellata.*

TAPHEPHOBIA (Lat.), **TAPHIPHOBIA** (Lat.), n's f. Ta2f(ta3f)-e2-fob(fo2b)'i2-a3, -i2-fob(fo2b)'i2-a3. From τάφος, burial, and φόβος, fear. Fr., *taphéphobie.* Of Morselli, morbid fear of being buried alive. [*a*, 34.]

TAPHRENCHYMA (Lat.), n. n. Ta2f(ta3f)-re2n2'ki2m(ch2u6m)-a3. Gen., *-chym'atos* (*-atis*). From τάφρος, a ditch, and ἔγχυμα, an infusion. See *Pitted* TISSUE.

TAPINOCEPHALY, n. Ta2p-i2n-o-se2f'a2l-i2. See TAPEINOCEPHALY.

TAPINOCRANIUS (Lat.), adj. Ta2p(ta3p)-i2n(en)-o(o3)-kran(kra3n)'i2-u3s(u4s). From ταπεινός, low, and κρανίον, the skull. Having the greatest height of the cranial cavity from 74·5 to 82·5 per cent. of its greatest length. [Lissauer, "Arch. f. Anthrop.," xv, Supp. (*a*, 50).]

TAPINOPISTHIUS (Lat.), adj. Ta2p(ta3p)-i2n(en)-o2p-i2sth'-i2-u3s(u4s). From ταπεινός, low, and ὄπισθεν, behind. Having the radius fixus making an angle of from 24·5° to 33° with the line connecting the punctum occipitale with the punctum alæ vomeris. [Lissauer, "Arch. f. Anthrop.," xv, Supp. (*a*, 50).]

TAPIOCA (Lat.), n. f. Ta2p(ta3p)-i2-ok'a3. Fr., *t., tapioka* [Fr. Cod.]. Sp., *t.* [Sp. Ph.]. An easily digested food, occurring in round, hard pellets, prepared from cassava starch. [*a*, 35.]—**Chocolate of t.** A French preparation containing 3 parts of t. with 100 of chocolate. [B, 10.]—**Gelatina tapiocæ.** Sp., *jalea de t.* [Sp. Ph.]. A jelly made by triturating 15 parts of t. with a little cold water, adding 45 of sugar boiled up with 230 of water, and keeping at a boil for a few minutes. [B, 95 (*a*, 38).]—**Pearl t.** A spurious t. occurring as small round grains, formed probably from potato-starch. [B, 5.]—**T. meal.** Fr., *moussache.* T. dried without heat, forming a fine powder, identical with ordinary t. in microscopic structure, but not soluble in cold water. [B, 5.]

TAPIS (Fr.), n. Ta3-pe. See TAPETUM and TAPETUM *chorioideæ.*—**T. de Reil.** See INSULA and cf. TAPETUM *Reilii.*

TAPOTEMENT (Fr.), n. Ta3-pot-ma3n2. Ger., *Fingerklopfung.* That variety of massage which consists in tapping or percussion of the affected part. [E.]

TAPPING, n. Ta2p'i2n2. See PARACENTESIS.

TAR, n. Ta3r. Lat., *pix liquida* [U. S. Ph., Br. Ph., etc.], *pyroleum pini* [Dan. Ph., Swed. Ph., Norw. Ph.]. Fr., *goudron* (*végétal* [Fr. Cod.]), *poix liquide.* Ger., *Theer, Holztheer, Fichtentheer.* 1. A highly complex material produced by the destructive distillation of various organic substances. 2. As commonly used, wood-tar; a very thick, shining, black liquid, having a peculiar empyreumatic odor and a bitter taste, derived from the wood of conifers by destructive distillation. On distillation it yields oil of t. and an acid liquid (impure pyroligneous acid), the residue being pitch. T. yields a small proportion of its constituents, especially pyrocatechin, to water, imparting to it an acid reaction and a peculiar taste (see *T.-water*). It is readily soluble in alcohol, in ether, and in solutions of the caustic alkalies. In medicinal properties it resembles the turpentines, but is much less irritant. [B; *a*, 35.]—**Archangel t.** See *Stockholm t.*—**Barbadoes t.** See *Barbadoes* PETROLEUM.—**Beech-t.** Ger., *Buchentheer.* A t. made from the wood of *Fagus silvatica;* official in some ph's as the best source of creasote. [*a*, 35.]—**Birch-t.** Lat., *pix betulæ.* The *dagget* of the Russians; a t. containing much pyrocatechin, obtained from *Betula alba.* [*a*, 35.]—**Coal-t.** Lat., *pix lithanthracis.* Fr., *goudron de houille.* Ger., *Kohlentheer.* A dark, semi-liquid substance obtained in the dry distillation of coal. It is highly complex in composition, yielding by distillation and rectification the following products: Naphthalenes, fluorene, anthracene, carbazol, chrysene, and other solids; benzene, toluene, cymene, and other neutral hydrocarbons; phenol, orthocresol, phlorol, pyrocatechin, and other alcohol-like bodies; ammonia, methylamine, ethylamine, phenylamine, picoline, collidine, and other bases; illuminating gases, such as acetylene, ethylene, etc.; heating gases, hydrogen, marsh-gas, and carbon monoxide; and certain impurities, carbon dioxide, hydrogen sulphide, nitrogen, thyocyanic acid, etc. [B, 5 (*a*, 35).]—**Coal-t. saponatum, Coalt' saponiné** (Fr.), **Coalt' savonneux** (Fr.). Of the veterinarians, a liquid made by mixing 1 part of coal-t. with 2 parts of black soap, and adding (with gentle heat and stirring) 1 part of alcohol and 24 parts of water. [B, 95, 113 (*a*, 21).]—**Émulsion de coalt'** [Fr. Cod.] (Fr.). A preparation made by mixing one part of the *teinture de bois de Panama coaltarée* with 4 parts of distilled water. It contains 4 per cent. of coal-t. [B.]—**Gas-t.** See *Coal-t.*—**Glycerate of t.** See *Glyceritum* PICIS *liquidæ* (under PIX).—**Infusion of t.** See *Infusum* PICIS *liquidæ.*—**Juniper t.** See *Oil of* CADE.—**Koalt'** (Ger.). See *Coal-t.*—

Mineral t. See MALTHA.—**Oil of t.** Lat., *oleum picis liquidæ* [U. S. Ph.]. Fr., *essence (huile) de goudron.* Ger., *Theeröl, Pechöl.* The volatile oily liquid obtained in the distillation of wood-t.; almost colorless when freshly prepared, but becoming dark on standing, having the odor of t., and dissolving freely in alcohol. In chemical composition it is very complex, containing various hydrocarbons of the paraffin series, hydrocarbons of the aromatic series, and the alcohols of the latter series, including carbolic acid and the mixture of phenols constituting creasote. It is less offensive in taste than t., and hence is preferred for medicinal use. [B; α, 35.]—**Poudre de coalt'** [Fr. Cod.] (Fr.). Ger., *Coal-t.-Gypspulver.* Of the veterinarians, a mixture of 1 part of coal-t. and 20 parts of gypsum. [B, 113 (α, 21).]—**Rangoon t.** See *Rangoon* PETROLEUM.—**Saccharated t., Syrup of t.** See *Syrupus* PICIS.—**Stockholm t.** A trade name in Europe for wood-t., most of which is prepared in Finland, central and northern Russia, and Sweden. [α, 35.]—**T. beer.** Lat., *cerevisia picis* (*liquidæ*). A beer made by heating gently with ¼ pint of yeast 2 pints of bran, 1 pint of t., ½ pint of honey, and 6 pints of water, and fermenting. [B.]—**T.-oil.** See *Oil of t.*—**T. ointment.** See *Unguentum* PICIS *liquidæ.*—**T.-water.** See *Infusum picis liquidæ* (under PIX).—**Vegetable t., Wood-t.** See *T.* (2d def.).

TARACANA (Lat.), n. f. Ta^{2}r(ta^{3}r)-a^{2}k(a^{3}k)-an(a^{3}n)'a^3. A kind of cockroach found in Russia.—**Pulvis taracanæ.** Powdered Russian cockroach (*Blatta lapponica*), used in dropsy (cf. ANTIHYDROPIN). [B, 5.]

TARACHE, TARAGMA (Lat.), **TARAGMUS** (Lat.), n's f., n., and m. Ta^{2}r(ta^{3}r)'a^{2}k(a^{3}ch^2)-e(a), ta^{2}r(ta^{3}r)-a^{2}g(a^{3}g)'ma^3, -mu^{3}s(mu^{4}s). Gen., *tar'aches, -ag'matos (-atis), -ag'mi.* Gr., ταραχή, τάραγμα, ταραγμός. See TARAXIS.

TARANTISM, n. Ta^{2}r'a^{2}nt-i^{2}zm. Lat., *tarantismus* (from *Taranto* [Gr., Τάρας, Lat., *Tarentum*], a city of Greece). Fr., *tarantisme.* Ger., *Tarantismus.* An epidemic chorea that appeared in Apulia in the fifteenth century and spread through Italy and southern France; supposed to be caused by the bite of *Lycosa tarantula.* [α, 34.]

TARANTULA (Lat.), n. f. Ta^{2}r(ta^{3}r)-a^{2}nt(a^{3}nt)'u^{2}l(u^{4}l)-a^3. From *Taranto* (see TARANTISM). Fr., *tarentule.* Ger., *Tarentel.* See LYCOSA *t.*

TARASCON (Fr.), n. Ta^3-ra^3-sko^{2}n^2. A place in the department of the Ariége, France, where there is a chalybeate spring.

TARASP (Ger.), n. Ta^{3}r-a^{3}sp'. A place in the canton of the Grisons, Switzerland, where there are gaseous springs. [α, 14.]

TARASSIS (Lat.), n. f. Ta^{2}r(ta^{3}r)-a^{2}s(a^{3}s)'si^{2}s. Gen., *-as'seos (-sis).* From ταράσσειν, to trouble. Of Lanoaille de Lachèse, the congeries of symptoms commonly known as hysteria in the male. ["Gaz. des hôp.," 1884, p. 1036 (α, 34).]

TARAXACERIN, n. Ta^{2}r-a^{2}x-a^3-ser'i^{2}n. A crystalline principle, $C_8H_{16}O$, obtained from the milky juice of the root of *Taraxacum officinale.* [B, 5 (α, 38).]

TARAXACIN, n. Ta^{2}r-a^{2}x'a^{2}s-i^{2}n. Fr., *taraxacine.* Ger., *T.* A bitter principle obtained from the juice of the root of *Taraxacum officinale*, as white, bitter crystals. [B, 5, 93, 270 (α, 14, 38).]

TARAXACUM (Lat.), n. n. Ta^{2}r(ta^{3}r)-a^{2}x(a^{3}x)'a^{2}k(a^{3}k)-u^{3}m-(u^{4}m). Fr., *pissenlit* (2d and 3d def's), *dent-de-lion (racine)* [Fr. Cod.] (2d def.), *dent-de-lion* [Fr. Cod.] (3d def.). Ger., *Pfaffenröhrchen* (1st def.), *Löwenzahnwurzel* (2d def.), *Löwenzahn.* Sp., *diente de león* [Sp. Ph.] (3d def.). 1. A genus of the *Taraxaceæ* (a tribe of the *Cichoriaceæ*). 2. Dandelion-root; of the U. S. Ph., the root (in the Br. Ph., the fresh and dried roots) of *T. officinale* gathered in autumn. [α, 35.] 3. Of the Austr. Ph. and Hung. Ph., the leaves of *T. officinale.* [B, 95 (α, 38).]—**Compound elixir of t.** A preparation made of 6 oz. of t.-root, 4 of wild-cherry bark, 2 of orange-peel, 1 oz. each of gentian-root, cinnamon, coriander, and licorice, 2 drachms each of anise, cardamom, and caraway, 2½ pints of syrup, and enough of a mixture of 3 parts of water and 1 part of alcohol to produce 6½ pints of elixir by treatment in a percolator; or of 6 fl. oz. of fluid extract of t., 1 fl. oz. of fluid extract of gentian, 100 drops of oil of orange, 12 of oil of cinnamon, 10 of oil of anise, 5 of oil of caraway, 20 of oil of coriander, 1 oz. of extract of licorice, 2½ pints of syrup of wild cherry, 1½ of alcohol, and 4 of water. [B, 5 (α, 38).]—**Decoctum taraxaci** [Br. Ph., Belg. Ph.]. Fr., *tisane de pissenlit.* Ger., *Löwenzahnwurzelabsud.* Sp., *cocimiento de taraxacón* [Sp. Ph.]. A decoction made by boiling 1 oz. of dry t.-root for ten minutes in water enough to make 1 pint after straining and washing [Br. Ph.]; or by macerating 1 part of the root an hour with water enough to make 20 parts after boiling a quarter of an hour and straining [Belg. Ph.]; or by boiling 1 part of dried t.-leaves a quarter of an hour with water enough to make 46 parts when strained [Sp. Ph.]. [B, 95 (α, 38).]—**Decoctum taraxaci compositum.** A preparation made by boiling together 120 parts of dandelion-root, 15 of *Menyanthes trifoliata*, and 1,440 of water till the liquid is reduced one half, and adding 30 of potassium sulphate and 7 of ether; or by boiling 75 grammes each of dandelion, chicory, and *Triticum repens* with water enough to make 360, and adding 7 of potassium sulphate, 90 of sirop des cinq racines, and 25 drops of Hoffmann's solution. [B, 119 (α, 38).]—**Extractum taraxaci.** Fr., *extrait de pissenlit.* Ger., *Löwenzahnextrakt.* Sp., *extracto de taraxacón.* 1. An extract made from the root [U. S. Ph., Br. Ph., Finn. Ph., Swiss Ph.] (from the herb and root [Ger. Ph., Dan. Ph., Norw. Ph., Swed. Ph., Russ. Ph., Netherl. Ph., Belg. Ph., Gr. Ph.], from the leaves [Fr. Cod., Sp. Ph.]) of *T. officinale.* [B.] 2. Of the Austr. Ph. and Hung. Ph., see *Extractum taraxaci liquidum* (2d def.).—**Extractum taraxaci fluidum.** An extract made by exhausting 100 grammes of t.-root in No. 30 powder with a mixture of 2 parts of alcohol and 3 of water, reserving 85 c. c., distilling off the alcohol from the remainder and evaporating it to a soft extract, mixing the two, and bringing up to 100 c. c. with the menstruum [U. S. Ph.]; or by macerating 40 oz. of t.-root in No. 20 powder with 4 pints of alcohol of sp. gr. 0·920, expressing 20 fl. oz., macerating the residue with water for 48 hours, evaporating to 18 fl. oz., adding the reserved 20, and bringing up to 40 with water [Br. Ph.]. [B, 95 (α, 38).]—**Extractum taraxaci liquidum.** 1. Of the Br. Ph., see *Extractum taraxaci fluidum.* 2. An extract made by dissolving 3 parts of extract of t. in 1 part of water [Dan. Ph., Russ. Ph., Pruss. Ph. (1846)]; or by treating equal weights of the leaves and the root of *T.* with warm water and evaporating to a thin extract [Austr. Ph., Hung. Ph.]. [B; B, 95 (α, 38).]—**Infusum taraxaci** [U. S. Ph., 1870]. Infusion of dandelion, made by macerating 2 oz. of t. (-root) in 1 pint of boiling water and straining. [B, 5 (α, 21).]—**Mellago taraxaci.** See *Extractum taraxaci liquidum* (2d def.).—**Pilule de fulminate de t.** (Fr.). An old name for a placebo.—**Radix taraxaci.** See *T.* (2d def.).—**Radix taraxaci cum herba** [Ger. Ph., Gr. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.] (**recens** [Russ. Ph.]). Roum., *taraxacu* [Roum. Ph.]. The *T. officinale* gathered in the spring before blooming. [B, 95 (α, 38).]—**Radix taraxaci pulverata.** A powder of t. (-root) sifted through a 1,000-mesh sieve [Russ. Ph.]. [B, 95 (α, 38).]—**Succus taraxaci** [Br. Ph.]. Dandelion juice; made by crushing t. (2d def.) in a stone mortar, expressing, adding 1 volume of alcohol for 3 volumes of juice, allowing to stand a week, and filtering. [B, 95 (α, 38).]—**T. dens leonis, T. officinale, T. officinarum.** Fr., *t. commun, chopine, cochet, couronne de moine, dent-de-lion, laitue de chien, liondent, pissenlit, salade de taupe.* Ger., *gemeines Pfaffenröhrchen, Pfaffenstiel, Löwenzahn, Hundeblume, Maiblume, Butterblume, Pfaffenkraut, Bompaulwurzel, Wiesenlattig, Eierblume, Eierkraut.* Dandelion (lion's-tooth), priest's-crown, swine's-snout; a polymorphous herbaceous plant (see cut under LEONTODON *t.*) found over the whole of Europe, central and northern Asia, and North America. The perennial, tapering, simple or nearly simple, fleshy root (see *T.*, 2d def.) is rich in an inodorous juice which is bitter and neutral when fresh, but soon acquires an acid reaction and coagulates. A number of principles (inulin, lævulin, taraxacin, and taraxacerin) have been obtained from it, but what part they have in its medicinal virtues is not known. The intracellular substance of the root consists, according to Vogel, chiefly of pectose. The juice, if exposed to the air, undergoes a kind of fermentation resulting in the formation of mannite. T. is somewhat tonic, diuretic, and laxative, and is used especially in hepatic disorders. Dried, ground, and roasted, it is sometimes used with or as a substitute for coffee. The fresh leaves or entire herb, *herba taraxaci* (seu *dentis leonis*, seu *leontodontis* [*taraxaci*], seu *lactucæ pratensis*), are less active than the root, though the juice obtained from the flower-stalks is highly recommended by Barton. The young leaves are eaten as a salad and pot-herb. [α, 35.]

TARAXIS (Lat.), n. f. Ta^{2}r(ta^{3}r)-a^{2}x(a^{3}x)'i^{2}s. Gen., *-ax'eos (-is).* Gr., τάραξις (from ταράσσειν, to trouble). 1. A disorder of sight arising from a blow or from compression of the eye. 2. A mild ophthalmia. [F.]

TARCHONANTHUS (Lat.), n. m. Ta^{3}rk(ta^{3}rch^2)-o^{2}n-a^{2}nth-(a^{3}nth)'u^{3}s(u^{4}s). A genus of the *Compositæ.* The *Tarchonantheæ* (Fr., *tarchonanthées*) are a division of the *Vernonieæ.* [α, 35.]—**T. camphoratus.** Shrubby fleabane of southern Africa; an aromatic, stimulant species, used like sage. [α, 35.]

TARCONINE, n. Ta^{2}r'ko^{2}n-en. Fr., *t.* A derivative, $C_{11}H_9NO_3$, of cotarnine. [B, 270 (α, 38).]

TARDIF (Fr.), adj. Ta^{3}r-def. See SEROTINOUS.

TARENTISM, n. Ta^{2}r'e^{2}nt-i^{2}z'm. Lat., *tarentismus.* Fr., *tarentisme.* See TARANTISM.

TARIÈRE (Fr.), n. Ta^3-re-e^{2}r. See OVIPOSITOR and DRILL.

TARIRI (Lat.), n. n. indecl. Ta^3-re're. Fr., *t.* Of Aublet, a genus of the *Quassieæ;* tropical American bitter, tonic, and febrifuge trees or shrubs. [α, 35.]

TARLATANE (Fr.), n. Ta^{3}r-la^3-ta^{3}n. Fine gauze (used for dressings). [α, 18.]

TARO, n. In Hawaii, kalo. [α, 35.]

TAROLI, n. An old term for chancre. [G.]

TARRA, n. In Lima, dividivi. [α, 35.]

TARRAGON, n. Ta^{2}r'a^3-go^{2}n. See ARTEMISIA *dracunculus.*—**Oil of t.** An essential oil closely resembling oil of anise.

TARSAL, adj. Ta^{3}r's'l. Lat., *tarsalis, tarseus* (from *tarsus* [*q. v.*]). Fr., *t., tarsien.* Ger., *t.* Pertaining to the tarsus.

TARSALGIA (Lat.), n. f. Ta^{3}rs-a^{2}lj(a^{3}lg)'i^2-a^3. From ταρσός, the tarsus, and ἄλγος, pain. Fr., *tarsalgie.* Ger., *Tarsalgie, Fusswurzelschmerz.* 1. Pain in the tarsus. [α, 17.] 2. Painful valgus.

TARSALIS (Lat.), adj. Ta^{3}rs-al(a^{3}l)'i^{2}s. Tarsal; as a n., of Coues, the tensor tarsi. [L.]

TARSECTOMY, n. Ta^{3}rs-e^{2}kt'om-i^2. From ταρσός, the tarsus, and ἐκτομή, excision. Fr., *tarsectomie.* Excision of the tarsus.

TARSECTOPIA (Lat.), n. f. Ta^{3}rs-e^{2}k-top(to^{2}p)'i^2-a^3. From ταρσός, the tarsus, and ἔκτοπος, out of place. Fr., *tarsectopie.* Displacement of the tarsus. [L, 50 (α, 14).]

TARSEUS (Lat.), **TARSIEN** (Fr.), adj's. Ta^{3}rs'e^2-u^{3}s(u^{4}s), ta^{3}r-se-a^{3}n^2. See TARSAL.

TARSITIS (Lat.), n. f. Ta^{2}rs-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* From *tarsus* (*q. v.*). Fr., *tarsite.* Ger., *T.* Inflammation of the tarsal cartilages. [F.]

TARSOCACE (Lat.), n. f. Ta^{3}rs-o^{2}k'a^{2}s(a^{3}k)-e(a). Gen., *-oc'aces.* From ταρσός, the tarsus, and κακός, evil. Fr., *t.* See PODARTHROCACE.

TARSO-CHEILOPLASTIC, adj. Ta^{3}rs-o-kil'o-pla^{2}st-i^{2}k. From ταρσός (see TARSUS), χεῖλος, a lip, and πλάσσειν, to mold. Plastic and performed on the border of the eyelid (said of an operation for trichiasis). [α, 34.]

TARSOCLASIS (Lat.), n. f. Ta^{3}rs-o^{2}k'la^{2}s(la^{3}s)-i^{2}s. Gen., *-clas'eos (-oc'lasis).* From ταρσός, the tarsus, and κλάσις, a breaking. The operation of breaking a deformed tarsus by force. [V. P. Gibney, "N. Y. Med. Jour.," Apr. 17, 1886, p. 427 (α, 50).]

TARSOMALACIA (Lat.), n. f. Ta^{3}rs-o(o^3)-ma^{2}l(ma^{3}l)-as(a^{3}k)'-i^2-a^3. From ταρσός (see TARSUS), and μαλακία, softness. Ger., *Lidknorpelerweichung.* Softening of the palpebral cartilages. [α, 34.]

TARSO-METATARSAL, adj. Ta^{3}rs-o-me^{2}t-a^3-ta^{3}r's'l. Fr., *tarsométatarsien.* Pertaining to the tarsus and the metatarsus.

TARSOMETATARSUS (Lat.), n. m. Ta^{3}rs-o(o^3)-me^{2}t-a^3-ta^{3}rs'-u^{3}s(u^{4}s). That bone which reaches from the tibia to the toes in a bird; really nearly all metatarsus, but having at its top one of the small tarsal bones confluent with it, so that in itself it comprehends part of the tarsus as well as all the metatarsus. [L, 343.]

TARSO-MÉTATARSI-PHALANGIEN DU POUCE (Fr.), n. Ta^{3}r-so-ma-ta^3-ta^{3}r-se-fa^3-la^{3}n^2-zhe-a^{3}n^2 du^6 pus. See ADDUCTOR *hallucis.*

TARSOPHYMA (Lat.), n. n. Ta^{3}rs-o(o^3)-fim(fu^{6}m)'a^3. From ταρσός, the tarsus, and φῦμα, a growth. Fr., *tarsophyme.* 1. A swelling of the ankle. 2. A swelling of the tarsal cartilages. [L, 50 (α, 14).]

TARSOPRÆPHALANGEUS (Lat.), n. m. Ta^{3}rs-o(o^3)-pre-(pra^3-e^2)-fa^{2}l(fa^{3}l)-a^{2}n(a^{3}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From ταρσός, the tarsus, *præ,* before, and *phalanx* (*q. v.*). A small muscle in solipeds arising from the extensor tendons and attached to the lower end of the os calcis. It aids in extending the digits and keeping the tendons tense. [L, 13.]

TARSORRHAPHY, n. Ta^{3}rs-o^{2}r'ra^{2}f-i^2. From ταρσός, the tarsus, and ῥαφή, a seam. Fr., *tarsorrhaphie.* Ger., *Tarsorrhaphie.* Any operation for shortening and narrowing the palpebral fissure. [F.]

TARSO-SOUS-PHALANGIEN (Fr.), n. Ta^{3}r-so-su-fa^3-la^{3}n^2-zhe-a^{3}n^2. A flexor muscle extending from the tarsus to the lower surface of the phalanx of a toe. [α, 48.]—**T.-s.-p. du gros orteil.** See FLEXOR *hallucis brevis.*—**T.-s.-p. du petit orteil.** See FLEXOR *digiti minimi pedis brevis.*

TARSOTOMY, n. Ta^{3}rs-o^{2}t'om-i^2. From ταρσός, the tarsus, and τομή, a cutting. Fr., *tarsotomie.* Ger., *Tarsotomie.* 1. A cutting operation on the tarsus of the foot. 2. The removal of a portion or the whole of the tarsal cartilage. [F.]—**Anterior t.** Of Poinsot, t. (1st def.) in which the anterior row of tarsal bones is removed. [α, 34.]—**Cuneiform t.** Excision of a wedge-shaped piece of bone, which may include portions of any of the tarsal bones. [α, 34.]—**Posterior t.** T. in which the posterior row of tarsal bones, including the astragalus, is excised. [α, 34.]—**Subcutaneous linear t.** Of Reeves, t. (1st def.) without injury to the tendons, vessels, or nerves by means of a chisel introduced through a small incision on the dorsum of the foot. [α, 34.]

TARSUS (Lat.), n. m. Ta^{3}rs'u^{3}s(u^{4}s). Gr., ταρσός (lit., any broad, flat surface). Fr., *tarse.* Ger., *T., Fusswurzel* (1st def.). 1. The bony structure constituting the greater part of the arch of the foot, consisting of the os calcis, the astragalus, the scaphoid bone, the cuboid bone, and the three cuneiform bones. 2. In birds, see TARSOMETATARSUS. 3. The so-called cartilage of the eyelid (tarsal cartilage), which forms the skeleton or support of the lid. It is properly only dense connective tissue, interspersed with numerous elliptical nuclei. The one in the upper lid is much thicker, broader, and denser than that in the lower lid. Its shape is crescentic, with the ciliary border sharply cut off. The tarsi become thinned toward the orbital margin, and finally merge in a fascia, which is firmly attached to the orbital margin. The tarsus contains the Meibomian glands. [F.]—**T. palpebralis.** See *T.* (3d def.).

TARTAR, n. Ta^{3}r't'r. Lat., *tartarum, tartarus* (connected in some obscure way with Τάρταρος, Hades). Fr., *tartre.* Ger., *Weinstein* (1st def.). Sp., *tártaro, rasuras del vino* (1st def.). 1. A substance deposited as a whitish or reddish crystalline crust on the sides of wine-casks, consisting of a mixture of acid and normal tartrates, especially those of potassium and calcium. [B; B, 95 (α, 38).] 2. See SORDES (1st def.).—**Acid of t.** Tartaric acid. [B.]—**Ammoniated soluble t.** Potassium and ammonium tartrate. [B.]—**Cream of t.** Lat., *cremor tartari.* Fr., *crême de tartre.* Ger., *Weinsteinrahm.* Commercial acid tartrate of potassium, usually containing more or less calcium tartrate; so called because when it is mixed with water a fine creamy film of minute crystals floats on the top. [B, 5, 8.]—**Crude t.** See *T.* (1st def.).—**Crystals of t.** Cream of t., especially as obtained in the crystalline form. [B.]—**Emetic t.** See ANTIMONY *and potassium tartrate.*—**Ointment of t. emetic.** See *Unguentum* ANTIMONII *tartarati.*—**Red t.** The reddish t. deposited from red wine. [B, 5.]—**Salt of t.** Potassium carbonate obtained by decomposing cream of t. [B.]—**Soluble (cream of) t.** See TARTARUS *boraxatus.*—**Stibiated t., T. emetic.** See ANTIMONY *and potassium tartrate.*—**T. emetic substitute.** See ANTIMONY *and potassium oxalate.*—**Tartrated t.** See TARTARUS *tartarisatus.*—**Vitriolated t.** Potassium sulphate. [B, 91.]—**White t.** Crude t. deposited from white wine and having a dirty-whitish color. [B, 5.]

TARTAREOUS, adj. Ta^{3}rt-ar'e^2-u^{3}s. Lat., *tartareus.* Ger., *weinsteinartig.* Having a rough, tartar-like surface. [α, 35.]

TARTARIC, adj. Ta^{3}r-ta^{3}r'i^{2}k. Lat., *tartaricus.* Fr., *tartrique.* Derived from or contained in tartar. [B.]—**T. acid.** Lat., *acidum tartaricum* (seu *tartricum* [Fr. Cod.]), *sal essentiale tartari.* Fr., *acide tartrique, acide du tartre.* Ger., *Weinsäure, Weinsteinsäure.* A dibasic acid, $C_4H_6O_6 = C_2H_2.(OH)_2 \langle {CO.OH \atop CO.OH}$. In chemical structure t. acid is both a dibasic acid and a dihydric alcohol, and so contains four atoms of replaceable hydrogen, all of which are replaceable by metals and two by acid radicles. Four isomeric varieties are known: (1) *dextrotartaric acid,* ordinary t. acid (Lat., *acidum tartaricum* [U. S. Ph.]; Fr., *acide dextroracémique;* Ger., *Rechtsweinsäure*), a body forming large prismatic crystals of acidulous taste, readily soluble in water, the solution having a specific dextrorotary power of 9·6°; (2) *lævotartaric acid, antitartaric acid* (Fr., *acide antitartrique;* Ger., *Antiweinsäure*), a body forming rhombic crystals which have in general the same properties as ordinary t. acid, but in solution have a specific lævorotary power of 9·6°; (3) *mesotartaric acid, optically inactive t. acid* (Ger., *Mesoweinsäure*), a body forming crystals resembling those of ordinary tartaric acid, but having in solution no effect upon the plane of polarization; (4) *metatartaric acid* (Ger., *Metaweinsäure*), an amorphous substance produced by heating ordinary t. acid to 170° C. A mixture of dextrotartaric and lævotartaric acids constitutes *racemic acid,* also called *paratartaric acid.* [B, 4, 5.]—**T. anhydride.** Ger., *Weinsäureanhydrid.* A white or yellowish powder, $C_8H_8O_{10}$, isomeric with tartrelic acid. [B, 3 (α, 38).]—(**Test-**) **solution of t. acid.** A solution of t. acid in 5 parts [U. S. Ph.] (4 parts [Ger. Ph.]) of water or in 8 of water and 2 of alcohol [Br. Ph.]. [B, 81 (α, 38).]

TARTARICUS (Lat.), adj. Ta^{3}rt-a^{2}r(a^{3}r)'i^{2}k-u^{3}s(u^{4}s). Tartaric; with the name of a base, the tartrate of that base. [B.]

TARTARIMÉTRIE (Fr.), n. Ta^{3}r-ta^{3}r-e-ma-tre. Analysis by means of potassium carbonate obtained by calcination of cream of tartar. [α, 14.]

TARTARIZED, adj. Ta^{3}r't'r-izd. Lat., *tartaratus, tartarisatus.* Containing tartar or tartaric acid.

TARTAROUS ACID, n. Ta^{3}r't'r-u^{3}s. Tartaric acid. [B.]

TARTARUM (Lat.), n. n. Ta^{3}rt'a^{2}r(a^{3}r)-u^{3}m(u^{4}m). A term originally applied to tartar; now supplanted by *tartarus.* [B.]—**T. antimoniale, T. antimoniatum, T. emeticum.** See ANTIMONY *and potassium tartrate.*

TARTARUS (Lat.), n. m. Ta^{3}rt'a^{2}r(a^{3}r)-u^{3}s(u^{4}s). See TARTAR.—**Alcali tartari.** An old term for potassium tartrate and for purified potassium carbonate. [α, 38.]—**Arcanum tartari.** See *T. regeneratus.*—**Cremor tartari.** See *Cream of* TARTAR.—**Cremor tartari solubilis.** See *T. boraxatus.*—**Crystalli tartari.** See *Crystals of* TARTAR.—**Decoctum crystallorum tartari, Decoctum tartari citratum.** See *Solutio tartari depurati.*—**Emplastrum tartari stibiati.** A plaster consisting of 2 parts of antimony and potassium tartrate and 14 of emplastrum resinæ pini [Russ. Ph.]; or of 14 parts of the tartrate, 6 of olive-oil, and 80 of Burgundy-pitch plaster [Belg. Ph.]. [B, 95 (α, 38).]—**Globuli tartari ferruginosi** (seu **martiales**). See *Martial* BALLS.—**Liquor salis tartari.** The liquor kalii carbonici of the Ger. Ph. [B, 10.]—**Liquor tartari empyreumaticus.** See LIQUOR *pyrotartaricus.*—**Liquor tartari solubilis chalybeati.** Fr., *eau de boule, eau martiale.* A preparation made by dissolving 1 part of iron and potassium tartrate in 2 parts of water [Brunsw. Ph., 1777] (in 1,000 parts of water [Fr. Milit. Hosp. Ph., 1839]).—**Liquor tartari stibiati.** See *Liquor* ANTIMONII *tartarisati.*—**Liquor terræ foliatæ tartari.** The liquor kalii acetici of the Ger. Ph. [B.]—**Lotio tartari stibiati.** A solution of 4 parts of tartar emetic in 360 of boiling water, with the addition of 15 of camphorated brandy. [B, 119 (α, 38).]—**Oleum tartari per deliquium.** The oily liquid formed by the deliquescence of potassium carbonate in moist air; also a solution of potassium carbonate in 2 parts of water, corresponding to the liquor kalii carbonici of the Ger. Ph. [B.]—**Pulvis tartari compositus.** 1. Of the Swed. Ph., see PULVIS *dentifricius ruber.* 2. A mixture of 15 parts of cream of tartar with 7 of potassium sulphate. [B, 95, 119 (α, 38).]—**Sal essentiale tartari.** Tartaric acid. [B.]—**Sal tartari.** Normal potassium carbonate. [B.]—**Sal tartari essentiale** (seu **essentialis**). Tartaric acid. [B, 97.]—**Solutio tartari depurati.** Fr., *hydrolé tartrique.* Solution of supertartrate of potassium: a preparation consisting of 11 parts of cream of tartar, 960 of warm water, and 60 of raspberry syrup; or of 15 of cream of tartar, 36 of warm water, and 30 of raspberry syrup; or made by boiling 30 parts of cream of tartar with 600 of water till reduced to 450, and adding 15 of lemon-juice. [B, 119 (α, 38).]—**Spiritus tartari.** Pyrotartaric acid obtained by the distillation of tartar. [B, 97.]—**Spiritus tartari vitriolatus.** A preparation made by treating 3 parts of cream of tartar with 8 of calcined iron sulphate, and distilling over the sand bath. [B, 119 (α, 38).]—**T. acetosus.** Potassium tartrate. [B, 119 (α, 38).]—**T. acidus lapillatus.** Potassium bitartrate. [L, 53.]—**T. ammoniacalis, T. ammoniatus.** See POTASSIUM *and ammonium tartrate.*—**T. antimonialis.** Antimony and potassium tartrate. [B.]—**T. boraxatus.** Fr., *tartrate borico-potassique.* Ger., *Natriumkaliumtartrat, Boraxweinstein.* Sp., *tartrato bórico-potásico.* A preparation made by dissolving 2 parts of borax and 4 [Dan. Ph., Swiss Ph., Netherl. Ph., Norw. Ph., Swed. Ph.] (5 [Ger. Ph., Finn. Ph., Russ. Ph.], 6 [Gr. Ph.], 8 [Belg. Ph., Fr. Cod., Sp. Ph.]) of acid potassium tartrate in 20 parts of water (16 [Dan. Ph., Russ. Ph.]), filtering, drying or evaporating, and sometimes powdering. [B; B, 95 (α, 38).]—**T. chalybeatus.** See IRON *and potassium tartrate.*—**T. crudus.** See TARTAR (1st def.).—**T. depuratus.** Acid potassium tartrate. [B.]—**T. depuratus pulveratus.** Cream of tartar powdered and sifted through a No. 1 hair sieve [Fr. Cod.] (a 1,600-mesh sieve [Russ. Ph.]). [B, 95 (α, 38).]—**T. emeticus.** See ANTIMONY *and potassium tartrate.*—**T. ferratus.** 1. Of the Ger. Ph., 1st ed., crude iron and potassium tartrate. [B, 95 (α, 38).] 2. Of the Swiss Ph., see IRON *and potassium tartrate.*—**T. ferruginosus, T. martialis, T. martiatus.** See IRON *and potassium tartrate.*—**T. mercurialis.** See MERCURY *tartrate.*—**T. natronatus.** See POTASSIUM *and sodium tartrate.*—**T. regeneratus.** Potassium acetate; so called because prepared by the ignition of cream of tartar. [B, 3.]—**T. solubilis.** See *T. boraxatus.*—**T. solubilis ammoniacalis.** See POTASSIUM *and ammonium tartrate.*—**T. stibiatus.** See ANTIMONY *and potassium tartrate.*—**T. tartarisatus.** Tartrated tartar; normal potassium tartrate. [B.]—**T. vitriolatus.** Vitriolated tartar, normal potassium sulphate; first prepared by treating tartar, or acid potassium tartrate, with sulphuric (vitriolic) acid. [B.]—**T.**

vitriolatus depuratus. Purified potassium sulphate. [B.]—**Tinctura (salis) tartari.** See *Tinctura* ANTIMONII *aurata*.—**Tinctura tartari composita.** A preparation made by distilling 4,320 parts of tartar, 1,620 of guaiac-wood, and 540 each of sassafras, sarsaparilla, and china-root, separating the liquid from the oil swimming on the surface, digesting in it 180 parts of cream of tartar, 240 of guaiac-wood, 45 each of sassafras-wood, ash-wood, and sarsaparilla, 75 of china-root, 30 of red sandal-wood, and 11 of sulphuric acid, and straining after some days. [B, 119 (*a*, 38).]—**Unguentum tartari emetici** (seu **stibiati**). See *Unguentum* ANTIMONII *tartarati*.

TARTAUFE (Fr.), n. Ta^{3}r-tof. See SOLANUM *tuberosum* (*esculentum*).

TARTRALIC ACID, n. Ta^{3}r-tra^{2}l′i^{2}k. Fr., *acide tartralique.* Ditartaric acid, $C_8H_{10}O_{11}$. [B, 3 (*a*, 38).]

TARTRAMIC ACID, n. Ta^{3}r-tra^{2}m′i^{2}k. A monobasic acid, $C_4H_7NO_5$. [B, 93 (*a*, 14).]

TARTRAMIDE, n. Ta^{3}rt′ra^{2}m-i^{2}d(id). Fr., *t.* Ger., *Tartramid.* A body, $C_2H_2(OH)_2\langle^{CO.NH_2}_{CO.NH_2} = C_4H_8H_4N_2$, forming rhombic crystals. [B, 4, 93.]

TARTRAS (Lat.), n. f. Ta^{3}rt′ra^{2}s(ra^{3}s). Gen., *-rat′is.* See TARTRATE.—**Pulvis tartratis stibicopotassici** [Fr. Cod.]. Antimony and potassium tartrate pounded in a porcelain mortar and reduced completely to powder on a hard slab. [B, 113 (*a*, 38).]—**Solutio tartratis kalici** [Dan. Ph.]. A filtered solution of 1 part of potassium tartrate in 2 parts of distilled water. [B, 95.]—**Syrupus tartratis ferri et potassæ.** See *Sirop de* TARTRATE *ferrico-potassique*.—**T. antimonicopotassicus.** See ANTIMONY *and potassium tartrate*.—**T. bikalicus, T. bipotassicus.** Normal potassium tartrate. [B.]—**T. boricopotassicus.** See TARTARUS *boraxatus*.—**T. ferrico-ammonicus.** See IRON *and ammonium tartrate*.—**T. ferricokalicus, T. ferricopotassicus.** See IRON *and potassium tartrate*.—**T. ferrosoferricokalicus.** Crude iron and potassium tartrate. [B, 95 (*a*, 38).]—**T. kalico-ammonicus.** See POTASSIUM *and ammonium tartrate*.—**T. kaliconatricus.** Potassium and sodium tartrate. [B, 95 (*a*, 38).]—**T. kalicostibiatus, T. kalicostibicus.** Antimony and potassium tartrate. [B, 95, 119.]—**T. kalicus.** See POTASSIUM *tartrate*.—**T. kalicus acidus.** Acid potassium tartrate. [*a*, 38.]—**T. natricokalicus.** See POTASSIUM *and sodium tartrate*.—**T. potassicoferricus.** Iron and potassium tartrate. [B.]—**T. potassicosodicus.** Potassium and sodium tartrate. [B.]—**T. potassicus.** See POTASSIUM *tartrate*.—**T. sodicopotassicus.** See POTASSIUM *and sodium tartrate*.—**T. stibicokalicus, T. stibicopotassicus.** Antimony and potassium tartrate. [B, 95 (*a*, 38).]—**Tinctura tartratis ferrosopotassici** [Belg. Ph.]. A preparation made by stirring 2 parts of iron filings and 5 of cream of tartar into a pap with water, allowing to digest, boiling for two hours with 15 parts of water, the amount of water which is thus evaporated being replaced, decanting the clear part of the liquid when cold, evaporating to a sp. gr. of 1·26, adding 1 part of 92-per-cent. alcohol, and, after some days, filtering. [B, 95 (*a*, 38).]—**Unguentum tartratis kalicostibici** (seu **stibicokalici**). See *Unguentum* ANTIMONII *tartarati*.—**Vinum tartratis kalicoferrici.** Sp., *vino de tartrato férrico-potásico.* A preparation made by stirring 1 part of powdered iron and 4 parts of cream of tartar into a pap with water, evaporating almost to dryness, repeating the operation on the residue with more water until it becomes black, homogeneous, and almost wholly soluble in water, macerating with 40 parts of water, filtering, evaporating to dryness, powdering, adding 10 times as much white wine, and, after some days, filtering [Netherl. Ph.]; or by dissolving 12 parts of purified iron and potassium tartrate in 900 of stronger white wine [Sp. Ph.]. [B, 95 (*a*, 38).]—**Vinum tartratis stibicokalici.** See *Vinum* ANTIMONII.

TARTRATE, n. Ta^{3}rt′rat. Lat., *tartras.* Fr., *t.* Ger., *Tartrat, weinsaures Salz.* A salt of tartaric acid. Three classes of t's are known: (1) *neutral t's*, in which both the replaceable hydrogen atoms of the acid constituent are replaced by a metal; (2) *acid t's*, in which one of those atoms is so replaced; and (3) *basic t's*, in which the hydrogen of the alcoholic hydroxyl as well as that of the acid constituent is replaced. Tartar emetic is a basic t. [B.]—**Potassic antimonylic t.** Antimony and potassium t. [B, 159.]—**Poudre de t. borico-potassique** [Fr. Cod.] (Fr.). Tartarus boraxatus powdered and sifted through a No. 1 hair sieve. [B, 113 (*a*, 38).]—**Sirop de t. ferrico-potassique** (Fr.). Lat., *syrupus tartratis ferri et potassæ.* Sp., *jarabe de tartrato férrico-potásico.* A preparation containing 1 part each of iron and potassium tartrate and water (cinnamon water [Belg. Ph.]) and 38 parts of syrup [Fr. Cod., Belg. Ph.]; or 3 parts of the tartrate dissolved in water and 200 of syrup [Sp. Ph.]. [B; B, 95 (*a*, 38).]—**T. antimonico-potassique** (Fr.). Antimony and potassium t. [B, 119.]—**T. borico-potassique** (Fr.). See TARTARUS *boraxatus*.—**T. droit** (Fr.). A t. derived from dextrotartaric (ordinary tartaric) acid. [B.]—**T. ferrico-ammonique** [Fr. Cod.] (Fr.). Iron and ammonium t. [B.]—**T. ferrico-potassique** [Fr. Cod.] (Fr.), **T. ferroso-potassique** (Fr.). See IRON *and potassium t.*—**T. mercureux** (Fr.). See MERCURY *t.*—**T. potassico-ammonique** (Fr.). See POTASSIUM *and ammonium t.*—**T. potassico-sodique** (Fr.). See POTASSIUM *and sodium t.*—**Test solution of potassico-cupric t.** [U. S. Ph.]. A preparation made by slowly adding a solution of 6·93 grammes of selected crystals of copper sulphate in 20 c. c. of water to a solution of 36 grammes of potassium t. in 140 c. c. of solution of soda, and bringing up to 200 c. c. with solution of soda. [B, 5 (*a*, 38).]

TARTRE (Fr.), n. Ta^{3}rtr′. See TARTAR.—**Acide du t.** See TARTARIC ACID.—**Sel de t.** See POTASSIUM *carbonate*.—**Solution de crème de t.** See *Solutio* TARTARI *depurati*.—**T. antimonié.** Antimony and potassium tartrate. [B, 119.]—**T. méphitique.** See POTASSIUM *carbonate*.—**T. stygié.** Of Patin, a sarcastic name for tartar emetic. [B.]

TARTRELIC ACID, n. Ta^{3}r-tre^{2}l′i^{2}k. Fr., *acide tartrélique.* Gr., *Tartrelsäure.* A substance, $C_8H_8O_{10}$, isomeric with tartaric anhydride, occurring as deliquescent crystals. [B, 3 (*a*, 38).]

TARTROMEL, n. Ta^{3}rt′ro-me^{2}l. A solution of tartaric acid in honey slightly diluted with water. [B, 14.]

TARTROMETHYLIC ACID, n. Ta^{3}rt-ro-me^{2}th-i^{2}l′i^{2}k. See METHYL*tartaric acid.*

TARTRONIC ACID, n. Ta^{3}r-tro^{2}n′i^{2}k. Fr., *acide tartronique.* Ger., *Tartronsäure.* A dibasic crystalline acid, $C_3H_4O_5 = CH(OH)\langle^{CO.OH}_{CO.OH}$, forming large transparent crystals. [B, 4.]

TARTRONYL, n. Ta^{3}r′tro^{2}n-i^{2}l. The bivalent radicle of tartronic acid, $CH(OH)\langle^{CO'}_{CO'}$. [B.]—**T'urea.** See DIALURIC ACID.

TARTROPHTHALIC ACID, n. Ta^{3}rt-ro-tha^{2}l′i^{2}k. Fr., *acide tartrophtalique.* Ger., *Tartrophtalsäure.* An acid, $C_8H_{12}O_6 = C_6H_8(OH)_2(CO.OH)_2$, occurring as colorless prismatic crystals containing two molecules of water. [B, 3 (*a*, 38).]

TARTROVINIC ACID, n. Ta^{3}rt-ro-vin′i^{2}k. Fr., *acide tartrovinique.* Ger., *Tartroweinsäure.* See ETHYLTARTARIC ACID.

TARTUFLE (Fr.), n. Ta^{3}r-tu^6-fl′. See SOLANUM *tuberosum* (*esculentum*).

TASCHE (Ger.), n. Ta^{3}sh′e^2. 1. A pocket. [*a*, 14.] 2. See SINUS.—**Bauchfell't'n.** See RECESSUS *peritonæi*.—**Duodenalt'.** See *Duodeno-jejunal* FOSSA.—**Haart'.** See *Hair* POUCH and *Hair*-FOLLICLE.—**Hypophysent'.** 1. The depression in the primitive brain which becomes the vesicle of the hypophysis cerebri. [I, 17 (K).] 2. See *Pituitary* DIVERTICULUM. 3. See INFUNDIBULUM (2d def.).—**Kehlkopft', Morgagni'sche T.** See VENTRICLE *of the larynx*.—**T'nförmig.** Purse-like, pouch-like. [L, 31.]

TÄSCHELKRAUT (Ger.), n. Tash′e^{2}l-kra^3-u^{4}t. The genus *Capsella*, especially *Capsella bursa pastoris*. [*a*, 35.]

TASIS (Lat.), n. f. Tas(ta^{3}s)′i^{2}s. Gen., *tas′eos, tas′is.* Gr., τάσις (from τείνειν, to stretch). See EXTENSION.

TASMANNIA (Lat.), n. f. Ta^{3}s-ma^{3}n′i^2-a^3. Fr., *tasmannie.* A genus of the *Magnoliaceæ* included by Bentham and Hooker in *Drimys.* [*a*, 35.]—**T. aromatica.** The pepper-tree of Tasmania, where the berry-like fruits are used in place of pepper and the leaves as an aromatic. The aromatic bark resembles Winter's bark, and is used like it. [*a*, 35.]

TASSENFÖRMIG (Ger.), adj. Ta^{3}s′se^{2}n-fu^{5}rm-i^{2}g. Disc-shaped. [*a*, 35.]

TASTBALLEN (Ger.), n. pl. Ta^{3}st′ba^{3}l-le^{2}n. See PELOTES *tactiles.*

TASTE, n. Tast. Gr., γεῦσις. Lat., *gustus.* Fr., *goût.* Ger., *Geschmack.* The sensation of flavor due to the action of certain exciting substances upon special nerve-endings in the tongue. [K.]—**After-t.** Fr., *après-goût.* Ger., *Nachgeschmack.* A t. perceived after the direct action of the sapid substance has ceased. [K, 3.]—**T.-beakers, T.-buds, T. bulbs, T. cups.** See *T.*-BUDS.—**T.-discs.** Ger., *Geschmackscheiben.* Patches of modified epithelia on the tongues of *Amphibia.* They are usually surrounded by a narrow girdle of ciliated cells, and are abundantly supplied with nerves from the glossopharyngeus. The epithelium is of two kinds: supporting cells, called cup-cells, and the true sensorial cells (forked-cells), which are supposed to be connected with nerve-fibres. [J, 30, 35.]—**T.-pore.** The narrow end or summit of a t.-bud seen on a free surface, usually on the side of a fungiform or foliate papilla. [J, 31, 35.]—**T.-ridges.** See PAPILLÆ *foliatæ*.

TASTERZIRKEL (Ger.), n. Ta^{3}st′e^{2}r-tserk-e^{2}l. See CALIPERS.

TASTGEFÜHL (Ger.), n. Ta^{3}st′ge^2-fu^{6}l. See TOUCH.

TASTMENISKEN (Ger.), n. pl. Ta^{3}st′man-esk-e^{2}n. See *Tactile* MENISCI.

TASTPAPILLEN (Ger.), n. pl. Ta^{3}st′pa^{3}p-el-le^{2}n. See *Nerve* PAPILLÆ and *Tactile* CORPUSCLES.

TASTSINN (Ger.), n. Ta^{3}st′zi^{2}n. The sense of touch.

TASTUNG (Ger.), n. Ta^{3}st′un^2. Examination with the finger.

TATAEIWEISS (Ger.), n. Ta^3′ta^3-i-vis. See under *Egg* ALBUMIN.

TATENHAUSEN (Ger.), n. Ta^{3}t′e^{2}n-ha^3-u^{4}z-e^{2}n. A place in Westphalia where there is a chalybeate spring. [L, 135 (*a*, 14).]

TATOOING, TATTOOING, n's. Ta^{2}t-u′i^{2}n^2. Fr., *tatouage.* Ger., *Tatowirung.* The process of introducing particles of coloring matter into the skin, by punctures or incisions, so as to produce indelible stains. [G, 30.]—**T. of the cornea.** Artificial pigmentation of the cornea (usually with India-ink) for the removal of the cosmetic defect produced by a dense leucoma: done either with several very fine needles bound together or with a single grooved needle. [F.]

TATZMANNSDORF (Ger.), n. Ta^{3}ts′ma^{3}nz-do^{2}rf. A place in Eisenburg County, Hungary, where there is a chalybeate spring.

TAUBENKROPF (Ger.), n. Ta^3′u^{4}b-e^{2}n-kro^{2}pf. See SILENE *inflata*.—**Ackert'.** See SILENE *otites.*

TAUBENNEST (Ger.), n. Ta^3′u^{4}b-e^{2}n-ne^{2}st. See NIDUS (4th def.).

TAUBENWEIZEN (Ger.), n. Ta^3′u^{4}b-e^{2}n-vits-e^{2}n. See SEDUM *album.*

TAUBHEIT (Ger.), n. Ta^3′u^{4}b-hit. See DEAFNESS.—**Seelent'.** See *Psychical* DEAFNESS.

TAUBSTUMMER (Ger.), n. Ta^3′u^{4}b-stum-me^{2}r. See DEAF-MUTE.

TAUBSTUMMHEIT (Ger.), n. Ta^3′u^{4}b-stum-hit. See DEAF-*mutism.*

TAUMEL (Ger.), n. Ta3'u4m-e2l. See REELING.—**T'wahn.** See DRUNKENNESS.

TAUPE (Fr.), n. Top. Any soft tumor of the scalp.

TAURINE, n. Ta4r'en. Fr., *t.* Ger., *Taurin, Gallenasparagin.* Amidisethionic acid; a substance, $C_2H_4(NH_2)SO_3H = C_2H_7NSO_3$, found in the bile and in various animal tissues. It crystallizes in transparent monoclinic prisms. [B; B, 3 (*a*, 38).]

TAUROCARBAMIC ACID, n. Ta4r-o-ka3rb-a2m'i2k. A crystalline acid, $C_3H_8SN_2O_4 = C_2H_4(NH.CO.NH_2)SO_3H$, occurring in the urine after the administration of taurine. [B, 3.]

TAUROCHOLIC ACID, n. Ta4r-o-kol'i2k. Fr., *acide taurocholique.* Ger., *Taurocholsäure.* A monobasic and univalent acid, $C_{26}H_{45}NO_7S$, occurring in bile, forming fine, silky, brilliant and deliquescent needles. [B; B, 93 (*a*, 14).]

TAUROCOLLA (Lat.), n. f. Ta4r(ta3-u4r)-o(o3)-ko2l'la3. From ταῦρος, a bull, and κόλλα, glue. Fr., *taurocolle.* Animal glue, especially that prepared from the ears, etc., of cattle. [L, 50 (*a*, 14).]

TAURUS (Lat.), n. m. Ta4r(ta3'u4r)-u3s(u4s). Gr., ταῦρος. Fr., *taureau* (1st def.). Ger., *Stier* (1st def.). 1. A bull. 2. Of Galen, that part of the penis which extends backward of the scrotum, together with the perinæum. [A, 530.]—**Oleum pedum tauri.** See *Neat's-foot* OIL.

TAURYLIC ACID, n. Ta4r-i2l'i2k. See CRESOL.

TÄUSCHUNG (Ger.), n. Toish'un2. See ILLUSION and DELUSION.

TAUSENDGÜLDENKRAUT (Ger.), n. Ta3'u4z-e2nd-gu6ld-e2n-kra3-u4t. See ERYTHRÆA and ERYTHRÆA *centaurium.*—**T'extract.** See *Extractum* CENTAURII.

TAVELÉ (Fr.), adj. Ta3-v'-la. Spotted. [L, 41 (*a*, 14).]

TAVERNIERA (Lat.), n. f. Ta3v-e2rn-e-e2r'a3. Fr., *tavernierie.* A genus of the *Leguminosæ.* [*a*, 35.]—**T. nummularia.** East Indian moneywort. The leaves are applied to sloughing ulcers. [*a*, 35.]

TAXACEOUS, adj. Ta2x-a'shu3s. Resembling the genus *Taxus;* belonging to the *Taxaceæ*, which are an order of gymnosperms (yews, etc.), now made a series or tribe of the *Coniferæ.* The *Taxeæ* (Fr., *taxées*) are: Of Sprengel, the *Taxaceæ;* of Reichenbach, a family of the *Inconspicuæ*, consisting of the *Casuarineæ, Ephedreæ, Taxineæ* (*Taxaceæ*), and *Myriceæ.* The *Taxideæ*, the *Taxinæ*, and the *Taxineæ* are the *Taxaceæ.* [*a*, 35.]

TAXIDERMY, n. Ta2x'i2-du5rm-i2. From τάξις, arrangement, and δέρμα, the skin. The art of preparing and preserving skins so as to represent the appearance of the living animal. [L, 343.]

TAXINE, n. Ta2x'en. Ger., *Taxin.* A resinous alkaloid obtained from the leaves and berries of *Taxus baccata.* [B, 93 (*a*, 14).]

TAXIS (Lat.), n. f. Ta2x(ta3x)'i2s. Gen., *tax'eos* (*-is*). Gr., τάξις (from τάσσειν, to arrange). Fr., *t.* Ger., *T.* Lit., arrangement; a reduction, especially a methodical pressure by the hand for the purpose of reducing a hernia or other prolapsed structure. [E.]—**Bipolar t.** A form of manipulation employed for reducing a retroverted uterus, in which pressure upward is made upon the body of the organ through the rectum, and the cervix is drawn down through the vagina. [A, 59.]

TAXODIUM (Lat.), n. n. Ta2x(ta3x)-od'i2-u3m(u4m). From τάξος, yew, and εἶδος, resemblance. Fr., *taxodier.* A genus of the *Taxodieæ* (a tribe of the *Coniferæ*). [*a*, 35.]—**T. distichum.** Fr., *cyprès chauve* (ou *de la Louisiane*). Ger., *virginische Cypresse.* Bald (or black, or deciduous) cypress of the southern United States, Mexico, etc., recommended for destroying malarial germs. The tree yields an essential oil, also a resin which is used as an external stimulant. The leaves are applied to tumors, inflamed surfaces, etc., and, together with the seed, are used internally in hepatic disorders. The bark is applied to burns and ulcers. [*a*, 35.]—**T. mucronatum.** Montezuma cypress; a Mexican species. The bark is emmenagogue and diuretic; the leaves are used in scabies and as a resolvent. A liquid pitch obtained from the wood is used in skin diseases. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 770 (*a*, 50); *a*, 35.]

TAXOLOGY, n. Ta2x-o2l'o-ji2. From τάξις, arrangement, and λόγος, understanding. See TAXONOMY.

TAXONOMIC, adj. Ta2x-o-no2m'i2k. Classificatory. [L, 343.]

TAXONOMY, n. Ta2x-o2n'om-i2. Lat., *taxonomia* (from τάξις, arrangement, and νόμος, a law). Fr., *taxonomie.* The science of classification; the arrangement of living organisms in groups according to their degrees of likeness. [L, 11.]

TAXUS (Lat.), n. f. Ta2x(ta3x)'u3s(u4s). Gr., τάξος. Fr., *if.* Ger., *Eibe, Eibenbaum.* 1. Yew (-tree); the typical genus of the *Taxaceæ* (see under TAXACEOUS). [*a*, 35.] 2. See *T. baccata.*—**T. baccata.** Fr., *if* (*commun*, ou *d'Europe*). Ger., *gemeine Eibe.* The common yew of middle and southern Europe and of Asia. The leaves and green branches, formerly official as *folia* (seu *summitates*) *taxi* (*baccatæ*), contain taxine and milossin, and (in sufficient quantity) are a deadly poison; they are still used as an emmenagogue, and in India as an expectorant. The red, succulent cups (*baccæ taxi*) containing the seeds are edible, and were formerly used in the preparation of a pectoral syrup. The seeds, however, are highly poisonous, acting like digitalis. The wood and bark (*lignum* et *cortex taxi*), formerly official, are no longer used. [*a*, 35.]—**T. nucifera.** Fr., *if à amande.* A yew of China and Japan with edible fruits, the stones of which yield a nutritious oil. [*a*, 35.]

TAYNIA, n. In Brazil, a cucurbitaceous plant (probably *Bryonia ficifolia*) used as an evacuant under the name of *abopora do matto.* [*a*, 35.]

TAYUYA, n. In Brazil, the *Bryonia ficifolia* and perhaps other plants; also the drastic fruit and the root (t. root) of *Bryonia ficifolia.* The latter is used as an antisyphilitic. [*a*, 35.]

TEA, n. Te. Chin., *cha.* N. Gr., τεῖ, τσάι. Lat., *thea.* Fr., *thé.* Ger., *Thee.* 1. The dried leaves of *Camellia thea* and its varieties, often further aromatized with the flowers or leaves of the rose, jasmine, sweet-scented olive, etc. T. contains a volatile, citron-yellow oil (from 0·6 to 1 per cent. or more, according to the age of the leaf), tannin, from 0·43 to 5 per cent. of theine (combined, according to Mulder, with tannic acid), boheic acid, quercetin, quercitannic, gallic, and oxalic acids, gum, wax, resin, coloring matter, etc. It is astringent (especially if long infused) and gently exhilarating. Its excessive use produces dyspepsia and nervous derangements. It is sometimes used medicinally in diarrhœa and nervous headache, and in China the leaf is used in fevers. [*a*, 35.] See *Black t.* and *Green t.* 2. An infusion prepared like that of tea. [*a*, 48.]—**Abyssinian t.** The leaves and leafy twigs of *Catha edulis.* [*a*, 35.]—**African t.-plant** (or **-tree**). See LYCIUM *afrum.*—**Australian t.-plant** (or **-tree**). 1. See MELALEUCA. 2. A name for various species of *Leptospermum.* [*a*, 35.]—**Bencoolen t.** (**-plant**). See GLAPHYRIA *nitida.*—**Black t.** T. of a dark-brown color; prepared from leaves which have been allowed to remain in heaps for some hours and undergo a kind of fermentation, and afterward slowly dried. It is less pungent and fragrant than green t. [*a*, 35.]—**Blankenheim t.** Ger., *Blankenheimer Thee.* A proprietary remedy sold in Europe, the principal ingredients of which were species of *Galeopsis.* [L, 65 (*a*, 50).]—**Bohea t.** Ger., *Bohithee.* A variety of black t., so called from the Chinese name (*wu-i*) of the mountains in Fuh-keen, where it is cultivated. [*a*, 35.]—**Bush t.** The leaves of *Cyclopia genistoides* and other species of *Cyclopia.* [*a*, 35.]—**Canadian t.** See under GAULTHERIA *procumbens.*—**Carolina t.-plant.** The *Ilex vomitoria.* [*a*, 35.]—**Cochin-China t.-plant.** The *Teucrium thea.* [*a*, 35.]—**Gout-t.** See CORDIA *globosa.*—**Green t.** T. of a dark-green color; prepared from leaves which have undergone no fermentation, and have been so rapidly dried as not to undergo change in their chlorophyll. Its color, however, is often due to an artificial coloring matter, chiefly a mixture of gypsum and Prussian blue, with which it is glazed. It contains more volatile oil and tannin than black t. [*a*, 35.]—**Jersey t.** The genus *Ceanothus*, especially *Ceanothus americanus.* [*a*, 35.]—**Jesuit's t.** 1. The herb of *Chenopodium ambrosioides.* 2. The *Psoralea glandulosa.* [*a*, 35.]—**Labrador t.** A t. made from the leaves of *Ledum latifolium.* [*a*, 35.]—**Marsh t.** See LEDUM *palustre.*—**Mexican t.** (**-plant**). See *Jesuit's t.*—**Mountain t.** See GAULTHERIA *procumbens.*—**New Zealand t.-plant.** The *Leptospermum flavescens* and *Leptospermum scoparium.* [*a*, 35.]—**Oswego t.** See MONARDA *didyma.*—**Paraguay t.** See ILEX *paraguaiensis.*—**Pectoral t.** See SPECIES *pectorales.*—**T'berry.** The *Gaultheria procumbens.* [*a*, 35.]—**Teamster's t.** See EPHEDRA *antisyphilitica.*—**T. oil.** A fixed oil obtained from the seeds of *Camellia oleifera* and *Camellia japonica.* [*a*, 35.]—**T.-tree.** See THEA (2d def.), THEA *assamica*, and LYCIUM *barbarum.*—**Whorehouse t.** See EPHEDRA *antisyphilitica.*

TEAK, n. Tek. The *Tectona grandis;* also (in Africa) the *Oldfieldia africana*, (in New Zealand) the *Vitex littoralis*, and (in New South Wales) the *Endiandra glauca.* [*a*, 35.]

TEAR, n. Ter. Gr., δάκρυ, δάκρυον. Lat., *lacrima.* Fr., *larme.* Ger., *Thräne.* A drop of the liquid which is secreted by the lacrymal gland and moistens the eyeball. [*a*, 48.]

TEASEL, n. Te'z'l. A plant of the genus *Dipsacus*, also the *Eupatorium perfoliatum.* [*a*, 35.]

TEASING, n. Tez'i2n2. In microscopy, the process of tearing a specimen into small pieces with needles.

TEAT, n. Ti2t. A.-S., *tit.* Gr., θηλή. Lat., *papilla.* Fr., *trayon, tétine* (*tétin* being applied to rudimentary teats). Ger., *Euterzitze.* See NIPPLE.

TEAZEL, n. Te'z'l. See TEASEL.

TECHNOCAUSIS (Lat.), n. f. Te2k(te2ch2)-no(no3)-ka4s'(ka3'-u4s)-i2s. Gen., *-caus'eos* (*-is*). From τέχνη, art, and καῦσις, a burning. The actual cautery. [L, 50 (*a*, 14).]

TECHNOLOGY, n. Te2k-no2l'o-ji2. From τέχνη, art, and λόγος, understanding. The science of the industrial arts. [*a*, 48.]

TECNOCTONIA (Lat.), n. f. Te2k-no2k-ton(to2n)'i2-a3. Gr., τεκνοκτονία (from τεκνοκτονεῖν, to murder children). Fr., *tecnoctonie.* Ger., *Teknoktonie.* Infanticide. [L, 50 (*a*, 14).]

TECNOGONIA (Lat.), n. f. Te2k-no(no3)-gon(go2n)'i2-a3. Gr., τεκνογονία (from τεκνογονεῖν, to bear children). Fr., *tecnogonie.* See GENERATION (1st def.).

TECOLITHUS (Lat.), n. m. Te2k(tak)-o2l'i2th-u3s(u4s). From τήκειν, to melt, and λίθος, a stone. Fr., *técolithe.* Ger., *Judenstein.* A fossil calcareous concretion found in sponges; so called because it was supposed to dissolve urinary calculi. [L, 41, 50 (*a*, 14).]

TECOMA (Lat.), n. f. Ta-kom'a3. From the Mex. name *Tecomatl.* Fr., *técome.* Trumpet-flower (or -creeper); a genus of the *Tecomeæ* (a tribe of the *Bignoniaceæ*). [*a*, 35.]—**T. impetiginosa.** An astringent species. The bark is used in lotions and baths for debility and inflamed joints. [*a*, 35.]—**T. ipé.** A Brazilian species having properties like those of *T. impetiginosa.* The bark is used as an astringent wash and the leaves in ophthalmia. [*a*, 35.]—**T. leucoxylon.** Fr., *cèdre blanc des Antilles.* False ebony, white-wood of the West Indies, white-wood cedar. The flowers and root are said to be alexipharmac and to be used especially against the manchineel poison. The wood yields a green dye. [*a*, 35.]—**T. pentaphylla.** Fr., *poirier des îles* (ou *des Antilles*, ou *de la Martinique*). A species found in the Caribbean Islands. The bark is febrifuge. [*a*, 35.]—**T. radicans.** Fr., *jasmin de Virginie.* Virginian trumpet-flower, trumpet-creeper; a North American climber, considered poisonous. The leaves and branches are used as dyes. [*a*, 35.]—**T. stans.** Fr., *bois pissenlit.* Shrubby trumpet-flower, yellow elder of the West Indies. The root is reputed diuretic. [*a*, 35.]

TECTICUS (Lat.), adj. Te^{2}kt(takt)'i^{2}k-u^{3}s(u^{4}s). Gr., τηκτικός (from τήκειν, to melt). Fr., *tectique.* Ger., *schmelzend.* Colliquative. [L, 50 (*a*, 14).]

TECTOCEPHALIC, adj. Te^{2}kt-o se^{2}f-a^{2}l'i^{2}k. From *tectum*, a roof, and κεφαλή, the head. Pertaining to or possessing a roof-shaped skull (*crâne en toit*). [*a*, 34.]

TECTONA (Lat.), n. f. Te^{2}kt-on'a^3. Fr., *teck.* Ger., *Tekbaum.* A genus of the *Verbenaceæ.* [*a*, 35.]—**T. grandis, T. theka.** Fr., *teck élevé, bois de tek, chêne des Grandes-Indes.* Ger., *riesiger Tekbaum.* East Indian teak-tree (or oak); a tree valued for its hard and durable wood. The acidulous and bitterish leaves are used as an astringent. The flowers and seeds are diuretic. An aromatic oil obtained from the wood is used medicinally. [*a*, 35.]

TECTORIAL, adj. Te^{2}kt-or'i^2-a^{2}l. From *tectum*, a roof. Roofing, covering. [*a*, 48.]

TECTRIX (Lat.), n. f. Te^{2}kt(takt)'ri^{2}x. Gen., *tec'tricis.* From *tegere*, to cover. Fr., *couverture.* A covert (feather); one of the smaller feathers of either the wing or the tail. [L, 343.]—**Tectrices alæ.** The coverts of the wings.—**Tectrices caudæ.** Tail-coverts, the small feathers overlapping the bases of the tectrices. [L, 341 (*a*, 27).]—**Tectrices inferiores.** Under-coverts, the tectrices alæ on the lower surface of the wings; also the tail coverts similarly situated. [L, 221.]—**Tectrices majores.** Greater coverts; the outermost row of small feathers, arising mostly from the forearm, which overlie the bases of nearly all the remiges except the first nine or ten. [L, 221.]—**Tectrices mediæ.** A short row of small feathers immediately above the tectrices majores. [L, 221]. —**Tectrices minores.** Lesser coverts, the uppermost of the tectrices alæ. They are irregularly disposed. [L, 221.]—**Tectrices perversæ.** See *Tectrices mediæ.*—**Tectrices superiores.** The coverts on the upper surface of the wing; also the tail coverts similarly situated. [L, 221.]—**Upper primary tectrices.** The coverts of the primaries; the feathers growing upon the pinion, which cover the bases of the outer nine or ten remiges. [L, 221.]

TECTUM (Lat.), n. n. Te^{2}kt(takt)'u^{3}m(u^{4}m). From *tegere*, to cover. A roof or covering. [*a*, 48.]—**T. fossæ rhomboidalis.** The roof of the fourth ventricle. [I, 73 (K).]—**T. ventriculi quarti.** See VALVE *of Vieussens.*

TECTUS (Lat.), adj. Te^{2}kt(takt)'u^{3}s(u^{4}s). From *tegere*, to cover. Fr., *couvert.* Ger., *bedeckt.* Covered, concealed by other parts or organs. [*a*, 35.]

TEEL, n. In Abyssinia, the *Sesamum orientale.* [*a*, 35.]—**T.-oil.** Oil of sesamum. [*a*, 35.]

TEETHING, n. Teth^2'i^{2}n^2. See DENTITION (2d def.).

TEGENARIA (Lat.), n. f. Te^{2}g-e^{2}n-a^{3}r'i^2-a^3. Fr., *tégénaire.* Ger., *Hausspinne.* A genus of the *Araneida*; the house-spiders. [*a*, 35.]—**T. domestica.** The common European house-spider. This and the larger species, *T. scalaria*, and their web are official as *araneæ* et *tela aranearum*, and were formerly used as a febrifuge (see also TELA *araneæ*). [*a*, 35.]—**T. medicinalis.** 1. An American species used like *T. domestica.* [*a*, 35.] 2. See CANTHARIS *vesicatoria.*

TEGMEN (Lat.), n. n. Te^{2}g'me^{2}n. Gen., *teg'minis.* From *tegere*, to cover. Ger., *Decke.* 1. Any covering or integument, especially the inner coat of an ovule or seed; of De Beauvois, the glume of grasses; a perule or bud-scale; an amphigastrum. [*a*, 35.]—**T. caudicis cerebri.** See TEGMENTUM.—**T. mastoideum.** The lower hollow part of the t. tympani covering the mastoid antrum. [L, 57 (*a*, 14).]—**T. secundinale.** Of Averrhoes, the pia. [I, 3 (K).]—**T. tympani.** Ger., *Paukendecke.* The superior wall or roof of the tympanic cavity, formed by an osseous plate continuous with the superior surface of the pyramid. This plate extends beyond the boundaries of the tympanic cavity, forming part of the superior lamella of the osseous meatus, of the upper wall of the cells of the mastoid process, of the roof of the canal for the tensor tympani, and of the osseous portion of the Eustachian tube. It is pierced by several apertures, and may be in great part wanting. [F, 32.]—**T. ventriculorum.** See CENTRUM *ovale majus.*

TEGMENT [Wilder], n. Te^{2}g'm'nt. See TEGMENTUM.

TEGMENTUM (Lat.), n. n. Te^{2}g-me^{2}nt'u^{3}m(u^{4}m). From *tegere*, to cover. Fr., *t.*, *tegment, coiffe, calotte.* Ger., *Haube, Deckplatte.* 1. The dorsal portion of the crus cerebri, made up of longitudinal bundles of white nerve-fibres interlaced with numerous transverse and arching fibres. In the interstices are collections of gray matter containing ganglion-cells (see NUCLEUS *of the t.*). Certain tracts of fibres in the t. have received distinct names (see *Posterior longitudinal* FASCICULUS and *Arcuate* FIBRES). The t. may be regarded as the prolongation upward of the reticular formation. To one side of it lies the lemniscus. [I, 6 (K).] 2. See TEGMEN.—**T. auris.** See MEMBRANA *tympani.*—**T. caudicis, T. cerebri, T. cruris (cerebri).** See *T.* (1st def.).—**T. tympani.** See TEGMEN *tympani.*—**T. ventriculi lateralis** (seu **ventriculorum cerebri**). See CENTRUM *ovale.*

TEGMINATE, adj. Te^{2}g'mi^{2}n-at. Lat., *tegminatus* (from *tegmen*, a cover). Fr., *tegminé.* Having an inner coat (tegmen).

TEGUMENT, n. Te^{2}g'u^2-m'nt. Lat., *tegumentum* (from *tegere*, to cover). Fr., *tégument.* See INTEGUMENT.

TÉGUMENT (Fr.), n. Ta-gu^6-ma^{3}n^2. See INTEGUMENT.—**T. externe.** The skin. [A, 385.]—**T. interne.** See *Mucous* MEMBRANE.

TEGUMENTAL, TEGUMENTARY, adj's. Te^{2}g-u^2-me^{2}n't'l, -me^{2}nt'e^2-ri^2. Pertaining to, connected with, or constituting an integument. [B, 28 (*a*, 27).]

TEICHOPSIA (Lat.), **TEICHOSCOPIA** (Lat.), n's f. Tik-(te^2-i^{2}ch^2)-o^{2}ps'i^2-a^3, -o(o^3)-skop(sko^{2}p)'i^2-a^3. From τεῖχος, a wall, and ὄψις, vision, or σκοπεῖν, to examine. Fr., *teichopsie.* Ger., *Teichopsie, Teichoscopie.* See HEMIANOPIA *temporaria.*

TEIGNE (Fr.), n. Te^{2}n-y'. 1. See CUSCUTA *europæa.* 2. See PORRIGO and TINEA.—**T. achromateuse.** See VITILIGO.—**T. amiantacée.** See SEBORRHŒA *amianthacea.*—**T. annulaire.** See MYCOSIS *trichophytina.*—**T. aréatée, T. décalvante.** See ALOPECIA *areata.*—**T. faveuse.** See FAVUS.—**T. faveuse scutiforme.** Favus in circumscribed rounded patches. [G.]—**T. faveuse squarreuse.** See FAVUS *granulatus.*—**T. furfuracée.** See PITYRIASIS and PITYRIASIS *capitis.*—**T. granulée.** Of Alibert, eczema impetiginosum and eczema papulosum. [G.] See also PORRIGO *granulata.*—**T. jaune.** See FAVUS.—**T. lycoperdoïde.** A tinea observed in the rabbit, characterized by crusts seated chiefly about the anus and causing death by obstructing defecation. The disease is very contagious among animals, but does not seem capable of development in man. [Mégnin., "Progr. méd.," Apr. 29, 1882, p. 321.]—**T. mucueuse, T. muqueuse.** Lat., *porrigo larvalis.* Impetiginous eczema of the head attended with free discharge and crusting. [G.]—**T. nummulaire.** See MYCOSIS *trichophytina.*—**T. pelade.** See ALOPECIA *areata* and cf. PELADE *achromateuse* and PELADE *décalvante.*—**T. porrigineuse.** See PITYRIASIS and PITYRIASIS *capitis.*—**T. sycosique.** See SYCOSIS *parasitaria.*—**T. tondante.** See TRICHOMYCOSIS *circinata.*

TEIGNEUX (Fr.), adj. Te^{2}n-yu^5. See FARREUS.

TEINACH (Ger.), n. Tin'a^{3}ch^2. A place in the Black Forest district, Germany, where there are chalybeate springs. [*a*, 14.]

TEINESMUS (Lat.), n. m. Tin(te^2-i^{2}n)-e^{2}z(e^{2}s)'mu^{3}s(mu^{4}s). Gr., τεινεσμός (from τείνειν, to stretch). See TENESMUS.

TEINODYNIA (Lat.), n. f. Tin(te^2-i^{2}n)-o(o^3)-di^{2}n(du^{6}n)'i^2-a^3. From τείνειν, to stretch, and ὀδύνη, pain. Fr., *teinodynie.* Pain in the tendons. [L, 50 (*a*, 14).]

TEINOPHLOGOSIS (Lat.), n. f. Tin(te^2-i^{2}n)-o(o^3)-flo^{2}g-os'i^{2}s. Gen., *-os'eos* (*-is*). From τείνειν, to stretch, and φλόγωσις, a burning. Fr., *teinophlogose.* Inflammation of a tendon. [E.]

TEINTURE (Fr.), n. Ta^{2}n^2-tu^{6}r. See TINCTURE and DYE.—**T. alcoolique.** A tincture; of the Fr. Cod., an alcoholic solution either of a fixed or of a volatile principle, thus corresponding both to the tincture and the spirit of the U. S. Ph. [B.]—**T. amère.** See *Tinctura* GENTIANÆ *composita* and TINCTURA *amara.*—**T. antigoutteuse de Want.** See *Tinctura* COLCHICI.—**T. antimoniale de Jacobi.** See *Tinctura* ANTIMONII *saponata.*—**T. antiscorbutique.** See *T. de* RAIFORT *composée.*—**T. antivénérienne.** A preparation made by dissolving 5 parts of corrosive sublimate in 480 of rectified alcohol, mixing with a solution of 120 parts each of Venice turpentine and guaiac resin in 480 of alcohol, and adding 28 of oil of sassafras. Sometimes Canadian turpentine was used, and the amount of alcohol varied. [B, 119 (*a*, 38).]—**T. aromatique sulfurique.** See ACIDUM SULPHURICUM *aromaticum.*—**T. balsamique.** See *Tinctura* BENZOINI *composita.*—**T. bleue.** See COPPER *ammoniosulphate.*—**T. de Bestuscheff.** See *Tinctura* FERRI *chlorati ætherea.*—**T. de Panama** [Fr. Cod.]. A preparation made by macerating quillaia-bark with 5 times as much 80-per-cent. alcohol for ten days, expressing, and filtering. [B, 95 (*a*, 38).] —**T. de Williams.** See *Vinum* COLCHICI *seminis.*—**T. éthérée.** See ÉTHÉROLÉ.—**T. française.** See DROGUE *amère.*—**T. gingivale.** See *Tinctura* CATECHU *composita* (2d def.).—**T. noire.** See *Black* DYE.—**T. thébaïque.** See *Tinctura* OPII.—**T. thériacale composée.** See *Aqua* SCORDII *composita.*—**T. tonique (de Whytt).** See *Tinctura* CINCHONÆ *composita.*—**T. vulnéraire.** See ALCOOLATURE *vulnéraire.*—**T. vulnéraire de Stahl.** See BALSAMUM *vulnerarium Stahlii.*

TEISSIÈRES-LES-BOULIES (Fr.), n. Te^2-se-e^{2}r-la-bu-le. A place in the department of Cantal, France, where there is an alkaline and sulphurous spring. [L, 41, 49 (*a*, 14).]

TEKBAUM (Ger.), n. Te^{2}k'ba^3-u^{4}m. See TECTONA.

TELA (Lat.), n. f. Tel(tal)'a^3. Probably from *texere*, to weave. 1. A web. 2. See TISSUE.—**T. araneæ, T. aranearum.** Spider's web, especially that of *Tegenaria domestica* and *Tegenaria medicinalis*; a cobweb. It has been used as a febrifuge and antispasmodic, also as a hæmostatic application. [*a*, 35.]—**T. cartilaginea.** See CARTILAGE.—**T. cellularis.** See *Areolar* TISSUE and *Cellular* TISSUE.—**T. chorioidea.** Ger., *Gefässvorhang.* See VELUM *interpositum.*—**T. chorioidea cerebelli.** See *T. chorioidea inferior.*—**T. chorioidea cerebri.** See *T. chorioidea superior.*—**T. chorioidea inferior.** Ger., *unterer Gefässvorhang.* The portion of the pia from which the chorioid plexus of the fourth ventricle springs. [L, 332.] See VALVE *of Vieussens.*—**T. chorioidea media.** The chorioid plexus of the third ventricle. [I, 44 (K).]—**T. chorioidea superior.** The portion of the chorioid plexus which enters the cavities of the cerebrum through the transverse fissure. [I, 6 (K).]—**T. chorioidea ventriculi quarti.** See *T. chorioidea inferior.*—**T. conjunctoria, T. connectiva.** See *Connective* TISSUE.—**T. contexta.** See FILZ*gewebe.*—**T. cornea.** See *Corneous* TISSUE.—**T. flava.** See *Elastic* TISSUE.—**T. fulcralis.** See *Connective* TISSUE.—**T. Gaulthieri.** See *Sparadrap* DIAPALME.—**T. hæmalis** [Haeckel]. Ger., *Blutgewebe.* A term for lymph-cells and blood-corpuscles, also for the tissue of the spleen and other so-called blood-glands. ["Jena. Zeit.," 1884, p. 206 (J).]—**T. hymenochondrodes, T. hymenochondroides.** See CARTILAGE.—**T. inferior.** See *T. chorioidea inferior.*—**T. medullaris.** See *Medullary* TISSUE and *Medullary* SUBSTANCE.—**T. nervea.** See *Nervous* TISSUE.—**T. ossea.** See *Osseous* TISSUE. —**T. sexualis.** Ger., *Germinalgewebe.* Germinal tissue; ova and spermatozooids. [Haeckel, "Jena. Zeit.," 1884, p. 206 (J).]—**T. subcutanea.** See *Subcutaneous connective* TISSUE.—**T. subserosa.** Subserous connective tissue. [L.]—**T. tegmentalis** [Haeckel]. Ger., *Deckengewebe.* A general term for the epidermis and its appendages (hair, nails, etc.) and the epithelium and endothelium of the body. ["Jena. Zeit.," 1884, p. 206 (J).]—**T. vasculosa.** See *Chorioid* PLEXUS.—**T. vesicatoria** [Swed. Ph., 1879]. See SPARADRAP *vesicans.*

TELÆSTHESIA (Lat.), n. f. Te^{2}l(tal)-e^{2}s(a^3-e^{2}s)-thez(thas)′-i^2-a^3 From τῆλη, afar, and αἴσθησις, sensation. See TELEPATHY.

TELANGEIECTASIA (Lat.), **TELANGEIECTASIS** (Lat.), n's f. Te^{2}l-a^{2}n(a^{3}n^2)-ji(ge^2-i^2)-e^{2}kt-az(a^{3}s)′i^2-a^3, -e^{2}kt′a^{2}s(a^{3}s)-i^{2}s. Gen., *-as′iæ*, *-as′eos* (*-ect′asis*). From τέλος, the end, ἀγγεῖον, a vessel, and ἔκτασις, extension. Fr., *télangiectasie*. Ger., *Telangiektasie*. A dilatation of the extremities of blood-vessels or of the capillary vessels. [E.] Cf. NÆVUS.

TELANGEIOSIS (Lat.). n. f. Te^{2}l-a^{2}n(a^{3}n^2)-ji^2(ge^2-i^2)-os′i^{2}s. Gen., *-os′eos* (*-is*). From τέλος, the end, and ἀγγεῖον, a vessel. Fr., *télangiose*. A diseased condition of the capillary blood-vessels. [α, 37.]

TELANTHERA (Lat.), n. f. Te^{2}l-a^{2}nth(a^{3}nth)-er(ar)′a^3. A genus of the *Amarantaceæ*. [α, 35.]—**T. polygonoides.** A plant found in the southern United States; used as a diuretic and in strangury. [α, 35.]

TELEAMORPHA (Lat.), n. f. Tel(te^{2}l)-e^2-a^3-mo^{2}rf′a^3. From τέλεος, complete, and ἄμορφος, misshapen. See ACMÆAMORPHA.

TELEANGEIECTASIS (Lat.), n. f. Tel(te^{2}l)-e^2-a^{2}n(a^{3}n^2)-ji^2-(ge^2-i^2)-e^{2}kt′a^{2}s(a^{3}s)-i^{2}s. Gen., *-tas′eos* (*-ect′asis*). See TELANGEIECTASIS.

TELEGRAPH, n. Te^{2}l′e^2-gra^{3}f. From τῆλε, afar, and γράφειν, to write. Ger., *T.* An apparatus for conveying information to a distance, especially for conveying it very rapidly. [α, 48.]—**Muscle-t.** Of Du Bois-Reymond, an apparatus for recording muscular contractions. The muscle is fixed by one of its ends to a vise, while to the other end is fastened a thread which is passed around a wheel. As the muscle contracts, the wheel revolves and carries around an indicator which is attached to it. [K, 35.]

TELEIANTHIS (Lat.), adj. Te^{2}l-i(e^2-i^2)-a^{2}n(a^{3}n)′thi^{2}s. From τέλεος, complete, and ἄνθος, a flower. Having perfect flowers. [α, 35.]

TELEOLOGY, n. Te^{2}l-e^2-o^{2}l′o-ji^2. Lat., *teleologia* (from τέλος, the end, and λόγος, understanding). Fr., *téléologie*. Ger., *Teleologie*. The doctrine of design or of adaptation to purpose. [L, 146.] Cf. DYSTELEOLOGY.

TELEOTHERAPEUTICS, n. Te^{2}l-e^2-o-the^{2}r-a^{2}p-u^{2}t′i^{2}ks. From τῆλε, afar, and θεραπευτική, therapeutics. The treatment of disease by bringing near the affected persons stoppered bottles containing the remedies usually employed. A form of suggestive therapeutics. ["Ther. Gaz.," 1886, p. 761 (α, 34).]

TELEOTYPE, n. Te^{2}l′e^2-o-tip. From τέλος, the end, and τύπος, a type. Of Coues, a type existing at the present time, its precedent forms being its prototypes, and it itself being the prototype of forms derived from it. [L, 221.]

TELEPATHY, n. Te^{2}l-e^{2}p′a^{2}th-i^2. From τῆλε, afar, and πάθος, feeling. A sympathetic sensation felt by one person in fancied connection with an occurrence happening to another at a distance. [A. Carver, "Boston Med. and Surg. Jour.," Apr. 2, 1885, p. 329.]

TELEPHIC, adj. Te^{2}l-e^{2}f′i^{2}k. For deriv., see TELEPHIUM. Fr., *téléphien*. Ger., *telephisch*, *unheilbar*. See MALIGNANT.

TELEPHIUM (Lat.), n. n. Te^{2}l(tal)-e^{2}f′i^2-u^{3}m(u^{4}m). Gr., τηλέφιον (3d def.). From the mythical *Telephus*, son of Hercules, said by Homer to have suffered from t. (1st def.) after being wounded by Achilles. 1. An old ulcer (cf. ACHILLEUM [1st def.]). [E.] 2. A genus of the *Portulacaceæ*. 3. An old name for the genus *Sedum*. [α, 35.]

TELEPHONE, n. Te^{2}l′e^2-fon. From τῆλε, afar, and φωνή, a sound. Fr., *téléphone*. Ger., *Telephon*. An apparatus for conveying articulate sounds to a distance, especially by means of electricity. [α, 48.]

TELESPHORESIS (Lat.), n. f. Te^{2}l-e^{2}s-fo^{2}r-e(a)′si^{2}s. Gen., *-es′eos* (*-is*). Gr., τελεσφόρησις (from τέλος, the end, and φορεῖν, to bear). Fr., *télésphorèse*. Complete fœtal maturation. [L, 50 (α, 14).]

TELESTEREOSCOPE, n. Te^{2}l-e^2-ste^{2}r′e^2-o-skop. From τῆλε, afar, στερεός, solid, and σκοπεῖν, to examine. Fr., *téléstéréoscope*. Ger., *Telestereoskop*. A stereoscope for viewing very distant objects by the artificial increase of the interocular distance by means of four plane mirrors so fixed in a box as to admit of slight rotation, and thus bring the images into coincidence. [F.]

TELEUTOSPORES, n. pl. Te^{2}l-u^{2}t′o-sporz. From τελευτή, a finishing, and σπορά, a spore. Ger., *Teleutosporen*. Secondary spores produced by the *Uredineæ* late in the season. [α, 35.] See under *Corn*-MILDEW.

TELFAIRIA (Lat.), n. f. Te^{2}l-fa^{2}r′i^2-a^3. Fr., *telfairie*. A genus of climbing shrubs constituting a tribe (*Telfairiæ*) of the *Cucurbitaceæ*. [α, 35.]—**T. pedata.** Fr., *liane de joliff*. A bitter, tonic species indigenous to eastern tropical Africa, cultivated for the bland edible oil extracted from its seeds. [α, 35.]

TELLENHYDRIC, adj. Te^{2}l-e^{2}n-hid′ri^{2}k. Hydrotelluric. [B.]

TELLERFLECHTE (Ger.), n. Te^{2}l′le^{2}r-fle^{2}ch^{2}t-e^2. See LECIDEA.

TELLERFÖRMIG (Ger.), adj. Te^{2}l′le^{2}r-fu^{5}rm-i^{2}g. See HYPOCRATERIFORM.

TELLUR (Ger.), n. Te^{2}l-lur′. See TELLURIUM.—**T'wasserstoff.** See HYDROTELLURIC ACID.

TELLURAMYL, n. Te^{2}l-u^{2}r′a^{2}m-i^{2}l. See AMYL *telluride*.

TELLURATE, n. Te^{2}l′u^{2}r-at. A salt of telluric acid. [B, 3.]

TELLUR-ETHYL, n. Te^{2}l′u^{2}r. Fr., *telluréthyle*. See ETHYL *telluride*.

TELLURETED, adj. Te^{2}l′u^{2}r-e^{2}t-e^{2}d. Containing or combined with tellurium. [B.]

TELLURIC ACID, n. Te^{2}l-u^{2}r′i^{2}k. Fr., *acide tellurique*. Ger., *Tellursäure*. A dibasic acid, H_2TeO_4. When combined with water it forms the crystalline hydrated acid, $H_2TeO_4 + 2H_2O$. [B, 3.]

TELLURIDE, n. Te^{2}l′u^{2}r-i^{2}d(id). Fr., *telluriure*, *tellurure*. Ger., *Tellurid*. A compound of an element or radicle directly with tellurium. [B.]

TELLURISME (Fr.), n. Te^{2}l-u^{6}r-es-m′. The induction of disease by emanations from the soil. [A, 385 (α, 48).]

TELLURITE, n. Te^{2}l′u^{2}r-it. A salt of tellurous acid. [B.]

TELLURIUM (Lat.), n. n. Te^{2}l-lu^{2}r(lur)′i^2-u^{3}m(u^{4}m). From *tellus*, the earth. Fr., *tellure*. Ger., *Tellur*. A non-metallic element, first identified as an elementary body toward the close of the last century, but known to mineralogists earlier. Its name was given to it by Klaproth in 1798. T. occurs in nature in the free state, and also combined with the metals. It is a bluish-white, brittle substance, of metallic lustre, which can be obtained in the crystalline form. In combination it acts as a bivalent, quadrivalent, or sexvalent radicle, its compounds bearing a close chemical relation to those of sulphur. It melts at about 500° C. Symbol, Te; atomic weight, 128; sp. gr., 6·24. [B.]

TELLURO-HUMAIN (Fr.), adj. Te^{2}l-u^{6}r-o-u^{6}m-a^{2}n^2. Of tetanic infection, conveyed from the earth or the soil to man. [α, 18.] Cf. INTERHUMAIN.

TELLUROSEL (Fr.), n. Te^{2}l-u^{6}r-o-ze^{2}l. A salt in which the acid element is tellurium. [B, 38 (α, 14).]

TELLUROUS ACID, n. Te^{2}l′u^{2}r-u^{3}s. Fr., *acide tellureux*. Ger., *tellurige Säure*, *Telluroxyd*. A dibasic acid, H_2TeO_3, a white solid, soluble with difficulty in water. [B, 3.]

TELLURURE (Fr.), n. Te^{2}l-u^{6}r-u^{6}r. See TELLURIDE.

TELOLECITHAL, adj. Te^{2}l-o-le^{2}s′i^2-th′l. From τέλος, the end, and λέκιθος, the yolk of an egg. Having the nutritive yolk concentrated at the vegetative pole of an ovum. [L, 201.]

TELORASIS (Lat.), n. f. Tel(te^{2}l)-o^{2}r-a(a^3)′si^{2}s. Gen., *-as′eos* (*-is*). From τῆλε, afar, and ὅρασις, a seeing. Fr., *télorase*. See PRESBYOPIA.

TÉMOIN (Fr.), n. Ta-mwa^{2}n^2. Lit., a witness: a person or animal that has been subjected to experiment to test the process; a test-animal; a test-case.

TEMPE (Fr.), n. Ta^{3}n^{2}p. See TEMPLE.

TEMPERAMENT, n. Te^{2}mp′e^{2}r-a^3-m'nt. Lat., *temperamentum*. Fr., *tempérament*. Ger., *Beschaffenheit*, *Körperanlage*. Peculiarity of constitution, embracing the humor or frame of mind, the mode of manifestation of the activity of the brain, etc. [D, 3.]—**Atrabiliary t.** See *Melancholic t.*—**Biliosanguine t.** A combination of the bilious and sanguine t's. [α, 48.]—**Bilious t.** Of the humoralists, a mental condition ascribed to the influence of bile on the brain's action. [α, 34.]—**Choleric t.** A t. in which there are great activity of the voluntary muscles, a tense, firm habit of body, great irritability, and strong passions. [D, 3.]—**Insane t.** A neurotic condition in which there is a tendency to insanity. [α, 34.]—**Leucophlegmatic t.** A systemic condition characterized by a tendency to and symptoms of leucophlegmasia. [α, 34.]—**Lymphatic t.** See *Phlegmatic t.*—**Lymphatico-sanguine t., Lymphatic-sanguine t.** A t. that is in part phlegmatic and in part sanguine. [α, 48.]—**Melancholic t.** A t. marked by slight irritability united with strong capacity for reacting to sensory excitations, and by great persistence of the frame of mind, especially that of dullness or sullenness. [D, 3.]—**Nervous t.** A t. characterized by marked sensitiveness of the nervous system. [α, 48.]—**Phlegmatic t., Quiet t.** A t. characterized by flabby muscles (when in repose), want of energy in the involuntary muscles, turgescence of the tissue, a disposition to adipose deposit, small or slow reaction to psychic excitation, slightly developed passions, and little sensibility to bodily suffering. [D, 3.]—**Sanguine t.** A t. characterized by marked irritability, great liability of the nervous system to exhaustion, and sudden changes in the activity of the special senses and in humor. [D, 3.]—**Sentimental t.** See *Melancholic t.*

TEMPERAMENTUM (Lat.), n. n. Te^{2}m-pe^{2}r-a^2(a^3)-me^{2}nt′-u^{3}m(u^{4}m). From *temperare*, to regulate. A proper measure, moderation, temperament. [α, 48.]—**Tortile t.** Of Tertullian, an ancient screw-like instrument for dilating the vagina. [A. R. Simpson, "Brit. Med. Jour.," Dec. 13, 1884, p. 1178.] See COCHLEA (4th def.).

TEMPÉRANT (Fr.), adj. Ta^{3}n^2-pa-ra^{3}n^2. Tending to modify excessive activity of the circulation. [A, 385 (α, 48).]

TEMPERATURE, n. Te^{2}mp′e^{2}r-a^{2}t-u^{2}r. Gr., κρᾶσις. Lat., *temperatura*, *temperies* (from *temperare*, to regulate). Fr., *température*. Ger., *Temperatur*. The degree of the heat of a body expressed in terms of some recognized standard. [D.]—**Absolute t.** T. measured from the absolute zero (*i. e.*, °C.). [B.]—**Animal t.** Ger., *Körperwärme*. The normal t. of the healthy adult. It is nearly constant in warm-blooded animals. [B.]—**Body-t.** The t. of the body. It may be external or surface t. (measured, *e. g.*, in the axilla) or internal, the latter being indicated by the t. in one of the cavities of the body (*e. g.*, the mouth or the rectum). [D.]—**Hyperpyretic t.** An axillary t. between 41° C. and 41·5° C. [D, 3.]—**Non-febrile t.** An axillary t. between 38·1° C. and 38·5° C. [D, 3.]—**Normal t.** See *Animal t.*—**Postmortem t.** The temporary production of increased heat in the dead body. It is said to be caused by the solidification of the muscles, by a series of chemical processes, or by diminution of the loss of heat after death. [α, 25.]—**T.-regulator.** See *Cold-water* COIL.

TEMPLE, n. Te^{2}m′p'l. Gr., κρόταφος. Lat., *tempus*. Fr., *tempe*. Ger., *Schläfe*. The flattened or slightly hollowed area on the side of the head just above the zygomatic arch. [C, 1.]

TEMPLIN-OIL, n. Te^{2}mp′li^{2}n. Fr., *huile de templin*. Ger., *Templinöl*. See OLEUM *templinum* and KRUMMHOLZÖL.

TEMPORAL, adj. Te^{2}mp′o^2-r'l. Lat., *temporalis*. Fr., *t.* Pertaining to, or in relation with the temples. [C.]

TEMPORALIS (Lat.), adj. Te2mp-o2r-al(a3l)'i2s. See TEMPORAL; as a n., the temporal muscle, a strong, flat, fan-shaped muscle which arises from the inferior temporal line, the larger part of the temporal fossa, and the inner surface of the temporal fascia, and is inserted by a tendon into the internal surface and anterior border of the coronoid process of the inferior maxilla. Its action is to close the jaws. [L, 142, 332.]—**T. minor.** A small anomalous muscle attached to the interarticular fibro-cartilage of the temporo-maxillary joint, and arising from the inferior maxilla or as an offshoot of the masseter or t. [L, 332.]

TEMPORALKANTE (Ger.), n. Te2mp-or-a3l'ka3nt-e2. The edge of a temporal convolution. [K.]—**Obere T.** The edge of the superior temporo-sphenoidal convolution. [I, 17 (K).]—**Untere T.** The edge of the inferior temporo-sphenoidal convolution. [I, 17 (K).]

TEMPORALLAPPEN (Ger.), n. Te2mp-or-a3l'la3p-pe2n. See *Temporo-sphenoidal* LOBE.

TEMPORO-AURICULAIRE (Fr.), n. Ta3n2-po-ro-o-re-ku6-la2r. See ATTOLLENS *aurem.*

TEMPORO-AURICULAR, adj. Te2mp-o2r-o-a4r-i2k'u2l-a3r. Lat., *temporo-auricularis.* Fr., *temporo-auriculaire.* Pertaining to or connected with the temporal bone or region and the ear. [L.]

TEMPORO-AURICULARIS (Lat.), n. m. Te2mp"o2r-o(o3)-a4r(a3-u4r)-i2k-u2l(u4l)-ar(a3r)'i2s. From *tempus*, the temple, and *auricula*, the external ear. See TEMPORO-AURICULAR; as a n., see ZYGOMATO-AURICULARIS.—**T.-a. externus.** Fr., *adducteur de l'oreille.* Ger., *Einwärtszieher des Ohres.* A muscle of the lower animals, arising from the parietal crest and attached to the scutal and conchiform cartilages of the ear. It adducts the ear. [L.]—**T.-a. internus.** Fr., *élévateur moyen de l'oreille.* Ger., *mittlerer Heber des Ohres, Vorderhauptmuskel der Muschel.* A muscle of the lower animals, arising from the sagittal ridge of the parietal bone and attached to the inner side of the concha of the ear. It adducts the ear. [L.]

TEMPORO-CONCHINIEN (Fr.), n. m. Ta3n2-po-ro-ko2n2-ke-ne-a3n2. See ATTOLLENS *aurem.*

TEMPORO-FACIAL, adj. Te2mp-o2r-o-fa'si2-'l. From *tempus*, the temple, and *facies*, the face. Pertaining to the temple and the face. [α, 48.]

TEMPORO-FRONTAL, adj. Te2mp-o2r-o-fru3n't'l. From *tempus*, the temple, and *frons*, the forehead. Pertaining to the temple and the forehead. [α, 48.]

TEMPORO-GENAL, TEMPORO-MALAR, adj's. Te2mp-o2r-o-je'n'l, -mal'a3r. From *tempus*, the temple, and *gena*, the cheek, or *mala*, the cheek-bone. Pertaining to or connected with the temporal and malar bones or regions. [L; α, 48.]

TEMPOROMAXILLARIS (Lat.), n. m. Te2mp"o2r-o(o3)-ma2x(ma3x)-i2l-lar(la3r)'i2s. From *tempus*, the temple, and *maxilla* (*q. v.*). Fr., *temporo-maxillaire.* See TEMPORALIS.

TEMPORO-MAXILLARY, adj. Te2mp-o2r-o-ma2x'i2l-ar-i2. Lat., *temporomaxillaris.* Fr., *temporo-maxillaire.* Pertaining to or connected with the temporal bone or region and the maxilla. [L.]

TEMPORO-OCCIPITAL, adj. Te2mp-o2r-o-o2k-si2p'i2-t'l. From *tempus*, the temple, and *occiput*, the occiput. Pertaining to the temporal and occipital bones or regions. [L; α, 48.]

TEMPORO-PARIETAL, adj. Te2mp-o2r-o-pa2r-i'e2-t'l. Pertaining to the temporal and parietal bones. [α, 48.]

TEMPORO-SPHENOIDAL, adj. Te2mp-o2r-o-sfe2n-oi'd'l. Pertaining to the temporal and sphenoid bones. [α, 48.]

TEMPS (Fr.), n. Ta3n2. Ger., *Akt* (2d def.). 1. Time. 2. A stage or step in a process.—**Cinquième t. d'accouchement.** 1. That step in the process of parturition by which the expulsion of the fœtus is completed after the presenting part has been expelled. [A, 24.] 2. The movement of restitution of the presenting part.—**Deuxième t. d'accouchement.** That step in the process of parturition that includes the descent of the presenting part of the fœtus to the lower portion of the pelvic canal. [A, 24.]—**Premier t. d'accouchement.** That step in the process of parturition by which the presenting part of the fœtus is so compressed and directed as to facilitate its engagement. [A, 15, 24.]—**Quatrième t. d'accouchement.** 1. That step in the process of parturition by which the expulsion of the presenting part of the fœtus is accomplished. 2. According to P. Dubois, that step which consists in the extension of the child's head. [A, 24.]—**Sixième t. d'accouchement.** Syn.: *expulsion du tronc.* Of Tarnier, that step in the process of parturition which consists in the expulsion of the trunk. [A, 24.]—**T. d'accouchement.** The several steps in the process of parturition.—**T. d'amoindrissement.** See *Premier t. d'accouchement.*—**T. de déflexion, T. de dégagement.** See *Quatrième t. d'accouchement* (2d def.).—**T. de descente.** See *Deuxième t. d'accouchement.*—**T. de flexion.** See *Premier t. d'accouchement.*—**T. d'engagement.** See *Deuxième t. d'accouchement.*—**T. de restitution, T. de rotation extérieure.** See *Cinquième t. d'accouchement.*—**T. de rotation interne.** See *Troisième t. d'accouchement.*—**T. d'extension.** See *Quatrième t. d'accouchement* (2d def.).—**T. secret.** The premonitory stage of labor. [A, 88.]—**Troisième t. d'accouchement.** The rotation of the fœtus in its passage through the pelvic canal. [A, 24.]

TEMULENCE, n. Te2m'u2l-e2ns. Lat., *temulentia* (from *temulentus*, intoxicated). See DRUNKENNESS.

TEMULENTIC ACID, n. Te2m-u2l-e2nt'i2k. Ger., *Temulentinsäure.* A crystalline acid, $C_{12}H_{42}NO_{19}$, contained in the alcoholic extract of the seeds of *Lolium temulentum.* It is the agent to which the vertiginous symptoms produced by *Lolium temulentum* are due. In rabbits it causes dyspnœa, lowering of the temperature, enfeebled heart's action, and, in doses of 4 centigrammes, death. [P. Antze, "Ctrlbl. f. d. med. Wssnsch.," Apr. 26, 1890, p. 317 (B).]

TEMULENTINE, n. Te2m-u2l-e2nt'en. Fr., *t.* Ger., *Temulentin.* A base produced by boiling temulentic acid with alkalies. [P. Antze, "Ctrlbl. f. d. med. Wssnsch.," Apr. 26, 1890, p. 317 (B).]

TENACULUM (Lat.), n. n. Te2n-a2k(a3k)'u2l(u4l)-u3m(u4m). From *tenere*, to hold. Fr., *ténaculum, crochet* (2d def.), *tenaille* (2d and 3d def's). Ger., *Haltzange* (3d def.). 1. An instrument recommended by Hieronymus Mercurialis for extracting the fœtus by the breech. [A, 20.] 2. A sharp pointed hook with a handle; used for seizing an artery. [E, 6.] 3. A holder, especially one made like a forceps.—**Assalini's t.** An instrument similar to the

TENACULUM.

DOUBLE TENACULUM.

modern artery forceps. [E.]—**Byrne's double-spring t.** A slender t. with four hooks, opening and shutting like the blades of a forceps; generally used in the rectum. [E.]—**Keith's t.** A t. that unscrews at the handle. [α, 34.]—**Knife-blade t.** A t.-like instrument having a blade instead of a hook. [" N. Y. Med. Jour.," June 23, 1888, p. 693 (α, 34).]—**T. nervi hypoglossi.** See LIGAMENTUM *nervi.*—**Tenacula tendinum.** See VINCULA *tendinum.*

TENDILEMMA (Lat.), n. m. Te2nd-i2-le2m'ma3. Gen., *-lem'matos* (*-is*). From *tendo*, a tendon, and *lemma* (*q. v.*). The amorphous elastic covering of the inoblast. [L, 332.]

TENAILLE (Fr.), n. T'-na3-el-y'. See TENACULUM (2d and 3d def's).—**T. incisive.** See *Bone* FORCEPS.

TENALGIA (Lat.), n. f. Te2n-a2lj(a3lg)'i2-a3. From τένων, a tendon, and ἄλγος, pain. Fr., *ténalgie.* Ger., *Tenalgie.* Pain in the tendons. [α, 17.]—**T. crepitans.** See TENOSYNOVITIS (2d def.).

TENASMUS (Lat.), n. m. Te2n-a2z(a3s)'mu3s(mu4s). See TENESMUS.

TENAX (Lat.), n. m. Ten(te2n)'a2x(a3x). Gen., *-ac'is.* Oakum a little better carded and slightly more tarred than the ordinary commercial article; used as a dressing for wounds. [E.]

TENDER, adj. Te2nd'u6r. Gr., ἁπαλός. Lat., *tener.* Fr., *tendre.* Ger., *zart, empfindlich.* 1. Delicate, easily broken. 2. Susceptible to painful impressions; especially, painful to the touch. [D.]

TENDINOSUS [Coues] (Lat.), n. m. Te2nd-i2n-os'u3s(u4s). From *tendo*, a tendon. See SEMITENDINOSUS.

TENDINOUS, adj. Te2nd'i2n-u3s. Lat., *tendineus, tendinosus* (from *tendo*, a tendon). Fr., *tendineux.* Ger., *sehnig.* Pertaining to, resembling, or constituting a tendon; made up of tendon-like tissue. [C.]

TENDO (Lat.), n. m. Te2nd'o. Gen., *tend'inis.* See TENDON.—**Quintus t. extensoris longi digitorum pedis.** See PERONÆUS *quintus.*—**T. Achillis** Fr., *corde d'Hippocrate.* Ger., *Achillessehne.* The thickest and strongest tendon of the body, made up by the union of the tendons of the gastrocnemius and solæus muscles, and inserted into the middle of the posterior surface of the tuberosity of the os calcis. [C.]—**Tendines coronarii.** Fibrous rings surrounding the openings of the aorta and the pulmonary artery. [L.]—**T. intermedius (diaphragmatis).** See *Cordiform* TENDON.—**T. oculi, T. palpebræ.** See LIGAMENTUM *palpebrale internum.*—**T. valvulæ Eustachii.** A ligamentous band in the volvula Eustachii. [L, 332.]

TENDON, n. Te2n'd'n. Gr., τένων. Lat., *tendo.* Fr., *t., nerf.* Ger., *Sehne.* A bundle of fibrous tissue of varying shape, which serves as an origin or attachment for a muscle or is interposed between portions of it. [L.]—**Accessory t's of the extensor communis digitorum.** The offshoots of the t. of the extensor digitorum manus communis which pass to those of the ring and little fingers. [L.]—**Central t. of the diaphragm, Cordiform t.** The white aponeurotic centre of the diaphragm, having a posterior concave margin and an anterior convex margin slightly notched on each side so as to give it the shape of a trefoil. [L.]—**Hamstring t.** The t. of the biceps flexor cruris and that of the semimembranosus and the semitendinosus. [L.]—**T. cartilage.** In the embryo, a tissue, resembling true cartilage, by which the junction of t. with bone is effected. ["Jour. of Anat. and Phys.," xvi, p. 178 (α, 32).]—**T. of origin.** A t. by which a muscle arises. [L.]—**T. of Zinn.** See LIGAMENT *of Zinn.*—**T. réfléchi du droit antérieur** (Fr.). The reflected t. of the rectus femoris. [L.]

TENDOPHONY, n. Te2nd-o2f'on-i2. From *tendo*, a tendon, and φωνή, a sound. Ger., *Tendophonie, Sehnentönen.* The occurrence of auscultatory sounds ascribed to the chordæ tendineæ.

TENDOVAGINITIS (Lat.), n. f. Te2nd-o(o3)-va2j(wa3g)-i2n-(en)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From *tendo*, a tendon, and *vagina*, a scabbard. See TENOSYNOVITIS (1st def.).—**T. crepitans.** T. in which the fibrinous deposit on the tendon and sheath causes crepitation when the tendon is moved. [α, 34.]—**T. hydropica (serosa chronica).** See HYDROPS *vaginæ tendinis.*—**T. hypertrophica.** T. with circumscribed hypertrophy of the tendon and its sheath. [α, 34.]—**T. serosa.** T. with serous effusion within the sheath. [α, 34.]—**T. suppurativa.** T. with suppuration. [α, 34.]

TENDRIL, n. Te2nd'ri2l. A body, usually filiform, by which a plant climbs. It may be a modified branch, as in the grape, or a modified leaf (leaf-t.), as in the pea, or a modified stipule, as in *Smilax.* It usually climbs by coiling its tip around the object of support, but sometimes, as in the Virginia creeper, holds fast by means of an adhesive disc into which its tip expands. [α, 35.]

TENESMUS (Lat.), n. m. Te^{2}n(tan)-e^{2}s'mu^{3}s(mu^{4}s). Gr., τεινεσμός (from τείνειν, to stretch). Fr., *ténesme, épreintes.* A persistent inclination to defecate or urinate, accompanied by painful straining efforts, mostly ineffectual. [D; E.]—**Faucial and pharyngeal t.** Of L. Browne, a continual inclination to void or to swallow an imaginary foreign body, accompanied by more or less cough, straining, and pain, either after or independent of functional exercise of the voice. ["Brit. Med. Jour.," 1890, ii, p. 621 (*a*, 34).]—**Rectal t.** Ger., *Afterschmerz, Aftersperre, Stuhlzwang.* T. in the rectum. [*a*, 48.]—**T. vesicæ mucosus.** See CYSTORRHŒA.—**Vesical t.** Ger., *Drang zum Uriniren, Harndrang.* T. in urination. [*a*, 48.]

TENETTE (Fr.), n. T'-ne^{2}t. An old term for a dressing-forceps, especially one for removing vesical calculi. [A, 44 (*a*, 14).]

TÉNIA (Fr.), n. Tan-e-a^3. See TÆNIA.

TENNSTÄDT (Ger.), n. Te^{2}n'stat. A place in Prussian Saxony where there is a sulphurous spring. [L, 30, 37, 49, 57 (*a*, 14).]

TENOGRAPHY, TENOLOGY, n's. Te^{2}n-o^{2}g'ra^{2}f-i^2, -o^{2}l'o-ji^2. See TENONTOLOGY.

TÉNO-MYOTOMIE (Fr.), n. Ta-no-me-o-to-me. Of Abadie, an operation for enfeebling one of the recti muscles of the eye. It consists in incising the lateral parts of its tendon near its sclerotic insertion, and in excising a small portion of the muscle on each side. ["Rev. des sci. méd.," Oct. 15, 1888, p. 622 (*a*, 18).]

TENONITIS (Lat.), n. f. Ten(te^{2}n)-o^{2}n-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* Fr., *ténonite.* Ger., *T.* Inflammation of Tenon's capsule. [F.]

TENONTAGRA (Lat.), n. f. Te^{2}n-o^{2}nt'a^{2}g(a^{3}g)-ra^3. Gr., τενοντάγρα (from τένων, a sinew, and ἄγρα, a seizure). Fr., *ténontagre.* Rheumatism of the tendons, especially of those in the neck. [L, 50 (*a*, 14).]

TENONTODYNE (Lat.), **TENONTODYNIA** (Lat.), n's f. Te^{2}n-o^{2}nt-o^{2}d'i^{2}n(u^{6}n)-e(a), -o(o^3)-di^{2}n(du^{6}n)'i^2-a^3. From τένων, a sinew, and ὀδύνη, pain. Fr., *ténontodynie.* Pain in the tendons.

TENONTOGRAPHY, TENONTOLOGY, n's. Te^{2}n-o^{2}nt-o^{2}g'ra^{2}f-i^2, -o^{2}l'o-ji^2. Lat., *tenontographia* (from τένων, a tendon, and γράφειν, to write), *tenontologia* (from τένων, a tendon, and λόγος, understanding). Fr., *ténontographie, ténontologie.* Ger., *Sehnenlehre.* The anatomy, etc., of the tendons. [L, 50 (*a*, 14).]

TENONTOMIA (Lat.), n. f. Te^{2}n-o^{2}nt-om(o^{2}m)'i^2-a^3. Ger., *T.* See TENOTOMY.

TENONTOPHYMA (Lat.), n. n. Te^{2}n-o^{2}nt-o(o^3)-fi(fu^6)'ma^3. Gen., *-phym'atos (-atis).* From τένων, a tendon, and φῦμα, a growth. A tumor of a tendon. [L, 50 (*a*, 48).]

TENONTOPHYTE, n. Te^{2}n-o^{2}nt'o-fit. Lat., *tenontophyton* (from τένων, a tendon, and φυτόν, a growth). Fr., *ténontophyte.* An abnormal outgrowth on a tendon. [L, 50 (*a*, 14).]

TENONTOSTOMA (Lat.), n. n. Te^{2}n-o^{2}nt-o(o^3)-stom'a^3. From τένων, a tendon, and ὀστέον, a bone. Ossification of a tendon. [L, 50 (*a*, 14).]

TENOPHONIE (Ger.), n. Tan-o-fon-e'. See TENDOPHONY.

TENOPLASTIK (Ger.), n. Tan-o-pla^{3}st-ek'. See under TENOTOMY.

TENORRHAPHY, n. Te^{2}n-o^{2}r'a^{2}f-i^2. Lat., *tenorrhaphia* (from τένων, a tendon, and ῥαφή, a seam). Fr., *ténorrhaphie.* Ger., *Sehnennaht, Tenorrhapie.* The suture of a divided tendon.

TENOSITIS (Lat.), n. f. Te^{2}n-o^{2}s-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* Fr., *ténosite.* Inflammation of a tendon. [*a*, 34.]

TENOSYNITIS (Lat.), **TENOSYNOVITIS** (Lat.), n's f. Te^{2}n-o(o^3)-si^{2}n(su^{6}n)-i(e)'ti^{2}s, -si^{2}n(su^{6}n)-o-vi(we)'ti^{2}s. Gen., *-it'idos (-idis).* From τένων, a tendon, and *synovia* (*q. v.*). Fr., *ténosynite.* Inflammation of the sheath of a tendon and of the contiguous surface of the tendon; "An affection usually occurring in the forearm and characterized by a peculiar creaking of the tendons as they move in their sheaths, depending upon a particular kind of strain to which the muscles belonging to these tendons have been subjected." [Hopkins, "Boston Med. and Surg. Jour.," July 27, 1882, p. 81.]—**Crepitant t.** See AI.—**T. hyperplastica.** A painless swelling of the extensor tendons over the wrist joint; caused by the irritation to which they may be exposed or by trophic disturbances arising from paralysis of the radial nerve. [D, 35.]

TENOTOMANIA (Lat.), n. f. Te^{2}n-o^{2}t(o^{3}t)-o-ma(ma^3)'ni^2-a^3. From τένων, a tendon, τέμνειν, to cut, and μανία, mania. An inordinate propensity to perform tenotomy, especially on the ocular muscles. ["Med. News," Sept. 16, 1893, p. 323.]

TENOTOME, n. Te^{2}n'o-tom. Lat., *tenotomus* (from τένων, a tendon, and τέμνειν, to cut). Fr., *ténotome.* Ger., *Tenotom.* A small, narrow-bladed knife for dividing tendons subcutaneously. [E.] See also APONEUROTOME.—**Gruber's t.** A t. consisting of a simple blade, slightly curved at the end, inserted in an adjustable handle so that it may be used for either ear. [F.]—**Hartmann's t.** A t. consisting of a small knife, curved on the flat and on the edge; used in dividing the tendon of the tensor tympani. [F, 32.]

TÉNOTOMIE (Fr.), n. Tan-o-tom-e. See TENOTOMY.—**T. à ciel ouvert.** Open, as opposed to subcutaneous, tenotomy. [Levrat, "Prov. méd.," 1888, No. 43, p. 609.]

TENOTOMY, n. Te^{2}n-o^{2}t'om-i^2. Lat., *tenotomia* (from τένων, a tendon, and τομή, a cutting). Fr., *ténotomie.* Ger., *Tenotomie, Tenoplastik, Sehnenschnitt.* The operation of dividing a tendon.—**Abadie's partial t. for muscular asthenopia.** An operation in which the conjunctiva is opened in the usual way, the hook introduced beneath the tendon, and the tendon divided from one side by little cuts to near the centre of the tendon. The tendon is then divided in the same way on the other side, and there are left a few median fibres undivided from their attachment to the sclera. ["Ann. d'ocul.," May–June, 1880 (F).]—**Graduated t.** A partial t. of one or more of the ocular muscles for the purpose of relieving overaction. ["N. Y. Med. Jour.," Apr. 21, 1888, p. 440 (*a*, 34).]—**Kessel's t. of the stapedius.** An operation which consists in making an incision through the membrana tympani, and then dividing the muscle by an incision perpendicular to its length, in order to relieve the shortening produced in the muscle by cicatricial shrinking of the sheath of the tendon. ["Arch. f. Ohrenheilk.," xi (F).]—**Snellen's t. for strabismus.** An operation which consists in dividing the conjunctiva horizontally between the two margins of the muscle, and then dissecting up the conjunctiva on both sides as far as the caruncle. The tendon sheath is then opened by a small cut and the tendon divided subconjunctivally. ["Klin. Monatsbl.," Jan., 1870 (F).]—**Tarsal t.** Of the veterinarians, t. of the peroneus tendon for the relief of spavin. [L, 41 (*a*, 14).]—**T. of the tensor tympani.** An operation for diminishing the excessive tension of the membrana tympani and of the ossicula and the abnormal increase of pressure in the labyrinth connected therewith. The tenotome is introduced through an incision in the posterior segment of the membrana tympani into the tympanic cavity. The knife, having entered for about 3 mm., lies below the tendon of the tensor tympani between the handle of the malleus and the long crus of the incus. By slightly sinking its handle, the sharp joint of the tenotome is forced so far toward the upper part of the tympanic cavity that the tendon is obliquely divided as the knife is withdrawn. [F, 32.]—**Von Graefe's t. for strabismus.** An operation in which the conjunctiva bulbi is divided vertically just in front of the line of insertion of the tendon of the muscle, and the sheath is opened. Then a large blunt hook (strabismus hook) is introduced beneath the conjunctiva and sheath close to the upper border of the tendon, and the hook swept round and downward between the sclera and tendon so as to engage the entire width of the tendon in its grasp. Then the muscle is dissected free from the sclera backward for a considerable distance before being divided close to its insertion. ["Arch. f. Ophth.," iii, 11 (F).]

TENSEUR (Fr.), n. Ta^{3}n^2-su^{6}r. See TENSOR.—**T. de la muqueuse alvéolo-labiale.** A small muscle lying beneath the levator labii superioris alæque nasi, attached to the superior maxilla, and inserted into the alveolo-labial mucous membrane. It forms part of the compressor naris. [L.]

TENSION, n. Te^{2}n'shu^{3}n. Gr., τάσις. Lat., *tensio* (from *tendere,* to stretch). Fr., *t.* Ger., *Spannung, Spannkraft, Straffheit.* 1. The state of being stretched or distended. 2. A feeling of fullness or resistance in the pulse. [K.]—**Elastic t.** The application of traction to a part by means of an elastic material. [Roberts, "Illustr. Quart. of Med. and Surg.," July, 1882, p. 77.]—**Elastic t. of the lung.** The distention of the lung by gas or fluid due to the elasticity of the organ. [Landois (*a*, 34).]—**Intra-ocular t.** See *Intra-ocular* PRESSURE.—**Muscular t.** The state of moderate contraction of muscles or groups of muscles which occurs when they are stretched by passive movements or by the voluntary contraction of their antagonizing muscles. [D, 35.]—**Residual t. of the lung.** See *Elastic t. of the lung.*

TENSOR (Lat.), n. m. Te^{2}ns'o^{2}r. Gen., *-or'is.* From *tendere,* to stretch. Fr., *tenseur.* Ger., *Spannmuskel.* A muscle having the function of rendering a part tense.—**Brevis digitorum t.** See EXTENSOR *digitorum pedis brevis.*—**T. aponeuroseos perinæalis.** See ISCHIO-BULBOSUS.—**T. capsulæ (humeralis).** See under CORACOCAPSULARIS, n.—**T. capsulæ tibiotarsalis.** See TIBIALIS *secundus.*—**T'es capsularum articulationum.** Ger., *Kapselspanner.* Muscles inserted into the capsules of joints, which they are supposed to render tense. [L, 332.]—**T. chorioideæ** [Brücke]. See *Ciliary* MUSCLE.—**T. digitorum.** See EXTENSOR *digitorum manus communis.*—**T. fasciæ deltoideus.** See under *Accessory* DELTOID.—**T. fasciæ dorsalis pedis.** See TIBIOFASCIALIS.—**T. fasciæ et cutis foveæ axillaris.** An anomalous muscle arising from the tendon of the subscapularis and inserted into the skin of the axilla. [L, 31.]—**T. fasciæ latæ.** A muscle arising from the anterior margin of the crest of the ilium and a portion of the bone extending to the origin of the sartorius, and, after passing down between two folds of the fascia lata, inserted into its upper third. [L, 31, 332.]—**T. fasciæ pelvis.** See RECTO-COCCYGEUS.—**T. fasciæ plantaris.** An anomalous muscle arising from the tibia beneath the origin of the solæus, and inserted into the plantar fascia or some of the structures in the sole. [L.]—**T. fasciæ suralis.** An anomalous offshoot of the semimembranosus inserted into the fascia of the leg. [L.]—**T. ligamenti annularis radii anterior.** An anomalous muscle arising from the coronoid process of the ulna and inserted into the annular ligament of the wrist. [L, 332.]—**T. ligamenti annularis radii dorsalis (seu posterior).** An anomalous muscle arising from the dorsal surface of the ulna and inserted into the dorsal and radial aspect of the annular ligament of the wrist. [L, 332.]—**T. ligamenti annularis radii volaris.** See *T. ligamenti annularis radii anterior.*—**T. membrani synovialis tarsi.** See TIBIALIS *secundus.*—**T. of the capsular ligament** [Leyh]. See SCAPULOHUMERALIS *parvus.*—**T. of the capsule of the ankle.** See TIBIALIS *secundus.*—**T. palati (mollis).** See ABDUCTOR *of the Eustachian tube.*—**T. semivaginæ articulationis humeroscapularis.** An anomalous muscle arising from the cartilages of the two or three upper ribs and inserted into the sheath of the biceps flexor cubiti. [L, 31.]—**T. tarsi.** Ger., *Thränensackmuskel.* A small, thin muscle, situated at the inner side of the orbit, behind the tendo oculi. It arises from the crest and adjacent part of the orbital surface of the lacrymal bone, and, passing across the lacrymal sac, divides into two slips, which cover the canaliculi and are inserted into the tarsi near the lacrymal puncta. [F.]—**T. tibiotarsalis.** See TIBIALIS *secundus.*—**T. tympani.** Ger., *Paukenfellspanner, Hammermuskel.* A muscle arising in front of the anterior surface of the canalis pro tensore tympani, on the osseous wall of the pyramid adjacent to the carotid canal, and from the cartilaginous Eustachian tube. The tendon leaves the canal at

the rostrum cochleare, extends across the tympanic cavity, and is inserted on the inner margin of the handle of the malleus, at the anterior edge of the rhomboidal surface, in an oblique direction to the longitudinal axis of the malleus. It acts to increase the tension of the membrana tympani and also the pressure in the labyrinth. [F, 3.]—**T. vaginæ.** See ILIOAPONEUROTICUS.—**T. vaginæ femoris.** See *T. fasciæ latæ.*—**T. veli palati** (seu **palatini**). See ABDUCTOR *of the Eustachian tube.*

TENT, n. Te^{2}nt. Gr., μοτός, λεμνίσκος. Lat., *tenta, tentum.* Fr., *tente, mèche.* Ger., *Meissel.* A substance to be introduced into a wound or canal, so as to prevent it from closing or to dilate it slowly by its expansion when moistened. [E.]—**Cornstalk t.** A t. made of the compressed pith of the cornstalk. [A, 24.]—**Laminaria t., Sea-tangle t.** A t. made of the dried stems of *Laminaria conica.* [E.]—**Sponge t.** Fr., *cône d'éponge préparée, tente éponge.* Ger., *Pressschwamm, Presskegel.* A t. made of compressed sponge. [E.]

TENTACLE, n. Te^{2}nt'a^3-k'l. Lat., *tentaculum* (from *tentare,* to handle). Fr., *tentacule, barbillon* (1st def.). Ger., *Tentakel, Ankerhäkchen* (1st def.), *Fühlfaden* (1st def.), *Randzaser* (3d def.), *Ragfaser* (3d def.). 1. One of the long and slender appendages that certain animals use as feelers or for prehension. [α, 48.] 2. One of the glandular hairs clothing the leaves of certain insectivorous plants. 3. A filiform or hair-like fringe to the border of the thallus of some lichens. [α, 35.]—**Prestomial t.** Fr., *antenne médiane.* One of the smaller anterior pair of t's situated in front of the mouth in crustaceans. [L, 37 (α, 14).]

TENTACULAR, adj. Te^{2}nt-a^{2}k'u^{2}l-a^{3}r. Resembling the feelers of a snail. [α, 35.]

TENTACULUM (Lat.), n. n. Te^{2}nt-a^{2}k(a^{3}k)'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). See TENTACLE.

TENTE (Fr.), n. Ta^{3}n^{2}t. See TENTORIUM.—**T. du cervelet.** See TENTORIUM *cerebelli.*

TENTIGO (Lat.), n. f. Te^{2}nt-ig(eg)'o. Gen., *-tig'inis.* From *tendere,* to stretch out. Lecherousness, lust. [A, 312 (α, 21).]—**T. prava.** An old name for lupus. [G.]—**T. venerea.** An old term for nymphomania. [A, 42.]

TENTORIUM (Lat.), n. n. Te^{2}nt-or'i^2-u^{3}m(u^{4}m). From *tendere,* to stretch out. Fr., *plancher du cerveau.* Lit., a tent; see *T. cerebelli.*—**T. cerebelli.** Fr., *repli transverse du falx du cervelet.* Ger., *Querfortsatz der harten Hirnhaut.* A fold of dura which separates the cerebrum and cerebellum, supporting the occipital lobes. [K.]

TENUIFLORUS (Lat.), adj. Te^{2}n-u^2(u^4)-i^2-flor'u^{3}s(u^{4}s). From *tenuis,* slender, and *flos,* a flower. Fr., *ténuiflore.* Formed of minute flowers. [α, 35.]

TENUIROSTRAL, TENUIROSTRATE, adj's. Te^{2}n-u^2-i^2-ro^{2}st-r'l, -ro^{2}st'rat. Lat., *tenuirostris* (from *tenuis,* slender, and *rostrum,* the beak). Fr., *ténuirostre.* Having a long slender bill with a short cleft; in botany, having a thin rostellum. [L, 221; α, 35.]

TENUIS (Lat.), adj. Te^{2}n'u^2(u^4)-i^{2}s. Thin, delicate; as a n., a slender muscle. [α, 17.]—**T. femoris.** See GRACILIS *anterior.*

TEPAL, n. Te^2'p'l. A transposition of *petal* (cf. SEPAL). Lat., *tepalum.* Fr., *tépale.* Ger., *Perigonblatt, Blüthenhüllblatt.* A division of the perianth; either a sepal or a petal. [α, 35.]

TEPHRA (Lat.), n. f. Te^{2}f'ra^3. Gr., τέφρα. Dust, ashes. [L, 50 (α, 14).]

TEPHROMYELITIS (Lat.), n. f. Te^{2}f-ro(ro^3)-mi(mu^6)-e^{2}l-i(e)'-ti^{2}s. Gen., *-it'idos (-idis).* From τέφρα, ashes, and μυελός, marrow. Fr., *téphromyélite.* See POLIOMYELITIS.—**Acute anterior t.** See *Acute anterior* POLIOMYELITIS.

TEPHROSIA (Lat.), n. f. Te^{2}f-roz(ro^{2}s)'i^2-a^3. From τεφρός, ash-colored. Fr., *téphrosie.* A genus of the *Leguminosæ.* [α, 35.] —**T. apollinea.** Indigo-plant of Egypt and Nubia. The seed-vessels and the bitter leaves were formerly used to adulterate senna. An ointment prepared from the seeds is used for wounds in camels. The plant yields a variety of indigo. [α, 35.]—**T. cinerea.** Fr., *bois à énivrer.* Goat's rue of the West Indies; a species used like *T. toxicaria.* [α, 35.]—**T. emarginata.** An Orinoco species with a purgative root. [α, 35.]—**T. leptostachya.** An African species. The root is purgative. [α, 35.]—**T. purpurea.** An East Indian and Ceylon species. The juice is applied to pustular eruptions of the face. The bitter roots, which are considered alterative, tonic, laxative, anthelminthic, febrifuge, and antemetic, are used in diarrhœa, dysentery, dyspepsia, elephantiasis, etc., and in a wash for the mouth. [α, 35.]—**T. spinosa.** An East Indian shrub. Its root is used as a stomachic. [α, 35.]—**T. toxicaria.** Indigo-plant of the Niger, West Indian fish-poison plant, Surinam poison; a native of Africa, naturalized in the West Indies. The roots are used in skin diseases, and the leaves and branches as a fish-poison. [α, 35.] —**T. virginiana.** Turkey pea, catgut, Virginian goat's rue; found in various parts of the United States. The roots, which are said to be anthelminthic, are aperient and tonic, and are recommended in typhoid fever. [α, 35.]

TEPHROSIS (Lat.), n. f. Te^{2}f-ros'i^{2}s. Gen., *-ros'eos (-is).* Gr., τέφρωσις (from τεφροῦν, to burn to ashes). Fr., *téphrose.* See INCINERATION.

TEPHRYLOMETER, n. Te^{2}f-ri^{2}l-o^{2}m'e^{2}t-u^{5}r. From τέφρα, ashes, ὕλη, matter, and μέτρον, a measure. Of H. C. Major, a graduated thin glass tube, open at both extremities, that is plunged into the cerebral convolutions so as to remove a segment of tissue that will permit of the measurement of the thickness of the gray matter. ["Lancet," 1872, ii, p. 623 (α, 34).]

TEPIDARIUM (Lat.), n. n. Te^{3}p-i^{2}d-ar(a^{3}r)'i^2-u^{3}m(u^{4}m). Gr., ἀποδυτήριον. Fr., *tepidaire, étuve sèche.* See under *Roman* BATH.

TEPLITZ-SCHÖNAU, n. A place in Bohemia, famous as a watering resort, where there are hot alkaline, saline, and sulphurous springs. [L, 30, 37, 49, 57 (α, 14).]

TEPLITZ-WARASDIN, n. A place in Warasdin County, Croatia, where there is a hot alkaline and sulphurous spring.

TEQUEZQUITE (Sp.), n. In Mexico, saline efflorescences found especially in the valley of Mexico, and consisting chiefly of sodium carbonate. [B, 224 (α, 14).]

TERABDELLA (Lat.), n. f. Te^{2}r(tar)-a^{2}b(a^{3}b)-de^{2}l'la^3. Perhaps from τέρας, a marvel, and βδέλλα, a leech. Fr., *térabdelle.* Of Damoiseau, a cupping apparatus. [L, 41, 57 (α, 14).]

TERACRYLIC ACID, n. Te^{2}r-a^{2}k-ri^{2}l'i^{2}k. Fr., *acide téracrylique.* A homologue, $C_7H_{12}O_2$ (or $C_6H_{10}O_2$), of acrylic acid, formed by the distillation of terpentic acid. [B, 3.]

TERAMNUS (Lat.), n. m. Te^{2}r-a^{2}m(a^{3}m)'nu^{3}s(nu^{4}s). Ger., *Hakenhülse.* A genus of leguminous herbs. [α, 35.]—**T. uncinatus.** A West Indian species. The leaves are a mild evacuant and the farina of the seed is used in cataplasms. [α, 35.]

TERAS (Lat.), n. n. Ter(te^{2}r)'a^{2}s(a^{3}s). Gen., *ter'atos (-atis).* Gr., τέρας. See MONSTER.—**T. anacatadidymum.** A double monster in which the two individuals are joined by the trunks, but have separate heads and limbs. [α, 34.]—**T. anadidymum.** A double monster in which the individuals are joined from the buttocks downward and separate above. [α, 34.]—**T. catadidymum.** A double monster in which the individuals are joined from the neck or trunk upward and separate below. [α, 34.]

TERATOCARDIE (Ger.), n. Tar-a^{3}t-o-ka^{3}rd-e'. Any monstrosity of the heart. [L, 57 (α, 14).]

TERATOGENY, n. Te^{2}r-a^{2}t-o^{2}j'e^{2}n-i^2. From τέρας, a monster, and γένεσις, generation. Fr., *tératogénèse, tératogénie.* Ger., *Teratogenie.* The production of monsters. [L, 41, 49 (α, 14).]

TERATOID, adj. Te^{2}r'a^{2}t-oid. Gr., τερατώδης (from τέρας, a monster, and εἶδος, resemblance). Resembling or of the nature of a monster. [α, 17.]

TERATOLOGY, n. Te^{2}r-a^{2}t-o^{2}l'o-ji^2. From τέρας, a monster, and λόγος, understanding. Fr., *tératologie.* Ger., *Teratologie.* The science of monstrosities. [α, 35.]

TERATOMA (Lat.), n. n. Te^{2}r-a^{2}t(a^{3}t)-om'a^3. Gen., *-om'atos (-atis).* From τέρας, a monster. Fr., *tératome.* Ger., *Teratom.* Of Virchow, a tumor containing various structures of the body, as if from a malformed fœtus. They arise by the abnormal inclusion of a whole embryo or a portion of one. [α, 34.] Cf. FŒTUS *inclusus.*

TERATOPHOBIA (Lat.), n. f. Te^{2}r-a^{2}t(a^{3}t)-o(o^3)-fob(fo^{2}b)'i^2-a^3. From τέρας, a monster, and φόβος, fear. Of Venanzio, morbid fear of monsters, both actual and mythological, of deformed or physically peculiar persons, or of caricatures. ["Gazz. degli ospit.," 1892, No. 12, p. 106 (α, 34).]

TERATOSIS (Lat.), n. f. Te^{2}r-a^{2}t(a^{3}t)-os'i^{2}s. Gen., *-os'eos (-is).* From τέρας, a monster. Properly, the formation of a monstrosity; a congenital deformity. The *Teratoses* of Fuchs are a family of the *Morphonosi* of the skin, including *Dysmorphoses* and *Heteromorphoses.* [G.]

TERBASIC, adj. Tu^{5}r-bas i^{2}k. See TRIBASIC.

TERBIUM (Lat.), n. n. Te^{2}rb'i-u^{3}m(u^{4}m). From *Ytterby,* a place in Sweden. Fr., *t.* Ger., *T.* A metallic element not yet isolated, acting in compounds as a trivalent radicle. Symbol Tr or Tb. Its existence has been disputed. [B, 3, 8.]

TERCHLORIDE, n. Tu^{5}r-klor'i^{2}d(id). A trichloride. [B.]

TERCINE, n. Tu^{5}rs'en. From *tertius,* third. Fr., *t.* The outer layer of cells of the nucleus of a vegetable ovule. [α, 35.]

TERCIS (Fr.), n. Te^{2}r-se. A place in the department of the Landes, France, where there is a hot alkaline, saline, and sulphurous spring. [L, 41, 49, 57 (α, 14).]

TEREBELLA (Lat.), n. f. Te^{2}r-e^{2}b-e^{2}l'la^3. Dim. of *terebra,* a borer. See TREPHINE.

TEREBELLUM (Lat.), n. n. Te^{2}r-e^{2}b-e^{2}l'lu^{3}m(lu^{4}m). From *terebra,* a borer. Fr., *craniotome térébrante.* 1. An instrument invented by Dugès for perforating the vault of the cranium in the operation of craniotomy, or for boring into the base of the skull for the purpose of breaking it up or of making traction. Its end was in the form of a conical screw. [A. R. Simpson, "Brit. Med. Jour.," Dec. 13, 1884, p. 1178.] 2. The working blade of Hubert's transforateur.

TEREBENE, n. Te^{2}r'e^{2}b-en. Fr., *térébène.* Ger., *Tereben.* A mixture of optically inactive terpenes obtained by distilling oil of turpentine with 5 per cent. of concentrated sulphuric acid, washing with soda solution, drying with calcium chloride, and then distilling the portion which boils between 156° and 160° C. It has an agreeable odor, and is used medicinally instead of oil of turpentine when the odor of the latter is objectionable, also as a surgical dressing and antiseptic. [B, 270 (α, 38).]

TEREBENTENE, n. Te^{2}r-e^{2}b-e^{2}nt'en. Fr., *térébenthène.* Ger., *Terebenthen.* Lævopinene; a liquid hydrocarbon, $C_{10}H_{16}$, being one of the modifications of oil of turpentine, found also in the oils of thyme and anise. [B, 3 (α, 38).]

TÉRÉBENTHINE [Fr. Cod.] (Fr.), n. Ta-ra-ba^{3}n^2-ten. Turpentine. [α, 35.]—**Épyrèle de t., Essence de t., Huile essentielle (ou volatile) de t.** See *Oil of* TURPENTINE.—**Onguent de t. camphré.** See BALSAMUM *Genevieræ.*—**Pilules de t.** [Fr. Cod.]. Sp., *píldoras de trementina* [Sp. Ph.]. A pill-mass consisting of 10 grammes each of Strassburg turpentine and magnesium carbonate [Fr. Cod.] (of 5 grammes of common turpentine and 7 of magnesium carbonate [Sp. Ph.]), divided into 50 pills. [B, 95 (α, 38).]—**Pilules de t. cuite** [Fr. Cod.]. Thirty-centigramme pills made from terebinthina cocta (2d def.), and either rolled in powdered magnesium carbonate or kept under water. [B, 95 (α, 38).]—**Pilules de t. magnésiées.** See *Pilules de t.*—**Savon de t., Savon rétinolique à la t.** See SAPO *starkeyanus.*—**Sirop de t.** See *Syrupus*

TEREBINTHINÆ.—**T. au citron** [Fr. Cod.]. See *Strassburg* TURPENTINE.—**T. commune.** See TEREBINTHINA (1st def.).—**T. cuite.** See TEREBINTHINA *cocta* (1st def.).—**T. d'Alsace.** See *Strassburg* TURPENTINE.—**T. de Bordeaux.** See TEREBINTHINA (1st def.).—**T. de Boston.** See *American* TURPENTINE.—**T. de Giléad.** Canada turpentine. [a, 35.]—**T. de sapin.** See *Strassburg* TURPENTINE.—**T. de Suisse, T. de Venise.** Larch turpentine. [a, 35.]—**T. des Vosges.** See *Strassburg* TURPENTINE.—**T. du térébinthe.** Chian turpentine. [a, 35.]—**T. officinale.** Larch turpentine. [a, 35.]—**T. purifiée** [Fr. Cod.]. Turpentine purified by being gently heated in a copper vessel until melted, and then pressed through a cloth. [B, 113 (a, 38).]

TEREBENZIC, n. Te^{2}r-e^{2}b-e^{2}nz'i^{2}k. Paratoluic acid (see under TOLUIC ACID).

TEREBIC ACID, n. Te^{2}r'e^{2}b-i^{2}k. Fr., *acide térébique.* Ger., *Terebinsäure.* A monobasic crystalline acid, $C_7H_{10}O_4$, produced by the action of nitric acid on oil of turpentine. [B, 4.]

TEREBILENE, n. Te^{2}r-e^{2}b'i^{2}l-en. Fr., *térébilène.* Ger., *Terebilen, Kienstoff.* An optically inactive liquid obtained by treating the liquid hydrochlorides of oil of turpentine with heated lime. [B, 4 (a, 38).]

TEREBINIC ACID, n. Te^{2}r-e^{2}b-i^{2}n'i^{2}k. See TEREBIC ACID.

TEREBINTH, n. Te^{2}r'e^2-bi^{2}nth. See TEREBINTHUS.

TEREBINTHACEOUS, adj. Te^{2}r-e^2-bi^{2}nth-a'shu^{3}s. 1. Terebinthine, resembling turpentine in properties. 2. Resembling the genus *Terebinthus* (*Pistacia*); of the *Terebinthaceæ*, or *Terebintheæ*, an order of dicotyledons, including *Rhus*, *Pistacia*, and other genera now referred to the *Anacardiaceæ*. [a, 35.]

TEREBINTHINA (Lat.), n. f. Te^{2}r-e^2-bi^{2}nth-in(en)'a^3. Fr., *térébenthine de Bordeaux* (ou *commune*) [Fr. Cod.] (1st def.). It., Sp., *trementina* [Sp. Ph. (1st def.)]. 1. Of the U. S. Ph., Ger. Ph., Austr. Ph., and Netherl. Ph., turpentine, a resinous juice obtained from the trunk of *Pinus australis* [U. S. Ph.] (*Pinus pinaster* [Fr. Cod.], *Pinus pinaster* and *Pinus laricio* [Ger. Ph.], *Pinus pinaster* and *Pinus palustris* [Swed. Ph.], *Pinus silvestris* [Sp. Ph., Netherl. Ph., Roum. Ph., Russ. Ph.], this and *Pinus maritima* [Gr. Ph.], *Pinus silvestris*, other varieties of *Pinus*, and various species of *Picea* [Austr. Ph., Hung. Ph.], various species of *Pinus* [Dan. Ph., Finn. Ph., Norw. Ph.]). [B, 95 (a, 38).] See also *Bordeaux* TURPENTINE. 2. Of the Belg. and Netherl. Ph's, see *Larch* TURPENTINE.—**Ætheroleum terebinthinæ.** See *Rectified oil of* TURPENTINE.—**Ætheroleum terebinthinæ crudum.** See *Oil of* TURPENTINE.—**Ætheroleum terebinthinæ depuratum** (seu **rectificatum**). See *Rectified oil of* TURPENTINE.—**Alcohol terebinthinæ.** See *Oil of* TURPENTINE.—**Balsamum t. communis, Balsamum terebinthinæ.** See *T.* (1st def.).—**Balsamum t. laricina, Balsamum t. veneta.** See *Larch* TURPENTINE.—**Confectio terebinthinæ** [Br. Ph.]. Fr., *électuaire* (ou *opiat*) *térébenthiné.* Ger., *Terpentinöllatwerge.* A preparation made by rubbing together 1 fl. oz. of oil of turpentine and 1 oz. of powdered licorice-root, and adding 2 oz. of clarified honey. [B, 81 (a, 21).]—**Enema terebinthinæ** [Br. Ph.]. Fr., *lavement térébenthiné.* Ger., *Terpentinölklystier.* An enema consisting of 1 fl. oz. of oil of turpentine and 15 fl. oz. of starch mucilage. [B, 95 (a, 38).]—**Essentia terebinthinæ.** 1. Of the Belg. Ph., see *Oil of* TURPENTINE. 2. A solution of larch turpentine in four times as much 35-per-cent. alcohol, filtered after a fortnight. [B, 119 (a, 38).]—**Essentia terebinthinæ rectificata** [Belg. Ph.]. See *Rectified oil of* TURPENTINE.—**Essentia terebinthinæ sulphurata.** See *Oleum terebinthinæ sulfuratum.*—**Linimentum terebinthinæ.** Syn.: *Linimentum terebinthinatum* [Ger. Ph., 2d ed.]. A liniment made by mixing 65 parts of cerate of resin with 35 of oil of turpentine [U. S. Ph.]; by mixing 2 oz. of sapo mollis with the same amount of water, and adding a solution of 1 oz. of camphor in 16 fl. oz. of oil of turpentine [Br. Ph.]; or by mixing 6 parts of potassium carbonate with 54 of green soap, and adding 40 of oil of turpentine [Ger. Ph.]. [B, 95 (a, 38).]—**Linimentum terebinthinæ acetatum** (seu **aceticum**, seu **Stockes**). A liniment consisting of 4 fl. oz. each of camphor liniment and oil of turpentine and 1 oz. of glacial acetic acid [Br. Ph.]; of 60 grammes of oil of turpentine, 5 of oil of lemon, 10 of glacial acetic acid, 120 of rose water, and the yolk of 1 egg [Swiss Ph.]; or of 90 grammes of crude oil of turpentine, 15 of acetic acid, the yolk of 1 egg, and water enough to make 200 grammes [Swed. Ph.]. [B, 95 (a, 38).]—**Oleum terebinthinæ (crudum).** Oil of turpentine. [a, 35.]—**Oleum terebinthinæ depuratum.** See *Rectified oil of* TURPENTINE.—**Oleum terebinthinæ empyreumaticum.** See TAR.—**Oleum terebinthinæ rectificatum.** See *Rectified oil of* TURPENTINE.—**Oleum terebinthinæ sulfuratum.** Sp., *aceite de trementina sulfurado* [Sp. Ph.]. A solution of oleum lini sulfuratum in three times as much (purified [Russ. Ph., Swed. Ph.]) oil of turpentine [Ger. Ph. (1st ed.), Gr. Ph., Swiss Ph., Russ. Ph., Swed. Ph.], or of 6 parts of washed sublimed sulphur in 48 of rectified oil of turpentine [Belg. Ph.], or a preparation made by heating 1 part of sublimed sulphur with 4 parts of linseed-oil to 165° C., maintaining the heat until a drop on a glass slab becomes clear and jelly-like when cold, and adding 15 parts of oil of turpentine [Dan. Ph.], or by digesting 6 parts of sublimed sulphur with 23 of oil of turpentine till the oil becomes red and syrupy, clarifying, and decanting [Sp. Ph.]. [B, 95 (a, 38).]—**Pilulæ cum t.** See *Pilules de* TÉRÉBENTHINE.—**Pilulæ cum t. cocta.** See *Pilules de* TÉRÉBENTHINE *cuite.*—**Sapo terebinthinæ liquidus.** A preparation made by mixing 3 parts of sodium carbonate, 4 of Castile soap, 6 of oil of turpentine, and 60 of water, and adding 6 parts each of compound spirit of mastic and compound spirit of juniper. A very similar preparation is the *baume de vie externe spiritueux*, or *liqueur nervine spiritueuse de Pereboom*, of French writers, made up of 3 parts of potassium carbonate and 4 of white soap dissolved in 40 parts of water and mixed with 6 of oil of turpentine, 1 part of oil of cajuput, and 4 parts of spirit of juniper [Hannover Ph., 1835]; or of a solution of 1 part each of oil of turpentine and soap in 8 parts of alcohol. [B, 119; "Proc. of the Am. Pharm. Assoc.," xxx, p. 106 (B).]—**Spiritus terebinthinæ.** See *Oil of* TURPENTINE.—**Syrupus terebinthinæ.** Fr., *sirop de térébenthine.* Sp., *jarabe de trementina.* A preparation made by digesting 100 parts of syrup with 10 of larch turpentine [Belg. Ph.] (Strassburg turpentine [Fr. Cod.]), bringing up with water if necessary to the original weight, and separating the liquid from the undissolved turpentine [Fr. Cod., Belg. Ph.]; by digesting 6 parts of Strassburg turpentine with 24 of water for twelve hours over the water-bath, filtering when cold, and adding 45 parts of sugar [Sp. Ph.]; or by digesting 5 parts of larch turpentine with 60 of boiling water for twelve hours and adding, when cold, 9 parts of sugar for each 5 of filtered liquid [Roum. Ph.]. [B, 95 (a, 38).]—**T. abiegna, T. abietina, T. argentoratensis.** Strassburg turpentine. [a, 35.]—**T. cocta.** Fr., *térébenthine cuite* (1st def.), *poix résine jaune* (2d def.). 1. Of the Pruss. Ph., 6th ed., the residue from the distillation of oil of turpentine (beaten up with water). 2. Of the Belg. Ph., larch (Strassburg [Fr. Cod., Sp. Ph.]) turpentine boiled with water until it has a stiffly plastic consistence if plunged into cold water. [B, 95 (a, 38).]—**T. communis.** See *T.* (1st def.).—**T. cypria, T. de Chio, T. de Cypro, T. e Chio.** Chian turpentine. [a, 35.]—**T. empyreumatica.** See TAR.—**T. gallica.** Bordeaux turpentine. [a, 35.]—**T. laricina, T. laricis, T. larigna, T. officinalis.** See *Larch* TURPENTINE.—**T. pistacina.** Chian turpentine. [a, 35.]—**T. veneta.** See *Larch* TURPENTINE.—**T. vulgaris.** See *T.* (1st def.).—**Unguentum de t. et adipibus.** See *Unguentum* ELEMI *compositum.*—**Unguentum de t. camphoratum.** See BALSAMUM *Genevievæ.*—**Unguentum terebinthinæ.** Syn.: *unguentum terebinthinatum* [Dan. Ph., Norw. Ph.]. An ointment consisting of 24 parts each of yellow wax and lard, 6 of colophony, and 48 fluid parts of oil of turpentine [Br. Ph.]; of equal parts of yellow wax, oil of turpentine (rectified [Russ. Ph.]), and larch [Gr. Ph., Russ. Ph.] (common [Ger. Ph.]) turpentine [Ger. Ph., Gr. Ph., Russ. Ph.]; of equal parts of simple ointment and common turpentine [Roum. Ph.]; of 35 parts each of common turpentine and oil of turpentine with 30 of yellow wax [Norw. Ph.]; or of 36 each of oil of turpentine and common turpentine and 27 of yellow wax [Dan. Ph.]. A similar preparation was the old *Balsamum Frahmii*, or *linimentum digestivum*, made by mixing 1 part of molten yellow wax with 1 part of oil of turpentine and 1 part [Batav. Ph., 1811, Bav. Ph., 1822] (2 parts [Schleswig Ph., 1831, Hamb. Ph., 1835]) of larch turpentine. [B, 95 (a, 38); B, 119.]—**Unguentum terebinthinæ compositum.** An ointment consisting of 96 parts of larch turpentine with 3 each of aloes and myrrh, 24 of olive-oil, and enough yolks of eggs [Ger. Ph., Russ. Ph.], or with 96 parts of olive-oil, 8 of red sandal-wood, 64 of yellow wax, and 4 of balsam of Peru [Netherl. Ph.]; or of 35 parts of larch turpentine, 18 of yellow wax, 12 of oil of turpentine, and 3 each of the tinctures of aloes and myrrh [Swiss Ph.]. [B, 95 (a, 38).]—**Unguentum terebinthinæ resinosum.** See UNGUENTUM *basilicum.*

TEREBINTHINATE, adj. Te^{2}r-e^2-bi^{2}nth'i^{2}n-at. Lat., *terebinthinatus.* Fr., *térébenthiné.* Composed of or containing turpentine. [a, 35.]

TEREBINTHINE, adj. Te^{2}r-e^2-bi^{2}nth'i^{2}n. See TEREBINTHACEOUS (1st def.).

TEREBINTHUS (Lat.), n. f. Te^{2}r-e^{2}b-i^{2}nth'u^{3}s(u^{4}s). The genus *Pistacia*, especially *Pistacia t.* The *Terebinthinaceæ* are a family of resinous plants (including *Pistacia*, *Juglans*, *Bursera*, *Rhus*, etc.). The *Terebinthinæ*, or *Terebinthineæ*, are a class of gymnoblastous plants consisting of the *Ochneæ*, *Simarubeæ*, *Diosmeæ*, *Rutaceæ*, etc. [a, 35.]—**T. lentiscus.** See PISTACIA *lentiscus.*—**T. vulgaris.** See PISTACIA *t.*

TEREBRA (Lat.), n. f. Te^{2}r'e^{2}b-ra^3. From *terere*, to rub. See TREPHINE.—**T. occulta.** A concealed perforator invented by Sir Fielding Ould.

TÉRÉBRANT (Fr.), adj. Ta-ra-bra^{3}n^2. Boring or penetrating (said of pain). [E.]

TEREBRATION, n. Te^{2}r-e^{2}b-ra'shu^{3}n. Lat., *terebratio* (from *terebrare*, to bore through). Perforation.

TERECAMPHENE, n. Te^{2}r-e^2-ka^{2}mf'en. Fr., *térécamphène.* Ger., *Terecamphen.* A terpene, $C_{10}H_{16}$, occurring as feathery crystals. [B, 4, 270 (a, 38).]

TERECHRYSIC ACID, n. Te^{2}r-e^2-kri^{2}s'i^{2}k. Fr., *acide téréchrysique.* An acid, $C_6H_8O_6$, obtained by Cailliot in the oxidation of oil of terpentine by diluted nitric acid. It forms a pasty, orange-yellow, uncrystallizable mass of a sour, afterward astringent and bitter, taste, soluble in all proportions in water, in alcohol, and in ether. [B, 93 (a, 14).]

TEREDO (Lat.), n. f. Te^{2}r-ed(ad)'o. Gen., *-ed'inis.* Gr., τερηδών. 1. A wood-worm. [a, 48.] 2. See CARIES (1st def.).—**T. ossium.** See CARIES (1st def.).

TEREPHTHALAMIC ACID, n. Te^{2}r-e^{2}f-tha^{2}l'a^{2}m-i^{2}k. Fr., *acide téréphtalamique.* An acid, $C_6H_4(CO.NH_2)CO.OH$, occurring as microscopic crystals. [B, 3 (a, 38).]

TEREPHTHALIC ACID, n. Te^{2}r-e^{2}f-tha^{2}l'i^{2}k. Fr., *acide térephtalique.* Ger., *Terephtalsäure.* See under PHTHALIC ACID.

TEREPHTHALYL, n. Te^{2}r-e^{2}f'tha^{2}l-i^{2}l. Ger., *Terephtalyl.* A bivalent radicle, $C_8H_4O_2C_6(H,H,CO',H,H,CO',)$, found in terephthalic acid. [B.]—**T. chloride.** A crystalline mass, $C_6H_4(COCl)_2$, of rather sharp cinnamon-like smell. [B, 3, 4 (a, 38).]

TERES (Lat.), adj. Ter(te^{2}r)'ez(as). Terete; as a n., a round, slender muscle. [a, 17.]—**T. antibrachii.** See PRONATOR *radii t.*—**T. major.** A muscle arising from the posterior surface of the inferior angle of the scapula and its anterior margin and inserted into the lesser tuberosity of the humerus. [L.]—**T. minimus.** An anomalous offshoot from the lower portion of the t. minor, inserted into the humerus below the insertion of the latter. [L, 332.]—**T. minor.** Fr., *petit rond.* Ger., *kleiner runder Armmuskel.* 1. A

muscle arising from the infraspinous fossa of the scapula, its anterior margin, and the overlying fascia, and inserted into the greater tuberosity of the humerus. [L.] 2. Of Percivall, see SCAPULO-HUMERALIS *minor*.

TERETE, adj. Te2r-et′. Lat., *teres* (from *terere*, to rub). Fr., *térète*. Ger., *stielrund*, *drahtrund*. Cylindrical. [a, 35.]

TERETINIC ACID, n. Te2r-e2t-i2n′i2k. Fr., *acide térétinique*. A crystallizable acid, $C_{10}H_{14}O_5$, obtained by gently heating oil of turpentine with lead protoxide. [B, 93 (a, 14).]

TERETIPRONATOR [Coues] (Lat.), n. m. Te2r″e2t-i2-pro-(pro2)-nat(na3t)′o2r. Gen., *-or′is*. See PRONATOR *radii teres*.

TERETISCAPULARIS [Coues] (Lat.), n. m. Te2r-e2t-i2-ska2p-(ska3p)-u2l(u4l)-a(a3)′ri2s. From *teres*, rounded, and *scapula* (*q. v.*). See TERES *major*.

TERETRION (Lat.), **TERETRIUM** (Lat.), **TERETRON** (Lat.), n's n. Te2r-e2t′ri2-o2n, -u3m(u4m), te2r′e2t-ro2n. Gr., τερέτριον, τέρετρον (from τείρειν, to rub hard). See TREPHINE.

TERGAL, adj. Tu5r′g′l. See DORSAL.

TERGEMINAL, TERGEMINATE, TERGEMINOUS, adj's. Tu5r-je2m′i2-n′l, -nat, -nu3s. Lat., *tergeminatus*, *tergeminus* (from *ter*, three times, and *geminus*, twin-born). Fr., *tergéminé*. Ger., *dreifach-zweizählig*, *dreimal-gezweit*, *dreifach-gepaart*. Thrice geminate ; of a compound leaf, having the common petiole terminating in three pairs of leaflets. [a, 35.]

TERGISPERMUS (Lat.), adj. Tu5rj(te2rg)-i2-spu5rm(spe2rm)′-u3s(u4s). From *tergum*, the back, and σπέρμα, a seed. Fr., *tergisperme*. Having the fructification occupying the back of the leaf (frond). [a, 35.]

TERGUM (Lat.), n. n. Tu5rg(te2rg)′u3m(u4m). Gr., νῶτον. The back ; the dorsal arc of the somite of an arthropod. [B, 28 (a, 27) ; L, 196.]

TERHYDRIDE, n. Tu5r-hid′ri2d(rid). A combination of an element or radicle with 3 atoms of hydrogen. [B.]

TERIODIDE, n. Tu5r-i′od-i2d(id). A triiodide. [B.]

TERM, n. Tu5rm. Lat., *terminus* (from *terminare*, to limit). Fr., *terme*. Ger., *Zeitraum*. 1. A limited or specified time or period. 2. The menstrual period. [a, 48.] 3. The proper time for the cessation of gestation.—**At (full) t.** Fr., *à (bon) terme*. Ger., *rechtzeitig*. At the proper time (said of a birth that takes place at the end of the normal period of gestation). [a, 48.]

TERMA [Wilder] (Lat.), n. f. Tu5rm(te2rm)′a3. A lamina of nerve-substance extending between the anterior commissure of the brain and the optic chiasm. [J, 80 (K).]

TERMATIC, adj. Tu5rm-a2t′i2k. Supplying the terma. [J.]

TERMINAISON (Fr.), n. Te2r-me-ne2-zo2n2. A termination, an extremity. [a, 48.]—**T's hédériformes** [Ranvier]. The sum of the tactile menisci. [J, 31.]—**T. motrice.** See *Motorial nerve* END-PLATE.—**T's nerveuses.** See NERVE-ENDINGS.

TERMINAL, adj. Tu5rm′i2-n′l. Lat., *terminalis* (from *terminus*, a limit). Fr., *t*. Ger., *gipfelständig*, *endständig*. Pertaining to or situated at the end or apex. [a, 35.]

TERMINALIA (Lat.), n. f. Tu5rm(te2rm)-i2n-al(a3l)′i2-a3. From *terminalis*, terminal. Fr., *badamier*, *terminalier*. Ger., *Catappenbaum*. A genus of the *Terminaliaceæ* (a family referred by Bentham and Hooker to the genus *T.*). The *Terminalieæ*, or *Terminaleæ*, are a tribe of the *Combretaceæ*, corresponding essentially to the suborder *Combreteæ*. [a, 35.]—**T. alata.** Fr., *badamier ailé*. An East Indian species. The bark is febrifuge, and the juice of the leaves is injected into the ear in otitis. [a, 35.]—**T. angustifolia.** Fr., *faux benjoin*, *bien-joint*, *badamier benjoin*. Ger., *falscher Benzoëbaum*, *schmalblättriger Catappenbaum*. A species found in the East Indies and the Mauritius, yielding a resin which contains benzoic acid and is much employed as a cosmetic and as incense. The fruits are used like those of *T. chebula* ; and their almond-like seeds, containing a bland oil, are eaten. [a, 35.]—**T. argentea.** A Brazilian species yielding a purgative gum-resin. [a, 35.]—**T. arjuna.** An East Indian species. The astringent bark is used as a cholagogue and vulnerary. The juice of the leaves is used in otalgia, and the fruit as a deobstruent and tonic. [a, 35.]—**T. bellerica, T. bellirica.** A large Ceylon and East Indian tree. The fruits, belleric myrobalans, are astringent and tonic. Their kernels, which yield an oil used as a hair-tonic, are edible, though narcotic in large quantities ; mixed with honey, they are used in ophthalmia. The bark yields by incision an insipid gum. The leaves are astringent. [a, 35.]—**T. benzoin.** See *T. angustifolia*.—**T. catappa.** Fr., *badamier de Malabar*, *arbre à huile*, *bois-canots*. Ger., *ächter Catappenbaum*. Country (or Indian, or Malabar) almond-tree ; a native of the Moluccas, cultivated in the East and West Indies. The kernels yield a straw-colored oil which has the odor and taste of almond-oil. The astringent bark and leaves yield a black pigment used to color teeth and to prepare Indian ink. The leaves are used in fevers and as an emollient. [a, 35.]—**T. chebula.** Fr., *badamier chébule*, *olivier des nègres*. Ger., *rispiger Myrobalanenbaum*. Negroes' olive-tree ; found in the tropics of both hemispheres. The highly astringent fruits, known to old authors as *myrobalani indæ* (seu *indicæ*, seu *indici*, seu *nigræ*) when unripe, and as *myrobalani chebulæ* (seu *chebuli*) when ripe, are used in tanning, as a purgative, and as an application to ulcers and in skin diseases ; combined with galls and catechu, they are also used for aphthous affections. The astringent galls produced on the leaves (which have the properties of those of *T. catappa*) are used in infantile diarrhœa. The oily seeds are eaten. [a, 35.]—**T. citrina.** Fr., *badamier citrin*. Ger., *gelber Myrobalanenbaum*. Hara-nut tree ; a native of Bengal. The fruits, *myrobalani citrinæ* (seu *lutei*, seu *flavæ*), resemble and are used like those of *T. chebula*, but are more bitter. [a, 35.]—**T. latifolia.** A South American and West Indian species. The bark and seed are used like those of *T. catappa*. [a, 35.]—**T. macroptera.** Fr., *badamier paniculé*. A Senegambian species furnishing a very astringent gall. The root is purgative. [a, 35.]—**T. tomentosa.** An East Indian tree yielding a gum used as a cosmetic and as an incense. The astringent bark is used for indolent ulcers and in atonic diarrhœa ; it contains much calcareous matter, yielding an ash used in place of lime by the chewers of betel-leaf. [a, 35.]

TERMINALIS (Lat.), adj. Tu5rm(te2rm)-i2n-al(a3l)′i2s. See TERMINAL.

TERMINATION, n. Tu5rm-i2n-a′shu3n. Lat., *terminatio* (from *terminare*, to limit). Fr., *terminaison*. 1. The end or issue. 2. An extremity, an ending. [a, 48.]—**Browne t.** See *Browne* BODY.—**Nerve t's.** See NERVE-ENDINGS.

TERMINI (It.), n. Te2r-me′ne. A place in the province of Palermo, Sicily, where there are hot alkaline, saline, and sulphurous springs. [L, 30, 37, 49 (a, 14).]

TERMINTHANTHRAX (Lat.), n. m. Tu5rm(te2rm)-i2nth-a2nth(a3nth)′ra2x(ra3x). Gen., *-anth′racos* (*-is*). See TERMINTHUS (2d def.).

TERMINTHUS (Lat.), n. f. Tu5rm(te2rm)-i2nth′u3s(u4s). Gr., τέρμινθος (= τερέβινθος), the turpentine-tree. Ger., *Hundsblatter*, *Erbsenblatter* (1st def.), *schwarze Auswüchse* (2d def.). 1. An ancient name for carbuncle or other inflammatory disease of the skin ; so called because of a fancied resemblance to the fruit of *Pistacia terebinthus*. 2. Of Plenck, "large, dark-colored inflammatory pustules, observed especially on the legs of women." [G, 11.]—**Terminthi neonatorum.** Of Plenck, a disease of new-born infants characterized by large "pustules" upon the skin containing a dark-colored fluid and surrounded by a red areola, sometimes occurring as an epidemic ; pemphigus neonatorum. [G, 11.]

TERNANT (Fr.), n. Te2rn-a3n2. A place in the department of the Puy-de-Dôme, France, where there is a chalybeate and alkaline spring. [L, 49 (a, 14).]

TERNATE, adj. Tu5rn′at. Lat., *ternatus*, *ternus* (from *terni*, three each). Fr., *terné*. Ger., *dreizählig* (1st def.), *gedreit* (1st def.), *dreiständig* (2d def.). 1. Consisting of three leaflets inserted upon the petiole at the same point (said of a compound leaf). 2. Of leaves, arranged on a stem or branch in whorls of three. 3. In threes (applied to three similar parts forming any compound organ). [a, 35.]

TERNSTROEMIA (Lat.), n. f. Te2rn-stru5m′i2-a3. From *Ternström*, a Swedish naturalist. A genus of tropical or subtropical evergreen trees or shrubs of the *Ternstrœmiaceæ* (or *Ternstrœmieæ*, or *Ternstrœmeæ*), which are an order of the *Guttiferales*. The *Ternstrœmieæ* are also a tribe of that order, comprising *T.*, *Visnea*, *Anneslea*, etc. [a, 35.]—**T. altamirania, T. silvatica.** Sp., *yerba del cura* [Mex. Ph.]. A tropical American species. In Mexico the leaves are used in preparing baths for rheumatism and gout. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]

TEROXIDE, n. Tu5r-o2x′i2d(id). A trioxide. [B.]

TERPENE, n. Tu5rp′en. Fr., *terpène*. Ger., *Terpen*. Any one of a series of hydrocarbons having the composition $C_{10}H_{16}$, and occurring very widely in the vegetable kingdom. They are found in all volatile oils except oil of rose, and often form the chief ingredient. They include the *pinenes* (australene, eucalyptene, and terebentene), the *camphenes* (terecamphene, borneocamphene, and inactive camphene), the *limonene* group (hesperidene, carvene, citrene, isoterpene, inactive limonene, cajeputene, cinene, diisoprene, isoterebentene, and caoutchene), *terpinolene*, *silvestrene*, *terpinene*, and *phellandrene*. [B, 270 (a, 38).]

TERPENTHIN (Ger.), n. Te2rp-e2nt-en′. See TURPENTINE.

TERPENTIC ACID, n. Tu5rp-e2nt′i2k. An acid, $C_8H_{14}O_4$, formed by the oxidation of oil of turpentine by chromic acid. [B, 3.]

TERPENTIN (Ger.), n. Te2rp-e2nt-en′. See TURPENTINE.—**Deutscher T.** Common European turpentine. [a, 35.]—**Elsasser T.** Strassburg turpentine. [a, 35.]—**Französischer T.** Bordeaux turpentine. [a, 35.]—**T'gallen.** See *Pistacia* GALLS.—**T'öl** [Ger. Ph.]. See *Oil of* TURPENTINE.—**T'seife.** See SAPO *terebinthinatus*.

TERPILENE, n. Tu5rp′i2l-en. Fr., *terpilène*. 1. A mixed liquid substance consisting chiefly of terpinene. [B, 270 (a, 38).] 2. See TEREBILENE.

TERPINE, n's. Tu5rp′en. Lat., *terpina*, *terpinum*. Fr., *t*. Ger., *Terpin*. A substance, $C_{10}H_{20}O_2$, probably a dihydroxy-derivative of dipentene. It is optically inactive, and is formed by the action of an alcoholic solution of nitric acid on pinene. [B ; B, 4 (a, 38).]—**T. hydrate.** A substance, $C_{10}H_{18}(OH)_2 + H_2O$, occurring as large, transparent, prismatic crystals. When distilled, it boils at 258° C. after becoming anhydrous, and cools to a hard mass. It is used as an expectorant, and in hay fever and asthma. [B, 3 (a, 38).]

TERPINENE, n. Tu5rp′i2n-en. Fr., *terpinène*. A liquid terpene, $C_{10}H_{16}$, obtained from the oil of Ceylon cardamom and in other ways, having a lemon-like odor and boiling at about 180° C. [B, 3, 270 (a, 38).]

TERPINEOL, n. Tu5rp-i2n′e2-o2l. Fr., *terpinéol*. Ger., *T.* A substance, $C_{10}H_{18}O$ (or $C_{20}H_{34}O$), derived from terpene by boiling with dilute mineral acids and in other ways, and occurring as a very thick liquid of pleasant odor, sparingly soluble in water. ["Am. Jour. of Pharm.," June, 1888, p. 307 (B) ; B, 3, 93, 270 (a, 38).]

TERPINOL, n. Tu5rp′i2n-o2l. Fr., *t*. Ger., *T.* 1. Of List, an impure variety of terpineol. 2. A mixture of terpineol with terpinene, terpinolene, and dipentene, which has been used in bronchial catarrh. [B, 3, 270 (a, 38).]

TERPINOLENE, n. Tu5rp-i2n'o2l-en. A liquid terpene, $C_{10}H_{16}$. [B, 3, 270 (*a*, 38).]

TERPINYLENE, n. Tu5rp-i2n'i2l-en. See TERPILENE.

TERRA (Lat.), n. f. Te2r'ra3. Fr., *terre*. Ger., *Erde*. See EARTH.—**Liquor terræ foliatæ tartari.** See *Liquor* POTASSII *acetici crudus*.—**Liquor terræ ponderosæ salitæ.** See *Solutio muriatis* BARYTÆ.—**Melia t.** See CHALK.—**Oleum terræ.** See PETROLEUM.—**T. absorbens.** An alkaline earth. [B.]—**T. alana.** Tripoli. [*a*, 35.]—**T. alba.** See *Philosopher's* STONE.—**Terræ alcalinæ.** See *Alkaline* EARTHS.—**T. argilla alba.** See *White* BOLE.—**T. argillacea pura.** The precipitate (washed and dried) obtained by adding a solution of potash to one of alum. [L, 85.]—**T. bolaris.** See *T. argillacea pura*.—**T. calcarata.** See CHALK.—**T. calcarea lactiformis.** See *Mineral* AGARIC.—**T. calcarea pura** (seu usta). See *Quick*-LIME.—**T. cariosa.** Rotten stone. [B.]—**T. cimolia.** See *Fuller's* EARTH.—**T. damnata.** See CAPUT *mortuum*.—**T. de Malta.** See *T. sigillata melitensis*.—**T. eretria.** See ERETRIA.—**T. fœtida.** Of Paracelsus, sublimed sulphur. [H.]—**T. foliata.** See POTASSIUM *acetate*.—**T. foliata mercurialis.** See MERCURY *acetate*.—**T. foliata mineralis.** See SODIUM *acetate*.—**T. foliata tartari.** See POTASSIUM *acetate*.—**T. foliata tartari crystallisabilis (seu crystallisata).** See SODIUM *acetate*.—**T. japonica.** See CATECHU.—**T. lemnia, T. lemniana.** See *Lemnian* BOLE.—**T. merita.** Fr., *terre mérite*. The *Curcuma longa* or its root (turmeric). [*a*, 35.]—**T. miraculosa Saxoniæ.** Ger., *Eisensteinmark*. An earth, formerly official, composed of iron and aluminium silicates and water. [L, 30 (*a*, 14).]—**T. oriana, T. orleana.** See ANNOTTO.—**T. ponderosa.** Native barium sulphate. [*a*, 35.]—**T. ponderosa acetata.** See BARIUM *acetate*.—**T. ponderosa aerata** (seu carbonata). See BARIUM *carbonate*.—**T. ponderosa muriata.** See BARIUM *chloride*.—**T. ponderosa pura.** See BARYTA.—**T. ponderosa salita.** See BARIUM *chloride*.—**T. ponderosa sulphurica** (seu vitriolata). Native barium sulphate. [*a*, 35.]—**T. sancta Rulandi.** See ANTIMONY *ash*.—**T. Sancti Pauli.** See *T. sigillata melitensis*.—**T. selinusia.** A friable earth resembling Chian earth and used like it. [L, 105 (*a*, 50).]—**T. sicula.** See BEZOAR *minerale*.—**T. sigillata.** Fr., *terre sigillée*. See BOLE.—**T. sigillata melitensis.** Ger., *maltheser Siegelerde*. A white serpentine bole from Malta and Italy. [*a*, 35.]—**T. umbria.** Umber. [B.]

TERRALINE, n. Te2r'a2l-en. See VASELINE and PETROLATUM.

TERRAN (Fr.), n. Te2r-ra3n2. A place in the department of Cantal, France, where there is a chalybeate spring. [L, 49 (*a*, 14).]

TERRE (Fr.), n. Te2r. See EARTH.—**T. à foulon.** See CLAY and *Fullers'* EARTH.—**T. amère.** See MAGNESIUM *carbonate*.—**T. à porcelaine.** See KAOLIN.—**T. bolaire.** See *Armenian* BOLE.—**T. calcaire.** See LIME.—**T. de Lemnos.** 1. See *Lemnian* BOLE. 2. The pulp of the fruit of *Adansonia digitata*. [*a*, 35.]—**T. de Saint-Paul.** See TERRA *sigillata melitensis*.—**T. de Sedlitz.** See MAGNESIUM *carbonate*.—**T. de Sienne.** See IRON *oxide*.—**T. des os.** Normal calcium phosphate. [L, 105 (*a*, 50).]—**T. douce de vitriol.** See COLCOTHAR.—**T's feuilletées, T's foliées.** A name formerly given to the crystallizable acetates. [L, 105 (*a*, 50).]—**T. magnésienne.** See MAGNESIUM *carbonate*.—**T. pesante.** See BARYTA.—**T. pesante aérée.** See BARIUM *carbonate*.—**T. pesante salée.** See BARIUM *chloride*.—**T. sigillée.** See BOLE.—**T. verte.** See COPPER *carbonate*.—**T. verte de Vérone.** Iron and aluminium silicate, containing magnesium and sodium. [B, 93 (*a*, 14).]—**T. vitrifiable.** Pure silica. [B, 93 (*a*, 14).]

TERRESTRIAL, adj. Te2r-re2st'ri2-'l. Lat., *terrestris*. Fr., *terrestre*. Pertaining to the land; living or growing on land. [*a*, 35.]

TERREUS (Lat.), adj. Te2r're2-u3s(u4s). Fr., *terreux*. See EARTHEN and EARTHY.

TERROR, n. Te2r'o2r. Lat., *t*. Fr., *terreur*. An intense degree of fear. [*a*, 48.]—**Night t., Night t's.** See PAVOR *nocturnus* (2d def.).

TERSULPHATE, n. Tu5r-su3lf'at. Lat., *tersulphas*. A sulphate containing three molecules of the sulphuric-acid radicle. [B.]

TERSULPHIDE, TERSULPHURET, n's. Tu5r-su3lf'i2d(id), -su3lf'u2-re2t. See TRISULPHIDE.

TERTIAN, adj. Tu5r'sh'n. Lat., *tertianus* (from *tertius*, third). Recurring on the third day (both days of occurrence being reckoned): occurring at intervals of two days, or characterized by such occurrence. [*a*, 48.]

TERTIANA (Lat.), n. f. Tu5r(te2r)-shi2(ti2)-an(a3n)'a3. From *tertius*, third. See *Tertian* FEVER, and cf. FEBRIS *t. accidentalis* to FEBRIS *t. verminosa*, inclusive.—**T. continua duplex.** See *Double tertian intermittent* FEVER (1st def.).—**T. duplex.** See *Double tertian intermittent* FEVER.—**T. duplicata.** See *Double tertian intermittent* FEVER (1st def.).—**T. pleuritica.** Of Sauvages, pleuritis periodica. [*a*, 34.]—**T. triplex.** See *Triple tertian* FEVER.

TERTIANARIA (Lat.), n. f. Tu5r(te2r)-shi2(ti2)-a2n(a3n)-a(a3)'-ri2-a2. From *tertianus*, tertian. Fr., *tertianaire*. The *Scutellaria galericulata*; so called because it was said to cure intermittent fevers. [B, 200 (*a*, 35).]

TERTIARISME (Fr.), n. Te2r-se-a3-resm. A tertiary condition or stage, such as occurs in syphilis. [Fournier, "Arch. gén. de méd.," Sept., 1889 (B).]

TERTIARY, adj. Tu5r'shi2-a-ri2. Lat., *tertiarius* (from *tertius*, third). Fr., *tertiaire*. 1. Of organic compounds, having a radicle substituted in a hydrocarbon attached to a carbon atom which itself is connected with three other carbon atoms; of amines and amides, phosphines, stibines, and arsines, having all three hydrogen atoms of ammonia, phosphoreted hydrogen, etc., replaced by radicles. [B.] 2. In botany, of the third order (said of a branch of a secondary branch). [*a*, 35.] 3. Of a disease, in the third stage (said especially of syphilis in the gummatous stage). 4. As a n., one of the remiges growing on the humerus of birds. Sometimes the feathers from the scapula are included. [L, 221.]

TERTIPARA (Lat.), n. f. Tu5rt(te2rt)-i2p'a2r(a3r)-a3. From *tertius*, third, and *parere*, to bring forth. Fr., *tertipare*. A female parturient for the third time. [*a*, 48.]

TERTIUS (Lat.), adj. Tu5r(te2r)'shi2(ti2)-u3s(u4s). From *ter*, three times. Third; as a n., the third in a series of muscles.—**T. compositi.** See TRACHELOMASTOIDEUS (1st def.).—**T. laryngis.** See CRICO-ARYTÆNOIDEUS *lateralis*.—**T. movens caput, T. spigelii, T. trigemini.** See TRACHELOMASTOIDEUS (1st def.).

TERVALENCE, n. Tu5r'va2l-e2ns. From *ter*, three times, and *valere*, to be worth. See TRIVALENCE.

TERVALENT, adj. Tu5r'va2-l'nt. See TRIVALENT.

TESCALAMA (Sp.), n. Tas-ka3-la3'ma3. A resinous extract obtained from the bark of *Ficus nymphæifolia*, used in plasters, etc. [*a*, 35.]

TESSELLATED, adj. Te2s'e2l-at-e2d. Lat., *tessellatus* (from *tessella*, a small square stone). Fr., *tessellé, en damier*. Ger., *würfelig, gewürfelt, schachbrettartig*. Marked with little squares; checkered. [*a*, 35.]

TESSERA (Lat.), n. f. Te2s'se2r-a3. Lit., a cube (from *τέσσαρες*, four). See *Cuboid* BONE.

TESSULAR, adj. Te2s'u2l-a3r. Lat., *tessularis*. Ger., *tessularisch*. Having the length, breadth, and thickness equal or nearly so (said of cells and of tissue composed of such cells). [*a*, 35.]

TEST, n. Te2st. Gr., *κριτήριον* (1st def.). Lat., *testamen, testimonium* (1st def.), *testa* (2d def.). Fr., *épreuve* (1st def.), *preuve* (1st def.), *t.* (2d def.), *têt* (2d def.). Ger., *Probe* (1st def.). 1. A trial or experiment made for ascertaining some particular fact or condition; also the substance employed in such an experiment. [*a*, 48.] 2. See TESTA.—**Bond-Ultzmann t.** The use of phenylhydrazine hydrochloride as a t. for glucose. ["N. Y. Med. Jour.," Jan. 7, 1893, p. 12 (*a*, 50).]—**Böttger-Nylander t.** A t. for glucose, consisting of a solution made up of 2 parts of a basic salt of potassic bismuth nitrate, 4 of potassic sodium tartrate, and 100 of an 8-per-cent. solution of caustic soda. Of this solution, 1 part is boiled with 10 parts of urine for from 1 to 2 minutes, when a dark solution will be obtained, on cooling, from the oxidation of the bismuth. ["Therap. Gaz.," Oct. 15, 1890, p. 693 (*a*, 50).]—**Böttger's t.** A t. by which the presence of glucose in urine is shown by the blackening of the white deposit made when the urine is treated with sodium carbonate and boiled with bismuth subnitrate or hydroxide. [B, 270 (*a*, 38).]—**Breslau t.** A t., of little value, used in medico-legal examinations to determine, by the floating or sinking of the stomach of a fœtus in water on its removal from the body, whether or not it has been born alive. [K.]—**Brücke's bismuth-iodide t.** A t. by which the presence of glucose is shown by the brown or black coloration it causes in a solution made by boiling for ten minutes 5½ grammes of freshly precipitated bismuth subnitrate and 30 of potassium iodide with 150 c. c. of water, and adding 5 grammes of a 25-per-cent. solution of hydrochloric acid. [B, 270 (*a*, 38).]—**Bryce's t.** The repetition of a vaccination after four or five days. If first vaccination has affected the whole system, the second vesicle pursues an accelerated course and disappears as soon as the first; otherwise it follows the usual course.—**Catoptric t.** A t. formerly employed for the detection of cataract, by observing the upright reflections of a candle flame from the surfaces of the cornea and the anterior capsule of the crystalline lens, and noting the absence, in cases of cataract, of the inverted image reflected from the posterior capsule of the lens.—**Crucial t.** A t. which determines the matter in question decisively one way or the other. [*a*, 48.]—**Diazo-benzol t.** See *Ehrlich's t.*—**Differential-density t.** A t. for glycosuria. Two specimens of the urine are kept in a warm place for twenty-four hours in loosely corked bottles, yeast having been added to one of them. The density of the fermented specimen will then be found to be diminished, each ·001 lost representing the original presence of a grain of glucose in each fl. oz. of the urine. ["N. Y. Med. Jour.," July 5, 1890, p. 28 (*a*, 48).]—**Donné's t. for pus.** A t. which consists in adding a strong alkali to the sediment of a suspected urine. If pus is present, a viscid mass is formed. [K, 16.]—**Ehrlich's t.** A t. by which the presence of bilirubin in the urine is shown by the violet color produced when the urine has been treated with dilute acetic acid and some drops of a solution of 1 gramme of sulphanilic acid, 10 centigrammes of sodium nitrate, and 15 c. c. of hydrochloric acid in a litre of water have been added. [B, 270 (*a*, 38).]—**Fehling's t.** See *Fehling's* SOLUTION.—**Fleitmann's t.** The same as Marsh's t., with zinc and caustic soda or potash solution substituted for zinc and sulphuric acid. [B, 270 (*a*, 38).]—**Garrod's t.** A t. for uric acid in the blood. One or two drachms of blood-serum are put into a flat dish and six minims of strong acetic acid are added to each drachm of serum; a fine thread is then introduced into the fluid and the uric acid crystallizes on it within forty-eight hours. [*a*, 34.]—**Gmelin's t.** A t. for bile-pigments by adding a drop of nitroso-nitric acid to a drop of diluted bile. A change of colors will be produced in the following order: green, blue, violet, red, and yellow. [K.]—**Grahë's t.** A t. for distinguishing genuine from false cinchona barks, the vapor of the former being carmine and that of the latter brown when heated in a t-tube. [B, 270 (*a*, 38).]—**Grandeau's t.** A t. by which the presence of digitalin or digitalein is shown by the rich rose-color produced by introducing a trace of bromine into their solution in concentrated sulphuric acid. [B, 270 (*a*, 38).]—**Green's t.-objects.** A series of t.-diagrams for the determination of astigmatism. The one probably most frequently used consists of a circle traversed by a set of twelve triple lines, like the spokes of a wheel, the figures being placed at the extremity of the sets of lines. Each line is designed to be distinctly seen at a distance of about 20 feet. The circle is 12½ inches in diameter. [F.]—**Group t.** A t.

by which the presence of some one of a group of substances is shown without indication of particular substance. [B.]—**Guaiac t. for blood.** A t. made by adding to an alcoholic solution of guaiac a few drops of ozonized oil of turpentine and of the liquid to be examined. If the latter contains hæmoglobin, the guaiac solution becomes blue from the oxidation of the guaiac by the ozone liberated by the hæmoglobin. [B, 270.]—**Guaiac t. for hydrocyanic acid.** A t. made by adding a few drops of a solution of copper sulphate to tincture of guaiac and treating this with the substance to be tested. If the latter contains hydrocyanic acid, the guaiac tincture becomes blue. [B, 270.]—**Gunzberg's t.** A t. to estimate approximately the digestive quality of gastric juice. A capsule containing 15 cgrm. of potassium iodide is swallowed an hour after a meal, and at intervals of fifteen minutes the saliva is tested for the iodide. [α, 34.]—**Harmonium t.** A t. for non-perception of tones, arranged by furnishing the casing of the harmonium with an opening for the insertion of an auscultation tube. By inserting its olive-shaped nozzle into the external meatus of the ear to be examined, the tones of the instrument will be conducted immediately to the membrana tympani. [F, 32.]—**Hartmann's t. for hearing.** A t. based upon the length of electric flashes along a wire. It is possible to graduate a sound created in the telephone with great exactitude, as the electric flashes transmitted to the telephone can be altered in a precisely definable manner by the interpolation of different kinds of resistance. [F, 32.]—**Heller's albumin t.** A t. made by introducing concentrated nitric acid into urine, and thus producing a white ring at the point of contact if the urine contains albumin. [B, 270 (α, 38).]—**Heller's blood t.** See *Heller's t. for hæmaturia.*—**Heller's sugar t.** A t. by which the presence of glucose or sugar in the urine is shown by the yellow or red-brown color produced by heating with caustic-potash solution. [B, 270 (α, 38).]—**Heller's t. for hæmaturia.** A t. in which a portion of urine is made decidedly alkaline with caustic potash and boiled in a reagent glass. The phosphates are precipitated as very delicate floccules that look like mucus, and are colored brown or red-yellow by the blood-pigment. [Vierordt (α, 34).]—**Holmgren's t's for color-blindness.** Skeins of colored worsted, a large number of which are placed on a white cloth before the patient, who is required to select all the skeins of the same color, or of different tints of the same color. [F.]—**Horsley's t. for sugar.** A t. by which the presence of glucose or sugar in urine is shown by the green color produced by boiling with a mixture of caustic potash and potassium chromate. [B, 270 (α, 38).]—**Hume's t. for arsenic.** A t. made by adding, drop by drop, a weak solution of ammonia to a solution of silver nitrate until the brown precipitate first produced is nearly dissolved, decanting the clear liquid, and adding it to the suspected liquid. If arsenic is present, a bright-yellow precipitate of silver arsenite is produced, that must be collected and heated with a reducing agent so as to form a sublimate of metallic arsenic. [Woodman and Tidy (α, 34).]—**Hydrostatic t.** Ger., *Lungenschwimmprobe.* A t. made by placing the lungs of a dead infant in water ; if unaerated they sink ; if the infant has breathed or the lungs have been otherwise inflated they float. [α, 34.] Cf. Docimasia *hæmatopulmonaris.*—**Indigo-carmin soda t.** See *Mulder's t.*—**Jendrássik's t.** A t. for the patellar reflex. The patient locks his fingers together and endeavors to pull the hands apart. This tension of the muscles of the upper extremities prevents voluntary innervation of the muscles of the lower extremities while the usual t. for the reflex is applied. [α, 34.]—**Knapp's t.** A t. for glucose depending on the fact that the latter, heated with mercuric cyanide and caustic soda, reduces the former and precipitates metallic mercury. [B.]—**Lieben's t. for acetonuria.** A t. made by adding iodine dissolved in a solution of potassium iodide and a few drops of caustic potash to distilled urine, when the presence of acetone is shown by the formation of iodoform. [B, 270 (α, 38).]—**Lowe's t. for glucose.** A solution of 16 grammes of copper sulphate, 8 of glycerin, and 80 c. c. of caustic-soda solution in 64 grammes of water. [B, 270 (α, 38).]—**Magpie t.** A t. by which the presence of mercury is shown by the formation of a white precipitate of calomel and its rapid reduction to a grayish mass of metallic mercury when tin dichloride is introduced into a solution containing that metal. [B, 8 (α, 38).]—**Marsh's t.** A t. for arsenic, made by generating hydrogen in a wide-mouthed bottle by the action of sulphuric acid on zinc and water, igniting the hydrogen which escapes in a jet through a delivery tube, dropping the solution to be tested into the bottle, and immediately applying a piece of cold porcelain to the flame at the mouth of the tube. If arsenic is present it combines with the hydrogen, forming arseniureted hydrogen, which is again decomposed by the flame, and is deposited on the porcelain as a brown spot of metallic arsenic. [B, 8.]—**Maumené's t. for glucose.** A t. by which glucose is shown by the brown color it gives to a piece of white woolen cloth (previously soaked in a 33-per-cent. solution of zinc chloride and dried) when heated to 130° C. after having been soaked in the solution to be tested. [B, 270 (α, 38).]—**Méhu's t.** A t. by which the presence of albumin in urine is shown by the precipitate formed when the urine has been treated with nitric acid or sodium sulphate, and a mixture of 1 part each of carbolic acid and acetic acid and 2 parts of alcohol has been added. [B, 270 (α, 38).]—**Millon's t. (for salicylic acid).** A solution of mercury in nitric acid, used to show aromatic compounds which contain one hydroxyl group (or a methoxyl group derived from one) united with a benzene or naphthalene nucleus with which no nitrogen group is connected. Such compounds are colored red by 1 or 2 drops of the reagent to a c. c. of the solution containing the compound. [B, 270 (α, 38).] See also *Millon's* reagent.—**Moore's t.** A t. by which the presence of sugar is shown by the changing of color of the liquid to be tested through yellow, red-brown, and deep brown to black, caused by boiling with enough caustic-soda or potash solution to give a strong alkaline reaction. The value of the t. is lessened by the fact that other substances produce a like result. [B, 270 (α, 38).]—**Mulder's t.** A t. by which the presence of sugar is shown by mixing with the liquid to be tested a few drops of indigo carmin solution, made alkaline with sodium carbonate, and heating, when the color changes through green, red-purple, and violet to bright yellow. [B, 270 (α, 38).]—**Murexide t. for uric acid.** A t. which consists in adding moderately concentrated nitric acid to the suspected body and evaporating to dryness. Any uric acid present is converted into alloxan, urea, and volatile constituents. If now the residue is moistened with ammonia solution the alloxan is converted into murexide, and a purple color is developed. [B.]—**Musculus's t. for urea.** A t. by which the presence of urea is shown by the brown color its neutral solution produces upon paper prepared by filtering through it urine of a sufferer from catarrh of the bladder, washing, drying, coloring with alcoholic tincture of turmeric, and drying again. [B, 270 (α, 38).]—**Nessler's t.** See *Nessler's* reagent.—**Oliver-Mulder t.** See *Mulder's t.*—**Oliver's t.** A t. by which the presence of bile in the urine is said to be shown by a cloudiness produced by an aqueous solution of peptone, salicylic acid, and acetic acid. [B, 270 (α, 38).]—**Ozone t.** See *Guaiac t. for blood.*—**Pettenkofer's t.** A t. for bile-acids, especially cholic acid, by the deep reddish-purple color obtained by adding sugar to a solution of the bile-salts and then dropping sulphuric acid into it. [Bischoff (K).]—**Picric-acid t.** 1. A t. for glycosuria in which 3 parts of a saturated solution of picric acid and 2 of potassium hydrate are added to 5 of urine, and the whole is boiled for a minute. If glucose is present, a dark mahogany-red color will result. ["N. Y. Med. Jour.," Jan. 7, 1893, p. 12 (α, 50).] 2. A t. for albumin, performed by heating the suspected liquid with picric acid, when, if albumin is present, the latter is precipitated. [B.]—**Pray's t.-letters for astigmatism.** T.-letters composed of stripes running at different angles. [F.]—**Purdy's t. for glycosuria.** A solution is made of 4·15 grammes of copper sulphate, 10 grammes of pure mannite, and 50 c. c. of glycerin in 250 c. c. of distilled water, and added to 250 c. c. of distilled water containing 20·4 grammes of caustic potash ; when the mixture is cold 300 c. c. of strong ammonia are added, together with enough water to make a litre, and the solution is carefully filtered ; 25 c. c. of this solution is heated with 50 c. c. of distilled water, and the urine is added drop by drop until the solution is colorless. The number of minims of urine necessary to decolorize the solution contain just a quarter of a grain of sugar. ["N. Y. Med. Jour.," 1890, p. 261 (α, 34).]—**Rinne's t.** A t. for acuteness of hearing, made by estimating how long a tuning-fork is heard when brought near the external auditory meatus after its vibration has ceased to be perceived when it touches the cranium. [α, 34.]—**Schmidt's t.** A t. for glucose by the red-brown color its presence produces in a liquid boiled with a solution of sugar of lead in ammonia. [B, 270 (α, 38).]—**Schönbein's t.** A t. for hydrocyanic acid by the blue color its presence gives to a strip of filtering paper when dipped into a $\frac{1}{10}$-per-cent. solution of copper sulphate after having been soaked in a 1-per-cent. solution of tincture of guaiac-resin and dried. [B, 270 (α 38).]—**Shadow-t.** See Skiascopy.—**Snellen's t.-lines for astigmatism.** Lines arranged in the form of rays or spokes of a wheel. Their deviation from the vertical is expressed in degrees. [F.]—**T.-letters, T.-types.** See T.-types.—**Trommer's t.** A t. for glycosuria in which the presence of glucose is shown by its redissolving the precipitate formed when 1 or 2 drops of copper-sulphate solution and afterward 4 or 5 c. c. of caustic-soda solution are added to the urine. If the solution is heated, copper hemioxide is precipitated. [B, 270 (α, 38).]—**Weber's t.** A t. for the hearing power. A vibrating tuning-fork is placed on the vertex, and the patient observes whether the sound appears more or less loud by the ear under examination when it is stopped by the finger. [α, 34.]—**Worm-Müller t. for glycosuria.** A filtered solution of 2·5 grammes of cupric sulphate in 100 c. c. of distilled water and a filtered solution of 10 grammes of potassio-sodic tartrate and 4 grammes of sodic hydrate in 100 c. c. of distilled water are used. Five c. c. of clear urine is mixed with 2·5 c. c. of the second and 1·5 to 3 c. c. of the first solution, and boiled. If sugar is present, cuprous hydrate is formed. [α, 34.]—**Zaleski's t.** A t. for determining whether a dead child has breathed or not, depending on the larger quantity of blood, and therefore of iron, in the lungs, if it has. ["Lancet," May 12, 1888, p. 938 (α, 50).]

TESTA (Lat.), n. f. Te²st'a³. Fr., *test, têt.* 1. Of De Candolle and others, a seed-shell ; the outer coat of the two integuments covering the seed. 2. Of some authors, see Spermoderm (1st def.). [α, 35.] 3. Any hard covering ; a shell. [α, 48.]—**T. ovi, T. ovorum.** See Egg-*shell.*—**T. præparata.** A very fine, tasteless powder made from oyster shells by boiling with water, freeing from foreign substances, washing, drying, finely powdering, rinsing with water, and drying again. [B, 95 (α, 38).]

TESTACEOUS, adj. Te²st-a'shu³s. Lat., *testaceus* (from *testa*, a shell). Fr., *testacé.* Ger., *hartschalig* (1st def.), *schalenhart* (2d def.), *scherbengelb* (3d def.). 1. Having or consisting of a hard shell. 2. Hard and firm like the shell of a mussel. 3. Having the color of unglazed pottery ; pale brownish-yellow. [α, 35.]

TESTES (Lat.), n. m., pl. of *testis* (*q. v.*). Te²st'ez(e²s). 1. The testicles. 2. The posterior pair of the corpora quadrigemina. [I, 6 (K).]

TESTIBRACHIUM (Lat.), n. n. Te²st-i²-bra²k(bra³ch²)'i²-u³m(u⁴m). From *testis*, the testicle, and *brachium*, the forearm. Of Spitzka, the anterior brachium of the corpora quadrigemina. [K.]

TESTICLE, n. Te²st'i²k'l. Lat., *testis.* Fr., *testicule.* Ger., *Hoden.* 1. The sexual gland of the male, the office of which is to produce spermatozooids ; an ovoid glandular body (one on each side) measuring about 1½ inch vertically, 1 inch transversely, and 1¼ inch antero-posteriorly, suspended in the scrotum by its posterior border by the spermatic cord. It is contained within the tunica vaginalis and intimately invested with a fibrous capsule (the tunica albuginea) which divides into numerous compartments containing the seminiferous tubules. Up to about the eighth month of fœtal life it is in the abdominal cavity, but then passes down through the

inguinal canal into the scrotum. 2. Any structure furnishing spermatozooids. [L.]—**Displaced t.** Fr., *testicule remonté.* A t. abnormally situated, as within the pelvis or in the inguinal canal. [a, 34.]—**Inverted t.** A condition in which the attitude of the t. in the scrotum is reversed, so that the free surface presents posteriorly, and the epididymis is attached to the anterior instead of the posterior part of the gland. [E, 16.]—**Irritable t.** Neuralgia of the t. [L, 87 (a, 50).]—**Pulpy t.** [Baillie]. Medullary sarcoma of the t. [A, 42.]—**Scrofulous t.** See *Tubercular* ORCHITIS.—**Swelled t.** See EPIDIDYMITIS.—**Syphilitic t.** See *Syphilitic* ORCHITIS.—**Undescended t.** A congenital malformation in which one or both t's remain in the abdominal cavity or in the inguinal canal. [E.] Cf. MONORCHIS and CRYPTORCHIS.

TESTICONDUS (Lat.), n. m. Te^{2}st-i^2-ko^{2}nd'u^{3}s(u^{4}s). From *testis*, the testicle, and *condere*, to conceal. See CREMASTER and CRYPTORCHIS.

TESTICULAR, adj. Te^{2}st-i^{2}k'u^{2}l-a^{3}r. From *testiculus*, a testicle. Pertaining to or derived from the testicle. [a, 48.]

TESTICULATE, adj. Te^{2}st-i^{2}k'u^{2}l-at. Lat., *testiculatus* (from *testiculus*, the testicle). Fr., *testiculé*. Ger., *hodenförmig*. Consisting of two nearly spherical or ellipsoid bodies in close proximity. The roots of many orchids are examples. [a, 35.]

TESTICULE (Fr.), n. Te^{2}s-te-ku^{6}l. 1. The testicle. 2. Formerly, also, the ovary. [A, 44.]—**T. de chien.** See ORCHIS *mascula*.—**T. femelle.** See OVARY (1st def.).—**T. ourlien.** See *Parotitic* ORCHITIS.—**T. tuberculeux.** See *Tubercular* ORCHITIS.

TESTICULUS (Lat.), n. m. Te^{2}st-i^{2}k'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *testis*, the testicle. 1. See TESTICLE. 2. In the pl., *testiculi*, see TESTES (2d def.).—**Testiculi caballinorum in clibano siccati** [Edinb. Ph., 1699]. Horses' testicles dried in an oven. [A, 69.]—**T. caninus.** See ORCHIS *mascula*.—**T. odoratus.** The genus *Spiranthes*. [a, 35.]—**T. venereus.** See EPIDIDYMITIS and ORCHITIS *urethralis*.

TESTIS (Lat.), n. m. Te^{2}st'i^{2}s. Gen., *test'is*. See TESTICLE.—**Caput t.** See EPIDIDYMIS.—**Female testes.** An old term for the ovaries.—**Testes minores** [Variolus]. See PROSTATE.—**Testes muliebres.** See *Female testes*.

TESTITIS (Lat.), n. f. Te^{2}st-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From *testis*, the testicle. See ORCHITIS.

TEST-TYPES, n. pl. Te^{2}st'tips. Fr., *lettres d'essai*. Ger., *Probebuchstaben*. Letters of various sizes for trying the acuteness of vision. The most suitable objects are black letters of the block character on a white background, of sizes so arranged that they are seen plainly by the normal eye under an angle of 5'. The thickness of the lines is exactly one-fifth of the height of the letters, so that the different parts of the letter are included in an angle of 1', while the whole letter is included in an angle of 5'. [F.]—**Burchardt's t.-t.** A series of figures formed by groups of circles, which are reproduced by photographs in diminishing sizes until they become dots of extreme minuteness. [F.]—**Green's t.-t.** Types of different sizes forming an arithmetical series, the simplest form of Roman letters being used instead of the ordinary block letters. For testing the vision, the number of the smallest size of letters on the test-card should be less than the number of feet in the available distance. [F.]—**Jaeger's t.-t.** A series of letters and words of varying size, from No. 1, the equivalent of English brilliant, to No. 20, the equivalent of English 8-line. For the use of the illiterate, a cross (†) and an asterisk (*) of corresponding size were printed with each of the twenty varieties of type. [F.]—**Snellen's t.-t.** Letters and figures of various shapes and sizes. The formula usually employed is $S = d \div D$, where S denotes sight or vision; *d*, the distance at which a given type is seen under an angle of 5', and D the size of type seen at that distance. $S = 1$ was assumed by Snellen as normal vision. The principles of Snellen's types are: (1) detached, separate letters, black on a white ground, in irregular sequence; (2) the letter large Roman, square, the vertical strokes being $\frac{1}{5}$, the horizontal $\frac{1}{5}$ of the breadth of the letter; (3) exclusion of some letters which are much more difficult to distinguish than others; (4) ascending magnitudes from I to C C, the magnitude being proportional to the number; (5) the several magnitudes distinguishable by a sharp eye, in good light, at the distance of as many feet as the number amounts to. [F.]

TESTUDINATIO CRANII (Lat.), n. f. Te^{2}st-u^{2}d(ud)-i^{2}n-a-(a^3)'shi^2(ti^2)-o. See CAMAROSIS.

TESTUDO (Lat.), n. f. Te^{2}st-u^{2}d(ud)'o. Gen., *-ud'inis*. From *testa*, a shell. Lit., a tortoise. 1. Of Paracelsus, an atheromatous tumor. [H.] 2. See FORNIX *cerebri*.—**T. cerebri.** See *T.* (2d def.).—**T. scapulæ.** See DORSUM *of the scapula*.

TÊT (Fr.), n. Te^2. See TEST and TESTA.

TETANIC, adj. Te^{2}t-a^{2}n'i^{2}k. Gr., τετανικός. Lat., *tetanicus*. Fr., *tétanique*. Ger., *tetanisch*, *starrkrampfähnlich*. Pertaining to, due to, or resembling tetanus; as a n., an agent capable of causing a tetanus-like state.

TÉTANIE (Fr.), n. Ta-ta^3-ne. See TETANY.—**T. essentielle.** Tetany without observable cause; non-symptomatic tetany; thought by some to be a manifestation of hysteria. [Zaldivar (a, 18).]

TETANIE (Ger.), n. Tat-a^{3}n-e'. See TETANUS and TETANY.

TETANIFORM, adj. Te^{2}t-a^{2}n'i^2-fo^{2}rm. From τέτανος, tetanus, and *forma*, form. Fr., *tétaniforme*. See TETANOID.

TETANILLA (Lat.), n. f. Te^{2}t-a^{2}n(a^{3}n)-i^{2}l'la^3. Dim. of *tetanus* (*q. v.*). Of Trousseau, tetany. [a, 34.]

TETANINE, n. Te^{2}t'a^{2}n-en. Fr., *tétanine*. Ger., *Tetanin*. A yellow, poisonous alkaloid, $C_{14}H_{14}N_2O_4$, found in cultivations made to isolate the poison of tetanus and in limbs which have been amputated for tetanus. [Brieger, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," cxv, p. 483 (B).]

TETANIUM (Lat.), n. n. Te^{2}t-an(a^{3}n)'i^2-u^{3}m(u^{4}m). Of Magendie, strychnine. [B, 48, 78 (a, 14).]

TETANIZATION, n. Te^{2}t-a^{2}n-i^{2}z-a'shu^{3}n. The production of tetanus. [a, 48.]

TETANOCANNABINE, n. Te^{2}t-a^{2}n-o-ka^{2}n'a^{2}b-en. An alkaloid, resembling strychnine in its physiological properties, derived from *Cannabis indica*. [B, 81.]

TETANOID, adj. Te^{2}t'a^{2}n-oid. Gr., τετανώδης (from τέτανος, tetanus, and εἶδος, resemblance). Resembling tetanus. [D.]

TETANOMOTOR, n. Te^{2}t-a^{2}n-o mot'o^{2}r. From *tetanus* (*q. v.*), and *movere*, to move. Of Heidenhain, a small ivory hammer attached to an induction machine, and arranged so as to deliver a rapid series of blows on a nerve to induce tetanus. [Landois (K).]

TÉTANOS (Fr.), n. Ta-ta^3-no. See TETANUS.—**T. alternant.** See TETANY.—**T. avec prodromes.** See *Clonic* TETANUS.—**T. des nouveau-nés.** See TRISMUS *neonatorum*.—**T. intermittent.** See TETANY.—**T. opératoire.** See *Surgical* TETANUS.—**T. utérin.** See TETANUS *uteri*.

TETANOTOXINE, n. Te^{2}t-a^{2}n-o-to^{2}x'en. Fr., *tétanotoxine*. Ger., *Tetanotoxin*. A poisonous ptomaine, $C_5H_{11}N$, found in cultures of *Bacillus tetani*. It is less active than tetanine. [Brieger, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," 1886; "Ann. di chim. e di farmacol.," Sept., 1890, p. 144 (B).]

TETANUS (Lat.), n. m. Te^{2}t'a^{2}n(a^{3}n)-u^{3}s(u^{4}s). Gr., τέτανος. Fr., *tétanos*. Ger., *T.*, *Starrkrampf*, *Todtenkrampf*, *Tetanie*. 1. An infectious disease characterized by tonic spasm of the muscles with marked exacerbations. It is caused by the *Bacillus tetani*. It may occur either idiopathically or traumatically. It is more common in hot than in temperate climates, and in the colored than in the white race. It begins within fifteen days after an injury, with chills accompanied by stiffness of the neck and jaws that gradually develops into a tonic spasm. Eventually all the muscles are affected. Death may occur from heart failure, asphyxia, or exhaustion. [Osler (a, 34).] 2. A tonically contracted state of a muscle (*e. g.*, when induced experimentally).—**Apyretic t., Benign t.** See TETANY.—**Breaking t.** A t. (2d def.) occurring at the moment of breaking the circuit in a muscle through which a galvanic current is passing. [B, 12.]—**Cathodal-closure t.** A t. (2d def.) occurring at the cathode on closure of a galvanic circuit. Symbol, CaCTe, KaClTe, or, in German works, KaSTe. [B, 24.]—**Cathodal-duration t.** See GALVANOTONUS (2d def.).—**Cathodal-opening t.** A t. (2d def.) taking place at the cathode at the opening of a galvanic circuit. Symbol, CaOTe, or, in German works, KaOTe. [B.]—**Centric t.** Of M. Hall, t. in which the irritating cause was supposed to act directly upon the spinal cord. [a, 34.]—**Cephalic t.** Ger., *Kopft'*. Hydrophobic t.; so called because it only occurs in connection with injuries situated in the distribution of the cranial nerves. [a, 34.]—**Clonic t.** Of Juon, t. initiated by spasm of the tissues about the wound. [a, 34.]—**Closing t.** See *Making t.*—**Dysphagic t.** Hydrophobic t.; so called because of the dysphagia. [a, 34.]—**Eccentric t.** Of M. Hall, t. in which the irritating cause is in some part of the body distant from the spinal cord. [a, 34.]—**Electric t.** Tetanoid spasm produced by strong electrization of all the muscles of the body. [a, 34.]—**Expiratory t.** A permanent expiratory effort, the inspiratory impulses being inhibited. It may be produced by stimulating the superior laryngeal nerve. [J.]—**Extensor t.** A general tetanic spasm; so called because in it the extensors act more powerfully than the flexors. [Landois (K).]—**Faradaic t.** Electric t. produced by the faradaic current. [a, 34.]—**Head-t.** See *Cephalic t.*—**Heat t.** Tetanoid spasm caused by heat. ["Jour. of Phys.," xiii, p. 122 (a, 34).]—**Holotonic t.** See HOLOTETANUS.—**Hydrophobic t.** Of Rose, a variety of t., characterized by violent spasm of the pharynx and œsophagus. [a, 34.]—**Hyperalgic t.** Of Frastour, t. in which the pain is very acute. [L, 87 (a, 50).]—**Hysterical t., Imitative t.** A variety of hysteria which simulates t. and is distinguished from it by the age and sex of the individual, absence of pain, occasional clonic spasms, and the occasional intermission of all muscular rigidity. [D, 47.]—**Idiopathic t.** See *Rheumatic t.*—**Infantile t.** See *T. neonatorum*.—**Infectious t.** See *T.* (1st def.).—**Inspiratory t.** See *Inspiratory* STANDSTILL.—**Intermittent t.** See TETANY.—**Kochsalzt'** (Ger.). T. (2d def.) due to irritation with a solution of common salt. [a, 32.]—**Kopft'** (Ger.). See *Cephalic t.*—**Localized t.** Tetanoid spasm affecting a part or region. [a, 34.]—**Making t.** 1. A t. (2d def.) occurring at the moment of making the circuit in a muscle through which a galvanic current is passing. [B, 12.] 2. See GALVANOTONUS (2d def.).—**Malignant t.** T. that rapidly terminates fatally. [a, 34.]—**Obstetrical t.** See *Puerperal t.* and *T. neonatorum*.—**Opening t.** See *Breaking t.*—**Partial t.** See *Localized t.*—**Physiological t.** Of Marey, the contraction of a stimulated muscle that persists as a result of a number of fused contractions. [L, 89 (a, 34).]—**Puerperal t.** See *Uterine t.*—**Pyretic t.** See *T.* (1st def.).—**Remittent t.** [Moxon]. See TETANY.—**Respiratory t.** See *Respiratory* STANDSTILL.—**Rheumatic t.** A rare form of t. usually due to exposure to cold. [D.]—**Ritter's t.** See *Breaking t.*—**Secondary t.** The t. induced in a muscle when its nerve is brought in contact with a tetanized muscle. [Landois (K).]—**Spontaneous t.** See *Rheumatic t.*—**Strychnint'** (Ger.). See *T. toxicus*.—**Surgical t.** See *Traumatic t.*—**Symptomatic t.** An affection due to spinal disease in which there are tetanoid spasms. [D, 47.]—**T. anticus.** T. in which there is emprosthotonos. [a, 34.]—**T. apnoicus infantum.** See LARYNGISMUS *stridulus*.—**T. completus.** See *T.* (1st def.).—**T. dorsualis.** See OPISTHOTONUS.—**T. emprosthotonos.** See *T. anticus*.—**T. endemicus.** T. apparently endemic in certain localities. [A, 319 (a, 34).]—**T. febricosus.** See FEBRIS *tertiana asthmatica*.—**T. hystericus.** See *Hysterical t.*—**T. idiopathicus.** See *Rheumatic t.*—**T. intermittens.** See TETANY.—**T. lateralis.** T. with pleurothotonos. [a, 34.]—**T. nascentium, T. neonatorum.** T. or trismus occurring in newborn children.—**T. of the head.** See *Cephalic t.*—**T. posticus,**

T. postterganeus. See OPISTHOTONUS.—**T. rheumatica.** See *Rheumatic t.*—**T. toxicus.** T. induced by overdoses of nux vomica or its preparations. [D, 70.]—**T. trismus.** T. in which trismus is a prominent or only symptom. [α, 34.]—**T. universalis.** See *T.* (1st def.).—**T. uteri.** An abnormally strong, steady, and uninterrupted contraction of the uterus on its contents without inflammatory phenomena. [A, 20.] Cf. CONSTRICTIO *uteri spastico-inflammatoria.*—**Traumatic t.** T. supervening upon some bodily injury. [α, 34.]—**Tumultuary t.** Of Heidenhain, tetanoid spasm of a muscle caused by electricity. ["Jour. of Phys.," xiii, p. 122 (α, 34).]—**Uræmic t.** Uræmia with tetanoid spasms. [L, 87 (α, 34).]—**Uterine t.** 1. T. occurring during and in consequence of the puerperium; often observed in hot climates. [α, 34.] 2. See *T. uteri.*—**Voluntary t.** See *Physiological t.*

TETANY, n. Te^{2}t'a^{2}n-i^2. Lat., *tetanilla* (from τέτανος, tetanus). Fr., *tétanie.* Ger., *Tetanie.* A neurosis affecting especially children and young persons, characterized by attacks of tonic spasm of certain groups of muscles, generally of the limbs, with excessive sensitiveness of the peripheral motor nerves to electrical and mechanical stimuli. [Eulenburg (A, 319).]—**Acute relapsing t., Epidemic t.** Of von Jaksch, an acute infectious t., lasting only a few weeks and occurring among the working classes in Germany. [α, 34.]—**Gutturo-t.** A variety of stammering caused by a tetanoid spasm of the glottis. [α, 34.]—**Rheumatic t.** See *Epidemic t.*

TETARTÆUS (Lat.), adj. Te^{2}t-a^{2}rt(a^{3}rt)-e'(a^3'e^2)-u^{3}s(u^{4}s). Gr., τεταρταῖος. Quartan; as a n. f., *tetartœa* (Gr., τεταρταῖος [πυρετός]), a quartan fever. [α, 48.]

TETARTOPHYIA (Lat.), n. f. Te^{2}t-a^{3}rt-o^{2}f-i(u^6)'i^2-a^3. From τέταρτος, fourth, and φύειν, to produce. Of Sauvages, a quartan fever having short or imperfect intermissions. [α, 34.]

TÊTE (Fr.), n. Te^{2}t. See HEAD.—**T. de la corne postérieure.** See CAPUT *cornu posterioris.*—**T. de l'épididyme.** See GLOBUS *major of the epididymis.*—**T. dernière.** See *After-coming* HEAD.—**T. du corps strié.** See CORPUS *colliculi striati.*—**T. glénoïdale.** See *Basihyal* BONE (1st def.).—**T. restée (ou retenue) la dernière.** See *After-coming* HEAD.

TÉTÉE (Fr.), n. Ta-ta. The act of taking the breast, also the amount of milk taken by the infant at each draught. [A, 385.]

TÉTERELLE (Fr.), n. Ta-t're^{2}l. A nursing-bottle or its nipple; also a sort of breast-pump devised by Tier. [A, 96; L, 41 (α, 14).]—**T. biaspiratrice.** A glass cup to fit over the nipple, having near the apex two caoutchouc tubes, one of which the mother can suck, the other the child; used to facilitate feeding for weak infants. [α, 34.]

TETILLA (Lat.), n. f. Te^{2}t-i^{2}l'la^3. Fr., *tétille.* Of De Candolle, a genus of the *Saxifragaceæ*, consisting of a Chilean annual herb (*culantrillo*) the leaves of which are used as an astringent. [α, 35.]

TETIN (Fr.), n. T'-ta^{2}n^2. A nipple or teat. [L, 41 (α, 14).]

TETINE (Fr.), n. T'-ten. The udder. [α, 48.]

TETON (Fr.), n. T'-to^{2}n^2. A woman's breast or nipple. [A, 385 (α, 48).]

TETRABASIC, adj. Te^{2}t-ra^3-bas'i^{2}k. Fr., *tétrabasique.* Having a basicity of four; of an acid or acid salt, containing four atoms of replaceable hydrogen. [B.] Cf. TETRAHYDRIC.

TETRABENZOPINITE, n. Te^{2}t-ra^3-be^{2}nz-o-pin'it. A compound, $C_6H_8\langle^{O}_{(OC_7H_5O)_4}$, of benzoic acid and pinite. [B, 158 (α, 38).]

TETRABRACHIUS (Lat.), n. m. Te^{2}t-ra^3-bra^{2}k(bra^{3}ch^2)'i^2-u^{3}s(u^{4}s). From τετρα-, four, and βραχίων, the arm. A monster having four arms. [α, 34.]

TETRABROMAMIDOBENZENE, TETRABROMANILINE, n's. Te^{2}t-ra^3-brom-a^{2}m-i^{2}d-o-be^{2}nz'en, -a^{2}n'i^{2}l-en. Fr., *tétrabromaniline.* Ger., *Tetrabromanilin.* A substitution compound of aniline, $C_6HBr_4.NH_2 = C_6[H,Br,Br,Br,NH_2,Br,]$. [B, 4.]

TETRABROMBENZENE, n. Te^{2}t-ra^3-brom-be^{2}nz'en. Ger., *Tetrabrombenzol.* A four-atom bromine substitution product of benzene, $C_6H_2Br_4$. [B, 3 (α, 38); B, 4.]

TETRABROMETHENE, TETRABROMETHYLENE, n's. Te^{2}t-ra^3-brom-e^{2}th'en, -e^{2}th'i^{2}l-en. A substance, C_2Br_4, crystallizing from alcohol as laminæ of aromatic odor and burning taste. [B, 3 (α, 38).]

TETRABROMHYDROQUINONE, n. Te^{2}t-ra^3-brom-hid-ro-kwi^{2}n'on. Ger., *Tetrabromhydrochinon.* A substitution product, $C_6Br_4(OH)_2$, of hydroquinone. [B, 4.]

TETRABROMIDE, n. Te^{2}t-ra^3-brom'i^{2}d(id). Fr., *tétrabromure.* A bromine compound analogous to a tetrachloride. [B.]

TETRABROMMETAXYLENE, n. Te^{2}t-ra^3-brom-me^{2}t-a^3-zil'en. Ger., *Tetrabrommetaxylol.* A substance, $C_8H_6Br_4 = C_6(Br,CH_3,Br,CH_3,Br,Br,)$, melting at 241° C. [B, 4.]

TETRABROMMETHANE, n. Te^{2}t-ra^3-brom-me^{2}th'an. Ger., *Tetrabrommethan.* The compound CBr_4. [B, 4.]

TETRABROMPHTHALIC ACID, n. Te^{2}t-ra^3-brom-tha^{2}l'-i^{2}k. An acid, $C_6Br_4(CO.OH)_2$, crystallizing from boiling water as acicular crystals, from benzene as prismatic crystals. [B, 3 (α, 38).]

TETRABROMPYROCATECHIN, n. Te^{2}t-ra^3-brom-pir-o-ka^{2}t'e^{2}k-i^{2}n. Fr., *acide tétrabromo-pyrocatéchine.* Ger., *Tetrabrombrenzcatechin.* A substance, $C_6Br_4(OH)_2 = C_6(Br,OH,OH,Br,Br,Br,)$, prepared by the action of an excess of bromine on pyrocatechin. [B, 4.]

TETRABROMQUINONE, n. Te^{2}t-ra^3-brom-kwi^{2}n'on. Ger., *Tetrabromchinon.* A four-atom bromine substitution product, $C_6Br_4O_2$, of quinone. [B, 4.]

TETRABROMSTEARIC ACID, n. Te^{2}t-ra^3-brom-ste-a^{2}r'i^{2}k. Fr., *acide tétrabromo-stéarique.* An acid, $C_{18}H_{32}Br_4O_2$, occurring as large tabular crystals. [B, 3 (α, 38).]

TETRABROMTHIOPHENE, n. Te^{2}t-ra^3-brom-thi'o-fen. A four-atom bromine substitution compound, C_4Br_4S, of thiophene. [B, 3.]

TETRACARBON, n. Te^{2}t-ra^3-ka^{3}rb'o^{2}n. A radicle containing four atoms of carbon. [B.]

TETRACARPELLARY, adj. Te^{2}t-ra^3-ka^{3}rp'e^{2}l-a-ri^2. Lat., *tetracarpellaris* (from τετρα-, four, and *carpellum*, a carpel). Composed of four carpels. [α, 35.]

TETRACERA (Lat.), n. f. Te^{2}t-ra^{2}s(ra^{3}k)'e^{2}r-a^3. From τετρα-, four, and κέρας, a horn. Fr., *tétracère.* Ger., *Raspelstrauch.* A genus of tropical climbing plants, of the *Dilleniaceæ.* [α, 35.]—**T. breyniana.** A Brazilian shrub used like *T. oblongata.* [α, 35.]—**T. oblongata.** A Brazilian species having the properties of *Davilla brasiliana.* Baths and fumigations of the plant are used in swellings of the limbs and testicles. [α, 35.]—**T. Rheedii.** A Malabar and East Indian species, used as an astringent, especially in aphthæ. [α, 35.]—**T. tigarea.** Fr., *tétracère rude.* Red creeper (*liane rouge*) of Guiana and the Antilles. Used as a sudorific and diuretic and in syphilis, intermittent fever, chlorosis, and scurvy. [α, 35.]

TETRACETATE, n. Te^{2}t-ra^{2}s'e^{2}t-at. Ger., *Tetracetat.* An acetate containing four molecules of the acetic-acid radicle. [B.]

TETRACETOSALICIN, n. Te^{2}t-ra^{2}s-e^{2}t-o-sa^{2}l'i^{2}s-i^{2}n. Ger., *Tetracetatsalicin.* A crystalline body, $C_{13}H_{14}(C_2H_3O_4).O_7$. [B, 4.]

TETRACETYLENE, n. Te^{2}t-ra^{2}s-e^{2}t'i^{2}l-en. See under ACETYLENE.

TETRACETYLMORPHINE, n. Te^{2}t-ra^{2}s-e^{2}t-i^{2}l-mo^{2}rf'en. A substitution compound, $C_{34}H_{34}(C_2H_3O)_4N_2O_6$, of morphine, formed by the action of acetic anhydride in excess. [B, 2.]

TETRACHÆNIUM (Lat.), n. n. Te^{2}t-ra^{2}k(ra^{3}ch^2)-e'(a^3'e)-ni^2-u^{3}m(u^{4}m). For deriv., see *Tetra-** and ACHÆNIUM. Fr., *tétrakène.* A fruit formed by four united achenes. [α, 35.]

TETRACHEIRUS (Lat.), n. m. Te^{2}t-ra^3-kir(ch^{2}e^2'i^{2}r)'u^{3}s(u^{4}s). From τετρα-, four, and χείρ, the hand. A monster having four hands. [α, 34.]

TETRACHLORACETAMIDE, n. Te^{2}t-ra^3-klor-a^{2}s-e^{2}t'a^{2}m-i^{2}d(id). A four-atom chlorine substitution compound, $C_2HCl_4NO = C_2Cl_3O.NHCl$, of acetamide. [B, 2.]

TETRACHLORACETONE, n. Te^{2}t-ra^3-klor-a^{2}s'e^{2}t-on. See under CHLORACETONE.

TETRACHLORANILINE, n. Te^{2}t-ra^3-klor-a^{2}n'i^{2}l-en. A substance, $C_6H_3NCl_4$, found in three isomeric forms, all occurring as acicular crystals: *asymmetric t.*, $C_6[H,Cl,Cl,Cl,NH_2,Cl,]$; *symmetric t.*, $C_6[H,Cl,Cl,NH_2,Cl,Cl,]$; and *adjacent t.*, $C_6[H,Cl,Cl,Cl,Cl,NH_2,]$. [B, 3 (α, 38).]

TETRACHLORBENZENE, n. Te^{2}t-ra^3-klor-be^{2}nz'en. Ger., *Tetrachlorbenzol.* A four-atom chlorine substitution compound, $C_6H_2Cl_4$, of benzene. [B, 4.]

TETRACHLORETHANE, n. Te^{2}t-ra^3-klor-e^{2}th'an. Fr., *tétrachlor-éthane.* Ger., *Tetrachloräthan.* A colorless, oily liquid, $C_2H_2Cl_4 = CH_2Cl.CCl_3$. [B, 4.]

TETRACHLORETHER, n. Te^{2}t-ra^3-klor-eth'u^{5}r. Ger., *Tetrachloräther.* A thick liquid, $C_4H_6Cl_4O = CCl_3.CHCl.O.C_2H_5$, having a fennel-like odor. [B, 4 (α, 38).]

TETRACHLORETHYL, n. Te^{2}t-ra^3-klor-e^{2}th'i^{2}l. A radicle, C_2HCl_4. [α, 38.]

TETRACHLORETHYLENE, n. Te^{2}t-ra^3-klor-e^{2}th'i^{2}l-en. A mobile liquid, C_2Cl_4. [B, 3 (α, 38).]

TETRACHLORHYDROQUINONE, n. Te^{2}t-ra^3-klor-hid-ro-kwi^{2}n'on. A derivative of tetrachlorquinone, $C_6Cl_4(OH)_2$. [B, 4.]

TETRACHLORIDE, n. Te^{2}t-ra^3-klor'i^{2}d(id). Fr., *tétrachlorure.* A compound consisting of an element or radicle united with chlorine in the proportion of four atoms of the latter to a certain definite quantity of the former assumed as the unit of comparison. [B.]

TETRACHLORMETHANE, n. Te^{2}t-ra^3-klor-me^{2}th'an. Ger., *Tetrachlormethan.* An oily liquid, CCl_4, of ethereal odor. [B, 4.]

TETRACHLORNAPHTHALENE, n. Te^{2}t-ra^3-klor-na^{2}f'-tha^{2}l-en. A crystalline substance, $C_{10}H_4Cl_4$, known in five isomeric forms. [B, 4 (α, 38).]

TETRACHLOROXETHYL, n. Te^{2}t-ra^3-klor-o^{2}x-e^{2}th'i^{2}l. A univalent radicle, C_2HCl_4O. [B.]

TETRACHLORPHTHALIC ACID, n. Te^{2}t-ra^3-klor-tha^{2}l'-i^{2}k. The compound $C_6Cl_4(CO.OH)_2$. [B, 3 (α, 38).]

TETRACHLORQUINHYDRONE, n. Te^{2}t-ra^3-klor-kwi^{2}n-hid'ron. The compound $C_{12}H_6Cl_4O_4 + 2H_2O$. [B, 3 (α, 38).]

TETRACHLORQUINOL, n. Te^{2}t-ra^3-klor-kwi^{2}n'o^{2}l. The compound $C_6Cl_4(OH)_2$. [B, 3.]

TETRACHLORQUINONE, n. Te^{2}t-ra^3-klor-kwi^{2}n'on. A four-atom chlorine substitution compound, $C_6Cl_4O_2$, of quinone. [B; B, 3 (α, 38).]

TETRACHLORTOLUENE, n. Te^{2}t-ra^3-klor-to^{2}l-u^2'en. Ger., *Tetrachlortoluol.* A substitution product, $C_6HCl_4.CH_3$, of toluene. [B, 3 (α, 38); B, 4.]

TETRACHOTOMOUS, adj. Te^{2}t-ra^3-ko^{2}t'o^{2}m-u^{3}s. Lat., *tetrachotomus* (from τέτραχα, in four parts, and τέμνειν, to cut). Dividing into four parts or branches. [α, 35.]

TETRACHROMATE, n. Te^{2}t-ra^3-krom'at. A compound of a basic oxide with four molecules of chromium trioxide. Such compounds may also be regarded as salts of a dibasic tetrachromic acid. [B.]

TETRACHROMIC ACID, n. Te2t-ra3-krom'i2k. Fr., *acide tétrachromique*. A hypothetical dibasic acid, $H_2Cr_4O_{13} = 4CrO_3 + H_2O$. [B.]

TETRACOCCUS (Lat.), n. m. Te2t-ra3-ko2k'ku3s(ku4s). From τετρα-, four, and κοκκός (see Coccus). A micrococcus occurring in clusters divided in two directions, forming groups of four. [a, 34.]—**T. variolæ.** Of Klebs, the *Streptococcus variolæ*. [a, 34.]

TETRACODEINE, n. Te2t-ra3-kod-e'en. A base, $C_{144}H_{168}N_8O_{24} = 4(C_{36}H_{42}N_2O_6)$, polymeric with codeine, and formed from the latter by the action of phosphoric or sulphuric acid. Administered to animals, it produces vomiting, diarrhœa, and salivation, with great vital depression. [B, 2.]

TETRACRYLIC ACID, n. Te2t-ra2k-ri2l'i2k. 1. An oily liquid, $C_7H_{12}O_2$, smelling somewhat like caproic and valeric acids. 2. Monobasic crotonic acid. [B, 3 (a, 38) ; B, 93 (a, 14).]

TETRAD, n. Te2t'ra2d. 1. An element having an atomicity of four ; a quadrivalent element. [B.] 2. See Tetracoccus.

TETRADYNAMOUS, adj. Te2t-ra3-di2n'a2m-u3s. Lat., *tetradynamus* (from τετρα-, four, and δύναμις, power). Fr., *tétradyname*. Ger., *viermächtig*. Of an andrœcium, having four long and two short stamens, as in the *Tetradynamæ* (a family of the *Cruciferæ*) and the *Tetradynamia* (the 15th class in the Linnæan System). [a, 35.]

TETRAEDRAL, adj. Te2t-ra3-ed'r'l. Lat., *tetraedrus* (from τετρα-, four, and ἕδρα, a seat). Fr., *tétraèdre*. Ger., *tetraedrisch*, *vierflächig*. Having four triangular sides. [a, 35.]

TETRAETHYL, n. Te2t-ra3-e2th'i2l. See Tetrethyl.—**T'tetrazone.** A hydrazine derivative, $(C_2H_6)_4.N_4. = (C_2H_6)_2 : N-N : N-N : (C_2H_6)_2$; an oily liquid having a garlicky odor, acting as a base, and forming unstable salts. [B.]

TETRAETHYLAMMONIUM (Lat.), n. n. Te2t-ra3-e2th(ath)-i2l(u6l)-a2m(a3m)-mon'i2-u3m(u4m). Fr., *tétréthylammonium*. Ger., *Tetraäthylammonium*. A univalent radicle, $C_8H_{20}N' = (C_2H_6)_4 : N-$, obtained by Hofmann in 1851 by decomposing its iodide ; very deliquescent hair-like crystals. It absorbs carbon dioxide from the air, is strongly alkaline, and saponifies fats. Concentrated, it burns the tongue. It is as bitter as quinine, but odorless. It has a caustic action upon the epidermis, and an unctuous alkaline feel between the fingers. It is not decomposed by galvanism. It forms numerous salts, including a sulphate, nitrate, phosphate, carbonate, hydrochloride, hydrobromide, iodide, and bromide, and beautiful double salts with platinum, gold, mercury, etc. It was discovered by T. A. Edison and F. Peterson in 1891 to be a remarkably good solvent of uric acid and its salts, and was first employed in medicine ("N. Y. Med. Jour.," 1893) in rheumatic and gouty affections, both internally and by cataphoresis. [B ; a, 31.]

TETRAFLUORIDE, n. Te2t-ra3-flu2'o2r-i2d(id). A fluorine compound analogous to a tetrachloride (*q. v.*). [B.]

TETRAGONANTHUS (Lat.), n. m. Te2t-ra3-go2n(gon)-a2nth-(a3nth)'u3s(u4s). From τετράγωνος, four-cornered, and ἄνθος, a flower. A genus of the *Gentianeæ*. [a, 35.]—**T. elatior.** A bitter North Siberian herb used as a domestic remedy. [a, 35.]

TETRAGONIA (Lat.), n. f. Te2t-ra3-gon'i2-a3. From τετρα-, four, and γωνία, an angle. Fr., *tétragone*, *tétragonie*. A genus of the *Ficoideæ*. The *Tetragoniaceæ* are the *Ficoideæ* ; the *Tetragonieæ*, a division of that order. [a, 35.]—**T. cornuta, T. expansa, T. halimifolia.** Fr., *tétragonie* (ou *tétragone*) *étalée*, *épinard de la Nouvelle-Zélande*. Ger., *neuseeländischer Spinat*. New Zealand ice-plant (or spinach), found also in Australia, Tasmania, China, Japan, etc. ; a culinary herb used as an antiscorbutic and pectoral. [a, 35.]—**T. implexicoma.** Tasmanian ice-plant. Australian (or New Zealand) spinach, Victorian bower spinach ; a frutescent species having the same properties as *T. expansa*. [a, 35.]

TETRAGONUM (Lat.), n. n. Te2t-ra3-gon'u3m(u4m). A four-sided figure. [a, 48.]

TETRAGONUS (Lat.), adj. Te2t-ra3-gon'u3s(u4s). Gr., τετράγωνος (from τετρα-, four, and γωνία, an angle). Four-cornered ; as a n. m., a quadrilateral structure.—**T. febris flavæ.** See Micrococcus *versatilis*.—**T. genæ** [Cowper]. See Platysma *myoides*.

TETRAGYNIAN, TETRAGYNOUS, adj's. Te2t-ra3-ji2n'i2-a3n, -ra2j'i2n-u3s. Lat., *tetragynus* (from τετρα-, four, and γυνή, a woman. Fr., *tétragyne*. Ger., *vierweibig*. Having four carpels or styles, belonging to *Tetragynia* (Fr., *tétragynie*), a Linnæan class of plants with a gynœcium thus characterized. [a, 35.]

TETRAHIT (Lat.), n. n. indecl. Te2t'ra3-hi2t. Fr., *tétrahit*. The genus *Galeopsis*. [a, 35.]

TETRAHYDRATE, n. Te2t-ra3-hid'rat. See Tetrahydroxide.

TETRAHYDRIC, adj. Te2t-ra3-hid'ri2k. Lat., *tetrahydricus*. Fr., *tétrahydrique*. Ger., *tetrahydrisch*. Of acids or acid salts, containing four replaceable atoms of hydrogen. [B.]

TETRAHYDRIDE, n. Te2t-ra3-hid'ri2d(rid). A compound of an element or radicle with four atoms of hydrogen. [B.]

TETRAHYDROCINCHONINE, n. Te2t-ra3-hid-ro-si2n2'kon-en. Ger., *Tetrahydrocinchonin*. An amorphous substance, $C_{20}H_{28}N_2O$. [B, 4 (a, 38).]

TETRAHYDROMETAXYLENEDICARBONIC ACID, n. Te2t-ra3-hid-ro-me2t-a3-zil-en-di-ka3rb-o3n'i2k. See Camphoric *acid*.

TETRAHYDROPARAMETHYLOXYQUINOLINE, TETRAHYDROPARAQUINANISOL, n's. Te2t-ra3-hid-ro-pa2r-a3-me2th-i2l-o2x-i2-kwi2n'o2l-en, -kwi2n-a2n'i2s-o2l. See Thalline.

TETRAHYDROPAROXYQUINOLINE, n. Te2t-ra3-hid-ro-pa2r-o2x-i2-kwi2n'o2l-en. A poisonous and antipyretic artificial alkaloid, $C_9H_{11}NO$, in the form of a very soluble, somewhat sweetish powder. [Huchard, "Union méd.," Jan. 3, 1885, p. 13.]

TETRAHYDROPHTHALIC ACID, n. Te2t-ra-hid-ro2f-tha2l'i2k. The compound $C_6H_8(CO.OH)_2$. [B, 3 (a, 38).]

TETRAHYDROPYROMELLITIC ACID, n. Te2t-ra3-hid-ro-pir-o-me2l-i2t'i2k. The compound $C_{10}H_{10}O_8$. [B, 4 (a, 38).]

TETRAHYDROXIDE, n. Te2t-ra3-hid-ro2x'i2d(id). A compound of an element or radicle with four molecules of hydroxyl. [B.]

TETRAIODIDE, n. Te2t-ra3-i'od-i2d(id). An iodine compound analogous to a tetrachloride (*q. v.*). [B.]

TETRAISOPROPYLPHOSPHONIUM (Lat.), n. n. Te2t'ra3-i2s-o(o3)-pro(pro3)-pi2l(pu6l)-fo2s(fos)-fon'i2-u3m(u4m). A radicle, $P.(C_3H_7)'_4$. [B.]

TETRALKYL, n. Te2t-ra2l'ki2l. Ger., *T*. A compound consisting of 4 alkyl molecules. [B, 4.]—**T'ammonium.** A univalent radicle, consisting of ammonium in which all 4 hydrogen atoms are replaced by alkyls. [B, 4.]

TETRALLYLARSONIUM (Lat.), n. n. Te2t-ra2l(ra3l)-li2l-(lu6l)-a3rs-on'i2-u3m(u4m). A univalent radicle, $As(C_3A_5)'_4$. [B.]

TETRAMASTHOUS, adj. Te2t-ra3-ma2sth'u3s. Lat., *tetramasthus* (from τετρα-, four, and μασθός, the breast). Fr., *tétramaze*. Ger., *vierbrüstig*. Having four mammæ. [a, 34.]

TETRAMERA (Lat.), n. n. pl. Te2t-ra2m(ra3m)'e2r-a3. From τετρα-, four, and μέρος, a part. Fr., *tétramère*. A division of the *Coleoptera* in which the tarsi are made up of four joints. [a, 48.]

TETRAMEROUS, adj. Te2t-ra2m'e2r-u3s. Of a flower, having four members in a circle. [a, 35.]

TETRAMETAPHOSPHATE, n. Te2t-ra3-me2t-a3-fo3s'fat. A polymeric derivative of a metaphosphate. [B.]

TETRAMETHYL, n. Te2t-ra3-me2th-i2l. A chemical group, $(CH_3)_4$. [a, 38.]—**T'alloxantin.** See Amalic *acid*.—**T'ammonium, T'arsonium.** See the major list.—**T'benzene.** A hydrocarbon, $C_{10}H_{14}$, isomeric with ethylxylene, diethylbenzene, butylbenzene, and cymene. It is itself known in three isomeric forms : *symmetrical-t.* or *durene*, $C_6[CH_3,CH_3,H,CH_3,CH_3,H,]$, a crystalline solid of camphor-like odor ; *asymmetrical-t.* or *isodurene*, $C_6[CH_3,-H,CH_3.CH_3,CH_3,H,]$, a slightly aromatic liquid ; and *adjacent-t.* or *prehnitene*, $C_6[CH_3,CH_3,CH_3,CH_3,H,H,]$, also a liquid. [B, 4 ; B, 3 (a, 38).]—**T'benzoic acid.** An acid, $C_{11}H_{14}O_2$, of which two isomeric varieties are known : *adjacent t. acid*, $(CH_3)_4C_6H.CO.OH$, an oily liquid ; and *symmetrical t. acid*, tabular crystals having a silvery lustre. [B, 3 (a, 38).]—**T'enediamine.** See Putrescine.—**T'-ethylene glycol.** See Pinacone (1st def.).—**T'isoallylene.** See Heptine (2d def.).—**T'leucothionine.** See Methylene *white*.—**T'murexide.** See Murexoin.—**T'paraphenylenediamine.** A substance, $C_{10}H_{16}N_2 = C_6H_4\langle^{N(CH_3)_2}_{N(CH_3)_2}$, occurring as foliate crystals. It has been used by Wurster to prepare a test paper, *Tetrapapier*, by the deep violet coloring of which the presence of ozone, hydrogen peroxide, or various other substances can be shown. [B, 270 (a, 38).]—**T'phosphonium.** A radicle. $P.(CH_3)'_4$. [B.]—**T'putrescine.** A very poisonous base, $C_8H_{20}N_2 = C_4H_8-(CH_3)_4N_2$, obtained by the substitution of methyl in putrescine. [Brieger, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cxv, p. 483 (B).]—**T'pyridine.** See Parvoline.—**T'stibonium.** See the major list.—**T'succinic acid.** A dibasic crystalline acid, $C_8H_{14}O_4 = \left\{ \begin{matrix} C(CH_3)_2.COOH \\ C(CH_3)_2COOH \end{matrix} \right.$, isomeric with suberic acid. [B, 4.]—**T'thionine.** See Methylene *white*.—**T'thionine chloride.** See Methylene *blue*.

TETRAMETHYLAMMONIUM (Lat.), n. n. Te2t-ra3-me2th-i2l(u6l)-a2m(a3m)-mon'i2-u3m(u4m). Fr., *tetraméthylammonium*, *triméthylamine*. Ger., *T*. A univalent radicle, $-N\equiv(CH_3)_4 = NC_4H_{12}'$. [B.]—**T. hydrate, T. hydroxide.** Ger., *T'hydrat*. A crystalline body, $N.(CH_3)_4.OH$, acting as a powerful caustic. [B.]—**T. iodide.** A body, $N(CH_3)_4I$, forming white acicular crystals. [B.]

TETRAMETHYLARSONIUM (Lat.), n. n. Te2t-ra3-me2th-i2l(u6l)-a3rs-on'i2-u3m(u4m). A univalent radicle, $As.(CH_3)_4'$. [B.]—**T. hydrate.** A substance, $As(CH_3)_4OH$, occurring as tabular crystals. [B.]—**T. iodide.** A substance, $As(CH_3)_4I$, occurring as colorless prismatic or laminar crystals. It combines with iodine to form t. periodide, $As(CH_3)_4I_3$. [B, 4.]

TETRAMETHYLSTIBONIUM (Lat.), n. n. Te2t-ra3-me2th-i2l(u6l)-sti2b-on'i2-u3m(u4m). A univalent radicle, $Sb(CH_3)_4'$, analogous to tetramethylammonium. [B.]—**T. hydrate, T. hydroxide.** A mass of white, deliquescent crystals, $Sb.(CH_3)_4.OH$, acting as a powerful base. [B, 3.]—**T. iodide.** Ger., *T'jodür*. A crystalline body, $Sb.(CH_3)_4.I$. [B, 3.]

TETRAMINE, n. Te2t'ra2m-en. See under Amine.

TETRAMOLYBDATE, n. Te2t-ra3-mo2l-i2b'dat. A molybdate containing four atoms of molybdenum. [B.]

TETRAMORPHINE, n. Te2t-ra3-mo2rf'en. A base, $C_{136}H_{152}N_8O_{24}$, polymeric with morphine. [B, 2.]

TETRAMYLENE, n. Te2t-ra2m'i2l-en. A polymeric modification, $C_{20}H_{40} = 4C_5H_{10}$, of amylene, a brownish oily liquid. [B, 2.]

TETRANDROUS, adj. Te2t-ra2nd'ru3s. Lat., *tetrandrus* (from τετρα-, four, and ἀνήρ, a man). Fr., *tétrandre*. Ger., *tetrandrisch*, *viermännig*. Having four stamens. The *Tetrandria* of Linnæus are a class of plants having the flowers perfect and t. [a, 35.]

TETRANE, n. Te2t'ran. Ger., *Tetran*. Butane ; so called because it contains four carbon atoms. [B.]

TETRANEURA (Lat.), n. f. Te2t-ra3-nu2r'a3. From τετρα-, four, and νεῦρον, a nerve. A genus of the *Hemiptera* having wings marked with four nervures. [a, 48.]—**T. ulmi.** An insect that produces nut-galls on the elm. [a, 48.]

TETRANITROARBUTIN, n. Te2t-ra3-nit-ro-a2rb'u2t-i2n. Ger., *T*. The compound $C_{25}H_{30}(NO_2)_4O_{14}$. [B, 4.]

TETRANITROMETHANE, n. Te^{2}t-ra^3-nit-ro-me^{2}th'an. A colorless oily liquid, $C(NO_2)_4$. [B, 4.]

TETRANTOXIDE, n. Te^{2}t-ra^{2}nt-o^{2}x'i^{2}d(id). A combination consisting of several atoms of one radicle united with one fourth of the same number of atoms of oxygen. [B, 3.]

TETRAOPHTHALMUS (Lat.), n. m. Te^{2}t-ra^3-o^{2}f-tha^{2}l(tha^{3}l)'-mu^{3}s(mu^{4}s). From τετρα-, four, and ὀφθαλμός, the eye. A monster having four eyes. [α, 34.]

TETRAOXYANTHRAQUINONE, n. Te^{2}t-ra^3-o^{2}x-i^2-a^{2}nth-ra^3-kwi^{2}n'on. A variety of oxyanthraquinone, $C_{14}H_4.(OH)_4O_2$, of which two isomeric varieties are known, anthrachrysone and rufiopin. [B, 2.]

TETRAPAPIER (Ger.), n. Te^{2}t-ra^3-pa^{3}p-er'. See under TETRAMETHYL *paraphenylenediamine.*

TETRAPETALOUS, adj. Te^{2}t-ra^3-pe^{2}t'a^{2}l-u^{3}s. Lat., *tetrapetalus* (from τετρα-, four, and πέταλον, a leaf). Fr., *tétrapétale.* Ger., *vierblättrig, vierblumenblättrig.* Of a corolla, having four petals. The *Tetrapetalæ, Tetrapetalæ incompletæ,* and *Tetrapetalæ irregulares* are (Hill) each a class of *Herbæ* having as types respectively the genera *Œnothera, Clematis,* and *Lupinus.* The *Tetrapetalæ uniformes* are the *Cruciferæ* of Adanson. [α, 35.]

TETRAPHARMACON (Lat.), **TETRAPHARMACUM** (Lat.), n's n. Te^{2}t-ra^3-fa^{3}rm'a^{2}k(a^{3}k)-o^{2}n, -u^{3}m(u^{4}m). From τετρα-, four, and φάρμακον, a drug. Of the old ph's, a remedy, especially an ointment, composed of four ingredients. [B, 38, 78 (α, 14).]

TETRAPHENOL, n. Te^{2}t-ra^3-fe^{2}n'o^{2}l. See TETROL.

TETRAPHENYL, n. Te^{2}t-ra^3-fe^{2}n'i^{2}l. The chemical group $(C_6H_5)_4$. [α, 38.]—**T'ethane.** The compound $(C_6H_5)_2CH.CH(C_6H_5)_2 = C_{26}H_{22}$. [B, 3, 4, 93 (α, 38).]—**T'ethylene.** A hydrocarbon, $C_{26}H_{20}$. [B, 4, 93 (α, 38).]—**T'guanidine.** Fr., *tétraphénylguanidine.* Ger., *T'guanidin.* A monacid base, $C_{25}H_{21}N_3 = H.N:C\langle^{N(C_6H_5)_2}_{N(C_6H_5)_2}$. [B, 3 (α, 38); B, 4.]—**T'methane.** The compound $C_{25}H_{20} = C(C_6H_5)_4$. [B, 4 (α, 38).]—**T'tetrazone.** A colorless crystalline substance, $(C_6H_5)_2N.N:N.N(C_6H_5)_2 = C_{24}H_{20}N_4$. [B, 3 (α, 38); B, 4.]

TETRAPHOSPHIDE, n. Te^{2}t-ra^3-fo^{2}s'fi^{2}d(fid). A phosphorus compound analogous to a tetrachloride (*q. v.*). [B.]

TETRAPHOSPHORDIMETHYL, n. Te^{2}t-ra^3-fo^{2}s-fo^{2}r-di-me^{2}th'i^{2}l. See under METHYL *phosphide.*

TETRAPHOSPHORIC ACID, n. Te^{2}t-ra^3-fo^{2}s-fo^{2}r'i^{2}k. A hexabasic acid, $H_6P_4O_{13}$, known only through its salts, the tetraphosphates. [B, 3.]

TETRAPHYLLOUS, adj. Te^{2}t-ra^3-fi^{2}l'u^{3}s. Lat., *tetraphyllus* (from τετρα-, four, and φύλλον, a leaf). Fr., *tétraphylle.* Ger., *vierblättrig.* Having four leaves (sepals or petals). [α, 35.]

TETRAPLEURA (Lat.), n. f. Te^{2}t-ra^3-plu^{2}r'a^3. From τετρα-, four, and πλευρά, a rib. Fr., *tétrapleure.* 1. Of Bentham, a genus of the *Leguminosæ,* formerly referred to *Adenanthera.* 2. Of Parlatore, the genus *Tornabenia.* [α, 35.]—**T. heteropleura.** The only species of *T.* (1st def.); a West African tree. The seed pulp is used as a detergent. [α, 35.]

TETRARGENTIC, adj. Te^{2}t-ra^{3}j-e^{2}nt'i^{2}k. For deriv., see *Tetra-** and ARGENTUM. Containing four atoms of silver in the molecule. [B.]

TETRASCELUS (Lat.), n. n. Te^{2}t-ra^{2}s(ra^{3}s)'se^{2}l(ke^{2}l)-u^{3}s(u^{4}s). From τετρα-, four, and σκέλος, the leg. A monster having four lower extremities. [α, 34.]

TETRASEPALOUS, adj. Te^{2}t-ra^3-se^{2}p'a^{2}l-u^{3}s. From τετρα-, four, and *sepalum,* a sepal. Having four sepals. [α, 35.]

TETRASPORE, n. Te^{2}t'ra^3-spor. From τετρα-, four, and σπορά, a spore. Fr., *tétraspore.* A spore belonging to one of the groups that contain four spores each. [α, 35.]

TETRASTER (Lat.), n. m. Te^{2}t-ra^{2}st(ra^{3}st)'u^{5}r(ar). Fr., *tétraster.* From τετρα-, four, and ἀστήρ, a star. A cross-shaped figure formed in the ovum by the junction of a portion of the rays of four adjacent astra. [A, 15.] See also *Auerbach's* VACUOLE.

TETRASTICHIASIS (Lat.), n. f. Te^{2}t-ra^3-sti^{2}k(sti^{2}ch^2)-i^2-a-(a^3)'si^{2}s. Gen., *-as'eos (-as'is).* From τετράστιχος, in four rows. That form of congenital anomaly of the eyelids in which the lashes are arranged in four rows. [F.]

TETRASTICHOUS, adj. Te^{2}t-ra^{2}st'i^{2}k-u^{3}s. From τετρα-, four, and στίχος, a row. In phyllotaxy, arranged in four vertical ranks. [α, 35.]

TETRASTOMA (Lat.), n. n. Te^{2}t-ra^{2}st(ra^{3}st)'o^{2}m-a^3. Gen., *-stom'atos (-atis).* From τετρα-, four, and στόμα, the mouth. An entozoon of the order *Trematoda.* [L, 16.]—**T. renale.** A species found rarely in the urine. It is ovoid, about ¼ inch long, and provided with four suckers at the caudal extremity. [L, 16.]

TETRASULPHIDE, n. Te^{2}t-ra^3-su^{3}lf'i^{2}d(id). A sulphur compound analogous to a tetrachloride (*q. v.*). [B.]

TETRATELLURITE, n. Te^{2}t-ra^3-te^{2}l'u^{2}r-it. A compound of a normal tellurite with tellurium dioxide, containing four atoms of tellurium. [B, 3.]

TETRATHIONIC ACID, n. Te^{2}t-ra^3-thi-o^{2}n'i^{2}k. A dibasic acid, $H_2S_4O_6$. [B, 3.]

TETRATOMIC, adj. Te^{2}t-ra^{2}t-o^{2}m'i^{2}k. Lat., *tetra-atomicus* (from τετρα-, four, and ἄτομος, uncut). Fr., *tétratomique.* Ger., *vieratomig.* Containing four atoms; of a compound, containing four atoms of replaceable hydrogen; of a radicle, having its combining capacity saturated by union with four hydrogen atoms. [B.]

TETRAVALENT, adj. Te^{2}t-ra^{2}v'a^3-l'nt. See QUADRIVALENT.

TETRETHYL, n. Te^{2}t-re^{2}th'i^{2}l. Fr., *tétréthyle.* Ger., *Tetraäthyl.* The chemical group $(C_2H_5)_4$. [α, 38.]—**T. benzene.** A liquid, $C_6H_2(C_2H_5)_4$, of slight aromatic odor. [B, 3 (α, 38).]—**T'ethylenediamine.** The compound $C_2H_4:N_2.(C_2H_5)_4$. [B, 4.]—**T'phosphonium.** A radicle, $P(C_2H_5)'_4$. [B.]—**T'urea.** See under ETHYLUREA.

TETRETHYLARSONIUM (Lat.), n. n. Te^{2}t-re^{2}th-i^{2}l(u^{6}l)-a^{3}rs-on'i^2-u^{3}m(u^{4}m). A univalent radicle, $As(C_2H_5)_4$. [B.]—**T. chloride.** A substance, $As(C_2H_5)_4.Cl + 4H_2O$, occurring as deliquescent crystals. [B.]—**T. hydrate.** A deliquescent white mass, $As(C_2H_5)_4.OH$. [B.]—**T. iodide.** The compound $As(C_2H_5)_4I$. [B.]

TETRETHYLENE, n. Te^{2}t-re^{2}th'i^{2}l-en. A radicle, $(C_2H_4)_4 = C_8H_{16}$. [B.]—**T. alcohol, T. trioxydihydrate.** A liquid, $(C_2H_4)_4.O_3.(OH)_2$. [B, 2.]

TETRETHYLIC, adj. Te^{2}t-re^{2}th-i^{2}l'i^{2}k. Containing four molecules of ethyl. [B.]

TETRETHYLSTIBONIUM (Lat.), n. n. Te^{2}t-re^{2}th-i^{2}l(u^{6}l)-sti^{2}b-on'i^2-u^{3}m(u^{4}m). A univalent radicle, $Sb.(C_2H_5)'_4$. [B.]—**T. iodide.** The compound $Sb.(C_2H_5)_4.I$. [B, 4.]

TETRINIC ACID, n. Te^{2}t-ri^{2}n'i^{2}k. A monobasic crystalline acid, according to Demorçay, $C_4H_4O_2$ or $(C_4H_4O_2)_3.H_2O$; according to more recent observations, $C_5H_6O_3 = C_4H_5O.COOH$. [B, 3.]

TETROL, n. Te^{2}t'ro^{2}l. Fr., *tétrol.* Ger., *T.* A colorless liquid, C_4H_4O, of peculiar odor, obtained by the distillation of the salts of pyromucic acid, and also found in the distillate from pinewood. [B, 3, 4.]

TETROLIC ACID, n. Te^{2}t-ro^{2}l'i^{2}k. A monobasic acid, $C_4H_4O_2 = CH_3.C\equiv C.CO.OH$. [B, 3 (α, 38); B, 4.]

TETRONAL, n. Te^{2}t'ro^{2}n-a^{2}l. A substance, $^{C_2H_5}_{C_2H_5}\rangle C\langle^{SO_2.C_2H_5}_{SO_2.C_2H_5}$, occurring as shining tabular crystals. It acts as a hypnotic. [B, 270 (α, 38).]

TETROXIDE, n. Te^{2}t-ro^{2}x'i^{2}d(id). Fr., *tétroxyde.* An oxygen compound analogous to a tetrachloride (*q. v.*). [B.]

TETROXYBENZOIC, adj. Te^{2}t-ro^{2}x-i^2-be^{2}nz-o'i^{2}k. Benzoic with the addition of four atoms of oxygen. [B.]

TETROXYCHLORIC ACID, n. Te^{2}t-ro^{2}x-i^2-klor'i^{2}k. See PERCHLORIC *acid.*

TETRURET, n. Te^{2}t-ru^{2}r'et. A substance, $C_4H_7N_5O_4 = H_2N-CO-(NH)-CO-(NH)-CO-(NH)-CO-NH_2$, formed from biuret by decomposition in hydrochloric-acid gas. [B.]

TETRYL, n. Te^{2}t'ri^{2}l. See BUTYL.—**Hydrated t. oxide, T. alcohol, T. hydrate.** See BUTYL *alcohol.*

TETRYLENE, n. Te^{2}t'ri^{2}l-en. Fr., *tétrylène.* See BUTYLENE.—**T'dicarbonic** (or **T'dicarboxylic**) **acid.** The compound $C_4H_6(CO.OH)_2$. [B, 3 (α, 38).]

TETRYLIC, adj. Te^{2}t-ri^{2}l'i^{2}k. Fr., *tétrylique.* Containing or derived from tetryl. [B.]—**T. alcohol.** See BUTYL *alcohol.*

TETTER, n. Te^{2}t'u^{5}r. Gr., ἕρπης. A.-S., *teter, tetr.* Lat., *serpigo, herpes.* Fr., *dartre.* Ger., *Zitter, Zittermal, Flechte.* A popular term for various common skin eruptions, especially the different forms of eczema. [G.]—**Brawny t.** See SEBORRHŒA *capitis.*—**Crusted t.** See ECZEMA *impetiginodes.*—**Dry t.** Dry or scaly eczema; eczema siccum, eczema squamosum. [G.]—**Eating t.** See LUPUS (2d def.).—**Honeycomb t.** See ECZEMA *impetiginodes.*—**Humid t.** See ECZEMA.—**Milky t.** See CRUSTA *lactea.*—**Moist t.** See ECZEMA.—**Pustular t.** See IMPETIGO (5th def.).—**Running t.** Eczema, especially eczema impetiginodes.—**Scaly t.** See ECZEMA *squamosum* and PSORIASIS (1st def.).

TETTER, v. tr. Te^{2}t'u^{5}r. To affect with tetter.

TETTERWORT, n. Te^{2}t'u^{5}r-wu^{5}rt. See CHELIDONIUM *majus* (1st def.) and SANGUINARIA *canadensis.*

TETY, n. A pustulo-crustaceous affection of the skin, chiefly about the nostrils and the mouth, among the natives of Madagascar, all of whom are said to have it sooner or later, but no one more than once. [Lacaze, "Jour. de méd. de Paris," June 17, 1882, p. 725.]

TEUCRIN, n. Tu^{2}k'ri^{2}n. 1. A non-nitrogenous substance obtained from *Teucrium fruticans.* ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 128 (α, 50).] 2. Of Mosetig, an aqueous extract prepared from *Teucrium scordium.* Injected subcutaneously, it produces a sudden rise of temperature. T. injections have been used for cold tuberculous abscesses, fungous adenitis, actinomycosis, and lupus. ["Med. Record," March 4, 1893, p. 274 (α, 50).]

TEUCRIUM (Lat.), n. n. Tu^{2}k'ri^2-u^{3}m(u^{4}m). Gr., τεύκριον (from Τεῦκρος, Teucer, king of Troy). Fr., *germandrée.* Ger., *Gamander.* Germander; a genus of the *Ajugeæ.* [α, 35.]—**T. aureum.** Ger., *goldgelber Gamander.* Golden germander (or poly) of southern Europe. It and the related species *T. flavescens* were formerly official as *herba polii lutei.* [α, 35.]—**T. botrys.** Fr., *botrys, germandrée femelle.* Ger., *Traubengamander.* Jerusalem oak, the jagged germander of middle and southern Europe; a balsamic, aromatic species (formerly official as *herba botryos chamædryoides*), used as a tonic, stimulant, and febrifuge. [α, 35.]—**T. campanulatum.** Bell-shaped germander; a procumbent, smooth, square-stemmed herb sometimes confounded with other species of the genus. It is found in moist places in the Levant, Balearic Islands, Spain, Sicily, etc. [B, 35.]—**T. canadense.** American germander, wood-sage. It has a garlic-like odor, and is used like *T. scordium.* [α, 35.]—**T. capitatum.** Fr., *germandrée en tête.* Ger., *köpfiger Gamander.* A European and Siberian shrub. The herb, *herba polii montani (Anglorum),* is used like that of *T. polium,* of which Koch regards this as a variety. [α, 35.]—**T. chamædrys.** Fr., *calamendrier, chêneau, chênette, germandrée officinale, herbe des fièvres, petit chêne, sauge amère, thériaque d'Angleterre.* Ger., *gemeiner* (oder *ächter,* oder *edler*) *Gamander, Erdweihrauchkraut, Frauenbiss, Bergskordienkraut.* Wall (or

wild) germander, the χαμαίδρυς of Dioscorides; an undershrub with a bitter, aromatic, slightly astringent taste, growing in southern and central Europe. The leaves and tops (*herba chamædryos*, seu *teucrii chamædryos*) were formerly used in uterine diseases, and as an alterative and febrifuge, etc. [α, 35.]—**T. creticum.** Ger., *cretischer Gamander.* A shrub of Candia, Egypt, and the Orient; perhaps the πόλιον ἕτερον of Dioscorides. The leafy flowering tops, *summitates polii cretici* (seu *polii angustifolii*, seu *rosmarini stœchadis facie*), were formerly used like those of *T. polium.* [α, 35.]—**T. flavescens.** Ger., *gelblicher Gamander.* A species growing in southern Europe, especially southern France, used like *T. aureum.* [α, 35.]—**T. flavum.** Fr., *germandrée* (ou *pouliot*) *jaune.* Ger., *gelber Gamander.* A fragrant, balsamic, bitter shrub found in southern Europe. The herb, *herba teucrii flavi*, was formerly used like that of *T. chamædrys.* [α, 35.]—**T. fruticans.** Ger., *strauchiger Gamander.* Tree-germander of northern Africa and parts of southern Europe. The Neapolitans, who call it *erba di Santo Lorenzo*, use it as a vulnerary. [α, 35.]—**T. inflatum.** Fr., *germandrée renflée.* A species found in the Antilles, having the properties of *T. capitatum.* [α, 35.]—**T. iva.** See Ajuga *iva* and Ajuga *chamæpitys.*—**T. lucidum.** 1. Shining germander; a very smooth herbaceous species with tall, erect, square stems, crimson flowers in whorls, and shining leaves. It is closely allied to, but distinct from, *T. chamædrys.* 2. Of Sibthorp, *T. flavum.* [α, 35.]—**T. maritimum, T. marum.** Fr., *germandrée maritime, marum vrai, herbe au chat.* Ger., *Katzengamander, Katzenkraut, Moschuskraut, Mastichkraut, Mastixkraut.* Cat-thyme, Syrian herb-mastic; a plant of southern and middle Europe, Egypt, and Asia Minor, containing a peculiar stearoptene and having bitter, aromatic, stimulant properties. The flowering tops, *herba* (seu *summitates*) *mari veri* (seu *mari syriaci*), *herba Cyriaci* (seu *Syriaci*, seu *cortusi*, seu *mastichinæ*), *fruticulus teucrii mari floridus*, were formerly used in hysteria, amenorrhœa, nervous prostration, etc., and more recently, in the form of syrup and confection, in spasmodic cough. It was formerly substituted for lavender flowers in the preparation of pulvis asari compositus. It acts as an anti-spasmodic and errhine. [α, 35.]—**T. massiliense.** Sweet-scented (or apple-scented) germander of Mediterranean regions. All parts are clothed with a soft, velvet-like pubescence, and exhale, if touched, a peculiar spicy odor compared to that of mellow apples. [α, 35.]—**T. montanum.** Fr., *germandrée de montagne, thym blanc.* Ger., *Berggamander, Bergpolei.* An undershrub of middle and southern Europe. The leaves and tops, *herba* (seu *summitates*) *polii montani* (*Germanorum*), were formerly used like those of *T. polium.* [α, 35.]—**T. officinale.** See *T. chamædrys.*—**T. palustre.** See *T. scordium.*—**T. polium.** Ger., *Polei-Gamander, Bergpolei.* The *cahade* of the Arabs, probably the πόλιον of Dioscorides, cat-thyme, hulwort, poly germander; a Mediterranean species. The aromatic leaves and flowering tops, *herba* (vel *summitates*) *polii montani* (seu *montani Gallorum*, seu *monspeliaci*, seu *maritimi*, seu *erecti*), were formerly used in catarrh and asthma and in aromatic fomentations, and more recently, it is said, successfully, in cholera. [α, 35.]—**T. pyrenaicum.** Pyrenean germander; a creeping or diffusely branched species with orbicular, crenate, hairy leaves, and with flowers in dense tufts variegated with pale-yellow and purple. [α, 35.]—**T. scordioides.** A species growing in southern Europe, having the properties of *T. scordium.* [α, 35.]—**T. scordium.** Fr., *germandrée scordium, chamarras, germandrée aquatique* (ou *d'eau*). Ger., *Knoblauchgamander, Lachenknoblauch, Wasserlauch, Wasserbathengel, Skordien-Gamander, Skordienkraut.* Garlic- (or water-) germander of Europe; a species with a garlic-like smell and a bitter, somewhat pungent taste. It is not now used, but the entire plant (excluding the root), was formerly employed as a tonic, diaphoretic, and anthelminthic, as an antidote, and as an application to foul ulcers, under the names *herba scordii* (*vulgaris*, seu *nostratis*), *herba chamædryos aquaticæ* (seu *palustris*), etc. [α, 35.]—**T. scorodonia, T. silvestre.** Fr., *germandrée des bois, baume* (ou *sauge*, ou *germandrée*) *sauvage, fausse sauge des bois, faux chamarras* (ou *scordium*). Ger., *gemeine Skordonie, wilde Salbei, Ackersalbei, Ackersalbeikraut.* Hind-heal, mountain- (or garlic-, or wood-) sage, wood-germander of western and southern Europe; formerly official as *herba scorodoniæ* (seu *salviæ agrestis*, seu *salviæ silvestris*), and used like *T. scordium*, though less active. [α, 35.]—**T. thea.** Fr., *germandrée théa, thé commun des Cochinchinois.* Cochin-China tea; used as a digestive. [α, 35.]—**T. tomentosum.** A variety of *T. montanum.* [α, 35.]—**T. verum.** See *T. fruticans.*

TEUFELSBRUT-KIELKOPF (Ger.), n. Toif'e^{2}ls-brut-kel-ko^{2}pf. The translation of an ancient term for the fleshy or blood mole.

TEVETOSIN, n. Te^{2}v-e^{2}t-os'i^{2}n. See Thevetosin.

TEXTURAL, adj. Te^{2}xt'u^2-r'l. From *textura*, texture. Fr., *t.* Ger., *geweblich.* Pertaining to the structure or texture of a tissue or part. [J.]

TEXTURE, n. Te^{2}xt'u^{2}r. Gr., ἱστός. Lat., *textura* (from *texere*, to weave). Fr., *t.* Ger., *Textur, Bau.* 1. See Tissue. 2. The arrangement and connection of the structural elements forming tissues and organs. The t. is also dependent on the character of the structural elements. [J, 16, 21, 22.] 3. Of mineral waters, the quality which causes them to impart a sensation of smoothness or roughness to the skin on its contact with them. [B, 5.]—**Alimentary t.** That portion of a body which is affected by the process of digestion; the digestible portion of a substance. [K.]

TEXTUS (Lat.), n. m. Te^{2}xt'u^{3}s(u^{4}s). Gen., *text'us.* From *texere*, to weave. See Tissue.—**T. cellularis intermedius** (seu **laxus**). The part of the areolar tissue which does not penetrate the various organs. [J, 16.]—**T. cellularis parenchymalis** (seu **stipatus**). That part of the areolar tissue which penetrates the various organs and gives the proper tissue-elements support and connection. [J, 16.]—**T. cellularis strictus.** Connective tissue which forms envelopes for various organs. [J, 16.]—**T. fibrosi.** See Stroma (1st and 2d def.).—**T. organicus.** See *T. cellularis parenchymalis.*—**T. papillaris.** See Corpus *papillare.*

THÆRIA (Lat.), n. f. Ther'(tha^3'e^{2}r)-i^2-a^3. See Radesyge.

THAL (Ger.), n. Ta^{3}l. See Vallecula *Reilii.*

THALAMENCEPHALON, n. Tha^{2}l-a^{2}m-e^{2}n-se^{2}f'a^{2}l-o^{2}n. From θάλαμος, an inner room, and ἐγκέφαλος, the brain. Ger., *Zwischenhirn.* That portion of the embryonic brain which includes the region of the third ventricle, the primary ocular vesicles, and the infundibulum. [A, 5.]

THALAMIFLORAL, THALAMIFLOROUS, adj's. Tha^{2}l-a^{2}m-i^2-flo'r'l, -flor'u^{3}s. Lat., *thalamiflorus* (from θάλαμος, an inner chamber, and *flos*, a flower). Fr., *thalamiflore.* Ger., *bodenblüthig, fruchtbodenblüthig.* Having the petals and stamens inserted upon the receptacle, as in the *Thalamifloræ* (Fr., *thalamiflores*), which are De Candolle's first subclass of dicotyledons. The *Thalamifloria* (of Dumortier, an order of the *Bitegmia*) comprise the *Nymphæaceæ, Hydropeltideæ*, etc. [α, 35.]

THALAMIUM (Lat.), n. n. Tha^{2}l(tha^{3}l)-am(a^{3}m)'i^2-u^{3}m(u^{4}m). From θάλαμος, an inner chamber. Fr., *thalamion.* Ger., *Fruchtkörper* (1st def.). In lichens, (1) the thecium; (2) an organ of the apothecium, consisting of erect colorless threads, arising from the hypothecium and containing protoplasm; they press upon the thecæ and thus assist in expelling the spores. [α, 35.]

THALAMUS (Lat.), n. m. Tha^{2}l(tha^{3}l)'a^{2}m(a^{3}m)-u^{3}s(u^{4}s). Gr., θάλαμος. Fr., *thalame.* Ger., *T.* 1. See *Optic t.* 2. In botany, a receptacle; of some authors, a calyx. [α, 35.]—**Optic t.** Fr., *couche optique.* Ger., *Sehhügel.* An oval, grayish mass seen on the floor of the lateral ventricle, after removing the fornix and velum interpositum. It is bounded anteriorly and externally by the corresponding corpus striatum, from which it is separated by the tænia semicircularis. To its inner side lies the third ventricle, of which it forms the lateral wall. Its lower surface forms the covering of the descending cornu of the lateral ventricle. Posteriorly it ends in two rounded masses, the geniculate bodies. The optic t. consists essentially of gray matter, with a thin external covering of white. In its interior are several distinct ganglionic masses or nuclei. [I, 15 (K).] Cf. *Median* centre *of Luys.*—**T. corporum cavernosorum.** See Crus *penis.*—**T'fasern der Haube.** Certain nerve-fibres of the tegmentum which enter the optic thalamus. [I, 17 (K).]—**T. fructificationis.** Ger., *Befruchtungsstuhl.* 1. The torus of a flower. 2. The hymenium of *Fungi.* 3. The hypothecium of lichens. [α, 35.]—**T. nervi optici** (seu **opticorum**), **T. opticus.** See *Optic t.*—**T. regalis.** See Pericardium.—**T'wurzel des Tractus opticus** (Ger.). Those fibres of the optic tract which may be traced directly to the optic t. [I, 6 (K).]

THALAMUSSTIEL (Ger.), n. Ta^{3}l'a^{3}m-us-stel. The reflected portion of the anterior pillar of the fornix, which turns upward from the corpora albicantia to enter the corresponding optic thalamus. [I, 17 (K).]—**Unterer T.** The inferior peduncle of the optic thalamus. [I, 10 (K).]—**Vorderer T.** The anterior peduncle of the optic thalamus. [I, 10 (K).]

THALASSIOPHYTES, n. pl. Tha^{2}l-a^{2}s'i^2-o-fitz. Lat., *thalassiophyta, thalassiophytæ* (from θαλάσσιος, marine, and φυτόν, a plant). Fr., *t.* Marine *Algæ.* [α, 35.]

THALASSOPHOBIA (Lat.), n. f. Tha^{2}l(tha^{3}l)-la^{2}s(la^{3}s)-o(o^3)-fob(fo^{2}b)'i^2-a^3. From θάλασσα, the sea, and φόβος, panic fear. A morbid dread of the sea. [α, 34.]

THALASSOTHÉRAPIE (Fr.), **THALASSOTHERAPIE** (Ger.), n's. Ta^{3}l-a^{3}s-o-tar-a^{3}p-e, -pe'. From θάλασσα, the sea, and θεραπεία, treatment. Treatment by means of residence near the sea, sea-bathing, or a sea-voyage. [A, 319 (α, 21).]

THALGUT (Ger.), n. Ta^{3}l'gut. A place in the canton of Berne, Switzerland, where there are saline, chalybeate, and gaseous springs. [L, 30, 41, 49 (α, 14).]

THALICTRINE, n. Tha^{2}l-i^{2}k'tren. An alkaloid found in *Thalictrum macrocarpum*, giving that plant its toxic properties. It acts as a cerebro-spinal poison. [Doassans (B).]

THALICTRUM (Lat.), n. n. Tha^{2}l(tha^{3}l)-i^{2}kt'ru^{3}m(ru^{4}m). Gr., θάλικτρον, θαλίητρον. Fr., *pigamon.* Ger., *Wiesenraute.* Meadow-rue; a genus of ranunculaceous herbs. [α, 35.]—**T. anemonides.** See Anemone *thalictroides.*—**T. angustifolium, T. angustissimum.** A diuretic European species. [α, 34.]—**T. aquilegifolium, T. aquilegium, T. atro-purpureum.** Fr., *pigamon à feuilles d'ancolie, colombine plumeuse* (ou *plumacée*). Feathered (or tufted) columbine, Spanish-tuft, columbine meadow-rue; an Alpine species having the properties of *T. angustifolium.* [α, 35.]—**T. confertum, T. Cornuti.** Fr., *pigamon du Canada.* Canadian tall meadow-rue; a North American species, regarded as a powerful alexipharmac. [α, 35.]—**T. flavum.** Fr., *pigamon* (*des prés*), *fausse rhubarbe, pied de Milan, rhubarbe des pauvres* (ou *des paysans*), *thalictron commun.* Ger., *gelbe Wiesenraute, Wasserraute, Feldrhabarber, Feldraute.* False (or poor man's) rhubarb, yellow-flowered (or maiden-hair, or small) meadow-rue of Europe and northern Asia. The root and herb, *radix* et *herba thalictri* (seu *rhabarbari pauperum*, seu *rhei pauperum*, seu *pseudo-rhabarbari*, seu *rutæ pratensis*), are diuretic and purgative, and color the secretions yellow. The root is used in jaundice and as a febrifuge, and, together with the herb, as an application in coxalgia and backache. [α, 35.]—**T. foliolosum.** An East Indian species. The root is tonic and aperient, and is used for atonic dyspepsia and as a febrifuge: it is sometimes substituted for coptis-root. [α, 35.]—**T. macrocarpum.** A species found in the Pyrenees. The root contains a neutral principle (macrocarpin) and a poisonous principle (thalictrine). [α, 35.]—**T. mexicanum.** 1. Of Hernandez, a species the root of which is used in ophthalmia and as a diuretic. Cf. *T. revolutum.* 2. Of De Candolle, an imperfectly known Mexican species, used like the preceding. [α, 35.]—**T. revolutum.** Ger., *umgerollte*

Wiesenraute. A species growing in the southern United States and in Mexico; probably identical with *T. mexicanum* (1st def.). [α, 35.]—**T. sinense.** Fr., *pigamon de Chine.* A Chinese species with laxative and aperient roots. [α, 35.]

THALLEINE, n. Tha^{2}l'e-en. A compound of thalline with an alcoholic radicle or compound ether. [B.]

THALLEIOQUINE, n. Tha^{2}l-i'o-kwen. Fr., *thalléiochine.* Ger., *Thalleiochin.* A substance formed by treating a quinine salt with chlorine or a concentrated solution of calcium chloride. It is a green, resinous mass. [B, 93 (α, 14).]

THALLIC, adj. Tha^{2}l'i^{2}k. Fr., *thallique.* Containing thallium as a trivalent radicle. [B.]

THALLINE, adj. Tha^{2}l'i^{2}n. Pertaining to the thallus; consisting of the thallus; resembling a thallus. [α, 35.]

THALLINE, n. Tha^{2}l'en. From θαλλός, a green twig. Lat., *thallinum.* Fr., *t.* Ger., *Thallin.* Syn.: *tetrahydroparaquinanisol.* An artificial alkaloid of the quinoline group, $C_9H_{10}.OCH_3.N = C_{10}H_{13}NO$, forming white prismatic crystals. It is employed, together with several of its salts, as an antipyretic and in gonorrhœa. [Huchard, "Union méd.," Jan. 3, 1885, p. 13; "Annal. di chim. medico-farm. e di farmacol.," Mar., 1885, p. 209; "Proc. of the Am. Pharm. Assoc.," xxxvi, p. 468 (α, 50).]—**T. hydrochlorate, T. hydrochloride.** A compound of t. with hydrochloric acid. It forms hygroscopic crystals. [B.]—**T. sulphate.** A white crystalline powder having an odor resembling that of anisol and a saline taste; used in gonorrhœa. [B.]—**T. tartrate.** A white crystalline powder having an odor resembling that of coumarine and a bitter, saline taste. [B.]

THALLIOUS, adj. Tha^{2}l'i^2-u^{3}s. Fr., *thallieux.* Containing thallium as a univalent radicle. [B.]

THALLIUM (Lat.), n. n. Tha^{2}l(tha^{3}l)'li^2-u^{3}m(u^{4}m). From θαλλός, a green twig. Fr., *t.* Ger., *T.* A metallic element discovered by Crookes in 1861; soft, malleable, bluish-white, of leaden lustre and crystalline structure, melting at 290° C. In compounds it acts partly as a univalent, partly as a trivalent radicle. Sp. gr., 11·8; atomic weight, 203·6; symbol, Tl. It is an energetic irritant poison. [B, 3, 5.]—**T. bromide.** A compound of t. with bromine. T. monobromide, TlBr., a pale-yellow substance. is known. [B, 3.]—**T. chloride.** See *T. monochloride* and *T. trichloride.*—**T. cyanide.** A body, TlCN, forming laminar crystals. [B, 3.]—**T. hydroxide.** A strongly alkaline substance, Tl.OH + H_2O, forming yellow acicular crystals. [B, 3.]—**T. iodide.** A compound of t. with iodine. The moniodide, TlI, a crystalline salt, is known. [B, 3.]—**T. monochloride.** A body, TlCl, forming cubical crystals. [B, 3.]—**T. monoxide.** A black powder, Tl_2O, readily soluble in water. [B, 3.]—**T. oxide.** See *T. monoxide* and *T. trioxide.*—**T. sulphide.** A compound of t. with sulphur. The monosulphide, Tl_2S, is a black crystalline substance. [B, 3.] See also *T. trisulphide.*—**T. trichloride.** A crystalline substance, $TlCl_3$. [B, 3.]—**T. trioxide.** A dark, red powder, Tl_2O_3. [B, 3.]—**T. trisulphide.** A black, amorphous substance, Tl_2S_3, which is brittle when cold, but becomes soft like pitch when warmed. [B, 3.]

THALLOCHLOR, n. Tha^{2}l'o^2-klo^{2}r. Fr., *thallochlore.* Ger., *T., Flechtengrün.* A green coloring matter, distinct from chlorophyll, found by Berzelius in Iceland moss. [B, 270.]

THALLOGENOUS, adj. Tha^{2}l-o^{2}j'e^{2}n-u^{3}s. Fr., *thallogène.* From θαλλός, a young shoot, and γεννᾶν, to engender. Producing a thallus, pertaining to the thallogens (Lat., *Thallogenæ*; Fr., *thallogènes*), which are the thallophytes. [α, 35.]

THALLOID, adj. Tha^{2}l'oid. From θαλλός, a young shoot, and εἶδος, resemblance. Ger., *lagerartig.* See THALLINE, adj.

THALLOME, n. Tha^{2}l'om. A structure having the characters partly of a leaf and partly of a stem. [α, 35.]

THALLOPHYTES, n. pl. Tha^{2}l'o-fits. Lat., *thallophyta* (from θαλλός, a young shoot, and φυτόν, a plant). Fr., *thallophytes.* Ger., *Lagerpflanzen, Thallophyten, Thalluspflanzen.* The thallogens, a section of cryptogams; so called because there is no clear differentiation of the plant-body into root, stem, and leaf. They comprise the lichens, the *Fungi* (including the *Myxomycetes* and *Schizomycetes*), and the *Algæ* (including the *Cyanophyceæ*). [α, 35.]

THALLOPSORÆ (Lat.), n. f. pl. Tha^{2}l(tha^{3}l)-lo^{2}ps-or'e(a^3-e^2). From θαλλός, a green shoot, and ψώρα, the itch. Of Reichenbach, the *Dermatopsoræ.* [α, 35.]

THALLUS (Lat.), n. m. Tha^{2}l(tha^{3}l)'lu^{3}s(lu^{4}s). Gr., θαλλός (from θάλλειν, to abound). Fr., *thalle.* Ger., *Lager, T.* A plant-body not differentiated into leaf and stem, especially the frond of *Algæ* or the vegetative system of lichens. [α, 35.]

THALPSIS (Lat.), n. f. Tha^{2}lps(tha^{3}lps)'i^{2}s. Gen., *thalp'seos* (*-is*). Gr., θάλψις (from θάλπειν, to heat). See FOMENTATION.

THANASIMOUS, adj. Tha^{2}n-a^{2}s'i^{2}m-u^{3}s. Gr., θανάσιμος (from θνήσκειν, to die). Lat., *thanasimus.* Fr., *thanasime.* Deadly, mortal. [L, 50 (α, 14).]

THANATERETHISIS (Lat.), n. f. Tha^{2}n(tha^{3}n)-a^{2}t(a^{3}t)-e^{2}r-e^{2}th'i^{2}s-i^{2}s. From θάνατος, death, and ἐρεθίζειν, to irritate. Fr., *thanatéréthisie.* Of C. H. Schultz, fatal irritation. [L, 50 (α, 14).]

THANATODOCIMASTER (Lat.), n. m. Tha^{2}n(tha^{3}n)''a^{2}t-(a^{3}t)-o(o^3)-do^{2}s(do^{2}k)-i^{2}m-a^{2}st(a^{3}st)'u^{5}r(ar). Gen., *-er'os* (*-is*). From θάνατος, death, and δοκιμαστήρ, an examiner. Ger., *Todesanzeiger.* A sign or evidence of death. [L, 50 (α, 48).]

THANATOID, adj. Tha^{2}n'a^{2}t-oid. Gr., θανατώδης (from θάνατος, death, and εἶδος, resemblance). Lat., *thanatodes.* Fr., *thanateux.* Deadly, causing death. [L, 50.]

THANATOLOGY, n. Tha^{2}n-a^{2}t-o^{2}l'o-ji^2. Lat., *thanatologia* (from θάνατος, death, and λόγος, understanding). Fr., *thanatologie.* Ger., *Todeslehre.* The science of the causes, etc., of death. [D, 3.]

THANATOMANIA (Lat.), n. f. Tha^{2}n(tha^{3}n)-a^{2}t(a^{3}t)-o(o^3)-man(ma^{3}n)'i^2-a^3. From θάνατος, death, and μανία, mania. Suicidal mania. [α, 34.]

THANATOMETER, n. Tha^{2}n-a^{2}t-o^{2}m'e^{2}t-u^{5}r. From θάνατος, death, and μέτρον, a measure. A thermometer introduced into the stomach or rectum in order to determine the fact of death by the fall of the internal temperature. [L, 41, 50 (α, 14).]

THANATOPHOBIA (Lat.), n. f. Tha^{2}n(tha^{3}n)-a^{2}t(a^{3}t)-o(o^3)-fob(fo^{2}b)'i^2-a^3. From θάνατος, death, and φόβος, fear. Fr., *thanatophobie.* Ger., *Todesfurcht.* Morbid fear of death. [α, 34.]

THANATOSIS (Lat.), n. f. Tha^{2}n(tha^{3}n)-a^{2}t(a^{3}t)-os'i^{2}s. Gen., *-os'eos* (*-is*). Gr., θανάτωσις (from θάνατος, death). Fr., *thanatose.* See MORTIFICATION.

THANATOTYPHUS (Lat.), n. m. Tha^{2}n(tha^{3}n)-a^{2}t(a^{3}t)-o(o^3)-tif(tu^{6}f)'u^{3}s(u^{4}s). From θάνατος, death, and τῦφος (see TYPHUS). Malignant typhus. [L, 50 (α, 14).]

THAPSIA (Lat.), n. f. Tha^{2}ps(tha^{3}ps)'i^2-a^3. Gr., θαψία (2d def.). Fr., *thapsie* (1st and 3d def's). Ger., *Böskraut.* 1. Deadly carrot; a genus of herbs typical of a tribe (*Thapsiæ* of Endlicher, *Thapsidæ* of Lindley, *Thapsieæ* of Koch) of the *Umbelliferæ.* 2. Of the ancients, see *T. asclepium.* 3. In pharmacy, *T. garganica.* [α, 35.]—**Emplastrum thapsiæ extensum.** See *Sparadrap thapsiæ.*—**Oleum thapsiæ compositum.** Sp., *aceite de tapsia compuesto* [Sp. Ph.]. A preparation made by digesting 1 part each of t.-root, rosemary-leaves, and red wine and 4 parts of olive-oil for four days, heating until the wine is evaporated, straining, and filtering. [B, 95 (α, 38).]—**Radix thapsiæ.** Fr., *thapsie* (*racine*).. Sp., *tapsia* (*raiz*). The root of *T. garganica.* [B, 95 (α, 38).]—**Resin of t.** Lat., *resina thapsiæ.* Fr., *résine de t.* Sp., *resina de tapsia.* A resinous substance obtained from the root-bark of *T. garganica* by extracting with 90-per-cent. alcohol (92 per cent. [Belg. Ph.]), distilling off the alcohol, washing, and evaporating to the consistence of a (soft [Sp. Ph.]) extract [Fr. Cod.] (of honey [Belg. Ph.]). [B, 95 (α, 38).]—**Sparadrap thapsiæ.** Fr., *sparadrap de t.* Sp., *espadrapo de tapsia.* A plaster consisting of 420 parts of yellow wax, 150 each of colophony, white pitch, and terebinthina cocta, 50 each of larch turpentine and glycerin, and 75 of resin of t. [Fr. Cod.]; of 38 of yellow wax, 137 each of colophony, terebinthina cocta, and Burgundy pitch, 46 each of larch turpentine, glycerin, and honey, and 69 of resin of t. [Belg. Ph.]; or of 360 of yellow wax, 300 of colophony, 250 of elemi, 80 of resin of t., and 50 of turpentine [Sp. Ph.]. [B, 95 (α, 38).]—**T. apulia, T. asclepium.** Fr., *laser d'Esculape* (ou *d'Hercule*). Ger., *schmalblättriges Böskraut.* Ethiopian cumin, the θαψία of Dioscorides. The root contains an acrid, irritant juice, and was formerly used as a purgative and in eruptive diseases. It is still used as an embrocation in rheumatism. [α, 35.]—**T. fœtida.** Ger., *stinkendes Böskraut.* Stinking carrot of Spain and the southern European islands. The root has the properties of *T. garganica.* [α, 35.]—**T. fœnicula, T. garganica.** Fr., *thapsie lisse, panacée d'Esculape, faux fenouil.* Ger., *garganisches Böskraut, falscher Turpith.* A native of southern Europe and northern Africa; the *drias* of Algeria, where it is considered analgesic. The root-bark yields resina thapsiæ, and is saturated with a purgative, emetic, emmenagogue, vesicant juice. [α, 35.] Cf. *T. silphium.*—**T. plaster.** See *Sparadrap thapsiæ.*—**T. silphion, T. silphium, T. sylphium.** A species (by De Candolle regarded as a variety of *T. garganica*) found in northern Africa, believed to have been the source of the *silphium* (σίλφιον), or *cyrenaicum*, of the ancients. Its resin is said to be more active than that of *T. garganica.* [α, 35.]—**T. villosa.** Fr., *thapsie velue, malherbe.* Ger., *zottiges Böskraut.* Deadly carrot of the Mediterranean regions; a purgative species. Its resin is said to be slower and milder as a vesicant than that of *T. garganica.* [α, 35.]

THAPSUS (Lat.), n. m. and f. Tha^{2}ps(tha^{3}ps)'u^{3}s(u^{4}s). Gr., θάψος. 1. A section of the genus *Verbascum.* 2. The *Verbascum t.*

THARANDT (Ger.), n. Ta^{3}r-a^{3}ndt'. A place in Saxony where there are two mineral springs, one saline and chalybeate and the other sulphurous. [L, 30, 37, 49 (α, 14).]

THÄTIG (Ger.), adj. Tat'i^{2}g. See ACTIVE.

THATKRAFT (Ger.), n. Ta^{3}t'kra^{3}ft. See ENERGY.

THAU (Ger.), n. Ta^{3}u^4. See DEW and ROS.

THAUMATROPE, n. Tha^{4}m'a^3-trop. From θαῦμα, a wonder, and τρέπειν, to turn. A rectangular board which may be rotated about an axis running through the centre of the longer side. By rapid rotation objects on the opposite sides of the board are made to appear in combination (*e. g.*, a bird in a cage). [F.]

THAUMATURGICAL, adj. Tha^{4}m-a^3-tu^{5}rj'i^2-k'l. From θαυματουργεῖν, to work wonders. Fr., *thaumaturgique.* Wonder-working, magical. [α, 48.]

THÉ (Fr.), n. Ta. 1. See TEA. 2. Of the Fr. Cod., see THEA (3d def.).—**Faux t.** See SIDA *rhombifolia.*—**T. américain.** See CEANOTHUS *americanus* and CAPRARIA *biflora.*—**T. de Blanckenheim.** See GALEOPSIS *ochroleuca.*—**T. de France.** See MELISSA *occidentalis.*—**T. de Grèce.** See SALVIA *officinalis.*—**T. de Jersey.** See CEANOTHUS *americanus.*—**T. de la Martinique.** See CAPRARIA *biflora.*—**T. de l'Amazone.** See AYA-PANA.—**T. de la mer du sud.** See ILEX *vomitoria.*—**T. de la Nouvelle Jersey.** See CEANOTHUS *americanus.*—**T. de montagne.** See LITHOSPERMUM *officinale* and GAULTHERIA *procumbens.*—**T. de Paraguay.** See ILEX *paraguaiensis.*—**T. de Pennsylvanie.** See MONARDA *didyma.*—**T. de Saint-Germain.** See SPECIES *laxantes.*—**T. des Antilles.** See CAPRARIA *biflora.*—**T. des Jésuites.** See CHENOPODIUM *ambrosioides* and ILEX *paraguaiensis.*—**T. des Norvégiens.** See RUBUS *arcticus.*—**T. du Canada.** See GAULTHERIA *procumbens.*—**T. du ciel.** See HYDRANGEA *Thunbergii.*—**T. du Labrador.** See LEDUM *latifolium.*—**T. du Mexique.** See CHENOPODIUM *ambrosioides.*—**T. du Paraguay.** See ILEX *paraguaiensis.*—**T. du Pérou.** See ERYTHROXYLON *coca.*

—**T. de la Terre-Neuve, T. rouge.** See GAULTHERIA *procumbens.*—**T. suisse.** 1. See FALLTRANK (2d def.). 2. Of the Fr. Cod., see SPECIES *vulnerariæ.*—**Tisane de t.** [Fr. Cod.]. An infusion of 10 parts of tea-leaves in 1,000 of boiling water, strained after half an hour. [B, 95 (*a*, 38).]

THEA (Lat.), n. f. The(the^2)'a^3. Fr., *thé.* Ger., *Theestrauch* (2d def.). 1. See TEA. 2. The tea-tree (or -shrub); a genus of the *Ternstrœmiaceæ*, included by Bentham and Hooker in the genus *Camellia.* The *Theaceæ* (of De Candolle, an order of plants including *T.*, *Ternstrœmia*, and *Gordonia*) are included by Bentham and Hooker in the tribe *Gordonieæ.* [*a*, 35.] 3. The dried leaves of *T. viridis* [Austr. Ph., 1st ed., Hung. Ph.], of *T. chinensis* [Fr. Cod., Sp. Ph.]. [B, 95 (*a*, 38).]—**Flos theæ.** Ger., *Blumenthee, Kaiserthee.* The choicest variety of green tea. [*a*, 35.]—**T. assamensis, T. assamica.** Assam tea-tree, a form of *Camellia t.*, considered the parent species of all the cultivated varieties of the tea-plant. [*a*, 35.]—**T. chinensis.** See CAMELLIA *t.*—**T. helvetica.** See SPECIES *vulnerariæ.*—**T. hungarica, T. mexicana.** See CHENOPODIUM *ambrosioides.*—**T. nigra.** Black tea. [*a*, 35.]—**T. romana, T. silesiaca.** See CHENOPODIUM *ambrosioides.*—**T. sinensis.** See CAMELLIA *t.*—**T. viridis.** 1. A form of *Camellia t.* [*a*, 35.] 2. See *Green* TEA.

THEAL, adj. The'l. Resembling *Thea*; belonging to the *Theales*, which are Lindley's t. alliance (Lat., *nixus thealis*) of the *Calycosæ*, consisting of the *Ternstrœmiaceæ.* [*a*, 35.]

THEATRE, n. The'a^2-tr'. Gr., θέατρον (from θεᾶσθαι, to look on). Lat., *theatrum.* Fr., *théâtre.* Ger., *Theater.* See AMPHITHEATRE.

THEBAIC, adj. Theb-a'i^{2}k. Lat., *thebaicus* (from Θῆβαι, Thebes, a city of Egypt). Fr., *thébaïque.* Pertaining to, composed of, or containing opium. [*a*, 17.]

THEBAINE, n. Theb'a^3-en. Lat., *thebaina, thebainum* [Russ. Ph.]. Fr., *thébaïne.* Ger., *Thebain.* A very poisonous alkaloid, $C_{19}H_{21}NO_3$, found in opium, forming colorless, shining, foliate or prismatic crystals or a white crystalline powder, having no taste. The symbol Tb is sometimes used for it. [B, 93, 95, 118, 270 (*a*, 14, 38).]

THÉBAÏSME (Fr.), n. Ta-ba^3-es-m'. Opium poisoning. [B, 93 (*a*, 14).]

THEBENINE, n. Theb'e^{2}n-en. Fr., *thébénine.* Ger., *Thebenin.* An amorphous base isomeric with and obtained from thebaine. [B, 93 (*a*, 14).]

THEBOLACTIC ACID, n. The^{2}b-o-la^{2}k'ti^{2}k. Fr., *acide thébolactique.* A variety of lactic acid found in opium; identical with ethylidenelactic acid. [B, 3.]

THECA (Lat.), n. f. Thek(thak)'a^3. Gr., θήκη (from τιθέναι, to place). Fr., *thèque.* Ger., *T.*, *Theka.* 1. A sheath, envelope, receptacle, case, or capsule. 2. The cup-like part of a goblet-cell. [J.] 3. See CELL-*membrane.* 4. In botany, a case; especially an anther-sac (of Grew, the anther itself), a capsule of *Musci*, or one of the oblong, cylindrical, or ovoid vesicles containing the spores in lichens. [*a*, 35.]—**T. cerebri.** See CRANIUM.—**T. cordis.** See PERICARDIUM.—**T. folliculi.** Of von Baer, an envelope formed around a Graafian vesicle by the fibrillation of a layer of young connective tissue following the heightened vascularity that accompanies the process of maturation. The internal layer (*tunica propria*) is vascular, and the external (*tunica fibrosa*) fibrillated. [A, 22.]—**T. medullaris spinalis, T. vertebralis.** See *Spinal* DURA.

THECAPHORE, n. Thek'a^3-for. Lat., *thecaphorum* (from θήκη, a chest, and φορός, bearing). Fr., *thécaphore.* See GYNOPHORE (1st def.).

THECAPODIUM (Lat.), n. n. Thek(thak)-a^3-pod(po^{2}d)'i^2-u^{3}m-(u^{4}m). From θήκη, a chest, and πούς, the foot. Fr., *thécapode.* The support of the fruit in caryophyllaceous plants. [*a*, 17.]

THECASPORES, n. pl. Thek'a^3-sporz. From θήκη, a chest, and σπορά, a spore. Spores (sporidia) produced in *Asci.* [*a*, 35.]

THECEITIS (Lat.), **THECITIS** (Lat.), n's f. Thes(thak)-e^2-i(e)'ti^{2}s, thes(thak)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From θήκη, a case. See TENOSYNOVITIS (1st def.).

THECIDIUM (Lat.), n. n. The^{2}s(thak)-i^{2}d'i^2-u^{3}m(u^{4}m). Dim. of θήκη, a case. Fr., *thécidion.* A one-seeded fruit with an adherent pericarp; now included under the term achænium. [*a*, 35.]

THECIUM (Lat.), n. n. Thes(thak)'i^2-u^{3}m(u^{4}m). From θήκη, a case. The portion of an apothecium (of lichens) containing the thecæ and thalamium. [*a*, 35.]

THECODONT, adj. Thek'o-do^{2}nt. From θήκη, a case, and ὀδούς, a tooth. Having the teeth lodged in alveoli. [L, 12.]

THECOSTEGNOSIS (Lat.), n. f. Thek(thak)-o(o^3)-ste^{2}g-nos'i^{2}s. Gen., *-nos'eos* (*-is*). From θήκη, a case, and στέγνωσις, contraction. Fr., *thécostegnose.* Contraction of the sheath of a tendon.

THEE (Ger.), n. Ta. See TEA.—**Abführender T.** [Ger. Ph.]. See SPECIES *laxantes* (3d def.).—**Bittert'.** See SPECIES *amaricantes.*—**Europäischer T.** The *Veronica officinalis.* [*a*, 35.]—**Kaisert'.** See *Flos* THEÆ.—**Südseet'.** Maté. [B.]—**T'gemische.** See SPECIES (2d def.).—**T'strauch.** See THEA (2d def.) and CAMELLIA *thea.*

THEER (Ger.), n. Tar. See TAR.—**Holzt'.** See TAR (2d def.).—**Norwegischer T.** Norway tar. [*a*, 38.]—**Rangoont'.** See *Rangoon* PETROLEUM.—**T'bäder.** Baths in which tar soap is used. [B, 108 (*a*, 14).]—**T'farbstoff.** See ANILINE *dye.*—**T'glycerin.** A mixture of 3 parts of glycerin and 1 part of tar; used for dressing ulcers. [B, 108 (*a*, 14).]—**T'krätze.** Scabies occurring in laborers in tar-works. [B, 108 (*a*. 14).]—**T'krebs.** See *Chimney-sweeps'* CANCER.—**T'mittel.** A medicine containing tar. [B, 108 (*a*, 14).]—**T'pflaster.** See *Emplastrum* PICIS *liquidæ* (under PIX).—**T'pulver.** A mixture of 2 parts of coarsely powdered coal with 1 part of tar. [B, 108 (*a*, 14).]—**T'salbe.** See *Unguentum* PICIS *liquidæ* (under PIX).—**T'seife.** See SAPO *piceus.*—**T'syrup.** See *Syrupus* PICIS.—**T'tinctur.** A solution of 1 part of tar in 12 parts of alcohol. [B, 8, 10 (*a*, 14).]—**T'werg.** Tarred oakum. [*a*, 14.]

THEIL (Ger.), n. Til. See PART.—**Felsent'.** See *Petrous* PORTION *of the temporal bone.*—**Gaument'.** The horizontal plate of the palate bone.—**Gelenkt'.** See the major list.—**Infundibular T. des Vorderhirns.** The portion of the primitive prosencephalon from which the infundibulum springs. [I, 10 (K).]—**Medialer T. der Schleifenschicht** [Forel]. The medial fibres of the lemniscus area. [I, 17 (K).]—**Occipitalt' des Gehirnes.** See *Occipital* LOBE.—**Orbitalt'.** The orbital surface of the frontal lobe. [I, 17 (K).]—**T'wandel.** See MEROTROPE (1st def.).—**Unterer T. der Hirnstiele.** See TEGMENTUM (1st def.).—**Vorderer lateraler T. des Abducenskerns.** The antero-lateral portion of the nucleus of the abducens nerve. [K.]—**Vorderer T. der Scissure des Hippocampus** [Gratiolet]. See *Hippocampal* FISSURE.—**Zitzent'.** See *Mastoid* PROCESS.

THEILBLATT (Ger.), n. Til'bla^{3}t. See FOLIOLE.

THEILFRUCHT (Ger.), n. Til'fruch^{2}t. See MERICARP.—**T'chen.** See CARPEL.

THEILFURCHEND (Ger.), adj. Til'furch^2-e^{2}nd. See MEROBLASTIC.

THEILUNG (Ger.), n. Til'un^2. See CLEAVAGE, DIVISION (1st def.), and SEGMENTATION.—**T'swandel.** See MEROTROPE (1st def.).

THEINE, n. The'en. Lat., *theina, theinum.* Fr., *théine.* Ger., *Theïn.* The active principle of tea (*Camellia thea*); an alkaloid isomeric (by chemists considered identical) with caffeine but differing in its action, having but half the toxic power and producing more wakefulness and convulsive disturbance and less cardiac stimulation. It has been used subcutaneously in neuralgia. [Castle, "Cincinnati Lancet and Clinic," Feb. 6, 1886; "N. Y. Med. Jour.," July 10, 1886, p. 56 (*a*, 50); "Proc. of the Am. Pharm. Assoc.," xv, p. 176 (*a*, 50); *a*, 17.]

THEION (Lat.), n. n. Thi'(the^2'i^2)-o^{2}n. Gr., θεῖον. See SULPHUR.

THEIOTHERMA (Lat.), n. n. Thi(the^2-i^2)-o(o^3)-thu^{5}rm-(the^{2}rm)'a^3. Gen., *-therm'atos* (*-atis*). From θεῖον, sulphur, and θέρμα, a hot spring. Fr., *théiotherme.* Ger., *Theiotherme.* A hot sulphurous spring. [L, 50 (*a*, 14).]

THEIOTHERMIN, n. Thi-o-thu^{5}rm'i^{2}n. See BAREGIN.

THEISM, n. The'i^{2}zm. From *thea*, tea. Fr., *théisme.* Chronic poisoning by tea; characterized by insomnia, cephalalgia, nervous trembling, irritable weakness of the heart, dyspepsia, and cachexia. [C. Éloy, "Union méd.," June 5, 1886, p. 917 (*a*, 50).]

THÉLALGIE (Fr.), n. Tal-a^{3}l-zhe. From θηλή, the nipple, and ἄλγος, pain. Pain in the nipple. [L, 41 (*a*, 14).]

THELASIS (Lat.), **THELASMUS** (Lat.), n's f. and m. The^{2}l-(thal)'a^{2}s(a^{3}s)-i^{2}s, the^{2}l(thal)-a^{2}z(a^{3}s)'mu^{3}s(mu^{4}s). Gen., *-as'eos* (*thel'asis*), *-as'mi.* Gr., θηλασμός (from θηλάζειν, to give suck). Fr., *thélasme.* Ger., *Säugen.* The act of suckling. [L, 50 (*a*, 14).]

THELASTRIA (Lat.), n. f. The^{2}l(thal)-a^{2}st(a^{3}st)'ri^2-a^3. Gr., θηλάστρια (from θηλάζειν, to give suck). Fr., *thélastrie.* Ger., *Amme.* A wet-nurse. [L, 50 (*a*, 14).]

THELE (Lat.), n. Thel(thal)'e(a). Gen., *thel'es.* Gr., θηλή. See MAMMA and NIPPLE.

THELEPHORA (Lat.), n. f. The^{2}l(thal)-e^{2}f(af)'o^{2}r-a^3. From θηλή, the nipple, and φορός, bearing. Fr., *théléphore.* Ger., *Warzenpilz* (2d def.). 1. See PALMELLA. 2. A genus of *Fungi* typical of a group (the *Thelephoreæ* [Fr., *théléphorées*], or *Thelephorei* [Fr., *théléphores*]), comprising the simplest forms of the *Hymenomycetes.* [*a*, 35.]—**T. puteana.** A species causing dry-rot, especially in pine-wood. [*a*, 35.]—**T. sanguinea.** See HYPOCHNUS *rubrocinctus.*

THELIGONUM (Lat.), n. n. The^{2}l(thal)-i^{2}g'o^{2}n-u^{3}m(u^{4}m). Gr., θηλυγόνον (from θῆλυς, female, and γίγνεσθαι, to come into being). Written also, preferably, *Thelygonum.* A genus of the *Theligoneæ* (a tribe of the *Urticaceæ*). [*a*, 35.]—**T. alsinoideum, T. cynocrambe.** Fr., *chou de chien.* The κυνοκράμβη of Dioscorides, dog's cabbage; an aperient potherb of Mediterranean regions. [*a*, 35.]

THELITIS (Lat.), n. f. The^{2}l(thal)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From θηλή, the nipple. Fr., *thélite.* Ger., *Brustwarzenentzündung.* Inflammation of the nipple.

THELONCUS (Lat.), n. m. The^{2}l(thal)-o^{2}n^{2}k'u^{3}s(u^{4}s). From θηλή, the nipple, and ὄγκος, a tumor. Fr., *théloncus.* Swelling of the nipple or breast.

THELOPHLEBOSTEMMA (Lat.), n. n. Thel(thal)-o(o^3)-fle^{2}b-o(o^3)-ste^{2}m'ma^3. Gen., *-stem'matos* (*-atis*). From θηλή, the nipple, φλέψ, a vein, and στέμμα, a wreath. Fr., *thélophlébostemme.* See CIRCULUS *venosus mammæ.*

THELORRHAGIA (Lat.), n. f. Thel(thal)-o^{2}r-raj̃(ra^{3}g)'i^2-a^3. From θηλή, the nipple, and ῥήγνυσθαι, to burst forth). Fr., *thélorrhagie.* Hæmorrhage from the nipple. [L, 41 (*a*, 14).]

THELOSPASMUS (Lat.), n. m. Thel(thal)-o(o^3)-spa^{2}z(spa^{3}s)'mu^{3}s(mu^{4}s). From θηλή, the nipple, and σπασμός, a spasm. Fr., *thélospasme.* Spasm in the nipple. [L, 50 (*a*, 14).]

THELOSTEOPHYTE, n. Thel-o^{2}st'e^2-o-fit. Lat., *thelosteophytum* (from θηλή, the nipple, ὀστέον, a bone, and φυτόν, a growth). Fr., *thélostéophyte.* Ger., *Thelosteophyt.* Of Lobstein, a nipple-shaped exostosis. [L, 50 (*a*, 14).]

THÉLOTHISME (Fr.), **THÉLOTISME** (Fr.), n's. Tal-ot-es-m'. From θηλή, the nipple, and ὠθισμός, a thrusting forward. Erection of the nipple. See under ERECTION.

THELOTREMA (Lat.), n. n. Thel(thal)-o(o^3)-trem(tram)'a^3. Gen., *-trem'atos (-atis).* Fr., *thélotrème.* Ger., *Brustflechte.* A genus of lichens typical of the *Thelotremei* (a tribe of the *Placodei*). [α, 35.]—**T. cinchonarum.** A species occurring on yellow cinchona-bark. [α, 35.]—**T. myriocarpum.** A species found on red cinchona-bark. [α, 35.]—**T. urceolare.** A species found on the bark of *Cinchona lancifolia.* [α, 35.]

THELYBLAST, n. Thel'i^2-bla^{2}st. Of Minot, the ovum after the extrusion of the polar globules. The oospore of Balfour. [G.]

THELYCUS (Lat.), adj. The^{2}l(thal)'i^{2}k(u^{6}k)-u^{3}s(u^{4}s). Gr., θηλυκός. Fr., *thélyque.* See FEMALE (1st def.).

THELYGONIA (Lat.), n. f. Thel(thal)-i^2(u^6)-gon(go^{2}n)'i^2-a^3. Gr., θηλυγονία (from θῆλυς, female, and γίγνεσθαι, to come into being). 1. The procreation of female children. 2. Nymphomania. [A, 540 (α, 34).]

THELYGONUM (Lat.), n. n. The^{2}l(thal)-i^{2}g(u^{6}g)'o^{2}n-u^{3}m-(u^{4}m). See THELIGONUM.

THELYTOCIA (Lat.), n. f. Thel(thal)-i^2(u^6)-tos(to^{2}k)'i^2-a^3. Gr., θηλυτοκία (from θηλυτοκεῖν, to bear females). Parthenogenesis (1st def.) with the production of females only. [α, 32.]

THENAL, adj. The'n'l. From θέναρ. the palm of the hand. Pertaining to the anterior surface of the arm. [L.]

THENAR (Lat.), n. n. Then(the^{2}n)'a^{3}r. Gen., *then'aros (-aris).* Gr., θέναρ. Fr., *thénar.* The palm of the hand; improperly used as an Eng. adj. for palmar and plantar.—**T. pollicis.** See *T.* EMINENCE.

THEOBROMA (Lat.), n. f. and n. The(the^2)-o(o^3)-brom'a^3. Gen., *-brom'æ, -brom'atos (-is).* From θεός, a god, and βρῶμα, food. Fr., *théobrome.* Ger., *Kakaobaum.* A genus of tropical American trees of the *Sterculiaceæ.* All the species apparently furnish some variety of cacao. [α, 35.]—**Oil of t.** Lat., *oleum theobromæ* (seu *theobromatis,* seu *cacao*), *oleum concretum e semine theobromæ cacao.* Fr., *beurre de cacao.* Sp., *aceite de cacao* [Sp. Ph.]. Ger., *Cacaobutter.* Cacao-butter; a yellowish-white, solid fat obtained from cacao. It melts between 30° and 35° C. It is used in pomades, etc., for coating pills and making suppositories, and, smeared on the skin, as a protective and to reduce fever. [B; α, 35.]—**Semen theobromatis, Semina theobromæ.** See CACAO (1st def.).—**T. angusta.** See ABROMA *angusta.*—**T. bicolor.** Fr., *théobrome de deux couleurs.* Ger., *zweifarbiger Kakaobaum.* A tree of Colombia, Brazil, and especially the warmer parts of New Granada. The seeds constitute Caracas cacao. [α, 35.]—**T. cacao.** Fr., *théobrome cultivé, cacaoier, cabasse.* Ger., *ächter Kakaobaum.* Cacao (or cocoa) tree, chocolate-nut tree; a species found wild in tropical America and cultivated in most tropical countries, especially Venezuela, for its seeds (see CACAO, 1st def.), which yield oil of t. and are a stimulating, nutritive article of diet. The seed-shells are tonic, and a gum exuding from the stem of the tree is employed in diarrhœa and dysentery. [α, 35.]—**T. guazuma.** See GUAZUMA *ulmifolia.*—**T. guianense.** A Guiana species, probably the source of Cayenne cacao. The fruit yields a vinous beverage and, by distillation, a spirit. [α, 35.]

THEOBROMIC ACID, n. The-o-brom'i^{2}k. A monobasic crystalline acid, $C_{64}H_{128}O_2$, of the fatty-acid series, occurring in cacao-butter. It is not certainly known to exist. [B, 3.]

THEOBROMINE, n. The-o-brom'en. Lat., *theobrominum, theobromina.* Fr., *théobromine.* Ger., *Theobromin.* An alkaloid, $C_7H_8N_4O_2$, obtained from the fruit and rind of *Theobroma cacao,* found also in small amount in the young leaves of Himalaya tea. [B, 3 (α, 38); B.]

THEODORETUS (Lat.), n. m. The(the^2)-o(o^3)-dor-et(at)'u^{3}s-(u^{4}s). Gr., θεοδώρητος (from θεός, a god, and δωρητός, freely given). An old anticephalalgic remedy. [L, 50 (α, 14).]

THEOMANIA (Lat.), n. f. The(the^2)-o(o^3)-man(ma^{3}n)'i^2-a^3. From θεός, a god, and μανία, madness. Fr., *théomanie, théomonodélire.* Ger., *religiöser Wahnsinn.* Religious monomania, often accompanied by hallucinations of sight, hearing, and touch. The patient believes himself to be under direct and immediate divine influence or inspiration, or even to be God himself. [Ball, "Bull. méd.," June 17, 1889, p. 795 (α, 18).]

THEOPHILIUM (Lat.), n. n. The(the^2)-o(o^3)-fi^{2}l'i^2-u^{3}m(u^{4}m). From θεός, a god, and φίλος, loved. Of Trallianus, a certain collyrium containing saffron, etc. [B, 78 (α, 14).]

THEOPHRASTA (Lat.), n. f. The(the^2) o(o^3)-fra^{2}st(fra^{3}st)'a^3. From Θεόφραστος, a Greek philosopher. Of Jussieu, a genus of the *Theophrasteæ* (a tribe of the *Myrsineæ*). The *T.* of Linnæus is referred to *Clavija.* [α, 35.]—**T. americana.** Fr., *coquemollier, arbre de Théophraste.* A tree of the Antilles (referred to the genus *Clavija*). The leaves are used in foul ulcers and in farcy. [α, 35.]

THEOPHYLLA (Lat.), n. f. The(the^2)-o(o^3)-fi^{2}l(fu^{6}l)'la^3. For deriv., see THEA and PHYLLON. Of Rafinesque, the genus *Thea.* [α, 35.]

THEOPHYLLINE, n. The-o-fi^{2}l'en. A substance, $C_7H_8N_4O_2$, isomeric with theobromine and paraxanthine, obtained from an alcoholic extract of tea. It forms thin, narrow, colorless crystals. ["N. Y. Med. Jour.," Feb. 8, 1890, p. 148 (α, 50).]

THEOPLEGIA (Lat.), **THEOPLESIA** (Lat.), n's. The(the^2)-o(o^3)-plej(plag)'i^2-a^3, -plez(plas)'i^2-a^3. From θεός, a god, and πλήσσειν, to strike. See APOPLEXY.

THEORIA (Lat.), n. f. The^2-or'i^2-a^3. Gr., θεωρία (from θεωρεῖν, to look at). See THEORY.

THEORIE (Ger.), n. Ta-or-e'. See THEORY.—**Kratzt'.** See PSOROTHEORIA.—**Wirbelt' des Schädels.** The theory that the skull is made up of modified vertebræ. [L, 115 (α, 50).]

THEORY, n. The'or-i^2. Gr., θεωρία (from θεωρεῖν, to look at). Lat., *theoria.* Fr., *théorie.* Ger., *Theorie.* An idea or hypothesis sufficient to serve as a basis for an explanation or for action. [α, 48.]—**Apposition t.** The t. of the growth of a tissue by the deposit of cells from without. [α, 34.]—**Atomic t.** 1. Of the ancients, the t. that all matter consists of very minute, hard, absolutely indestructible bodies called atoms. 2. Of Dalton and succeeding chemists, the t. that molecules of substances are built up of one or more atoms, each of which represents a certain definite amount of a chemical element, which amount always remains constant, going into and out of combination without suffering increase or decrease. [B.]—**Binary t.** In chemistry, that t. of the composition of salts which regards them as made up of two constituents, acid and basic. [B, 2.]—**Cell t.** See CELL *t.*—**Darwinian t.** See EVOLUTION (2d def.).—**Diblastic t.** Of Nägeli, the t. that the presence, successively or simultaneously, of two different kinds of microbes is requisite to explain the nature and progress of great epidemics. [L, 164 (α, 27).]—**Difference t.** A t. proposed by Hermann to explain the presence of electrical currents in muscles and nerves. The normal, intact muscle or nerve is said to be electro-positive, and a dying muscle or nerve electro-negative. [Landois (K).]—**Dualistic t.** See *Binary t.*—**Erysipelatous t.** Ger., *erysipelatöse* (oder *rosige*) *Theorie.* Of Eisenmann, Pouteau's modification of the phlogistic t., according to which puerperal fever was due to any erysipelatous inflammation within the abdomen or the pelvis. [A, 57.]—**Gastrobilious t.** Trincavellus's t. of the causation of disease by the accumulation of biliary and mucous materials in the primæ viæ. [A, 57.]—**Genetic t.** The t. of the psychical perception of distance, form, etc. [α, 34.]—**Germ t.** 1. See BIOGENESIS. 2. The t. of the production of certain diseases by living micro-organisms or their products.—**Goltz's statical t.** A t. with reference to the function of the semicircular canals according to which, in every position of the head, pressure is exerted by the endolymph on some portion of the canals, the ampullar nerve-terminations being thus excited and sensations of position transmitted to the cerebrum. [Landois (K).]—**Graft t.** A t. that disease is caused by means of organic particles from diseased persons becoming ingrafted in healthy individuals. [α, 34.]—**Hæmatic t.** Ger., *Hämatotheorie.* A t. of the origin of fevers in a primary specific alteration of the blood. [A, 57.]—**Kinetic t.** Of Brown, a t. of the functions of the semicircular canals which assumes that the corresponding canals on both sides are symmetrical organs which are together concerned with the movement of the head in a certain direction. [Landois (K).]—**Kirchhoff's t.** The t., now generally accepted, that the black lines of the spectrum are caused by the passage of light through the vapors of bodies which by themselves would give bright lines in the same position when incandescent. [α, 49.]—**Mechanical t. of medicine.** See IATROMATHEMATICS.—**Monoblastic t. of disease.** Of Nägeli, a t. that disease is due to microphytes that must pass through a developmental stage in some medium after leaving the body of those affected in order to reinfect. [α, 34.]—**Neuro-muscle t.** A t. that a central ganglionic cell, its nerve-fibre, and the muscle connected therewith are developed from a single cell. [α, 34.]—**Neuropathic t. of glaucoma.** Of Donders, a t. that irritation of the chorioidal nerves caused a neurosis of secretion that resulted in glaucoma. [α, 34.]—**Phlogistic t.** A t. of febrile diseases which accounted the local inflammations as the cause of the general disturbance. [A, 57.] See also *Erysipelatous t.*—**Physiological t.** Of Autenrieth, a t. of the causation of certain diseases; really a t. of metastasis, as of the lochia or the milk. It was held that during pregnancy there was an internal accumulation of the juices, especially affecting the uterus, but that after delivery they had a tendency to pass outward by the sweat, the lochia, and the milk; in case the latter secretions were impeded, the stream took some other direction, as to the head, the chest, or, most frequently, the abdomen. [A, 57.]—**Pre-existence t.** Of Du Bois-Reymond, the t. that electric currents are normally present in muscles and nerves before they are divided. [K, 3.] Cf. *Difference t.*—**Telluric t.** Of Pettenkofer and Nägeli, the t. that epidemic diseases are due to microbes of the soil penetrating into the lungs and digestive organs, and thence into the blood. [L, 164 (α, 27).]—**Transmutation t.** The t. of the change of one species or element into another species or element. [α, 34.]

THÈQUE (Fr.), n. Te^{2}k. See THECA.

THERANTHROPISMUS (Lat.), n. m. The^{2}r(thar)-a^{2}nth-(a^{3}nth)-ro^{2}p(rop)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). From θήρ, a wild beast, and ἄνθρωπος, a man. See ZOANTHROPY.—**T. fictus.** Of Krause, lycanthropy. [α, 34.]

THERAPEIOLOGY, n. The^{2}r-a^{2}p-i^2-o^{2}l'o-ji^2. From θεραπεία, medical treatment, and λόγος, understanding. Of M'Lachlan, therapeutics. [α, 34.]

THERAPEUTIC, adj. The^{2}r-a^{2}p-u^{2}t'i^{2}k. Gr., θεραπευτικός (from θεραπεύειν, to do service). Pertaining to therapeutics. [D.]

THERAPEUTICS, n. sing. The^{2}r-a^{2}p-u^{2}t'i^{2}ks. Gr., θεραπευτική (from θεραπεύειν, to do service). Fr., *thérapeutique.* Ger., *Therapie, Therapeutik.* It., *terapeutica.* Sp., *terapéutica.* The science and practice of the application of remedies for disease. [α, 48.]—**Mediate t.** The medication of an infant through the medium of its mother's milk.—**Suggestive t.** Fr., *thérapeutique suggestive.* The treatment of disease by hypnotic suggestion. [α, 34.]

THÉRAPEUTIQUE (Fr.), n. Tar-a^{3}p-u^{6}t-ek. See THERAPEUTICS.—**T. paradoxale.** Paradoxical therapeutics; a collective term for unusual and unexpected effects of drugs. ["Rev. méd.," Oct. 17, 1885, p. 616.]—**T. thermale.** The treatment of disease by the use of hot mineral waters internally and externally. [α, 34.]

THERAPEUTIST, n. The^{2}r-a^{2}p-u^{2}t'i^{2}st. Fr., *thérapeutiste.* Ger., *Therapiker, Therapeutiker.* A practitioner of therapeutics.

THERAPIE (Ger.), n. Tar-a^{3}p-e'. See THERAPEUTICS.—**Kinesit'.** See *Medical* GYMNASTICS.—**Pneumatische T.** See *Pneumatic* TREATMENT.

THERAPY, n. The^{2}r'a^{2}p-i^2. Gr., θεραπεια. See THERAPEUTICS.

THERENCEPHALUS (Lat.), adj. The^{2}r(thar)-e^{2}n(e^{2}n^2)-se^{2}f-(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From θήρ, a wild beast, and ἐγκέφαλος, the brain. Having the radius fixus making an angle of from 116° to 129° with the line uniting the punctum nasofrontale and the punctum alæ vomeris. [Lissauer, "Arch. f. Anthrop.," xv, Supp. (α, 50).]

THERENIABIN, n. The^{2}r-e^{2}n-i^2-a^{3}b'i^{2}n. Oriental manna.

THEREOBROMA (Lat.), n. n. The^{2}r-e(a)-o(o^3)-brom'a^3. Gen., *-brom'atos* (*-atis*). From θέρειος, of summer, and βρῶμα, food. Fr., *théréobrome*. Ger., *Sommerkost*. Summer-diet, a variety of chocolate. [L, 50 (α, 14).]

THEREOCATARRHUS (Lat.), n. m. The^{2}r-e(a)-o(o^3)-ka^{2}t-(ka^{3}t)-a^{2}r(a^{3}r)'ru^{3}s(ru^{4}s). From θέρειος, of summer, and κατάρῥοος, catarrh. Fr., *thériocatarrhe*. Ger., *Sommerkatarrh*. See *Hay* FEVER.

THERIACA (Lat.), n. f. The^{2}r(thar)-i(i^2)'a^{2}k(a^{3}k)-a^3. From θηριακή (ἀντίδοτος), an antidote against animals' bites. Fr., *thériaque*. Ger., *Theriak*. 1. An old name for opium flavored with nutmeg, cardamom, and mace, or with saffron and ambergris; afterward for other confections of opium (see *Confectio* OPII). 2. See ÉLECTUAIRE *thériacal*. 3. Of the Br. Ph., see MOLASSES. 4. Of the Austr. and Hung. Ph's, a mixture of powdered opium with 120 times as much electuarium aromaticum. [B, 81 (α, 35); B, 95 (α, 38).]—**Radix theriacæ.** The root of *Valeriana phu*. [α, 35.]—**T. Andromachi.** See ÉLECTUAIRE *thériacal*.—**T. cælestis.** See LAUDANUM.—**T. electuarium.** See *Confectio* OPII.—**T. londinensis.** See *Cataplasma* CUMINI.

THÉRIAQUE (Fr.), n. Ta-re-a^{3}k. See THERIACA and *Confectio* OPII.—**T. des pauvres, T. des paysans.** See ALLIUM SATIVUM.—**T. diatessaron.** See DIATESSARON.—**T. du foie.** Rhubarb. [A, 35.]

THERIODECTUS (Lat.), adj. Ther(thar)-i^2-o(o^3)-de^{2}kt(dakt)'-u^{3}s(u^{4}s). Gr., θηριόδηκτος (from θηρίον, a wild beast, and δάκνειν, to bite). Fr., *thériodecte*. Bitten by a venomous animal, especially a snake. [L, 50 (α, 14).]

THERIODIC, adj. Ther-i^2-od'i^{2}k. Gr., θηριώδης (from θήρ, a wild beast, and εἶδος, resemblance). Malignant. [D.]

THERIOMA (Lat.), n. n. Ther(thar)-i^2-om'a^3. Gen., *-om'atos* (*-atis*). Gr., θηρίωμα (from θηρίον, a wild beast). A chronic and malignant or semi-malignant ulcer. [E.]

THERIOMORPHIA (Lat.), n. f. Ther(thar)-i^2-o(o^3)-mo^{2}rf'-i^2-a^3. See THEROMORPHIA.

THERIOTOMY, n. Ther-i^2-o^{2}t'om-i^2. Lat., *theriotomia* (from θηρίον, a wild beast, and τομή, a cutting). Fr., *thériotomie*. See ZOOTOMY.

THERMA (Lat.), n. f. Thu^{5}rm(the^{2}rm)'a^3. Gr., θέρμη (from θερμός, hot). 1. See HEAT (1st def.). 2. A warm spring. [L, 50 (α, 14).]

THERMACOGENESIS (Lat.), n. f. Thu^{5}rm(the^{2}rm)-a^{2}k(a^{3}k)-o(o^3)-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *-genes'eos* (*-gen'esis*). From θερμόν, heat, ἄκος, remedy, and γένεσις, creation. Of Alvarenga, the action of a remedy on the temperature. [A, 319 (α, 34).]

THERMÆMUS (Lat.), adj. Thu^{5}rm(the^{2}rm)-em'(a^3'e^{2}m)-u^{3}s-(u^{4}s). From θερμός, hot, and αἷμα, blood. Fr., *thermème*. Ger., *warmblütig*. Warm-blooded.

THERMÆSTHESIOMETER, n. Thu^{5}rm-e^{2}s-thez-i^2-o^{2}m'-e^{2}t-u^{5}r. From θερμόν, heat, αἴσθησις, feeling, and μέτρον, a measure. Ger., *Thermästhesiometer*. An instrument for testing the power of an individual to appreciate differences in temperature. [D, 35.]

THERMAL, adj. Thu^{5}r'm'l. Lat., *thermalis*. Fr., *t*. Ger., *t*. Pertaining to heat or to hot springs. [α, 48.]

THERMAL ACID SPRINGS, n. Thu^{5}r'm'l. A place in Inyo County, California, where there are hot springs flowing between banks of crystallized sulphur. [Anderson (α, 14).]

THERMALBRUNNEN (Ger.), **THERMALQUELLE** (Ger.), n's. Te^{2}rm-a^{3}l'brun-ne^{2}n, -kwe^{2}l-le^2. A hot spring.

THERMALWASSER (Ger.), n. Te^{2}rm-a^{3}l'va^{3}s-se^{2}r. The water of a hot spring.

THERMANTERION (Lat.), n. n. Thu^{5}rm(the^{2}rm)-a^{2}nt(a^{3}nt)-er(ar)'i^2-o^{2}n. Gr., θερμαντήριον. Fr., *thermantérion*. A vessel for heating a liquid. [L, 50 (α, 14).]

THERMANTIC, adj. Thu^{5}rm-a^{2}nt'i^{2}k. Gr., θερμαντικός (from θερμαίνειν, to heat). Lat., *thermanticus*. Fr., *thermantique*. Ger., *erwärmend*. Promoting warmth. [L, 50 (α, 14).]

THERMANTIDOTUM (Lat.), n. n. Thu^{5}rm(the^{2}rm)-a^{2}nt-(a^{3}nt)-i^{2}d'o^{2}t-u^{3}m(u^{4}m). From θερμόν, heat, and ἀντίδοτος, an antidote. Ger., *Thermantidot*. A remedy against heat, or against fever-heat. [L, 50 (α, 14).]

THERMASIA (Lat.), n. f. Thu^{5}rm(the^{2}rm)-az(a^{3}s)'i^2-a^3. Gr., θερμασία. Warmth, heat. [A, 311 (α, 21).]

THERMASMA (Lat.), n. n. Thu^{5}rm(the^{2}rm)-a^{2}z(a^{3}s)'ma^3. Gen., *-as'matos* (*-atis*). Gr., θέρμασμα. A warm fomentation. [A, 311 (α, 21).]

THERMESTHÉSIE (Fr.), n. Te^{2}rm-e^{2}st-az-e. Capability of feeling heat.

THERMIC, adj. Thu^{5}rm'i^{2}k. From θερμόν, heat. Fr., *thermique*. Pertaining to or due to heat. [L, 41 (α, 14).]

THERMO-ANÆSTHESIA (Lat.), n. f. Thu^{5}rm(the^{2}rm)''o-(o^3)-a^{2}n(a^{3}n)-e^{2}s(a^3-e^{2}s)-thez(thas)'i^2-a^3. From θερμόν, heat, and ἀναισθησία, want of feeling. Fr., *thermoanesthésie*. Insensibility to heat or cold or to variations of temperature. [D, 35.]

THERMO-CAUTERY, n. Thu^{5}rm-o-ka^{4}t'e^{2}r-i^2. From θερμόν, heat, and καυτήριον, a branding iron. Fr., *thermo-cautère*. Ger., *Thermokauter*. See *Thermo*-CAUTERY.

THERMOCHEMISTRY, n. Thu^{5}rm-o-ke^{2}m'i^{2}st-ri^2. From θερμόν, heat, and χημεία, chemistry. Fr., *thermochimie*. The science of heat in its chemical relations. [B, 38, 93 (α, 14).]

THERMOCHORTON (Lat.), n. n. Thu^{5}rm(the^{2}rm)-o(o^3)-ko^{2}rt-(ch^{2}o^{2}rt)'o^{2}n. From θερμόν, heat, and χόρτος, grass. In the time of Hippocrates, the *Erythræa centaurium*, which is still employed in the chronic fevers of Oriental countries. [X. Landerer, "Am. Jour. of Pharm.," xlviii, p. 193 (α, 21).]

THERMOCHROSIS (Lat.), n. f. Thu^{5}rm(the^{2}rm)-o(o^3)-kros-(ch^{2}ros)'i^{2}s. Gen., *-chros'eos* (*-is*). From θερμόν, heat, and χρῶσις, a coloring. Fr., *thermochrose*. Ger., *Thermochrose, Wärmefärbung*. The property of absorbing heat-rays of a certain degree of refrangibility and allowing others to pass through. [B.]

THERMO-DIFFUSION, n. Thu^{5}rm-o-di^{2}f-fu^2'zhu^{3}n. From θερμόν, heat, and *diffusio*, a spreading out. Gaseous diffusion as the result of the unequal heating of a gaseous mass. [B, 2.]

THERMODYNAMICS, n. sing. Thu^{5}rm-o-di^{2}n-a^{2}m'i^{2}ks. From θερμόν, heat, and δυναμικός, powerful. Fr., *thermodynamique*. The science of the relations of heat to mechanical work. [α, 48.]

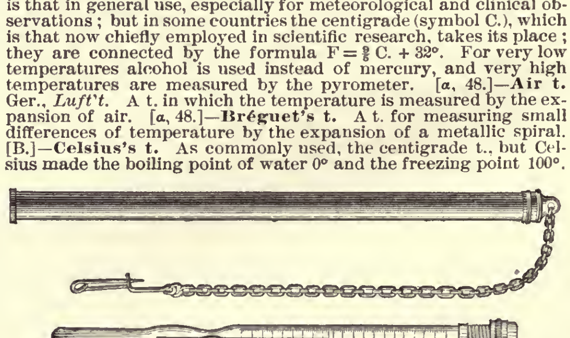
THERMO-ELECTRICITY, n. Thu^{5}rm-o-e-le^{2}kt-ri^{2}s'i^{2}t-i^2. From θερμόν, heat, and ἤλεκτρον, amber. Fr., *thermo-électricité*. Ger., *Thermoëlektrizität*. Electricity produced by an increase or decrease of temperature. [α, 48.]

THERMOGENESIS (Lat.), n. f. Thu^{5}rm(the^{2}rm)-o(o^3)-je^{2}n-(ge^{2}n)'e^{2}s-i^{2}s. Gen., *-es'eos* (*-gen'esis*). From θερμόν, heat, and γένεσις, production. The production of heat, especially in the animal organism. [α, 34.]

THERMOGENIC, THERMOGENOUS, adj's. Thu^{5}rm-o-je^{2}n'i^{2}k, -o^{2}j'e^{2}n-u^{3}s. Lat., *thermogen* (from θερμόν, heat, and γεννᾶν, to engender). Heat-producing. [L, 41 (α, 14).]

THERMO-INHIBITORY, adj. Thu^{5}rm-o-i^{2}n-hi^{2}b'i^{2}t-or-i^2. From θερμόν, heat, and *inhibere*, to keep back. Preventing or retarding thermogenesis. [α, 34.]

THERMOLE (Lat.), n. f. Thu^{5}rm(the^{2}rm)-o'le(la). Gen., *-ol'es*. Gr., θερμωλή. Of Hippocrates, feverish heat. [A, 311 (α, 21).]



THERMOLUSIA (Lat.), n. f. Thu^{5}rm(the^{2}rm)-o(o^3)-lu^{2}z(lus)'-i^2-a^3. From θερμός, hot, and λούειν, to wash. A hot bath. [α, 14.]

THERMOLYSIS (Lat.), n. f. Thu^{5}rm(the^{2}rm)-o^{2}l'i^2(u^5)-si^{2}s. Gen., *-ys'eos* (*-ol'ysis*). From θερμόν, heat, and λύσις, a loosing. 1. The decomposition of a body under the influence of a high temperature, with a subsequent recomposition on cooling. [B, 6.] 2. The dissipating of animal heat. [α, 34.]

THERMOLYTIC, adj. Thu^{5}rm-o-li^{2}t'i^{2}k. Pertaining to thermolysis. [α, 34.]

THERMOMAGNETISM, n. Thu^{5}rm-o-ma^{2}g'ne^{2}t-i^{2}zm. From θερμόν, heat, and μάγνης, a magnet. Fr., *thermomagnétisme*. Magnetism produced by heat. [L, 41 (α, 14).]

THERMOMETER, n. Thu^{5}rm-o^{2}m'e^{2}t-u^{5}r. From θερμόν, heat, and μέτρον, a measure. Fr., *thermomètre*. Ger., *T*. An instrument or apparatus for measuring degrees or variations of sensible heat. Its construction is based on the property possessed by certain substances of expanding or contracting regularly as the temperature is increased or diminished. The ordinary t. consists of a bulb communicating with a tube of very small bore, the bulb and adjacent part of the tube containing mercury, while the distant part of the tube is empty. With a rise of temperature the mercury expands so as to fill more and more of the tube. The temperature is indicated by a scale attached to the tube. The scale is graduated by marking off equal intervals as degrees, the unvarying distance between the marks that indicate the freezing point and boiling point of water being divided into 180 of these degrees in the *Fahrenheit t.*, 100 degrees in the *centigrade t.* or *Celsius's t.*, and 80 in *Réaumur's t.* The freezing point of water is the zero in the centigrade t. and Réaumur's t., but Fahrenheit put his zero 32° below that point, and the boiling points of water in the three are thus 100°, 80°, and 212°. The Fahrenheit scale (symbol, Fahr. or F.) is that in general use, especially for meteorological and clinical observations; but in some countries the centigrade (symbol C.), which is that now chiefly employed in scientific research, takes its place; they are connected by the formula $F = \frac{9}{5} C. + 32°$. For very low temperatures alcohol is used instead of mercury, and very high temperatures are measured by the pyrometer. [α, 48.]—**Air t.** Ger., *Luft't*. A t. in which the temperature is measured by the expansion of air. [α, 48.]—**Bréguet's t.** A t. for measuring small differences of temperature by the expansion of a metallic spiral. [B.]—**Celsius's t.** As commonly used, the centigrade t., but Celsius made the boiling point of water 0° and the freezing point 100°.

CLINICAL THERMOMETER.

[α, 48.]—**Centigrade t.** See under *T*.—**Cerebral t.** An instrument for taking the temperature of the surface of the head. [D.] Cf. *Cerebral* THERMOMETRY.—**Clinical t.** A t. for ascertaining the temperature of the body. It has a thin bulb and is usually self-registering. Cf. *Surface t.*—**De Lisle's t.** A t. formerly used in Russia, having the boiling point of water marked zero and the freezing point placed at 150°. [α, 35.]—**Fahrenheit t.** Ger.,

Fahrenheitsches T. See under *T.*—**Fever t.** See *Clinical t.*—**Hermann and Pfister's t.** A t. for simultaneously registering maximum and minimum temperatures measured by the expansion of a spiral strip made up of steel and brass. [B.]—**Immich's metallic t.** An exceedingly sensitive t., of small size, the action of which depends on the expansion or contraction of a metallic tube filled with a highly expansive liquid. The instrument is practically self-registering, as several seconds elapse before the indicator moves backward after a temperature has been taken. No shaking down is necessary, for it accommodates itself readily to an altered temperature. ["N. Y. Med. Jour.," Apr. 24, 1886, p. 480 (*a*, 50).]—**Maximum t.** A t. that registers the highest temperature reached. [*a*, 48.]—**Metastatic t.** A t. invented by Walferdin, used in noting the temperature of the blood. It consists of a capillary tube of such length and delicacy that it is possible to read off hundredths of a degree. [A, 30.]—**Minimum t.** A t. that registers the lowest temperature reached. [*a*, 48.]—**Réaumur's t.** See under *T.*—**Recording t.** A t. which makes automatically a tracing indicative of the variations of temperature to which it has been subjected. [B.]—**Registering t., Self-registering t.** An automatic maximum or minimum t. The maximum or minimum is shown by some indicator remaining in position after the mercury falls or rises. [*a*, 48.]—**Surface t.** A t. for taking the temperature of the surface of the body. [D.]

THERMOMETRIC, adj. Thu5rm-o-me2t'ri2k. Pertaining to the thermometer or its use. [D.]

THERMOMETROGRAPH, n. Thu5rm-o2m-e2t'ro-gra3f. From θερμόν, heat, μέτρον, a measure, and γράφειν, to write. A recording thermometer. [B.]

THERMOMETRY, n. Thu5rm-o2m'e2t'ri2. Fr., *thermométrie.* Ger., *Thermometrie.* The use of the thermometer; also the body of facts and theories connected with its use. [D.]—**Cerebral t.** Of Broca, a method of diagnosticating certain diseases of the brain by taking the surface temperature upon certain parts of the head. [D.]

THERMONEUROSIS (Lat.), n. f. Thu5rm(the2rm)-o(o3)-nu2r-os'i2s. Gen., *-os'eos (-is).* Fr., *thermonévrose.* From θερμόν, heat, and νεῦρον, a nerve. An old term for fever due to disturbance of the nervous centres. [*a*, 34.]

THERMO-NEUTRALITY, n. Thu5rm-o-nu2t-ra2l'i2t-i2. From θερμόν, heat, and *neutralis*, neuter. Fr., *thermoneutratité.* Of certain salts, the property of neither losing nor gaining heat by being dissolved. [L, 41 (*a*, 14).]

THERMONÉVROSE (Fr.), n. Te2r-mo-na-vroz. See THERMONEUROSIS.

THERMONOSUS (Lat.), n. f. Thu5rm(the2rm)-o2n'o2s-u3s(u4s). From θερμόν, heat, and νόσος, disease. Fr., *thermonose.* Ger., *Wärmekrankheit.* A disease due to heat. [L, 50 (*a*, 14).]

THERMOPALPATION, n. Thu5rm-o-pa2lp-a'shu3n. From θερμη, heat, and *palpatio*, a stroking. The determination of the bodily temperature by palpation. [*a*, 34.]

THERMOPATHOGENIE (Ger.), n. Te2rm-o-pa3t-o-gan-e'. Of Alvarenga, the generation of abnormal bodily heat. [L, 57 (*a*, 14).]

THERMOPHAGY, n. Thu5rm-o2f'a2j-i2. Lat., *thermophagia* (from θερμόν, heat, and φαγεῖν, to eat). Ger., *Heissessen.* The habit of swallowing excessively hot food. [L, 50 (*a*, 14).]

THERMOPHEUGOSCOPE, n. Thu5rm-o-feug'o-skop. From θερμόν, heat, φεύγειν, to flee, and σκόπειν, to observe. Ger., *Thermopheugoskop.* A pocket apparatus for the determination of the loss of heat from the surface of the skin. [*a*, 18.]

THERMOPILE, n. Thu5rm'o-pil. From θερμόν, heat, and *pila*, a ball. Fr., *t.* Ger., *Thermosäule.* See *Thermo-electric* PILE.

THERMOPOSIA (Lat.), n. f. Thu5rm(the2rm)-o(o3)-poz(po2s)'-i2-a3. From θερμόν, heat, and πόσις, a drinking. Fr., *thermoposie.* Ger., *Heisstrinken.* The habit or practice of swallowing very hot drinks. [L, 50 (*a*, 14).]

THERMOPYLÆ (Lat.), n. f. pl. Thu5rm-o2p'i2l-e(a3-e2). From θερμόν, heat, and πύλη, a gate. A place in Greece where there are hot sulphurous springs. [L, 49 (*a*, 14).]

THERMOSCOPE, n. Thu5rm'o-skop. From θερμόν, heat, and σκοπεῖν, to observe. Fr., *t.* Ger., *Thermoskop.* An instrument for registering changes of temperature without indicating the degree or amount of heat. [D, 25.]

THERMOSEMIOLOGIE (Ger.), n. Term-o-zam-e-ol-og-e'. Of Alvarenga, the science of the significance of changes of bodily temperature in symptomatology. [L, 57 (*a*, 14).]

THERMOSTAT, n. Thu5rm'o-sta2t. From θερμόν, heat, and ἱστάναι, to set. Ger., *T.* An apparatus for the automatic regulation of temperature. [*a*, 48.]

THERMOSTERESIS (Lat.), n. f. Thu5rm(the2rm)-o(o3)-ste2r-e(a)'si2s. Gen., *-es'eos (-is).* From θερμόν, heat, and στέρησις, deprivation. Fr., *thermostérèse.* Deprivation of heat; lowering of temperature. [L, 50 (*a*, 14).]

THERMOSYSTALTIC, adj. Thu5rm-o-si2st-a2lt'i2k. Contracting under the action of heat (said of a muscle). [K.]

THERMOSYSTALTISM, n. Thu5rm-o-si2st-a2lt'i2zm. From θερμόν, heat, and συστέλλειν, to contract. The contractility of muscular tissue due to sudden changes of temperature. [L, 49 (*a*, 14).]

THERMOTAXIC, adj. Thu5rm-o-ta2x'i2k. Pertaining to thermotaxis. [*a*, 34.]

THERMOTAXIS (Lat.), n. f. Thu5rm(the2rm)-o(o3)-ta2x-(ta3x)'-i2s. Gen., *-tax'eos (-is).* From θερμόν, heat, and τάξις, arrangement. The adjustment of the production of animal heat. [*a*, 34.]

THERMOTERION (Lat.), n. n. Thu5rm(the2rm)-o(o3)-te(ta)'-ri2-o2n. From θερμότης, heat. An apparatus consisting of a glass vessel surrounded by a hot-water chamber outside of which is an air-space that retards the loss of heat. Used to keep food warm. ["Lancet," 1867, i, p. 104 (*a*, 34).]

THERMOTHERAPEIA (Lat.), n. f. Thu5rm(the2rm)-o(o3)-the2r-a2p(a3p)-i(e2'i2)-a3. From θερμόν, heat, and θεραπεία, medical treatment. Fr., *thermothérapie.* Ger., *Thermotherapie.* The therapeutic use of heat, especially of hot baths. [L, 57 (*a*, 14).]

THERMOTONOMETER, n. Thu5rm-o-to2n-o2m'e2t-u5r. From θερμόν, heat, τόνος, a stretching, and μέτρον, a measure. An instrument devised by Gruenhagen for measuring the amount of muscular contraction induced by various thermic stimuli. [K.]

THERMO-TRACHEOTOMY, n. Thu5rm-o-tra2k-e2-o2t'om-i2. Tracheotomy with the actual cautery.

THERMOTROPISM, n. Thu5rm-o2t'ro2p-i2zm. From θερμόν, heat, and τροπή, a turning. Ger., *Thermotropismus.* The phenomenon observed in some plant-organs of bending toward or away from a source of heat, as in curvatures produced by the ultra-red or dark heat rays of the spectrum. [*a*, 35.]

THEROMORPHIA (Lat.), n. f. The2r(thar)-o(o3)-mo2rf'i2 a3. From θήρ, a wild beast, and μορφή, form. A monstrosity characterized by resemblance to a lower animal. [A, 319 (*a*, 34).]

THEROTYPIA (Lat.), n. f. The2r(thar)-o(o3)-ti2p(tu6p)'i2-a3. From θήρ, a wild animal, and τύπος, an impression. Fr., *thérotypie.* See THEROMORPHIA.

THESAURUS (Lat.), n. m. The2s(thas)-a4r'(a3'u4r)-u3s(u4s). Gr., θησαυρός, treasure, also a storehouse. [*a*, 48.]—**T. medicamentorum.** Ger., *Arzneisehatz.* The drugs collectively that are used in medicines and found in shops (nearly identical with materia medica). [B, 270.]

THESPESIA (Lat.), n. f. The2s-pez(pe2s)'i2-a3. From θεσπέσιος, divinely sounding. Fr., *thespésie.* A genus of malvaceous trees or herbs of the *Thespesieæ* (a division of the *Hibisceæ*). [*a*, 35.]—**T. macrophylla.** A tree found in the islands of the Indian Ocean; used like *T. populnea.* [*a*, 35.]—**T. populnea.** Mahoe of Demerara, portia-nut-oil plant, umbrella-tree; found in India, western Africa, the West Indies, etc. The unripe capsules and the flower buds yield a viscid yellow dye-juice, which is used, as is also a decoction of the bark, as a wash in skin diseases. The seeds furnish a thick oil. The root is used in low fevers, pleurisy, etc., and the inner bark as an oxytocic. [*a*, 35.]

THETISMUS (Lat.), n. m. The2t-i2z(i2s)'mu3s(mu4s). Lisping.

THEVERESIN, n. Te2v'e2r-e2s-i2n. Fr., *théverésine.* Ger., *T.* A poisonous substance, $C_{48}H_{70}O_{17} + 2H_2O$, found in *Thevetia neriifolia*, and also obtained by decomposing thevetin with dilute mineral acids; a rather cohesive white powder. [B, 270 (*a*, 38).]

THEVETIA (Lat.), n. f. T'-ve2t'i2-a3. From *Thevet*, a French monk and traveler. Fr., *thévétie.* 1. The genus *Genipa.* 2. A genus of American apocynaceous shrubs. The *Thevetieæ* of De Candolle are a subtribe of the *Carisseæ.* [*a*, 35.]—**T. ahouai, T. ahovai.** Ger., *Ahovaibaum.* Serpent's-bane; a Brazilian tree having acrid and narcotic properties. The kernels are used as an emetic, an extract of the plant as a febrifuge, and the wood to stupefy fish. [*a*, 35.]—**T. iccotli.** The *yoyote* or *narciso amorillo*, a large tree of the valleys of the Mexican Cordilleras. The seeds, known as *huesos de fraile*, contain thevetosin, which is said to be stimulant to the circulation and respiration in moderate doses, but in large quantities to be emetic and to cause paralysis of the heart and some part of the respiratory apparatus. In Mexico the seeds are used for rattlesnake-bites and hæmorrhoids, but their use is said to be dangerous. The poisonous milky juice of the plant has been used in deafness and skin diseases. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168; "Proc. of the Am. Pharm. Assoc.," xxv (*a*, 14); *a*, 35.]—**T. neriifolia.** A native of South America, naturalized in the East Indies, where it is known as exile tree (or oil-plant). It is closely allied to *T. iccotli* and, like that, contains a highly poisonous juice. The seeds, used in snake-bites, contain thevetin and theveresin, and in toxic doses produce vomiting, a feeble pulse, delirium, and coma. A clear yellow oil extracted from them is a powerful acro-narcotic poison. The bitter, purgative bark is considered febrifuge. ["Proc. of the Am. Pharm. Assoc.," xxx (*a*, 50); *a*, 35.]

THEVETIN, n. Te2v'e2t-i2n. Fr., *thévétine.* 1. A poisonous glucoside, $C_{54}H_{84}O_{24} + 3H_2O$, obtained from the seeds of *Thevetia neriifolia*, and occurring as a white crystalline powder. [B, 5, 93, 270 (*a*, 14, 38).] 2. Of Herrera, see THEVETOSIN.

THEVETOSIN, n. Te2v-e2t'os-i2n. A crystalline poisonous glucoside, perhaps identical with thevetin, obtained from the seeds of *Thevetia iccotli.* [B, 270.]

THIACETIC, adj. Thi-a2s-et(e2t)'i2k. From θεῖον, sulphur, and *acetum* (*q. v.*). Fr., *thiacétique.* Containing acetyl with sulphur replacing oxygen.—**T. acid.** Fr., *acide thiacétique.* Ger., *Thiacetsäure, Thioessigsäure.* An acid, $C_2H_4SO = CH_3.CO.SH$. It is a colorless liquid, having an odor of both acetic acid and sulphureted hydrogen. [B, 3, 4.]—**T. aldehyde.** Fr., *aldéhyde thiacétique.* Ger., *Thiacetaldehyd.* Ethylidene sulphide, C_2H_4S; not yet perfectly isolated. Thioparaldehyde is a polymeric form. [B.]—**T. anhydride.** Diacetoxyl sulphide; a colorless oily liquid, $(C_2H_3O)_2.S$. [B, 3, 4.]

THIACETONE, n. Thi-a2s'e2t-on. Ger., *Thiaceton.* A yellowish oily liquid, $C_6H_{12}S_2$, having a very disagreeable odor. [B, 4.]

THIACETYLENIC ACID, n. Thi-a2s-e2t-i2l-e2n'i2k. See THIACETIC *acid.*

THIALDINE, n. Thi-a2l'den. Fr., *t.* Ger., *Thialdin.* A body of the formula $(C_nH_{2n})_3.NH.S_2$; when used without qualification, ethylidene t., $(C_2H_4)_3NH.S_2 = C_6H_{13}NS_2$. [B, 3 (*a*, 38); B, 4.]

THIALÖL (Ger.), n. Te'a3l-u5l. Ethyl persulphide. [B.]

THIANILINE, n. Thi-a^{2}n'i^{2}l-en. Fr., *t.* A colorless, very stable, crystalline substance, $C_{12}H_{12}N_2S$, obtained by the direct action of sulphur on aniline. [B, 38 (*a*, 14).]

THIER (Ger.), n. Ter. See ANIMAL.—**Sament'.** See SPERMATOZOOID.—**T'arzneikunst, T'heilkunde.** See *Veterinary* MEDICINE.—**T'arzt.** See *Veterinary* SURGEON.—**T'keim.** See EMBRYO (1st def.).—**T'lymphe.** Vaccine taken from an animal. [L, 57 (*a*, 14).]—**T'pocken.** See COW-POX.—**T'seuche.** See EPIZOOTY.—**T'wahn.** See ZOANTHROPY.

THIERCHEN (Ger.), n. Ter'ch^{2}e^{2}n. An animalcule.

THIERS (Fr.), n. Te-e^{2}r. A place in the department of the Puy-de-Dôme, France, where there is a chalybeate spring. [*a*, 14.]

THIGH, n. Thi. Gr., μηρός. Lat., *femur, meros.* Ger., *Oberschenkel.* The upper portion of the lower limb between the knee and the hip. [L.]

THIMBLE, n. Thi^{2}m'b'l. A cap used to protect the finger which pushes the needle in sewing. [*a*, 48.]—**Burr t.** A dental drill which rests upon a socket connected with an open ring worn around the index finger. [E.]

THIOACETIC, adj. Thi-o-a^{2}s-et(e^{2}t)'i^{2}k. See THIACETIC.

THIOALCOHOL, n. Thi-o-a^{2}l'ko-ho^{2}l. See MERCAPTAN.

THIOALDEHYDE, n. Thi-o-a^{2}l'de^2-hid. An aldehyde in which sulphur replaces the oxygen. The formula of the t's is $C_nH_{2n}S$. [B, 5.]

THIOANHYDRIDE, n. Thi-o-a^{2}n-hi'dri^{2}d(drid). An anhydride in which sulphur replaces oxygen. [B, 4.]

THIOANTIMONIC ACID, n. Thi-o-a^{2}n-ti^2-mo^{2}n'i^{2}k. 1. Antimony pentasulphide. 2. A hypothetical acid, SbH_3S_4. [B, 270 (*a*, 38).]

THIOANTIMONIOUS ACID, n. Thi-o-a^{2}n-ti^2-mon'i^2-u^{3}s. A hypothetical acid, SbH_3S_3. [B, 270 (*a*, 38).]

THIOANTIMONITE, n. Thi-o-a^{2}n-ti^{2}m'o^{2}n-it. A salt formed by the combination of antimony trisulphide with a basic metallic sulphide. When the latter is the protosulphide of an alkali metal, the compound salt is termed *liver of antimony.*

THIOARSENATE, n. Thi-o-a^{3}rs'e^{2}n-at. Also called *sulpharsenate.* A salt of thioarsenic acid, or an arsenate in which sulphur replaces the oxygen. [B.]

THIOARSENIC ACID, n. Thi-o-a^{3}rs-e^{2}n'i^{2}k. Also called *sulpharsenic acid.* Arsenic acid in which sulphur takes the place of oxygen. H_3AsS_4, known through its salts, the thioarsenates. [B.]

THIOARSENIOUS ACID, n. Thi-o-a^{3}rs-e^{2}n'i^2-u^{3}s. Arsenious acid in which sulphur replaces oxygen, H_3AsS_3; known through its salts, the thioarsenites. [B.]

THIOARSENITE, n. Thi-o-a^{3}rs'e^{2}n-it. A salt of thioarsenious acid, or an arsenite in which sulphur replaces the oxygen (*i. e.*, a compound sulphide of arsenic and another element). [B.]

THIOBENZAMIDE, n. Thi-o-be^{2}nz'a^{2}m-i^{2}d(id). The compound $C_6H_5.CS.NH_2$. [B, 3 (*a*, 38).]

THIOBENZOIC ACID, n. Thi-o-be^{2}nz-o'i^{2}k. A crystalline acid, $C_6H_5.CO.SH$. [B, 3 (*a*, 38).]

THIOBROMIDE, n. Thi-o-brom'i^{2}d(id). A compound of bromine and sulphur with the same element or radicle. [B.]

THIOCAMF, n. Thi'o-ka^{2}mf. A liquid disinfectant consisting apparently of a mixture of camphor and sulphur dioxide. [B, 270 (*a*, 38).]

THIOCARBAMIC ACID, n. Thi-o-ka^{3}rb-a^{2}m'i^{2}k. An acid, $CS\langle^{NH_2}_{SH}$, occurring as colorless acicular crystals. [B, 270 (*a*, 38).]

THIOCARBANILIDE, n. Thi-o-ka^{3}rb-a^{2}n'i^{2}l-i^{2}d(id). See DIPHENYLTHIOUREA.

THIOCARBIMIDE, n. Thi-o-ka^{3}rb'i^{2}m-i^{2}d(id). See ISOTHIOCYANATE.

THIOCARBONATE, n. Thi-o-ka^{3}rb'o^{2}n-at. A salt of thiocarbonic acid. Such salts have the formulæ of the carbonates with sulphur replacing the oxygen. [B.]

THIOCARBONIC ACID, n. Thi-o-ka^{3}rb-o^{2}n'i^{2}k. Ger., *Kohlenschwefelwasserstoffsäure.* An unstable substance, H_2CS_3; a deep-yellow, oily liquid of exceedingly disagreeable odor. [B, 3.]

THIOCARBONYL, n. Thi-o-ka^{3}rb'o^{2}n-i^{2}l. A radicle, CS'', found in thiocarbonic acid. [B.]

THIOCHLORIDE, n. Thi-o-klor'i^{2}d(id). A compound of chlorine and sulphur with the same element or radicle. [B.]

THIOCRESOL, n. Thi-o-kre^{2}s'o^{2}l. Fr., *thiocrésol.* A substance, $C_6H_4(CH_3)SH$, known in three isomeric forms: *ortho*t', small tabular crystals; *meta*t', a liquid; and *para*t', large tabular crystals. [B, 3 (*a*, 38).]

THIOCYANACETIC ACID, n. Thi-o-si-a^{2}n-a^{2}s-et(e^{2}t)'i^{2}k. A monobasic acid, $CH_2.(SCN).COOH = C_3H_3SNO_2$. [B, 3.]

THIOCYANIC ACID, n. Thi-o-si-a^{2}n'i^{2}k. Fr., *acide thiocyanique.* An acid, SCN.H, occurring as an unstable colorless liquid of persistent odor. [B, 270 (*a*, 38).]

THIOCYANURIC ACID, n. Thi-o-si-a^{2}n-u^{2}r'i^{2}k. An acid, $(N\equiv C-SH)_3 = C_3S_3N_3H_3$, derived from cyanuric acid by substituting sulphur for oxygen; a yellow granular powder. ["Am. Jour. of Sci.," Dec., 1885 (B).]

THIOCYMENE, THIOCYMOL, THIOCYMOPHENOL, n's. Thi-o-si'men, -si'mo^{2}l, -sim-o-fe^{2}n'o^{2}l. Cymophenol in which sulphur replaces oxygen; a liquid, $C_6H_3(CH_3)(C_3H_7).SH$. [B; B, 3 (*a*, 38).]

THIODIGLYCOLLIC ACID, n. Thi-o-di-gli^{2}k-o^{2}l'i^{2}k. A dibasic acid, $S(CH_2.CO.OH)_2$. [B.]

THIOETHER, n. Thi-o-eth'u^{5}r. An ether in which an atom of sulphur replaces an atom of oxygen; a sulphide of a double hydrocarbon molecule. The general formula of the thioethers is $C_nH_{2n+1}C_mH_{2m+1}S$. [B.]

THIOETHYLATE, n. Thi-o-e^{2}th'i^{2}l-at. A compound of a metal with ethyl thioalcohol (ethyl mercaptan); a mercaptide of ethyl. [B.]

THIOFORMIC ALDEHYDE, n. Thi-o-fo^{2}rm'i^{2}k a^{2}l'de^2-hid. See METHYLENE *sulphide.*

THIOGLYCERIN, n. Thi-o-gli^{2}s'e^{2}r-i^{2}n. Trisulphydrin. [B.] See SULPHYDRIN.

THIOGLYCOL, n. Thi-o-gli^{2}k'o^{2}l. A compound of a bivalent hydrocarbon with two molecules of the univalent radicle $(SH)'$, and hence regarded as a glycol (diatomic alcohol) in which oxygen atoms in both of the molecules of hydroxyl are replaced by sulphur. General formula: $C_nH_{2n}(SH)_2$. [B, 4.]

THIOGLYCOLLIC ACID, n. Thi-o-gli^{2}k-o^{2}l'i^{2}k. See MERCAPTOACETIC ACID.

THIOHYDANTOIN, n. Thi-o-hid-a^{2}n'to-i^{2}n. A crystalline body, $C_3H_4N_2OS = CH_2CO : N_2H_2.CS$. [B, 4.]

THIOL, n. Thi'o^{2}l. An artificial mixture of sulphureted hydrocarbons closely resembling ichthyol in chemical character and medicinal action. It occurs in commerce in liquid form (a 40-per-cent. solution) and in powder or thin layers. [B, 270 (*a*, 38).]

THIOLACTIC ACID, n. Thi-o-la^{2}kt'i^{2}k. A monobasic acid, $C_3H_6SO_2 = CH_3.CH(SH).COOH$. [B, 3.]

THIOMETHYLATE, n. Thi-o-me^{2}th'i^{2}l-at. A compound of methyl mercaptan with a metal; a methylic mercaptide. [B.]

THIOMOLYBDATE, n. Thi-o-mo^{2}l-i^{2}b'dat. A compound of a basic sulphide with molybdenum trisulphide, or a molybdate in which sulphur replaces oxygen. [B, 3.]

THION (Lat.), n. n. Thi(the)'o^{2}n. Gr., θεῖον. See SULPHUR.

THIONINE, n. Thi'o^{2}n-en. An alkaloid, $C_{12}H_9N_3S$, obtainable as a black crystalline powder or as small acicular crystals of a slight green lustre. [B, 3 (*a*, 38).]—**T. hydrochloride.** Lauth's violet, $C_{12}H_9N_3S.HCl$, occurring as small acicular or prismatic crystals having a metallic green lustre. [B, 3 (*a*, 38).]

THIONOL, n. Thi'o^{2}n-o^{2}l. Dioxythiodiphenylimide, $C_{12}H_7NSO_2$. [B, 3 (*a*, 38).]

THIONOLINE, n. Thi-o^{2}n'o^{2}l-en. The compound $C_{12}H_8N_2SO$. [B, 3 (*a*, 38).]

THIONURIC ACID, n. Thi-o^{2}n-u^{2}r'i^{2}k. Fr., *acide thionurique.* Ger., *Thionursäure, Thioharnsäure.* A dibasic crystalline acid, $C_4H_5N_3SO_6$. [B, 3.]

THIONYL, n. Thi'o^{2}n-i^{2}l. Fr., *thionyle.* Ger., *T.* A bivalent radicle, $(S_{iv}O)''$. [B.]—**Diamyl t.** See AMYL *sulphoxide.*—**T. chloride.** A colorless fuming liquid, $SOCl_2$. [B, 3.]

THIOOXAMIDE, n. Thi-o-o^{2}x'a^{2}m-i^{2}d(id). An acid, $(CS)_2(NH_2)_2$, occurring as reddish-yellow crystals. [B, 3 (*a*, 38).]

THIOOXYCARBONATE, n. Thi-o-o^{2}x-i^2-ka^{3}rb'o^{2}n-at. A salt of the general constitution $O : C\langle^{O.R'}_{S.R'}$. [B.]

THIOOXYDIPHENYLAMINE, n. Thi-o-o^{2}x-i^2-di-fe^{2}n-i^{2}l'-a^{2}m-en. See SULPHAMINOL.

THIOPARALDEHYDE, n. Thi-o-pa^{2}r-a^{2}ld'e^2-hid. A substance, $C_6H_{12}S_3$, known in two isomeric forms. α-*t.*, white prismatic or tabular crystals, and β-*t.*, shining acicular crystals. [B, 3 (*a*, 38).]

THIOPHENE, n. Thi'o-fen. Fr., *thiophène.* Ger., *Thiophen.* A colorless, strongly-refracting, oily liquid, C_4H_4S, found in benzene obtained from coal-tar. [B, 3.]—**T. diiodide.** An aromatic, non-toxic, and non-irritant body, used as an antiseptic. ["Brit. Med. Jour.," March 19, 1892 (*a*, 50).]

THIOPHENIC ACID, n. Thi-o-fe^{2}n'i^{2}k. A crystalline acid, $C_4H_3S.COOH = C_5H_4SO_2$, analogous in structure and properties to benzoic acid. [B, 3.]

THIOPHENITRILE, n. Thi-o-fe^{2}n-it'ri^{2}l. A liquid, $C_4H_3S.CN = C_5H_3NS$, resembling closely benzonitrile. [B.]

THIOPHENOL, n. Thi-o-fe^{2}n'o^{2}l. See PHENYL *mercaptan.*

THIOPHOSPHATE, n. Thi-o-fo^{2}s'fat. A salt of thiophosphoric acid; a phosphate that has one atom of its oxygen replaced by sulphur. [B.]

THIOPHOSPHORIC ACID, n. Thi-o-fo^{2}s-fo^{2}r'i^{2}k. An acid, H_3PSO_3, known only through its salts, the thiophosphates. [B.]

THIOPHOSPHORYL, n. Thi-o-fo^{2}s'fo^{2}r-i^{2}l. The trivalent radicle of thiophosphoric acid, $S=P\equiv$. [B.]

THIOPICRIC ACID, n. Thi-o-pi^{2}k'ri^{2}k. Fr., *acide thiopicrique.* α-trinitrothiophenol; an acid, $C_6H_2(NO_2)_3SH$, occurring as yellowish acicular crystals of bitter taste. [B. 3 (*a*, 38).]

THIOSINAMINE, n. Thi-o-si^{2}n'a^{2}m-en. Fr., *thiosinamine.* Ger., *Thiosinamin.* See ALLYL-*thiourea.*

THIOSTANNIC ACID, n. Thi-o-sta^{2}n'i^{2}k. A dark powder, H_2SnS_3, of waxy appearance. [B, 3.]

THIOSULPHATE, n. Thi-o-su^{3}lf'at. Syn.: *sulphosulphate, hyposulphite.* A salt of thiosulphuric acid. The t's include the *normal t's*, $R'_2(S_2O_3)$, or $R''(S_2O_3)$, and the *acid t's*, $R_m(HS_2O_3)_n$, where R_m is a radicle whose combining power is *n*. [B.]

THIOSULPHURIC ACID, n. Thi-o-su^{3}lf-u^{2}r'i^{2}k. An acid, $S_2O_3H_2$, known only in its salts, the thiosulphates. [B, 46 (*a*, 39).]

THIO-THIO, n. Thi-o-thi'o. Palm-oil (from *Elæis guineensis*). [B, 121 (*a*, 35).]

THIOUREA, n. Thi-o-u^2-re'a^3. A crystalline solid, $CSNH_2$, or urea in which sulphur replaces oxygen. [B, 4.]

THIOURIC ACID, n. Thi-o-u^{2}r'i^{2}k. See Thionuric acid.

THIOXYDIPHENYLAMINE, n. Thi-o^{2}x-i^2-di-fe^{2}n-i^{2}l'a^{2}m-i^{2}n. See Sulphaminol.

THIRST, n. Thu^{5}rst. Gr., δίψα. Lat., *sitis*. Fr., *soif*. Ger., *Durst*. A desire to drink ; an uneasy sensation of craving for drink. [K.]

THISTLE, n. Thi^{2}s'l. A prickly composite plant, especially one belonging to any of the genera *Carduus*, *Cnicus*, or *Onopordon*. [*a*, 35.]—**Blessed t.** 1. See Centaurea *benedicta* and Silybum *marianum*.—**Canada t.** See Cnicus *arvensis*.—**Carline t., Carolina t., Caroline t.** The genus *Carlina*. [*a*, 35.]—**Corn-t.** See Cnicus *arvensis*.—**Cotton-t.** See Onopordon *acanthium*.—**Friar's t.** See Cnicus *eriophorus*.—**Fuller's t.** See Dipsacus *fullonum*.—**Globe-t.** See the major list.—**Gum-t.** One of various species of *Euphorbia*. [*a*, 35.]—**Melon-t.** The genus *Melocactus*. [*a*, 35.]—**Milk-t.** See Silybum *marianum* and Sonchus *oleraceus*.—**Plumed t.** The genus *Cnicus*, especially *Cnicus lanceolatus*. [*a*, 35.]—**Sow-t.** The genus *Sonchus*, also the genus *Agathyrsus* and species of *Mulgedium*. [*a*, 35.]

THLASIS (Lat.), n. Thlas(thla^{3}s)'i^{2}s. Gen., *thlas'eos* (*-is*). Gr., θλάσις (from θλᾶν, to bruise). A contusion ; of Vogel, a depression of the calvaria near a fracture of the skull. [*a*, 34.]

THLASMA (Lat.), n. n. Thla^{2}z(thla^{3}s)'ma^3. Gen., *thlas'matos* (*-is*). Gr., θλάσμα. A contusion ; of Galen, an injury, such as a concussion or contusion, in which there is no solution of tissue continuity. [*a*, 34.]—**T. stremma.** See Sprain.

THLASPI (Lat.), n. n. Thla^{2}sp(thla^{3}sp)'i(i^2). Gr., θλάσπι. Gen., *thlasp'eos* or *thlas'pi* (indecl.). Fr., *t.*, *tabouret* (1st def.). Ger., *Täschelkraut* (1st def.). 1. Bastard-cress, besom-weed ; a genus of cruciferous herbs. 2. Of Adanson, a section of the *Cruciferæ*. The *Thlaspidæ*, *Thlaspideæ* (Fr., *thlaspidées*), or *Thlaspidieæ* are a tribe of cruciferous plants, containing *T.* (1st def.), *Capsella*, etc. [*a*, 35.]—**Herba thlaspeos** (seu **t.**). The herb of *Capsella bursa pastoris*. [*a*, 35.]—**Semen thlaspeos.** The seed of *T. arvense* and *Lepidium campestre*. [*a*, 35.]—**T. alliaceum.** Fr., *tabouret à odeur d'ail*. Ger., *lauchduftiges Täschelkraut*. A European species closely allied to *T. arvense* ; formerly official as *herba scorodothlaspeos*. [*a*, 35.]—**T. alpestre, T. alpinum.** Fr., *tabouret des Alpes*. Ger., *Alpentasche*. A European species. The leaves are used as a salad. [*a*, 35.]—**T. arvense.** Fr., *t.* (ou *tabouret*), *tabouret à grandes* (ou *siliques des champs*), *monnoyère*. Ger., *Ackertäschelkraut*, *Bauernkresse*. Boor's mustard, dish-mustard, penny- (or wild) cress ; found throughout Europe. The seeds, formerly official as *semen t.* (seu *thlaspeos*, seu *thlaspeos arvensis*), are stimulant, diuretic, and alterative, but are not now used. The leaves are astringent and antiscorbutic. [*a*, 35.]—**T. bursa pastoris.** See Capsella *bursa pastoris*.—**T. campestre.** See Lepidium *campestre*.—**T. maritimum.** See Lobularia *maritima*.—**T. perfoliatum.** Fr., *tabouret perfolié*, *moucelet*, *piloselle siliculeuse*. A European salad species. The seeds were formerly official, like those of *T. arvense*, as *semen thlaspeos*, etc. [*a*, 35.]—**T. ruderale.** See Lepidium *ruderale*.—**T. sativum.** See Lepidium *sativum*.

THLIBODEODERMITIS (Lat.), n. f. Thli^{2}b(thleb)-od-e^2-o-(o^3)-du^{5}rm(de^{2}rm)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From θλίβειν, to press, εἶδος, resemblance, and δέρμα, the skin. Fr., *thlibodéodermite*. A cutaneous inflammation resembling a bruise. [L, 50 (*a*, 14).]

THLIPSENCEPHALUS (Lat.), n. m. Thli^{2}ps(thleps)-e^{2}n-(e^{2}n^2)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From θλῖψις, pressure, and ἐγκέφαλος, the brain. Fr., *thlipsencéphale*. Of G. St.-Hilaire, a monster in which the brain has remained undeveloped in consequence of intra-uterine compression of the fœtal head. [*a*, 34.]

THLIPSIS (Lat.), n. f. Thli^{2}ps(thleps)'i^{2}s. Gen., *thlips'eos* (*-is*). Gr., θλῖψις. Fr., *thlipsie*. Ger., *Zusammendrückung*. Compression. [L, 41, 50, 56 (*a*, 14).]

THNÉTOBLASTE (Fr.), n. Tnat-o-bla^{3}st. See *Cancer* cell.

THOMSENEAN, adj. To^{2}ms-en'e^2-'n. Pertaining to Thomsen's disease (*q. v.*). [C. H. Hughes, "N. Y. Med. Jour.," July 17, 1886, p. 70.]

THOMSONIAN, adj. To^{2}ms-on'i^2-'n. Pertaining to Thomsonianism ; as a n., a believer in or practitioner of it. [D.]

THOMSONIANISM, THOMSONISM, n's. Tho^{2}ms-on'i^2-'n-i^{2}zm, to^{2}ms'u^{3}n-i^{2}zm. From *Thomson* (see below). A system of medicine devised by Samuel Thomson, of Massachusetts. It maintains that the human body is composed of four elements—earth, air, fire, and water ; also that, since metals and minerals are heavy and are obtained from the earth, their employment for therapeutic purposes will tend to draw those who use them downward toward the earth, whereas, as vegetables develop upward, the use of them tends to develop and benefit those who employ them. [D, 20.]

THON (Ger.), n. Ton. See Argil and Clay.—**T'ähnlich, T'artig.** See Argillaceous.

THONERDE (Ger.), n. Ton'e^{2}rd-e^2. See Alumina and Clay.—**Arsensaure T.** See Aluminium *arsenate*.—**Essigsaure T.** See Aluminium *acetate*.—**Gerbsaure T.** See Aluminium *tannate*.—**Salzsaure T.** See Aluminium *chloride*.—**T'hydrat.** See Aluminium *trihydrate*.—**T'oleat.** An oleate of aluminium, used for muco-purulent cutaneous exudations and as dressing for fœtid ulcers. [B, 108 (*a*, 14).]—**Weinsaure T.** See Aluminium *tartrate*.

THORA (Lat.), n. f. Thor'a^3. 1. An old term for *Aconitum napellus*. 2. See Ranunculus *t.*

THORACENTESIS (Lat.), n. f. Thor-a^3-se^{2}nt(ke^{2}nt)-e(a)'si^{2}s. Gen., *-es'eos* (*-is*). See Thoracocentesis.

THORACHYPERTROMUS (Lat.), n. m. Thor-a^{2}k(a^{3}ch^2)-ip-(u^{6}p)-u^{5}r(e^{2}r)'tro^{2}m-u^{3}s(u^{4}s). From θώραξ, the chest, ὑπέρ, in excess, and τρόμος, a trembling. Fr., *thorachypertrome*. Abnormally increased vocal fremitus. [L, 50 (*a*, 14).]

THORACIC, adj. Tho^{2}r-a^{2}s'i^{2}k. Gr., θωρακικός. Lat., *thoracicus*. Fr., *thoracique*. Ger., *thoracisch*. Pertaining to the chest. [L, 343.]

THORACICO-ABDOMINAL, adj. Tho^{2}r-a^{2}s''i^{2}k-o-a^{2}b-do^{2}m'i^2-n'l. Fr., *t.-a.* Pertaining to the thorax and the abdomen.

THORACICO-LUMBAR, adj. Tho^{2}r-a^{2}s''i^{2}k-o-lu^{3}mb'a^{3}r. From *thorax*, the chest, and *lumbus*, the loin. Thoracic and lumbar. [L, 153.]

THORACICUS (Lat.), adj. Tho^{2}r(thor)-a^{2}s(a^{3}k)'i^{2}k-u^{3}s(u^{4}s). See Thoracic ; as a n. m., see Sternalis *brutorum*.

THORACI-SPINAL, adj. Tho^{2}r-a^{2}s-i^2-spi'n'l. From *thorax*, the chest, and *spina*, the spine. Pertaining to the thoracic region and the spinal cord. [E. Coues, "Med. Record," July 30, 1887 (L).]

THORACOCENTESIS (Lat.), n. f. Tho^{2}r-a^{2}k(a^{3}k)-o(o^3)-se^{2}nt-(ke^{2}nt)-e(a)'si^{2}s. Gen., *-es'eos* (*-is*). From θώραξ, the chest, and κέντησις, a pricking. Fr., *thoracocentèse*. Ger., *Brusthöhlenstich*. Perforation of the chest to evacuate fluid from the pleura. [E.]

THORACOCYLLOSIS (Lat.), n. f. Thor-a^{2}k(a^{3}k)-o(o^3)-si^{2}l-(ku^{6}l)-los'i^{2}s. Gen., *-los'eos* (*-is*). From θώραξ, the thorax, and κύλλωσις, a crippling. Fr., *thoracocyllose*. Deformity of the thorax.

THORACOCYMECHOS (Lat.), n. m. Thor-a^{2}k(a^{3}k)-o(o^3)-si^{2}m(ku^{6}m)-ek(ach^2)'o^{2}s. From θώραξ, the chest, κῦμα, a wave, and ἦχος, a sound. Ger., *Brustschülpen*. An undulating sound in the chest heard on succussion. [L, 50 (*a*, 34).]

THORACOCYRTOMA (Lat.), **THORACOCYRTOSIS** (Lat.), n's n. and f. Tho^{2}r-a^{2}k(a^{3}k)-o(o^3)-su^{5}rt(ku^{6}rt)-om'a^3, -os'i^{2}s. Gen., *-om'atos* (*-atis*), *-os'eos* (*-is*). From θώραξ, the chest, and κύρτωμα, a curve, or κύρτωσις, cyrtosis. Fr., *thoracocyrtome*. Ger., *Brustbuckel*. Gibbosity of the thorax or sternum. [L, 50 (*a*, 14).]

THORACOCYSTIS (Lat.), n. f. Tho^{2}r-a^{2}k(a^{3}k)-o(o^3)-si^{2}st-(ku^{6}st)'i^{2}s. Gen., *-cyst'eos*, *-cyst'ios* (*-is*). From θώραξ, the chest, and κύστις, a bladder. Fr., *thoracocyste*. 1. See Hydrothorax. 2. A hydatid of the thorax. [L, 50 (*a*, 14).]

THORACODIDYMUS (Lat.), n. m. Tho^{2}r-a^{2}k(a^{3}k)-o(o^3)-di^{2}d'-i^{2}m(u^{6}m)-u^{3}s(u^{4}s). From θώραξ, the chest, and δίδυμος, twin. Fr., *thoracodidyme*. See Thoracopagus.

THORACODYNIA (Lat.), n. f. Tho^{2}r-a^{2}k(a^{3}k)-o(o^3)-di^{2}n-(du^{6}n)'i^2-a^3. From θώραξ, the chest, and ὀδύνη, pain. Fr., *thoracodynie*. Ger., *Brustschmerz*. Pain in the thorax. [L, 41, 50 (*a*, 14).]

THORACO-FACIAL (Fr.), n. Tor-a^3-ko-fa^3-se-a^{3}l. See Platysma *myoides*.

THORACOGASTROSCHISIS (Lat.), n. f. Tho^{2}r-a^{2}k(a^{3}k)-o-(o^3)-ga^{2}st(ga^{3}st)-ro^{2}sk(ro^{2}sch^2)'i^{2}s-i^{2}s. Gen., *-schis'eos* (*-osch'isis*). From θώραξ, the thorax, γαστήρ, the belly, and σχίσις, a cleaving. Congenital fissure of the thorax and abdomen. [*a*, 34.]

THORACOGRAPHE (Fr.), n. Tor-a^3-ko-gra^{3}f. An instrument for making an outline of the body, especially of the vertebral column in cases of deformity. ["Rev. mens. des mal. de l'enfance," Dec., 1885, p. 574 (D).]

THORACOMETER, n. Tho^{2}r-a^{2}k-o^{2}m'e^{2}t-u^{5}r. From θώραξ, the chest, and μετρον, a measure. Of Sibson, an apparatus, consisting of a spring connected with an index, for indicating variations in the volume of the thorax. [J.] See also Stethometer.

THORACOMONODIDYMUS (Lat.), n. m. Thor-a^{2}k(a^{3}k)-o-(o^3)-mo^{2}n-o(o^3)-di^{2}d'i^{2}m(u^{6}m)-u^{3}s(u^{4}s). From θώραξ, the chest, μόνος, alone, and δίδυμος, double. See Thoracopagus *parasiticus*.

THORACOMYODYNIA (Lat.), n. f. Thor-a^{2}k(a^{3}k)-o(o^3)-mi-(mu^6)-o(o^3)-di^{2}n(du^{6}n)'i^2-a^3. From θώραξ, the chest, μῦς, a muscle, and ὀδύνη, pain. Fr., *thoracomyodynie*. Pain in the pectoral muscles. [L, 50 (*a*, 14).]

THORACOPAGIA (Lat.), n. f. Thor-a^{2}k(a^{3}k)-o(o^3)-paj(pa^{3}g)'-i^2-a^3. The condition of a thoracopagus. [*a*, 48.]

THORACOPAGUS (Lat.), n. m. Thor-a^{2}k(a^{3}k)-o^{2}p'a^{2}g(a^{3}g)-u^{3}s(u^{4}s). From θώραξ, the chest, and πάγος, anything fixed. Fr., *thoracopage*. That form of double monster in which the individuals are joined by the thorax, having two heads and four upper limbs. [Veit, "Samml. klin. Vortr.," gynäk., No. 48 (*a*, 50).]—**T. parasiticus.** A t. in which one of the individuals is not fully developed, or is only rudimentary. [L, 57 (*a*, 14).]

THORACOPATHIA (Lat.), n. f. Thor-a^{2}k(a^{3}k)-o(o^3)-pa^{2}th-(pa^{3}th)-i(e)'a^3. From θώραξ, the chest, and πάθος, disease. Ger., *Brustkastenleiden*. Any disease of the thorax. [L, 50 (*a*, 14).]

THORACOPLASTY, n. Tho^{2}r'a^{2}k-o-pla^{2}st-i^2. From θώραξ, the chest, and πλάσσειν, to mold. Ger., *Rippenresection*, *Thoracoplastik*. See *Estlander's* resection.

THORACOSCHISIS (Lat.), n. f. Tho^{2}r-a^{2}k(a^{3}k)-o^{2}sk(o^{2}sch^2)'i^{2}s-i^{2}s. Gen., *-is'eos* (*-osch'isis*). From θώραξ, the chest, and σχίσις, a cleaving. Fr., *thoracoschisie*. See Fissure *of the thorax*.

THORACOSCOPY, n. Tho^{2}r-a^{2}k-o^{2}sk'op-i^2. From θώραξ, the chest, and σκοπεῖν, to examine. Fr., *thoracoscopie*. Exploration of the thoracic cavity, especially by means of the stethoscope.

THORACOSPHYGMUS (Lat.), n. m. Thor-a^{2}k(a^{3}k)-o(o^3)-sfi^{2}g(sfu^{6}g)'mu^{3}s(mu^{4}s). From θώραξ, the chest, and σφυγμός, the pulse. Fr., *thoracosphygme*. See Brustpuls.

THORACOSTENOSIS (Lat.), n. f. Thor-a^{2}k(a^{3}k)-o(o^3)-ste^{2}n-os'i^{2}s. Gen., *-os'eos* (*-is*). From θώραξ, the chest, and στένωσις, stenosis. Fr., *thoracosténose*. Stenosis of the thorax. [L, 50 (*a*, 14).]

THORACOTOMY, n. Thor-a^{2}k-o^{2}t'om-i^2. From θώραξ, the chest, and τομή, a cutting. Fr., *thoracotomie*. See Thoracocentesis.

THORACOTROMUS (Lat.), n. m. Thor-a^{2}k(a^{3}k)-o^{2}t'ro^{2}m-u^{3}s-(u^{4}s). From θώραξ, the chest, and τρόμος, a trembling. See *Pectoral* fremitus.

THORACULUM (Lat.), n. n. Tho2r(thor)-a2k(a3k)'u2l(u4l)-u3m-(u4m). From θώραξ, the chest. Ger., *Schnürbrust*. See CORSET.

THORADELPHUS (Lat.), n. m. Thor-a2d(a3d)-e2lf'u3s(u4s). From θώραξ, the chest, and ἀδελφός, a brother. Fr., *thoradelphe*. A double monster, divided below the umbilicus but united above so as to have but a single thoracic cavity and head and two arms. [L, 41, 49 (α, 14).] Cf. SYNADELPHUS.

THORAX (Lat.), n. m. Thor'a2x(a3x). Gen., *-ac'os* (*-is*). Gr., θώραξ (lit., a breastplate). Fr., *t*. Ger., *T*., *Brustkasten*. It., *torace*. Sp., *tórax*. 1. The cavity bounded by the diaphragm below, the ribs and sternum in front, and the ribs and vertebral column behind, and closed in above by the structures in the lower part of the neck. It contains the heart and lungs and the vessels connected with them, the œsophagus, the sympathetic and the pneumogastric nerves and their ganglia and plexuses, and a portion of the thoracic duct. 2. In arthropods, that portion of the body to which the appendages concerned in motion are almost exclusively, if not wholly, attached. [L.]—**T. paralyticus.** A t. that is deformed in consequence of paralysis of some of the thoracic muscles. [α, 34.]

THOREXIS (Lat.), n. f. Tho2r(thor)-e2x(ax)'i2s. Gen., *-ex'eos* (*-is*). Gr., θώρηξις (from θωρήσσειν, to intoxicate). Ger., *Berauschung*. See INTOXICATION.

THORIA (Lat.), **THORINA** (Lat.), n's f. Thor'i2-a3, tho2r-(thor)-in(en)'a3. Fr., *thorine*. Thorium oxide. [B.]

THORIUM (Lat.), n. n. Thor'i2-u3m(u4m). Fr., *t*. Ger., *T*. Also written *thorinum*. A metallic element discovered by Berzelius in 1828. It occurs in certain rare minerals. It has been prepared in the pure state as a gray, lustrous powder of sp. gr. 7·66 to 7·95. In composition it acts as a tetrad. Symbol, Th; atomic weight, 231·5. [B.]

THORN, n. Tho2rn. A spine; also the genus *Cratægus* and other spiny plants. [α, 35.]—**Leaf t.** A leaf which is contracted into a spine or a petiole which is hardened into a spine after the fall of the blade of the leaf. [α, 35.]—**Purging t., Rhineberry t.** See RHAMNUS *catharticus*.

THORNAPPLE, n. Tho2rn'a2p-'l. See DATURA and DATURA *stramonium*.

THOROFLUORIDE, n. Thor-o-flu2'o2r-i2d(id). A compound of thorium fluoride with the fluoride of another element or radicle. [B, 3.]

THOROUGHPIN, n. Thu3'ro-pi2n. In solipeds, a synovial effusion into a bursa. [L.]

THOROUGHWORT, n. Thu3'ro-wu6rt. See EUPATORIUM *perfoliatum*.

THORUS (Lat.), n. m. Thor(tho2r)'u3s(u4s). Gr., θορός. See SEMEN.

THRÆNINE (Fr.), n. Tra-nen. See DACRYOLIN.

THRÄNCHEN (Ger.), n. Tran'ch2e2n. See DACRYDIUM (1st def.).

THRÄNE (Ger.), n. Tran'e2. See DACRYON (1st and 2d def's) and TEAR.—**T'nbucht.** See LACUS *lacrimalis*.—**T'neiterfluss.** See DACRYOPYORRHŒA.—**T'nfistel.** See *Lacrymal* FISTULA.—**T'nfurche.** 1. See *Lacrymal* GROOVE. 2. The lacrymal furrow of the embryo, subsequently developed into the lacrymal canal.—**T'ngang.** See *Lacrymal* CANAL and *Nasal* DUCT.—**T'ngeschwulst.** Dacryoma. [α, 34.]—**T'ngeschwür.** See DACRYELCOSIS.—**T'nhügel.** See *Lacrymal* CARUNCLE.—**T'nkanälchen.** See CANALICULI *lacrimales*.—**T'nlöcher.** See PUNCTA *lacrimalia*.—**T'nmuskel.** See TENSOR *tarsi*.—**T'nrinne.** See *Lacrymal* GROOVE.—**T'nröhrchen.** See CANALICULI *lacrimales*.—**T'nschlauch.** The lacrymal sac.—**T'nschlauchentzündung.** See DACRYOCYSTITIS.—**T'nschleimfluss.** See DACRYOBLENNORRHŒA.—**T'nschwamm.** See MERULIUS *lacrimans*.—**T'nsee.** See LACUS *lacrimalis*.—**T'nstein.** See *Lacrymal* CALCULUS.—**T'nwärzchen.** See *Lacrymal* CARUNCLE and *Lacrymal* PAPILLÆ.

THRÄNENDRÜSE (Ger.), n. Tran'e2n-dru6s-e2. See *Lacrymal* GLAND.—**T'ngeschwulst.** See DACRYOPS and ENCANTHIS.—**T'ngrube.** See *Lacrymal* FOSSA.

THRÄNENSACK (Ger.), n. Tran'e2n-za3k. See *Lacrymal* SAC.—**T'bruch.** See *Lacrymal* HERNIA.—**T'grube.** See *Lacrymal* FOSSA.

THRASYDEILUS (Lat.), n. m. Thra2s(thra3s)-i(u6)-dil'(de2'i2l)-u3s(u4s). From θρασύς, bold, and δειλός, cowardly. Of Aristotle, a physician who employs very energetic drugs, but with very great caution. [A, 322 (α, 48).]

THREAD, n. Thre2d. Lat., *filum*. Fr., *fil*. Ger., *Faden*. A very slender cord, a filament. [α, 48.]—**Achromatic t's, Cell-t's.** See *Achromatic* FIBRILS.—**Central ependymal t.** See SUBSTANTIA *gelatinosa centralis*.—**Chromatic t's.** See *Nuclear* FIBRILS.—**Daughter t's.** See *Daughter* NUCLEI.—**Mycelial t's.** The hyphæ of the mycelium. [α, 35.]—**Nucleus-communication-t.** Of Mayer, the t.-like band connecting the two nuclei of a sympathetic-nerve cell whenever there are two. [J, 35.]—**Primary (chromatic, or chromatin) t's.** See *Primary* FIBRES.—**Protoplasma-t's.** Delicate t's or strings of protoplasm, such as those passing from the follicular epithelium through the vitelline membrane in the ova of some fishes. [J, 35.]—**Secondary (chromatic, chromatin, or nuclear) t's.** See *Secondary chromatic* FIBRES.—**T.-indicator.** See under AUXANOMETER.

THREPSIS (Lat.), n. f. Thre2ps'i2s. Gen., *threps'eos* (*-is*). Gr., θρέψις (from τρέφειν, to nourish). Nutrition. [L, 50 (α, 14).]

THREPSOLOGY, n. Thre2ps-o2l'o-ji2. Lat., *threpsologia* (from θρέψις, nutrition, and λόγος, understanding). Fr., *threpsologie*. The physiology, etc., of nutrition. [L, 50 (α, 14).]

THRESHOLD, n. Thresh'old. See LIMEN.

THRIDACE (Fr.), n. Tred-a3s. See *Extractum* LACTUCÆ (2d def.) and LACTUCARIUM.—**Sirop de t.** See *Syrupus* LACTUCARII.

THRIDACIUM (Lat.), n. n. Thri2d-as(a3k)'i2-u3m(u4m). From θρίδαξ, lettuce. Fr., *thridace*. See LACTUCARIUM.

THRIDAX (Lat.), n. f. Thrid(thri2d)'a2x(a3x). Gen., *thrid'acos* (*-acis*). Gr., θρίδαξ. 1. Of the ancients, lettuce. [α, 35.] 2. See *Extractum* LACTUCÆ and LACTUCARIUM.—**Syrupus thridacis.** See *Syrupus* LACTUCARII.

THRIFT, n. Thri2ft. See ARMERIA *vulgaris*.

THRILL, n. Thri2l. Lat., *fremitus*. Fr., *frémissement*. Ger., *Schwirren*, *Zittern*. A tremor discerned by palpation or auscultation. [α, 34.]—**Aortic t.** A t. heard over the aortic aperture in lesions of the orifice or valves. [α, 34.]—**Arterial t.** A t. perceived over an artery. [α, 34.]—**Hydatid t.** The t. felt by palpation over a hydatid cyst. [α, 34.]—**Mitral t.** A t. discerned over the mitral orifice. [α, 34.]—**Presystolic t.** A t. which can sometimes be felt before the systole when the hand is placed over the position of the apex beat. [α, 34.]—**Purring t.** Ger., *Katzenschnurren*. A rough cardiac t. resembling the purring of a cat; often heard in mitral stenosis. [α, 34.]

THRIX (Lat.), n. f. Thri2x. Gen., *trich'os*, *trich'is*. Gr., θρίξ. See HAIR.

THROAT, n. Thro3t. Gr., φάρυγξ. Lat., *gula*, *guttur*, *jugulum*. Fr., *gorge*. Ger., *Schlund*, *Kehle*. 1. The cavity extending from the arch of the palate to the glottis and the superior opening of the œsophagus; also popularly the front of the neck. 2. The gorge or orifice in a gamophyllous corolla or calyx, including any portion between the limb and the proper tube. [α, 35.]—**Sore t.** See the major list.

THROATWORT, n. Thro2t'wu6rt. The genera *Trachelium* and *Liatris*; also species of *Campanula*, the *Digitalis purpurea*, and the *Scrophularia nodosa*. [α, 35.]

THROBBING, n. Thro2b'i2n2. Gr., σφυγμός. A rhythmical beating movement, such as that of an inflamed part. [α, 48.]

THROMBOARTERITIS (Lat.), n. f. Thro2mb-o(o3)-a3rt-e2r-(ar)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From θρόμβος, a clot, and ἀρτηρία, an artery. Arteritis with thrombosis. [α, 34.]

THROMBOLYMPHANGEITIS (Lat.), n. f. Thro2mb-o(o3)-li2mf(lu6mf)-a2n(a3n2)-ji(ge2'i2)-ti2s. Gen., *-it'idos* (*-idis*). From θρόμβος, a clot, *lympha*, lymph, and ἀγγεῖον, a cell. Lymphangeitis with thrombosis. [α, 34.]

THROMBOPHLEBITIS (Lat.), n. f. Thro2mb-o(o3)-fle2b-i-(e)'tis. Gen., *-it'idos* (*-idis*). From θρόμβος, a vein. Phlebitis with thrombosis. [α, 34.]—**T. purulenta.** Suppurative phlebitis with thrombosis. [α, 34.]

THROMBOSIS (Lat.), n. f. Thro2mb-os'i2s. Gen., *-os'eos* (*-is*). Gr., θρόμβωσις (from θρομβοῦσθαι, to become clotted). Fr., *thrombose*. Ger., *Thrombose*, *Propfbildung*. Clogging of blood-vessels by coagulation of the blood within them.—**Atrophic t.** See *Marasmic t.*—**Cerebral arterial t.** A narrowing of the calibre of an artery in the brain caused by a deposit of fibrin from the blood. [D, 34.]—**Coagulated t.** T. produced by fibrinous coagulation in a vessel. [α, 34.]—**Compression-t.** Ger., *Compressionsthrombose*. T. due to dilatation of the affected vein as the result of compression between it and the heart. [A, 57.]—**Conglutination t.** Of Eberth and Schimmelbusch, t. in which the clot is formed by the accumulation and fusion of the blood-plates. [α, 34.]—**Dilatation t.** T. due to pouches or dilatations in the vessels, from the fact that the peripheral or lateral layers of a flowing current move more slowly, meet with more obstruction, and hence are more favorable to coagulation than the central ones. [D, 3.]—**Embolic t.** T. following obstruction of a vessel by an embolus. [D, 3.]—**Hæmorrhagic t.** T. which follows hæmorrhages, the coagulum of extravasated blood continuing through the opening into the injured vessel. [D, 3.]—**Lymphatic t.** See THROMBOLYMPHANGEITIS.—**Marantic t., Marasmic t.** Fr., *thrombose marasmique*. T. due to a very feeble circulation. It commonly affects the crural and iliac veins, the venous plexuses of the pelvis, the cranial sinuses, etc. [D, 3, 4.]—**Placental t.** T. of the uterine veins due to an extension of the physiological t. from the placental site into the substance of the uterus. [A, 57.]—**Plate-t.** Of Eberth and Schimmelbusch, t. produced by a conglutination of blood-plates pre-existing in the blood. ["N. Y. Med. Jour.," Aug. 4, 1888, p. 126 (α, 34).]—**Puerperal venous t.** Ger., *puerperale Venenthrombose*, *Metrophlebothrombose*, *Gebärmuttervenenthrombose*. Puerperal t. of the uterine veins.—**Sinus t.** T. of one or more of the sinuses in the petrous portion of the temporal bone. [F.]—**Traumatic t.** 1. T. secondary to concussion or contusion of a part. [α, 17.] 2. See *Placental t.*—**Venous t.** T. of a vein. [α, 34.]

THROMBOTIC, adj. Thro2mb-o2t'i2k. Pertaining to or due to thrombosis. [α, 48.]

THROMBUS (Lat.), n. m. Thro2mb'u3s(u4s). Gr., θρόμβος. Fr., *thrombe*. Ger., *Thrombe*, *Blutpfropf*. The clot formed in thrombosis. [D, 3.]—**Autochthonous t., Blood-plate t.** See *Plate* THROMBOSIS.—**Laminated t.** A t. formed in strata or laminæ by slow and continuous coagulation, with an intermitting force of condensation.—**Primitive t.** A t. which remains at the place of its formation.—**Progressive t.** A t., usually stratified, which grows continuously into the lumen of the vessel. [D, 3.]—**Pudendal t.** See *T. vulvæ*.—**Red t.** A t. formed by the coagulation of blood which is at rest. It is dark-red or brown in color, and contains few white corpuscles. A t. which is formed from blood in motion contains a larger number of white corpuscles, and may be white, gray, pale-red, or mottled. [D, 48.]—**Secondary t.** 1. A t. following inflammation of the vessels or of the tissues immediately surrounding them. 2. A t. which is continuous between vessels of different kinds (*e. g.*, from capillaries into veins or arteries). [D, 3.]—**T. neonatorum.** See CEPHALÆMATOMA.—**T. vaginalis.** Hæma-

toma beneath the mucous membrane of the vagina. [α, 34.]—**T. vulvæ.** Hæmatoma of the labium pudendi majus. [α, 34.]—**White t.** See under *Red t.*

THROTTLING, n. Thro^{2}t'li^{2}n^2. Choking, strangulation.

THRUMWORT, n. Thru^{3}m'wu^{5}rt. The genus *Actinocarpus*, also the genus *Alisma* and *Amarantus caudatus.* [α, 35.]

THRUSH, n. Thru^{3}sh. 1. See APHTHÆ. 2. In solipeds, a disease of the frog, characterized by a foul-smelling secretion. [L.]—**Milk t.** See APHTHA *infantum.*

THRYPSIS (Lat.), n. f. Thri^{2}ps(thru^{6}ps)'i^{2}s. Gen., *thryps'eos (-is).* Gr., θρύψις. See COMMINUTION.

THRYPTICUS (Lat.), adj. Thri^{2}pt(thru^{6}pt)'i^{2}k-u^{3}s(u^{4}s). Gr., θρυπτικός. Fr., *thryptique.* 1. Able to break or crush, especially lithontriptic. 2. Easily broken, fragile. [A, 311, 322 (α, 48).]

THUIA (Lat.), n. f. Thu(thu^4)'i^2-a^3. See THUJA.

THUIINE (Fr.), n. Tu^6-e-en. See THUJIN.

THUJA (Lat.), n. f. Thu(thu^4)'ja^3(ya^3). Gr., θυία (1st def.), θύον (1st def.). Fr., *t.* Ger., *Lebensbaum* (2d def.). Written also *thuia* and, preferably, *thuya.* 1. Of the ancients, an African tree with fragrant wood; according to Schousboe, the *Callitris quadrivalvis;* of the very late Latin authors, probably the *Citrus medica.* 2. Arbor-vitæ; a genus of evergreen trees and shrubs of the *Cupressineæ.* 3. Of the U. S. and Hung. Ph's, the fresh tops of *T. occidentalis.* [α, 35.]—**Oleum thujæ.** A yellowish-green volatile oil, of camphoraceous odor, obtained from the leaves and twigs of *T. occidentalis;* a mixture of thujol and terpene. [α, 35.]—**Resina thujæ articulatæ.** Sandarac. [B.]—**T. articulata.** See CALLITRIS *quadrivalvis.*—**T. gigantea.** California (or British Columbia) cedar, the yellow cypress of northwestern America. [α, 35.]—**T. obtusa, T. occidentalis.** Fr., *t. d'occident, arbre de vie* (ou *de Paradis*), *cèdre américain.* Ger., *gemeiner* (oder *abendländischer*) *Lebensbaum.* American arbor-vitæ, white cedar. The fresh tops (leaves and twigs), the t. of the U. S. Ph., are used in coughs, rheumatism, intermittent fever, etc., as an application to venereal warts, cancerous ulcers, etc., and as an embrocation for rheumatic pains. A saturated tincture is recommended as an emmenagogue and in small-pox, and a distilled water in dropsy. The oil (see *Oleum thujæ*) is anthelminthic. The resinous wood, *lignum arboris vitæ* (seu *thujæ*), was formerly used like the tops. [α, 35.]—**T. orientalis.** Chinese or Japanese arbor-vitæ; a species having a pungent aromatic odor. The oily seeds are used as a stimulating tonic and purgative, and the young branches furnish a yellow dye. The leaves are used in small-pox like those of *T. occidentalis.* [α, 35.]—**Tinctura thujæ.** A tincture made by macerating 5 parts of t. with 6 of alcohol for eight days [Ger. Ph.]; by digesting 5 parts of t. with 15 of alcohol or three days [Hung. Ph.]; for by macerating 5 parts of dried t. with 50 of dilute alcohol for a week [T. A.]. [B, 95 (α, 38).]

THUJA OCCIDENTALIS.
[A, 327.]

THUJENE, n. Thuj'en. Fr., *thuiène, thujène.* A colorless, acrid fluid, $C_{10}H_{16}$, obtained by treating oleum thujæ with iodine. [B, 93 (α, 14).]

THUJETIC ACID, n. Thuj-e^{2}t'i^{2}k. A substance, $C_{28}H_{22}O_{13}$, obtained by boiling thujetin with barium water. [B, 93 (α, 14).]

THUJETIN, n. Thuj'e^{2}t-i^{2}n. Fr., *thuiétine.* Ger., *T.* A decomposition product, $C_{14}H_{14}O_8$, of thujin. [B, 270 (α, 38).]

THUJIGENIN, n. Thuj-i^{2}j'e^{2}n-i^{2}n. Fr., *thuigénine.* Ger., *T.* A substance, $C_{14}H_{12}O_7$, obtained from the green parts of *Thuja occidentalis* as microscopic acicular crystals. [B, 270 (α, 38).]

THUJIN, n. Thuj'i^{2}n. Fr., *thuiine, thujine.* Ger., *T.* A substance, $C_{20}H_{22}O_{12}$, obtained from the green parts of *Thuja occidentalis,* and occurring as lemon-yellow microscopic tabular crystals. [B, 270 (α, 38).]

THUJOL, n. Thuj'o^{2}l. Fr., *thuiol.* A substance, $C_{10}H_{16}O$, forming the chief constituent of the oil of *Thuja occidentalis,* and known in two forms, one a lævorotary and the other a dextrorotary liquid. In warm-blooded animals it acts so as to quicken the respiration, raise the blood-pressure, and lower the temperature. [B, 270 (α, 38); "Therap. Gaz.," 1885, p. 827 (α, 50).]

THUMB, n. Thu^{3}m. Gr., ἀντίχειρ. Lat., *pollex.* Fr., *pouce.* Ger., *Daumen.* The digit on the radial side of the hand. It differs from the others in being broader and shorter, in having only two phalanges, and in its metacarpal bone being separately movable. [L.]

THUMP, n. Thu^{3}mp. Palpitation of the heart, especially in horses. [L.]

THUNBERGIA (Lat.), n. f. Tun-be^{2}rg'i^2-a^3. From *Thunberg,* a Swedish botanist. 1. The genus *Gardenia.* 2. A genus of the *Thunbergiæ,* or *Thunbergieæ* (a tribe of the *Acanthaceæ*). [α, 35.]—**T. fragrans.** A native of the East Indies. In the West Indies, where it is cultivated, it is used as an aromatic tonic. [α, 35.]

THÜRANGEL (Ger.), n. Tu^{6}r'a^{3}n^2-e^{2}l. See GINGLYMUS.

THÜRE (Ger.), n. Tu^{6}r'e^2. A door. [L, 46 (α, 21).]—**Flügelt'n.** The valves of a vein.

THURIFEROUS, adj. Thu^{2}r-i^{2}f'e^{2}r-u^{3}s. From *thus,* incense, and *ferre,* to bear. Fr., *thurifère.* Producing incense. [α, 48.]

THURM (Ger.), n. Turm. A tower, a spire. [L, 46 (α, 21).]—**T'kopf, T'schädel.** See OXYCEPHALIA.

THUS (Lat.), n. n. Thu^{3}s(thus). Gen., *thur'is.* Gr., θύος. 1. Incense, common frankincense; of the Russ. Ph., olibanum. 2. Of the Netherl. Ph., a white, yellow, or reddish resin exuding from the branches of *Pinus silvestris* and *Abies excelsa.* [B, 95 (α, 38); α, 35.]—**Confectio de thure.** Fr., *confection de l'encens.* Confection of frankincense; a preparation containing 4 parts of prepared coriander-seeds, 3 parts each of white frankincense and nutmegs, 2 parts each of licorice and mastic, 1 part each of cubeb and prepared hartshorn, 8 parts of conserve of red roses, and enough white sugar, made into little balls or lozenges. [L, 94 (α, 21).]—**Cortex thuris.** See CASCARILLA-*bark* and STORAX-*bark.*—**Resina thuris.** See OLIBANUM.—**T. americanum.** See *Common* FRANKINCENSE.—**T. arabicum.** Olibanum. [α, 35.]—**T. libycum.** Gum-ammoniac. [α, 35.]—**T. vulgare.** 1. Common frankincense. [α, 35.] 2. See OLIBANUM *silvestre* (1st def.).

THUYA (Lat.), n. f. Thu(thu^4)'ya^3. See THUJA.

THYLACIITIS (Lat.), n. f. Thil(thu^{6}l)-a^{2}s(a^{3}k)-i^2-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* From θυλάκιον, a little bag. See ACNE (1st def.).

THYLLE (Ger.), n. Tu^{6}l'le^2. See TYLOSIS.

THYM (Fr.), n. Ta^{2}n^2. 1. See THYMUS. 2. Of the Fr. Cod., see THYMUS *vulgaris.*—**Eau distillée de t.** [Fr. Cod.]. A preparation made by distilling the fresh flowering tops of thyme with water. [B, 95 (α, 38).]—**Essence de t., Huile volatile de t.** See *Oil of* THYME.—**T. de Candie, T. de Dioscoride, T. des anciens.** See THYMUS *creticus.*

THYMA (Lat.), n. n. Thim(thu^{6}m)'a^3. Gen., *thym'atos (-atis).* A corruption of *ecthyma* (*q. v.*) and of *thymion* (*q. v.*).

THYMASTHMA (Lat.), n. n. Thim(thu^{6}m)-a^{2}sth(a^{3}sth)'ma^3. Gen., *-asth'matos (-atis).* From θύμος, the thymus gland, and ἆσθμα, asthma. See *Thymic* ASTHMA.

THYMATE, n. Tim'at. A derivative of thymol in which a metallic base replaces the hydrogen in its molecule of hydroxyl. [B.]

THYME, n. Tim. 1. The genus *Thymus,* especially *Thymus vulgaris.* [α, 35.] 2. See THYMUS (4th def.).—**Camphor of t.** Thymol. [α, 35.]—**Essence of t.** See *Oil of t.*—**Ground-t.** See THYMUS *serpyllum.*—**Lemon-t.** See THYMUS *citriodorus.*—**Oil of t.** Lat., *ætheroleum* (seu *oleum* [U. S. Ph., Ger. Ph., Netherl. Ph., Russ. Ph., Swiss Ph.], seu *essentia* [Belg. Ph.]) *thymi* [Dan. Ph., Norw. Ph., Swed. Ph.]. Fr., *huile volatile de thym* [Fr. Cod.]. Ger., *Thymianöl.* Sp., *esencia de tomillo* [Sp. Ph.]. An essential oil, of sp. gr. about 0·880, readily soluble in alcohol, obtained from *Thymus vulgaris.* It is deep-reddish brown after one distillation (red oil of t.), but becomes colorless (white oil of t.) if re-distilled. It consists of thymol and a mixture of cymene and thymene. It is antiseptic and stimulating, and is recommended in depression or collapse. Its chief use is as an external stimulant in veterinary medicine. [α, 35.]—**Water-t.** See ANACHARIS *alsinastrum* and FONTINALIS *antipyretica.*—**Wild t.** See THYMUS *serpyllum.*

THYMELÆA (Lat.), n. f. Thim(thu^{6}m)-e^{2}l-e'(a^3'e^2)-a^3. From θύμος, thyme, and ἐλαία, the olive-tree. Fr., *thymélée.* 1. The *Daphne t.* 2. A genus of plants of the *Thymelaceæ,* or *Thymelæaceæ,* which are an order of dicotyledons including *Daphne, Dirca, Aquilaria,* etc. The *Thymelæaceæ* of Reichenbach are a family of the *Ambiguæ,* including the *Darwinieæ, Daphneæ,* and *Aquilarinæ.* The *Thymelææ* are: Of Adanson, a family including genera (*Eriocaulon, Conocarpus, Sanamunda,* etc.) now referred to various orders; of Jussieu, the *Thymelæaceæ;* of Endlicher, a class of apetalous *Acramphibrya* consisting of the *Monimiaceæ, Laurineæ, Gyrocarpeæ, Santalaceæ, Daphnoideæ,* etc. The *Thymeleæ* are the *Thymelaceæ.* The *Thymelinæ* are: Of Link, the *Daphnoideæ;* of Endlicher, a tribe of the *Daphnoideæ* consisting of the *Passerineæ* and *Daphneæ.* The *Thymelineæ* are the *Thymelaceæ.* [α, 35.]—**Cortex thymelææ.** The bark of *Daphne mezereum* and *Daphne gnidium.* [α, 35.]—**Semen thymelææ.** The dried fruits of *Daphne gnidium.* [α, 35.]—**T. cneorum.** See DAPHNE *cneorum.*—**T. mezereum.** See DAPHNE *mezereum.*

THYMELCOSIS (Lat.), n. f. Thim(thu^{6}m)-e^{2}lk-os'i^{2}s. From θύμος, the thymus gland, and ἕλκωσις, ulceration. Ulceration of the thymus gland. [L, 50 (α, 48).]

THYMÉLÉE (Fr.), n. Te-ma-la. See THYMELÆA and MEZEREUM (3d def.).

THYMENE, n. Tim'en. Fr., *thymène.* Ger., *Thymen.* A lævorotary liquid, $C_{10}H_{16}$, found in oil of thyme. [B, 93 (α, 14).]

THYMHYDROQUINONE, n. Thim-hid-ro-kwi^{2}n'on. Fr., *thymohydroquinone.* Ger., *Thymhydrochinon.* A substance, C_6H_2-$CH_3(C_3H_7)(OH)_2$, obtained by the reduction of thymoquinone and bearing the same relation to that body that hydroquinone bears to quinone. [B; B, 93 (α, 14).]—**Dimethylether of t.** See DIMETHYLTHYMHYDROQUINONE.

THYMIAMA (Lat.), n. n. Thim(thu^{6}m)-i^2-am(a^{3}m)'a^3. Gen., *-am'atos (-atis).* Gr., θυμίαμα (from θυμιᾶν, to burn incense). Anything burned as incense or for fumigation. [A, 311 (α, 48).]—**Cortex thymiamatis.** See STORAX-*bark.*

THYMIAN (Ger.), n. Tu^{6}m-e-a^{3}n'. See THYMUS and THYMUS *vulgaris.*—**T'öl.** See *Oil of* THYME.

THYMIASIS (Lat.), n. f. Thim(thu^{6}m)-i^2-a(a^3)'si^{2}s. Gen., *-as'eos (-is).* Gr., θυμίασις (from θυμιᾶν, to burn incense). Fr., *thymiase.* Fumigation. [L, 50 (α, 14).]

THYMIC, adj. Thim'i^{2}k. Lat., *thymicus* (from θύμος, the thymus gland). Fr., *thymique.* Pertaining to the thymus or dependent on disease of the thymus (*e. g., t. asthma*).

THYMIC ACID, n. Tim'i[2]k. See THYMOL.

THYMICOCYANOTICUS (Lat.), adj. Thi[2]m(thu[6]m)''i[2]k-o(o[3])-si(ku[6])-a[2]n(a[3]n)-o[2]t(ot)'i[2]k-u[3]s(u[4]s). From θύμος, the thymus gland, and κυάνωσις, cyanosis. Dependent on disease of the thymus gland and accompanied by cyanosis. See ASTHMA *thymico-cyanoticum.*

THYMINE, n. Thim'en. See LEUCINE.

THYMION, n. Thi[2]m(thu[6]m)'i[2]-o[2]n. Gr., θύμιον (from θύμος, thyme). 1. A large wart. 2. Of Celsus, a little wart (*condyloma* or *verruca*) that projects considerably above the skin, has a slender base, and is colored at the top like the blossom of thyme (cf. MYRMECIA, 2d def.). It splits up easily, is raw, and readily bleeds. The worst forms occur about the genitals. [G, 8, 13.]

THYMIOSIS (Lat.), n. f. Thim(thu[6]m)-i[2]-os'i[2]s. Gen., *-os'eos* (*-is*). From θύμος, a warty excrescence. 1. Of Swediaur, see FRAMBŒSIA (2d def.). 2. Any fungiform or warty growth. The *Thymioses* of Fuchs are a family of the specific *Dermapostases*, including frambœsia, radesyge, and contagious anthrax. [G, 5.]—**T. fungoides.** See FRAMBŒSIA (2d def.).—**T. morus.** See CONDYLOMA *latum.*—**T. ruboides.** See FRAMBŒSIA (2d def.).—**T. scotica.** See SIBBENS.

THYMITIS (Lat.), n. f. Thim(thu[6]m)-i(e)'ti[2]s. Gen., *-it'idos* (*-idis*). Ger., *Thymusentzündung.* Inflammation of the thymus gland. [L, 50 (*a*, 14).]

THYMIUM (Lat.), n. n. Thi[2]m(thu[6]m)'i[2]-u[3]m(u[4]m). See THYMION.

THYMOÏLE (Fr.), n. Te-mo-el. Of Lallemand, thymoquinone. [B, 3 (*a*, 38).]

THYMOÏLOL (Fr.), n. Te-mo-e-lol. 1. Of Lallemand, thymoquinol. [B, 3 (*a*, 38).] 2. Of Dechambre, thymhydroquinone. [B, 93 (*a*, 14).]

THYMOL, n. Tim'o[2]l. Lat., *thymolum, acidum thymicum.* Fr., *t.* Ger., *T.* Propylmethylphenol, $C_{10}H_{14}O = C_6H_3(C_3H_7)(CH_3)\text{-}OH$, structurally probably $C_6(H,H,CH_3,H,OH,CH_2.CH_2.CH_3)$. It is isomeric with carvacrol, and is derived from oil of thyme, though most of the t. of commerce is said to be obtained from the fruit of *Carum ajowan.* It forms colorless hexagonal crystals of aromatic odor and pungent taste, soluble with great difficulty in water (in from 1,200 to 900 parts), readily soluble in alcohol, in ether, and in chloroform. It melts at 50° C., and after fusion frequently remains liquid even when cooled considerably below this point. Like carbolic acid, it forms compounds with metallic bases, called *thymates.* It possesses marked antiseptic properties, and is used in medicine both internally and locally. [B, 3 (*a*, 38); B, 4, 5.]—**T'-quecksilber** (Ger.). An unstable substance, $C_{10}H_{13}HgOH$, occurring as a blue-green precipitate. Recommended by Neisser in syphilis. [B, 270 (*a*, 38).] See MERCURY *thymolate.*

THYMOPATHY, n. Thim-o[2]p'a[3]th-i[2]. Lat., *thymopathia* (from θυμός, the spirit, and πάθος, a disease). Fr., *thymopathie.* Any mental affection or derangement. [*a*, 34.]

THYMOQUINHYDRONE, n. Thim-o-kwi[2]n-hid'ron. Fr., *t., thymeide.* A substance, $C_{20}H_{26}O_4 = C_3H_7.C_6H_2(OH)_2CH_3 + C_3H_7.C_6H_2O_2.CH_3$, occurring as shining black or dark-violet acicular crystals. [B, 3, 93 (*a*, 14, 38).]

THYMOQUINOL, n. Thim-o-kwi[2]n'o[2]l. A substance, $C_3H_7.C_6H_2(OH)_2CH_3 = C_{10}H_{14}O_2$, occurring as colorless prismatic crystals. [B, 3 (*a*, 38).]

THYMOQUINONE, n. Thim-o-kwi[2]n'on. Fr., *t., thymoïle.* Ger., *Thymochinon.* A substance bearing the same relation to thymol that quinone bears to phenol; a yellow crystalline body, $C_{10}H_{12}O_2$, of pungent odor. [B, 4.]

THYMOTIC ACID, n. Thim-o[2]t'i[2]k. Ger., *Thymotinsäure.* An acid, $C_6H_2(OH)C_3H_7(CH_3)CO.OH, = C_6[C_3H_7,OH,CO.OH,CH_3,H,H,]$, occurring as silky crystals. [B, 3 (*a*, 38).]

THYMOXYCUMINIC ACID, n. Thim-o[2]x-i[2]-ku[2]-mi[2]n'i[2]k. Of Barth, metahydroxycuminic acid. See HYDROXYCUMINIC ACID.

THYMUM (Lat.), n. n. Thim(thu[6]m)'u[3]m(u[4]m). Gr., θύμον. The *Thymus vulgaris*; of the ancients, *Thymus creticus.* [*a*, 35.]

THYMUS (Lat.), n. m. Thim(thu[6]m)'u[3]s(u[4]s). Gr., θύμος, θύμον. Fr., *thym.* Ger., *Thymian.* 1. of the ancients, *T. creticus.* 2. Thyme, a genus of the *Labiatæ*; also *T. vulgaris.* [*a*, 35.] 3. See *T.* GLAND. 4. Condyloma acuminatum; so called because of a fancied resemblance to the flower of thyme (cf. THYMION). [G.]—**Accessory t.** Ger., *Nebent'.* One of the lobules frequently met with belonging to the t. gland, but isolated from the mass of the organ. [L, 87 (*a*, 50).]—**Ætheroleum thymi.** See *Oil of* THYME.—**Alcohol thymi.** See *Spiritus thymi* (2d def.).—**Essentia thymi.** See *Oil of* THYME.—**Herba thymi.** Fr., *thym.* Sp., *tomillo.* See under *T. vulgaris.*—**Oleum thymi.** See *Oil of* THYME.—**Spiritus thymi.** A preparation made by dissolving 1 part of oil of thyme in 99 parts of 80-per-cent. alcohol [Belg. Ph.], or by distilling 1 part of thyme with 3 parts each of water and alcohol so as to obtain 4 parts [Swiss Ph.]. [B, 95 (*a*, 38).]—**T. albus.** See *T. creticus.*—**T. alpinus.** Ger., *Alpen-Quendel* (1st def.), *Thymian* (1st def.). 1. Alpine thyme of Europe; an aromatic undershrub. The leafy twigs (*herba clinopodii montani*) are used like those of *T. serpyllum.* 2. The *Calamintha acinos.* [*a*, 35.]—**T. citriodorus.** Lemon-thyme; an aromatic lemon-scented variety of *T. serpyllum*; used as a condiment and stimulant. [*a*, 35.]—**T. creticus.** Fr., *thyme de Candie* (ou *de Crête*, ou *des anciens*, ou *de Dioscoride* [all 1st def.]). Ger., *köpfiger Thymian* (1st def.). 1. The θύμος and θύμον of the ancients; a pungent, fragrant shrub of Mediterranean regions, formerly official as *herba thymi* (*cretici*, seu *albi*, seu *capitati*, seu *veri*), and still used in southern Europe as an aromatic. 2. The *Satureia thymbra.* [*a*, 35.]—**T. mastichina.** Ger., *Mastix-Thymian.* Herb-mastich; a shrub of southern Europe and northern Africa, having an odor like that of mastic; still used like garden thyme under the name of *herba mastichinæ* (seu *mastichinæ Gallorum*, seu *mari*, seu *mari vulgaris*). [*a*, 35.]—**T. pannonicus.** Ger., *ungarischer Thymian.* An undershrub of southern and central Europe, considered by Koch a variety of *T. serpyllum*, like which it is used. [*a*, 35.]—**T. serpillum, T. serpyllum.** Fr., *thym serpolet* (ou *sauvage*), *pillolet.* Ger., *Feld-Thymian, Quendel, Hühnerklee, Kundelkraut, Feldkümmel, Kümmleinkraut.* Mother-of-thyme, hill-wort, pellamountain, serpolet-oil plant, wild thyme of Europe and northern Asia. The flowering leafy branches, *herba serpylli* (*minoris*, seu *silvestris*, seu *vulgaris*), *herba saturejæ agrestis*, contain an essential oil, bitter extractive, tannin, etc., and are used as an external stimulant, and internally in whooping-cough. They also form a part of the *species aromaticæ, species ad fomentum*, and *syrupus ipecacuanhæ compositus.* [*a*, 35.]—**T. tragoriganum.** Ger., *wohlriechender Thymian.* The τραγορίγανος of Dioscorides, goat's-marjoram; an aromatic shrub of Greece and the Grecian islands. [*a*, 35.]—**T. verus.** See *T. creticus.*—**T. vulgaris.** Fr., *thym* (*commun*), *mignotise des Génevois, tin, pouilleux.* Ger., *ächter* (oder *Garten-*) *Thymian, römischer* (oder *welscher*) *Quendel. Bienenkraut, Immenkraut, Demuthkraut.* Sp., *tomillo* [Mex. Ph.]. Common thyme; a highly aromatic undershrub indigenous to southern Europe, often cultivated as a condiment. The leafy and flowering branches, *herba thymi* (seu *vulgaris*, seu *hortensis*), *herba serpylli romani*, are used like those of *T. serpyllum*, and furnish oil of thyme. [*a*, 35.]

THYMUS SERPYLLUM. [A, 327.]

THYREADENOSCIRRHUS (Lat.), n. m. Thi[2]r(thu[6]r)''e[2]-a[2]d(a[3]d)-e[2]n-o(o[3])-si[2]r(ski[2]r)'ru[3]s(ru[4]s). For deriv., see THYREOID, ADEN, and SCIRRHUS. Fr., *thyréadénosquirrhe.* Scirrhus of the thyreoid gland. [L, 50 (*a*, 14).]

THYRÉAL (Fr.), n. Te-ra-a[3]l. Of G. St.-Hilaire, the hypobranchial bone in fishes. [L, 14.]

THYREARYTÆNODES (Lat.), adj. Thi[2]r(thu[6]r)-e[2]-a[2]r(a[3]r)-i[2](u[6])-te[2]n(ta[3]-e[2]n)-od'ez(as). Pertaining to the arytænoid and thyreoid cartilages. [L, 50 (*a*, 14).]

THYREICHTHYOSIS (Lat.), n. f. Thi[2]r(thu[6]r)-e[2]-i[2]k(i[2]ch[2])-thi[2](thu[6])-os'i[2]s. Gen., *-os'eos* (*-is*). From θυρεός, an oblong shield, and ἰχθύωσις, ichthyosis. See ICHTHYOSIS *scutellata.*

THYREMPHRAXIS (Lat.), n. f. Thi[2]r(thu[6]r)-e[2]m-fra[2]x-(fra[3]x)'i[2]s. Gen., *-phrax'eos* (*-is*). For deriv., see THYREOID and EMPHRAXIS. See GOÎTRE.

THYREOADEN (Lat.), n. m. and f. Thi[2]r(thu[6]r)-e[2]-o(o[2])'a[2]d-(a[3]d)-e[2]n(an). Gen., *-ad'anos* (*-is*). From θυρεοειδής, thyreoid, and ἀδήν, gland. See *Thyreoid* GLAND.

THYREOADENITIS (Lat.), n. f. Thi[2]r(thu[6]r)-e[2]-o(o[3])-a[2]d(a[3]d)-e[2]n-i(e)'ti[2]s. Gen., *-it'idos* (*-idis*). See THYREOITIS.

THYREO-ADENOIDÆUS (Lat.), n. m. Thi[2]r(thu[6]r)''e[2]-o(o[3])-a[2]d(a[3]d)-e[2]n-o(o[2])-i[2]d(ed)-e'(a[3]'e[2])-u[3]s(u[4]s). For deriv., see THYREOID and ADENOID. Fr., *thyréo-adénoïdien.* A fasciculus of the inferior constrictor of the pharynx inserted on the side of the thyreoid gland. [Winslow (L).]

THYREO-ARY-EPIGLOTTICUS (Lat.), **THYREO-ARYTÆNO-EPIGLOTTICUS** (Lat.), **THYREO-ARYTÆNO-EPIGLOTTIDEUS** (Lat.), n's m. Thi[2]r(thu[6]r)''e[2]-o(o[3])-a[2]r(a[3]r)-i[2]-(u[6])-e[2]p-i[2]-glo[2]t(glot)'ti[2]k-u[3]s(u[4]s), -a[2]r(a[3]r)-i[2](u[6])-ten'''(ta[3]''e[2]n)-o-(o[3])-e[2]p-i[2]-glo[2]t(glot)'ti[2]k-u[3]s(u[4]s), -ten'''(ta[3]'''e[2]n)-o(o[3])-e[2]p-i[2]-glo[2]t-(glot)-ti[2]d'e[2]-u[3]s(u[4]s). Ger., *Schildgiessbeckenkehldeckelmuskel.* The thyreo-epiglottideus and the arytæno-epiglottideus regarded as one muscle. [L, 31.]

THYREO-ARYTÆNOID, adj. Thi[2]r-e[2]-o-a[2]r-i[2]-ten'oid. Pertaining to the thyreoid and arytænoid cartilages. [C.]

THYREO-ARYTÆNOIDEUS (Lat.), n. m. Thi[2]r(thu[6]r)-e[2]-o-(o[3])-a[2]r(a[3]r)-i[2](u[6])-te[2]n(ta[3]-e[2]n)-o(o[2])-i[2]d(ed)'e[2]-u[3]s(u[4]s). Fr., *thyréo-aryténoïdien.* Ger., *Schildgiessbeckenmuskel.* The t.-a. internus and the t.-a. externus regarded as one muscle. [L.]—**T.-a. ascendens.** See *T.-a. inferior.*—**T.-a. descendens.** See *T.-a. superior.*—**T.-a. externus.** A muscle arising from the inner surface of the thyreoid cartilage close to the t.-a. internus and the cricothyreoid membrane and inserted into the border of the arytænoid cartilage, its muscular process, the arytæno-epiglottidean fold, and the false vocal band, some fibres passing up toward the epiglottis. [L, 31, 142, 332.]—**T.-a. inferior.** 1. The oblique fibres of the t.-a. 2. See *T.-a.*—**T.-a. internus.** Ger., *Stimmbandmuskel.* A muscle which arises from the inner surface of the ala of the thyreoid cartilage and the interior of the false vocal cord and is inserted into the false vocal cord and the vocal process of the arytænoid cartilage. [L, 31, 142, 332.]—**T.-a. major.** See *T.-a.*—**T.-a. minor.** See *T.-a. superior.*—**T.-a. obliquus.** The portion of the thyreo-arytæno-epiglotticus inserted into the posterior portion of the muscular process of the arytænoid cartilage. [L, 31.]—**T.-a. superior.** Ger., *oberer Schildgiessbeckenmuskel.* The portion of the t.-a. externus inserted into the muscular process of the arytænoid cartilage. [L, 31.]—**T.-a. superior lateralis.** See *T.-a. superior.*—**T.-a. superior medialis.** Ger., *Taschenbandmuskel.* The portion of the t.-a. externus extending between the border of the arytænoid cartilage and the false vocal band. [L, 332.]

THYREOCELE (Lat.), n. f. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-se(ka)'le(la); in Eng., thi^{2}r'e^2-o-sel. Gen., *-cel'es.* From θυρεοειδής, thyreoid, and κήλη, a tumor. Fr., *thyréocèle.* Ger., *Kehlbruch.* A tumor of the thyreoid gland, especially a goître. [E.]

THYREOCORNICULATUS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-ko^{2}rn-i^{2}k-u^{2}l(u^{4}l)-at(a^{3}t)'u^{3}s(u^{4}s). An anomalous insertion of fibres of the thyreo-arytænoideus into the cartilage of Santorini. [L, 332.]

THYREOCRICOPHARYNGEUS (Lat.), n. m. Thi^{2}r(thu^{6}r)''-e^2-o(o^3)-kri(kri^2)-ko(ko^3)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). See CRICOPHARYNGEUS.

THYREOCUNEIFORMIS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-ku^{2}n(ku^{4}n)-e^2-i^2-fo^{2}rm'i^{2}s. An anomalous insertion of the fibres of the thyreo-arytænoideus into the cartilage of Wrisberg. [L, 332.]

THYREODEOCYNANCHE (Lat.), **THYREODITIS** (Lat.), n's f. Thi^{2}r(thu^{6}r)-e^2-od''e^2-o(o^3)-si^{2}n(ku^{6}n)-a^{2}n^{2}k(a^{3}n^{2}ch^2)'e(a), -o^{2}d(od)-i(e)'ti^{2}s. Gen., *-anch'es, -it'idos (-idis).* From θυρεοειδής, thyreoid, and κυνάγχη, cynanche. See THYREOITIS.

THYREO-EPIGLOTTIC, adj. Thi^{2}r-e^2-o-e^{2}p-i^2-glo^{2}t'i^{2}k. Pertaining to the epiglottis and the thyreoid gland or cartilage.

THYREO-EPIGLOTTICUS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o-(o^3)-e^{2}p-i^2-glo^{2}t(glot)'ti^{2}k-u^{3}s(u^{4}s). Ger., *Schildkehldeckelmuskel.* See THYREO-EPIGLOTTIDEUS.—**T.-e. longus.** An anomalous muscle arising from the inner surface of the thyreoid cartilage near its inferior cornu and blending with the t.-e. [L, 332.]

THYREO-EPIGLOTTIDEUS (Lat.), n. m. Thi^{2}r(thu^{6}r)''e^2-o(o^3)-e^{2}p-i^2-glo^{2}t(glot)-ti^{2}d'e^2-u^{3}s(u^{4}s). A few fibres on the upper edge of the thyreo-arytænoideus which are spread out upon the membrane between the epiglottis and the arytænoid cartilage. [Douglas (L).]—**T.-e. inferior, T.-e. major.** See *T.-e.*—**T.-e. minor, T.-e. superior.** An anomalous muscle arising from the thyreoid cartilage and passing along the thyreo-epiglottic ligament to the epiglottis. [L, 31.]

THYREO-GLOTTIDEUS [Coues] (Lat.), n. m. Thi^{2}r(thu^{6}r)''-e^2-o(o^3)-glo^{2}t(glot)-ti^{2}d'e^2-u^{3}s(u^{4}s). See THYREO-EPIGLOTTIDEUS.

THYREO-HYAL, n. Thir-e^2-o-hi'a^{2}l. Pertaining to the hyoid bone and the thyreoid cartilage; as a n., see *T.-h.* BONE.

THYREO-HYOIDEUS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-hi-(hu^6)-o(o^2)-i^{2}d(ed)'e-u^{3}s(u^{4}s). Fr., *thyréo-hyoïdien.* Ger., *Schildzungenbeinmuskel.* A flat quadrangular muscle arising from the outer surface of the thyreoid cartilage and inserted into the lower margin of the body and the cornu majus of the hyoid bone. [L, 332.]—**T.-h. accessorius.** An anomalous muscle extending between the superior cornu of the thyreoid cartilage and the greater cornu of the hyoid bone. [L, 332.]—**T.-h. azygos, T.-h. minor, T.-h. superior.** An anomalous offshoot of the t.-h. extending between the greater cornu of the hyoid bone and the upper margin of the thyreoid cartilage. [L, 332.]

THYREOID, adj. Thi^{2}r'e^2-oid. Gr., θυρεοειδής (from θυρεός, an oblong [door-shaped or doorstone-shaped] shield, and εἶδος, resemblance). Fr., *thyréoïde, thyréoïdien.* Ger., *thyreoidisch.* Pertaining to, connected with, or derived from the t. gland; as a n. (Lat., *thyreoidea*), the gland itself. [α, 17.]

THYREOIDECTOMY, n. Thi^{2}r-e^2-oid-e^{2}kt'om-i^2. Lat., *thyreoidectomia* (from θυρεοειδής, thyreoid, and ἐκτομή, a cutting out). Fr., *thyréoïdectomie.* Ger., *Thyreoidektomie.* Removal of the thyreoid gland. [E.]

THYREOIDEA (Lat.), n. f. Thi^{2}r(thu^{6}r)-e^2-o(o^2)-i^{2}d(ed)'e^2-a^3. See *Thyreoid* GLAND.

THYREOIDEUS (Lat.), adj. Thi^{2}r(thu^{6}r)-e^2-o(o^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). See THYREOID; as a n. m., a muscle connected with the thyreoid cartilage. [L.]—**T. incisuræ cartilaginis thyreoideæ mediæ transversæ.** See *T. transversus.*—**T. incisuræ mediæ obliquus.** See *T. transversus impar* (1st def.).—**T. internus.** See SUBTHYREOIDEUS.—**T. proprius.** A muscle extending near the middle line between the upper and lower margins of the thyreoid cartilage. [L, 332.]—**T. transversus (anomalus).** An anomalous muscle extending between the two cricoid processes of the thyreoid cartilage. [L, 332.]—**T. transversus impar.** 1. An aberrant bundle of the cricothyreoideus attached to the cricoid process of the thyreoid cartilage. [L, 332.] 2. See *T. transversus.*

THYREOIDITIS (Lat.), n. f. Thi^{2}r(thu^{6}r)-e^2-o(o^2)-i^{2}d(ed)-i(e)'-ti^{2}s. Gen., *-it'idos (-idis).* See THYREOITIS.

THYREOIDOPRIVUS (Lat.), adj. Thi^{2}r(thu^{6}r)-e^2-o(o^2)-i^{2}d-(ed)-o(o^3)-pri(pre)'vu^{3}s(wu^{4}s). From *thyreoideus,* thyreoid, and *privus,* deprived of. See STRUMIPRIVUS.

THYREOIDOTOMY, n. Thi^{2}r-e^2-oid-o^{2}t'om-i^2. See THYREOTOMY.

THYREOITIS (Lat.), n. f. Thi^{2}r(thu^{6}r)-e^2-o(o^2)-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* From θυρεοειδής, thyreoid. Fr., *thyréoïdite.* Ger., *Schilddrüsenentzündung.* Inflammation of the thyreoid gland.

THYREOMEMBRANOSUS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-me^{2}mb-ra^{2}n(ra^{3}n)-os'u^{3}s(u^{4}s). The portion of the thyreo-epiglotticus inserted into the arytæno-epiglottidean fold. [L, 31.]

THYREONCUS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o^{2}n^{2}k'u^{3}s(u^{4}s). From θυρεοειδής, thyreoid, and ὄγκος, a tumor. Fr., *thyréoncie.* See GOÎTRE.

THYREO-ŒSOPHAGEUS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-e^{2}s(o^2-e^{2}s)-o^{2}f-aj(a^{3}g)'e^2-u^{3}s(u^{4}s). Muscular fibres between the œsophagus and the thyreoid cartilage. [L, 332.]

THYREOPALATINUS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-pa^{2}l-(pa^{3}l)-a^{2}t(a^{3}t)-in(en)'u^{3}s(u^{4}s). From *thyreoideus,* thyreoid, and *palatum,* the palate. See CONSTRICTOR *isthmi faucium posterior.*

THYREOPHARYNGEUS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-fa^{2}r(fa^{3}r)-i^{2}nj(u^{6}n^{2}g)'e^2-u^{3}s(u^{4}s). From θυρεοειδής, thyreoid, and φάρυγξ, the pharynx. Fr., *thyréo-pharyngien.* Ger., *Schlundschliesser.* 1. Of Douglas, that portion of the inferior constrictor of the pharynx that arises from the thyreoid cartilage. [L.] 2. Of Winslow and Valsalva, see *Inferior* CONSTRICTOR *of the pharynx.* 3. See *Middle* CONSTRICTOR *of the pharynx.*

THYREOPHARYNGOPALATINUS (Lat.), n. m. Thi^{2}r-(thu^{6}r)-e^2-o(o^3)-fa^{2}r(fa^{3}r)-i^{2}n^{2}g(u^{6}n^{2}g)-o(o^3)-pal(pa^{3}l)-a^{2}t(a^{3}t)-in(en)'-u^{3}s(u^{4}s). From θυρεοειδής, thyreoid, φάρυγξ, the pharynx, and *palatum,* the palate. See PALATO-PHARYNGEUS.

THYREOPHRAXIA (Lat.), n. f. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-fra^{2}x-(fra^{3}x)'i^2-a^3. From θυρεοειδής, thyreoid, and φράσσειν, to fence in. Fr., *thyrophraxie.* Of Alibert, see GOÎTRE.

THYREOPHYMA (Lat.), n. n. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-fim-(fu^{6}m)'a^3. Gen., *-phym'atos (-atis).* From θυρεοειδής, thyreoid, and φῦμα, a growth. A tumor of the thyreoid gland. [L, 50 (α, 14).]—**T. fugax, T. sanguineum, T. spurium.** Of P. Frank, see *Inflammatory* GOÎTRE.

THYREOPRIVUS (Lat.), adj. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-pri(pre)'-vu^{3}s(wu^{4}s). See STRUMIPRIVUS.

THYREOPROTEIN, n. Thi^{2}r-e^2-o-prot'e^2-i^{2}n. Of Bubnoff, an albumin isolated from the thyreoid gland. [L, 50 (α, 14).]

THYREOTOMY, n. Thi^{2}r-e^2-o^{2}t'om-i^2. From θυρεοειδής, thyreoid, and τομή, a cutting. Ger., *Thyreotomie.* Fr., *thyréotomie.* The operation of splitting the thyreoid cartilage (generally used for the removal of tumors). [E.]

THYREOTRACHEALIS (Lat.), n. m. Thi^{2}r(thu^{6}r)-e^2-o(o^3)-tra^{2}k(tra^{3}ch^2)-e^2-al(a^{3}l)'i^{2}s. For deriv., see THYREOID and TRACHEA. A muscle extending between the trachea and the thyreoid cartilage or region. [L.]—**T. profundus.** An anomalous offshoot of the crico-arytænoideus lateralis to the trachea. [L, 332.]—**T. superficialis.** An anomalous offshoot of the sternothyreoideus to the trachea. [L, 332.]

THYROID, adj. Thir'oid. A less correct form of *thyreoid.* For other words in *Thyro-*, see the corresponding words in *Thyreo-*.

THYRSE, n. Thu^{5}rs. Lat., *thyrsus* (from θύρσος, a stem). Fr., *t.* Ger., *Strauss, Blüthenstrauss.* A compact panicle, such as the inflorescence of the grape. [α, 35.]

THYRSIFLOROUS, adj. Thu^{5}rs-i^2-flor'u^{3}s. From *thyrsus,* a thyrse, and *flos,* a flower. Fr., *thyrsiflore.* Having the inflorescence in contracted or ovate panicles. [α, 35.]

THYSSELINUM (Lat.), n. n. Thi^{2}s(thu^{6}s)-se^{2}l-in(en)'u^{3}m(u^{4}m). Fr., *thyssélin.* Ger., *Sumpfsilge.* 1. Of Adanson, the genus *Selinum.* 2. Of Hoffmann, a genus of the *Umbelliferæ* closely resembling *Peucedanum.* [α, 35.]—**T. palustre.** Ger., *Milchpeterling, Oelsenich, wilder Bertram, gemeine Sumpfsilge.* A species found in Europe and Asia. The root, which has a strong, somewhat turpentine-like odor and a pungent, aromatic, bitterish taste, has been used in epilepsy and various spasmodic affections. In northern Asia it is used as a condiment in place of ginger. [α, 35.]

1. 2.

THE TIBIA.

1, posterior aspect; 2, anterior aspect.

TIBIA (Lat.), n. f. Ti^{2}b(teb)'i^2-a^3. Gr., κνήμη, προκνήμιον. Fr., *t.* Ger., *T.* A long bone, the larger of the two of the leg, on the anterior and inner side of which it is placed. Its upper extremity bears two concave surfaces covered with cartilage, separated by the crucial spine, for articulation with the femur, and bears on each side two prominences, the external and internal tuberosities. The shaft is three-sided, smaller in the middle than at either end, its inner surface being subcutaneous. The lower extremity is enlarged transversely and projects downward on the inner side as the internal malleolus, presenting a concave surface for articulation with the astragalus; externally is a surface covered with cartilage for articulation with the fibula, and posteriorly are grooves for the tendons of the tibialis posticus and flexores digitorum pedis and pollicis longi. [L, 31, 142, 332.]—**T. minima.** See FIBULA (1st def.).

TIBIAD, adv. Ti^{2}b'i^2-a^{2}d. Toward the tibial aspect. [L, 141.]

TIBIÆUS (Lat.), n. m. Ti^{2}b(teb)-i^2-e'(a^3'e^2)-u^{3}s(u^{4}s). See TIBIALIS.

TIBIAL, adj. Ti^{2}b'i^2'l. Lat., *tibialis.* Fr., *t.* Ger., *t.* Pertaining to or situated near or toward the tibia. [L, 343.]

TIBIAL (Fr.), adj. and n. Te-be-a^{3}l. See TIBIALIS.—**T. antérieur.** See TIBIALIS *anticus.*—**T. postérieur.** See TIBIALIS *posticus.*

TIBIALIS (Lat.), adj. Ti^{2}b(teb)-i^2-al(a^{3}l)'i^{2}s. From *tibia* (*q.v.*). Tibial; as a n. m. (Fr., *tibial, jambier;* Ger., *Schienbeinmuskel*), a muscle connected with the tibia. [α, 48.]—**T. anticus.** Fr., *jambier antérieur.* Ger., *Schienbeinmuskel.* A muscle which arises from the lower part of the external tuberosity of the tibia and the upper half of the exterior surface of the bone from the interosseous membrane and the strong fascia of the leg; also from the intermuscular sæptum. It is inserted into a rounded area on the inner and inferior part of the internal cuneiform and the first metatarsal bones. [C.]—**T. anticus accessorius, T. anticus profundus.** See TIBIO-FASCIALIS *anticus.*—**T. gracilis.** See PLANTARIS.—**T. nauticus,**

T. posticus. A muscle which arises from the interosseous membrane; the outer part of the posterior surface of the tibia, the inner surface of the fibula and the aponeurosis covering it. It is inserted into the tubercle of the scaphoid bone and also into the three cuneiform bones, the cuboid, and the bases of the second, third, and fourth metatarsal bones, and also the sustentaculum tali. [C.]—**T. profundus.** See TIBIOFASCIALIS.—**T. secundus.** A muscle accessory to the t. posticus, arising from the lower part of the tibia and inserted into some of the ligaments near the ankle. [L, 332.]

TIBIO-APONÉVROTIQUE (Fr.), n. Teb-e-o-a^{3}p-o-nav-rot-ek. See TIBIOFASCIALIS.

TIBIO-CALCANÉEN (Fr.), n. Te-be-o-ka^{3}l-ka^3-ne-a^{3}n^2. See SOLÆUS (1st def.).

TIBIOFASCIALIS (Lat.), adj. Ti^{2}b(teb)-i^2-o(o^3)-fa^{2}s(fa^{3}s)-si^2-(ki^2)-al(a^{3}l)′i^{2}s. From *tibia*, the tibia, and *fascia*, a band. Fr., *tibio-aponévrotique*. Connected with the tibia and the fascia of the leg or foot; as a n., a muscle so connected. [L.]—**T. anticus.** An anomalous muscle which arises from the lower third of the anterior edge of the tibia and is inserted into the annular ligament and deep fascia. It is sometimes a part of the tibialis anticus. [C.]

TIBIO-FEMORAL, adj. Ti^{2}b-i^2-o-fe^{2}m′o^2-r′l. Pertaining to the tibia and the femur. [a, 48.]

TIBIO-FIBULAR, adj. Ti^{2}b-i^2-o-fi^{2}b′u^{2}l-a^{3}r. Lat., *peroneo-tibialis*. Fr., *péronéo-tibial*. Pertaining to the tibia and the fibula.

TIBIO-MALLÉOLAIRE (Fr.), n. Te-be-o-ma^3-le^2-o-la^{2}r. See *Internal saphenous* VEIN.

TIBIO-NAVICULAR, adj. Ti^{2}b-i^2-o-na^{2}v-i^{2}k′u^{2}l-a^{3}r. From *tibia*, the tibia, and *navicula*, a boat. Pertaining to the tibia and the scaphoid bone. [a, 48.]

TIBIO-PÉRONÉO-CALCANIEN (Fr.), n. Te-be-o-pa-ro-na-o-ka^{3}l-ka^3-ne-a^{3}n^2. See SOLÆUS (1st def.).

TIBIO-PÉRONÉO-TARSIEN (Fr.), n. Te-be-o-pa-ro-na-o-ta^{3}r-se-a^{3}n^2. See PERONEUS *longus*.

TIBIO-PERONEAL, adj. Ti^{2}b-i^2-o-pe^{2}r-o^{2}n-e″l. From *tibia*, the tibia, and περονή, the fibula. Fr., *tibio-péronier*. See TIBIO-FIBULAR.

TIBIO-PHALANGETTIEN (Fr.), n. Te-be-o-fa^3-la^{3}n^2-zhe^{2}t-te-a^{3}n^2. See FLEXOR *digitorum pedis longus*.

TIBIOPHALANGEUS (Lat.), n. m. Ti^{2}b(teb)-i^2-o(o^3)-fa^{2}l-(fa^{3}l)-a^{2}n(a^{3}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). Fr., *tibio-phalangien*. Ger., *langer* (oder *dicker*) *Hufbeinbeuger, hinterer Unterschenkelmuskel*. The analogue of the flexor hallucis longus and flexor perforans of man found in the lower animals. [L, 13.]—**T. magnus.** See *T.*—**T. parvus.** See PERONEOPHALANGEUS.

TIBIOPRÆMETATARSEUS (Lat.), **TIBIOPRÆMETATARSUS** (Lat.), n's m. Ti^{2}b(teb)″i^2-o(o^3)-pre(pra^3-e^2)-me^{2}t-a^3-ta^{3}rs′e^2-u^{3}s(u^{4}s), -ta^{3}rs′u^{3}s(u^{4}s). From *tibia* (*q. v.*), *præ*, before, and *metatarsus* (*q. v.*). Fr., *tibio-pré-métatarsien*. Ger., *Schienbeinbeuger, Wadenmuskel*. A muscle of solipeds, divided into two portions—the muscular, representing the tibialis anticus of man, and the tendinous, representing, according to Meckel, the peroneus tertius of man. [L, 13.]

TIBIOPRÆPHALANGEUS (Lat.), n. m. Ti^{2}b(teb)″i^2-o(o^3)-pre(pra^3-e^2)-fa^{2}l(fa^{3}l)-a^{2}n(a^{3}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). From *tibia* (*q. v.*), *præ*, before, and phalanx (*q. v.*). See PERONEOPRÆPHALANGEUS.

TIBIO-SOUS-PHALANGETTIEN COMMUN (Fr.), n. Te-be-o-su-fa^3-la^{3}n^2-zhe^{2}t-te-a^{3}n^2 ko^{2}m-u^{3}n^2. Of Chaussier, see FLEXOR *digitorum pedis longus*.

TIBIO-SOUS-TARSIEN (Fr.), n. Te-be-o-su-ta^{3}r-se-a^{3}n^2. See TIBIALIS *posticus*.

TIBIO-SUS-TARSIEN (Fr.), n. Te-be-o-su^6-ta^{3}r-se-a^{3}n^2. See TIBIALIS *anticus*.

TIBIO-TARSAL, adj. Ti^{2}b-i^2-o-ta^{3}r′s′l. Fr., *tibio-tarsien*. Pertaining to the tibia and the tarsus. [a, 48.]

TIBOUCHINA (Lat.), n. Teb-ush-en′a^3. Fr., *tibouchine*. A genus of the *Melastomaceæ*. [a, 35.]—**T. aspera.** A Guiana shrub. The aromatic leaves and flowers are used as a pectoral. [a, 35]

TIC, n. Ti^{2}k. Fr., *t.* A convulsive motion or fit, especially of certain muscles of the face. [D, 20.]—**Convulsive t., Facial t.** Fr., *t. convulsif*. Ger., *Gesichtskrampf*. See *Gilles de la Tourette's* DISEASE.—**Salaamst'** (Ger.). See *Salaam* CONVULSIONS.—**Spasmodic t.** Paralysis of the muscles of one or both sides of the face, associated with tonic contraction of the same. [D, 1.] Cf. *Facial* PARALYSIS.—**T. de salaam** (Fr.). See CHOREA *nutans* and *Salaam* CONVULSIONS.—**T. douloureux** (Fr.). Facial neuralgia accompanied by an involuntary contraction of some of the facial muscles. [a, 34.]—**T. giratoire** (Fr.). Clonic spasm of the obliquus capitis inferior. [a. 34.]—**T. non-douloureux** (Fr.). Of Trousseau, myoclonus. [a, 34.]—**T. rotatoire** (Fr.). See *T. giratoire*.

TICK, n. Ti^{2}k. Gr., ἰξώδης. Lat., *ixodes*. Fr., *tique*. Ger., *Zecke*. A name common to certain small parasitical *Arachnida* constituting the section *Ixodes* (called also *Suctoria*) of the family *Acarides*. [G, 60.] See IXODES and its subheadings.—**Itch t.** See ACARUS *scabiei*.

TICKLING, n. Ti^{2}k′li^{2}n^2. Fr., *chatouillement*. Ger., *Kitzeln, Kitzel*. A sensation of slight irritation of the peripheral ends of sensitive nerves, sometimes purely subjective. [D.]

TICKSEED, n. Ti^{2}k′sed. The genus *Coreopsis*, also any one of several species of *Desmodium*. [a, 35.]

TICKWEED, n. Ti^{2}k′wed. See HEDEOMA *pulegioides*.

TICOREA (Lat.), n. f. Ti^{2}k-or′e^2-a^3. Fr., *ticorée*. A genus of rutaceous trees and shrubs. [a, 35.]—**T. febrifuga.** A Brazilian and Guiana tree. The astringent bark is used as a febrifuge. [a, 35.]

TIEFENBACH (Ger.), n. Tef′e^{2}n-ba^{3}ch^2. A climatic health resort, with a sulphurous spring, in Bavaria, near the Lake of Constance. [L, 57 (a, 14).]

TIEFSTAND (Ger.), n. Tef′sta^{3}nd. See DESCENT (1st def.).

TIEFSTECHEN (Ger.), n. Tef′ste^{2}ch^2-e^{2}n. See ACUPUNCTURE.

TIERCE (Fr.), adj. Te-e^{2}rs. See TERTIAN.

TIERMAS (Sp.), n. Te-e^{2}rm′a^{3}s. A place in Saragossa, Spain, where there is a hot saline and sulphurous spring. [L, 49, 57 (a, 14).]

TIERS-ARGENT (Fr.), n. Te-e^{2}rz-a^{3}r-zha^{3}n^2. An alloy of 3 parts of silver and 2 of aluminium; used in France as a substitute for silver. [Bloxam (B).]

TIEUTE (Jav.), n. See STRYCHNOS *t.*

TIFLIS, n. A place in the Caucasus, Russia, where there are hot sulphurous springs. [L, 30, 49 (a, 14).]

TIGE (Fr.), n. Tezh. 1. See STEM (1st def.). 2. See CRURA *cerebri*.—**T. de l'encéphale** [Huguenin]. The base of the brain. [I, 28 (K).]—**T. du calamus scriptorius.** The median furrow of the fourth ventricle. [I, 36 (K).]—**T. fœtale.** The long axis of the fœtus; its trunk. [A, 54.]—**T. pituitaire.** See INFUNDIBULUM (2d def.).—**T's souterraines** [Fr. Cod.]. See RHIZOMA (2d def.).—**T. sus-sphénoïdale.** See HYPOPHYSIS *cerebri*.

TIGELLARY, adj. Ti^{2}j′e^{2}l-ar-i^2. Pertaining to the stem or to a tigella; of the sheath of a leaf, incorporated with the stem. [a, 35.]

TIGELLE, n. Ti^{2}j-e^{2}l′. Lat., *tigella, tigellula*. Fr., *t., tigellule*. An initial or miniature stem; of some botanists, the stem of mosses and other cryptogams; also the plumule and the caulicle, and, of Richard, the part of the plumule connecting the radicle with the cotyledons. [a, 35.]

TIGLI (Fr.), n. Tel-ye. Ger., *T'baum*. See CROTON *tiglium*.—**Huile de t.** See CROTON-*oil*.

TIGLIC, adj. Ti^{2}g′li^{2}k. Derived from *Tiglium*. [B.]—**T. acid.** See METHYL*crotonic acid*.—**T. aldehyde.** See GUAIACENE.

TIGLINIC ACID, n. Ti^{2}g-li^{2}n′i^{2}k. See METHYL*crotonic acid*.

TIGLIUM (Lat.), n. n. Ti^{2}g′li^2-u^{3}m(u^{4}m). See CROTON *t.*—**Grana tiglii.** The seeds of *Croton t.* [a, 35.]—**Oleum tiglii** [U. S. Ph.]. See CROTON-*oil*.—**T. officinale.** See CROTON *t.*

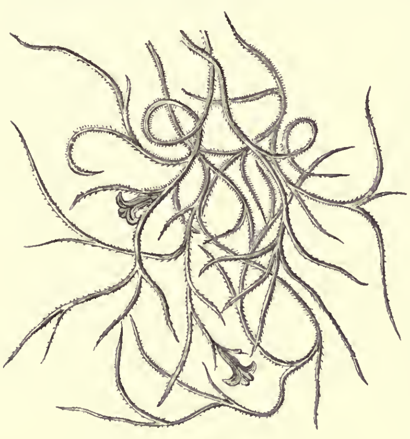
TIGNASSE (Fr.), n. Ten-ya^{3}s. See PLICA *polonica*.

TIGRETIER (Fr.), n. Teg-r'-te-a. A convulsive affection resembling chorea, observed in Abyssinia. [L, 41 (a, 14).]

TIGRIDIA (Lat.), n. f. Ti^{2}g-ri^{2}d′i^2-a^3. From *tigris*, a tiger. A genus of the *Iridaceæ*. [a, 35.]—**T. pavonia.** Sp., *flor de la maravilla* [Mex. Ph.]. The tiger-flower of central Mexico. The edible, starchy bulbs are reputed febrifuge. [A, 447 (a, 21).]

TIKMEHL (Ger.), n. Ti^{2}k′mal. See *Curcuma* ARROW-ROOT.

TIL (Hind.), n. Sans., *tila*. The *Sesamum orientale*. [a, 35.]—**T.-oil.** See *Oil of* SESAMUM.



TILGUNG (Ger.), n. Ti^{2}lg′un^2. See ABOLITIO and EXTIRPATION.

TILIA (Lat.), n. f. Ti^{2}l′i^2-a^3. Fr., *tilleul*. Ger., *Linde*. 1. A genus of trees (the limes or lindens), of the *Tiliaceæ*, which are an order of the *Malvales*. The *Tilieæ* are a tribe of the *Tiliaceæ*. [a, 35.] 2. See *Flores tiliæ*.—**Aqua tiliæ.** Fr., *eau distillée de tilleul*. Sp., *agua de flor de tilo*. A preparation made by distilling flores tiliæ with water or [Russ. Ph.] by diluting aqua tiliæ concentrata with seven times as much water. [B, 95 (a, 38).]—**Aqua tiliæ concentrata.** A preparation made by mixing 100 parts of aqua tiliæ with 2 of alcohol and distilling 10 parts [Ger. Ph. (1st ed.), Swiss Ph.]; or by distilling 12 parts of flores tiliæ and 2 of alcohol with water enough to make 15 parts [Russ. Ph.]. [B, 95 (a, 38).]—**Cortex tiliæ.** The bark of *T. silvestris*. [B, 95 (a, 38).]—**Flores tiliæ.** Fr., *tilleul*. Ger., *Lindenblüthen*. Sp., *tilo*. The flowers of *T. mollis* [Austr. Ph., Hung. Ph., Ger. Ph., Swiss Ph.], of this and *T. vulgaris* [Russ. Ph., Swed. Ph.] (*T. intermedia* [Dan. Ph.]), of *T. argentea* [Roum. Ph.], of *T. europæa* [Gr. Ph., Netherl. Ph.], of *T. silvestris* [Sp. Ph.], or of *T. silvestris* and *T. mollis* [Fr. Cod.]. [B, 95 (a, 38).]—**Hydrolatum tiliæ.** See *Aqua tiliæ*.—**T. alba.** 1. See *T. argentea*. 2. See *T. heterophylla*.—**T. americana.** Fr., *tilleul d'Amérique*. Ger., *kahle Linde*. American bass-wood (or linden, or white-wood). The flowers are used like those of *T. intermedia*. The inner bark is used for cataplasms. [a, 35.]—**T. argentea.** Ger., *silberweisse Linde*. Silver lime-tree of Hungary and southeastern Europe, identified by some authors with the φιλύρα of the ancients. The fragrant flowers are more mucilaginous than those of *T. intermedia*, and yield a valuable essential oil. [a, 35.]—**T. canadensis, T. caroliniana.** See *T. americana*.—**T. europæa.** The European lime-tree. *T. intermedia* is the common variety. *T. mollis* and *T. silvestris* are also considered by some authors as varieties of it. [a, 35.]—**T. heterophylla.** Fr., *tilleul blanc*. American white bass-wood. The flowers are used like those of *T. intermedia*. [a, 35.]—**T. intermedia.** Fr., *tilleul d'Europe* (ou *de Hollande*). Ger., *gemeine Linde*. Common European lime-tree, Russian bast-tree; a tree of Europe and northern Asia, by some authors considered a hybrid between *T. mollis* and *T. silvestris*. The flowers, *flores tiliæ* (*europææ*, seu *fœminæ*), are mildly stimulant, antispasmodic, and diaphoretic. A charcoal, *carbo tiliæ*, is prepared from the wood. The leaves and mucilaginous inner bark, *folia* et *cortex interior tiliæ*, were also formerly official. The sap of the tree yields sugar. The fruit contains a principle analogous to chocolate. [a, 35.]—**T. laxiflora.** Ger., *schlaffblüthige Linde*. A North American tree (by Wood considered a variety of *T. americana*), used like *T. intermedia*. [a, 35.]—**T. macrophylla.** See *T. heterophylla* and *T. intermedia*.—**T. mollis.** Ger., *weichhaarige* (oder *grossblättrige*) *Linde, Sommerlinde, Frühlinde, Wasserlinde, holländische Linde*. Broad-leaved lime-tree of southern and central Europe; according to some authors, a variety of *T. intermedia*. The flowers are used like those of *T. intermedia*. [a, 35.]—**T. silvestris.** Ger., *wilde* (oder *kleinblätt-*

rige) Linde, Steinlinde, Berglinde, Winterlinde. Small-leaved lime-tree of Europe; used like *T. intermedia*, but the flowers of some of the varieties are much less fragrant. [α, 35.]—**T. vulgaris.** See *T. intermedia.*

TILIACORA (Lat.), n. f. Ti^{2}l-i^2-a^{2}k(a^{3}k)'o^{2}r-a^3. Fr., *tiliacore.* A genus of the *Menispermaceæ.* [α, 35.]—**T. abnormalis, T. acuminata, T. cuspidiformis, T. fraternaria, T. racemosa.** An East Indian species used in elephantiasis and snake-bites. The leaves are used for ulcers and pustular eruptions. [α, 35.]

TILLANDSIA (Lat.), n. f. Ti^{2}l-la^{3}nds'i^2-a^3. From *Tillands*, a Swedish botanist. Fr., *tillandsie.* A genus of epiphytic or saxicolous plants of the *Tillandsieæ* (a division of the *Bromeliaceæ*). [α, 35.]—**T. recurva, T. recurvata.** Fr., *caragate recourbée.* A species found in the southern United States and tropical America, growing on old trees; used externally in hæmorrhoids. [α, 35.]—**T. usneoides.** Fr., *caragate musciforme, cheveux de roi, crin végétal.* Ger., *Greisenbart.* Sp., *heno.* Black (or Spanish, or long) moss of the southern United States, West Indies, Central America, Uruguay, etc.; used as an ointment in hæmorrhoids and as a surgical dressing. [α, 35.]

TILLANDSIA USNEOIDES. [A, 327.]

TILLETIA (Lat.), n. f. Ti^{2}l-le^{2}t'i^2-a^3. A genus of *Fungi*, of the *Ectoclini;* of Tulasne, a division (the *Tilletieæ*) of the *Ustilagineæ.* [α, 35.]—**T. caries.** A species infesting the grain of wheat, its spores constituting the disease known as bunt. [α, 35.]—**T. scarlatinosa.** A species the micrococcus form of which, according to Hallier, occurs in the blood in scarlet fever. ["Jahrb. f. Kinderheilk.," N. F., ii, p. 169 (1869); "Ctrlbl. f. Bact. u. Parasit.," i, 1887, p. 281 (B).]—**T. secalis.** A species growing on the grains of rye. [B, 108 (α, 14).]

TILLEUL (Fr.), n. Te-yu^{5}l. 1. See Tilia. 2. Of the Fr. Cod., see *Flores* tiliæ.—**Eau distillée de t.** See *Aqua* tiliæ.—**T. de Hollande, T. d'Europe.** See Tilia *intermedia.*—**Tisane de t.** Sp., *infusión de flor de tilo.* A preparation made by infusing 5 parts of flores tiliæ with 345 of boiling water [Sp. Ph.] (with 500 of boiling water for half an hour [Fr. Cod.]) and straining. [B, 95 (α, 38).]

TILLI, TILLY (Fr.), n. Tel-ye. See Tigli.

TILMA (Lat.), n. n. Ti^{2}l'ma^3. Gen., *til'matos* (*-atis*). Gr., τίλμα. See Lint (2d def.).

TILMOS (Lat.), **TILMUS** (Lat.), n's n. Ti^{2}l'mo^{2}s, -mu^{3}s(mu^{4}s). Gr., τιλμός. See Carphology.

TILTON (Lat.), n. n. Ti^{2}l'to^{2}n. Gr., τιλτόν. See Charpie.

TIL-TREE, n. Ti^{2}l'tre. See Tilia *europæa.*

TIMBÓ, n. The root-bark of *Paullinia pinnata.* [α, 35.]

TIMBONINE, n. Ti^{2}m'bo^{2}n-en. See under Paullinia *pinnata.*

TIMBRE (Fr.), n. Ta^{2}n^2-br'. Fr., *t.* Ger., *Klangfarbe.* The distinctive quality or character which belongs to a sound in virtue of its being produced by the voice or by a particular instrument; the clang-tint. [α, 48.]

TIME, n. Tim. Gr., χρόνος. Lat., *tempus.* Fr., *temps.* Ger., *Zeit.* Extent of duration. [α, 48.]—**Physiological t.** The t. elapsing between the impression received by an organ of sense and its perception by the individual affected. [K, 35.]—**Reaction t., Reflex t.** The t. occupied in the transfer of an impulse along a sensory nerve to the spinal cord and brain and back along a motor nerve. [K, 35.]

TIMIDUS (Lat.), n. m. Ti^{2}m'i^{2}d-u^{3}s(u^{4}s). From *timere*, to fear. An old term for the rectus oculi inferior muscle. [F.]

TIMOTHY, n. Ti^{2}m'o^{2}th-i^2. Fr., *thimothée.* See Phleum *pratense.*

TIN, n. Ti^{2}n. Gr., κασσίτερος. Lat., *stannum.* Fr., *étain.* Ger., *Zinn.* A metallic element known since the beginning of the Christian era, although confounded at that time with lead. It is found occasionally uncombined in nature, but usually occurs in the form of an oxide or other compound. It is a white, lustrous metal, emitting a peculiar crackling sound when bent, malleable at ordinary temperatures and ductile at 100° C., but becoming brittle when heated to 200° C., and also when cooled to —40° C. It melts at 235° C. It can be obtained in the crystalline form and as a micro-crystalline powder. T. forms a number of alloys with copper (see Bronze, *Gun* metal, *Speculum* metal, and *Bell* metal). It also forms an amalgam with mercury, which is used for plating mirrors. In composition t. acts partly as a bivalent radicle, forming *stannous* compounds, partly as a quadrivalent radicle, forming *stannic* compounds. Symbol, Sn (from stannum); atomic weight, 117·8; sp. gr., 7·293. [B, 3.]—**Acid of t.** An acid formed by the action of nitric acid on t.; probably metastannic acid. [B, 3, 80.]—**Basic t. chloride.** A substance, $2Sn(OH)Cl + H_2O$, precipitated from an aqueous solution of t. dichloride when the latter is exposed to the air or diluted with an excess of water. [B, 3.]—**Block t.** Ger., *Weissblech* (2d def.). 1. In metallurgy, the more impure of the varieties of t. obtained in refining the metal. [B, 7.] 2. As ordinarily used, a thin plate of iron coated with t. [B, 7.]—**Butter of t.** Lat., *butyrum stanni.* See under *T. tetrachloride.*—**False t'foil.** Lead coated with t. and rolled into thin sheets. [B, 5 (α, 38).]—**Grain t.** Fr., *étain en poudre* [Fr. Cod.]. Ger., *Körnerzinn.* T. heated until it becomes brittle and broken up into small fragments. [B, 3.]—**Granulated t.** T. obtained in the granular form by pouring the hot metal into water. [B.]—**Solution of chloride of t.** [Br. Ph.]. A preparation made by heating 2 parts of granulated t. with 2 of water and 7 of hydrochloric acid until no more gas is obtained, adding water enough to make 12 parts, and bottling with the undissolved t. [B, 81 (α, 38).]—**T. amalgam.** A silvery-white alloy of 3 parts of t. and 1 part of mercury; used to plate mirrors, for filling teeth, and as a vermifuge. [B, 3; D, 90.]—**T. and ammonium chloride.** See Ammonium *chlorostannate.*—**T. and ammonium fluoride.** See Ammonium *stannofluoride.*—**T. arsenate.** A compound of tin and arsenic acid. A *stannous arsenate* is known, also a *stannic arsenate*, $Sn_2As_2O_9$, forming a transparent, gelatinous mass. [B, 2.]—**T. arsenite.** A compound of tin and arsenious acid. Stannous and stannic arsenites are known. [B, 2.]—**T. bichloride.** T. tetrachloride; so called because it contains twice as much chlorine in proportion to the t. as the t. protochloride or stannous chloride.—**T. bromide.** See *T. dibromide* and *T. tetrabromide.*—**T. chloride.** See *T. dichloride, T. tetrachloride*, and *Basic t. chloride.*—**T. deutochloride.** See *T. bichloride.*—**T. dibromide.** Stannous bromide, $SnBr_2$; a grayish-white crystalline substance. It combines with the bromides of the alkaline metals to form double salts. [B, 3.]—**T. dichloride.** Stannous chloride; a transparent substance, of fat-like lustre, $SnCl_2$, also occurring in transparent prismatic crystals (*t.-salt*), of peculiar odor, $SnCl_2 + 2H_2O$. It is very soluble in water, but its solution is decomposed by dilution or by exposure to the air. It has a strong affinity for oxygen, and is thus a powerful reducing agent. The salt is used topically in medicine. T. dichloride combines with the chlorides of the alkaline metals to form double salts. [B, 3, 10.]—**T. diethyl.** See Standiethyl.—**T. difluoride.** Stannous fluoride, SnF_2. It combines with the fluorides of the alkaline metals to form double salts. [B, 3.]—**T. diiodide.** Stannous iodide, SnI_2. [B, 3.]—**T. dioxide.** Stannic oxide, SnO_2, occurring in nature as the mineral cassiterite or t'stone, and obtainable artificially either by the calcination of the metal (see Flores *Jovis*) or by treating t. with nitric acid. It forms an amorphous white or straw-colored powder, and is also crystallizable. [B, 3.]—**T. dipropyl.** See Standipropyl.—**T. disulphide.** Stannic sulphide, SnS_2; a substance forming tabular crystals or golden-colored scales (see *Mosaic* gold). It has been used in medicine and was formerly official in the Fr. Cod. [B.]—**T. ethide.** A compound of t. with ethyl. The t. ethides are: (1) *stannous ethide* or *standiethyl* (*q. v.*); (2) *stannoso-stannic ethide*, or *stantriethyl* (*q. v.*); and (3) *stannic ethide*, or *stantetrethyl*, $Sn(C_2H_5)_4$. [B, 3.]—**T. fluoride.** See *T. difluoride, T. tetrafluoride*, and Stannofluoride.—**T'foil.** Metallic t. spread out in a thin lamina. [B.]—**T. hydroxide.** A compound of hydroxyl and t. *Stannous hydroxide* (Fr., *hydrate stanneux;* Ger., *Zinnoxydulhydrat*), $2SnO + H_2O = H_2Sn_2O_3$, is a white precipitate deposited from a solution of t. dichloride by the addition of potassium carbonate. *Stannic hydroxide* (Fr., *hydrate stannique;* Ger., *Zinnoxydhydrat*), $SnO(OH)_2$, constitutes stannic and metastannic acids (*q. v.*). [B.]—**T. iodide.** See *T. diiodide* and *T. tetraiodide.*—**T. monosulphide.** Stannous sulphide, SnS; a substance obtainable either as an amorphous black powder, as lustrous crystalline scales, or as a lead-colored crystalline mass. [B, 3.]—**T. monoxide.** Stannous oxide, SnO; a substance obtained either as a black powder or as minute cubical crystals. [B, 3.]—**T. nitrate.** A compound of t. and nitric acid. *Stannous nitrate* (Fr., *azotate stanneux;* Ger., *salpetersaures Zinnoxydul*), $Sn(NO_3)_2$, is known only in the form of a yellow aqueous solution. *Stannic nitrate* (Fr., *azotate stannique;* Ger., *salpetersaures Zinnoxyd*) is a substance forming tabular crystals. [B, 3.]—**T. nitromuriate.** See *T. tetrachloride.*—**T. oxide.** See *T. monoxide* and *T. dioxide.*—**T. oxymuriate.** The commercial name of a hydrated t. tetrachloride, $SnCl_4 + 5H_2O$. [B, 3.]—**T. persulphide.** See *T. disulphide.*—**T. phosphate.** A compound of t. and phosphoric acid. Stannic phosphate is a substance obtained by the action of phosphoric acid on hydroxide of t. It is insoluble in nitric acid, and its formation is hence used as a means of separating phosphoric acid from other bodies. [B, 3.]—**T. phosphide.** A compound of t. and phosphorus. Several phosphides of t. are known: SnP, Sn_3P_2, and Sn_9P. The first is a very brittle silvery-white substance; the second is a silvery-white body, sufficiently soft to be cut with a knife; and the last is a crystalline mass, looking like cast-zinc, and used in the manufacture of phosphor-bronze. [B.]—**T. protochloride.** See *T. dichloride.*—**T. protoxide.** See *T. monoxide.*—**T. salt.** See under *T. dichloride.* It is used as a pigment.—**T'stone.** Native t. dioxide. [B.]—**T. sulphate.** A compound of t. and sulphuric acid. Stannous sulphate, $SnSO_4$, is a granular substance made up of microscopic crystals. *Stannic sulphate* is a white body, whose properties are not well known. [B, 3.]—**T. sulphide.** See *T. monosulphide* and *T. disulphide.*—**T. tetrabromide.** Stannic bromide, $SnBr_4$; a white fuming crystalline mass, dissolving readily in water. [B, 3.]—**T. tetrachloride.** Stannic chloride, fuming liquor of Libavius; a compound, $SnCl_4$, discovered by Libavius in 1605. It is a colorless, fuming, and very caustic liquid, boiling at 120° C. It dissolves sulphur, phosphorus, and iodine. Mixed with one third its weight of water, it forms a solid crystalline mass called *butter of t.* Com-

bined with water of crystallization, it forms a series of crystalline products, $SnCl_4 + 3H_2O$, $SnCl_4 + 5H_2O$, and $SnCl_4 + 8H_2O$. T. tetrachloride combines with a number of other chlorides to form double salts (sometimes called *chlorostannates*). It is used as a mordant in dyeing, and was formerly called "composition," "physic," or "dyer's spirits," and commercially was known as "nitromuriate" of t. The compound $SnCl_4 + 5H_2O$ is commercially designated the "oxymuriate" of t. T. tetrachloride was official in the Sardinian Ph. of 1853. [B, 3, 10.]—**T. tetrafluoride.** Stannic fluoride, SnF_4; known only in solution. It forms with the fluorides of other metals compounds called *stannofluorides*. [B, 3.]—**T. tetraiodide.** Stannic iodide, SnI_4. [B, 3.]—**T. tetramethyl.** A liquid, $Sn(CH_3)_4$, of ethereal odor. [B, 3.]—**T. tetrethyl.** Stannic ethide (see under *T. ethide*). [B.]—**T. tree.** See ARBOR *Jovis*.—**T. triethyl.** See STANTRIETHYL.

TINAGMUS (Lat.), n. m. Ti^{2}n-a^{2}g(a^{3}g)'mu^{3}s(mu^{4}s). Gr., τιναγμός. 1. See CONCUSSION. 2. Rectal tenesmus. [E.]

TINCA (Lat.), n. f. Ti^{2}n'ka^3. A genus of fresh-water fishes, of the *Cyprinidæ*; the tenches. [α, 48.] Cf. OS *tincæ*.

TINCAL, n. Ti^{2}n^2'k'l. Lat., *tincalum*. Crude borax. [α, 35.]

TINCTORIAL, adj. Ti^{2}n^{2}kt-or'i^2-a^{2}l. Lat., *tinctorius* (from *tingere*, to dye). Used for dyeing. [α, 35.]

TINCTUR (Ger.), n. Ti^{2}n^{2}kt-ur'. See TINCTURE.—**Saure aromatische T.** See MIXTURA *sulfurica acida*.

TINCTURA (Lat.), n. f. Ti^{2}n^{2}kt(ten^{2}kt)-u^{2}r(ur)'a^3. See TINCTURE and DYE.—**T. acida aromatica.** See MIXTURA *sulfurica acida*.—**T. ætherea.** 1. Impure ether mixed with alcohol. [B, 97.] 2. See *Ethereal* TINCTURE.—**T. ætherea camphorata.** See *Solutio* CAMPHORÆ *ætherea*.—**T. alexipharmaca Huxhami.** See *Tinctura* CINCHONÆ *composita*.—**T. alkalica acris.** See under *T.* ANTIMONII *aurata*.—**T. aloetica alcalina.** See ELIXIR *proprietatis Paracelsi sine acido*.—**T. amara.** 1. Of the Ger. Ph., Austr. Ph., Dan. Ph., Hung. Ph. (2d ed.), Norw. Ph., Russ. Ph., a tincture consisting of 60 parts each of gentian-root and the herb of lesser centaury, 40 of bitter-orange peel, and 20 each of unripe oranges and rhizome of zedoary, macerated with 1,000 of dilute alcohol for a week [Ger. Ph.]. The Austr. and Hung. Ph's order with the gentian-root and lesser centaury 60 parts each of bitter-orange peel and the leaves of *Menyanthes trifoliata*, and 30 of sodium carbonate crystals [Austr. Ph.] (18 of dried sodium carbonate [Hung. Ph.]), to be digested in 3,000 of alcoholic water of cinnamon for 3 days (6 [Hung. Ph.]). The Russ. Ph. orders with the gentian-root and lesser centaury 60 parts of unripe oranges and 30 of zedoary, with maceration in 1,050 of 70-per-cent. alcohol for five days. The Dan. and Norw. Ph's omit the lesser centaury and direct the use of 60 parts each of blessed thistle and unripe oranges, with 15 of anise and 240 of wormwood, digesting for three days in 2,175 of dilute alcohol [Dan. Ph.] (with 20 of anise and 200 of wormwood, digesting in 2,000 of dilute alcohol for half an hour and boiling [Norw. Ph.]). [B, 95 (α, 38).] See also *T.* GENTIANÆ *composita*, *T.* ABSINTHII *composita*, and *Teinture d'*ABSINTHE *composée*. 2. See *Elixir* AURANTIORUM *compositum*.—**T. amara ex Baumé.** See GUTTÆ *amaræ Baumé*.—**T. ammoniata aromatica.** See *Spiritus* AMMONIÆ *aromaticus*.—**T. antifebrilis Warburgi.** See *Warburg's* TINCTURE.—**T. antihysterica** [Norw. Ph.]. A tincture made by mixing 20 parts of tincture of asafœtida with 2 each of tincture of castor and spiritus æthereus camphoratus. [B, 95 (α, 38).]—**T. antiphthisica.** A solution of lead acetate and iron sulphate described in the Augsburg Ph., used in the treatment of phthisis, hæmoptysis, and dysentery. [B, 70.]—**T. antiscorbutica** [Fr. Cod.]. See *Teinture de* RAIFORT *composée*.—**T. aromatica.** Fr., *alcoolé de cannelle et de cardamom composé*. A tincture made with 25 parts each of cloves, galangal, cardamom, and ginger (50 of ginger [Ger. Ph.]), 100 (125 [Ger. Ph.]) of cinnamon, and 1,000 (1,250 [Ger. Ph.], 1,200 [Gr. Ph.]) of dilute alcohol (1,200 of 70-per-cent. alcohol [Russ. Ph.], 1,190½ of 80-per-cent. alcohol [Belg. Ph.]). [B, 95 (α, 38).]—**T. aromatica acida.** See MIXTURA *sulfurica acida*.—**T. aurea nervino-tonica** (seu **tonico-nervina**). See *Tinctura* FERRI *chlorati ætherea*.—**T. balsamica.** See *T.* BENZOINI *composita* and *T. tolutana*.—**T. balsamica aromatica.** See MIXTURA *oleoso-balsamica*.—**T. bezoardica.** See MIXTURA *pyrotartarica*.—**T. Bonvicini.** See *T.* GENTIANÆ *composita*.—**T. burgundica.** A preparation made by macerating for two days 22 parts of cinchona, 4 each of sweet flag and cinnamon, 7 of orange-peel, and 2 of cochineal in 900 of Portuguese white wine. [B, 119 (α, 38).]—**T. colombo** [Russ. Ph.]. See *Tinctura* CALUMBÆ.—**T. composita Whytii** [Netherl. Ph.]. A tincture closely resembling the t. chinæ composita of the Ger. Ph., but without the cinnamon (see *T.* CINCHONÆ *composita*). [B, 95 (α, 38).]—**T. Dahlbergii.** A mixture of 2 parts of star-anise with 16 of colocynth and 192 of alcohol, or with 12 of colocynth and 160 of alcohol, or with 24 of colocynth and 320 of brandy; filtered after three days. [B, 119 (α, 38).]—**T. Darelii.** Fr., *vin de rhubarbe et d'aunée*. A tincture made with 60 parts of rhubarb and 720 of Malaga or Spanish wine, with 7 of cardamom, 90 of sugar, and either 15 each of orange-peel and extract of elecampane or 15 each of lemon-peel, licorice, and extract of elecampane with 30 of Corinthian raisins; or with 20 each of cardamom and extract of elecampane, 160 of sugar, 120 of raisins, 2½ of mace, and 5½ of potassium carbonate. [B, 119 (α, 38).] See also *Vinum* RHEI.—**T. diatrion.** See MIXTURA *pyrotartarica*.—**T. digestiva** [Norw. Ph.]. A preparation made by mixing equal parts of spiritus æthereus camphoratus, compound tincture of rhubarb, and a 20-per-cent. solution of potassium carbonate. [B, 95 (α, 38).]—**T. febrifuga acida.** See MIXTURA *pyrotartarica*.—**T. gingivalis.** See *T.* CATECHU *composita* (2d def.).—**T. hieræ.** See *Vinum* ALOES.—**T. Huxhami** [Belg. Ph.]. A tincture made with 100 parts of pale cinchona-bark, 75 of bitter-orange peel, 4 of cochineal, 8 of saffron, and 20 of Virginia snake-root, macerated for six days in 1,000 of 60-per-cent. alcohol. [B, 95 (α, 38).] See also *T.* CINCHONÆ *composita*.—**T. japonica.** See *Tinctura* CATECHU *composita* (2d def.).—**T. kalina.** A tincture made by treating fused caustic potash for two days with 6 times as much alcohol of the sp. gr. of 0·840 [Gr. Ph.], or by dissolving the potash in 10 times as much 95-per-cent. alcohol [Russ. Ph.], and separating the liquid from the residue. [B, 95 (α, 38).]—**T. laxativa.** See *Teinture d'*ALOÈS *et de réglisse*.—**Tincturæ narcoticæ pharmacopœiæ gallicæ** [Swiss Ph.]. Tinctures made by treating 1 part of some freshly dried and powdered narcotic herb by displacement with dilute alcohol enough to make 5 parts. [B, 95 (α, 38).]—**Tincturæ narcoticæ pharmacopœiæ germanicæ** [Swiss Ph.]. Tinctures made by crushing 5 parts of some fresh narcotic herb in a stone mortar and macerating with 6 of alcohol. [B, 95 (α, 38).]—**T. nervina Bestuscheffii.** See *Tinctura* FERRI *chlorati ætherea*.—**T. odontalgica** [Norw. Ph.]. A preparation consisting of 46 parts each of acetic ether and chloroform, 2 of oil of cassia, 34 of oil of cloves, and 72 of strong alcohol. [B, 95 (α, 38).]—**T. odontalgica Botot** [Swiss Ph.]. A preparation made by pouring 1,000 parts of alcohol and 500 of rose-water over a mixture of 10 parts each of cloves, cinnamon, and star-anise and 5 of peppermint-oil, adding 5 each of purified cream of tartar and cochineal rubbed up with water, allowing to stand eight days with frequent shaking up, and filtering. [B, 95 (α, 38).]—**T. purgans.** See *T.* JALAPÆ *composita*.—**T. pyrotartarica.** See MIXTURA *pyrotartarica*.—**T. sacra.** See *Vinum* ALOES and *Tinctura* RHEI *et aloes*.—**T. stomachica.** See *Elixir* AURANTIORUM *compositum*.—**T. thebaica.** See *Tinctura* OPII.—**T. thebaica benzoica.** See *T.* OPII *camphorata*.—**T. tolutana.** Fr., *teinture de baume de Tolu*. Sp., *tintura alcohólica de bálsamo de Tolú*. A tincture made by dissolving balsam of Tolu in nine times as much alcohol [U. S. Ph.], or by macerating 2½ oz. of balsam of Tolu in 15 fl. oz. of alcohol [Br. Ph.], or by macerating (digesting [Dan. Ph.]) the balsam with 5 times as much strong (80-per-cent. [Fr. Cod.], 90-per-cent. [Sp. Ph.]) alcohol for 3 days [Dan. Ph.] (5 [Swed. Ph.], 8 [Sp. Ph.], 10 [Fr. Cod.]). [B, 95, 119 (α, 38).]—**T. tonica martialis lutea.** See *Tinctura* MARTIS *adstringens*.—**T. tonico-nervina Bestuscheffii.** See *T.* FERRI *chlorati ætherea*.—**T. vulneraria rubra** [Swiss Ph.]. 1. A preparation made by digesting 2 parts each of chamomile flowers, lavender flowers, fennel seeds, wormwood, melissa, crisped mint, rosemary, rue, *Thymus serpyllum*, and red sandal-wood with 50 each of strong alcohol and water for 8 days, expressing, and filtering. [B, 95 (α, 38).] 2. Of the Fr. Cod., see ALCOOLATURE *vulnéraire*.—**T. Whyttii** [Belg. Ph.]. A tincture closely resembling the t. chinæ composita of the Ger. Ph. (see *T.* CINCHONÆ *composita*). [B, 95 (α, 38).]

TINCTURE, n. Ti^{2}n^{2}kt'u^{2}r. Lat., *tinctura* (from *tingere*, to wet), *aer* [Paracelsus]. Fr., *teinture*, *t.* Ger., *Tinctur*, *Tinktur*. A pharmaceutical preparation made by dissolving a drug in alcohol, especially by subjecting vegetable substances to the action of alcohol.—**Ammoniated t.** A solution of a medicinal substance in spirit of ammonia. [B.]—**Antiperiodic t.** See *Warburg's t.*—**Cordial solar t.** See under *Tinctura* AURI.—**Ethereal t.** A t. in the preparation of which an appreciable quantity of ether is used. [B, 95 (α, 38).]—**Huxham's t.** See *Tinctura* CINCHONÆ *composita*.—**Stomachic t.** See ESSENTIA *stomachica polychresta Gundelsheimeri* and *Elixir* AURANTIORUM *compositum*.—**Theriacal t.** See ESSENTIA *theriacalis*.—**Warburg's t.** A preparation made by digesting 1 lb. of Socotrine aloes, 4 oz. each of rhubarb, angelica fruit, and confection of Damocrates, 2 each of elecampane, saffron, fennel, and prepared chalk, 1 oz. each of gentian, zedoary, cubebs, myrrh, camphor, and agaric, and 500 oz. of proof spirit for twelve hours, expressing, adding 10 oz. of quinine sulphate, and filtering when this is dissolved by aid of the water bath and the mixture cooled; used in obstinate cases of malarial poisoning. [B, 5 (α, 38).]

TINDER, n. Ti^{2}nd'u^{5}r. See AMADOU.

TINEA (Lat.), n. f. Ti^{2}n'e^2-a^3. Fr., *teigne*. Ger., *Schorf*, *Grind*. A word used by the translators of Arabian writings as the equivalent of *al tin*, *al thin*, and *althin*, to designate various eruptions of the hairy scalp. It has been applied to many chronic, pustular, contagious skin diseases, but is now generally restricted to those depending on the presence of a vegetable parasite, and especially to those that affect the scalp. [G.]—**T. amiantacea.** See SEBORRHŒA *sicca*.—**T. asbestina.** Seborrhœa capillitii in which the crusts resemble asbestos. [G.]—**T. axillaris.** T. affecting the axilla.—**T. barbæ.** See SYCOSIS *parasitaria*.—**T. benigna.** See SCABIES *capitis simplex*.—**T. capitis.** See PITYRIASIS *capitis*.—**T. ciliaris.** See LIPPITUDO.—**T. circinata.** See MYCOSIS *trichophytina* and DERMATOMYCOSIS *maculo-vesiculosa*.—**T. circinata tropica.** See *T. imbricata*.—**T. crustacea.** Porrigo larvalis. [G.]—**T. corporis.** See DERMATOMYCOSIS *maculo-vesiculosa*.—**T. decalvans.** See ALOPECIA *area*.—**T. favina, T. favosa.** See FAVUS.—**T. furfuracea.** See SEBORRHŒA *sicca*.—**T. granulata.** See ACHOR *granulatus*.—**T. imbricata** [Manson]. Chinese ringworm; a cutaneous disease occurring about the Straits of Malacca and the islands of the Malayan Archipelago, characterized by desquamation of the cuticle in the form of concentric flakes which present free edges toward the centre of the patch, while toward the circumference they are firmly attached. The disease is regarded by most authorities as a form of ringworm. ["Med. Rep. of the Imp. Chinese Maritime Customs," 1879 (G).] Cf. *Tokelau* RINGWORM.—**T. kerion.** See KERION.—**T. lactea.** See CRUSTA *lactea*.—**T. lupina, T. lupinosa.** See PORRIGO *lupinosa*.—**T. muciflua** [Alibert]. See ACHOR.—**T. mucosa.** See TEIGNE *muqueuse*.—**T. neonatorum.** See SEBORRHŒA.—**T. nodosa.** See TRICHORRHEXIS *nodosa*.—**T. porriginosa.** See PITYRIASIS *capitis*.—**T. polonica.** See PLICA *polonica*.—**T. sycosis.** See SYCOSIS *parasitaria*.—**T. tondens, T. tonsurans.** See TRICHOMYCOSIS *circinata*.—**T. trichophytina.** See TRICHOPHYTOSIS.—**T. trichophytina barbæ.** See SYCOSIS *parasitaria*.—**T. trichophytina capitis.** See TRICHOMYCOSIS *circinata*.—**T. trichophytina corporis.** See DERMATOMYCOSIS *maculo-vesiculosa*.—**T. trichophytina cruris.** See ECZEMA *marginatum*.—**T. trichophytina sycosis.** See SYCOSIS *parasitaria*.—**T. trichophytina tonsurans.** See TRICHOMYCOSIS *circinata*.—**T. trichophytina unguium.** See ONYCHOMYCOSIS.—

T. vera. See FAVUS.—**T. versicolor.** See DERMATOMYCOSIS *furfuracea.*

TINEARIA (Lat.), n. f. Ti^{2}n-e^2-a(a^3)′ri^2-a^3. From *tinea*, a moth. The *Helichrysum arenarium.* [α, 35.]

TINESMUS (Lat.), n. m. Ti^{2}n(ten)-e^{2}z(e^{2}s)′mu^{3}s(mu^{4}s). See TENESMUS.

TINGUARRA (Lat.), n. f. Ti^{2}n^2-gwa^{3}r′ra^3. A genus of umbelliferous herbs. [α, 35.]—**T. cervariæfolia, T. montana.** Two species found in the Canary Islands; the second is closely related to *T. sicula.* [α, 35.]—**T. sicula.** A species indigenous to Mediterranean regions. The root is edible and celery-like. [α, 35.]

TINKAL, TINKAR, n's. Ti^{2}n^2′k′l, -ka^{3}r. See TINCAL.

TINKLING, n. Ti^{2}n^{2}k′li^{2}n^2. Fr., *tintement, cliquetis.* Ger., *Klingen.* A sharp, clear sound like that produced by one piece of metal striking lightly against another. [α, 34.]—**Auriculo-metallic t.** A t. heard over the cardiac apex, produced by a jarring of the chest-wall that is set in vibration by the impulse. [L, 20 (α, 34).]—**Metallic t.** A t. pulmonary sound produced in a large cavity having solid walls. [α, 34.]

TINKTUR (Ger.), n. Ti^{2}n^{2}kt-ur′. See TINCTURE.

TINNITUS (Lat.), n. m. Ti^{2}n-nit(net)′u^{3}s(u^{4}s). Gen., *-it′us.* From *tinnire*, to ring. Fr., *tintement.* Ger., *Gebräuse.* A ringing or tinkling sound. [A, 312 (α, 17).]—**Nervous t.** Fr., *tintement* (ou *bourdonnement*) *nerveux.* Ger., *nervöses Ohrensausen* (oder *Ohrenbrausen*). A true neurosis, characterized by the subjective sensation of a humming or buzzing sound, varying considerably in character, and occurring mostly in excitable, nervous persons, during mental strain, or in states of exhaustion, anæmia, or shock. It is also known as *t. without deafness*, and proves obstinate to every kind of treatment. [F, 3.]—**T. aurium.** Fr., *tintement* (ou *bourdonnement*) *d′oreille.* Ger., *Gellen der Ohren, Ohrensausen, Ohrensummen, Ohrenbrausen.* A subjective sound, varying in character, duration, and intensity, heard by patients suffering from various forms of ear disease, and also following the administration of large doses of certain drugs, notably quinine. It also occurs in certain febrile disorders and in marked anæmia. [F.]

TINOSPORA (Lat.), n. f. Ti(te)-no^{2}sp′o^{2}r-a^3. From *tinus*, the laurustinus, and σπορά, a seed. A genus of the *Tinosporeæ*, which are a tribe of the *Menispermaceæ.* [α, 35.]—**T. bakis.** See COCCULUS *bakis.*—**T. cordifolia.** A shrub growing in tropical India. Its stem, together with portions of the root, *caulis* et *radix tinosporæ*, is official in the Ph. of India. For the medicinal properties, see COCCULUS *cordifolius.* [α, 35.]—**T. crispa.** An East Indian species allied to *T. cordifolia* and possessing the same bitterness and probably the same tonic properties. [α, 35.] See also COCCULUS *crispus.*—**T. malabarica.** See COCCULUS *malabaricus.*

TINTE (Ger.), n. Ti^{2}nt′e^2. See INK.

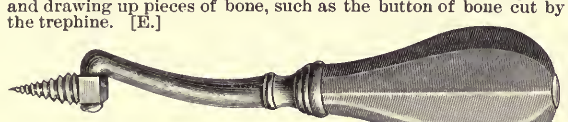
TINTEMENT (Fr.), n. Ta^{2}n^2-t′-ma^{3}n^2. See TINNITUS and TINKLING.—**T. des oreilles.** See TINNITUS *aurium.*

TINTENFISCH (Ger.), n. Ti^{2}nt′e^{2}n-fi^{2}sh. See SEPIA (1st def.).—**T′bein.** See *Os* SEPIÆ.

TIQUE (Fr.), n. Tek. See IXODES *ricinus.*

TIQUETÉ (Fr.), adj. Te-k′-ta. Marked with small spots. [L, 41 (α, 14).]

TIRAGE (Fr.), n. Ter-a^{3}zh. The movement of forced or spasmodic inspiration observed in dyspnœa. [L, 49 (α, 14).]



TIRAILLEMENT (Fr.), n. Ter-a^3-el-y′-ma^{3}n^2. A dragging sensation.

TIRAILLEUR (Fr.), n. Ter-a^3 el-yu^{5}r. See BRACHINUS *crepitans.*

TIRE-BALLE (Fr.), n. Ter-ba^{3}l. See *Bullet* FORCEPS.

TIRE-DENT (Fr.), n. Ter-da^{3}n^2. See *Dental* FORCEPS.

TIRE-FOND (Fr.), n. Ter-fo^{2}n^2. A gimlet for screwing into and drawing up pieces of bone, such as the button of bone cut by the trephine. [E.]

THE TIRE-FOND.

TIRE-RACINE (Fr.), n. Ter-ra^3-sen. A forceps for removing the roots of teeth. [L, 41 (α, 14).]

TIRE-TÊTE (Fr.), n. Ter-te^{2}t. A term applied to a number of contrivances for making traction on the fœtal head in artificial delivery. It seems to have been first employed by Mauriceau to designate a complicated instrument of his invention, consisting essentially of a disc of metal hinged at its centre to the end of a shaft. The disc being turned so that its plane was coincident with the shaft, it was plunged into the head, and a like disc, attached to a cannula, was then screwed down upon the exterior of the cranium, the bony wall of which, on either side of the wound, was thus held between the two discs. Traction was then made with the shaft. [A, 44.]—**T.-t. à bascule.** An instrument devised by Levret for extracting the head of the fœtus after its separation from the trunk.

TIRETOIRE (Fr.), n. Ter-twa^{3}r. A dental forceps for removing the lower incisors. [L, 41 (α, 14).]

TISANE (Fr.), n. Te-za^{3}n. See PTISAN. Of the Fr. Cod., an infusion or decoction to be used as a regular drink by a sick person, prepared for immediate use by dissolving the medicinal substance or substances in water (or sometimes boiling or macerating and boiling in water) and sweetening if necessary with a medicinal syrup or with sugar, honey, or licorice. [B, 95 (α, 38).]—**T. astringente.** See LIMONADE *sulfurique.*—**T. carminative.** A preparation made by boiling gently 29 parts each of juniper, anise, and sal ammoniac, 57 of chamomile, and 780 of water, straining, and adding 345 of brandy. [B, 119 (α, 38).]—**T. de Feltz** [Fr. Cod.]. See DECOCTUM *Feltz.*—**T. de Pollini.** See *Decoctum* JUGLANDIS.—**T. impériale.** See AQUA *imperialis.*—**T. pectorale** [Fr. Cod., 1837]. Syn.: *hydromel composé.* A preparation made by infusing 8 parts of elecampane rhizome and 3 of licorice-root in 256 of boiling water. [B, 119.] Cf. *T. d′*AUNÉE.—**T. royale.** See APOZÈME *laxatif.*—**T. sudorifique.** See *Decoctum* GUAIACI *compositum* and *Decoctum* SARSAPARILLÆ *compositum.*

TISCH (Ger.), n. Ti^{2}sh. See TABLE (1st def.).—**Krankent′.** See *Bed*-TABLE.—**Leichent′, Sectionst′.** A table for post-mortem examinations.

TISSU (Fr.), n. Te-su^6. See TISSUE.—**T. albuginé.** 1. Fibrous tissue. [J.] 2. In the pl., *t′s albuginés*, the aponeuroses.—**T. allantoïdien, T. annexiel.** The tissue intervening between the allantois and the chorion in a placental cotyledon. [A, 15.]—**T. blanc.** Fibrous tissue. [J.]—**T. chondroïde** [Broca]. A variety of connective tissue closely resembling epiphyseal cartilage, immediately beneath which it is found. [L.]—**T. chondrigène.** See CARTILAGE.—**T. coalescent.** See *Areolar* TISSUE and *Fibrous* TISSUE.—**T. colloïde.** See *Mucous* TISSUE.—**T. conjonctif.** See *Connective* TISSUE.—**T. conjonctif adipeux.** See *Adipose* TISSUE.—**T. conjonctif élastique.** See *Elastic* TISSUE.—**T. conjonctif embryonnaire.** See *Mucous* TISSUE.—**T. conjonctif interstitiel.** See *T. allantoïdien.*—**T. conjonctif intrafasciculaire.** See ENDONEURIUM.—**T. conjonctif lâche.** See *Areolar* TISSUE.—**T. conjonctif tendineux et ligamenteux.** See *White fibrous* TISSUE.—**T. corné.** See *Corneous* TISSUE.—**T. cribleux.** See *Areolar* TISSUE and *Fibrous* TISSUE and cf. *Cribrose* TISSUE.—**T. dentinaire.** See DENTIN.—**T. fongueux.** Fungous granulation tissue. [α, 34.]—**T. inter-annexiel.** See *T. muqueux inter-annexiel.*—**T. kératinien.** See *Corneous* TISSUE.—**T. lacunaire.** A connective tissue that is reticulated. [α, 34.]—**T. muco-dermeux.** The corium of a mucous membrane. [J, 33.]—**T. muqueux.** 1. Mucoid connective tissue. 2. The tissue of a mucous membrane. [J, 33.]—**T. muqueux inter-annexiel.** Of Dastre, the tissue interposed between the allantois, the amnion, and the chorion, together with the mucoid tissue of the umbilical cord, the two being continuous. [A, 15.]—**T. musculo-élastique.** A tissue consisting of muscular and elastic elements. [L.]—**T. périfasciculaire.** See EPINEURIUM.—**T. pigmentaire.** Pigment-cells. [J.]—**T. réticulé des os.** See *Cancellous* TISSUE.—**T. scléreux.** Embryonic tissue which develops into fibrous, cartilaginous, or osseous tissue. [J, 33.]—**T. unissant.** See *Connective* TISSUE and *Areolar* TISSUE.—**T. unitif.** See *Connective* TISSUE.

TISSUE, n. Ti^{2}sh′u^2. Gr., ἱστός. Lat., *textus, textura, tela.* Fr., *tissu.* Ger., *Gewebe.* A collection of cells or structural elements so modified in form, size, and arrangement as to have a constant and recognizable structure, wherever it may occur (being modified in different situations only so far as local connections and uses render necessary), and to be adapted to the performance of a special and definite function. All of one kind of t. in the body forms a system, such as the nervous or the muscular system, while the t′s combined form organs. While the general idea of what constitutes a t. is quite definite, it has not been possible up to the present time to give a universally satisfactory classification of them. Two systems are used, the oldest and most common being based upon the appearance in the adult, and the other upon the origin from the different germ layers of the ovum. According to the first method, one of the most satisfactory classifications is the division into four groups—epithelium, connective t., muscular t., and nervous t.; according to the second, t′s are ectodermic, entodermic, or mesodermic. [J, 12, 21, 30, 31.]—**Adenoid t.** Of His, the reticular framework of the lymphatic glands, alimentary mucosa, etc., the meshes of the reticulum being filled with lymphoid cells. This framework is described by many authors as made up of anastomosing branched cells, which mostly retain their nuclei; by others as composed of connective-t. fibres united into a network, the appearance of nuclei being given by the presence of endothelial cells. Adenoid t. may occur with indefinite boundaries, as in the mucosa of the alimentary canal. It is then sometimes called diffuse adenoid t. In other situations, as in the spleen, pleura, and omentum, it may form cords, cylinders, or patches. In the tonsils, the spleen, and the alimentary mucosa it often occurs in well-defined masses, the lymph-follicles. [J, 21, 24, 30, 31, 32, 42.]—**Adipose t.** 1. Areolar t. in which the areolæ are more or less filled with fat-cells, a condition which may occur in any part of the body except the eyelids and parts of the male sexual apparatus. This accumulation of fat-cells is usually abundant in well-fed individuals, especially in the subcutaneous areolar t., which is then often called the *panniculus adiposus* (*q. v.*). Adipose t. is abundantly supplied with blood-vessels and lymphatics, but has no nerves. 2. The fat-cells exclusive of the areolar t. in which they are found. [J, 21, 30, 31, 33, 35, 42.]—**Alveolar t.** The t. forming the framework of the pulmonary alveoli. It consists of areolar t. in which the elastic fibres are numerous, and there are also a considerable number of muscular fibre-cells. [J, 35.]—**Amorphous connective t.** [Henle]. See *Areolar t.*—**Animal t.** The t. of an animal in contradistinction to that of a plant. [J.]—**Aqueous t.** Water (or water-storing) t.; t., such as that of most succulent plants, containing parenchyma cells stored with sap and more or less mucilage. [α, 35.]—**Areolar t., Areolated connective t.** That part of the connective t. of the body in which white and yellow connective-t. fibres and bundles cross at all angles and continually unite to form larger bundles or divide to form smaller ones, thus making a kind of network. Except in the immature condition, the ground-substance has partly disappeared, leaving irregular cleft-like spaces, the so-called cells or areolæ, which are often filled with fat-cells. Areolar

t. in its most typical form is found just beneath the skin. It is also found beneath serous and mucous membranes, between muscles and blood-vessels, and connecting the various layers forming hollow viscera and the lobes and lobules of glands. [J, 21, 30, 32.] Cf. *Connective t.*—**Basement-t. (of nerves).** See NEUROGLIA.—**Basis t.** See STROMA.—**Bone t.** See *Osseous t.*—**Botryoidal t.** A dark-brown t. consisting of hollow tubes composed of cells containing fine brown pigment. It is found in the leech, and has been shown by Leydig and Lankester to belong to the vascular system. ["Quart. Jour. of Micr. Sci.," 1880, p. 307 (J).]—**Boundary t.** Epidermal t. [a, 35.]—**Cancellous t.** Fr., *tissu réticulé des os.* The porous, spongy t. of the bones.—**Cartilaginous t.** See CARTILAGE.—**Cavernous t.** Ger., *Schwellnetz.* Fibrous and elastic t. containing in the areolæ a freely communicating plexus of veins or venous sinuses, all included in an elastic envelope and capable of great increase in bulk when the veins are distended with blood. [L.]—**Cellular t.** 1. Areolar t. 2. A t. composed of cells, such as epithelium. [J, 36, 37.]—**Compact osseous t.** See *Compact osseous* SUBSTANCE.—**Complex t's, Composite t's, Compound t's.** T's composed of two or more simple t's in nearly equal proportions, as in blood-vessels, lymph-vessels, lymphatic glands, etc. [J, 30.]—**Conducting t., Conductive t.** Fr., *tissu conducteur.* 1. Any t., such as laticiferous t., serving to convey fluids from one part of a plant to another. 2. A special name for the cellular t. through which the pollen tube descends into the cavity of the ovary.—**Conjunctive t., Connective t.** Lat., *tela connectiva* (seu *fulcralis*, seu *maltharis*). Ger., *Bindegewebe, Bindesubstanz, Füllgewebe, Stützgewebe.* Syn.: *skeletal t., sustentacular t.* T. serving for the support or connection of other t's. It consists of soft masses, as in areolar t., in tendons, and in ligaments, or of more or less hard and rigid masses, as in cartilage, bone, and dentin. All these forms agree (1) in being derived from the mesoderm, (2) in gradually merging into one another in the adult, (3) in taking one another's place in the course of development, (4) in forming homologous parts in different animals, and (5) in yielding gelatin or a gelatinous substance when boiled. There are also always present a considerable number of protoplasmic cells. The term connective t. is sometimes limited to the soft connective substances in the body, excluding bone and cartilage. It has then been aptly termed the soft skeleton, for every part is supported and connected by its fibres. In the soft connective substances the fibres and connective-t. corpuscles are imbedded in a homogeneous jelly-like ground-substance which stains brown like cell-cement when treated with silver nitrate. [J.] See *White* FIBRES *of connective t., Areolar t., White fibrous t., Elastic t., Osseous t.,* and CARTILAGE.—**Constituent areolar t.** Syn.: *penetrating t., parenchymal t.* Areolar t. which binds together the lobes and lobules of glands, etc., and accompanies the vessels and nerves into those organs, giving them support and protection. [J, 30.]—**Corneous t.** Compact masses of cells which are soft near their vascular bases, but near their free surface hard, flat, and often devoid of a nucleus; found in the hair, nails, hoofs, horns, and epidermis. [J, 24, 33.]—**Cribrose t.** See *Sieve t.*—**Cytogenous t.** See *Adenoid t.*—**Dental t., Dentinal t.** See DENTIN.—**Elastic t.** That part of the connective t. of the body consisting of branched and anastomosing elastic fibres or of elastic membranes. It is unaffected by acetic acid and caustic potash, and is present in parts which are liable to sudden variations in size (*e. g.*, the arteries and lungs). The ligamentum nuchæ of the ox and the ligamenta subflava of man are composed almost entirely of elastic t. [J, 30, 31, 142.]—**Elementary t's.** See *Simple t's.*—**Embryonal connective t.** See *Mucoid connective t.*—**Embryoplastic t.** Fr., *tissu embryoplastique.* Embryonic connective t. before the fibres are developed. [J, 27, 33.]—**Endothelial t.** The t. formed by the endothelia of the body. [J.]—**Epidermic t.** Of Kölliker, the epidermis and its appendages, with the epithelium of mucous membranes. [J, 24.]—**Epithelial t.** The t. formed by the epithelia of the body. [J.]—**Erectile t.** See *Cavernous t.*—**Fat-t., Fatty t.** See *Adipose t.*—**Fibrillar connective t.** See *White fibrous t.*—**Fibrillated t.** See *Fibrous t.*—**Fibro-cartilaginous t.** See FIBRO-CARTILAGE.—**Fibrous cellular t., Fibrous connective t.** See *White fibrous t.*—**Fibrous t.** Ger., *fibröses Gewebe.* 1. Connective t. composed of elastic or white fibres and bundles of fibres which extend in nearly parallel directions, as in tendons and the ligamentum nuchæ. 2. Connective t. composed of fibres without regard to their nature or direction. [J, 30, 43.] 3. In botany, elongated, thick-walled and taper-pointed cells found in the fibro-vascular bundles, including bast-cells, wood-cells, and tracheids. [a, 24.]—**Follicular t.** See *Adenoid t.*—**Formative t.** Ger., *Bildungsgewebe.* A collection of cells which give rise, by becoming more or less modified, to a permanent or adult t. [J.]—**Formed connective t.** See *Solid connective t.*—**Formless connective t.** See *Areolar t.*—**Fundamental t.** One of the t's forming a fundamental system (*q. v.*). [a, 35.]—**Gelatinous (connective) t.** See *Mucoid connective t.*—**Gelatinous nervous t.** Nervous t. composed of non-medullated nerve-fibres, as in the sympathetic nerve. [J, 43.]—**Generating t.** See MERISTEM.—**Germinal t.** T. giving rise to ova or spermatozooids. [J.] See *Germinal* EPITHELIUM and GERM *plasma.*—**Glandular t.** See *Punctated t.*—**Granular connective t.** See NEUROGLIA.—**Granulation t.** A mass of indifferent cells cemented by a scanty amount of ground substance and traversed by capillary blood-vessels. [E, 25.]—**Gray nervous t.** Nervous t. containing nerve-cells. [J, 43.] See also *Gray* MATTER *of the brain.*—**Ground t.** See STROMA.—**Hepatic t.** See *Botryoidal t.*—**His's t.** Spindle t.—**Homogeneous connective t.** Membranes, such as the coats of the Malpighian corpuscles of the spleen, which agree in chemical character with connective t., but do not contain bundles of fibres. [J, 24.]—**Horny t.** See *Corneous t.*—**Indifferent connective t.** See *Mucoid connective t.*—**Inflammatory t.** Neoplastic t. formed during inflammation. [a, 34.]—**Interlobular connective t. of the liver.** Connective t. between the acini of the liver, containing branches of the bile ducts, the hepatic artery, and the portal vein. [L.]—**Intermediate areolar t.** Connective t. lying between the muscles, blood-vessels, and other deep-seated parts. [J, 30.] See *Areolar t.*—**Intermediate t.** The active t. immediately surrounding the pith of monocotyledonous plants. [a, 35.]—**Intermuscular t.** See *Areolar t.*—**Interstitial connective t.** See *Areolar t.* and TISSU *annexiel.*—**Investing areolar t.** A kind of sheath formed around the muscles, blood-vessels, nerves, etc., by the areolar t. [J, 30.]—**Jelly-like t.** See *Mucoid connective t.*—**Lamellar t., Laminar t., Laminated t.** See *Areolar t.* and *Fibrous t.*—**Lardiform t.** T. that has undergone amyloid degeneration. [a, 34.]—**Laticiferous t.** Cinenchyma. [a, 35.] See *Latex-*CELL.—**Ligamentous t.** See *White fibrous t.*—**Lymphatic t., Lymphoid t., Lymph-t.** See *Adenoid t.*—**Mechanical t.** See *Supporting t.*—**Medullary t.** See *Medullary* SUBSTANCE.—**Mesothelial t's.** T's formed from the mesothelium. [a, 34.]—**Metabolic t.** Organic t. that is concerned in metabolism. [a, 34.]—**Mucinous t., Mucoid (connective) t., Mucous t.** Ger., *Gallertgewebe, Schleimgewebe, Nabelstranggewebe.* Connective t., such as that in the umbilical cord of the fœtus, consisting of an abundant jelly-like, albuminous ground-substance (see *Mucoid basis-*SUBSTANCE) in which are imbedded numerous round and branched, anastomosing cells and comparatively few white and elastic connective-t. fibres. [J, 30, 31.]—**Muscular t.** T. composed of striated muscular fibres, of cardiac muscular fibre-cells, or of muscular fibre-cells. Its distinguishing characteristic is its power to contract in one direction, viz., along the long axis of the fibres composing it. [J, 17, 26, 28, 31.]—**Nerve-t.** See *Nervous t.*—**Nervous cineritious t.** See *Gray nervous t.*—**Nervous t.** T. composed of nerve-fibres and nerve-cells. [J.]—**Osseous t.** Ger., *Knochengewebe.* The combined structure consisting of the matrix of animal matter and the osseous granules deposited in it that constitutes bone. See also *Osseous basis-*SUBSTANCE, *Compact osseous* SUBSTANCE, and *Spongy osseous* SUBSTANCE.—**Osteogenic t.** See OSTEOGEN.—**Palisade t.** See *Palisade* PARENCHYMA.—**Parenchymal areolar t., Penetrating areolar t.** See *Constituent areolar t.*—**Permanent t.** Cell t. not capable of multiplication and division. [a, 35.]—**Phanerogenous t., Phanerophorous t.** A structure which may be said to bear some evident part, such as the papilla of a hair, which seems to bear the hair. [J, 16, 33.]—**Pitted t.** In botany, bothrenchyma, taphrenchyma; t. in which pits or perforations occur on the cell-walls or upon the sæpta between superposed cells. [a, 35.]—**Porous connective t.** See NEUROGLIA.—**Porous t.** See *Areolar t.*—**Primary t., Primordial t.** A cell-t. of a plant from which its parts are developed, *e. g.*, meristem. [a, 35.]—**Pulp t.** T. forming the pulp of a gland or organ, such as the t. of the tooth-pulp. [J, 26.]—**Punctated t.** See *Pitted t.*—**Reichert's connective t.** See *Homogeneous connective t.*—**Reticular t.** See *Adenoid t.*—**Reticulated connective t.** See *Areolar t.* and *Adenoid t.*—**Retiform (connective) t.** See *Adenoid t.*—**Sarcous t.** See *Muscular t.*—**Sclerous t.** A general term including osseous, cartilaginous, and fibrous t. [J, 16.]—**Sieve-t.** A cellular t. made up of thin-walled cells having areas of sieve-like markings. It is characteristic of the phloem. [B, 91 (a, 35).]—**Simple t's.** T's composed of but one structural element, or with but a slight admixture of others, as in blood, lymph, epithelium, the connective t., cartilage, bone, and muscular and nervous t's. [J, 21, 30.]—**Skeletal t.** A general term for fibrous, adenoid, adipose, osseous, and cartilaginous t. [Lankester, "Quart. Jour. of Micr. Sci.," 1880, p. 307 (J).]—**Skeletotrophic t.** A general term for connective t., capillaries, embryonic blood-vessels, and the hæmoglobinous and colorless elements of the blood. [Lankester, *l. c.* (J).]—**Solid connective t.** Of Kölliker, a general term for tendons, ligaments, fibro-cartilage, and fibrous membranes. [J.]—**Spindle t.** Of His, the spindle-shaped elements in the ovary, which he supposed to be stunted muscular fibre-cells. [J, 35.]—**Spongy t. (of bone).** See *Spongy bone* SUBSTANCE.—**Subarachnoid t.** Trabeculæ of fibrous t. between the arachnoid and pia, the surfaces of which have a covering of endothelia. [L.]—**Subcutaneous adipose t.** The adipose t. inclosed in subcutaneous t. (*q. v.*). [a, 48.]—**Subcutaneous (cellular, or connective) t., Subdermic t.** Ger., *Unterhautgewebe, Unterhautzellgewebe.* The areolar t. just beneath the corium and merging insensibly into it. It is made up of fasciculi or loosely joined fibrous bundles that pass obliquely from the underlying muscular fascia or periosteum to unite with the t. of the corium and inclose more or less adipose t. in their meshes, together with the sweat-glands. In this layer are also found the follicles of the coarser hairs, also blood-vessels, lymphatics, and nerves. [G; J.] Cf. *Fat* COLUMNS.—**Submucous (areolar) t.** Ger., *Unterschleimhautgewebe.* Areolar t. beneath a mucous membrane and serving to connect it with other parts. [J.]—**Subperiosteal t.** See *Osteogenetic* LAYER.—**Subserous areolar t.** The areolar t. serving to attach serous membranes to the parts they invest. [J, 30.]—**Supporting t.** T., such as woody t., serving to strengthen a part or organ; mechanical t. [a, 35.]—**Sustentacular t.** See *Connective t.*—**Trabecular t.** Ger., *Balkengewebe.* T., especially connective t., arranged in trabeculæ, which often form a network. [J, 35.]—**Tubular nervous t.** Nervous t. composed of medullated nerve-fibres. [J, 43.]—**Tubuliferous t.** Ger., *Segmentalstränge.* Of Balfour, the branched masses of epithelium forming cords or tubes in the vascular zone of the ovary in embryos and young animals. It is derived from the Wolffian bodies. ["Quart. Jour. of Micr. Sci.," 1878, p. 383 (J).]—**Ungual t.** See *Corneous t.*—**Utricular t.** See PSEUDOPARENCHYMA.—**Vascular t.** Fr., *tissu vasculaire.* In botany, t. composed of united tubes or vessels formed by the obliteration of sæpta between superposed cells. [a, 35.]—**Vasifactive t.** T. giving rise to blood-vessels. [J.] See also *Vasoformative* CELL.—**Vasiform t.** Trachenchyma. [a, 35.]—**Vaso-fibrous t.** See *Botryoidal t.*—**Vesicular nervous t.** Nervous t. containing nerve-cells, as in the ganglia and the cerebral cortex. [J, 43.]—**Water (-storing) t.** See *Aqueous t.*—**White fibrous t.** Ger., *fibrilläres Bindegewebe.* 1. Connective t. composed of white inelastic fibres and bundles of fibres extending in nearly parallel directions. It is exceedingly strong, and

forms tendons, ligaments, and resistant membranes (*e. g.*, periosteum, perichondrium, and the dura). In its purest form it contains very few elastic fibres. It merges insensibly into areolar t., as in the fascia. 2. Connective t. composed of white, inelastic, and glue-yielding fibres without regard to the direction of the fibres. [J, 35.]—**White nervous t.** Nervous t. composed of medullated nerve-fibres. [J, 43.]—**Woody t.** T. forming the woody fibre of plants. [*a*, 35.] See *Wood*-CELL.—**Yellow elastic t., Yellow fibrous t.** See *Elastic t.*

TISSULAIRE (Fr.), adj. Te su^6-la^{2}r. Pertaining to the tissues. [J, 33.]

TISWIN, n. Ti^{2}s'wi^{2}n. Among the Apaches of Arizona, a kind of liquor manufactured from wheat, barley, or maize, which produces intoxication of the worst type when used in considerable quantities. The grain is buried in the ground until it sprouts, then dried and ground, and then, after boiling in water, put aside to ferment. ["Med. Record," Sept. 24, 1892, p. 358 (*a*, 50).]

TITA, n. Written also *teeta*. The *Coptis teeta* or its root. The roots of *Picrorrhiza kurroa* and some other plants are also known under this name in the Bengal bazaars. [*a*, 35.]

TITANATE, n. Ti^{2}t'a^{2}n-at. A salt of titanic acid. [B.]

TITANIC ACID, n. Ti^{2}t-a^{2}n'i^{2}k. Ger., *Titansäure.* A white powder of uncertain composition, probably $TiH_2O_3 = TiO(OH)_2$, obtained by precipitating titanium dioxide from an acid solution by means of an alkali. [B, 3; B, 93 (*a*, 14).]—**Liquid t. a., Soluble t. a.** A form of t. a. obtained in solution by dialysis after the fashion of soluble stannic acid. [B, 6.]

TITANIC ANHYDRIDE, n. Ti^{2}t-a^{2}n'i^{2}k. See TITANIUM *dioxide.*

TITANIUM (Lat.), n. n. Ti^{2}t(tet)-an(a^{3}n)'i^2-u^{3}m(u^{4}m). From Τιτάν, a Titan. Fr., *titane, ménachin.* Ger., *Titan.* A metallic element discovered by Gregor in 1789. It occurs in several rare minerals, chiefly in combination with oxygen, and is often associated with iron. It is obtained in the form of an iron-gray, amorphous powder of metallic lustre. It is distinguished by the readiness with which it combines with nitrogen at a high temperature. In composition it acts as a dyad or tetrad, and occasionally as a hexad, replacing two, four, or six atoms of hydrogen. Symbol, Ti; atomic weight, 48; sp. gr., 5·3. [B, 3.]—**Basic t. sulphate.** A white mass, $TiO(SO_4)$. [B, 3.]—**T. bromide.** See *T. tetrabromide.*—**T. chloride.** See *T. dichloride, T. trichloride, T. tetrachloride,* and *T. oxychloride.*—**T. dichloride.** A brownish powder, $TiCl_2$, which has a strong affinity for moisture and decomposes water. [B, 3.]—**T. dioxide.** A substance, TiO_2, occurring in nature in the form of several minerals, and obtainable artificially both as an amorphous white powder and in crystalline forms corresponding to those observed in the natural dioxide. It is insoluble in water, hydrochloric acid, or dilute sulphuric acid. It unites with alkaline carbonates to form titanates. [B, 3.]—**T. fluoride.** See *T. tetrafluoride.*—**T. hydroxide.** A dark-brown substance corresponding to t. sesquioxide, precipitated by ammonia from a solution of titanic acid and copper or hydrochloric acid. The titanic hydroxides are titanic and metatitanic acids. [B, 3.]—**T. iodide.** See *T. tetraiodide.*—**T. nitride.** Any one of a number of compounds of t. and nitrogen, formed by the action of nitrogen or ammonia on t. or its salts. [B, 3.]—**T. oxide.** See *T. dioxide* and *T. sesquioxide.*—**T. oxychloride.** A substance, $Ti_2O_2Cl_2$, forming reddish-brown crystals. [B, 3.]—**T. sesquichloride.** See *T. trichloride.*—**T. sesquioxide.** A crystalline substance, Ti_2O_3. [B, 3.]—**T. sesquisulphate.** A crystalline body, $Ti_2(SO_4)_3 + 8H_2O$. [B, 3.]—**T. sulphate.** A compound of t. and sulphuric acid. *Titanic sulphate*, $Ti(SO_4)_2 + 3H_2O$, is a yellow, deliquescent, amorphous substance. [B, 3.] See also *Basic t. sulphate* and *T. sesquisulphate.*—**T. sulphide.** A body, TiS_2, forming shining, yellow scales. [B, 3.]—**T. tetrabromide.** A yellow crystalline mass, $TiBr_4$. [B, 3.]—**T. tetrachloride.** A colorless, mobile, fuming liquid, $TiCl_4$, of peculiar odor, boiling at 135° C. Combined with water, it solidifies like tin tetrachloride. It unites with the chlorides of other metals and radicles to form double salts. [B, 3.]—**T. tetrafluoride.** A colorless liquid, TiF_4, fuming on exposure to the air. It combines with the fluorides of other metals, forming the titanofluorides. [B, 3.]—**T. tetraiodide.** A reddish-brown substance, TiI_4, of metallic lustre. [B, 3.]—**T. trichloride.** A substance, Ti_2O_6, forming dark, violet-colored deliquescent scales. It has a strong affinity for oxygen, and so acts as an energetic reducing agent. [B, 3, 16.]

TITANOFLUORIDE, n. Ti^{2}t''a^{2}n-o-flu^2'o^{2}r-i^{2}d(id). A compound of titanium tetrafluoride with the fluoride of another metal or radicle. [B, 3.]

TITHONIC, adj. Ti^{2}th-o^{2}n'i^{2}k. From Τιθωνός, Tithonus, a brother of Priam. See ACTINIC.

TITHYMALUS (Lat.), n. m. Ti^{2}th-i^{2}m(u^{6}m)-al(a^{3}l)'u^{3}s(u^{4}s). Gr., τιθύμαλος. 1. Of Hippocrates, the *Euphorbia characias.* 2. The genus *Euphorbia.* The *Tithymaleæ*, the *Tithymali*, and the *Tithymaloideæ* correspond essentially to the *Euphorbiaceæ.* [*a*, 35.]—**Radix tithymali.** The root of *Euphorbia cyparissias.* [*a*, 35.]—**T. cyparissias.** 1. Of Dioscorides, perhaps the *Euphorbia aleppica.* 2. The *Euphorbia cyparissias.* [*a*, 35.]—**T. magnus.** See EUPHORBIA *dendroides.*—**T. maritimus.** See APOCYNUM *venetum.*—**T. myrtifolius.** See PEDILANTHUS *tithymaloides.*—**T. nummularis.** See EUPHORBIA *chamæsyce.*

TITILLAMENTUM (Lat.), n. n. Ti^{2}t(tet)-i^{2}l-la^3-me^{2}nt'u^{3}m(u^{4}m). A means of titillation. [B.]

TITILLATION, n. Ti^{2}t-i^{2}l-a'shu^{3}n. Lat., *titillatio, titillatus* (from *titillare*, to tickle). Fr., *t.* Ger., *Kitzel, Kitzeln.* The act of tickling, or the condition of being tickled. [D.]

TITILLATUS (Lat.), n. m. Ti^{2}t(tet)-i^{2}l-lat(la^{3}t)'u^{3}s(u^{4}s. Gen., *-at'us.* From *titillare*, to tickle. Tickling in the throat. [L, 57 (*a*, 14).]

TITRATED, adj. Ti^{2}t'rat-e^{2}d. Fr., *titré.* Ger., *titrirt.* Subjected to titration.

TITRATION, n. Ti^{2}t-ra'shu^{3}n. From Fr., *titre.* Volumetric analysis by means of standard solutions. [A, 1.]

TITTHE (Lat.), n. Ti^{2}t'the(tha). Gen., *tit'thes.* Gr., τίτθη. 1. The nipple. 2. A wet-nurse. [L, 50 (*a*, 14).]

TITTHOZOA (Lat.), n. n. pl. Ti^{2}t-tho(tho^3)-zo'a^3. From τιτθός, the nipple, and ζῷον, an animal. See MAMMALIA.

TITTHUS (Lat.), n. m. Ti^{2}t'thu^{3}s(thu^{4}s). Gr., τιτθός. See TITTHE (1st def.).

TITUBATION, n. Ti^{2}t-u^2-ba'shu^{3}n. Lat., *titubatio* (from *titubare*, to stagger). Fr., *titubation.* Ger., *Taumeln, Wanken.* A stumbling, staggering gait. [*a*, 34.]

TLALPOPOLOTL [Mex. Ph.], n. See FLOURENSIA *thurifera.*

TLANEPAQUELITE [Mex. Ph.], n. See PIPER *sanctum.*

TLATLANCUAYA, n. See ACHYRANTHES *calea* (in Supplement).

TMETICUS (Lat.), adj. Me^{2}t(tmat)'i^{2}k-u^{3}s(u^{4}s). Gr., τμητικός (from τέμνειν, to cut). Fr., *tmétique.* See RESOLVENT.

TOAD-FLAX, n. To^{3}d'fla^{2}x. 1. The genus *Linaria*, especially *Linaria vulgaris.* 2. The *Spergula arvensis.* [*a*, 35.]—**Bastard t.-f.** The *Thesium linophyllum* and (in America) the genus *Comandra.* [*a*, 35.]

TOADROOT, n. To^{3}d'ru^{4}t. See ACTÆA *alba* and ACTÆA *rubra.*

TOAD-SPIT, TOAD-SPITTLE, n's. To^{3}d'spi^{2}t, -spi^{2}t'l. See LEMNA *minor* and CUCKOO-*spit.*

TOADSTONE, n. To^{3}d'sto^{3}n. See BUFONITES.

TOADSTOOLS, n. pl. To^{3}d'stulz. Species of *Agaricus*, especially *Agaricus muscarius* and other poisonous species; also *Polyporus* and *Boletus.* [*a*, 35.]

TOBACCO, n. To-ba^{2}k'o. The leaves of various species of *Nicotiana*, especially *Nicotiana tabacum.* [*a*, 35.]—**English t.** An old name for the genus *Hyoscyamus.* [*a*, 35.]—**Extract of t.** See *Extractum* NICOTIANÆ.—**Havana t.** See NICOTIANA *repanda.*—**Indian t.** See LOBELIA *inflata* and CANNABIS *indica.*—**Latakia t.** See NICOTIANA *rustica.*—**Oil of t.** 1. See under NICOTIANA *tabacum.* 2. See *Oleum* NICOTIANÆ.—**Poison-t.** See HYOSCYAMUS *niger.*—**T.-bush.** See HEDYOSMON *nutans.*—**T.-root.** The root of *Lewisia rediviva.* [*a*, 35.]—**Turkish t.** See under NICOTIANA *rustica.*—**Vinegar of t.** See *Acetum* NICOTIANÆ.—**Virginian t.** See NICOTIANA *tabacum.*—**Wild t.** See NICOTIANA *rustica* and LOBELIA *inflata.*

TOBELBAD (Ger.), n. To^{3}b'e^{2}l-ba^{3}d. A place in Styria, Austria, where there are warm sulphurous springs. [L, 30, 37, 57 (*a*, 14).]

TOBEN (Ger.), n. Tob'e^{2}n. See FUROR.

TOC (Fr.), n. Tok. See DANDO.

TOCADOMYCODORITIS (Lat.), n. f. To^{2}k-a^{2}d(a^{3}d)-o(o^3)-mi(mu^6)-ko(ko^3)-do^{2}r-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* From τοκάς, having just brought forth, μύκος, mucus, and δορά, a hide. Fr., *tocadomycodorite.* Puerperal inflammation of a mucous membrane.

TOCAREXIS (Lat.), n. f. To^{2}k-a^{2}r(a^{3}r)-e^{2}x(ax)'i^{2}s. Gen., *-ex'eos (-is).* From τόκος, childbirth, and ἄρηξις, assistance. See OBSTETRICS.

TOCHTERKNÄUEL (Ger.), n. To^{3}ch^{2}t'e^{2}r-knol-e^{2}l. See DISPIREME.

TOCHTERSTERN (Ger.), n. To^{3}ch^{2}t'e^{2}r-ste^{2}rn. See AMPHIASTER.

TOCO-DYNAMOMETER, n. Tok-o-di^{2}n-a^{2}m-o^{2}m'e^{2}t-u^{6}r. From τόκος, childbirth, δύναμις, power, and μέτρον, a measure. Of Schatz, an apparatus for measuring the force of the uterine contractions during labor. [A, 24.]

TOCOMYCODORITIS (Lat.), n. f. Tok(to^{2}k)-o(o^3)-mi(mu^6)-ko(ko^3)-do^{2}r-i(e)'ti^{2}s. Gen., *-it'idos (-is).* See TOCADOMYCODORITIS.

TOCOLOGY, n. Tok-o^{2}l'o-ji^2. From τόκος, childbirth, and λόγος, understanding. Fr., *tocologie.* See OBSTETRICS.

TOCOPHELIA (Lat.), n. f. Tok(to^{2}k)-o(o^3)-fel(fe^{2}l)'i^2-a^3. From τόκος, childbirth, and ὄφελος, help. An apparatus for mitigating the suffering of a woman in labor; consisting of an abdominal and a sacral pad with which she can make pressure by pulling on ropes connected with them and passing over pulleys. ["Med. Times and Gaz.," 1875, i, p. 188 (*a*, 34).]

TOCOTHERMOMETRIE (Ger.), n. Tok-o-te^{2}rm-o-mat-re'. Thermometry as applied to obstetrics. [A, 24.]

TOD (Ger.), n. Tod. See DEATH.—**Herzt'.** Death from heart failure. [*a*, 34.]—**Schwarzer T.** See *Black* DEATH.

TODDALIA (Lat.), n. f. To^{2}d-dal(da^{3}l)'i^2-a^3. Fr., *toddali, toddalie.* A genus of the *Toddalieæ*, which are a tribe of the *Rutaceæ.* [*a*, 35.]—**T. aculeata, T. asiatica.** A tropical Asiatic shrub containing an aromatic, bitter, acrid principle which makes it stimulant, carminative, and tonic. The bark, especially the root-bark, is used as a stomachic and febrifuge. The leaves are used in baths and fomentations and are eaten raw in intestinal complaints. The green fruits, together with the root, are used externally in rheumatism. The ripe fruits have the pungency of black pepper and are pickled. [*a*, 35.] See also RADIX *Lopez.*

TODDY, n. To^{2}d'i^2. 1. Sap from a wine palm. It yields arrack on fermentation. [*a*, 48.] 2. See PUNCH.

TODGEBOREN (Ger.), adj. Tod'ge^2-bor-e^{2}n. See STILL-BORN.

TODT (Ger.), adj. Tot. See DEAD.—**T'enblume.** See CALENDULA *officinalis.*—**T'enblumenkraut.** See HYOSCYAMUS *niger.*—**T'enflecke.** See LIVOR *emortualis.*—**T'enkrampf.** See

Rigor *mortis*.—**T'enkranz.** Lit., a wreath for the dead; an anomaly of the obturator artery in which it is found on Gimbernat's ligament. [L, 57 (α, 34).]—**T'enschau.** See *Post-mortem* examination. — **T'enschlummer.** See Trance. — **T'enschweiss.** The sweating that often precedes death. [α, 34.]—**T'-faul.** Fr., *mort et macéré.* Dead and macerated (said of a fœtus which, having been retained for a length of time after its death, is not putrid, but macerated and flattened at those parts on which it has rested for a long time). [A, 24.]—**T'geboren.** See Still-born.

TÖDTUNG (Ger.), n. Tu⁵t'un². See Death.—**Kindst'.** Infanticide. [α, 34.]

TOE, n. To. Gr., δάκτυλος (τοῦ ποδός). Lat., *digitus* (*pedis*). Fr., *doigt du pied, orteil.* Ger., *Zehe.* A digit of the foot.—**Flexed t's.** Fr., *orteils en marteau* (ou *en Z*, ou *en griffe*, ou *en cou de cygne*). Ger., *verkrümmte Zehe.* A permanent distortion of the t's in which they are unduly flexed at the last joint, so that the tips or even the nails rest on the ground, while the first joints are drawn up above the proper level. [A, 53.]—**Glossy t's.** See *Glossy* skin. —**Great t.** Lat., *hallux.* Fr., *gros orteil.* Ger., *grosse Zehe.* The innermost and largest of the t's. [L.]—**Hammer t's.** See *Flexed t's.*—**Lazy-t.** See Over-t.—**Morton's t.** A peculiar and painful disorder pertaining to the metatarso-phalangeal joint of the fourth t. ["N. Y. Med. Jour.," Oct. 8, 1892, p. 410 (α, 34).]—**Talon t's.** See *Flexed t's.*

TOFU (Jap.), n. A jelly prepared from the *Soja hispida.* [α, 35.]

TOILE (Fr.), n. Twa³l. See Cloth.—**T. chorioïdienne (supérieure).** See Sæptum *lucidum*.—**T. d'araignée.** See Cobweb. —**T. de mai.** See *Sparadrap de* cire.—**T. d'hôpital.** Rubber cloth, used to protect ulcers or cutaneous affections from the air. [L, 49 (α, 14).]—**T. Dieu.** See *Sparadrap de* cire and *Sparadrap* diapalme.—**T. farciminale.** The allantois. [A, 45.]—**T. médicamenteuse, T. sparadrap.** See Sparadrap.

TOILET, n. Toil'e²t. 1. The methodical cleansing of a part or region after a surgical operation. [α, 48.] 2. Clearing the axilla of diseased lymphatic glands in cases of mammary tumor. [A, 94.]—**T. of the peritonæum.** Ger., *Bauchfelltoilette.* The aseptic measures tending to remove all extraneous substances from the peritonæum after laparotomy. [α, 34.]

TOIT (Fr.), n. Twa³. A roof. [α, 30.]—**T. des pédoncules cérébraux.** See Tegmentum (1st def.).

TOKAY (Hung.), n. To³k'oi. A Hungarian white wine.

TOLA (Lat.), n. f. Tol(to²l)'a³. See Tonsil.

TOLANE, n. Tol'an. Fr., *t.* Ger., *Tolan.* Diphenylacetylene, $C_{14}H_{10} = C_6H_5.C : C.C_6H_5$. [B, 3, 4, 270 (α, 38).]

TOLENAS SPRINGS, n. Tol-an'a²s. A place in Solano County, California, where there are gaseous mineral springs. [Anderson (α, 14).]

TOLENE, n. Tol'en. Fr., *tolène.* Ger., *Tolen.* A terpene, $C_{10}H_{16}$, obtained from balsam of Tolu. [B, 270 (α, 38).]

TOLERANCE, n. To²l'e²r-'ns. G., εὐφορία. Lat., *tolerantia* (from *tolerare*, to bear). The quality of being able to endure the action of a deleterious agent, especially when acquired by the habitual use of the agent. Cf. Accoutumance.

TOLES (Lat.), n. m. pl. Tol(to²l)'ez(as). Gen., *tol'ium.* 1. The tonsils. 2. Goitre. [A, 312, 325 (α, 48).]

TOLIDINE, n. To²l'i²d-en. A substance, $\begin{array}{l}C_6H_3(CH_3).NH_2\\ |\\ C_6H_3(CH_3).NH_2\end{array}$, known in three isomeric forms; used extensively in the manufacture of the dyes made from coal-tar. [B, 270 (α, 38).]

TOLL (Ger.), adj. To³l. See Insane.

TOLLBEERE (Ger.), n. Tol'bar-e². The *Atropa belladonna.*

TOLLES (Lat.), n. m. pl. To²l'lez(las). Gen., *tol'lium.* See Toles.

TOLLHEIT (Ger.), n. To³l'hit. See Insanity.—**Mannt'.** See Nymphomania.—**Weint'.** See Dipsomania.

TOLLKIRSCHE (Ger.), n. To³l'kersh-e². See Atropa and Belladonna.—**T'npflaster.** See *Emplastrum cum extracto* belladonnæ.

TOLLSUCHT (Ger.), n. To³l'zuch²t. See Rabies.

TOLLWURM (Ger.), n. To³l'vurm. See Cynolyssa (2d def.) and Sæptum *linguæ.*

TOLLWUTH (Ger.), n. Te³l'vut. See Rabies.

TÖLPELKRANKHEIT (Ger.), n. Tu⁶lp'i²l-kra³n²k-hit. See Mumps.

TOLU, n. To-lu'. See Balsam *of T.*—**Syrup of t.** See Syrupus *tolutanus.*—**Tincture of t.** See Tinctura *tolutana.*

TOLUENE, n. To²l-u²'en. Fr., *toluène.* Ger., *Toluen. Toluol.* Methylbenzene, dracyl; a colorless liquid, $C_7H_8 = C_6H_5(CH_3)$, occurring in light coal-tar oils, having a benzene-like odor; used in the manufacture of dyes. [B, 3 (α, 38); B, 4.]—**T'disulphonic acid.** An acid, $C_7H_8S_2O_6 = C_6H_3(CH_3)(SO_3H)_2$, known in three isomeric forms, one of which, *α-t' acid*, $C_6[CH_3,SO_3H,H.SO_3H,H,H,]$, is a thick liquid. [B, 3 (α, 38).]—**T'sulphonic acid.** An acid, $C_7H_8SO_3 = C_6H_4(SO_3H).CH_3$, known in three isomeric forms: *T'orthosulphonic acid*, thin deliquescent tabular crystals containing 2 molecules of water; *t'metasulphonic acid*, very deliquescent crystalline crusts; and *t'parasulphonic acid*, thick deliquescent tabular or flat prismatic crystals. The meta-compounds and para-compounds contain each 1 molecule of water. [B, 3 (α, 38); B, 4.] See also *T'disulphonic acid* and *T'trisulphonic acid.*—**T'trisulphonic acid.** An acid, $C_7H_8S_3O_9 = C_6H_2(CH_3)(SO_3H)_3$, occurring as long acicular crystals containing six molecules of water. [B, 3 (α, 38).]

TOLUENYL ALCOHOL, n. To²l-u²'e²n-i²l. Paraxylyl alcohol. [α, 38.] See Xylyl *alcohol.*

TOLUHYDROQUINONE, n. To²l-u²''hid-ro-kwi²n'on. See Methyl*hydroquinone.*

TOLUIC ACID, n. To²l-u²'i²k. Fr., *acide toluique* (ou *toluylique*). Ger., *Toluylsäure.* An acid, $C_8H_8O_2 = C_6H_4(CH_3)CO.OH$, known in three isomeric forms: *Orthot' a.*, long shining acicular crystals melting at 102° C.; *metat' a.*, forming long acicular crystals from a quickly cooled solution, prismatic crystals if evaporated slowly, melting at about 109° C.; and *parat' a.*, acicular crystals melting at 180° and boiling at about 275° C. An isomeric acid, *α-t' a.*, or *phenylacetic acid*, $C_6H_5.CH_2.COOH$, forms shining laminar crystals, melting at 76·5° C., and boiling at 265·5° C. with a vapor which produces coughing. [B, 3 (α, 38); B, 4.]

TOLUIC ALDEHYDE, n. To²l-u²'i²k. A substance, $C_8H_8O = C_6H_4.CH_3.CHO$, known in three isomeric forms: *Orthot' a.*, $C_6[CH_3,CHO,H,H,H,H,]$, a yellowish, very refractive liquid having an odor like that of benzoic aldehyde; *metat' a.*, $C_6[CH_3,H.CHO.H.H,H,]$, a liquid of like odor; and *parat' a.*, $C_6[CH_3.H,H,CHO,H,H,]$, a liquid having a peppermint-like odor. [B, 3 (α, 38); B, 4.]

TOLUIDINE, n. To²l-u²'i²d-en. Fr., *t.* Ger., *Toluidin.* Amidotoluene; a substance, $C_7H_9N = C_6H_4(CH_3)NH_2$, known in three isomeric forms: *Orthot'*, a colorless liquid which quickly turns brown in the light or the air; *metat'*, a colorless oily liquid, turning to a brown resinous mass in the air; and *parat'*, large colorless tabular crystals having an aromatic, aniline-like odor. [B, 3 (α, 38).]

TOLUIFERA (Lat.), n. f. Tol-u²(u)-i²f'e²r-a³. From *tolu* (*q. v.*), and *ferre*, to bear. Fr., *toluifère.* The genus *Myroxylon.* [α, 35.] —**T. balsamum, T. Pereiræ.** See Myroxylon *toluiferum.*

TOLUIFEROUS, adj. Tol-u²-i²f'e²r-u³s. Lat., *toluiferus* (from *tolu* [*q. v.*], and *ferre*, to bear). Fr., *toluifère.* Producing balsam of Tolu. [α, 35.]

TOLUNITRIL, n. To²l-u²-nit'ri²l. Fr., *toluinitrile.* A substance, $C_8H_7N = CH_3.C_6H_4.CN$, known in three isomeric forms: *Orthot'*, a very refractive colorless liquid boiling at about 204° C.; *metat'*, a liquid having an odor of benzonitril; and *parat'*, a very refractive liquid having an odor of benzonitril and boiling at 217·8° C. [B, 3 (α, 38).]

TOLUOL (Ger.), n. Tol-u-o²l'. See Toluene.

TOLUQUINOL, n. To²l-u²-kwi²n'o²l. See Methyl*hydroquinone.*

TOLUQUINONE, n. To²l-u²-kwi²n'on. See Methyl*quinone.*

TOLURHETIN, n. To²l-u²-ret'i²n. From *tolu* (*q. v.*), and ῥητίνη, resin. Fr., *tolurétine.* Of Gerhardt, a resin extracted from balsam of Tolu. [B, 93 (α, 14).]

TOLURIC ACID, n. To²l-u²r'i²k. Fr., *acide tolurique.* Paratoluylamidoacetic acid; an acid, $CH_3.C_6H_4.CO.NH.CH_2.CO.OH = C_{10}H_{11}NO_3$, occurring as pearly tabular crystals. [B, 3 (α, 38).]

TOLUYL, n. To²l-u²'i²l. Fr., *toluyle.* 1. The hypothetical radicle, C_6H_4, of toluylic acid. 2. An improper term for cresyl. [B, 93 (α, 14).]—**T'säure.** See Toluic acid.

TOLUYLENE, n. To²l-u²'i²l-en. Fr., *toluylène.* Ger., *Toluylen.* Stilbene; a bivalent radicle, $C_6H_3(CH_3)''$, contained in some of the derivatives of toluene.—**T'blue.** A substance, $C_{15}H_{18}N_4.HCl + H_2O$ (or $C_{15}H_{18}N$), occurring as a resinous mass which acquires a coppery lustre when exposed to the air. [B, 3, 270 (α, 38).]—**T'diamine.** A substance, $C_7H_{10}N_2 = C_6H_3(CH_3)(NH_2)_2$, known in several isomeric forms, such as *orthot'diamine*, or *β-diamidotoluene*, $C_6[CH_3,H,NH_2,NH_2.H,H.]$, shining white scales; *metat'diamine*, or *α-diamidotoluene*, $C_6[CH_3,NH_2.H,NH_2.H,H.]$, long acicular crystals; *parat'diamine*, or *γ-diamidotoluene*, $C_6[CH_3.H,NH_2.H,NH_2.H]$, masses of tabular crystals; and *δ-diamidotoluene*, $C_6[CH_3,NH_2,NH_2,H,H.H,]$, red crystals having an odor of acetamide. [B, 3 (α, 38).]—**T. hydrate.** A substance, $C_{14}H_{14}O = C_6H_5.CH_2.CH(OH).C_6H_5$, occurring as brittle acicular crystals. [B, 4 (α, 38).]—**T' red.** A substance, $C_{15}H_{16}N_4$, occuring as orange-colored acicular crystals containing 4 molecules of water but becoming anhydrous and blood-red at about 160° C. According to some, the dye is the hydrochloride of this, $C_{15}H_{17}N_4Cl$. [B, 3, 270 (α, 38).]—**T'violet.** A substance, $C_{14}H_{14}N_4$, occurring as red crystals having a green reflection. [B, 3 (α, 38).]

TOLYL, n. To²l'i²l. Fr., *tolyl.* Ger., *T.* 1. Methyl-benzyl, or parat', a univalent radicle, $C_6H_4.(CH_3).CH_2'$. 2. The group C_7H_7. [B; B, 3 (α, 38).]—**T'acetamide.** The compound $C_6H_4(CH_3).NH.(C_2H_3O)$. [B, 2.]—**T. alcohol.** A substance, $C_8H_{10}O = C_6H_4.CH_3.CH_2OH$, known in two isomeric forms, one of which forms acicular crystals. [B, 4; B, 270 (α, 38).]—**T'chloracetamide.** The compound $C_9H_{10}ClNO = CH_2Cl.CONH.(C_6H_4.CH_3)$. [B, 2.]—**T'urethane.** A substance, $C_{10}H_{13}NO_2 = NH(C_7H_7)CO.OC_2H_5$, known in three isomeric forms: *orthot'urethane*, crystals; *metat'urethane*, a liquid; and *parat'urethane*, or *ethylt'carbamate*, long prismatic crystals. [B, 3 (α, 38).]

TOLYLENE, n. To²l'i²l-en. Fr., *tolylène.* The radicle, $C_6H_4\langle^{CH_2'}_{CH_2'}$, of t. alcohol. [B.]—**T. alcohol, T. glycol.** Fr., *glycol tolylénique.* A substance, $C_6H_4 : (CH_2.OH)_2$, resulting from the substitution of a molecule of hydroxyl for one atom of hydrogen in the methyl group of tolyl alcohol. [B, 270 (α, 38).]

TOMATO, n. Tom-a³t'o. Fr., *tomate.* Ger., *Liebesapfel.* Sp., *jitomate* [Mex. Ph.], *tomate.* The *Lycopersicum esculentum*, also its fruit, which is used in Mexico as an anodyne. [α, 35.]—**Strawberry-t.** See Physalis *alkekengi.*

TOMBA, n. In Brazil, the *Perianthopodus espalina* and other purgative species. [B, 121 (α, 35).]

TOMBAC, n. To²m'ba²k. Fr., *t.* Ger., *Tomback.* An alloy of 97 parts of copper and 3 of zinc, having a gold-like appearance. [B, 270 (α, 38).]

TOMBÉ (Fr.), adj. To²n²-ba. Prolapsed. [A, 44.]

TOME (Lat.), n. f. Tom(to²m)'e(a). Gen., *tom'es.* Gr., τομή (from τέμνειν, to cut). Ger., *Schnitt.* Section, a cutting ; of Galen, venesection. [A, 325 (α, 48).]

TOMELLINE (Fr.), n. To-me²-len. See GLOBULIN.

TOMENTOSE, adj. Tom'e²nt-os. Lat., *tomentosus* (from *tomentum* [*q. v.*]). Fr., *tomenteux, cotonneux, drapé.* Ger., *filzig.* Covered with tomentum, densely pubescent. [α, 35.]

TOMENTOSULUS (Lat.), adj. Tom-e²nt-o²s(os)'u²l(u⁴l)-u³s-(u⁴s). Covered with a short delicate tomentum. [α, 35.]

TOMENTUM (Lat.), n. n. Tom-e²nt'u³m(u⁴m). Fr., *t.* Ger., *Filz, Filzüberzug* (1st def.). 1. In botany, a dense, more or less matted pubescence. [α, 35.] 2. The shaggy mass constituted by the villi of the chorion. [A, 45.]—**T. cerebri.** The inner surface of the pia. [L.]

TOMIPAROUS, adj. To²m-i²p'a²r-u³s. From τόμος, a cut, and *parere*, to bring forth. Fr., *tomipare.* Of plants, reproducing by the separation of parts. [α, 35.]

TOMIS (Lat.), n. f. Tom(to²m)'i²s. Gen., *tom'idos* (*-idis*). Gr., τομίς (from τέμνειν, to cut). See SCISSORS.

TOMIUM (Lat.), n. n. Tom(to²m)'i²-u³m(u⁴m). From τομός, cutting. The cutting edge of either mandible of a bird. [L, 221.]

TOMOGYNIA (Lat.), n. n. Tom(to²m)-o(o³)-ji²n(gu⁶n)'i²-a³. From τομός, cutting, and γυνή, a woman. Of Richard, the gymnosperms. [α, 35.]

TOMOMANIA (Lat.), n. f. Tom(to²m)-o(o³)-man(ma³n)'i²-a³. From τομή, a cutting, and μανία, madness. Fr., *tomomanie, bistourimanie* (1st def.). Ger., *Schneidesucht.* 1. A mania for performing surgical operations. [L, 50 (α, 14).] 2. A mania for being operated on for purely imaginary ailments. ["Rev. de laryng. et d'otol.," Dec., 1892.]

TOMOTOCIA (Lat.), n. f. Tom(to²m)-o(o³)-tos(to²k)'i²-a³. From τομή, a cutting, and τόκος, childbirth. Fr., *tomotocie.* See *Cæsarean* OPERATION.

TON (Ger.), n. Ton. See TONE and SOUND.—**Eigent'.** The timbre peculiar to each individual voice. [K, 16.]—**Herztöne.** See *Heart*-SOUNDS.—**Pulmonalt'.** See *Vesicular* MURMUR and *Respiratory* MURMUR.—**T'taubheit.** Inability to hear particular sounds. [L, 57 (α, 14).]

TONALITÉ (Fr.), n. To-na³-le-ta. Pitch in percussion.

TONCA, n. To²n²k'a³. See *Tonka* BEAN.

TONCIC ACID, n. To²n'si²k. See COUMARIN.

TONCO, n. To²n²k'o. See *Tonka* BEAN.

TONE, n. Ton. Gr., τόνος (from τείνειν, to stretch). Lat., *tonus.* Fr., *ton.* Ger., *Ton, Spannung* (1st def.). 1. A distinct definite sound ; also the character or quality of a sound. 2. The normal state of tension in healthy tissues ; in physiology, the normal contraction of the arteries.—**Harmonic t.** See HARMONIC, n.—**Reflex t.** See *Reflex* TONUS.

TÖNEND (Ger.), adj. Tu⁶n'e²nd. See SONOROUS.

TONGA, n. To²n²'ga³. 1. A drug prepared in the Fiji Islands from the bark, leaves, and fibres of *Rhaphidophora vitensis, Premna taitensis,* etc. It has been recommended in neuralgia. [α, 35.] 2. See under DATURA *stramonium.*

TONGINE, n. To²nj'en. A volatile alkaloid contained in tonga (1st def.). [A, 270 (α, 48).]

TONG-PANG-CHONG (Chin.), n. The *Rhinacanthus communis,* also a drug prepared from its root and leaves. [B, 270 (α, 48) ; α, 35.]

TONGRES (Fr.), n. To²n²-gr'. A place in the province of Limburg, Belgium, where there is a gaseous chalybeate spring. [α, 14.]

TONGUE, n. Tu³n². Gr., γλῶσσα. Lat., *lingua.* Fr., *langue.* Ger., *Zunge.* A muscular mass attached to the floor of the mouth and susceptible of protrusion from that cavity. It takes part in sucking, mastication, and articular speech, and the mucous membrane covering its upper surface is the seat of the organs of taste. —**Adherent t.** A t. pathologically attached by folds of mucous membrane to the floor and sides of the mouth. [α, 34.]—**Bifid t.** A t. having a longitudinal fissure that divides the fore part into two equal parts. [α, 34.]—**Black t.** 1. See GLOSSOPHYTIA (1st def.). 2. See *Epidemic erysipelatous* FEVER.—**Dotted t.** See *Stippled t.* —**Earthy t.** A t. on which there are white, dry, and rough deposits of calcareous matter. [α, 34.]—**Fish-t.** In dentistry, an instrument resembling the t. of a fish, formerly used in extracting the wisdom teeth. [α, 34.]—**Geographical t.** A t. affected with a serpiginous epithelial affection (*e. g.*, leukoplakia) that makes it look like a map. [α, 34.]—**Hairy t.** See TRICHOGLOSSIA.—**Parrot t.** A black, shrunken t. that can not be protruded, because it catches behind the lower teeth, observed in typhus fever. [α, 34.] —**Plastered t.** A coated t. in which the coat is recent and superabundant. [α, 34.]—**Shaggy t.** A furred t. having the papillæ elongated by horny epithelium. [α, 34.]—**Split t.** See BIFID.—**Stippled t.** Of W. H. Dickinson, a t. in which the papillæ are separately capped each with a minute white patch of epithelium. [α, 34.]—**Strawberry t.** A t. that is hyperæmic and shows fungiform papillæ, as in scarlet fever. [α, 34.]—**T. holder.** See *T.* DEPRESSOR.—**Wooden t.** See ACTINOMYCOSIS.

TONGUE-TIE, n. Tu³n²'ti. Fr., *soubrelangue.* See ANKYLOGLOSSUM (1st def.).

TONGUE-TIED, adj. Tu³n²'tid. Ger., *mundfaul.* Affected with ankyloglossum. [α, 48.]

TONIC, adj. To²n'i²k. Gr., τονικός (from τείνειν, to stretch). Lat., *tonicus.* Fr., *tonique.* Ger., *tonisch.* 1. Possessing the property of maintaining or promoting the tone of the system ; as a n., a drug possessing that property. 2. Characterized by continuous contraction (said of muscular spasm). [D ; α, 48.]

TONICITY, n. To²n-i²s'i²t-i². Fr., *tonicité.* Ger., *Tonicität.* The condition of a tissue, organ, etc., in relation to tone, especially its normal elasticity. [α, 48.]

TONKA, n. To²n²k'a³. Fr., *t.* Ger., *T'bohnen.* See *Tonka* BEAN.—**T'stearoptene.** See COUMARIN.

TÖNNISSTEIN (Ger.), n. Tu⁵n'ni²s-stin. A place in the Rhine province, Prussia, where there is a gaseous, alkaline, and saline spring. [L, 49, 57 (α, 14).]

TONOMETER, n. To²n-o²m'e²t-u⁵r. From τόνος, tension, and μέτρον, a measure. Fr., *tonomètre.* Ger., *T.* An instrument for estimating tension, especially the tension of the eyeball or the pressure of the ventricles. [K.]—**Dors and Lecoultre's t.** A t. constructed on the same principle as Hamer's t., but having the position of the peg regulated by a screw. The spiral spring is replaced by a straight steel spring, which is not very long, so that the tension rapidly increases with the deep pushing of the peg. [F.]—**Graefe's t.** A t. consisting of a small rod which is pressed against the eye by means of a loaded lever. A scale shows the degree to which the peg or style can overcome the tension of the eye with various degrees of loading. [F.]—**Hamer's t.** A t. consisting of a metallic tube out of which a peg or style projects. The latter is connected with a wound-up watch-spring, so that by pressing upon the eye it has to overcome the constantly increasing tension. [F.]—**Monnik's t.** A modification of Hamer's t. in which the immovable tube is replaced by two pegs, which can be pushed in with the slightest possible friction. The two pegs act together upon an index which shows on a dial-plate the change in position of the two pegs. A second index moves with the middle peg, which is under the increasing pressure of a short spring. [F.]—**Roy's t.** A t. for estimating the varying pressure of the ventricles during contraction and dilatation. It consists essentially of an air-tight tube containing oil, in which works a cylinder carrying a registering index. [K, 19.]—**Verlaan's t.** A t. consisting of a tube in which three isolated pegs can be pushed in or out. The middle peg is connected with a spiral spring the tension-power of which increases with the pressure. The two outer pegs may be moved with the slightest possible friction, and carry scales which run on a vernier connected with the middle peg. [F.]—**Weber's t.** A t. consisting of a peg which acts with increasing spring power on the sclerotic until its curvature to a certain extent is flattened to a plane. [F.]

TONOPSYCHAGOGIA (Lat.), n. f. Ton(to²n)-o²ps-ik(u⁶ch²)-a²g(a³g)-oj(og)'i-a³. From τόνος, a tone, ψυχή, the mind, and ἀγωγή, a leading. Fr., *tonopsychagogie.* The characteristic action of certain sounds on the mind. [L, 50 (α, 14).]

TONSIL, n. To²ns'i²l. Gr., ἀμυγδάλη, παρίσθμιον. Lat., *tonsilla, tonsillum, amygdala.* Fr., *tonsille, amygdale.* Ger., *Tonsille, Halsdrüse, Mandel.* A prominent body situated (one on each side) between the pillars of the fauces, about half an inch long and a third of an inch wide and thick. On its free surface are numerous openings leading into lymphoid crypts, between which are a number of lymph follicles together with lymphoid tissue. [L, 31, 332.]—**Cerebellar t's.** See AMYGDALÆ *cerebelli.*—**Luschka's t.** See *Pharyngeal t.*—**Palatine t.** See *T.*—**Pharyngeal t.** Lymphoid tissue on the posterior superior wall of the pharynx, limited on each side by the Eustachian tube. [L, 31.]

TONSILLA (Lat.), n. f. To²ns-i²l'la³. See TONSIL.—**Tonsillæ cerebelli.** See AMYGDALÆ *cerebelli.*—**T. palatina.** See TONSIL. —**T. pendula.** A pedunculated tonsil.—**Tonsillæ pestilentes.** See *Malignant* ANGINA.—**T. tubalis Gerlachii.** See *Pharyngeal* TONSIL.—**T. tubaria.** Ger., *Tubenmandel.* Lymph follicles in the cartilaginous portion of the Eustachian tube. [L. 332.]

TONSILLAR, TONSILLARY, adj's. To²ns'i²l-a³r, -ar-i². Lat., *tonsillaris* (from *tonsilla*, a tonsil). Fr., *tonsillaire.* Ger., *tonsillar.* Pertaining to the tonsils. [C.]

TONSILLE (Fr., Ger.), n. To²n²-sel-y', ton-zi²l'le². See TONSIL.

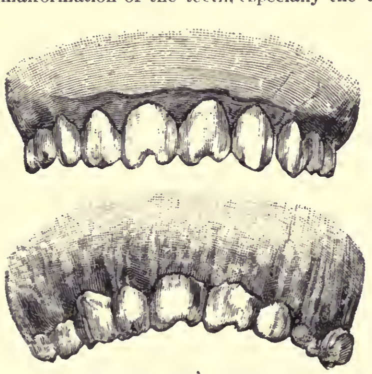
TONSILLITIC, adj. To²ns-i²l-i²t'i²k. Pertaining to amygdalitis.

TONSILLITIS (Lat.), n. f. To²ns-i²l-li(le)'ti²s. Gen., *-il'idos* (*-idis*). Fr., *tonsillite.* See AMYGDALITIS.

TONSILLOTOME, n. To²ns'i²l-o-tom. From *tonsilla*, a tonsil, and τέμνειν, to cut. Ger., *Tonsillotom.* See AMYGDALOTOME.—**Billings's t.** A t. with a guillotine blade and a sharp vulsella which slides along the shaft for holding the piece amputated. [E.] See cut under AMYGDALOTOME.—**Hamilton's t.** A t. provided with a sharp forceps for holding the part, which does not slide along the shaft but is simply attached to it. [E.]—**Mackenzie's t.** A t. in which the knife-edge is pushed against the tonsil by the thumb of the hand holding the instrument. [E.]—**Mathieu's t.** A t. provided with a two-pronged spear sliding along the shaft. [E.]—**Tiemann's t.** A t. in which both blade and forceps are worked simultaneously by closing or opening the handles of the instrument. [E.]

TONSILLOTOMY, n. To²n-si²l-o²t'o-mi². See AMYGDALOTOMY.

TONSILLUM (Lat.), n. n. To²ns-i²l'lu³m(lu⁴m). See TONSIL.



TONSURANS (Lat.), adj. To²ns-u²r(ur)'a²nz(a³ns). Gen., *-ant'is.* From *tondere*, to shear. Fr., *tonsurant.* 1. Causing baldness (used chiefly in terms relating to parasitic skin diseases). [G.] 2. In botany, glabrous from loss of pubescence. [α, 35.]

TONUS (Lat.), n. m. Ton(to²n)'u³s(u⁴s). Gr., τόνος (from τείνειν, to stretch). Ger., *T.* See TONE.—**Reflex t.** Of Brondgeest, a slight contraction observed in the muscles of one leg of a decapitated frog when the sciatic nerve is divided on the opposite side ; due to the reflex irritation conducted through the intact sensory nerves of the wounded limb. [K, 16.]—**Schliessungst'** (Ger.). See GALVANOTONUS.—**T. trismus.** See TRISMUS.

TOOHUTIA, n. See DENGUE.

TOOTH, n. Tuth. Pl., *teeth.* Gr., ὀδούς. Lat., *dens.* Fr., *dent.* Ger., *Zahn.* 1. A hard bone-like organ implanted in man and most

mammals, in the inferior and superior maxillæ, which serves for the mastication of food. It consists of a central cavity containing t.-pulp, dentin, enamel, and cement. In many lower vertebrates they are fixed in the bones surrounding the mouth. [L.] Cf. *Dental* FORMULA. 2. In botany, any small marginal lobe. [*a*, 35.]—**Anterior molar teeth.** See *Bicuspid teeth.*—**Auditory teeth (of Huschke).** Cylindrical horizontal processes on the labium vestibulare. [*a*, 34.]—**Back teeth.** See *Molar teeth.*—**Barred t.** See DENT *barrée.*—**Bicuspid teeth.** The teeth in each jaw that are placed next the canine teeth. Their crowns are compressed in front and behind, and are convex on the outer and inner sides. They have two points, or cusps, whence the name. [C.]—**Butter-teeth.** See *Incisor teeth.*—**Canine teeth, Carnassial teeth.** Fr., *dents angulaires* (ou *concïdes*). Ger., *Eckzähne, Spitzzähne.* Four teeth, one above and one below on each side, next to the lateral incisors. They are long and strong, with a thick conical crown, convex in front and concave behind, with one single central point. [C.]—**Chisel teeth.** The incisor teeth of rodents. [L.]—**Celliform teeth.** See *Setiform teeth.*—**Complicated teeth.** Fr., *dents compliqués.* Teeth in which the crown consists of alternate layers of cement and enamel. [L.]—**Compound t.** See DENTS *agrégées* and DENTS *composées.*—**Conical teeth.** Teeth that are modifications of a cone in shape. [Owen (L).]—**Convulsion t.** See *Tidal-mark t.*—**Craggy teeth.** Irregular projections of dentin on the t. giving them a crag-like appearance. They are not necessarily significant of any diathesis. [*a*, 34.]—**Cuticular teeth.** Teeth formed from the ecderon. [A, 12.]—**Deciduous teeth.** Teeth which are shed, especially those of the first dentition. [L.]—**Dentinal teeth.** Teeth, such as those in man and most vertebrates, in which the main part is composed of dentin; distinguished from t.-like structures composed mostly of a horny substance. [J, 35.]—**Eighteen-year molar t.** The molar (or wisdom t.) which makes its eruption between the seventeenth and the twenty-fifth year. [L.]—**Elephant's t.** See DENS *elephantis.*—**Eye teeth.** Fr., *œillères.* Ger., *Kronzähne.* The two upper canine teeth. [C.]—**False molar teeth.** See *Bicuspid teeth.*—**Fore-teeth, Front teeth.** See *Incisor teeth.*—**Gastric teeth.** Calcareous nodules in the stomach of crustaceans. [L.]—**Greater molar teeth.** See *Molar teeth.*—**Gymnosomatous teeth.** See DENTS *gymnosomes.*—**Honeycombed teeth.** Teeth in which there are circumscribed areas of decay and deficient dentin development, causing a honeycombed appearance. [*a*, 34.]—**Horny teeth.** See under *Dentinal teeth.*—**Huschke's teeth.** See *Auditory teeth.*—**Hutchinsonian (or Hutchinson's) teeth.** A malformation of the teeth, especially the upper central incisors, supposed to be peculiar to children having hereditary syphilis, in which the teeth are short, narrow from side to side at their edges, very thin, and displaying a central cleft on their free edge. [*a*, 34.]—**Incisor teeth.** Lat., *dentes sectorii.* Ger., *Schneidezähne.* The four median teeth of each jaw, having single roots and wide, thin, chisel-like cutting edges. [L.]—**Laniary teeth.** See *Canine teeth.*—**Lesser molar teeth.** See *Bicuspid teeth.*—**Milk molar teeth.** The molar teeth of the first dentition.

HUTCHINSON'S TEETH.

[L.]—**Maxillary teeth.** The teeth that are implanted in the inferior or superior maxillæ. [L.]—**Milk teeth.** Lat., *dentes infantiles.* Ger., *Milchzähne.* Those teeth which appear in early childhood, to be replaced at various ages by the permanent teeth. They are twenty in number, five in the forward part of each side of each maxilla, as follows: Two molars, one canine, and two incisors. [C.]—**Molar t., Multicuspidate t., Multicuspid t.** Lat., *mylodus.* Ger., *Mahlzahn, Kauzahn, Backenzahn.* A t. having more than one root and a rounded quadrangular crown with several cusps. In adult dentition there are (including the bicuspids) ten molar teeth in each jaw. [L.]—**Palatine teeth.** Teeth attached to the palate bones. [L.]—**Pectinate teeth.** Teeth with the edges notched so as to resemble a comb. [L.]—**Pegged (or Peg-shaped, or Peg-top) teeth.** Teeth, observed in various diatheses, in which the loss of enamel and exposure of the dentin present a series of small peg-like excrescences. [*a*, 34.]—**Permanent molar teeth.** The six-year, twelve-year, and eighteen-year molar teeth. [L.]—**Permanent teeth.** See *Second teeth.*—**Pharyngeal teeth.** Teeth situated in the pharynx or attached to its osseous framework. [L.]—**Pitted teeth.** Teeth in which, owing to deficient development of dentin or enamel, pits occur on the surface. [*a*, 34.]—**Posterior molar teeth.** See *Molar teeth.*—**Prehensile teeth.** In certain animals, teeth that grasp and retain objects, but are of secondary importance in mastication. [L.]—**Premolar teeth.** See *Bicuspid teeth.*—**Principal teeth.** The first molar teeth of man, whose homologues De Blainville assumed to trace through lower animals. [L, 14.]—**Pug teeth.** See *Canine teeth.*—**Rasp teeth.** Sharp, conical teeth closely set so as to resemble the surface of a rasp or file. [L.]—**Scalpriform teeth.** See *Chisel teeth.*—**Screw-driver teeth.** See *Hutchinson's teeth.*—**Second teeth.** The teeth of the second dentition, normally thirty-two in number. [L.] Cf. *Dental* FORMULA.—**Sectorial teeth.** The bicuspid teeth of the *Carnivora.* [L, 341 (*a*, 27).]—**Serrated teeth.** Teeth with notched edges, like a saw. [L.]—**Setiform teeth.** Teeth shaped like fine bristles. [L.]—**Simple teeth.** Of Cuvier, teeth forming a cone of nearly even or only slightly curved surface, and having cement or enamel only on the outer peripheric portion, as in man and dogs. [L, 158 (*a*, 14).]—**Six-year molar t.** The molar t. which makes its eruption about the seventh year. [L.]—**Stomach teeth.** See *Canine teeth.*—**Superadded teeth.** The six back teeth on either jaw. [C.]—**Syphilitic teeth.** See *Hutchinson's teeth.*—**Teeth of succession.** The teeth which take the places of the milk teeth. [L.]—**Temporary molar teeth.** The molar teeth of the first dentition. [L.]—**Temporary teeth.** See *Milk teeth.*—**Tidal-mark t.** A malformed t., observed in epileptics, in which the dentin projects beyond the enamel edge, resembling tide-marks on the sand. ["N. Y. Med. Jour.," Aug. 13, 1887, p. 195 (*a*, 34).]—**T'bone.** An old term for dentin. [J.]—**True molar teeth.** See *Molar teeth.*—**Twelve-year molar t.** The molar t. which makes its eruption during the thirteenth year. [L.]—**Vertebral teeth.** In certain snakes, inferior spinous processes of several cervical vertebræ, covered with cement. [Owen (L).]—**Villiform teeth.** Fr., *dents en velour.* See *Pegged teeth.*—**Vomerine teeth.** Teeth attached to the vomer. [L.]—**Warty teeth.** Teeth in which the tissues are hypertrophied and folded into an irregular mass. [E, 12.]—**Wisdom teeth.** Lat., *dentes serotini.* The most posterior of the molar teeth, which appear about the eighteenth year. [L.]

TOOTHACHE, n. Tuth'ak. See ODONTALGIA.—**T.-root.** See DENTARIA *diphylla.*—**T.-tree.** 1. See ARALIA *spinosa.* 2. The *Xanthoxylum fraxineum.* [*a*, 35.]

TOOTHED, adj. Tuth^{2}d. See DENTATE.

TOOTHEDGE, n. Tuth'e^{2}j. See HÆMODIA (1st def.).

TOOTHWORT, n. Tuth'wu^{5}rt. See LATHRÆA, DENTARIA, CAPSELLA *bursa pastoris*, and PLUMBAGO *scandens.*

TOOT-PLANT, TOOT-POISON, n's. Tut'pla^{3}nt, -poiz'n. See CORIARIA *ruscifolia.*

TOPÆSTHESIA (Lat.), n. f. To^{2}p-e^{2}s(a^3-e^{2}s)-thez(thas)'i^2-a^3. From τόπος, a place, and αἴσθησις, sensation. The capacity for discerning locality by the touch. [*a*, 48.]

TOPHACEOUS, adj. To^{2}f-a'shu^{3}s. Lat., *tophaceus.* Fr., *tophacé.* Consisting of, pertaining to, or resembling tophi. [D, 1.]

TOPHUS (Lat.), n. m. Tof(to^{2}f)'u^{3}s(u^{4}s). Fr., *tophe.* Ger., *Tuff, Kalkbeule.* 1. A nodular gouty deposit of sodium urate, most common in the knuckles. [D, 1.] 2. See CHALAZION.—**Syphilitic t.** See SYPHILOMA.

TOPHYPERIDROSIS (Lat.), n. f. Tof(to^{2}f)-ip(u^{5}p)-u^{5}r(e^{2}r)-i^{2}d(ed)-ros'i^{2}s. Gen., *-ros'eos (-is).* From τόπος, a place, ὑπέρ, in excess, and ἱδρώς, perspiration. Local hyperidrosis. [L, 50 (*a*, 14).]

TOPICAL, adj. To^{2}p'i^2-k'l. Gr., τοπικός (from τόπος, a place). Lat., *topicus.* Fr., *topique.* Ger., *topisch.* Local. [E.]

TOPICUS (Lat.), adj. To^{2}p'i^{2}k-u^{3}s(u^{4}s). See TOPICAL; as a n., in the n., *topicum*, a remedy directly applied locally. [A, 326 (*a*, 21).]

TOPINAMBOUR (Fr.), n. To-pe-na^{3}n^2-bur. See HELIANTHUS *tuberosus.*

TOPIOS (Lat.), n. m. Top(to^{2}p)'i^2-o^{2}s. From τόπος, a place, and ἰός, a poison. Of Ritgen, miasm. [L, 50 (*a*, 14).]

TOPIQUE (Fr.), adj. To-pek. See TOPICAL; as a n., a local application.

TÖPLITZ (Ger.), n. Tu^{5}p'li^{2}ts. See TEPLITZ-SCHÖNAU.

TOPOALGIA (Lat.), n. f. Top(to^{2}p)-o(o^3)-a^{2}lj(a^{3}lg)'i^2-a^3. From τόπος, a place, and ἄλγος, a pain. Of P. Blocq, a local pain due to general disease. [*a*, 34.]

TOPOGRAPHICAL, adj. To^{2}p-o-gra^{2}f'i^2-k'l. Lat., *topographicus.* Fr., *topographique.* Pertaining to topography. [*a*, 48.] See *T.* ANATOMY.

TOPOGRAPHY, n. To^{2}p-o^{2}g'ra^{2}f-i^2. Lat., *topographia* (from τόπος, a place, and γράφειν, to write). Fr., *topographie.* Ger., *Topographie, Ortsbeschreibung.* See *Topographical* ANATOMY.

TOPOLOGY, n. To^{2}p-o^{2}l'o-ji^2. From τόπος, a place, and λόγος, understanding. Fr., *topologie.* Ger., *Topologie.* 1. See *Topographical* ANATOMY. 2. Of Küneke, the relative position of the presenting part of the fœtus in regard to the pelvic canal. [A. 91.]

TOPONARCOSIS (Lat.), n. f. To^{2}p-o(o^3)-na^{3}rk-os'i^{2}s. Gen., *-cos'eos (-is).* From τόπος, a place, and νάρκωσις, a benumbing. See *Local* ANÆSTHESIA.

TOPONEUROSIS (Lat.), n. f. To^{2}p-o(o^3)-nu^{2}r-os'i^{2}s. Gen., *-ros'eos (-is).* From τόπος, a place, and νεῦρον, a nerve. Fr., *toponévrose.* Ger., *topisches Nervenleiden.* A topical neurosis. [L, 50.]

TOPONYMY, n. To^{2}p-o^{2}n'i^{2}m-i^2. From τόπος, a place, and ὄνυμα, a name. The terminology of the local relations of bodily organs. [*a*, 48.]

TOPOPHOBIA (Lat.), n. f. To^{2}p-o(o^3)-fob(fo^{2}b)'i^2-a^3. From τόπος, a place, and φόβος, fear. Fr., *topophobie.* Ger., *Topophobie.* A morbid fear of particular places. [D.]

TOPUSZKO, n. A place in Croatia where there are hot gaseous mineral springs. [L, 30, 49, 57 (*a*, 14).]

TOQUE (Fr.), n. Tok. The genus *Scutellaria.* [*a*, 35.]

TORCULAR (Lat.), n. n. To^{2}rk'u^{2}l(u^{4}l)-a^{3}r. Gen., *-ar'is.* From *torquere*, to twist. 1. A press for making oil or wine, also an oil-cellar. [A, 312 (*a*, 48).] 2. See TOURNIQUET.—**T. Herophili.** Fr., *pressoir d'Hérophile.* Ger., *Kelter.* An irregularly shaped venous sinus over the internal occipital protuberance to which the longitudinal, straight, posterior occipital, and lateral sinuses converge. [L.]

TORCULUM (Lat.), n. n. To^{2}rk'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). From *torquere*, to turn. See TOURNIQUET.—**T. volvens.** Of Rhazes, see COCHLEA (4th def.).

TORDA, n. A place in Hungary where there is a saline spring.

TORDYLIUM (Lat.), n. n. To^{2}rd-i^{2}l(u^{6}l)'I^2-u^{3}m(u^{4}m). Gr., τορδύλιον, τόρδυλον. Fr., *tordyle*. Ger., *Zirmet*. A genus of the *Peucedaneæ*. [α, 35.]—**T. minus, T. officinale.** Fr., *séséli de Candie* (ou *de Crête*). Ger., *gebräuchlicher Zirmet, Drehkraut, kretischer Sesel, Bergkümmel, Rosenkümmel*. Heartwort; a species indigenous to southern Europe, England, and the Orient. The long, thin fibrous root and the yellowish-white fruits were formerly official as *radix* et *semen tordylii* (seu *tordylii minoris*, seu *seseli* [seu *seseleos*] *cretici*, seu *montani*). The fruits are mildly aromatic and were used especially in urinary diseases and amenorrhœa. [α, 35.]

TORENIA (Lat.), n. f. Tor-en(an)'i^2-a^3. Fr., *torène, torénie*. An East Indian and Chinese genus of scrophulaceous herbs. [α, 35.]—**T. asiatica.** A species the sap of the leaves of which is used in gonorrhœa, and the entire plant as an application in skin diseases. [α, 35.]—**T. crustacea.** A species used externally in ulcers, skin diseases, etc. [α, 35.]—**T. hirsuta.** A species used in gonorrhœa and externally in abscesses. [α, 35.]—**T. minuta.** A species the sap of which is emetic and purgative. [α, 35.]

TORF (Ger.), n. To^{2}rf. See PEAT.—**T'mull.** Powdered peat, used as a dressing. [L, 57 (α, 14).]

TORFMOOS (Ger.), n. To^{2}rf'mos. See SPHAGNUM.

TORMEN (Lat.), n. n., sing. of *tormina* (*q. v.*). To^{2}rm'e^{2}n. Gen., *tor'minis*.

TORMENTIL, n. To^{2}rm'e^{2}nt-i^{2}l. The *Potentilla tormentilla, Geranium maculatum*, and *Lamium purpureum*. [α, 35.]

TORMENTILLA (Lat.), n. f. To^{2}rm'e^{2}nt-i^{2}l'la^3. 1. The *Potentilla t.* 2. A section of the genus *Potentilla*. [α, 35.]—**Decoctum tormentillæ** [Belg. Ph.]. A preparation made by macerating 1 part of t.-root for an hour with water enough to make 20 parts after boiling a quarter of an hour and straining. [B, 95 (α, 38).]—**Extractum tormentillæ** [Belg. Ph.]. A thick extract prepared with cold water from the rhizome of t. [B, 95 (α, 38).]—**Radix tormentillæ.** The root of *Potentilla t.* [α, 35.]—**Radix tormentillæ pulverata.** T.-root crushed, dried at 40° C., powdered and sifted through a No. 120 silk sieve [Fr. Cod.] (through a 1,000-mesh sieve, leaving no residue [Swed. Ph.]). [B, 95 (α, 38).]—**T. erecta, T. officinalis.** See POTENTILLA *t.*

TORMENTILLE (Fr.), n. Tor-ma^{3}n^2-tel-y'. See POTENTILLA *tormentilla*.—**Poudre de t. (racine).** See *Radix* TORMENTILLÆ *pulverata*.

TORMENTUM (Lat.), n. n. To^{2}rm-e^{2}nt'u^{3}m(u^{4}m). From *torquere*, to twist. A violent pain. [L, 50 (α, 14).]—**T. acutum.** Stercoraceous vomiting. [L, 50 (α, 14).]—**Tormenta intestinorum.** See TORMINA *alvi*.

TORMINA (Lat.), n. n., pl. of *tormen*. To^{2}rm'i^{2}n-a^3. Gen., *tormi'inum*. From *torquere*, to twist. Griping pain. [D.]—**T. alvi.** Colic. [L, 50 (α, 14).]—**T. Celsi.** Dysentery. [L, 50 (α, 14).]—**T. hysterica.** Hysterical pain. [L, 50 (α, 14).]—**T. parturientium.** False labor pains. [L, 50 (α, 14).]—**T. post partum.** The after-pains of parturition. [L, 50 (α, 14).]—**T. ventriculi nervosa.** Of Kussmaul, a gastroneurosis causing symptoms like those of gastrectasia. [A, 319 (α, 34).]

TORNACULUM (Lat.), n. n. To^{2}rn-a^{2}k(a^{3}k)'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). From *torquere*, to twist. See TOURNIQUET.

TORNELIA (Lat.), n. f. To^{2}rn-el(e^{2}l)'i^2-a^3. The genus MONSTERA. [α, 35.]

TOROSE, adj. Tor'os. Lat., *torosus* (from *torus*, a protuberance). Ger., *wulstig, torös*. 1. Bulging. [α, 48.] 2. Cylindrical with swellings at intervals. [α, 35.]

TORPA, n. A place in the province of Göteborg, Sweden, where there is a strong saline spring. [L, 57 (α, 14).]

TORPEDO (Lat.), n. f. To^{2}rp-ed(ad)'o. Gen., *-ped'inis*. From *torpere*, to be stiff. A genus of the *Torpedinidæ*, or electric rays, which are a family of the *Batoidei*. These fishes have an electric organ composed of hexagonal prisms situated on each side between the pectoral fins and the head. [L, 30 (α, 14); L, 207.]

TORPID, adj. To^{2}rp'i^{2}d. Gr., ναρκώδης. Lat., *torpidus*. Fr., *torpide*. Ger., *erstarrt*. Sluggish, inactive, numb. [D, 20.]

TORPIDITY, TORPOR, n's. To^{2}rp-i^{2}d'i^{2}t-i^2, to^{2}rp'o^{2}r. Gr., νάρκωσις. Lat., *torpor* (from *torpere*, to be stiff or numb). Fr., *torpeur, engourdissement*. Ger., *Erstarrung*. 1. Numbness, drowsiness, sluggishness; insensibility to stimuli; functional inactivity. 2. Deficient susceptibility to the various influences and irritants that act more or less continuously on the organism. [D, 3.]

TORQUAY, n. To^{2}r-ke'. A sea-bathing and climatic resort in Devonshire, England. [L, 30, 37, 49, 57 (α, 14).]

TORRE DE SAN-MIGUEL (Sp.), n. To^{2}r'ra da sa^{3}n-meg-u-e^{2}l'. A place in Saragossa, Spain, where there is a saline and sulphurous spring. [L, 49 (α, 14).]

TORREFACTION, n. To^{2}r-e^2-fa^{2}k'shu^{3}n. From *torrefacere*, to dry by heat. Fr., *torréfaction*. Ger., *Dörrung, Röstung*. Roasting, drying by artificial heat. [L, 30, 41, 49, 50 (α, 14).]

TORRES (Sp.), n. To^{2}r're^{2}s. A place in the province of Madrid, Spain, where there is a sulphurous spring. [L, 57 (α, 14).]

TORREYA (Lat.), n. f. To^{2}r'i^2-a^3. From *Torrey*, an American botanist. Fr., *t.* Stinking-yew; a genus of evergreen trees of the *Taxeæ*. [α, 35.]—**T. californica.** Wild (or stinking, or Californian) nutmeg (tree). The leaves emit an unpleasant odor if burned or bruised. The nutmeg-like fruit tastes like turpentine. [α, 35.]—**T. grandis.** Large stinking-yew, the *kaya* of China. The nuts yield a nutritious oil. [α, 35.]—**T. nucifera.** A Japanese species. The kernels are astringent. [α, 35.]

TORRICELLIAN, adj. To^{2}r-i^2-che^{2}l'i^2-'n. Investigated by or named from E. Torricelli, an Italian mathematician. [α, 48.]

TORRUBIA (Lat.), n. f. To^{2}r-rub'i^2-a^3. A genus of *Fungi*, of the *Sphæriacei*. [B, 61.]—**T. sinensis.** A species developed on dead caterpillars; highly valued as a tonic in China, and recommended in constipation, impotence, coryza, etc. [α, 35.]

TORSION, n. To^{2}r'shu^{3}n. Gr., στρέψις. Lat., *torsio* (from *torquere*, to twist). Fr., *t*. Ger., *Drehung, Umdrehen*. The act or process of twisting. [E.]—**Free t.** T. of the free end of a divided artery. [α, 34.]—**Limited t.** T. in which the artery is held, some distance from its end, with a forceps that limits the extension of the twisting. [α, 34.]—**T. of the umbilical cord.** A twisting of the cord to such a degree as to interfere with the flow of blood through its vessels.

TORSOCLUSION, n. To^{2}rs-o-klu^2'zhu^{3}n. From *torquere*, to twist, and *cludere*, to close. Acupressure (*q. v.*) by the second variety of the fifth method. [E.]

TORTELLE (Fr.), n. To^{2}rt-e^{2}l. Of the Fr. Cod., the leaves or the flowering plant of *Sisymbrium officinale*. [B, 95 (α, 38).]

TORTICOLLIS (Lat.), n. m. To^{2}rt-i^2-ko^{2}l'li^{2}s. From *tortus*, twisted, and *collum*, the neck. Fr., *torticolis*. Ger., *Schiefhals, Halsstarre, Krummhals, Halsverkrümmung*. Wry neck, a distortion of the neck which causes the head to be held awry. [α, 18, 29.]—**Intermittent t.** See *Spasmodic t.*—**Occipito-atloidian t.** Of Dally, a subluxation of the atlas on the occipital bone in such a way that the lateral masses are transverse to the vertical plane. [A, 520 (α, 29).]—**Ocular t.** Of Quignet, t. developed from inequality in the sight of the two eyes. [A, 520 (α, 29).]—**Spasmodic t.** T. due to a lesion of the spinal accessory nerve and characterized by recurrent transient contractions of the muscles of the neck and especially of the sterno-cleido-mastoid. [D, 70; L, 87 (α, 50).]

TORTILIS (Lat.), adj. To^{2}rt'i^{2}l-i^{2}s. From *torquere*, to twist. Fr., *tortile*. Twisted like a rope; also susceptible of twisting. [α, 35.]

TORTUE (Fr.), n. To^{2}r-tu^6. See ATHEROMA.

TORTULA (Lat.), n. f. To^{2}rt'u^{2}l(u^{4}l)-a^3. A genus of mosses. [α, 35.]—**T. muralis.** A European species considered astringent and used as a hæmostatic. *T. æstiva, T. ambigua* (*T. goettingensis*) and *T. pilosa* (*T. vernalis*) are varieties. [α, 35.]

TORTUOUS, adj. To^{2}rt'u^2-u^{3}s. Lat., *tortuosus* (from *tortus*, twisted). Fr., *tortueux*. Irregularly twisted, bent or twisted in different directions. [α, 35.]

TORULA (Lat.), n. f. To^{2}r'u^{2}l(u^{4}l)-a^3. Fr., *torule*. A genus of *Fungi* typical of a division (the *Torulaceæ* or *Torulacei*) of the *Coniomycetes* in which the entire plant is reduced to a chain of spores without a definite stroma. [α, 35.]—**T. cerevisiæ.** See SACCHAROMYCES *cerevisiæ*.—**T. fusidioides.** See CHALARA *fusidioides*.

TORULOSE, adj. To^{2}r'u^{2}l-os. Lat., *torulosus*. Fr., *toruleux*. Ger., *knorrig*. Torose; also slightly torose. [α, 35.]

TORULUS (Lat.), n. m. To^{2}r'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *torus* (*q. v.*). Fr., *torule*. A slight swelling or prominence.—**T. glandis.** See CORONA *glandis*.

TORUS (Lat.), n. m. Tor(to^{2}r)'u^{3}s(u^{4}s). Fr., *t*. Ger., *Wulst* (1st def.), *Blumenboden* (2d def.). 1. A swelling or prominence. [L, 50 (α, 48).] 2. In botany, the shortened stem on which the floral leaves are inserted. [α, 35.]—**T. manus.** See METACARPUS.—**T. marginalis.** Ger., *Randwulst*. A cerebral convolution. [I, 3 (K).]—**T. palatinus.** A protuberance found on the surface of the hard palate at the point of union of the intermaxillary and palatomaxillary sutures. ["Jahresbericht der gesammten Medicin," 1891, Bd. i, p. 7 (α, 50).]—**T. uteri.** A slight upward projecting elevation of the posterior wall of the uterus where the peritonæum is reflected upward. [L.]

TOTUM CARNOSUM (Lat.), n. n. Tot'u^{3}m(u^{4}m) ka^{3}rn-os'-u^{3}m(u^{4}m). See PANCREAS.

TOUCH, n. Tu^{3}ch. Gr., ἅψις. Lat., *tactus*. Fr., *tact* (1st def.), *toucher* (2d def.). Ger., *Tastsinn* (1st def.). *Gefühlsinn* (1st def.), *Touchiren* (2d def.). 1. The act, sense, or function of judging of the presence or character of external objects by means of direct contact. [K.] 2. A digital examination by the vagina.—**After-t.** A sensation which remains for a short time after the cessation of contact with an object. [K.]—**Double t.** Combined vaginal and rectal digital exploration. [α, 34.]—**Royal t.** Lat., *manus regalis*. The t. of a king, formerly in repute as a cure for scrofula (the "king's evil"). [α, 48.]

TOUCHING, n. Tu^{3}ch'i^{2}n^2. See TOUCH (2d def.).

TOUCH-ME-NOT, n. Tu^{3}ch'me-no^{2}t. The genus *Impatiens*. [α, 35.]

TOUCHWOOD, n. Tu^{3}ch'wu^{4}d. See AMADOU.

TOUFFE (Fr.), n. Tuf. See CÆSPES and FLOCCULUS (2d def.).

TOULEMA, n. See CANNA *starch*.

TOULOUCOUNIN, n. Tu-lu-kun'i^{2}n. Fr., *touloucounine*. A bitter principle contained in the bark of *Carapa guineensis*; a non-nitrogenous, amorphous, resinous mass. [B, 93 (α, 14).]

TOUMBOUTAY, n. See TETY.

TOUR (Fr.), n. Tur. A turn; a circular movement. [L, 41, 49 (α, 14).]—**T. de lune.** See *Periodic* OPHTHALMIA (2d def.).—**T. de maître.** Catheterism in which the instrument is introduced with the shaft between the legs until its point is arrested at the bulb of the urethra, when the handle is turned in a semicircle until it reaches a vertical position and is then at once depressed between the thighs, causing the point to pass through the prostatic urethra. [α, 34.]—**T. de reins.** A lumbar sprain. [α, 34.]—**T. de White.** White's dental drill. [α, 34.]

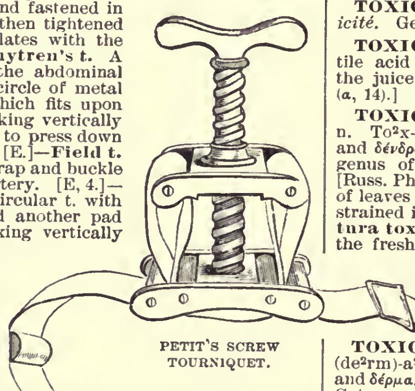
TOURBETTE (Fr.), n. Tur-be^{2}t. See SPHAGNUM.

TOURBILLON (Fr.), n. Tur-bel-yo^{2}n^2. A vortex. [α, 48.]—**T. vasculaire.** See VASA *verticosa*.—**T. vital.** Of Cuvier, the con-

stant interchange of nutritious and waste materials which occurs in the tissues. [K, 31.] Cf. METABOLISM.

TOURLOUROU-OIL, n. Tur-lu-ru'. Ger., *Tourlourouöl.* A fixed animal oil used as an embrocation in rheumatism (see under BIRGUS *latro*). [a, 35.]

TOURNANTÖL (Ger.), n. Turn-a^{3}nt'u^{6}l. See HUILE *tournante.*



TOURNEFORTIA (Lat.), n. f. Turn-fort'i^2-a^3. From J. P. de *Tournefort,* a French botanist. Fr., *pittonie* (2d def.), *tournefortie* (2d def.). 1. See ANTHOSPERMUM. 2. Of Linnæus, a genus of the *Heliotropieæ.* The *Tournefortieæ* are a division of the *Boragineæ.* [a, 35.]—**T. hirsutissima.** Fr., *herbe à chiques* (ou *à malingres*), *pittonie très velue.* A tropical American species of *T.* (2d def.). The leaves are used as a cataplasm to kill chigoes. The roots are diuretic. [a, 35.]—**T. umbellata.** A Mexican shrub used in fevers and as an application to tumors, ulcers, and skin lesions. [a, 35.]

TOURNESOL (Fr.), n. Tur-n'-so^{2}l. 1. See HELIOTROPIUM *europæum* and CHROZOPHORA *tinctoria.* 2. See LITMUS.—**Dutch t.** The *Lecanora tartarea* and *Roccella tinctoria.* [a, 35.]—**T. en drapeau.** The dye (litmus) obtained from *Chrozophora tinctoria.* [a, 35.]

TOURNESOLIA (Lat.), n. f. Tur-n'-sol'i^2-a^3. The genus *Chrozophora.* [a, 35.]

TOURNIOLE (Fr.), n. Tur-ne-ol. Paronychia affecting the base and sides of the nail and the neighboring skin.

TOURNIQUET, n. Tu^{6}rn'i^2-ke^{2}t. Fr., *t.* Ger., *T.*, *Aderpresse, Schraubenbinde.* An instrument for making continuous pressure upon a part, usually consisting of two metal plates which may be approximated or separated by a thumb screw, and of a strap connecting them and long enough to be buckled around the limb, together with a pad. The pad is placed over the vessel to be occluded, and fastened in place by the strap, which is then tightened by separating the metal plates with the thumb-screw. [E, 4.]—**Dupuytren's t.** A t. for making pressure on the abdominal aorta, consisting of a semicircle of metal with a pad on one end, which fits upon the spine, and a screw working vertically through the other end so as to press down another pad upon the aorta. [E.]—**Field t.** A t. consisting merely of a strap and buckle with a pad to go over the artery. [E, 4.]—**Hoey's clamp t.** A semicircular t. with a pad at one extremity and another pad at the end of a screw working vertically through the other extremity. [E, 4.]—**Lip t.** An instrument consisting of a piece of hard and polished steel, bent like the letter U, one arm having a vulcanite-covered oval steel plate attached to it, and a similar plate steadied by steel rods and moved by a central screw being connected with the other arm. ["Brit. Med. Jour.," 1865, i, 222 (a, 34).]—**Lister's t.** See *Hoey's clamp t.*—**Pancoast's abdominal t.** See *Skey's t.*—**Petit's screw-t.** An instrument consisting of a metal plate having on each lateral border two pivoted rollers, a similar plate having but one roller being superposed over the lower plate and separated from it by means of a screw; a band of webbing passes over the rollers that is fastened by means of a buckle and has a pad on it to place over the artery. [a, 34.]—**Signoroni's t.** A t. shaped like a horse-shoe with a pad at each end and a hand-screw at the joint on the centre of the bar. [E, 4.]—**Skey's t.** A t. shaped like a stirrup, with one pad on the foot-piece and the other on the end of a vertical hand-screw working through the top. [E, 4.]—**Tiemann's t.** A modification of Petit's t. by which a greater amount of pressure is concentrated upon the artery, while the circulation in the vein is not embarrassed. The pad is placed either horizontally or crosswise upon the vessel, and the strap, carried around the limb, is passed through two side-apertures in a metallic plate, after which the ends are drawn very tight and fastened upon protruding hooks. [E.]

PETIT'S SCREW TOURNIQUET.

TOURNIS (Fr.), n. Tour-ne. See GID.

TOURNOIEMENT (Fr.), n. Tur-nwa^3-ma^{3}n^2. See VERTIGO.

TOUS-LES-MOIS (Fr.), n. Tu-la-mwa^3. See CANNA *starch.*

TOUTE-ÉPICE (Fr.), n. Tut-a-pes. 1. The *Nigella sativa* or its seed. 2. The *Pimenta officinalis* or its berries. [a, 35.]

TOUX (Fr.), n. Tu. See COUGH and TUSSIS.—**T. auriculaire.** See *Ear* COUGH.—**T. cardiaque, T. cardiopathique.** A reflex cough due to heart disease. [a, 34.]—**T. convulsive.** See PERTUSSIS.—**T. d'oreille.** See *Ear* COUGH.—**T. éructante.** Cough with eructative paroxysms. [a, 34.]—**T. éteinte.** Cough without perceptible noise. [L, 87 (a, 50).]—**T. férine.** See TUSSIS *ferina.*—**T. grasse, T. humide.** See *Mucous* COUGH.—**T. intestinale.** Reflex cough due to intestinal trouble. [a, 34.]—**T. ovarique.** Reflex cough associated with ovarian disease. [a, 34.]—**T. pleurale.** Reflex cough due to pleural irritation. [a, 34.]—**T. qui houpe.** A provincial name for whooping-cough. [D.]—**T. sèche.** See *Dry* COUGH.—**T. splénique.** Reflex cough due to disease of the spleen. [a, 34.]—**T. sympathique.** Cough caused by reflex irritation of the pneumogastric nerve. [a, 34.]—**T. trachéale.** Cough due to tracheal irritation. [a, 34.]—**T. vermineuse.** Reflex cough due to intestinal worms. [a, 34.]

TOVOMITA (Lat.), n. f. To-vo(wo)-mit(met)'a^3. Ger., *Gelbfrucht.* A genus of tropical American clusiaceous plants. The *Tovomiteæ* are a section of the *Clusieæ.* [a, 35.]—**T. fructipendula.** A species found in the Peruvian Andes. The bark is used in medicine. [a, 35.]

TOW, n. To. Gr., στύπη. Lat., *stupa.* Fr., *étoupe.* Ger., *Werg.* The coarser part of flax or hemp. [a, 48.]

TOXA (Lat.), n. n. pl. To^{2}x'a^3. From τοξικόν, poison. Of Eisenmann, diseases produced by poisons. [L, 50 (a, 14).]

TOXÆMIA (Lat.), n. f. To^{2}x-em'(a^3'e^{2}m)-i^2-a^3. From τοξικόν, poison, and αἷμα, blood. Fr., *toxémie.* See *Blood*-POISONING.

TOXÆMIC, adj. To^{2}x-e^{2}m'i^{2}k. Fr., *toxémique.* Ger., *toxämisch.* Pertaining to or affected with toxæmia. [D.]

TOXALBUMIN, n. To^{2}x-a^{2}l-bu^2'mi^{2}n. Of Brieger and Fraenkel, any one of the toxic substances resulting from the action of the various bacilli on the albumins of the tissues, and resembling either serum-albumin or globulin. [a, 27.] Cf. *Toxic* ALBUMIN.

TOXIC, adj. To^{2}x'i^{2}k. From τοξικόν (see TOXICON). Fr., *toxique.* Ger., *toxisch.* 1. Pertaining to poisons. 2. Poisonous. [a, 48.]

TOXICÆMIA (Lat.), n. f. To^{2}x-i^{2}s(i^{2}k)-em'(a^3'e^{2}m)-i^2-a^3. Ger., *Toxicämie.* See *Blood*-POISONING.

TOXICANT, adj. To^{2}x'i^2-k'nt. From *toxicare,* to poison. Poisonous. [a, 48.]

TOXICATMICUS (Lat.), adj. To^{2}x-i^{2}k-a^{2}t(a^{3}t)'mi^{2}k-u^{3}s(u^{4}s). From τοξικόν, poison, and ἀτμός, vapor. Fr., *toxicatmique.* Containing or yielding poisonous vapors. [L, 50 (a, 14).]

TOXICATION, n. To^{2}x-i^{2}k-a'shu^{3}n. Lat., *toxicatio* (from *toxicare,* to poison). Fr., *t.* See POISONING.

TOXICHÆMATOSIS (Lat.), **TOXICHÆMIA** (Lat.), n's f. To^{2}x-i^{2}k(i^{2}ch^2)-e^{2}m(a^3-e^{2}m)-a^{2}t(a^{3}t)-os'i^{2}s, -em'(a^3'e^{2}m)-i^2-a^3. Gen., *-os'eos (-is), -æm'iæ.* Fr., *toxichématose.* See *Blood*-POISONING.

TOXICITY, n. To^{2}x-i^{2}s'i^{2}t-i^2. From τοξικόν, poison. Fr., *toxicité.* Ger., *Giftigkeit.* The property of being poisonous. [a, 48.]

TOXICODENDRIC ACID, n. To^{2}x-i^{2}k-o-de^{2}nd'ri^{2}k. A volatile acid forming, according to Maisch, the active principle of the juice of *Rhus toxicodendron,* acting as a vesicant. [B, 92, 93 (a, 14).]

TOXICODENDRON (Lat.), **TOXICODENDRUM** (Lat.), n's n. To^{2}x-i^{2}k-o(o^3)-de^{2}nd'ro^{2}n, -ru^{3}m(u^{4}m). From τοξικόν, poison, and δένδρον, a tree. 1. See RHUS *t.* 2. The genus *Schmidelia.* 3. A genus of the *Euphorbioceæ.* [a, 35.]—**Infusum toxicodendri** [Russ. Ph.]. A preparation made by pouring over 18 centigrammes of leaves of *Rhus t.* enough boiling water to make 30 grammes of strained infusion after 5 minutes' steaming. [B, 95 (a, 38).]—**Tinctura toxicodendri.** A tincture made by macerating 5 parts of the fresh leaves of *Rhus t.* with 6 of alcohol of sp. gr. 0·832 for eight days [Ger. Ph., 1st ed.] (5 parts of dried leaves with 50 of 70-per-cent. alcohol for five days [Russ. Ph.]), or by digesting the dry leaves with 5 times as much dilute alcohol for a week [Swiss Ph.]. [B, 95, 119 (a, 38).]—**T. capense.** See HYÆNANCHE *globosa.*

TOXICODERMATITIS (Lat.), n. f. To^{2}x-i^{2}k-o(o^3)-du^{6}rm-(de^{2}rm)-a^{2}t(a^{3}t)-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* From τοξικόν, poison, and δέρμα, the skin. Fr., *toxicodermite.* Ger., *Gifthautentzündung.* Cutaneous inflammation caused by a poison. [L, 50 (a, 14).]

TOXICODERMIE (Fr.), n. Tox-e-ko-de^{2}r-me. A skin disease due to the action of a poison.

TOXICODERMITIS (Lat.), n. f. To^{2}x-i^{2}k-o(o^3)-du^{6}rm(de^{2}rm)-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* See TOXICODERMATITIS.

TOXICOHÆMIA (Lat.), n. f. To^{2}x-i^{2}k-o(o^3)-hem'(ha^3'e^{2}m)-i^2-a^3. Fr., *toxicohémie.* See *Blood*-POISONING.

TOXICOLOGY, n. To^{2}x-i^{2}k-o^{2}l'o-ji^2. Lat., *toxicologia* (from τοξικόν, poison, and λόγος, understanding). Fr., *toxicologie.* Ger., *Giftkunde, Giftlehre.* The science of the nature and action of poisons and of the detection and treatment of poisoning. [a, 48.]

TOXICOMANIA (Lat.), n. f. To^{2}x-i^{2}k-o(o^3)-man(ma^{3}n)'i^2-a^3. From τοξικόν, poison, and μανία, madness. See TOXIPHOBIA.

TOXICON (Lat.), n. n. To^{2}x'i^{2}k-o^{2}n. Gr., τοξικόν, poison, originally poison for smearing arrows (from τόξον, a bow). Arrow poison; hence, any poison. [a, 34.]

TOXICOPHLŒA (Lat.), n. f. To^{2}x-i^{2}k-o(o^3)-fle'(flo^2'e^2)-a^3. From τοξικόν, poison, and φλοιόν, bark. See ACOCANTHERA.

TOXICOPHTHISIS (Lat.), n. f. To^{2}x-i^{2}k-o^{2}t(o^{2}f)'i^{2}s(thi^{2}s)-i^{2}s. From τοξικόν, poison, and φθίσις, consumption. Fr., *toxicophthisie.* Phthisis induced by poison. [L, 50 (a, 14).]

TOXICORRHEUMATISMUS (Lat.), n. m. To^{2}x-i^{2}k-o^{2}r-ru^{2}m-a^{2}t(a^{3}t)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). From τοξικόν, poison, and ῥευματισμός, rheumatism. Rheumatism caused by poison. [L, 50 (a, 14).]

TOXICOSIS (Lat.), n. f. To^{2}x-i^{2}k-os'i^{2}s. Gen., *-os'eos (-is).* From τοξικόν, poison. Poisoning.—**Autot'.** Of von Jaksch, t. caused by toxic substances formed in the system. [a, 34.]—**Exogenic t.** T. induced by substances taken into the system. [a, 34.]—**Nosot'.** T. referable to the presence of basic products that are formed in the system in disease and eliminated with the urine. [a, 34.]—**Retention t.** T. depending upon the retention of a substance that should be excreted. [a, 34.]

TOXICUM (Lat.), n. n. To^{2}x'i^{2}k-u^{3}m(u^{4}m). See TOXICON.

TOXIFERUS (Lat.), adj. To^{2}x-i^{2}f'e^{2}r-u^{3}s(u^{4}s). From *toxicum,* poison, and *ferre,* to bear. Fr., *toxifère.* Bearing or producing poison. [L, 41 (a, 14).]

TOXIHÆMIA (Lat.), n. f. To^{2}x-i^2-hem'(ha^3'e^{2}m)-i^2-a^3. See *Blood*-POISONING.

TOXINE, n. To^{2}x'en. From τοξικόν, poison. Ger., *T.* Any poisonous ptomaine. [Brieger (B, 270).]

TOXINICIDE, n. To2x-i2n'i2-sid. From *toxicum*, poison, and *cædere*, to slay. Of E. Mosny, a substance that destroys a toxine. [α, 34.]

TOXIPHOBIA (Lat.), n. f. To2x-i2-fob(fo2b)'i2-a3. From τοξικόν, poison, and φόβος, fear. Of Cameron, monomania characterized by fear of being poisoned. [α, 34.]

TOXIPHOBIAC, n. To2x-i2-fob'i2-a2k. Of Cameron, a person affected with toxiphobia. [α, 34.]

TOXIRESIN, n. To2x-i-re2z'i2n. Fr., *toxirésine*. An uncrystallizable, yellowish, poisonous resin produced by decomposing digitoxin with dilute acids or by heating it to 240° C. [B, 93 (α, 14).]

TOXONOSEN (Ger.), n. pl. Tox-o-noz'e2n. Diseases caused by poison. [L, 57 (α, 14).]

TOXOPHYLAXIN, n. To2x-o-fi2l-a2x'i2n. Of Hankin, a defensive proteid produced in the body of an animal which has an acquired immunity, and acting by neutralizing the toxic products of the pathogenic bacteria to which the disease is due. ["Boston Med. and Surg. Jour.," Jan. 12, 1893, p. 31 (α, 50).]

TO-YAK, n. A bitter Japanese drug obtained from *Pleurogyne rotata*; used as a tonic. [B, 108 (α, 14).]

TRABECULA (Lat.), n. f. Tra2b(tra3b)-e2k'u2l(u4l)-a3. Dim. of *trabs*, a beam. Fr., *trabécule*. Ger., *Trabekel*, *Balken*, *Bälkchen*, *Querbälkchen*. Any one of various beam-like or string-like masses of tissue arranged in bands or cross-bars. [K.]—**Cell- (or Cortical) trabeculæ.** See CELL-*trabeculæ*.—**Lateral trabeculæ of the embryonic cranium.** See *Trabeculæ cranii*.—**Trabeculæ carneæ (cordis).** See COLUMNÆ *carneæ* (1st def.).—**Trabeculæ corporeum cavernosorum.** Prolongations inward of the fibrous tissue covering the corpora cavernosa of the penis, dividing them into a large number of small cavities. [L.]—**Trabeculæ cranii.** The axial part of the basi-facial axis of the embryo; of Rathke, certain cartilaginous rudiments which stretch forward, in the development of the basis cranii, from the region of the sella turcica to that of the olfactory pits, in the form of two bars more or less united. [A, 5.]—**T. magna cerebri.** See CORPUS *callosum*.—**T. medullaris cerebelli.** See INCREMENTA *fibrosa*.—**Trabeculæ of the spleen.** The reticular framework of connective tissue which runs in the substance of the spleen. [C.]—**Trabeculæ of the testis.** Processes of the albuginea testis extending into the testicle and joining similar processes given off from the front and sides of the corpus Highmori. They inclose the separate lobules of the testis. [C; L.]

TRABECULAR, adj. Tra2b-e2k'u2l-a3r. Fr., *trabéculaire*. Pertaining to or constituting trabeculæ. [J.]

TRABECULATE, TRABECULATED, adj's. Tra2b-e2k'u2l-at, -at-e2d. Lat., *trabeculatus*. Ger., *querbälkig*. Cross-barred, having trabeculæ. [α, 35.]

TRABERKRANKHEIT (Ger.), n. Tra3b'e2r-kra3n2k-hit. See DREHKRANKHEIT.

TRABES (Lat.), n. f. Trab(tra3b)'ez(as). Gen., *trab'is*. See TRABECULA.

TRABS (Lat.), n. f. Tra2bz(tra3bs). Gen., *trab'is*. See PENIS. —**T. cerebri, T. medullaris.** See CORPUS *callosum*.

TRACE, n. Tras. Fr., *tracé*. A track, mark, or impression. [α, 48.]—**Primitive t.** See *Primitive* STREAK.

TRACHEA (Lat.), n. f. Tra2k(tra3ch2)-e(a)'a3. Gr., τραχεῖα, for τραχεῖα ἀρτηρία (*arteria aspera*), the rough artery (from τραχύς, rough). Fr., *trachée*. Ger., *T.*, *Trachee*, *Luftröhre* (1st def.). 1. The windpipe; a tube 4 to 4½ in. long, ¾ to 1 in. in diameter, in man, continuous with the larynx above and dividing about opposite the intervertebral fibro-cartilage between the fourth and fifth dorsal vertebræ into the two bronchi. It consists of cartilaginous rings incomplete behind, united by fibrous tissue, and is lined with mucous membrane. [L, 31, 142, 332.] 2. The respiratory tube in vertebrates; the air-tube of tracheate insects. [L, 196; L, 206 (α, 27).] 3. In botany, a duct. [α, 35.]

TRACHEAECTASY, n. Tra2k-e2-a3-e2kt'a2s-i2. From τραχεῖα, the trachea, and ἔκτασις, extension. Tracheal dilatation. [α, 34.]

TRACHEAL, adj. Tra2k'e2-a2l. Pertaining to the trachea or to tracheæ. [α, 48.]

TRACHEALIA (Lat.), n. f. Tra2k(tra3ch2)-e2(a)-al(a3l)'i2-a3. From τραχεῖα, the trachea. Of Farr, croup. [D.]

TRACHEARY, adj. Tra2k'e2-ar-i2. Pertaining to or resembling tracheæ (cf. *T.* CELLS). [α, 35.]

TRACHEID, n. Tra2k'e2-i2d. Fr., *trachéide*. An elongated cell with markings resembling those of a duct. [α, 35.]

TRACHEITIS (Lat.), n. f. Tra2k(tra3ch2)-e2(a)-i(e)'ti2s. From τραχεῖα, the trachea. Fr., *trachéite*. Inflammation of the trachea. [α, 17.]—**T. maligna.** See CROUP (1st and 2d def's).

TRACHÉLÉMATOME (Fr.), n. Tra3k-al-am-a3-tom. A hæmatoma of the neck.—**T. des nouveau-nés.** Of E. Tordeus, a hæmatoma of the sheath of the sterno-cleido-mastoid muscle sometimes observed in the new-born infant after difficult labor. ["Progr. méd.," Mar. 8, 1884, p. 199.]

TRACHELAGRA (Lat.), n. f. Tra2k(tra3ch2)-e2l(al)'a2g(a3g)-ra3. From τράχηλος, the neck, and ἄγρα, a seizure. Fr., *trachélagre*. Rheumatic pain in the neck. [L, 50 (α, 14).]

TRACHELALIS (Lat.), n. m. Tra2k(tra3ch2)-e2l(al)-al(a3l)'i2s. From τράχηλος, the neck. Of Coues, see TRACHELOMASTOIDEUS (1st def.).

TRACHELECTOMOPEXIA (Lat.), n. f. Tra2k(tra3ch2)-e2l(al)-e2k-to2m-o(o3)-pe2x(pax)'i2-a3. From τράχηλος, the neck, ἐκτομή, a cutting out, and πῆξις, a fixing. Trachelopexia with partial excision of the cervix uteri. [α, 34.]

TRACHELECTOMY, n. Tra2k-e2l-e2kt'om-i2. From τράχηλος, the neck, and ἐκτομή, a cutting out. Excision of the cervix uteri. [α, 34.]

TRACHELIAN, adj. Tra2k-el'i2-'n. From τράχηλος, the neck. Fr., *trachélien*. Pertaining to the neck, especially to its back part. [L, 41, 49 (α, 14).]

TRACHÉLI-ATLOÏDO-BASILAIRE (Fr.), n. Tra3-sha-le-a3t-lo-ed-o-ba3-se-la2r. See RECTUS *capitis lateralis*.

TRACHELISM, n. Tra2k'e2l-i2zm. Gr., τραχηλισμός (from τράχηλος, the neck). Lat., *trachelismus*. Fr., *trachélisme*. Of M. Hall, spasmodic contraction of the muscles of the neck. [K, 3.]

TRACHELITIS (Lat.), n. f. Tra2k(tra3ch2)-e2l(al)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From τράχηλος, the neck. Inflammation of the neck or of the cervix uteri.

TRACHELO-ACROMIALIS (Lat.), n. m. Tra2k(tra3ch2)-el(al)''o(o3)-a2k(a3k)-rom-i2-al(a3l)'i2s. From τράχηλος, the neck, and ἀκρώμιον, the acromion. In solipeds, the posterior portion of the mastoido-humeralis. It arises from the transverse processes of the first four cervical vertebræ. [L, 13.]

TRACHÉLO-ANGULI-SCAPULAIRE (Fr.), n. Tra3-ka-lo-a3n2-gu6-le-ska3-pu6-la2r. See LEVATOR *anguli scapulæ*.

TRACHÉLO-ATLOÏDO-OCCIPITAL (Fr.), n. Tra3-ka-lo-a3t-lo-e-do-o2k-se-pe-ta3l. See OBLIQUUS *capitis minor*.

TRACHÉLO-BASILAIRE (Fr.), n. Tra3-ka-lo-ba3-se-la2r. See RECTUS *capitis anticus major*.

TRACHELOCAMPYLUS (Lat.), n. m. Tra2k(tra3ch2)-el(al)-o(o3)-ka2mp(ka3mp)'i2l(u6l)-u3s(u4s). From τράχηλος, the neck, and καμπύλος, crooked. A cysticercus found once in the human brain; probably a degenerated cysticercus of some known species. [L, 17.]

TRACHELOCLAVICULARIS (Lat.), adj. and n. Tra2k(tra3ch2)-el(al)''o(o3)-kla2(kla3)-vi2k(wi2k)-u2l(u4l)-ar(a3r)'i2s. From *trachelus*, the neck, and *clavicula*, the clavicle. See CLEIDOCERVICALIS.—**T. imus.** See CLEIDOCERVICALIS *imus*.—**T. superior.** See LEVATOR *claviculæ*.

TRACHELOCOSTALIS (Lat.), n. m. Tra2k(tra3ch2)-el(al)''o(o3)-ko2st-al(a3l)'i2s. From *trachelus*, the neck, and *costa*, a rib. The analogue of the sacrolumbalis of man found in nearly all the lower mammals. [L, 13.]

TRACHELOCOSTOSCAPULARIS (Lat.), n. m. Tra2k(tra3ch2)-el(al)''o(o3) ko2st'''o(o3)-ska2p(ska3p)-u2l(u4l)-ar(a2r)'i2s. From τράχηλος, the neck, *costa*, a rib, and *scapula* (*q. v.*). The serratus magnus and the levator anguli scapulæ considered as a single muscle. [α, 34.]

TRACHELOCYLLOSIS (Lat.), n. f. Tra2k(tra3ch2)-el(al)-o(o3)-si2l(ku6l)-los'i2s. Gen., *-los'eos* (*-is*). From τράχηλος, the neck, and κύλλωσις, a crooking. See TORTICOLLIS.

TRACHELOCYPHOSIS (Lat.), **TRACHELOCYRTOSIS** (Lat.), n's f. Tra2k(tra3ch2)-el(al)-o(o3)-sif(ku6f)-os'i2s, -su6rt(ku6rt)-os'i2s. Gen., *-os'eos* (*-is*). From τράχηλος, the neck, and κύφωσις, or κύρτωσις, kyphosis. Fr., *trachélocyphose*, *trachélocyrtose*. Ger., *Halsbuckel*. An abnormal curvature of the cervical portion of the vertebral column. [L, 50 (α, 14).]

TRACHELO-DIAPHRAGMATIC, adj. Tra2k-el''o-di-a3-fra2g-ma2t'i2k. From τράχηλος, the neck, and διάφραγμα, the diaphragm. Pertaining to the neck and the diaphragm. [L.]

TRACHÉLO-DORSAL (Fr.), adj. Tra3-ka-lo-dor-sa3l. Cervico-dorsal. [L.]

TRACHELODYNIA (Lat.), n. f. Tra2k(tra3ch2)-e2l(al)-o(o3)-di2n(du6n)'i2-a3. From τράχηλος, the neck, and ὀδύνη, pain. Fr., *trachélodynie*. Ger., *Halsschmerz*. Pain in the neck.

TRACHELOMASTOIDEUS (Lat.), n. m. Tra2k(tra3ch2)-el(al)''o(o3)-ma2st(ma3st)-o(o2)-i2d(ed)'e2-u3s(u4s). From τράχηλος, the neck, and μαστοειδής, mastoid. Fr., *trachélo-mastoïdien*. Ger., *Halszitzenmuskel*. 1. The upward continuation of the longissimus dorsi which arises from the transverse processes of a varying number of the upper dorsal vertebræ and the articular processes of the three or four lower cervical vertebræ, and is inserted into the posterior border of the mastoid process of the temporal bone. [L, 31, 142, 332.] 2. In solipeds, see DORSOMASTOIDEUS.—**T. accessorius, T. minor.** An anomalous muscle arising from the transverse processes of the upper two dorsal and the lower two or three cervical vertebræ, and inserted into the mastoid process of the temporal bone or the transverse process of the atlas. [L, 332.]

TRACHELOMYITIS (Lat.), n. f. Tra2k(tra3ch2)-e2l(al)-o(o3)-mi(mu6)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From τράχηλος, the neck, and μῦς, a muscle. Fr., *trachélomyite*. Inflammation of the muscles of the neck. [L, 50 (α, 14).]

TRACHÉLO-OCCIPITAL (Fr.), n. Tra3-ka-lo-o2k'se-pe-ta3l. See COMPLEXUS.

TRACHELO-OCCIPITALIS (Lat.), n. m. Tra2k(tra3ch2)-el(al)''o(o3)-o2k-si2p(ki2p)-i2t-al(a3l)'i2s. From τράχηλος, the neck, and *occiput* (*q. v.*). A muscle of solipeds corresponding to the rectus capitis anticus major of man. It arises from the transverse processes of the third, fourth, and fifth cervical vertebræ, and is attached to the body of the sphenoid bone and the basilar process of the occipital bone. It flexes the head and carries it to one side. [L, 13.]

TRACHELOPANUS (Lat.), n. m. Tra2k(tra3ch2)-e2l(al)-o(o3)-pan(pa3n)'u3s(u4s). From τράχηλος, the neck, and *panus*, a swelling. Fr., *trachélopane*. Ger., *Halsdrüsengeschwulst*. Inflammation of the cervical glands. [L, 50 (α, 14).]

TRACHELOPEXIA (Lat.), n. f. Tra2k(tra3ch2)-e2l(al)-o(o3)-pe2x(pax)'i2-a3. From τράχηλος, the neck, and πῆξις, a fixing. Fixation of the cervix uteri. [α, 34.]

TRACHELOPHYMA (Lat.), n. n. Tra^{2}k(tra^{3}ch^2)-e^{2}l(al)-o(o^3)-fim(fu^{6}m)'a^3. Gen., *-phym'atos* (*-atis*). From τράχηλος, the neck, and φῦμα, a growth. Fr., *trachélophyme*. A swelling of the neck. [L, 50 (*a*, 14).] See also GOÎTRE and TRACHELOPANUS.

TRACHELOPLASTY, n. Tra^{2}k-el'o-pla^{2}st-i^2. From τράχηλος, the neck, and πλάσσειν, to mold. The plastic surgery of the cervix uteri.

TRACHELORRHAPHY, n. Trak-e^{2}l-o^{2}r'a^{2}f-i^2. From τράχηλος, the neck, and ῥαφή, a stitching. Fr., *trachélorrhaphie*. See HYSTERO-TRACHELORRHAPHY.

TRACHELOS (Lat.), n. m. Tra^{2}k(tra^{3}ch^2)-el(al)'o^{2}s. Gr., τράχηλος. See NECK.

TRACHÉLO-SCAPULAIRE (Fr.), n. Tra^3-ka-lo-ska^3-pu^6-la^{2}r. See ANGULARIS *scapulæ*.

TRACHÉLO-SOUS-OCCIPITAL (Fr.), adj. Tra^3-ka-lo-suz-o^{2}k-se-pe-ta^{3}l. Cervico basilar; as a n., a muscle of the neck connected with the suboccipital region. [L.]—**T.-s.-o. grand.** See RECTUS *capitis anticus major*.—**T.-s.-o. petit.** See RECTUS *capitis anticus minor*.

TRACHELOSTROPHOSIS (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e^{2}l-(al)-o(o^3)-stro^{2}f-os'i^{2}s. Gen., *-phos'eos* (*-is*). From τράχηλος, the neck, and στρόφος, a twisting. Fr., *trachélostrophose*. Torsion of the neck. [L, 50 (*a*, 14).]

TRACHELOSUBOCCIPITALIS (Lat.), n. m. Tra^{2}k(tra^{3}ch^2)-el(al)''o(o^3)-su^{3}b(su^{4}b)-o^{2}k-si^{2}p(ki^{2}p)-i^{2}t-al(a^{3}l)'i^{2}s. From τράχηλος, the neck, *sub*, under, and *occiput* (*q. v.*). See TRACHELO-OCCIPITALIS.

TRACHELOSUBSCAPULARIS (Lat.), n. m. Tra^{2}k(tra^{3}ch^2)-el(al)''o(o^3)-su^{3}b(su^{4}b)-ska^{2}p(ska^{3}p)-u^{2}l(u^{4}l)-ar(a^{3}r)'i^{2}s. From τράχηλος, the neck, *sub*, under, and *scapula* (*q. v.*). Fr, *trachelo-sous-scapulaire*. See ANGULARIS *scapulæ*.

TRACHELOTOMY, n. Tra^{2}k-e^{2}l-o^{2}t'o-mi^2. From τράχηλος, the neck, and τομή, a cutting. 1. Decapitation. 2. The operation of enlarging the canal of the cervix uteri by incision.—**Uterine t.** See *T.* (2d def.).

TRACHELUS (Lat.), n. m. Tra^{2}k(tra^{3}ch^2)-el(al)'u^{3}s(u^{4}s). Gr., τράχηλος. See NECK.

TRACHENCHYMA (Lat.), n. n. Tra^{2}k(tra^{3}ch^2)-e^{2}n^2'ki^{2}m-(ch^{2}u^{6}m)-a^3. Gen., *-ym'atos* (*-atis*). From τραχύς, rough, and ἔγχυμα, an infusion. Tissue composed of tracheal cells. [*a*, 35.]

TRACHEOAEROCELE (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e^2(a)-o(o^3)-a(a^3)-e^{2}r-o(o^3)-se(ka)'le(la); in Eng., tra^{2}k-e^2-o-a'e^{2}r-o-sel. Gen., *-cel'es*. From τραχεῖα, the trachea, ἀήρ, air, and κήλη, a tumor. A tracheal diverticulum. [L, 50 (*a*, 14).]

TRACHEOBLENNORRHŒA (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e^2(a)-o(o^3)-ble^{2}n-no^{2}r-re'(ro^2'e^2)-a^3. For deriv., see TRACHEA and BLENNORRHŒA. Fr., *trachéoblennorhée*. Ger., *Luftröhrenschleimfluss*. Blennorrhœa of the trachea. [L, 50 (*a*, 14).]

TRACHEO-BRONCHIAL, adj. Tra^{2}k-e''o-bro^{2}n^2'ki^2-'l. From τραχεῖα, the trachea, and βρόγχος, a bronchus. Pertaining to the trachea and a bronchus. [L.]

TRACHEOBRONCHITIS (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e'(a)'-o(o^3)-bro^{2}n^2-ki(ch^{2}e^2)'ti^{2}s. Gen., *-it'idos* (*-idis*). Fr., *trachéobronchite*. Inflammation of the trachea and bronchii. [*a*, 34.]

TRACHEOCELE (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e^2(a)-o(o^3)-se(ka)'-le(la); in Eng., tra^{2}k-e'o-sel. Gen., *-cel'es*. From τραχεῖα, the trachea, and κήλη, a tumor. Fr., *trachéocèle*. 1. A hernial protrusion of the mucous membrane of the trachea through the cartilaginous structure, either between two of the rings or through a branchial fistula. 2. Goître.

TRACHEOCHOLOSIS (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e(a)''o(o^3)-ko^{2}l(ch^{2}o^{2}l)-os'i^{2}s. Gen., *-os'eos* (*-is*). From τραχεῖα, the trachea, and χόλος, bile. Fr., *trachéocholose*. Catarrh of the trachea, attributed to biliary derangement. [L, 50 (*a*, 14).]

TRACHEOCYNANCHE (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e(a)''o-(o^3)-si^{2}n(ku^{6}n)-a^{2}n^{2}k(a^{3}n^{2}ch^2)'e(a). Gen., *-anch'es*. From τραχεῖα, the trachea, and κυνάγκη, cynanche. Fr., *trachéocynanche*. See TRACHEITIS.

TRACHEO-LARYNGEAL, adj. Tra^{2}k''e-o-la^{2}r-i^{2}n'je^2-'l. Fr., *trachéo-laryngien*. Pertaining to or involving the trachea and the larynx.

TRACHEOLARYNGOTOMY, n. Tra^{2}k-e''o-la^{2}r-i^{2}n^2-go^{2}t'-om-i^2. See LARYNGOTRACHEOTOMY.

TRACHEO-ŒSOPHAGEUS (Lat.), n. m. Tra^{2}k(tra^{3}ch^2)-e-(a)''o(o^3)-e^{2}s(o^2-e^{2}s)-o^{2}f-a^{2}j(a^{3}g)'e^2-u^{3}s(u^{4}s). From τραχεῖα, the trachea, and οἰσοφάγος, the gullet. A bundle of anomalous muscular fibres extending between the œsophagus and the trachea. [L, 332.]

TRACHEO-PHARYNGEUS (Lat.), n. m. Tra^{2}k(tra^{3}ch^2)-e-(a)''o(o^3)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From τραχεῖα, the trachea, and φάρυγξ, the pharynx. An anomalous offshoot of the inferior constrictor of the pharynx inserted into the trachea. [L, 332.]

TRACHEOPHONY, n. Tra^{2}k-e^2-o^{2}f'on-i^2. From τραχεῖα, the trachea, and φωνή, the voice. The sound heard on auscultation over the trachea (cf. LARYNGOPHONY). [D, 1.]

TRACHEOPHYMA (Lat.), n. n. Tra^{2}k(tra^{3}ch^2)-e(a)-o(o^3)-fim(fu^{6}m)'a^3. Gen., *-phym'atos* (*-atis*). From τραχεῖα, the trachea, and φῦμα, a growth. See GOÎTRE.

TRACHEOPLASTIK (Ger.), n. Tra^{3}ch^2-a-o-pla^{3}st-ek. The plastic surgery of the trachea. [L, 197.]

TRACHEOPYOSIS (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e(a)-o(o^3)-pi-(pu^6)-os'i^{2}s. Gen., *-os'eos* (*-is*). From τραχεῖα, the trachea, and πύωσις, suppuration. Fr., *trachéopyose*. Purulent tracheitis. [L, 50 (*a*, 14).]

TRACHEOPYRA (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e^2(a)-o^{2}p i^{2}r-(u^{6}r)-a^3. From τραχεῖα, the trachea, and πῦρ, fever. See CYNANCHE *trachealis*.

TRACHEORRHAGIA (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e(a)-o^{2}r-raj(ra^{3}g)'i^2-a^3. From τραχεῖα, the trachea, and ῥήγνυσθαι, to burst forth. Fr., *trachéorrhagie*. Ger., *Luftröhrenblutfluss*. Hæmorrhage from the trachea. [L, 50 (*a*, 14).]

TRACHEOSCOPY, n. Tra^{2}k-e^2-o^{2}sk'op-i^2. From τραχεῖα, the trachea, and σκοπεῖν, to examine. Fr., *trachéoscopie*. Inspection of the trachea. [L, 87 (*a*, 50).]

TRACHEOSTENOSIS (Lat.), n. f. Tra^{2}k(tra^{3}ch^2)-e(a)-o(o^3)-ste^{2}n os'i^{2}s. Gen., *-os'eos* (*-is*). From τραχεῖα, the trachea, and στένωσις, stenosis. Fr., *trachéosténose*, *trachéosténosie*. Ger., *Tracheostenose*. Morbid constriction of the trachea. [E.]

TRACHEOTOME, n. Tra^{2}k'e^2-o-tom. From τραχεῖα, the trachea, and τέμνειν, to cut. Fr., *trachéotome*. Ger., *Halslanzette*. An instrument for opening the trachea in tracheotomy. Langenbeck's t. is a double hook with a cutting edge, separating by the pressure of the thumb on one handle, and closing with a wire spring. Pitha's t. and dilator is an instrument shaped like a forceps, with cutting surfaces on the back of the points. Hanks's t. is a sharp trocar working in an ordinary tracheotomy tube for a cannula. [E.]—**Mandrin t.** An instrument invented by Philippeaux, consisting of a steel shaft having the length and curve of the ordinary tracheal cannula, into which it passes. At each end the shaft is much thicker and accurately fits the cannula, having three or four longitudinal grooves for the passage of air. The distal end of the shaft projects beyond the end of the tube and is wedge-shaped, with a cutting edge. [Philippeaux, "Ann. de gyn.," Apr., 1883 (E).]

TRACHEOTOMY, n. Tra^{2}k-e^2-o^{2}t'om-i^2. From τραχεῖα, the trachea, and τομή, a cutting. Lat., *tracheotomia*. Fr., *trachéotomie*. Ger., *Luftröhrenschnitt*, *Tracheotomie*. The operation of making an opening into the trachea. [E.]—**Inferior t.** Lat., *tracheotomia inferior*. T. in which the incision is made below the thyreoid gland. [*a*, 34.]—**Superior t.** Lat., *tracheotomia superior*. T. in which the incision is made above the isthmus of the thyreoid gland. [*a*, 34.]

TRACHEOTYPHUS (Lat.), n. m. Trak(tra^{3}ch^2)-e(a)-o(o^3)-tif-(tu^{6}f)'u^{3}s(u^{4}s). From τραχεῖα, the trachea, and τῦφος, typhus. Of Eisenmann, malignant angina. [L, 50 (*a*, 14).]

TRACHOMA (Lat.), n. n. Tra^{2}k(tra^{3}ch^2)-om'a^3. Gen., *-om'atos* (*-atis*). Gr., τράχωμα (from τραχύς, rough). Fr., *t.*, *trachome*. Ger., *Trachom*, *Trakom*, *Augenliderkrätze*. An old name for granular conjunctivitis. It is characterized by slowly progressive changes in the conjunctiva of the eyelids, which becomes thickened, vascular, and roughened by firm elevations. The change begins in the follicular structure of the conjunctiva, extending to the papillæ and submucous tissue of both lids, and giving rise here to the growth of much new tissue. The disease is first shown by the presence of round, pale, semi transparent bodies like grains of boiled sago, sometimes looking like vesicles. The conjunctiva does not ulcerate, and the prominences are not real granulations. [F.]—**Follicular t.** T. chiefly affecting the Meibomian glands, and associated with the presence of *Neisseria rebellis* (*q. v.*). [*a*, 17.]—**T. caruncrulosum.** Ger., *warzige Augenliderrauhigkeit*. An old term for a so-called variety of t. in which fleshy excrescences are met with in the conjunctiva. [F.]—**T. diffusum.** An affection of the conjunctiva in which the submucous tarsal regions of the conjunctiva, especially near the canthi, are changed into gray or grayish-yellow brawny masses from infiltration of the tissue with lymphoid cells and proliferation of the connective-tissue elements. [F.]—**T. herpeticum.** An old term for an affection of the conjunctiva in which pustules or vesicles are found on the inner surface of the eyelids. [F.]—**T. mixtum.** Granular conjunctivitis with secondary inflammation of the surrounding tissue. [F.]—**T. pudendorum.** Of Farnowsky, a chronic granular inflammation of the vulva. ["Ctrlbl. f. Gyn.," May 28, 1887, p. 360 (*a*, 34).]—**T. sabulosum.** An old term for t., so called from being characterized by a sensation as of sand beneath the lids. [F.]

TRACHOMATICON (Lat.), n. n. Tra^{2}k(tra^{3}ch^2)-o^{2}m(om)-a^{2}t-(a^{3}t)'i^{2}k-o^{2}n. Gr., τραχωματικόν (from τράχωμα, roughness). Of Galen, a collyrium. [L, 50 (*a*, 14).]

TRÄCHTIG (Ger.), adj. Trach^{2}t'i^{2}g. See PREGNANT.—**T'keit.** See GESTATION.

TRACHYLOBIUM (Lat.), n. n. Tra^{2}k(tra^{3}ch^2)-i^2(u^6)-lob(lo^{2}b)'-i^2-u^{3}m(u^{4}m). From τραχύς, rough, and λοβός, a pod. Fr., *trachylobe*. Ger., *Rauhhülse*. A genus of leguminous trees. [*a*, 35.]—**T. courbaril.** See HYMENÆA *courbaril*.

TRACHYSMA (Lat.), n. n. Tra^{2}k(tra^{3}ch^2)-i^{2}z(u^{6}s)'ma^3. Gen., *-ys'matos* (*-atis*). Gr., τράχυσμα (from τραχύς, rough). See TRACHOMA.

TRACT, n. Tra^{2}kt. Lat., *tractus*. Fr., *tractus*, *cordon*. Ger., *Tractus*, *Bahn*, *Strang*. An extent of surface, usually of considerable length as compared with its breadth. [*a*, 48.]—**Aberrant t. of the lateral column.** Of Monakow, a t. originating in the peripheral portion of the lateral column, lying against the corpus trapezoides, between the facial nucleus and the ascending root of the fifth nerve, and finally passing over into the fillet. [*a*, 34.]—**Anterior cerebro-pontine t.** A t. of internal (mesial) fibres of the crus cerebri extending from the anterior part of the frontal lobe to the pons. [*a*, 34.]—**Anterior cortical t.** Bundles of fibres from the cortex of the frontal lobe running to the ganglion cells of the pons varolii. [*a*, 34.]—**Anterior fundamental t.** The anterior fundamental fasciculi of the anterior column of the spinal cord. [*a*, 34.]—**Anterior pyramidal t.** The longitudinal bundles of nerve-fibres in the ventral half of the pons which represent the prolongation of the anterior pyramids of the medulla oblongata. [I, 29 (K).]—**Anterolateral descending t.** A few long fibres, scattered in the anterior and lateral ground bundles of

the spinal cord. [α, 34.]—**Ascending antero-lateral t.** See *Gowers's t.*—**Basal longitudinal t.** A t. of fibres extending along the outer wall of the posterior and inferior horns of the lateral ventricle, apparently connecting the occipital and temporal lobes. [α, 34.]—**Basirrhinal t.** The olfactory t. in the marsupials. [I, 14 (K).]—**Bechterew's t.** See *Tegmental t.*—**Bulbar t.** Ger., *Nervenkerntractus.* One of the t's of fibres occupying the bulb. [α, 34.]—**Central medullary t.** The gray matter in the spinal cord which immediately surrounds the central canal. [I, 14 (K).]—**Central vagus t.** A t. of fibres passing from the layer of the fillet to the nucleus of the vagus of the opposite side. [α, 34.]—**Cerebellar t.** See *Kleinhirnseitenstrang*BAHN.—**Cerebello-olivary t.** A t. supposed by Meynert to be a continuation of the fibres of the posterior column of the spinal cord, passing through the olivary body and reaching the cerebellum through the restiform body. Edinger thinks it arises from the outer side of the fleece. [α, 34.]—**Cerebro-pontine t.** A t. of fibres starting from the brain cortex and passing through the internal capsule and the upper part of the cerebral peduncles to the pons. [α, 34.]—**Comma-shaped t.** A t. shaped like a comma, observed in descending degeneration in the middle of the anterior third of the dorsal spinal cord. [α, 34.]—**Commissural t.** Of Owen, the cerebellar peduncles. [I, 14 (K).]—**Communicating quintus t.** Ger., *Quintusstrang.* A t. of fibres derived from the motor nucleus of the fifth nerve which at first surrounds the upper part of the Sylvian aqueduct, and then widens, the fibres radiating through the tegmentum, and a portion of them curving around the lower border of the red nucleus as the *fibræ arcuatæ.* This t. is brought into connection with the motor t's of fibres through the agency of intervening multipolar ganglion cells. [I, 31 (K).]—**Conario-hypophysial t.** Of Owen, the embryonic passage through the pituitary diverticulum, the infundibulum, the third ventricle, and the epiphysis cerebri. [A, 5.]—**Crossed thalamo-tegmental t.** A t. of fibres connecting the thalamus with the spinal cord by way of the tegmentum. [E. C. Spitzka, "Boston Med. and Surg. Jour.," Apr. 16, 1885, p. 365 (α, 34).]—**Dendritic t's.** T's of fibres that arise from all parts of the cerebral cortex, diverging from each other like the limbs of a tree, and pass into the white substance. [α, 34.]—**Digestive t.** Ger., *Digestionstractus.* The alimentary canal. [L.]—**Direct cerebellar t.** See *Kleinhirnseitenstrang*BAHN.—**Direct lateral cerebellar t.** A t. of nerve-fibres situated in the lateral column of the spinal cord, between the lateral pyramidal t. and the external surface. It appears at the level of the second or third lumbar nerve as a narrow area, which extends as it ascends. It may be traced through the medulla oblongata and restiform body into the cerebellum. [I, 15 (K).]—**Direct myelo-cerebellar t.** See *Kleinhirnseitenstrang*BAHN.—**Direct t.** A bundle of nerve-fibres in the antero-median column of the spinal cord which may be traced upward in the crusta as far as the point where the crus cerebri is crossed by the optic t. [I, 1 (K).]—**Fillet t.** A t. that emerges from the fillet and may be found on the upper and outer side of the nucleus ruber in its course to the cortex of the upper part of the parietal lobe by way of the internal capsule. [α, 34.]—**First projection t.** Of Meynert, the corona radiata. [α, 34.]—**Formative t.** Of Owen, the formative and commissural t's of the cerebellum described as two different bundles of nerve-fibres which unite to form the peduncles. [I, 14.]—**Frontal pontine t.** See *Anterior cerebro pontine t.*—**Frontal t.** Of Owen, the frontal lobe of the brain. [I, 14 (K).]—**Fronto-cerebellar t.** The t. of white fibres connecting the frontal lobe of the cerebrum with the cerebellum. [α, 34.]—**Funicular t's.** See FUNICULI *graciles cerebelli.*—**Ganglionic association t.** Association fibres connecting different cerebral ganglia. [α, 34.]—**Genal t.** See GNATHOGRAMMA.—**Geniculate t.** See FAISCEAU *géniculé.*—**Genito-urinary t.** The genito-urinary apparatus. [α, 34.]—**Goll's t.** A t. in the posterior white column of the spinal cord, corresponding with the posterior median column. It can be traced only as far as the middle of the dorsal region. [I, 15 (K).]—**Gowers's t.** A t. formed of fibres derived from the posterior roots that, having crossed in the posterior commissure and been interrupted in nerve-cells, collect in the lateral column to pursue a cerebral course. One portion of the fibres, it is stated, disappears in the upper cervical cord, and another portion ends in the nucleus lateralis of the medulla oblongata. [α, 34.]—**Habenula t.** A t. leaving the habenula and passing toward the base of the brain, running between the central gray lining and the substance of the thalamus and appearing to end on the mesial side of the red nucleus. [α, 34.]—**Indirect t.** A bundle of nerve-fibres in the lateral column of the spinal cord which joins the direct t. near the posterior edge of the pons Varolii, above which point the two t's are united. [I, 1 (K).] Cf. *Direct t.*—**Intellectual t.** See *Fronto-cerebellar t.*—**Intermediary lateral t., Intermedio-lateral t.** Fr., *colonne intermédiaire.* A pyramidal t. of nerve-fibres in the posterior portion of the spinal cord, midway between the anterior and posterior gray columns and in front of the reticular process. [I, 1, 6 (K).]—**Internidal t's.** Of Spitzka, the t's of fibres extending from the nidi of the third, fourth, and sixth cranial nerves. [α, 34.]—**Interolivary t.** A t. of arcuate fibres extending from the nuclei of the posterior columns ventrally toward the middle line; it terminates on the dorsal side of the pyramids in the opposite interolivary region or fillet layer. [α, 34.]—**Intestinal t.** The large and small intestine. [α, 34.]—**Lateral cerebellar t., Lateral longitudinal t.** See *Lateral t. of the cerebellum.*—**Lateral t.** See *Lateral* COLUMN.—**Lateral t. of the cerebellum.** A t. receiving its fibres from the direction of Clarke's vesicular column, at the medulla inclining obliquely toward the dorsal surface, across the ascending root of the fifth nerve, the other fibres of the inferior cerebellar peduncle gradually applying themselves to it, and the t. terminating in the vermis. It is a centripetal conducting system connecting the posterior roots and the cerebellum. [α, 34.]—**Lateral t. of the medulla oblongata.** The continuation in the medulla oblongata of the lateral t. of the spinal cord. [α, 34.]—**Lemniscus t.** Ger., *Schleifenbündel.* A bundle of nerve-fibres which begins in the upper part of the pons Varolii, below the reticular formation, and separates into three portions (the superior, median, and inferior lemnisci). [I, 15 (K).]—**Lissauer's t.** A small t. of fibres at the junction of the tip of the posterior horn and lateral column; the fibres come from the posterior roots, course upward for a short distance, and then enter the posterior horn. [α, 34.]—**Lymphangeial t's.** See *Lymphatic* NODULES.—**Medial t.** A portion of the cerebral hemisphere in *Carnivora* adjoining the great longitudinal fissure, marked off by the posterior limb of the Sylvian fissure and other sulci which are continuous with or parallel to it. [I, 14 (K).]—**Motor t.** Ger., *motorisches Feld.* The motor path from the cortex of the brain to a muscle. It consists of an upper (cerebro-spinal) and a lower (spino-muscular) segment. The former consists of the t. of fibres from the brain cortex that end in the gray substance of the spinal cord, and the lower of the spinal motor cell and the fibres proceeding from this through the anterior root and nerve trunk to the muscle. [α, 34.]—**Myelo-cerebellar t.** See *Kleinhirnseitenstrang*BAHN.—**Myelonal t.** Of Owen, one of the separate columns of the spinal cord. [I, 14 (K).]—**Nuclear t. of the spinal cord.** Ger., *Kernstrang.* See *Goll's t.*—**Olfactory t.** The bundle of fibres forming the olfactory nerve. [α, 34.]—**Olivary t.** See *Olivary* BODY.—**Ophthalmic t., Optic t.** The continuation of the optic nerves from the commissure backward to the brain. At its connection with the brain each optic t. divides into two bands, which are continued into the optic thalami, the corpora geniculata, and the corpora quadrigemina. The fibres of origin from the thalamus arise partly from its surface and partly from its interior. Thence the t. winds obliquely across the lower surface of the crus cerebri in the form of a flattened band destitute of neurilemma, and is attached to the crus by its anterior margin. As it passes forward it receives fibres from the tuber cinereum and lamina cinerea. It is also connected with the tænia semicircularis and the anterior termination of the gyrus fornicatus. It finally joins with the t. of the opposite side to form the commissure. [F.]—**Peduncular t.** A t. of nerve-fibres in the crus cerebri. ["Science," Jan. 15, 1881, p. 14 (K).]—**Posterior cortical t.** Of Edinger, bundles of fibres running from the cortex of the occipital and temporal lobes to the ganglion cells of the pons varolii. [α, 34.]—**Postfrontal t.** The region of the frontal lobe, in *Carnivora,* immediately behind the frontal fissure. [I, 14 (K).]—**Postpyramidal t.** See *Posterior* PYRAMID.—**Postrestiform t.** See *Lateral* COLUMN.—**Prefrontal t.** The portion of the frontal lobe, in *Carnivora,* lying in front of the frontal fissure. [I, 14 (K).]—**Prepyramidal t.** See *Anterior* PYRAMIDS.—**Principal t. of the anterior column.** Ger., *vordere Hauptbahn.* Of Flechsig, that portion of the anterior column of the spinal cord which does not belong to the anterior pyramidal t. Quain suggests that it may serve to "connect the gray matter of different segments of the cord." [I, 15 (K).]—**Pyramidal t.** A collection of nerve-fibres in the spinal cord which may be traced from the point of origin of the lower sacral nerves upward in the posterior part of the lateral column to the lower part of the medulla oblongata, where they cross to the opposite side, enter the pyramid, and may be followed through it and the pons to the corresponding crus cerebri. Many of the fibres do not decussate, but run throughout their course in the anterior pyramidal t. [I, 15 (K).]—**Quintus t.** Of Meynert, a t. of fibres that crosses in the dorsal segment of the rhaphe, comes from the roof of the aqueduct, sweeps in fine curves around the outer side of the descending root of the fifth nerve, curls in beneath the posterior longitudinal bundle, and so traverses the tegmentum toward the middle line. It was formerly supposed that the t. originated in the cells of the descending root of the fifth nerve. [α, 34.]—**Respiratory t.** The respiratory organs. [J.] See also AIR-PASSAGES.—**Restiform t.** See *Restiform* BODY.—**Sagittal medullary t.** A t. that comes from the posterior third of the posterior limb of the internal capsule, skirts the outer side of the posterior horn of the lateral ventricle, and runs to the cortex of the hinder portion of the cerebrum. [α, 34.]—**Second projection t.** Of Meynert, the t. of fibres extending from the basal ganglia to the gray matter surrounding the central cavities in the peduncular system. [α, 34.]—**Semilunar t.** A crescentic t. of fibres in the external portion of the cerebellar hemisphere. [α, 34.]—**Sensory t.** Fr., *portion sensitive.* A t. of fibres that conducts sensations from without to the brain. Those portions of the cord conducting different varieties of sensation, as well as those portions of the brain that are the centres for these varieties, have not yet been positively determined. [α, 34.]—**Speech t.** A t. of fibres passing from the cortex of the third frontal convolution through the white substance outside the tail of the nucleus caudatus and terminating in the nuclei of the nerves in the oblongata that are associated in producing speech. [α, 34.]—**Spiral t.** See LAMINA *cribrosa anterior inferior.*—**Sylvian t.** The region of the brain around the fissure of Sylvius. [I, 14 (K).]—**Tegmental t.** A medullary t. occupying a position in the midst of the tegmentum dorsad of the olivary body and in the vicinity of the posterior accessory olivary nucleus. It probably connects the olivary body with the mid-brain. [α, 34.]—**Temporo-occipital t. of the crusta.** A t. of fibres on the outer side of the crusta that pass under the lenticular nucleus, or between the latter and the external geniculate body, to the temporal and the occipital lobes. [α, 34.]—**Tertiary projection t's.** Of Meynert, the peripheral nerves that have their origin in the gray matter bordering the cavities from the aqueduct of Sylvius down to the end of the spinal cord. [α, 34.]—**T's of the spinal cord.** Certain bundles of nerve-fibres which pursue a similar course in the cord, and appear to have similar functions. [I, 15 (K).]—**Teretial t's.** See FASCICULI *teretes.*—**Transverse peduncular t.** Of Gudden, a delicate lamina of gray matter extending on each side laterally from the anterior pair of corpora quadrigemina, crossing over the internal geniculate body, and passing around the corresponding crus cerebri to unite with the tænia pontis or to enter the crus It is found only exceptionally in man. [I, 6 (K): "Arch. f. Psych.," ii, p. 364 (K).]—**Uro-genital t.** See *Genito-urinary t.*—

Uveal t. See UVEA.—**Voluntary motor t.** The entire t. of fibres from the cortex cerebri to the anterior horns. [a, 34.]

TRACTION, n. Tra^{2}k'shu^{3}n. From *trahere*, to draw. Fr., *t.* Ger., *Zug*, *T.* The act or process of drawing. [a, 48.]—**Axis-t.** Ger., *Axentraction.* T. in a line with the direction of the channel through which a body (*e. g.*, the fœtus) is to be drawn.—**Elastic t.** T. by an elastic force.—**Elastic t. of the lung.** See *Elastic* TENSION *of the lung.*

TRACTOR, n. Tra^{2}k't'r. From *trahere*, to draw. 1. An apparatus for making traction, especially a vectis. 2. See under PERKINISM.—**Air-t.** Ger., *Luftzieher.* A suction t. devised by Sir J. Y. Simpson for extracting the fœtus; used by him also for elevating depressed bones of the new-born infant's skull. Its construction was like that of a breast-pump, and its cup was covered with wire gauze and thin sponge or flannel, to prevent injury of the scalp. Simpson applied it to the breach also. [A, 69.]—**Lever-t.** An instrument devised by Levis for reducing dislocations of the phalanges. It consists of a piece of board perforated at one end so that the dislocated finger may be laid upon it and strapped to it. When firmly fastened, the board gives increased power both in leverage and in traction. [E.]—**Metallic t's., Perkins's t's.** See under PERKINISM.—**Poullet's t.** A traction apparatus to be used either with the obstetrical forceps or with the sericeps (*q. v.*). [A, 15.]

TRACTUS (Lat.), n. m. Tra^{2}kt(tra^{3}kt)'u^{3}s(u^{4}s). See TRACT.—**T. alimentarius.** See *Alimentary* CANAL.—**T. arteriosus anterior.** The tract of the anterior median artery of the spinal cord. [a, 34.]—**T. arteriosi postero-laterales.** The tract of the postero-lateral arterioles of the spinal cord. [a, 34.]—**T. ethmoideus.** See GYRUS *rectus.*—**T. genalis.** See GNATHOGRAMMA.—**T. gris** (Fr.). See FASCICULI *teretes.*—**T. longitudinalis.** See STRIÆ *longitudinales mediales.*—**T. longitudinaux de Lancisi.** See STRIÆ *longitudinales Lancisii.*—**T. lymphaticus jugularis.** The system of lymphatic vessels accompanying the jugular vein from the brain to the cervical ganglia. [a, 34.]—**T. medullaris glandulæ pinealis.** The peduncle of the pineal gland. [I, 3 (K).]—**T. medullaris transversus.** See INCREMENTA *fibrosa.*—**T. motorius.** See *Motor* TRACT.—**T. nervi optici.** See *Optic* TRACT.—**T. olfactorius.** See *Olfactory* TRACT.—**T. parietalis anterior.** See *Ascending frontal* CONVOLUTION.—**T. parietalis medius.** See *Ascending parietal* CONVOLUTION.—**T. peduncularis.** See *Peduncular* TRACT.—**T. peduncularis transversus.** See *Transverse peduncular* TRACT.—**T. rhinalis** [Wilder]. See *Olfactory* TRACT.—**T. semicircularis.** See *Semilunar* TRACT.—**T. solitarius.** The descending fibres of a posterior spinal nerve-root. [a, 34.]—**T. spiralis foraminulentus.** A spot in the fossa cochleæ of the internal auditory meatus, at the base of the cochlea, in which may be seen the spirally arranged orifices (for the entrance of the fibres of the cochlear nerve) which open into the fossula inferior. [F, 32, 46 (a, 29).]—**T. supracallosus.** See *Marginal* CONVOLUTION.—**T. supracallosus inferior.** See GYRUS *fornicatus.*—**T. supracallosus superior.** See *Marginal* CONVOLUTION.

TRADESCANTIA (Lat.), n. f. Tra^{2}d(tra^{3}d)-e^{2}s-ka^{2}n(ka^{3}n)'-shi^2(ti^2)-a^3. From *Tradescant*, gardener to Charles I of England. Fr., *tradescantie.* Spiderwort; a genus of the *Tradescantieæ* (a tribe of the *Commelinaceæ*). [a, 35.]—**T. axillaris.** A Malabar species, used externally in ascites. [a, 35.]—**T. diuretica.** A diuretic and emollient Brazilian species. [a, 35.]—**T. malabarica.** Grass-leaved spiderwort. In India its herbage, cooked in oil, is used in leprosy, ringworm, etc. [a, 35.]—**T. virginica.** Fr., *tradescantie de Virginie, éphémère, éphémerine, fleur d'un jour, moly de Virginie.* Flower-of-a-day, Virginian spiderwort; used in Jamaica for the bites of venomous spiders. [a, 35.]

TRAGACANTH, n. Tra^{2}g'a^2-ka^{2}nth. From τραγάκανθα, a plant producing t. Lat., *tragacantha, tragacanthum, gummi tragacantha* (seu *tragacanthæ* [Belg. Ph.]), *tragacanthæ gummi* [Gr. Ph.]. Ger., *Tragant, Traganth.* The concrete exuded juice of various species of *Astragalus*, occurring in whitish, reddish, or yellowish pieces of various shapes, brittle and hard, odorless and almost tasteless. It swells up in water without dissolving, forming a viscous mass. It contains two principal constituents, tragacanthin (*q. v.*) and a substance resembling arabin and soluble in water. T. is demulcent, but is chiefly used for imparting firmness to troches, etc., and for suspending heavy powders in mixtures. [B, 10; a, 35.]—**Black t.** The inferior varieties of t., containing bark, earth, etc. [B, 15; a, 35.]—**False t.** A gum probably identical with Caramania gum. [B, 5 (a, 21).]—**Flake t.** The most valuable variety of t., occurring in thin, whitish, foliate pieces or flakes, from 1 to 4 inches long. [B, 15]—**Gum t.** See *T.*—**Hog-gum t.** See *Bassora* GUM.—**Senegal t.** The gum of *Sterculia tragacantha.* [a, 35.]—**Smyrna t.** Ger., *Smyrnatraganth, Blättertraganth.* T. imported from Smyrna. It is whitish, and consists of somewhat large, thin, flat or (rarely) vermiform pieces. [a, 35.]—**Syrian t.** A fine variety of t. obtained from Persia and Kurdistan. [B, 15.]—**Vermicelli t.** T. occurring in more or less contorted, vermiform pieces. [a, 35.]

TRAGACANTHA (Lat.), n. f. Tra^{2}g(tra^{3}g)-a^{2}k(a^{3}k)-a^{2}nth-(a^{3}nth)'a^3. See TRAGACANTH.—**Glycerinum tragacanthæ** [Br. Ph.]. A preparation made by triturating to a transparent, homogeneous jelly 3 parts of powdered tragacanth, 15 of glycerin, and 2 of water. The Ger. Ph., Finn. Ph., and Hung. Ph. (2d ed.) have a similar preparation made of 1 part of tragacanth, 5 parts of alcohol, and 50 (49 [Hung. Ph.]) of glycerin. [B, 95 (a, 38).]—**Gummi t.** (seu **tragacanthæ**). See TRAGACANTH.—**Mucilago cum gummi t.** [Fr. Cod.], **Mucilago (gummi** [Belg. Ph., Gr. Ph.]) **tragacanthæ** [U. S. Ph., Br. Ph., Netherl. Ph., Russ. Ph.]. Fr., *mucilage de gomme adragante* [Fr. Cod.]. Ger., *Traganthschleim.* A tenacious, viscous mass formed by mixing tragacanth with water. The U. S. preparation contains 6 parts of tragacanth, 18 of glycerin, and water up to 100. The Br. Ph. directs that 12 parts of tragacanth be triturated with 22 fluid parts of alcohol, and 875 parts of water stirred in. The Fr. preparation contains 9, the Netherl. 12, the Gr. 60, and the Belg. 82½ parts of water to 1 part of tragacanth. The Russ. Ph. orders 48 parts of boiling water to 1 part of tragacanth if the mucilage is to be used for troches, otherwise 480 parts of water to 4 of tragacanth and 1 part of gum arabic. The Belg. Ph. has also a *mucilago spissa*, containing 66 parts of tragacanth with water up to 1,000. [B; B, 95 (a, 38).]—**Pulvis tragacanthæ compositus** [Br. Ph.]. Fr., *poudre mucilagineuse* (ou *de gomme adragante composée*). A preparation consisting of 1 part each of tragacanth, gum arabic, and starch, and 3 parts of sugar. Various old ph's had similar preparations, sometimes containing other substances, such as licorice, marsh-mallow, poppy-seeds, oil of anise, etc. [B; B, 95, 119 (a, 38).]—**Tragacanthæ gummi.** See TRAGACANTH.—**T. electa.** Selected tragacanth. [a, 35.]—**T. in sortis.** Common tragacanth, containing brownish and whitish pieces and flake and vermicelli t. [a, 35.]—**T. massiliensis.** See ASTRAGALUS *massiliensis.*—**T. media.** See *T. in sortis.*—**T. pulverata.** Selected and purified tragacanth, crushed, dried at 40° C., reduced to a white powder, and sifted through a No. 100 silk sieve [Fr. Cod.] (a 1,000-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).]

TRAGACANTHIN, n. Tra^{2}g-a^{2}k-a^{2}nth'i^{2}n. Ger., *T.*, *Tragacanthstoff.* A proximate principle existing in tragacanth; a vegetable mucilage insoluble in water, thought to be identical with bassorin, but regarded by some as distinct. [B, 5, 10.]

TRAGACANTHUM (Lat.), n. n. Tra^{2}g(tra^{3}g)-a^{2}k(a^{3}k)-a^{2}nth-(a^{3}nth)'u^{3}m(u^{4}m). See TRAGACANTH.

TRAGANT (Ger.), **TRAGANTH** (Ger.), n's. Tra^{3}g-a^{3}nt'. See TRAGACANTH and ASTRAGALUS (6th def.).—**Blättert'.** See *Smyrna* TRAGACANTH.—**T'schleim.** See *Mucilago* TRAGACANTHÆ.—**T'stoff.** See TRAGACANTHIN.—**T'wurzel.** The root of *Astragalus exscapus.* [a, 35.]

TRAGANTHIN, n. Tra^{2}g-a^{2}nth'i^{2}n. See TRAGACANTHIN.

TRAGBAHRE (Ger.), n. Tra^{3}g'ba^{3}r e^2. See *Hand*-LITTER.

TRAGBAND (Ger.), n. Tra^{3}g'ba^{3}nd. A sling, a truss. [a, 48.]

TRAGBAR (Ger.), adj. Tra^{3}g'ba^{3}r. 1. Portable. 2. Fertile, also pregnant. [A, 315 (a, 48).]

TRAGBEUTEL (Ger.), n. Tra^{3}g'boit-e^{2}l. A suspensory bandage for the scrotum. [a, 14.]

TRAGBINDE (Ger.), n. Tra^{3}g'bi^{2}nd-e^2. See *Suspensory* BANDAGE.

TRAGEA (Lat.), n. f. Traj(tra^{3}g)'e^2-a^3. Gr., τραγέα (from τρώγειν, to eat). A stomachic powder. [L, 50 (a, 14).]—**T. aromatica Gabelchoveri.** A powder of 40 parts of cinnamon, 20 each of red and white sandal-wood and ginger, 9 each of cloves, smaller galangal, mace, nutmeg, and grana Paradisi, and 2,400 of white sugar. [B, 119 (a, 34).]—**T. aromatica officinalis.** A powder of 30 parts of cinnamon, 11 each of cloves, ginger, and nutmeg, 7 of mace, 15 of red sandal-wood, and 900 of sugar. [B, 119 (a, 38).]

TRAGEMA (Lat.), n. n. Tra^{2}j(tra^{3}g)-e^{2}m(am)-a^3. Gen., *-em'-atos* (*-atis*). Gr., τράγημα (from τρώγειν, to eat). A sweetmeat (cf. DRAGÉE). [A, 311 (a, 48).]

TRÄGER (Ger.), n. Trag'e^{2}r. A bearer or holder; of Selenka, the trophodisc or trophoblast; in compos., the atlas.

TRÄGERIN (Ger.), n. Trag'e^{2}r-i^{2}n. A pregnant woman.

TRÄGHEIT (Ger.), n. Trag'hit. See INERTIA.—**Herzt'.** See LENTOR *cordis.*—**T. der Gebärmutter.** See *Uterine* INERTIA.—**T. der Muskeln.** See MYONARCOSIS.

TRAGIA (Lat.), n. f. Traj(tra^{3}g)'i^2-a^3. From *Tragus*, the Latinized name of H. Bock, a German botanist. Fr., *t.*, *tragie.* A genus of the *Euphorbiaceæ.* [a, 35.]—**T. cannabina.** Fr., *t. à feuilles de chanvre.* An Indian shrub. The root is diaphoretic, diuretic, febrifuge, and alterative. [a, 35.]—**T. chamælea.** Fr., *t. chamélée.* A species used in various cachexiæ. The juice is diuretic, and, mixed with wine or oil, is used as an astringent and tonic. [a, 35.]—**T. involucrata.** A species the root of which is used as an alterative and diuretic, and its juice in fever and itch. [a, 35.]—**T. mercurialis.** A species the root of which is used in chronic syphilis, etc. [a, 35.]—**T. urens.** Fr., *liane brûlante.* A variety of *T. cannabina.* [a, 35.]—**T. volubilis.** Twining cowitch; a West Indian species. The root is laxative and diuretic, and the juice, mixed with sea-salt, is used in frambœsia. [a, 35.]

TRAGICUS (Lat.), adj. Tra^{2}j(tra^{3}g)'i^{2}k-u^{3}s(u^{4}s). From *tragus* (*q. v.*). Pertaining to the tragus; as a n. m., a short, flattened muscle on the outer surface of the tragus. [F, 31.]

TRÄGIG (Ger.), adj. Trag'i^{2}g. See PREGNANT.

TRAGOMASCHALIA (Lat.), n. Trag(tra^{3}g)-o(o^3)-ma^{2}sk-(ma^{3}sch^2)-al(a^{3}l)'i^2-a^3. From τράγος, a goat, and μασχάλη, the armpit. See HIRCUS *alarum.*

TRAGOPHONIA (Lat.), n. f. Tra^{2}g(tra^{3}g)-o(o^3)-fon'i^2-a^3. From τράγος, a goat, and φωνή, the voice. See ÆGOPHONY.

TRAGOPODIA (Lat.), n. f. Tra^{2}g(tra^{3}g)-o(o^3)-pod(po^{2}d)'i^2-a^3. From τράγος, a goat, and πούς, the foot. See GENU *valgum.*

TRAGOPOGON (Lat.), n. m. and n. Tra^{2}g(tra^{3}g)-o(o^3)-pog'-o^{2}n(on). Gen., *-on'os* (*-is*), *-og'i.* From τράγος, a goat, and πώγων, a beard. Fr., *salsifis.* Ger., *Bocksbart, Geissbart.* A genus of the *Tragopogoneæ*, which are a subtribe of the *Cichoraceæ.* [a, 35.]—**T. major.** Ger., *grosser Bocksbart.* The larger goat's-beard of Europe. The root contains a bitter juice, and is perhaps more active than those of other species of *T.* [a, 35.]—**T. porrifolium, T. porrifolius.** Fr., *cercifix à feuilles de poireau, barbebon, salsifis blanc* (ou *des jardins*). Ger., *lauchblättriger Bocksbart.* Star-of-Jerusalem, vegetable oyster, salsify, purple goat's-beard, the τραγοπώγων of Dioscorides; a species found in Europe and Asia, cultivated for its edible root, *radix tragopogonis* (seu *tragopogi*, seu *barbæ hirci*, seu *barbulæ hirci*), which is mucilaginous and bitter, and is used like that of *T. pratensis.* [a, 35.]—**T. pratense,**

T. pratensis. Fr., *cercifis des prés* (ou *sauvage*), *thalibeu, ratabout, cochet, barbe de bouc.* Ger., *Wiesenbocksbart, wilde Haferwurz* (oder *Scorzonere*), *Josephsblume, Habermerkwurzel.* Go-to-bed-at-noon, noon-tide, shepherd's-clock, yellow (or meadow) goat's-beard of Europe. The bitter, mucilaginous, mildly aperient root, *radix tragopogonis* (seu *tragopogi*, seu *barbæ hirci*, seu *barbulæ hirci*, seu *scorzoneræ silvestris*), is used like that of *Taraxacum officinale.* [a, 35.]

TRAGOPUS (Lat.), adj. Tra²g(tra³g)′o²p-u³s(u⁴s). Gr., τραγόπους (from τράγος, a goat, and πούς, the foot). Fr., *tragope.* Ger., *bocksfüssig.* Knock-kneed. [L, 50 (a, 14).]

TRAGOSELINUM (Lat.), n. n. Trag(tra³g)-o(o³)-se²l-in(en)′-u³m(u⁴m). From τράγος, a goat, and σέλινον, parsley. Fr., *tragosélin.* 1. A genus of the *Umbelliferæ.* [a, 35.] 2. See PIMPINELLA *saxifraga.*—**T. angelica.** See ÆGOPODIUM *podagraria.*—**T. magnum, T. majus.** See PIMPINELLA *magna.*—**T. saxifraga.** See PIMPINELLA *saxifraga.*

TRAG-SITZ (Ger.), n. Tra³g′zi²ts. See BEARING-SEAT.

TRAGULINA (Lat.), n. n. pl. Trag(tra³g)-u²l(u⁴l)-in(en)′a³. From τράγος, a goat. A family of deer-like ruminants, the chevrotains. [a, 48.]

TRAGUS (Lat.), n. m. Trag(tra³g)′u³s(u⁴s). Gr., τράγος. Fr., *t.* Ger., *Bock* (1st def.), *Ohrbock* (1st def.). 1. A nipple-like projection of the cartilage of the auricle, directed backward and in front of the orifice of the external auditory canal. [F.] 2. See HIRCUS (2d def.). 3. See ŒSTRUATION. 4. A genus of grasses ; of Dioscorides, the *Ephedra distachya ;* of Hippocrates, a species of astringent *Fucus ;* also the *Satsola t., Salsola kali,* and *Sedum album.* [a, 35.] —**Herba tragi.** See SALSOLA *kali* and SALSOLA *t.*—**T. auriculæ.** See *T.* (1st def.).

TRAHENS (Lat.), adj. Tra(tra³)′he²nz(hans). Gen., *-hent′is.* Pres. part. of *trahere*, to draw. Drawing ; used of a muscle that has a drawing action. [a, 48.]—**T. urethram.** See BULBO-CAVERNOSUS, n.

TRAILING, adj. Tral′i²n². See PROCUMBENT.

TRAINING SCHOOL, n. Tran′i²n²-skul. Fr., *école d'infirmières.* An institution in which nursing is taught. [a, 34.]

TRAIT (Fr.), n. Tre². See LINE (3d def.).—**T. génal.** See GNATHOGRAMMA.

TRAITEMENT (Fr.), n. Tre²t-ma³n². See TREATMENT.—**T. marin.** The treatment of disease by residence at the sea-shore, sea baths, etc.

TRAJECTUS (Lat.), n. m. Tra²(tra³)-je²kt(ye²kt)′u³s(u⁴s). Gen., *-ject′us.* From *trajicere*, to throw across. Fr., *trajet.* See TRACT.—**T. abdominis, T. inguinalis.** See *Inguinal* CANAL.

TRAJET (Fr.), n. Tra³-zhe². See TRACT.—**T. des fibres dans l'écorce** [Huguenin]. The white fibres of the cerebral cortex, described by Gerlach. [I, 28 (K).]—**T. inguinal.** See *Inguinal* CANAL.

TRAMA (Lat.), **TRAME** (Lat.), n's f. Tram(tra³m)′a³, -e(a). Gr., τράμη (3d def.), τράμις (3d def.). Fr., *trame.* 1. The tissue separating the two surfaces of the gills of the *Hymenomycetes.* [a, 35.] 2. Tissue, usually some form of connective tissue, forming the framework of an organ or part. [J, 33.] 3. See RHAPHE.

TRAMESAIGUES (Fr.), n. Tra³-m′-se²g. A place in the department of the Hautes-Pyrénées, France, where there is a hot sulphurous spring. [L, 49 (a, 14).]

TRAMIS (Lat.), n. f. Tram(tra³m)′i²s. Gr., τράμις. See RHAPHE.

TRANCE, n. Tra²ns. Gr., ἔκστασις. From *transitus*, a passing over. Fr., *transe.* Ger., *Entzückung* (2d def.). 1. A protracted syncope. [A, 42.] 2. A state of insensibility to ordinary external surroundings, together with suspension of volitional power and to a great extent of the vital functions. It is often associated with intense mental exaltation and preoccupation, and may simulate death. [D, 20.] Cf. ECSTASY.—**Hysterical t.** The t.-like condition sometimes occurring in hysteria. [D, 35.]

TRANCHÉES (Fr.), n. pl. Tra³n²-sha. See COLIC and AFTER-PAINS.—**T. utérines.** See AFTER-PAINS.

TRANK (Ger.), n. Tra³n²k. See BEVERAGE and PROPOMA.—**Wiener T.** [Ger. Ph.]. See *Infusum* SENNÆ *compositum.*

TRANSDUCTOR [Coues] (Lat.), n. m. Tra²ns(tra³ns)-du³kt-(du⁴kt)′o²r. Gen., *-or′is.* From *transducere*, to lead across. See TRANSVERSUS *pedis.*—**T. hallucis.** See *T.*

TRANSFER, TRANSFERENCE, n's. Tra²ns′fu⁵r, tra²ns′-fu⁵r-e²ns. From *transferre*, to bear across. See TRANSFERT.—**Thought-t.** A supposed overmastering influence exerted by one person over the thoughts of another through the instrumentality of the so-called psychic force. [a, 48.]

TRANSFERT (Fr.), n. Tra³n²s-fe²r. A phenomenon observed in experiments in metalloscopy and analogous investigations, consisting in the transfer of abnormities of sensation and motility (of hysterical origin or induced artificially) from a given region of one lateral half of the body to the same region on the opposite side.

TRANSFIXION, n. Tra²ns-fi²k′shu³n. From *transfigere*, to pierce through. See under AMPUTATION *by t.*

TRANSFORATEUR (Fr.), n. Tra³n²s-for-a³-tu⁵r. An instrument devised by Hubert for boring through the sphenoid bone in the operation of craniotomy. It consists of a perforator (*terebellum, perce-crâne perforateur*) and a guard, the former ending in an olive-shaped piece of steel with screw-threads cut on it, tipped with a trocar point. [A, 15, 22.]

TRANSFORATION, n. Tra²ns-fo²r-a′shu³n. From *transforare*, to pierce through. Lat., *sphenotresia.* Fr., *t., sphénotrésie.* Of Hubert, a procedure for breaking up the base of the fœtal skull by repeated perforation with the transforateur. [A, 23, 24.]

TRANSFORMATION, n. Tra²ns-fo²rm-a′shu³n. Gr., μεταμόρφωσις. Lat., *transformatio* (from *transformare*, to change in shape). Fr., *t.* Ger., *T., Verwandelung.* Change of form, condition, or character ; especially morbid change, degeneration. [a, 48.] —**Cheesy t.** See CASEATION.—**Hæmatic t.** Of Burdach, the t. into pus-cells of blood-cells that have passed into the ordinary secretions. [a, 34.]—**T. colloïde** (Fr.). See *Colloid* DEGENERATION. —**T. graisseuse** (Fr.). See *Fatty* DEGENERATION.

TRANSFORMISM, n. Tra²ns-fo²rm′i²z′m. From *transformare*, to change. See DARWINISM.

TRANSFUSION, n. Tra³ns-fu²′zhu³n. Gr., διάχυσις. Lat., *transfusio* (from *transfundere*, to pour out). Fr., *t.* Ger., *T., Ueberleitung.* The act of pouring from one vessel to another ; the introduction into the vessels of the body of fluid material, especially of blood taken from another body ; also the act of causing a fluid to pass through the skin into the body.—**Autot'.** See the major list.—**Direct t.** The t. of blood from vessel to vessel without its exposure to the air. [E.] Cf. *Aveling's* APPARATUS.—**Galvanic t.** See CATAPHORESIS.—**Hypodermic t.** The t. of blood, milk, or a saline solution by hypodermic injection. [a, 34.]—**Indirect t., Mediate t.** The process of injecting blood which has first been drawn into an open vessel (and sometimes defibrinated). [E.]—**Nervous t.** The hypodermic injection of an extract made from the brain or spinal cord. [a, 34.]—**Peritoneal t.** Fr., *t. péritonéale.* T. into the peritoneal cavity. [a, 34.]—**Reciprocal t.** Of Brunton, a proposed exchange of equal volumes of blood between a fever patient and a healthy person who has recovered from the fever and is therefore proof against it, and whose blood is likely to contain an element (antitoxine) destructive to the micro-organisms in the blood of the patient. ["N. Y. Med. Jour.," Aug. 17, 1889, p. 184 (a, 17).]—**T. by Aveling's method.** See *Direct t.* and *Aveling's* APPARATUS.—**T. infusoire** (Fr.). See INFUSION (1st def.).—**Venous t.** The t. of blood by injecting it into a vein. [a, 34.]

TRANSITUS (Lat.), n. m. Tra²ns(tra³ns)′i²t-u³s(u⁴s). Gen., *trans′itus.* From *transire*, to go over. Gr., μετάβασις. See PASSAGE (1st def.).—**T. ad ventriculum quartum.** See AQUEDUCT *of Sylvius.*

TRANSLUCENT, TRANSLUCID, adj's. Tra²ns-lu²s′e²nt, -i²d. From *trans*, through, and *lucere*, to shine. Transmitting light, but not transparent. [a, 48.]

TRANSLUMINATION, n. Tra²ns-lu²m-i²n-a′shu³n. From *trans*, through, and *luminare*, to light up. See DURCHLEUCHTUNG.

TRANSMISSIBILITY, n. Tra²ns-mi²s-i²b-i²l′i²t-i². From *transmittere*, to send across. Capability of being communicated or passed on from one to another. [a, 48.]

TRANSMISSION, n. Tra²ns-mi²sh′u³n. Gr., διαπομπή, παραπομπή. Lat., *transmissio.* Fr., *t.* The act or process of sending over or through. [a, 48.]—**Duplex t.** The power possessed by nerves of transmitting impulses in two directions. [K, 35.]

TRANSMUTATION, n. Tra²ns-mu²t-a′shu³n. Gr., μεταβολή, μεταλλαγή, μεταμόρφωσις. Lat., *transmutatio* (from *transmutare*, to change). Ger., *T.* 1. Conversion into another substance or form. [a, 48.] 2. In botany, constructive metabolism. [a, 35.]—**Doctrine** (or **Theory**) **of t.** Ger., *T'slehre.* See DARWINISM.

TRANSOCULAR, adj. Tra²ns-o²k′u²l-a³r. From *trans*, across, and *oculus*, the eye. Extending across the eye (said of a line on a bird's head). [L, 221.]

TRANSPALMARIS [Coues] (Lat.), n. m. Tra²ns(tra³ns)-pa²l-(pa³l)-mar(ma³r)′i²s. From *trans*, across, and *palma*, the palm. See PALMARIS *brevis.*

TRANSPARENT, adj. Tra²ns-pa²r′e²nt. Gr., διαφανής. Lat., *transparens* (from *trans*, through, and *parere*, to appear). Ger., *durchsichtig.* That can be seen through ; transmitting light so as to render objects visible that are beyond the t. medium. [a, 48.]

TRANSPERINÆUS [Coues] (Lat.), n. m. Tra²ns(tra³ns)-pe²r-i²n-e′(a³′e²)-u³s(u⁴s). From trans, *across*, and *perinæum* (*q. v.*). See TRANSVERSUS *perinæi.*

TRANSPINALES [Coues] (Lat.), n. m. pl. Tra²ns(tra³ns)-pin-(pen)-al(a³l)′ez(e²s). From *trans*, across, and *spina*, the spine. The intertransversarii muscles. [a, 50.]

TRANSPIRATIO (Lat.), n. f. Tra²ns(tra³ns)-pi²r(per)-a(a³)′-shi²(ti²)-o. Gen., *-on′is.* Transpiration.—**T. unilatera.** Unilateral sweating.

TRANSPIRATION, n. Tra²ns-pi²r-a′shu³n. Lat., *transpiratio* (from *trans*, through, and *spirare*, to breathe). Fr., *t.* Ger., *Ausdünstung.* 1. The act of passing off, or the matter passed off, through an investing or lining membrane, especially through the skin ; cutaneous exhalation ; perspiration. 2. The exhalation or evaporation of water from vegetable tissues, especially the leaves. —**Cutaneous t.** See PERSPIRATION.—**Insensible t.** See *Insensible* PERSPIRATION.—**Pulmonary t.** The exhalation of watery vapor by the lungs. [J, 17, 18.]

TRANSPIRATORY, adj. Tra²ns′pir-a²t-or-i². Lat., *transpiratorius.* Fr., *transpiratoire.* See PERSPIRATORY.

TRANSPLANTATION, n. Tra²ns-pla²nt-a′shu³n. Gr., μεταφυτεία. Lat., *transplantatio* (from *transplantare*, to transplant). Ger., *Ueberpflanzen.* The absolute removal of a portion from one part of the body and its implantation into another part or upon another organism. [E.]—**Corneal t.** An operation, introduced by Wolfe, in which flaps, broad at the base and converging toward the cornea, are taken from the ocular conjunctiva on each side and dissected up to the cul-de-sac. They are turned over on the cornea and secured in the usual way. A stop-lance knife is introduced into the limbus, so as not to injure the conjunctival flap, as far as the stop. The director is passed through one of the openings and pushed in front of iris and lens out through the opposite side. The double-bladed knife is placed in the grooves and the corneal

O, no; O², not; O³, whole; Th, thin; Th², the; U, like oo in too; U², blue; U³, lull; U⁴, full; U⁵, urn; U⁶, like ü (German).

flap separated and placed in tepid water. A similar conjunctival and corneal flap is then removed from a second patient, but here the lance-knife must be used so as not to interfere with the pillars of the iris, and it must be rapidly withdrawn, so as to prevent, as much as possible, the escape of the aqueous humor and consequent prolapse of the iris. The transparent graft is then placed in position and secured by stitches in the corners of the conjunctival flaps. ["Med. Times and Gaz.," Nov. 22, 1879 (F).]—**T. of pterygium.** An operation, introduced by Desmarres, in which the pterygium is carefully detached from the cornea and for a distance of 5 to 6 mm. from the sclera also. Then from the lower margin of the wound surface an incision is made through the conjunctiva for several millimetres, and in this triangular gaping space the detached pterygium is inserted and fastened by sutures. Knapp's operation (for broad pterygia) consists in dissecting the pterygium completely from head to base, cutting off the hard, cartilaginous head, and then dividing the growth longitudinally into a lower and an upper half. Then incisions are made in the conjunctiva above and below, parallel to the corneal margin (the conjunctiva being dissected up) and their edges brought down and approximated by sutures so as to close in the vacant space originally occupied by the pterygium. The divided halves are then transplanted upward and downward into the conjunctival incisions and fastened by sutures. ["Arch. f. Ophth.," xiv, p. 267 (F).]—**T. of skin.** Ger., *Hautimplantation.* The t. of large thin shavings of skin from a healthy portion of the body to an exposed wound or a granulating surface. [α, 34.]—**T. of teeth.** See ALLOTRIODONTIA (1st def.).

TRANSPOSITIO (Lat.), n. f. Tra^{2}ns(tra^{3}ns)-po^{2}z-i^2'shi^2(ti^2)-o. Gen., *-on'is.* See TRANSPOSITION.—**T. cordis.** See DEXIOCARDIA.

TRANSPOSITION, n. Tra^{2}ns'po^{2}z-i^2'shu^{3}n. Gr., μετάθεσις. Lat., *transpositio* (from *transponere*, to remove). An interchange of situation.—**T. of the viscera, Visceral t.** T. of the viscera so that those normally situated in the right are placed in the left half of the body and *vice versa.* [α, 34.]

TRANSSUBSTANTIATION, n. Tra^{2}ns-su^{3}b-sta^{2}n-shi^2-a'-shu^{3}n. From *trans*, through, and *substantia*, substance. Of Vetter and Burdach, the absorption of a tissue and its replacement by another. It is said to be *regressive* when a special tissue is replaced by a more general one, and *progressive* when a general is replaced by a special tissue. [J, 33.]

TRANSUDATE, n. Tra^{2}ns'u^{2}d-at. From *trans*, through, and *sudare*, to perspire. Ger., *Transsudat.* The product of transudation. [D.]

TRANSUDATION, n. Tra^{2}ns-u^{2}d-a'shu^{3}n. From *trans*, through, and *sudare*, to perspire. Fr., *transsudation.* Ger., *Durchschwitzen.* 1. The passage of a liquid through a membrane or tissue, especially the filtration of blood-serum through the capillaries: also a transudate. [D, 3.] Cf. EXUDATION and DIAPEDESIS. 2. The irrigation of cells by the nutritive plasma exuded from blood capillaries. [J.]—**Engorgement t.** Ger., *Stauungst'.* A t. due to engorgement. In Auspitz's classification of skin diseases, the engorgement t's are a family of "engorgement dermatoses," in which there is serous effusion into the tissues of the skin, with the consequent production of either simple œdema, or, from excess of nutritive supply, induration and hypertrophy of the connective tissue of the skin (see ELEPHANTIASIS *Arabum*), or, from pressure, atrophy of the connective tissue (see SCLEREMA *cutis*). [G, 4.]—**Œdematous t.** T. that results in œdema; the transudate of œdema. [D.]

TRANSVERSA (Lat.), n. f. Tra^{2}ns(tra^{3}ns)-vu^{5}rs(we^{2}rs)'a^3. The transverse diameter of the pelvis.

TRANSVERSAIRE (Fr.), n. Tra^{3}n^{2}s-ve^{2}r-sa^{2}r. See TRANSVERSALIS.—**T. cervical.** See TRACHELOMASTOIDEUS.—**T. de la nuque.** See OCCIPITALIS *minor.*—**T. du cou.** See TRANSVERSUS *colli.*—**T. épineux.** 1. See TRANSVERSOSPINALIS. 2. See MULTIFIDUS *spinæ*, SEMISPINALIS *colli*, and SEMISPINALIS *dorsi.*—**T. épineux antérieur.** See RECTUS *capitis anticus major.*

TRANSVERSAL, adj. and n. Tra^{2}ns-vu^{5}r's'l. Fr., *t.* See TRANSVERSALIS.—**Short t.** See ILIO-SPINAL (2d def.).—**T. du nez** (Fr.). See COMPRESSOR *naris.*

TRANSVERSALIS (Lat.), adj. Tra^{2}ns(tra^{3}ns)-vu^{5}rs(we^{2}rs)-al(a^{3}l)'i^{2}s. Lying crosswise; as a n. m., a muscle lying transversely. [C.]—**T. abdominis.** See TRANSVERSUS *abdominis* and LUMBO-ABDOMINALIS.—**T. capitis.** See TRACHELOMASTOIDEUS (1st def.).—**T. cervicis.** See TRACHELOMASTOIDEUS.—**T. cervicis anticus.** 1. The longus colli accessorius. [L.] 2. An anomalous muscle arising from the oblique processes of the sixth to the fourth cervical vertebræ and inserted into the third to the first. [L, 332.]—**T. cervicis medius.** An anomalous muscle extending between the transverse processes of the second and sixth or seventh cervical vertebræ. [L, 332.]—**T. cervicis posterior major.** See TRACHELOMASTOIDEUS (1st def.).—**T. cervicis posticus minor.** See TRACHELOMASTOIDEUS *accessorius.*—**T. colli.** See TRACHELOMASTOIDEUS.—**T. costarum.** See TRACHELOCOSTALIS.—**T. digitorum.** See TRANSVERSUS *pedis.*—**T. dorsi.** See LONGISSIMUS *dorsi.*—**Transversales hyoidei.** A short band of muscular fibres, found in some of the lower mammals, uniting the superior extremities of the styloid cornua, and in its contraction approximating them. [Bourgelat (L, 13).]—**T. lumborum.** The portion of the quadratus lumborum arising from the transverse processes of certain of the lumbar vertebræ. [L, 332.]—**T. nasi.** 1. See COMPRESSOR *naris.* 2. A small single muscle of most of the lower mammals, which passes from one nasal cartilage to the other. It is a dilator of the nostrils. [L, 13.]—**T. pedis, T. plantæ.** See TRANSVERSUS *pedis.*

TRANSVERSE, adj. Tra^{2}ns-vu^{5}rs'. Lat., *transversus, transversalis* (from *transvertere*, to turn athwart). Fr., *t., transversal.* Ger., *quer, querlaufend, querliegend.* Crosswise, in a direction at right angles to the length of a body. [α, 35.]

TRANSVERSE (Fr.), adj. and n. Tra^{3}n^{2}s-ve^{2}rs. See TRANSVERSALIS.—**T. cervical.** See TRACHELOMASTOIDEUS.—**T. de l'abdomen.** See TRANSVERSUS *abdominis.*—**T. de la langue.** See TRANSVERSUS *linguæ.*—**T. de la mâchoire inférieure.** See MYLOHYOIDEUS (2d def.).—**T. de l'auricule, T. de l'oreille.** See TRANSVERSUS *auriculæ.*—**T. du menton.** See TRANSVERSUS *menti.*—**T. du nez.** See COMPRESSOR *naris.*—**T. du périnée.** See TRANSVERSUS *perinæi.*—**T. profond du périnée.** See TRANSVERSUS *perinæi profundus.*—**T. superficiel du périnée.** See TRANSVERSUS *perinæi superficialis.*

TRANSVERSO-ANALIS (Lat.), n. m. Tra^{2}ns(tra^{3}ns)-vu^{5}rs(we^{2}rs)''o(o^3)-a^{2}n(a^{3}n)-al(a^{3}l)'i^{2}s. See TRANSVERSUS *perinæi superficialis.*

TRANSVERSOCOSTALES (Lat.), n. m. pl. Tra^{2}ns(tra^{3}ns)-vu^{5}rs(we^{2}rs)''o(o^3)-ko^{2}st-al(a^{3}l)'ez(e^{2}s). From *transversus* (*q. v.*), and *costa*, a rib. Ger., *Quermuskeln der Rippen.* Analogues of the levatores costarum of man found in the lower mammals. [L.] Cf. COSTOSTERNALIS.

TRANSVERSO-ILIAQUE (Fr.), n. Tra^{3}n^{2}s-ve^{2}r-so-e-le-a^{3}k. See QUADRATUS *lumborum.*

TRANSVERSOSPINALIS (Lat.), n. m. Tra^{2}ns(tra^{3}ns)-vu^{5}rs(we^{2}rs)''o(o^3)-spin(spen)-al(a^{3}l)'i^{2}s. From *transversus* (*q. v.*), and *spina*, the spine. 1. A muscle extending between the transverse and spinous processes of a vertebra. [L, 332.] 2. All of the muscles so attached regarded as one. [L, 31.]—**T. breves.** The obliquus capiti minor, rotatores dorsi breves, and rotatores dorsi longi. [L. 332.]—**T. longi.** The semispinalis capitis, semispinalis cervicis, semispinalis dorsi, and the multifidus spinæ. [L, 332.]—**T. lumborum.** See MULTIFIDUS *spinæ.*

TRANSVERSO-URETHRALIS (Lat.), n. m. Tra^{2}ns(tra^{3}ns)-vu^{5}rs(we^{2}rs)''o(o^3)-u^{2}r(ur)-e^{2}th(ath)-ral(ra^{3}l)'i^{2}s. From *transversus* (*q. v.*), and *urethra* (*q. v.*). See *Guthrie's* MUSCLE.

TRANSVERSUS (Lat.), adj. Tra^{2}ns(tra^{3}ns)-vu^{5}rs(we^{2}rs)'u^{3}s-(u^{4}s). From *transvertere*, to turn athwart. See TRANSVERSE; as a n., see *T. perinæi superficialis.*—**T. abdominis.** Ger., *querer Bauchmuskel, Breitmuskel des Abdomens.* A muscle lying beneath the obliquus abdominis internus which arises from the inner surfaces of the six lower ribs, the lumbodorsal fascia, the inner lip of the anterior two thirds of the crest of the ilium, and the outer portion of Poupart's ligament, and is inserted into the transversalis fascia and the front of the os pubis and the pectineal line. [L, 31, 141, 332.]—**T. auriculæ, T. auris.** A muscle which lies on the convex or posterior surface of the pinna. It consists of radiating fibres, partly tendinous and partly muscular, extending from the convexity of the concha to the prominence corresponding with the groove of the helix. [F. 31.]—**T. bulbi.** Transverse fibres of the t. perinæi profundus behind the urethra above the bulb. [L, 31.]—**T. colli.** An anomalous muscle behind the manubrium sterni which arises from the first costal cartilage and unites in the middle line with its fellow and the deep layer of the cervical fascia. [L, 332.]—**T. costarum.** See COSTOSTERNALIS.—**T. linguæ.** Transverse muscular fibres between the linguales inferior and superior which are attached in the median line to a vertical fibrous septum and pass outward to the borders and dorsum of the tongue. [L, 31, 332.]—**T. mandibulæ.** See MYLOHYOIDEUS (2d def.).—**T. manus.** The outer portion (often separated from the rest of the muscle) of the adductor pollicis. [L, 332.]—**T. menti.** Ger., *Doppelkinnmuskel.* Muscular fibres uniting in front the depressor anguli oris of one side with that of the other. [L, 332.]—**T. nasi.** See COMPRESSOR *naris.*—**T. orbitæ.** An anomalous muscle arising from the os planum which passes across the orbit either above or below the levator palpebræ and is inserted into the outer margin of the orbit. [L, 332.]—**T. pectoris.** Of Arnold, see TRIANGULARIS *sterni.*—**T. pedis.** Fr., *couvreur.* A muscle arising from the lateral metatarso-phalangeal ligaments, and inserted into the first phalanx of the great toe in common with the adductor pollicis pedis, of which some consider it a part. [L.]—**T. perinæi.** Ger., *querer Darmmuskel.* The t. perinæi profundus and the t. perinæi superficialis. [L.]—**T. perinæi anterior, T. perinæi medius, T. perinæi posterior inferior.** See *T. perinæi superficialis.*—**T. perinæi profundus.** 1. All the muscular fibres between the two layers of the deep perineal fascia arranged transversely, obliquely, and perpendicularly, arising on each side from the inferior ramus of the ischium and its tuberosity and the fascia, and meeting in the middle line of the perinæum. 2. The transverse fibres of the same arising from the tuberosities of the ischia. [L, 31, 142, 332.] 3. In woman, the most posterior and most clearly defined bundle of t. perinæi profundus (2d def.). [L.]—**T. perinæi superficialis.** A bundle of fibres which arises from the tuberosity of the ischium or the adjacent fascia and meets its fellow of the opposite side in the middle line, blending with the sphincter ani externus, the bulbo-cavernosi, or one or another of the perineal muscles. [L, 31, 332.]—**T. plantæ (pedis).** See *T. pedis.*—**T. prostatæ.** 1. See COMPRESSOR *prostatæ.* 2. Fibres of the lateral and interior surface of the prostate, attached to the anterior surface of the ischium. [L, 175 (α, 50).]—**T. Sanctorini.** See *T. menti.*—**T. thoracis anterior.** See TRIANGULARIS *sterni.*—**T. thoracis posterior.** The infracostales taken as a whole. [L, 332.]—**T. urethræ.** Perpendicular fibres of the t. perinæi profundus (1st def.) which surround the urethra close to the bulb. [L, 31.]—**T. vaginæ.** The t. perinæi profundus (2d def.) in woman. [L.]

TRAP, n. Tra^{2}p. An apparatus, usually consisting of one or more bent pipes, with or without valves, filled with water, used to prevent the escape of gases from soil-pipes into dwellings. [α, 48.]

TRAPA (Lat.), n. f. Trap(tra^{3}p)'a^3. Fr., *macre.* Ger., *Wassernuss, Stachelnuss.* Water-caltrops (or -nut); a genus of floating herbs, forming the *Trapaceæ* (a family of the *Onagrarieæ*) or *Trapeæ* (a series of the *Halorageæ*). [α, 35.]—**T. bispinosa.** The water-chestnut of middle and southern Asia, Ceylon, Japan, etc.;

cultivated for its farinaceous seed. [α, 35.]—**T. natans.** Fr., *corniche, corniole, cornuelle, galarin, noix aquatique* (ou *d'eau*), *truffe d'eau, macre flottante.* Ger , *gemeine Wassernuss* (oder *Stachelnuss*), *Wasserkastanie, Jesuitennuss.* Jesuit's nut of Venice, water-caltrops, water-chestnut, the τρίβολος ἔνυδρος of Dioscorides, a species found in southern and middle Europe, middle Asia, and northern and central Africa. The fruits, *nuces* (seu *castaneæ*) *aquaticæ* (seu *palustres*, seu *cornutæ*), and their edible seed, *semina nucis aquaticæ* (seu *tribuli aquatici*), were formerly official. The upper, leafy portion of the stem was used in poultices as a discutient, and the expressed juice in eye diseases. [α, 35.]

TRAPÈZE (Fr.), n. Tra3-pe2z. See TRAPEZIUM and TRAPEZIUS. —**T. dorsal.** See DORSO-ACROMIALIS.—**T. du cou.** See CERVICO-ACROMIALIS.

TRAPEZIA (Lat.), n. f. Tra2p(tra3p)-ez(e2z)'i2-a3. Of Galen, the superior portion of the trapezius muscle. [L, 2.]

TRAPEZIUM (Lat.), n. n. Tra2p(tra3p)-ez(e2z)'i2-u3m(u4m). From τράπεζα, a table. Fr., *trapèze, corps rhomboïdal* (ou *rhomboïde*, ou *trapézoïde*) [2d def.]. Ger., *Trapez, Trapezbein* (1st def.), *vielwinkeliger Knochen* (1st def.), *grosses vieleckiges Bein* (1st def.), *trapezoider Körper* (2d def.). 1. The outermost of the second row of the carpal bones. It is irregularly six-sided and grooved on its anterior surface for the tendon of the flexor carpi radialis, and articulates with the scaphoid, the trapezoid, and the first and second metacarpal bones. [L, 37, 142, 332.] 2. A tract of nerve-fibres at the lower part of the pons Varolii below the prolongations of the anterior pyramids. It comes below the superior olivary nucleus and extends upward to be continuous with the middle cerebellar peduncle. [I, 15 (K).]—**T. minus.** See *Trapezoid* BONE.—**T. pontis.** See *T.* (2d def.).

TRAPEZIUS (Lat.), n. m. Tra2p(tra3p)-ez(e2z)'i2-u3s(u4s). From τράπεζα, a table. Fr., *trapèze, capuchon.* Ger., *Kappenmuskel.* 1. A muscle arising from the external protuberance of the occipital bone, the ligamentum nuchæ, the spinous processes of the last cervical and all the dorsal vertebræ, and the supraspinous ligaments, and inserted into the posterior border of the outer third of the clavicle and the inner border of the acromion process and the upper edge of the spine of the scapula. 2. In solipeds, a muscle which arises from the cervical column and the transverse processes of the first dorsal vertebræ and is attached to the acromial spine of the scapula. It raises the shoulder and carries it forward and backward. [L, 13.]

TRAPEZOID, adj. Tra2p'e2z-oid. Lat., *trapezoides* (from τράπεζα, a table, and εἶδος, resemblance). Fr., *trapezoïde.* Table-shaped ; as a n., the t. bone. [α, 48.]

TRAPÉZO-MÉTACARPIEN (Fr.), n. Tra3-pa-zo-ma-ta3-ka3r-pe-a3n2. See OPPONENS *pollicis.*

TRAÜBCHEN (Ger.), n. Troib'ch2e2n. See RACEMULUS.—**Fettt'.** See *Fat* LOBULES.

TRAUBE (Ger.), n. Tra3'u4b-e2. See RACEME and GRAPE.—**T'ncur.** See *Grape*-CURE.—**T'ngeschwulst.** See STAPHYLOMA. —**T'nsäure.** See RACEMIC ACID.—**T'nschimmel.** See BOTRYTIS.

TRAUBENBAUM (Ger.), n. Tra3'u4b-e2n-ba3-u4m. The genus *Uvaria.* [α, 35.]

TRAULISMUS (Lat.), n. m. Tra4l(tra3-u4l)-i2z(i2s)'mu3s(mu4s). Gr., τραυλισμός. See BLÆSITAS.

TRAUM (Ger.), n. Tra3'u4m. See DREAM.

TRAUMA (Lat.), n. n. Tra4m'(tra3'u4m)-a3. Gen., *traum'atos* (*-atis*). Gr., τραῦμα (from τιτρώσκειν, to wound). A wound. [E.]

TRAUMATIC, adj. Tra4m-a2t'i2k. Gr., τραυματικός. Lat., *traumaticus.* Fr., *traumatique.* Ger., *traumatisch.* Pertaining to or due to mechanical injury. [E.]

TRAUMATICIN, TRAUMATICINE, n's. Tra4m-a2t'i2s-i2n, -en. Lat., *traumaticinum* [Hung. Ph., 1st ed.]. A fanciful name applied to a 10-per-cent. solution of gutta-percha in chloroform ; used like collodion. Cf. *Liquor* GUTTA-PERCHÆ.

TRAUMATISM, n. Tra4m'a2t-i2z'm. Fr., *traumatisme.* Ger., *Traumatismus.* 1. The infliction of an injury. 2. The state or condition of the system produced by a serious injury ; it may include the symptoms of shock and of septicæmia. [α, 34.]

TRAUMATOCACE (Lat.), n. f. Tra4m(tra3-u4m)-a2t(a3t)-o2k'-a2s(a3k)-e(a). Gen., *-o'caces.* From τραῦμα, a wound, and κακός, bad. See *Hospital* GANGRENE.

TRAUMATOLOGY, n. Tra4m-a2t-o2l'o-ji2. From τραῦμα, a wound, and λόγος, understanding. Fr., *traumatologie.* The pathology, etc., of wounds. [α, 48.]

TRAUMATONESIS (Lat.), n. f. Tra4m(tra3-u4m)-a2t(a3t)-o-(o3)-ne(na)'si2s. Gen., *-es'eos* (*-is*). From τραῦμα, a wound, and νῆσις, a suture. Suture of a wound. [α, 48.]

TRAUMATOPNŒA (Lat.), n. f. Tra4m(tra3-u4m)-a2t(a3t)-o-(o3)-pne'(pno2'e2)-a3. From τραῦμα, a wound, and πνεῖν, to breathe. The passage of air through a perforating chest-wound in consequence of respiratory movements. [α, 34.]

TRAUMATOPYRA (Lat.), n. f. Tra4m(tra3-u4m)-a2t(a3t)-o2p'-i2r(u6r)-a3. From τραῦμα, a wound, and πῦρ, fever. See *Traumatic* FEVER.

TRAUMATOSAPROSIS (Lat.), **TRAUMATOSEPSIS** (Lat.), n's f. Tra4m(tra3-u4m)-a2t(a3t)-o(o3)-sa2p(sa3p)-ros'i2s, -se2ps-(saps)'i2s. Gen., *-ro'seos* (*-is*), *seps'eos* (*-is*). From τραῦμα, a wound, and σαπρός, putrid, or σῆψις, putrefaction. See *Hospital* GANGRENE.

TRAUMATOSIS (Lat.), n. f. Tra4m(tra3-u4m)-a2t(a3t)-os'i2s. Gen., *-os'eos* (*-is*). From τραῦμα, a wound. Traumatism. The *Traumatoses* are, in Fuchs's classification of skin diseases, a family of the *Morphonosi* including excoriation and dermatotrauma. [G.]

TRAUMOTYPHUS (Lat.), n. m. Tra4m(tra3-u4m)-o(o3)-tif-(tu6f)'u3s(u4s). From τραῦμα, a wound, and τῦφος, typhus. Of Eisenmann, hospital gangrene. [L, 50 (α, 14).]

TRAVAIL (Fr.), n. Tra3-va3-y'. See LABOR.—**Petit t.** A term applied by some authors to manipulations intended to hasten or facilitate the expulsion of the child's head when it is resting upon the perinæum, such as pressing back the pelvic floor. [A, 15.] —**T. insensible.** The premonitory stage of labor. [A, 88.]—**T. manqué.** See *Missed* LABOR.—**T. trop prompt.** See *Precipitate* LABOR.—**T. vesiculaire.** See DEHISCENCE (2d def.).

TRAVEMÜNDE (Ger.), n. Tra3f'e2-mu6nd-e2. A sea-bathing resort on the Baltic in the vicinity of Lubeck, Germany. [α, 14.]

TREACLE, n. Tre'a2-k'l. 1. An antidote to venomous bites (cf. THERIACA, whence the word is derived) ; a panacea. [α, 48.] 2. See MOLASSES.—**Countryman's t.** See ALLIUM SATIVUM and RUTA *graveolens.*—**Venice t.** See TREAK FAROUK.

TREAD, n. Tre2d. A vulgar term for the cicatricula of an egg. See ARCHIBLAST.

TREAK FAROUK, n. " Venice treacle " ; a Japanese secret remedy said to be identical with the *theriaca Andromachi* of the Lond. Ph. of 1746. [Gordon, " Brit. Med. Jour.," Apr. 5, 1884.]

TREATMENT, n. Tret'm'nt. Gr., θεραπεία (1st def.). Lat., *medela* (1st def.). Fr., *traitement.* Ger., *Behandlung.* 1. Means employed for the relief of the sick or injured. 2. The subjection of anything to the action of certain agencies. [D.]—**Antiphlogistic t.** T. intended to prevent or limit inflammation. [α, 34.]—**Antiseptic t.** T. tending to prevent sepsis. [α, 34.]—**Banting t.** See BANTINGISM.—**Colony t.** See COLONIZATION (2d def.).—**Dietetic t.** The t. of disease by special diet. [α, 34.]—**Earth t.** The t. of wounds and certain skin diseases by the application of finely powdered sterilized clay. [α, 34.]—**Empirical t.** Routine t. founded on experience. [α, 34.]—**Expectant t.** T. directed against symptoms as they arise, not based on any fixed plan of therapeusis. [α, 34.]—**Hueter's t. for knock-knee.** Retention of the knee in a flexed position by means of a plaster-of-Paris bandage. [A, 520 (α, 29).]—**Hygienic t.** The t. of disease by the application of hygienic principles, involving environment, clothing, food, and exercise. [α, 34.]—**Lowering t.** T. intended to depress the chief characteristics of a sthenic inflammation. [α, 34.]—**Mechanical t.** 1. T. by mechanical appliances. 2. See MASSAGE.—**Mitchell's t.** The t. of certain neuroses by absolute and complete rest in bed, isolation except for the presence of the nurse and the physician, massage, hydrotherapy, electricity, and full diet. [α, 34.]—**Mixed t.** A phrase used in reference to the t. of syphilis by the contemporary administration of potassium iodide and mercury. [α, 34.] —**Palliative t.** T. intended to modify or limit the severer manifestations of a disease, but not to cure. [α, 34.]—**Pneumatic t.** See PNEUMATOTHERAPY.—**Rest t.** See *Mast*KUR.—**Scarenzio's t.** The t. of syphilis by the hypodermic injection of mercury. [α, 35.]—**Symptomatic t.** T. of disease by attention to the symptoms as they arise. [D.]—**Valsalva's t. for aneurysm.** T. which consists in rest, low diet, venesection, and other general means of reducing the force of the circulation. [E.]

TRÉBAS (Fr.), n. Tra-ba3. A place in the department of the Tarn, France, where there is a gaseous, alkaline, and ferruginous spring. [L, 49, 88, 135 (α, 14).]

TREBIZOND, n. Tre2b'i2z-o2nd. A place in Asia Minor where there are hot mineral springs. [L, 49 (α, 14).]

TRECHOMA (Lat.), **TRECHYSMA** (Lat.), n's n. Tre2k-(trach2)-om'a3, -i2z(u6s)'ma3. Gen., *-om'atos* (*-atis*), *-ys'matos* (*-atis*). See TRACHOMA.

TREE, n. Tre. Gr., δένδρον. Lat., *arbor.* Fr., *arbre.* Ger., *Baum.* A plant with a woody, single stem rising to the height of 30 feet or more. [α, 35.]—**Vascular t.** Fr., *arbre vasculaire.* Ger., *Gefässbaum.* The arborescent appearance of the blood-vessels when isolated in entirety from the body. [α, 34.]

TRÈFLE (Fr.), n. Tre2-fl'. See TRIFOLIUM.—**T. d'eau.** 1. The *Menyanthes trifoliata.* 2. See *Folia* TRIFOLII *fibrini.*—**Extrait de t. d'eau.** See *Extractum* TRIFOLII *fibrini.*—**T. tendineux du diaphragma.** The central tendon of the diaphragm. [L.]

TREFOIL, adj. Tre'foil. From *tres*, three, and *folium*, a leaf. Having three segments or leaves ; as a n., the genus *Trifolium.* also the *Medicago lupulina, Stylosanthes procumbens, Anemone hepatica, Menyanthes trifoliata,* etc. [α, 35.]

TREHALA, n. Tre2-ha3'la2. See *Turkish* MANNA.

TREHALOSE, n. Tre'ha2l-os. Fr., *tréhalose.* A sugar, $C_{12}H_{22}O_{11} + 2H_2O$, obtained from trehala manna and found also in various fungi ; identical with the mycose contained in ergot of rye. [B, 3 (α, 38).]

TREIBEISEN (Ger.), n. Trib'i-ze2n. See REPOUSSOIR (1st def.).

TREIBEND (Ger.), adj. Trib'e2nd. See EVACUANT.

TREIBMITTEL (Ger.), n. Trib'mi2t-te2l. See PURGATIVE, n.

TREIBMUSKEL (Ger.), n. Trib'musk-e2l. See ACCELERATOR (2d def.).—**T. des Harns.** See BULBOCAVERNOSUS, n.

TREMA (Lat.), n. n. Trem(tram)'a. Gen., *trem'atos* (*-is*). Gr., τρῆμα (from τετραίνειν, to bore). See FORAMEN.

TREMA (Lat.), n. f. Trem(tram)'a3. A genus of the *Ulmaceæ.* [α, 35.]—**T. orientalis.** Indian nettle-tree ; a species found in southern Asia, yielding a gum like that of the cherry-tree. The aromatic bark, leaves, and root are said to be remedial in epilepsy. [α, 35.]

TREMATODA (Lat.), n. n. pl. Tre2m(tram)-a2t(a3t)-od'a3. From τρηματώδης, porous. Fr., *trématodes.* Ger., *Saugwürmer, Trematoden.* The flukes : a suborder of the *Sterelmintha.* They are hermaphrodite, and have a soft, round or flat body, and an indistinct head with suctorial foramina. [L, 1.]

TREMBLEMENT (Fr.), n. Tra3n2-bl'-ma3n2. See TREMOR.

TREMBLES, n. Tre2m'b'lz. Fr., *maladie tremblante.* See PARALYSIS *agitans.*

TREMBLING, n. Tre2mb'li2n2. See TREMOR.

TREMBLOTEMENT (Fr.), n. Tra3n2-blot-ma3n2. A trembling, a vibration; of Barth, the sound heard in true croup when a stethoscope is placed over the larynx, caused by the vibration of the false membrane in the larynx. [D, 1.]

TREMELLA (Lat.), n. f. Tre2m-e2l'la3. Fr., *tremelle.* 1. The genus *Nostoc.* The *Tremellinæ* are a section of *Algæ.* 2. The typical genus of a division (*Tremellaceæ, Tremellideæ, Tremellinæ, Tremellineæ, Tremellinei,* or *Tremellini* [Ger., *Zitterpilze, Gallertpilze*]) of basidiomycetous *Fungi.* [a, 35.]—**T. mesenterica.** A species of T. (2d def.) forming orange tints on dead hedges, etc. Distilled water poured over it was formerly used in eye diseases and the palsy of gout. [a, 35.]—**T. verticalis, T. violacea.** Fr., *tremelle verticale.* An edible species of T. (2d def.) yielding a blue dye. [a, 35.]

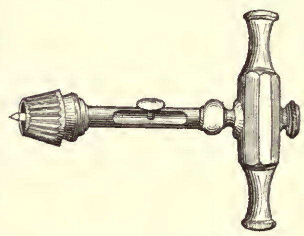
TREMENTINA (Sp.), n. Tra-me2n-ten'a3. At Bogotá, the resin of *Espeletia grandiflora;* used medicinally. [a, 35.]—**T. común** [Mex. Ph.]. A thick, granular turpentine, obtained from *Pinus teocote;* used as a balsamic stimulant. [B, 224 (a, 14); J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122 (a, 50).]

TREMOR (Lat.), n. m. Trem(tre2m)'o2r. Gen., *-or'is.* From *tremere,* to tremble. Fr., *tremblement.* Ger., *Zittern.* A quivering or trembling, especially a more or less continuous quivering of a convulsive character. [D.]—**Arsenical t.** T. caused by arsenical neuritis. [a, 34.]—**Continuous t.** A form of t. that resembles that of paralysis agitans, but may be remittent. Muscular tension is not exaggerated, as in intermittent t., and the t. may be diminished or arrested by a voluntary effort. [D, 35.]—**Convulsive t.** 1. Of Hammond, a paroxysmal affection characterized by frequent attacks of violent trembling, lasting fifteen or twenty minutes, and leaving the subject in a profuse perspiration. There are also headache, vertigo, anxiety, hyperæsthesia of the skin of the face, arms, and trunk (the parts usually involved in the paroxysms), and sometimes unconsciousness. 2. Any short shaking of the body, such as occurs occasionally after urination. Hammond includes all cases of non-rhythmical t., or clonic convulsive movements which are paroxysmal in character, but are not attended with loss of consciousness. [D, 25, 34.]—**Epileptoid t.** Intermittent clonus with t.—**Fibrillary t.** T. caused by the consecutive contractions of separate muscular fibrillæ, rather than of a muscle or the muscles as a whole. [D, 36.]—**Forced t.** See *T. coactus.*—**Hysterical t.** T. due to the instability of nervous impulse existing in hysteria. [a, 34.]—**Intermittent t.** T. common to paralyzed muscles in hemiplegia. It is induced when the muscles are put upon the stretch by attempts at voluntary movement. [D, 35.]—**Mercurial t., Metallic t.** A volitional t. due to mercurialism. [D, 25.]—**Muscular t.** Slight oscillating muscular contractions following each other in rhythmical order. [L, 20 (a, 34).]—**Purring t.** See *Purring* THRILL.—**T. capitis.** T. affecting the muscles of the neck and head. [a, 34.]—**T. coactus.** Forced t.; of Van Swieten, the convulsive movements which persist during repose after voluntary exercise; attributed to an intermittent and rhythmical irritation of the nervous centres. [D, 35.]—**T. saturninus.** T. due to lead poisoning. [L, 57 (a, 14).]—**T. tendinum.** See SUBSULTUS *tendinum.*—**Vibratile t.** See FREMITUS.—**Volitional t.** Trembling of the limbs or of the entire body when a voluntary effort is made. It occurs in connection with multiple sclerosis and other nervous diseases. [D, 63.]

TRÉMULATION (Fr.), n. Tra-mu6-la3-se-o2n2. The tremor of paralysis agitans. [A, 385 (a, 48).]

TRÉMULENCE (Fr.), n. Tra-mu6-la3n2s. See TREMOR.—**T. paralytique.** See PARALYSIS *agitans.*

TREMULIN, n. Tre2m'u2l-i2n. Fr., *trémuline.* See POPULIN.



TRENCSIN, n. A place in T. County, Hungary, where there are saline and sulphurous springs. [L, 37, 49, 57 (a, 14).]

TREPAN, n. Tre2-pa2n'. See TREPHINE.—**Schiefer T.** (Ger.). See ECLEPISITREPANON.

TREPANATIO (Lat.), n. f. Tre2p-a2n(a3n)-a(a3)'shi2(ti2)-o. Gen., *-on'is.* See TREPHINING.—**T. corneæ.** An operation for the relief of conical cornea. It consists in removing a small circular piece from the centre of the cornea by means of a corneal trephine. Bowman employs small trephines, penetrating only as far as the membrane of Descemet. The cut disc is removed, and the membrane of Descemet immediately presents as a hernia. This is punctured, and the puncture must be repeated every day or two for several weeks, until the cicatricial process is complete. In De Wecker's operation his corneal trephine is used to cut a round disc out of the entire thickness of the cornea, the object being to maintain a permanent fistula in cases of partial staphyloma and total leucoma. ["Ann. d'ocul.," xlviii, p. 137 (F).]

TREPANATION, TREPANNING, n's. Tre2p-a2n-a'shu3n, -a2n'i2n. Lat., *trepanatio.* See TREPHINING.

TREPHINE, n. Tre2f-in'. Gr., τρυπάνη, τρύπανον (from τρυπᾶν, to bore). Lat., *trepanum, trypanon.* Fr., *tréphine, trépan.* Ger., *Schädelbohrer, Drillbohrer, Drehbohrer, Trephina, Trepan.* An instrument for cutting or sawing a circular opening, generally for sawing such an opening in the skull; consisting of a crown (a steel tube with saw-teeth at its free end), a shaft, and a handle. [E.]—**Brace t.** A t. fitted into an ordinary carpenter's brace. [E.]—**Conical t.** A t. the crown of which has the shape of a truncated cone, and is provided with oblique ridges on its outer surface, so that its progress ceases as soon as the bone has been cut through. [a, 34.]—**Corneal t.** Of Bowman, a small cutting drill or t. designed to excise a defined circular portion of the apex of a conical cornea. The instrument is rotated by the finger and thumb. De Wecker's corneal t. is constructed on the principle of Heurteloup's artificial leech. The tubular cutting blade is inclosed in a solid tube, and protrudes by pressure on a spring. [F.]—**Galt's t.** See *Conical t.*—**Nasal t.** An instrument consisting of a steel shaft terminating in a small fenestrated tube having a knife-edge or saw-edge. ["N. Y. Med. Jour.," May 28, 1887, p. 596 (a, 34).]—**Tympanic t.** An instrument consisting of a steel shaft terminating in a small, polished tube 2 mm. in diameter, having a cutting edge. [Burnett, "Trans. of the Am. Ot. Assoc.," 1873, p. 109 (a, 34).]

CONICAL TREPHINE.

TREPHINING, n. Tre2f-in'i2n2. Gr., τρύπησις. Lat., *trepanatio.* Fr., *trépanation.* Ger., *Trepanirung.* The operation of using the trephine. [E.]

TREPIDATIO (Lat.), n. f. Tre2p-i2d-a(a3)'shi2(ti2)-o. Gen., *-on'is.* From *trepidare,* to be agitated. Fr., *trépidation.* A condition of agitation, a violent trembling. [a, 48.]—**T. cordis.** See PALPITATION *of the heart.*

TRÉPIDATION (Fr.), n. Tra-pe-da3-se-o2n2. See TREPIDATIO.—**T. épileptoïde.** An epileptoid paroxysm of violent tremulous movements occurring in the lower extremities in certain affections of the spinal cord. ["Ctrlbl. f. klin. Med.," Dec. 8, 1886, p. 899 (a, 34).]—**T. provoquée.** T. produced by bringing certain muscles into action. [A, 319 (a, 34).]

TRÉPIED (Fr.), n. Tra-pe-a. A tripod.—**T. cœliaque.** See TRIPUS *Halleri.*—**T. vital.** Of Bichart, the combined functions of circulation, respiration, and brain-action. [A, 385 (a, 48).]

TRÉPORT (Fr.), n. Tra-por. See LE TRÉPORT.

TREPPE (Ger.), n. Tre2p'pe2. See SCALA and *Staircase* PULSATION.—**Bowditch'sche T.** The contractions, gradually increasing in intensity until they reach a certain maximum, from which they as gradually decrease, observed when a bundle of smooth muscle-fibres is stimulated by an induced current. [K.]—**Paukent', Trommelhöhlent'.** See SCALA *tympani.*

TRESCLÉOUX (Fr.), n. Tre2s-kla-u. A place in the department of the Hautes-Alpes, France, where there is a sulphurous spring. [L, 49, 88 (a, 14).]

TRESCORE (It.), n. Tre2s-ko'ra. A place in Bergamo, Italy, where there is an alkaline, saline, and sulphurous spring. [a, 14.]

TRESIS (Lat.), n. f. Tre(tra)'si2s. Gen., *tres'eos (-is).* Gr., τρῆσις (from τετραίνειν, to pierce). See WOUND.—**T. causis.** See BURN.—**T. punctura.** A puncture. [E.]—**T. vulnus.** A wound. [E.]

TRESSAILLEMENT (Fr.), n. Tre2s-sa3-el-y'-ma3n2. See SUBSULTUS.

TRESTER (Ger.), n. Tre2st'e2r. See MARE (3d def.).

TREVOA (Lat.), n. f. Tra'vo2-a3. A genus of the *Rhamneæ.* [a, 35.]—**T. trinervis.** A shrub found from Bolivia to Chile. In Chile it is reputed vulnerary. [a, 35.]

TREWIA (Lat.), n. f. Tra'wi2-a3. Fr., *trévier.* A genus of the *Euphorbiaceæ.* [a, 35.]—**T. macrophylla, T. macrostachya, T. nudiflora.** An East Indian tree. The root-bark is used as a diuretic and externally in podagra. [a, 35.]

TRIACANTHIN, n. Tri-a2k-a2nth'i2n. Of A. L. Metz, an alkaloid obtained from *Gleditschia triacanthos;* probably identical with gleditschine (*q. v.*, 2d def.). [B, 270 (a, 38).]

TRIACETALDANE, n. Tri-a2s-e2t-a2ld'an. See under ALDANE.

TRIACETAMIDE, n. Tri-a2s-e2t'a2m-i2d(id). Fr., *triacétamide.* A substance, $(C_2H_3O)_3N$, obtained by heating acetonitril with acetic anhydride. [B, 3, 4, 270 (a, 38).]

TRIACETIN, n. Tri-a2s'e2t-i2n. Fr., *triacétine.* Ger., *T.* 1. An oily liquid, $C_3H_5.(C_2H_3O_2)_3$, found in the oil of *Euonymus europæus,* in cod-liver oil, and in some of the fats, and obtainable from a mixture of glycerin and glacial acetic acid. It has a slightly bitter and pungent taste. 2. A rather thick liquid, $C_4H_7(C_2H_3O_2)_3$, obtained by heating butenyl alcohol with acetic anhydride. It has an agreeable odor. [B, 4; B, 3 (a, 38).]

TRIACETOGALLIC ACID, n. Tri-a2s"e2t-o-ga2l'i2k. Ger., *Triacetatgallussäure.* An acid, $C_6H_2(O.C_2H_3O)_3.COOH$, forming colorless acicular crystals. [B, 4.]

TRIACETONALKAMINE, n. Tri-a2s-e2t-o2n-a2l'ka2m-en. A base, $C_9H_{19}ON$, representing a molecule of triacetonamine to which two atoms of hydrogen have been added. It has an isomeric form, pseudot'. [B, 2.]

TRIACETONAMINE, TRIACETONHYDRAMINE, n's. Tri-a2s-e2t-o2n'a2m-en, -hid'ra2m-en. See under ACETONAMINES.

TRIACETYL, n. Tri-a2s'e2t-i2l. The compound C_2H_3O. [B.]—**T'æsculetin.** A substitution product, $C_9H_3.(C_2H_3O)_3.O_4$, formed by the action of acetic anhydride on æsculetin. [B, 2.]—**T'amine.** See TRIACETAMIDE.

TRIACETYLENE, n. Tri-a2s-e2t'i2l-en. See BENZENE.

TRIACHÆNIUM (Lat.), n. n. Tri(tri2)-a2k(a3ch2)-en'(a3'e2n)-i2-u3m(u4m). From *tres,* three, and *achænium* (*q. v.*). A fruit resembling a cremocarp except that it is composed of three carpels. [a, 35.]

TRIACID, adj. Tri-a2s'i2d. Having an acidity of three; of an acid or an acid salt, containing three atoms of replaceable hydrogen; capable of replacing three atoms of hydrogen in an acid.

TRIAD, n. Tri'a2d. 1. A combination of three. 2. A trivalent element or radicle. [α, 48.]—**Hutchinson's t.** The conjunction of notched teeth, interstitial keratitis, and otitis; observed in hereditary syphilis. ["Ann. méd. et sci. du Nord-Est"; "Province méd.," Oct. 6, 1888, p. 77.]

TRIADELPHOUS, adj. Tri-a2d-e2lf'u3s. Lat., *triadelphus* (from τρεῖς, three, and ἀδελφός, a brother). Fr., *triadelphe*. Ger., *dreibrüderig*, *triadelphisch*. Having the stamens united by their filaments into three sets. [α, 35.]

TRIÆNE (Lat.), n. f. Tri(tri2)-en'(a3'e2n)-e(a). Gr., τρίαινα. A trident, a three-pronged structure, especially a three-pronged sponge-spicule. [α, 48.]

TRIAKAIDEKAPHOBIA (Lat.), n. f. Tri(tre)-a3-ka3-i2-de2k-a3-fob(fo2b)'i2-a3. From τρεῖς, three, καί, and δέκα, ten, and φόβος, fear. A morbid or superstitious dread of the number thirteen. [α, 34.]

TRIALKALAMIDE, n. Tri-a2l-ka2l'a2m-i2d(id). See under ALKALAMIDE.

TRIALKYL, n. Tri-a2l'ki2l. Ger., *T.* A triple molecule of an alkyl; a compound consisting of 3 alkyl molecules united together. [B, 4.]

TRIALKYLAMINE, n. Tri-a2l-ki2l'a2m-i2n. Ger., *Trialkylamin*. See under ALKYLAMINE.

TRIALKYLIC, adj. Tri-a2l-ki2l'i2k. Pertaining to a trialkyl; containing 3 molecules of an alkyl. [B, 4.]

TRIALLYLAMINE, n. Tri-a2l-i2l'a2m-en. The compound $(C_3H_5)_3N$. [B, 3 (α, 38).]

TRIALLYLIN, n. Tri-a2l'i2l-i2n. Oxide of allyl and glyceryl, $C_{12}H_{20}O_3 = \left.\begin{matrix} C_3H_5 \\ (C_3H_5)_3 \end{matrix}\right\} O_3$. [B, 2.]

TRIAMIDOAZOBENZENE, n. Tri-a2m''i2d-o-a2z-o-be2nz'-en. A substance, $C_{12}H_{13}N_5 = (NH_2)_2.C_6H_3-N:N-C_6H_4(NH_2)$, constituting the dye known as Bismarck-brown, occurring as tabular crystals. [B, 3 (α, 38); B, 4.]—**T. hydrochloride.** Manchester-brown, vesuvin; a dyestuff, $C_{12}H_{13}N_5(ClH)_2$, occurring as a brown crystalline mass. [B, 3 (α, 38).]

TRIAMIDOBENZENE, n. Tri-a2m''i2d-o-be2nz'en. A substance, $C_6H_3(NH_2)_3$, known in two isomeric forms: *α-t.*, $C_6[NH_2,NH_2,NH_2,H,H,H,]$, occurring as a red or brown crystalline mass; and *β-t.*, $C_6[NH_2,NH_2,H,NH_2,H,H,]$, a crystalline mass turning red in the air. [B, 3 (α, 38).]

TRIAMIDOBENZOIC ACID, n. Tri a2m''i2d-o-be2nz-o'i2k. A monobasic crystalline acid, $C_6H_2(NH_2)_3CO.OH$, produced by the action of reducing agents on dinitramidobenzoic acid. [B, 2.]

TRIAMIDOPHENOL, n. Tri-a2m-i2d-o-fe2n'o2l. Fr., *triamidophénol*. Ger., *T.* A very unstable triacid base, $C_6H_2(NH_2)_3OH$. [B, 3 (α, 38); B, 4.]—**T. hydrochloride.** A substance, $C_6H_2(NH_2)_3.OH.3HCl = C_6H_{12}N_6Cl_3O$, forming colorless acicular crystals. [B, 4.]

TRIAMINE, n. Tri-a2m'en. See under AMINE.

TRIAMMONIC, adj. Tri-a2m-mo2n'i2k. Fr., *triammoniacal*. Containing three molecules of ammonium. [B.]

TRIAMYLAMINE, n. Tri-a2m-i2l'a2m-en. Tertiary amine of amyl, $N(C_5H_{11})_3$. [B.]

TRIAMYLENE, n. Tri-a2m'i2l-en. Fr., *triamylène*. Ger., *Triamylen*. A liquid, $C_{15}H_{30}$, of terebinthine odor, a polymeride of the amylene derived from fermentation amyl alcohol. [B, 2, 4.]

TRIAMYLIN, n. Tri-a2m'i2l-i2n. A substance, $C_3H_5(C_5H_{11})_3O_3$, produced by heating amyl alcohol and acrolein with a little acetic acid. [B, 2.]

TRIAMYLPHOSPHINE, n. Tri-a2m-i2l-fo2s'fen. The compound $(C_5H_{11})_3P$. [B, 3 (α, 38).]

TRIAMYLSTIBINE, n. Tri-a2m-i2l-sti2b'en. Ger., *Triamylstibin*. The compound $Sb(C_5H_{11})_3$. [B, 3.]

TRIANDROUS, adj. Tri-a2nd'ru2s. Lat., *triandrus*, *triandrius* (from τρεῖς, three, and ἀνήρ, a man). Fr., *triandre*. Ger., *dreimännig*, *triandrisch*. Having three stamens. The *Triandria* (Fr., *triandrie*) are a Linnæan class of plants with t. flowers. [α, 35.]

TRIANGLE, n. Tri'a2n2-g'l. Gr., τρίγωνον. Lat., *trigonum*, *triangulum*, *triangulus* (from *tres*, three, and *angulus*, an angle). Fr., *t.* Ger., *Dreieck*. A three-cornered and three-sided figure, an area or space of three-cornered shape. [α, 48.]—**Anterior t. of the neck.** The space bounded by the middle line of the neck, the anterior border of the sterno-cleido-mastoid, and a line running along the lower border of the inferior maxilla and continued to the mastoid process of the occipital bone. [L.]—**Assézat's t.** A t. bounded by lines uniting the projection of the nasion on the alveolo-condylar plane and the alveolar and nasal points and one uniting the two latter. [α, 34.]—**Cephalic t.** A t. on the antero-posterior plane of the skull formed by lines joining the occiput and forehead and chin, and one uniting the two latter. ["Ann. de gynéc.," Mar., 1892, p. 165 (α, 34).]—**Cervical t.** Ger., *Halsdreieck*. See TRIGONUM *cervicale*.—**Facial t.** A t. bounded by lines uniting the basion and the alveolar and nasal points and one uniting the two latter. [α, 34.]—**Frontal t.** A t. bounded by the maximum frontal diameter and lines joining its extremities and the glabella. [α, 34.]—**Hesselbach's t.** The space on the posterior surface of the anterior wall of the abdomen bounded by Poupart's ligament, the epigastric artery, and the margin of the rectus abdominis. [L.]—**Inferior carotid t.** Lat., *trigonum caroticum inferius*. The space bounded by the middle line of the neck, the anterior border of the sterno-cleido-mastoid, and the anterior belly of the omohyoid. [L.]—**Inferior occipital t.** Of Welcker, a t. having the bimastoid diameter for its base and the inion for its apex. [α, 34.]—**Inguinal t.** See *Scarpa's t.*—**Lumbo-costo-abdominal t.** The space bounded in front by the obliquus abdominis externus, above by the lower border of the serratus posticus inferior and the point of the twelfth rib, behind by the outer edge of the erector spinæ, and below by the obliquus abdominis internus. ["Ctrlbl. f. Chir.," Sept. 15, 1888, p. 686 (L).]—**Mento-condylial t.** Of A. v. Török, a t. having its base extending between the condyles of the inferior maxilla and its apex at the gnathion.—**Mento-gonial t.** Of T. v. Török, a t. having the bigoniac diameter as its base and the gnathion as the apex. [α, 34.]—**Mento-mastoid t.** Of A. v. Török, a t. having the bimastoid diameter as its base and the gnathion as its apex. [α, 34.]—**Mylo-hyoid t.** The triangular space formed by the mylo-hyoid muscle and the two bellies of the digastric muscle. [α, 34.]—**Occipital t. of the neck.** The space bounded by the sterno-cleido-mastoid, the trapezius, and the omohyoid. [L.]—**Omo-clavicular t.** See *Subclavian t.*—**Omo-hyoid t.** See *Superior carotid t.*—**Palatal t.** Lat., *trigonum palatinum*. Ger., *Gaumendreieck*. Of A. v. Török, a t. having the width of the palate for its base and the alveolar point for its apex. [α, 34.]—**Petit's t.** See TRIANGULUS *Petiti*.—**Posterior cervical t., Posterior t. of the neck.** See *Superior carotid t.*—**Pubo-urethral t.** A triangular space in the perinæum bounded by the ischio-cavernosus muscle externally, the bulbo-cavernosus muscle internally, and the transversus perinæi muscle posteriorly. [α, 34.]—**Scarpa's t.** A t. with its apex below, bounded by Poupart's ligament, the adductor longus, and the sartorius. [L.]—**Subclavian t.** A space bounded by the posterior belly of the omohyoid, the upper border of the clavicle, and the posterior margin of the sterno-cleido-mastoid. [L.]—**Submaxillary t.** The space between the lower border of the inferior maxilla, the parotid gland, and the mastoid process of the temporal bone above, the posterior belly of the digastric and the stylohyoid below, and the middle line of the neck in front. [L.]—**Superior carotid t.** Lat., *trigonum caroticum superius*. Ger., *oberes Halsdreieck*. The space bounded by the sterno-cleido-mastoid, the posterior belly of the digastric, and the anterior belly of the omohyoid. [L.]—**Superior occipital t.** Of Welcker, a t. having the biparietal diameter for its base and the inion for its apex. [α, 34.]—**Superior t. of the neck.** See *Superior carotid t.*—**T. de lumière** (Fr.), **T. lumineux** (Fr.). See *Light* SPOT *on the membrana tympani*.—**T. médullaire** (Fr.). See FORNIX *cerebri*.—**T. omo-trachéal** (Fr.). See *Inferior carotid t.*—**Upper cervical t.** See *Superior carotid t.*

TRIANGULAIRE (Fr.), adj. Tre-a3n2-gu6-la2r. See TRIANGULAR; as a n., see TRIANGULARIS.—**T. des lèvres.** See RISORIUS and DEPRESSOR *anguli oris*.—**T. du coccyx.** See COCCYGEUS (2d def.).—**T. du nez.** See COMPRESSOR *naris*.—**T. du menton.** See DEPRESSOR *anguli oris*.—**T. interne.** See CORRUGATOR *labii inferioris*.

TRIANGULAR, adj. Tri-a2n2g'u2l-a3r. Gr., τρίγωνος. Lat., *triangularis*, *triangulatus*. Fr., *triangulaire*, *triangulé*. Ger., *dreieckig*, *dreikantig*, *dreiseitig*. Having three angles; having a three-cornered shape. [α, 35, 48.]

TRIANGULARE (Lat.), n. n. Tri(tri2)-a2n2g(a3n2g)-u2l(u4l)-ar(a3r)'e(a). Gen., *-ar'is*. See *Pyramidal* BONE.

TRIANGULARIS (Lat.), adj. Tri(tri2)-a2n2g(a3n2g)-u2l(u4l)-ar-(a3r)'i2s. See TRIANGULAR; as a n. m., see DEPRESSOR *anguli oris*.—**T. cerebri.** See FORNIX *cerebri*.—**T. coccygis.** See COCCYGEUS (2d def.).—**T. inferior.** See DEPRESSOR *anguli oris*.—**T. labii superioris.** See LEVATOR *anguli oris*.—**T. menti.** See *T.*, n.—**T. nasi.** See COMPRESSOR *naris*.—**T. oris.** See *T.*, n.—**T. sterni.** Ger., *dreieckiger* (oder *innerer*) *Brustmuskel*. A thin, flat muscle arising by fleshy digitations from the inner surfaces of the cartilages of the second to the sixth ribs, and inserted into the posterior surface of the sternum, its xiphoid process, and the cartilages of the lower one or two true ribs. [L, 31, 142, 332.]

TRIANGULUS (Lat.), n. m. Tri(tri2)-a2n2g(a3n2g)'u2l(u4l)-u3s-(u4s). See TRIANGLE.—**T. inguinalis.** See *Scarpa's* TRIANGLE.—**T. Petiti.** A triangular space between the anterior border of the latissimus dorsi, the posterior border of the obliquus abdominis externus, and the crest of the ilium. [α, 17.]—**T. subinguinalis.** See *Scarpa's* TRIANGLE.

TRIANILÆSCULETIN, n. Tri-a2n-i2l-e2s-ku2'le2t-i2n. A 3-molecule aniline substitution compound, $C_9H_6O(C_6H_5,N)_3$, of æsculetin. [B, 2.]

TRIANOSPERMA (Lat.), n. f. Tri(tri2)-a2n(a3n)-o(o3)-spu6rm-(spe2rm)'a3. See ABOBORA (2d def.).—**T. ficifolia.** See BRYONIA *ficifolia*.

TRIANTHEMA (Lat.), n. f. Tri(tri2)-a2nth(a3nth)-em(am)'a3. From τρεῖς, three, and ἄνθος, a flower. Fr., *trianthème*. Ger., *Dreiblume*. A genus of the *Azoideæ*. [α, 35.]—**T. decandra.** A common weed in India. The root is used in hepatitis and asthma, and its bark as an aperient. [α, 35.]—**T. monogynia.** Fr., *trianthème à un seul pistil*. Ger., *portulakblättrige Dreiblume*. Horse-purslane; a West Indian and tropical South American species. The entire plant has an unpleasant bitter taste, and is used as a stimulant to the mucous membranes and in disturbances of digestion and respiration. [α, 35.]—**T. obcordata.** A plant official in the Ph. of India, used as an astringent. The nauseous roots are cathartic. The herb is eaten, but is said to produce diarrhœa and paralysis. [α, 35.]

TRIANTHOUS, adj. Tri-a2nth'u3s. Three-flowered. [α, 35.]

TRIARACHIN, n. Tri-a2r'a2k-i2n. A substitution compound, $C_3H_5.(C_{20}H_{39}O_2)_3$, of glycerin. [B, 2.]

TRIARSENATE, n. Tri-a3rs'e2n-at. See under ARSENATE.

TRIATHLODYME (Fr.), n. Tre-a3t-lo-dem. A monster similar to an atlodidymus, but having three heads. [α, 48.]

TRIATOMIC, adj. Tri-a2t-o2m'i2k. Lat., *triatomicus* (from τρεῖς, three, and ἄτομος, an atom). Fr., *triatomique*. Ger., *dreiatomig*. 1. Of molecules of elementary bodies, containing three atoms. 2. Of compounds, containing three atoms of replaceable hydrogen. 3. Of radicles, having a combining capacity that is saturated by union with three hydrogen atoms. [B.]

TRIBADE (Fr.), n. Tre-ba3d. See TRIBAS.

TRIBADISM, n. Tri'ba2d-i2z'm. Lat., *tribadismus* (from τριβάς [see TRIBAS]). Fr., *tribadisme.* Ger., *Tribadie, Tribadismus.* Unnatural sexual indulgence between two women, in which an abnormally large clitoris takes the part of a penis. [D.]

TRIBARYTIC, adj. Tri-ba2r-i2t'i2k. Containing three atoms of barium. [B.]

TRIBAS (Lat.), n. f. Trib(treb)'a2s(a3s). Gen., *trib'ados (-adis).* Gr., τριβάς (from τρίβειν, to rub). Fr., *tribade.* A woman who practises tribadism.

TRIBASIC, adj. Tri-bas'i2k. Fr., *tribasique.* Ger., *dreibasisch.* 1. Of acids and alcohols, containing in the molecule three atoms of hydrogen replaceable by bases. See *T.* ACID and *Triatomic* ALCOHOL. As regards alcohols, the term is superseded by *trihydric.* 2. Of salts, formed from a t. acid by the replacement of three atoms of hydrogen by bases. [α, 38.]

TRIBE, n. Trib. Lat., *tribus.* Fr., *tribu.* Ger., *Gruppe.* In botany, a division of an order (or suborder); a group superior to a genus and subordinate to a family. [α, 35.]

TRIBENZOYCIN, n. Tri-be2nz-o'i2s-i2n. Fr., *tribenzoycine, tribenzoïcine.* A glyceride of benzoic acid, $C_{24}H_{20}O_6 = C_3H_5(C_6H_5\text{-}CO.O)_3$. [B, 93 (α, 14).]

TRIBROMACETIC ACID, n. Tri-brom-a2s-et(e2t)'i2k. A monobasic acid. $C_2Br_3HO_2 = CBr_3 - CO.OH$, derived from acetic acid, forming transparent prismatic crystals. [B, 3 (α, 38); B, 4.]

TRIBROMACETOXYL, TRIBROMACETYL, n's. Tri-brom-a2s-e2t-o2x'i2l, -a2s'e2t-i2l. Ger., *Tribromacetoxyl.* A radicle, $CBr_3CO = C_2Br_3O.$, derived from acetyl (acetoxyl). [B, 4.]

TRIBROMALDEHYDE, n. Tri-brom-a2l'de2-hid. Ger., *Tribromaldehyd.* See BROMAL.

TRIBROMAMIDOBENZENE, TRIBROMANILINE, n's. Tri-brom-a2m-i2d-o-be2nz'en, -a2n'i2l-i2n. A substitution compound of aniline, $C_6H_2Br_3NH_2$. Two isomeric varieties are known, both forming crystalline solids. [B, 4.]

TRIBROMBENZENE, n. Tri-brom-be2nz'en. Ger., *Tribrombenzol.* A triatomic bromine substitution-product of benzene, $C_6H_3Br_3$. There are three isomeric modifications, all crystalline. [B, 4.]

TRIBROMETHYLENE, n. Tri-brom-e2th'i2l-en. Ger., *Tribromäthylen.* See ETHINYL *tribromide.*—**T. dibromide.** See ETHINYL *pentabromide.*

TRIBROMHYDRIN, n. Tri-brom-hid'ri2n. Fr., *tribromhydrine.* Ger., *T.* A body, $C_3H_5Br_3 = CH_2Br - CH.Br. - CH_2Br$, isomeric with brompropylene dibromide. [B, 3 (α, 38); B, 4.]

TRIBROMHYDROQUINONE, n. Tri-brom-hid-ro-kwi2n'on. A substitution-product, $C_6HBr_3(OH)_2$, of hydroquinone. [B, 4.]

TRIBROMIDE, n. Tri-brom'i2d(id). Fr., *tribromure.* Ger., *Tribromür.* A bromine compound analogous to a trichloride (*q. v.*). [B.]

TRIBROMORCIN, TRIBROMORCINOL, n's. Tri-brom-o2rs'i2n, -o2rs'i2n-o2l. Fr., *tribromorcine.* Ger., *T.* The compound $C_7H_3Br_3(OH)_2$. [B, 3 (α, 38); B, 4.]

TRIBROMOXALIN, n. Tri-brom-o2x'a2l-i2n. An acid, $C_3Br_3N(NH)$; the only acid, except hydrocyanic acid, which contains carbon without either sulphur or oxygen. [B, 3 (α, 38).]

TRIBROMPHENOL, n. Tri-brom-fe2n'o2l. Ger., *T.* The compound $C_6H_2Br_3(OH)$. [B, 3 (α, 38); B, 4.]

TRIBROMSALICYLIC ACID, n. Tri-brom-sa2l-i2s-i2l'i2k. The compound $C_7H_3Br_3O_3$. [B.]

TRIBROMTOLUENE, n. Tri-brom-to2l-u2'en. Ger., *Tribromtoluol.* A substitution compound, $C_6H_2Br_3.CH_3$, of toluene, of which six isomeric varieties are known, all crystalline solids. [B, 3 (α, 38); B, 4.]

TRIBULUS (Lat.), n. m. Tri2b'u2l(u4l)-u3s(u4s). Gr., τρίβολος. Fr., *herse, tribule.* Ger., *Burzeldorn.* Caltrops; a genus of the *Zygophylleæ.* The *Tribuleæ* are a subdivision of the *Zygophylleæ.* [α, 35.]—**T. cistoides.** Fr., *herse cistoïde.* Turkey-blossom; a West Indian species. The roots are used as an aperient, and the bruised leaves as a maturant. [B, 35.]—**T. lanuginosus.** An East Indian species. The leaves and root are used as a diuretic, the seeds in gonorrhœa and dropsy, and the herb as an astringent and anthelminthic. [α, 35.]—**T. maximus.** Ger., *grosser Burzeldorn.* A West Indian species. The root is used in laxative ptisans, and the leaves in emollient poultices or in salves in skin diseases. [α, 35.]—**T. terrestris.** Fr., *herse* (*hérissé*), *croix de chevalier* (ou *de Malte*), *herbe* (ou *saligot,* ou *tribule*) *terrestre, tribule commun.* Ger., *gemeiner Burzeldorn, Erdstachelnuss.* Land-caltrops, the τρίβολος of Dioscorides; found in southern Europe, Asia Minor, and northern Africa. It was formerly used as an astringent tonic in dysentery, hæmorrhages, etc. [α, 35.]

TRIBUTUM (Lat.), n. n. Tri2b-u2t(ut)'u3m(u4m). From *tribuere,* to render. A tribute.—**T. lunare.** See MENSTRUATION.

TRIBUTYLAMINE, n. Tri-bu2t-i2l'a2m-en. Fr., *t.* Ger., *Tributylamin.* An oily liquid, $N(C_4H_9)_3$, boiling at 208° C. [B.]

TRIBUTYRIN, n. Tri-bu2t'i2r-i2n. Fr., *tributyrine.* Ger., *T.* A substance, $C_3H_5(C_4H_7O_2)_3$, forming one of the constituents of butter, and occurring as a liquid of sharp and bitter taste. [B, 3 (α, 38); B, 4.]

TRICÆ (Lat.), n. f. pl. Tris(trek)'e(a3-e2). From θρίξ, hair. See PLICA (2d def.).

TRICAPRIN, TRICAPRININ, n's. Tri-ka2p'ri2n, -ri2n-i2n. See under GLYCERYL *caprate.*

TRICAPROIN, TRICAPRONIN, n's. Tri-ka2p'ro-i2n, -ka2p'ron-i2n. Ger., *T.* See under GLYCERYL *caproate.*

TRICAPRYLIN, n. Tri-ka2p-ri2l-i2n. See under GLYCERYL *caprylate.*

TRICARBON, n. Tri-ka3rb'o2n. A radicle composed of three atoms of carbon. [B.]

TRICARPELLARY, adj. Tri-ka3rp'e2l-a-ri2. Lat., *tricarpellaris.* Having three carpels. [α, 35.]

TRICARPOUS, adj. Tri-ka3rp'u3s. Lat., *tricarpus* (from τρεῖς, three, and καρπός, fruit). Composed of three united fruits. [α, 35.]

TRICAUDALIS (Lat.), n. m. Tri(tri2)-ka4d(ka3-u4d)-al(a3l)'i2s. From *tres,* three, and *cauda,* the tail. See RETRAHENS *aurem.*

TRICEPHALOUS, adj. Tri-se2f'a2l-u3s. Lat., *tricephalus* (from τρεῖς, three, and κεφαλή, the head). Fr., *tricéphale.* Ger., *dreikopfig.* Having three heads; of a fruit, having three beaks. [α, 35.] The *tricephalus* (Fr., *tricéphale*; Ger., *Dreikopf*) of Veit is that form of double monster in which there is only one body below the umbilicus, two chests and necks with separate lungs, hearts, and tracheæ, but three heads with three distinct larynges. [L, 49 (α, 14).]

TRICEPS (Lat.), adj. Tri(tri2)'se2ps(ke2ps). Gen., *tricip'itis.* From *tres,* three, and *caput,* the head. Fr., *t.* Three-headed; as a n. m., a muscle that has three heads. [α, 48.]—**T. auris.** See RETRAHENS *aurem.*—**T. biceps brachii.** A muscle in solipeds formed by the union of the scapulo-olecranius, scapulo-olecranius major, humero-olecranius internus, and humero-olecranius externus. [L.]—**T. brachialis** [Coues], **T. brachii.** Fr., *t. brachial.* See *T.* EXTENSOR *cubiti.*—**T. cruris.** 1. See EXTENSOR *cruris quadriceps.* 2. In solipeds, the rectus, vastus internus, and vastus externus muscles regarded as one. [L.]—**T. femoris.** Fr., *t. fémoral.* See EXTENSOR *cruris quadriceps.*—**T. magnus.** See ADDUCTOR *femoris magnus.*—**T. minor, T. primus.** See ADDUCTOR *femoris longus.*—**T. secundus.** See ADDUCTOR *femoris brevis.*—**T. suræ.** The combined gastrocnemius and solæus muscles. [L, 31.]

TRICERASTES (Lat.), n. f. Tri(tri2)-se2r(ke2r)-a2st(a3st)'ez(as). Fr., *tricéraste.* The genus *Datisca.* [α, 35.]—**T. glomerata.** Durango plant; a California species; a stomachic and cardiac stimulant. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 608 (α, 14).]

TRICHADENIA (Lat.), n. f. Tri2k(tri2ch2)-a2d(a3d)-en(an)'i2-a3. From θρίξ, a hair, and ἀδήν, a gland. A genus of the *Bixineæ.* [α, 35.]—**T. zeylanica.** The *tettigaha* of Ceylon; a large tree the seeds of which yield an oil used for burning and in the skin diseases of children. [α, 35.]

TRICHAMOMILLOL, n. Tri-ka2m-o-mi2l'o2l. A deep-blue, viscid substance, $C_{30}H_{48}O_3$, of slight odor. It is one of the constituents of oil of chamomile, ethereal oil of wormwood, oil of pichurim beans, and the oil obtained from galbanum by dry distillation. [B, 3 (α, 38).]

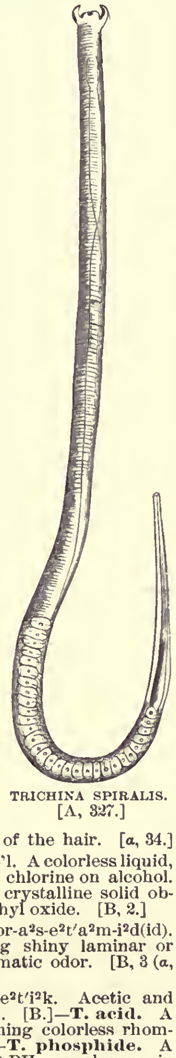
TRICHANGEIECTASIA (Lat.), n. f. Tri2k(tri2ch2)-a2n(a3n2)-ji2(ge2-i2)-e2k-taz(ta3s)'i2-a3. From θρίξ, a hair, ἀγγεῖον, a vessel, and ἔκτασις, extension. See TELANGEIECTASIS.

TRICHANGEIUM (Lat.), n. n. Tri2k(tri2ch2)-a2n(a3n2)-ji'-(ge2'i2)-u3m(u4m). From θρίξ, a hair, and ἀγγεῖον, a vessel. See CAPILLARY (3d def.).

TRICHASMUS (Lat.), n. m. Tri2k(tri2ch2)-a2z(a3s)'mu3s(mu4s). From θρίξ, a hair. See HYPERTRICHOSIS.

TRICHATROPHIA (Lat.), n. f. Tri2k(tri2ch2)-a2t(a3t)-ro(ro2)'-fi2-a3. From θρίξ, a hair, and ἀτροφία, atrophy. Atrophy of the hair. [α, 34.]

TRICHAUXE (Lat.), **TRICHAUXIS** (Lat.), n. f. Tri2k-(tri2ch2)-a4x'(a3'u4x)-e(a), -i2s. Gen., *-aux'es, -aux'eos (-is).* From θρίξ, a hair, and αὔξη, growth. See HYPERTRICHOSIS.



TRICHIA (Lat.), n. f. Tri2k(tri2ch2)'i2-a3. From θρίξ, a hair. 1. An old term for entropion. [F.] 2. See TRICHIASIS.

TRICHIASIS (Lat.), n. f. Tri2k(tri2ch2)-i2-a(a3)'si2s. Gen., *-as'eos (-is).* Gr., τριχίασις (from θρίξ, a hair). Fr., *t.* Ger., *T.* It., *trichiasi.* Sp., *triquiasis.* 1. See TRICHOSIS. 2. That condition of the eyelids in which, owing to long-continued marginal blepharitis or to chronic trachoma, some of the eyelashes are inverted and rub over and irritate the eyeball. It is frequently complicated by spasm of the orbicularis muscle. T. passes into entropion by imperceptible degrees. [F.] 3. Of Hippocrates, a voiding of hair with the urine. 4. An abscess of the mamma. [L, 50 (α, 14).]—**T. carunculæ.** The development of long, stout hairs in the caruncle of the inner canthus of the eye. [F.]—**T. of the anus.** Inversion of the hairs which grow about the anus. [D.]

TRICHILIA (Lat.), n. f. Tri2-ki2l(ch2el)'i2-a3. From τρίχειλος, three-lipped. Fr., *trichilie.* A genus of tropical African and American trees. The *Trichilieæ* are a tribe of the *Meliaceæ.* [α, 35.]—**T. cathartica.** A Brazilian tree. The bark is purgative and emetic and is used in dropsy. [α, 35.]—**T. emetica.** The roka-tree of Arabia. The bark and fruits are emetic; a decoction of the fruits is used as a hair-wash, and an ointment made from the seeds is used in itch. [α, 35.]—**T. havanensis.** A Cuban and Mexican species with a purgative bark. [α, 35.]—**T. moschata.** Musk-wood; a Jamaica species; according to Hancock, found also in Guiana, and a source of juribali-bark. [α, 35.]—**T. trifoliata.** A West Indian and South American shrub, all parts of which have an offensive odor. The bark, which is a drastic purgative and uterine stimulant, is used in amenorrhœa, intestinal catarrh, and asthma, and as an abortifacient. [α, 35.]

TRICHINA (Lat.), n. f. Tri2k(tri2ch2)-in(en)'a3. From θρίξ, a hair. Fr., *trichine.* Ger., *Haarwurm, Trichine.* A genus of parasitic worms, of the *Nematoidea.* [α, 48.]—**T. cystica.** See FILARIA *medinensis.*—**T. spiralis.** Fr., *trichine.* Ger., *Trichine.* A small viviparous species from $\frac{1}{20}$ to $\frac{1}{18}$ inch in length (the female

being somewhat the larger), having a pointed, narrow, and unarmed head with a small oral aperture. The larvæ are very tenacious of life, having been kept alive for a month. They present the form of spirally coiled worms, in the interior of small globular or oval cysts, about $\frac{1}{50}$ inch long, and are usually found in the voluntary muscles. In some cases they are found free. The flesh containing the larvæ having been eaten, they are set free during digestion and attain maturity rapidly, sometimes within forty-eight hours, and after a week the young are discharged from the uterus of the female, and, piercing the intestines, burrow into the tissues, producing trichiniasis. [L.]

TRICHINA SPIRALIS. [A, 327.]

TRICHINATOUS, adj. Tri2-ki2n'a2t-u3s. See TRICHINOUS.

TRICHINIASIS (Lat.), n. f. Tri2k-(tri2ch2)-i2n(en)-i2-a(a3)'si2s. Gen., *-as'eos* (*-i'asis*). From *trichina* (*q. v.*). The disease produced by the entrance of trichinæ into the organism. The initial symptoms are those of gastro-intestinal disturbance (a sense of pressure in the epigastrium, nausea, and vomiting, followed usually by violent diarrhœa), followed in a week or two by excessive pain and soreness of the muscles to which the trichinæ may have gained access. [A, 446.]

TRICHINOPHOBIST, n. Tri2k-i2n-o2f'o2b-i2st. From *trichina* (*q. v.*), and φοβεῖν, to fear. One who has a morbid dread of trichiniasis in himself or in others. [Shoemaker, "N. Y. Med. Jour.," May 10, 1884, p. 528 (D).]

TRICHINOSIS (Lat.), n. f. Tri2k(tri2ch2)-i2n(en)-os'i2s. Gen., *-os'eos* (*-is*). See TRICHINIASIS.

TRICHINOUS, adj. Tri2k-in'u3s. Infested with trichinæ, due to the presence of trichinæ.

TRICHIOSIS (Lat.), n. f. Tri2k(tri2ch2)-i2-os'i2s. Gen., *-os'eos* (*-is*). From θρίξ, a hair. See TRICHOSIS and TRICHIASIS (2d def.).—**T. districtx.** See DISTRIX and cf. FRAGILITAS *crinium* and TRICHORRHEXIS *nodosa*.

TRICHISMUS (Lat.), n. m. Tri2k(tri2ch2)-i2z(i2s)'mu3s(mu4s). Gr., τριχισμός (from θρίξ, a hair). Fr., *trichisme*. Ger., *Haarspalt*, *Haarbruch*. See *Linear* FRACTURE.

TRICHITIS (Lat.), n. f. Tri2k(tri2ch2)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From θρίξ, a hair. Ger., *Haarentzündung*. Inflammation of the hair. [α, 34.]

TRICHLORACETAL, n. Tri-klor-a2s'e2t-'l. A colorless liquid, $CCl_3-CH(O.O_2H_5)_2$, formed by the action of chlorine on alcohol. An isomeric variety, $CHCl_2.CCl(O.C_2H_5)_2$, is a crystalline solid obtained by the action of alcohol on tetrachlorethyl oxide. [B, 2.]

TRICHLORACETAMIDE, n. Tri-klor-a2s-e2t'a2m-i2d(id). A body, $CCl_3.CO(NH_2) = C_2Cl_3H_2NO$, forming shiny laminar or prismatic crystals, of sweetish taste and aromatic odor. [B, 3 (α, 38); B, 4.]

TRICHLORACETIC, adj. Tri-klor-a2s-e2t'i2k. Acetic and containing three substituted atoms of chlorine. [B.]—**T. acid.** A monobasic acid, $CCl_3COOH = C_2Cl_3HO_2$, forming colorless rhomboedral crystals. Used as a caustic. [B, 4.]—**T. phosphide.** A colorless substance, $C_2Cl_3O.PH_2 = CCl_3-CO.PH_2$, analogous in structure to trichloracetamide. [B, 2.]

TRICHLORACETONITRIL, n. Tri-klor-a2s-e2t-o-nit'ri2l. An oily liquid, $C_2Cl_3.N = CCl_3.CN$, of penetrating odor. [B, 4.]

TRICHLORACETOPHOSPHAMIDE, n. Tri-klor-a2s-e2t-o-fo2sf'a2m-i2d(id). See TRICHLORACETIC *phosphide*.

TRICHLORACETYL, n. Tri-klor-a2s'e2t-i2l. Syn.: *trichloracetoxyl*. A radicle, $CCl_3CO' = C_2Cl_3O'$.—**T. bromide.** A yellowish fuming liquid, $C_2Cl_3O.Br$. [B, 4 (α, 38).]—**T. carbamide.** See *T. urea*.—**T. chloride.** An oily liquid, $CCl_3COCl = C_2Cl_4O$, of powerful odor. [B, 4.]—**T. hydrate.** Trichloracetic acid. [B.]—**T. hydride.** See CHLORAL.—**T. nitride.** See TRICHLORACETAMIDE.—**T. phosphide.** See TRICHLORACETIC *phosphide*.—**T. urea.** A substance, $CCl_3CO-NH.CONH_2NH_2 = C_3H_3Cl_3N_2O_2$, formed by the substitution of t. for hydrogen in urea. [B, 2.]

TRICHLORACETYPHIDE, n. Tri-klor-a2s-e2t'i2f-i2d(id). See TRICHLORACETIC *phosphide*.

TRICHLORALDEHYDE, n. Tri-klor-a2ld'e2-hid. See CHLORAL.

TRICHLORANILINE, n. Tri-klor-a2n'i2l-en. A substitution product of aniline, $C_6H_2.Cl_3.NH_2$. Three isomeric crystalline varieties are known. [B, 3 (α, 38); B, 4.]

TRICHLORBENZENE, n. Tri-klor-be2nz'en. A substitution product of benzene, $C_6H_3Cl_3$. There are three isomeric modifications, all crystalline substances, differing in appearance and in their fusing points. [B, 4.]

TRICHLORBENZOIC ACID, n. Tri-klor-be2nz-o'i2k. A crystalline acid, $C_6H_2Cl_3.CO.OH$, known in three isomeric forms. [B, 3 (α, 38).]

TRICHLORBENZOIC ALDEHYDE, n. Tri-klor-be2nz-o'-i2k. A solid substance, $C_6H_2Cl_3.CHO$, known in two isomeric forms. [B, 3 (α, 38); B, 4.]

TRICHLORBUTIDENE, TRICHLORBUTYLIDENE, n's. Tri-klor-bu2t'i2d-en, -bu2t-i2l'i2d-en. A bivalent radicle, $C_4H_5Cl_3$. [B, 3.]—**T. alcohol, T. glycol.** See BUTYLCHLORAL *hydrate*.—**T. oxide.** See BUTYLCHLORAL.

TRICHLORBUTYRIC ACID, n. Tri-klor-bu2t-i2r'i2k. A monobasic crystalline acid, $C_4H_5Cl_3O_2 = CH_3.CHCl.CCl_2CO.OH$, occurring as acicular crystals. [B, 3.]

TRICHLORCROTONIC ACID, n. Tri-klor-kro-to2n'i2k. A monobasic crystalline acid, $C_4H_3Cl_3O_2$. [B, 4, 158.]

TRICHLORETHANE, n. Tri-klor-e2th'an. Fr., *trichloréthane*. Ger., *Trichloräthan*. Acetyl trichloride; a colorless liquid, $C_2H_3Cl_3$, of an odor like that of chloroform. [B, 3 (α, 38); B, 4.]

TRICHLORETHER, n. Tri-klor-eth'u5r. The compound $C_4H_7Cl_3O = CHCl_2.CHCl.O.C_2H_5$. [B, 4 (α, 38).]

TRICHLORETHIDENE, n. Tri-klor-e2th'i2d-en. Fr., *trichloréthidène*. Ger., *Trichloräthiden*. See TRICHLORETHYLIDENE.

TRICHLORETHYL, n. Tri-klor-e2th'i2l. The chemical group $C_2H_2CL_3$. [α, 38.]

TRICHLORETHYLENE, n. Tri-klor-e2th'i2l-en. See ETHINYL *trichloride*.—**T. dichloride.** See ETHINYL *pentachloride*.

TRICHLORETHYLIDENE, n. Tri-klor-e2th-i2l'i2d-en. A bivalent radicle, C_2HCL_3. [B.]—**T. alcohol.** See CHLORAL *hydrate*.—**T. diacetamide.** A substance, $CCl_3.CH(N.C_2H_3O.H)_2$, produced by heating chloral with acetonitril. It occurs as shining acicular crystals. [B, 3 (α, 38).]—**T. diacetate.** An oily liquid, $CCl_3.CH(O-C_2H_3O)_2 = C_6H_7Cl_3O_4$, of peculiar odor. [B, 3 (α, 38); B, 4.]—**T. diethylate, T. diethyl ether.** See TRICHLORACETAL.—**T. ethylacetin.** A liquid, $CCl_3.CH(OC_2H_5)(OC_2H_3O) = C_6H_9Cl_3O_3$, of agreeable odor. [B, 3 (α, 38).]—**T. ethyl ether.** See CHLORAL *alcoholate*.—**T. hydramine, T. hydrate amide.** Chloralammonia; a body, $CCl_3.CH\langle{}^{OH}_{NH_2} = C_2H_4Cl_3NO$, forming white acicular crystals, produced by the action of ammonia on cooled chloral. [B, 3.]—**T. hydrate ethylate.** See CHLORAL *alcoholate*.—**T. oxide.** See CHLORAL.—**T. thiohydrin.** A substance, $(CCl_3.CH.OH)_2S$, occurring as rhomboedral crystals, having an odor like that of mercaptan; produced by treating an ethereal solution of chloral or an aqueous solution of chloral hydrate with sulphureted hydrogen. [B, 3 (α, 38).]—**T. urea.** A substance, $CO.NH_2(NH.CH.OH.CCl_3)$, produced by treating urea solution with chloral, and occurring as rhombic crystals. [B, 3 (α, 38).]

TRICHLORHYDRIN, n. Tri-klor-hid'ri2n. Glyceryl or propenyl trichloride; a colorless, oily liquid, $C_3H_5.Cl_3 = CH_2Cl.CH.Cl.CH_2Cl$, isomeric with propylene trichloride and chlorpropylene dichloride. It smells like alcohol. [B, 3 (α, 38); B, 4.]

TRICHLORHYDROXYPENTOIC ACID, n. Tri-klor-hid-ro2x-i2-pe2nt-o'i2k. An acid, $CH_3.CCl_2.CHCl.CH(OH).CO.OH$, occurring as tabular crystals resembling gypsum. [B, 3 (α, 38).]

TRICHLORIDE, n. Tri-klor'i2d(id). A compound consisting of an element or radicle united directly with chlorine in the proportion of three atoms of the latter to a definite amount of the former assumed as the unit of comparison. [B.]

TRICHLORINATED, adj. Tri-klor'i2n-at-e2d. Lat., *trichloratus*. Fr., *trichloriné*. Ger., *trichlorinirt*. Combined with three atoms of chlorine. [B, 2.]

TRICHLORLACTIC ACID, n. Tri-klor-la2k'ti2k. An acid, $CCl_3.CH(OH)CO.OH$, forming prismatic crystals, and readily decomposable by weak bases into chloral and formic acid, and by the strong alkalies into chloroform. [B, 3.]

TRICHLORLACTONITRIL, n. Tri-klor-la2kt-o-nit'ri2l. A crystalline substance, $CCl_3.CH(OH).CN$, formed by the direct union of chloral and hydrocyanic acid. [B, 3.]

TRICHLORNAPHTHALENE, n. Tri-klor-na2p(na2f)'tha2l-en. The compound $C_{10}H_5Cl_3$. [B, 4 (α, 38).]

TRICHLORODIMETHYLANILINAMIDOPHENOL, n. Tri-klor-o-di-me2th-i2l-a2n-i2l-i2n-a2m-i2d-o-fe2n'o2l. See INDOPHENOL.

TRICHLOROPHENATE, n. Tri-klor-o-fe2n'at. A compound of trichlorphenol with a metallic radicle. The t's are said to have the same antiseptic properties as trichlorphenol. [B, 4.]

TRICHLORORCIN, TRICHLORORCINOL, n's. Tri-klor-o2r'si2n, -o2r'si2n-o2l. A chlorine substitution product, $C_6Cl_3(CH_3)(OH)_2$, of orcin. [B, 3 (α, 38); B, 4.]

TRICHLOROSTRYCHNINE, n. Tri-klor-o-stri2k'nen. Fr., *t*. A substance, $C_{21}H_{19}Cl_3N_2O_2$, obtained by treating a diluted solution of strychnine with a current of chlorine; it is neutral, crystallizable, and very bitter. [B, 93 (α, 14).]

TRICHLORPHENOL, n. Tri-klor-fe2n'o2l. A solid substance, $C_6H_2Cl_3.OH$, prepared by the action of chlorinated lime on carbolic acid, aniline, and other aromatic substances. It has a peculiar odor, and in substance exerts a feeble caustic action, but in solution is not irritant. It is said to act as a very energetic disinfectant, deodorizer, and antiseptic. It occurs as acicular crystals, and forms salts called *trichlorophenates* [Dianin, "St. Petersb. med. Wchnschr.," No. 38, 1882 (B).]—**T. blue.** A coloring matter, $C_{14}H_{11}Cl_3N_2O$, occurring as acicular crystals which appear green by reflected light if the beam falls in the plane of the longer axis, but deep red if the beam is perpendicular to this axis. In solution it colors animal fibres a fast greenish blue. [B, 3 (α, 38).]

TRICHLORPYROGALLOL, n. Tri-klor-pir-o-ga2l'o2l. A substance, $C_6Cl_3(OH)_3$, produced when dry chlorine is passed through a cold mixture of pyrogallic and acetic acids, and occurring as acicular crystals containing three molecules of water. [B, 3 (α, 38).]

TRICHLORQUINOL, n. Tri-klor-kwi2n'o2l. A crystalline substance, $C_6HCl_3(OH)_2$. [B, 3.]

TRICHLORQUINONE, n. Tri-klor-kwi²n'on. A substance, $C_6HCl_3O_2$, occurring as large yellow tabular crystals. [B, 3 (α, 38); B, 4.]—**T'dimethylanilenimide.** See TRICHLORPHENOL *blue.*

TRICHLORRESORCIN, TRICHLORRESORCINOL, n's. Tri-klor-re²z-o²rs'i²n, -o²rs'i²n-o²l. A substance, $C_6HCl_3(OH)_2$, occurring as acicular crystals. An isomeric form, *isotrichlorresorcin*, is also known. [B, 3.]

TRICHLORSALICIN, n. Tri-klor-sa²l'i²s-i²n. Fr., *trichloro-salicine.* Ger., *T.* A substance, $C_{13}H_{15}Cl_3O_2$, forming yellowish acicular crystals of very bitter taste. [B, 93 (α, 14).]

TRICHLORSALIGENIN, n. Tri-klor-sa²l-i²j'e²n-i²n. Fr., *trichloro-saligénine.* A substance produced by decomposing trichlorsalicin with synaptase. [B, 93 (α, 14).]

TRICHLORSILICOMETHANE, n. Tri-klor-si²l-i²k-o-me²th'-an. See SILICOCHLOROFORM.

TRICHLORTOLUENE, n. Tri-klor-to²l-u²'en. Ger., *Trichlortoluol.* A substitution product, $C_6H_2Cl_3.CH_3 = C_7H_6Cl_3$, of toluene, known in two isomeric forms. [B, 3 (α, 38); B, 4.]

TRICHOBLAST, n. Tri²k'o-bla²st. From θρίξ, a hair, and βλαστός, a sprout. A hair occurring in the interior tissues of a plant. [α, 35.]

TRICHOCARDIA (Lat.), n. f. Tri²k(tri²ch²)-o(o³)-ka³rd'i²-a³. From θρίξ, a hair, and καρδία, the heart. Fr., *trichocardie.* See COR *hirsutum.*

TRICHOCARPOUS, adj. Tri²k-o-ka³rp'u³s. Lat., *trichocarpus* (from θρίξ, a hair, and καρπός, a fruit). Having the fruit hairy. [α, 35.]

TRICHOCÉPHALE (Fr.), n. Tre-ko-sa-fa³l. See TRICHOCEPHALUS.—**T. de l'homme.** See TRICHOCEPHALUS *dispar.*—**T. des ruminants.** See TRICHOCEPHALUS *affinis.*—**T. sans pareil.** See TRICHOCEPHALUS *dispar.*—**T. voisin.** See TRICHOCEPHALUS *affinis.*

TRICHOCEPHALUS (Lat.), n. m. Tri²k(tri²ch²)-o(o³)-se²f-(ke²f)'a²l(a³l)-u³s(u⁴s). From θρίξ, a hair, and κεφαλή, the head. Fr., *trichocéphale.* Ger., *Haarkopfwurm.* A genus of nematoid worms, of the *Filaridæ.* [L, 18.]—**T. affinis.** Fr., *trichocéphale voisin* (ou *des ruminants*). A worm found in the cæcum of sheep and other ruminants. It closely resembles *T. dispar.* [L, 15.]—**T. apri, T. castoris.** A species found in the beaver. [L, 87 (α, 50).]—**T. crenatus.** Fr., *trichocéphale crénelé.* A species found in the large intestine of the hog; possibly *T. dispar.* [L, 17.]—**T. depressiusculus.** Fr., *trichocéphale déprimé.* A species found in the cæcum of the dog and fox. [Rudolphi (L, 17).]—**T. dispar.** Fr., *trichure, trichuride.* Ger., *Peitschenwurm.* Long thread-worm, whip-worm; a species 1 to 2 inches in length (the female being somewhat longer) and having a long filiform neck. The surface has transverse striæ and a longitudinal band of small wart-like papillæ. For a peculiar appendage of the male, see APPENDIX *copulatoria.* The worm, introduced into the human body by drinking water, is an irritant parasite of the small intestine. In its larval stage some consider it identical with the *Trichina spiralis.* [L.]—**T. equi.** See OXYURIS *curvula.*—**T. hominis, T. lemuris, T. palæformis.** See *T. dispar.*

TRICHOCIRSUS (Lat.), n. m. Tri²k(tri²ch²)-o(o³)-su³rs(ki²rs)'-u³s(u⁴s). From θρίξ, a hair, and κιρσός, a varix. Of Dzondi, an abnormal dilatation of capillary vessels. [L, 50 (α, 14).]

TRICHOCLASIS (Lat.), n. f. Tri²k(tri²ch²)-o²k(o²ch²)'la²s-(la³s)-i²s. Gen., *-as'eos (-is).* From θρίξ, a hair, and κλάσις, a breaking. Of Wilson, pathological brittleness of the hair. [α, 34.]

TRICHOCRYPTOSES (Lat.), n. f. pl. Tri²k(tri²ch²)-o(o³)-kri²pt(kru⁶pt)-os'ez(e²s). From θρίξ, a hair, and κρυπτός, hidden. Diseases of the hair follicles. [α, 34.]

TRICHOCYST, n. Tri²k'o-si²st. From θρίξ, a hair, and κύστις, a cyst. Fr., *trichocyste.* One of the peculiar cells found in certain *Infusoria*, very nearly identical with the nematocysts of the *Cœlenterata.* [B, 28 (α, 27).]

TRICHODANGEIA (Lat.), n. n. pl. Tri²k(tri²ch²)-od-a²n-(a³n²)-ji'(ge²-i²)-a³. From τριχώδης, hair-like, and ἀγγεῖον, a vessel. The capillaries. [L, 50 (α, 14).]

TRICHODANGEIITIS (Lat.), n. f. Tri²k(tri²ch²)-od-a²n-(a³n²)-je²(ge²-i²)-i(e)'ti²s. Gen., *-it'idos (-idis).* Fr., *trichodangiite.* Inflammation of the capillaries. [L, 50 (α, 14).]

TRICHODARTERIA (Lat.), n. f. Tri²k'tri²ch²)-od-a³rt-er-(ar)'i²-a³. From τριχώδης, hair-like, and ἀρτηρία, an artery. Ger., *Haarschlagader.* An arteriole. [L, 50 (α, 14).]

TRICHODARTERIITIS (Lat.), n. f. Tri²k(tri²ch²)-od-a³rt-e²r(ar)-i²-i(e)'ti²s. Gen., *-it'idos (-idis).* Fr., *trichodartériite.* Inflammation of the arterioles. [L, 50 (α, 14).]

TRICHODESMA (Lat.), n. n. Tri²k(tri²ch²)-o(o³)-de²z'de²s)'-ma³. Gen., *-des'matos (-atis).* From θρίξ, a hair, and δέσμα, a bond. A genus of the *Boragineæ.* [α, 35.]—**T. indicum.** An East Indian species used as an alterative and diuretic and in snake-bites. The leaves are employed as an emollient poultice. [α, 35.]

TRICHODOPHLEBITIS (Lat.), n. f. Tri²k(tri²ch²)-od-o(o³)-fle²b-i(e)'ti²s. Gen., *-it'idos (-idis).* From τριχώδης, hair-like, and φλέψ, a vein. Inflammation of the venules. [L, 50 (α, 14).]

TRICHOGENOUS, adj. Tri²k-o²j'e²n-u³s. From θρίξ, a hair, and γεννᾶν, to engender. Hair-forming; promoting the growth of hair. [G.]

TRICHOGLOSSIA (Lat.), n. f. Tri²k(tri²ch²)-o(o³)-glo²s(glos)'-si²-a³. From θρίξ, a hair, and γλῶσσα, the tongue. Fr., *trichoglossie.* A hyperplastic condition of the epithelium of the tongue in which hair-like processes project from the tips of the lingual papillæ. [D.]

TRICHOGYNE, n. Tri²k'o-ji²n. From θρίξ, a hair, and γυνή, a woman. The receptive portion of a procarp; a thread-like appendage to the carpogonium of certain *Carpophyta.* [α, 35.]

TRICHOID, adj. Tri²k'oid. Gr., τριχώδης (from θρίξ, a hair, and εἶδος, resemblance). Fr., *trichoïde.* Resembling a hair. [L, 41, 50 (α, 14).]

TRICHOLEPIS (Lat.), n. f. Tri²k(tri²ch²)-o'le²p-i²s. From θρίξ, a hair, and λεπίς, a husk. Fr., *tricholépide.* A genus of the *Compositæ.* [α, 35.]—**T. procumbens.** An East Indian herb, referred by Bentham and Hooker to the genus *Volutarella.* According to some, it is used medicinally in Persia. [α, 35.]

TRICHOLEUCOSIS (Lat.), n. f. Tri²k(tri²ch²)-o(o³)-lu²k-os'i²s. Gen., *-os'eos (-is).* From θρίξ, a hair, and λεύκωσις, whiteness. Fr., *tricholeucose.* See CANITIES.

TRICHOLITHUS (Lat.), n. m. Tri²k(tri²ch²)-o²l'i²th-u³s(u⁴s). From θρίξ, a hair, and λίθος, a stone. Fr., *tricholithe.* A hairy concretion. [L, 50 (α, 14).]

TRICHOLOGIA (Lat.), n. f. Tri²k(tri²ch²)-o(o³)-loj(lo²g)'i²-a³. From θρίξ, a hair, and λέγειν, to pick out (1st def.), or λόγος, understanding (2d def.). 1. See CARPHOLOGY. 2. See TRICHOLOGY.

TRICHOLOGY, n. Tri²k-o²l'o-ji. Lat., *trichologia.* The anatomy, etc., of the hair.

TRICHOMA (Lat.), n. n. Tri²k(tri²ch²)-om'a³. Gen., *-om'atos (-atis).* Gr., τρίχωμα (from θρίξ, hair). Fr., *trichome.* Ger., *Trichom.* 1. See PLICA *polonica.* 2. See TRICHOME.—**T. evolutum.** Plica that develops normally. [G.]—**T. latens, T. occultum.** Latent plica; a term for various general symptoms supposed to be due to the diathesis that causes plica polonica. [G.]—**T. spurium.** Plica due to accidental causes, such as filth and pediculi. [G, 7.]

TRICHOMAPHYTE, n. Tri²k-om'a³-fit. From τρίχωμα, a trichoma, and φυτόν, a plant. A vegetable parasite formerly supposed to be the cause of plica polonica. [G.]

TRICHOME, n. Tri²k'om. Lat., *trichoma* (from θρίξ, hair). A hair, scale, or other outgrowth of the epidermis of a plant. [α, 35.]

TRICHOMONAS (Lat.), n. f. Tri²k(tri²ch²)-o²m'o²n-a²s(a³s). Gen., *-mon'ados (-adis).* From θρίξ, a hair, and μονάς, a unit. Ger., *Haarmonade.* A genus of infusorians. [L, 17.]—**T. vaginalis.** An infusorian, about 0·03 mm. long, found in the vagina of women affected with gonorrhœa or an abundant vaginal secretion, and in the lochial discharge. It resembles the mucous corpuscles, but has a long filament (flagellum) or tail. It is provided with cilia. [L, 15.]

TRICHOMYCES (Lat.), n. m. Tri²k(tri²ch²)-o²m'i²(u⁶)-sez(kas). Gen., *-et'os (-etis).* From θρίξ, a hair, and μύκης, a mushroom. See TRICHOPHYTON.

TRICHOMYCOSIS (Lat.), n. f. Tri²k(tri²ch²)-o(o³)-mi²(mu⁶)-kos'i²s. Gen., *-os'eos (-is).* Fr., *trichomycose.* Ger., *Trichomykosis.* Any disease of the hair due to a vegetable parasite. [G.]—**T. barbæ.** See SYCOSIS *parasitaria.*—**T. capillitii.** 1. See KERION. 2. See *T. circinata.*—**T. capillitii sycosiformis.** See KERION.—**T. circinata.** Fr., *teigne tondante, trichophytie tonsurante, porrigine tondante.* Ger., *scherende Flechte.* Ringworm of the hairy scalp; the disease produced by invasion of the epidermis and hair of the scalp by *Trichophyton tonsurans.* It is characterized by round, slightly reddened, scaly patches of skin upon which the hairs are usually broken off at a little distance from the cutaneous surface, leaving stumps the extremities of which appear more or less split and ragged. [G, 4.]—**T. favosa.** See FAVUS.—**T. nodosa, T. nodularis.** Fr., *t. nodulaire.* Sp., *piedra.* A disease of the hair occurring in the province of Cauca in Colombia. It is characterized by the formation of hard (stone-like), black, nodular concretions upon the hairs of the scalp, which are distributed at regular intervals along the shafts and produce a rattling noise when the hair is combed or shaken. It is usually met with in women. It is due to a fungous growth said to be caused by the use of a mucilaginous oil resembling linseed oil. [G.]—**T. pustulosa.** A pustular parasitic disease affecting hairy regions, such as the scalp or bearded portions of the face; in Auspitz's classification of skin diseases, a subdivision of *Mycosis pustulosa.* It includes the varieties *T. barbæ* and *T. capillitii.* [G, 4.]—**T. pustulosa barbæ, T. trichophytina.** See SYCOSIS *parasitaria.*

TRICHONOSIS (Lat.), **TRICHONOSUS** (Lat.), n's f. Tri²k-(tri²ch²)-o²n'o²s-i²s, -u³s(u⁴s). Gen., *-nos'eos (-is), -on'osi.* From θρίξ, a hair, and νόσος, disease. See TRICHOSIS.—**T. cana** [Wilson], **T. discolor.** See CANITIES.—**T. furfuracea.** See TRICHOMYCOSIS *circinata.*—**T. plica.** See PLICA *polonica.*

TRICHOPATHY, n. Tri²k-o²p'a²th-i². Lat., *trichopathia* (from θρίξ, a hair, and πάθος, disease). Fr., *trichopathie.* Ger., *Trichopathie, Haarkrankheit.* See TRICHOSIS.

TRICHOPHORE, n. Tri²k'o-for. From θρίξ, a hair, and φορός, bearing. A row of cells of the procarp on which the trichogyne is borne in certain *Algæ.* [α, 35.]

TRICHOPHYTIASIS (Lat.), n. f. Tri²k(tri²ch²)-o(o³)-fit(fu⁶t)-i(i²)'a²s(a³s)-i²s. Gen., *-as'eos (-i'asis).* From θρίξ, a hair, and φυτόν, a plant. See TRICHOPHYTOSIS.

TRICHOPHYTIE (Fr.), n. Tre-ko-fe-te. See TRICHOPHYTOSIS.—**T. circinée.** See DERMATOMYCOSIS *maculo-vesiculosa.*—**T. cutanée.** See DERMATOMYCOSIS *trichophytina.*—**T. sycosique.** See SYCOSIS *parasitaria.*—**T. tonsurante.** See TRICHOMYCOSIS *circinata.*—**T. unguéale.** See ONYCHOMYCOSIS *trichophytina.*

TRICHOPHYTINUS (Lat.), adj. Tri²k(tri²ch²)-o(o³)-fi²t(fu⁶t)-in(en)'u³s(u⁴s). Pertaining to or due to the presence of *Trichophyton tonsurans.* [G.]

TRICHOPHYTON (Lat.), n. n. Tri²k(tri²ch²)-o²f'i²t(u⁶t)-o²n. From θρίξ, a hair, and φυτόν, a plant. Fr., *t.* A genus of *Fungi* of uncertain botanical affinities; considered by some as only stages in the development of a more highly organized fungus. [B, 54.]—

T. decalvans, T. sporuloides, T. tonsurans, T. ulcerum. The fungus of ringworm (tinea sycosis); a species closely allied to, if not identical with, *Achorion Schœnleini.* It consists of very long, slender, pale-grayish, branching, and ribbon-like threads (mycelium), containing small, round, refractive, grayish or pale-greenish spores, which are sometimes single and sometimes disposed in rows. Reproduction by sexual processes has not been observed. Some authors consider it identical with *Microsporon furfur.* [B, 54; α, 35.]

TRICOPHYTON TONSURANS. [A, 327.]

TRICHOPHYTOSIS (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-o(o^3)-fi^{2}t(fu^{6}t)-os'i^{2}s. Gen., *-os'eos (-is).* From θρίξ, a hair, and φυτόν, a plant. Fr., *trichophytie.* Syn.: *tinea trichophytina.* Ringworm; a group of skin diseases due to the presence of *Trichophyton tonsurans.* Cf. Mycosis *trichophytina.*—**T. barbæ.** See Sycosis *parasitaria.*—**T. capitis.** T. of the hairy scalp.—**T. corporis.** See Dermatomycosis *maculo-vesiculosa.*—**T. cruris.** See Eczema *marginatum.*

TRICHOPOLIOSIS (Lat.), n. f. Tri^{2}k-(tri^{2}ch^2)-o(o^3)-pol(po^{2}l)-i^2-os'i^{2}s. Gen., *-os'eos (-is).* From θρίξ, a hair, and πολιοῦσθαι, to become gray. Fr., *trichopoliose.* See Canities.

TRICHOPTILOSIS (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-o^{2}pt-i^{2}l-os'i^{2}s. Gen., *-os'eos (-is).* From θρίξ, a hair, and πτίλον, a feather. 1. Of Devergie, trichorrhexis nodosa; so called from the feathered condition of the hairs owing to splitting of the shafts. ["Ann. de derm. et de syph.," i, 1871; "Am. Jour. of Syph. and Derm.," iii, p. 254 (G).] 2. A disease of the hair, especially of that of the axillæ and pubes, in which the cortex of the hair is stripped up in places, forming feather-like projections about which at certain points masses of yellowish material become attached. The affection is regarded as the result of maceration of the hairs from excessive sweating. [Michelson (G, 82).]

TRICHORRHEXIS (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-o^{2}r-re^{2}x(rax)'i^{2}s. Gen., *-rhex'eos (-is).* From θρίξ, a hair, and ῥήγνυσθαι, to burst forth. Fr., *trichorrhexie.* See *T. nodosa.*—**T. nodosa.** Fr., *trichorrhexie noueuse.* Ger., *Auftreibungen und Spaltungen der Haare.* A disease of the hairs (most commonly of the beard and mustache, but also of the scalp, etc.) in which little spindle-shaped bulbous swellings occur along the hair-shaft, and afterward split up into numerous longitudinal divisions, weakening the hair at these points, so that it easily breaks, leaving at the point of fracture a brush-like stump composed of jagged filaments. [G, 47.] Cf. Fragilitas *crinium,* Trichoptilosis, Monilethrix, and Distrix.

TRICHORRHŒA (Lat.), **TRICHORRHYSIS** (Lat.), n's f. Tri^{2}k(tri^{2}ch^2)-o^{2}r-re(ro^2'e^2)-a^3, tri^{2}k(tri^{2}ch^2)-o^{2}r'ri^{2}s(ru^{6}s)-i^{2}s. Gen., *-rhœ'æ, -rhys'eos (-or'rhysis).* From θρίξ, a hair, and ῥοία or ῥύσις, a flowing. See Alopecia.

TRICHOSANTHES (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-o^{2}s-a^{2}nth-(a^{3}nth)'ez(as). From θρίξ, a hair, and ἄνθος, a flower. Fr., *t.* Ger., *Haarblume.* A genus of the *Cucurbitaceæ.* [α, 35.]—**T. amara.** Fr., *t. amer, anguine amère.* Ger., *bittere Haarblume.* A West Indian species. The bitter fruit is used like colocynth and as a rat poison. [α, 35.]—**T. anguina.** Fr., *t. contourné, anguine.* Ger., *schlangenfrüchtige Haarblume.* Snake-gourd; a species indigenous to China and cultivated in southern Asia and elsewhere for its fruits, which are eaten, cooked, when green, but become purgative when ripe, and are then used especially as a tæniafuge. [α, 35.]—**T. cucumerina.** Fr., *t. du Malabar.* Ger., *gurkenartige Haarblume.* A species found in southern Asia, having a strong, unpleasant odor. The stalk is used as an expectorant, the root as a purgative and tonic, an infusion of the tender shoots and dried capsules as an aperient, the expressed juice of the leaves as an emetic, and the seeds as an anthelminthic and antiperiodic. [α, 35.]—**T. cuspidata.** An East Indian species. The expressed juice is emetic and is used as an expectorant and digestive. The root is a powerful purgative. [α, 35.]—**T. dioica.** A species growing wild in Bengal and cultivated in India as an article of food. It was formerly used by the Hindus in leprosy, and is considered tonic and febrifuge. An alcoholic extract of the unripe fruit is said to be a powerful purgative. [α, 35.]—**T. incisa.** An East Indian species. The root, powered and mixed with oil of azadirachta, is used in painful ulcers. [α, 35.]—**T. laciniosa.** Fr., *t. lacinié.* Ger., *handtheilige Haarblume.* An East Indian species. The young shoots and the fruits are used as a laxative and stomachic. [α, 35.]—**T. nervifolia.** An East Indian species. The fruits are used externally in epilepsy and mental troubles. [α, 35.]—**T. palmata.** An East Indian species. The fruit, mixed with cocoanut oil, is used in earache, and the pulp is purgative. The root is considered poisonous; it is used in diseases of cattle, especially in pneumonia. [α, 35.]—**T. trifoliata.** A species found in Java and the Moluccas. The leaves are eaten and the juice is used in swellings. [α, 35.]—**T. villosa.** An East Indian and Javanese species. The fruits are used as a drastic purgative. [α, 35.]

TRICHOSCHISIS (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-o^{2}sk(o^{2}sch^2)'i^{2}s-i^{2}s. Gen., *-schis'eos (-osch'isis).* From θρίξ, a hair, and σχίσις, a cleaving. See Distrix and cf. Fragilitas *crinium.*

TRICHOSCOPY, n. Tri^{2}k-o^{2}s'ko^{2}p-i^2. From θρίξ, a hair, and σκοπεῖν, to examine. The examination of the hair. [α, 34.]

TRICHOSIS (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-os'i^{2}s. Gen., *-os'eos (-is).* From θρίξ, a hair. Fr., *trichose.* Any disease of the hair, either in the form of morbid growth or of deficiency; of Auspitz, a suborder of the *Keratonosi,* including *Hypertrichoses, Paratrichoses,* and *Atrichoses.* [G, 4.]—**T. athrix.** See Alopecia.—**T. decolor.** Morbid discoloration of the hair. [G, 33, 52.]—**T. deformis.** A morbid change in the quality or structure of the hair. [G, 33.]—**T. distrix.** See Trichoptilosis.—**T. plica.** See Plica *polonica.*—**T. poliosis.** See Canities.—**T. sensitiva.** A condition in which the scalp is so abnormally sensitive that cutting the hair causes pain. [G.]—**T. setosa.** A condition in which the hair becomes thick, rigid, and bristly. [G, 52.]

TRICHOSPORE, n. Tri^{2}k'o-spor. From θρίξ, a hair, and σπόρος, seed. A spore produced on a thread, as in the *Hyphomycetes.* The *Trichosporei* (Fr., *trichosporés*) are: Of Léveillé, a division of *Fungi,* consisting of the *Aleurinei, Phycocladei,* and *Sclerochœtei;* of Fries, a division of the *Mucedines.* [α, 35.]

TRICHOSTEMA (Lat.), n. n. Tri^{2}k(tri^{2}ch^2)-o(o^3)-stem(stam)'a^3. Gen., *-stem'atos (-atis).* From θρίξ, a hair, and στῆμα, a stamen. A genus of the *Labiatæ.* [α, 35.]—**T. lanatum.** Black sage; used by the Mexicans and Indians of southern California to promote the growth of the hair and to give it a dark color. [α, 35.]

TRICHOSTERETICUS (Lat.), adj. Tri^{2}k(tri^{2}ch^2)-o(o^3)-ste^{2}r-e^{2}t(at)'i^{2}k-u^{3}s(u^{4}s). From θρίξ, a hair, στερητικός, depriving. Ger., *haarraubend.* Causing loss of hair. [L, 50 (α, 48).]

TRICHOSYPHILIS (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-o(o^3)-si^{2}f(su^{6}f)'-i^{2}l-i^{2}s. Gen., *-il'idis.* From θρίξ, a hair, and *syphilis (q. v.).* Of Wilson, trichorrhexis nodosa affecting the hairs of the beard, following syphilitic alopecia. [G.]

TRICHOSYPHILOSIS (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-o(o^3)-si^{2}f-(su^{6}f)-i^{2}l-os'i^{3}s. Gen., *-os'eos (-is).* A syphilitic disease of the hair. [G.]

TRICHOTHECIUM (Lat.), n. n. Tri^{2}k(tri^{2}ch^2)-o(o^3)-thes-(thak)'i^2-u^{3}m(u^{4}m). From θρίξ, a hair, and θήκη, a chest. Fr., *trichotécie.* A vegetable parasite of the hair; of Link, a genus of hyphomycetous *Fungi.* [G; α, 35.]—**T. roseum.** A fungous growth found in the ear. ["Arch. f. Ohrenheilk.," v, p. 163.]

TRICHOTOMOUS, adj. Tri^{2}k-o^{2}t'o^{2}m-u^{3}s. Lat., *trichotomus* (from τρίχα, in three parts, and τομός, cutting). Fr., *trichotome.* Ger., *wiederholt-dreitheilig.* Three-forked, dividing continuously into three equal or nearly equal branches. [α, 35.]

TRICHOTON (Lat.), n. n. Tri^{2}k(tri^{2}ch^2)-ot'o^{2}n. From τριχωτός, hairy. See Capillitium (2d def.).

TRICHROMATE, n. Tri-krom'at. A compound of a basic oxide united with three molecules of chromium trioxide. [B.]

TRICHROMYL, n. Tri-krom'i^{2}l. A radicle, $(CrO_2)_3$. [B, 3.]—**T. chloride.** A black deliquescent powder, $(CrO_2)_3Cl_2$. [B, 3.]

TRICHTER (Ger.), n. Tri^{2}ch^{2}t'e^{2}r. See Infundibulum and Funnel.—**Gebärmuttert'.** See Infundibulum *tubæ.*—**Gehirnt'.** See Infundibulum (2d def.).—**Gehört'.** See Ear-*trumpet* and Infundibulum *cochleæ.*—**Hautt', Nabelhautt'.** The conical portion of the integument of the navel that encroaches upon the umbilical cord. [A, 19.]—**Pialt'.** Of Schwalbe, the sheath of pia which surrounds the small blood-vessels in the spinal cord. [I, 17 (K).] Cf. *Pial* funnels.—**T'drainage.** Of Straub, drainage of œdematous subcutaneous tissue by means of a small glass funnel inserted through an incision in the skin. [A, 319 (α, 34).]—**T'förmig.** See Infundibuliform.—**Wimpert'.** See *Nephridial* funnel.

TRICHTERBRUST (Ger.), n. Tri^{2}ch^{2}t'e^{2}r-brust. Of Ebstein, a deformity characterized by a funnel-shaped depression of the lower part of the anterior wall of the thorax and the upper part of the anterior abdominal wall, sometimes accompanied by a lower dorsal scoliosis. [L, 57 (α, 14).]

TRICHTERSCHNITT (Ger.), n. Tri^{2}ch^{2}t'e^{2}r-shni^{2}t. An infundibuliform incision. [E.]

TRICHTERWINDE (Ger.), n. Tri^{2}ch^{2}t'e^{2}r-vi^{2}nd-e^2. The genus *Ipomœa.* [α, 35.]

TRICHURIS (Lat.), n. f. Tri^{2}k(tri^{2}ch^2)-u^{2}r(ur)'i^{2}s. From θρίξ, a hair, and οὐρά, the tail. Fr., *trichuride.* Ger., *Haarwurm, Haarschwanzchen.* 1. Of Roederer, a genus of the *Filaridæ.* 2. Of Buttner, the *Trichocephalus dispar.* [α, 16.]

TRICIPITAL, adj. Tri-si^{2}p'i^2-t'l. From *tres,* three, and *caput,* the head. Three-headed. [α, 48.]

TRICLINIC, adj. Tri-kli^{2}n'i^{2}k. From τρεῖς, three, and κλίνειν, to bend. Triply inclined; exhibiting inclination in three different planes. [B.]

TRICOBALTOUS, adj. Tri-ko-ba^{4}lt'u^{3}s. Containing three atoms of cobalt. [B.]

TRICOCCOUS, adj. Tri-ko^{2}k'u^{3}s. Lat., *tricoccus* (from τρεῖς, three, and κόκκος, a kernel). Fr., *tricoque.* Ger., *dreiknöpfig, dreiknotig.* Having or consisting of three cocci. The *Tricocca,* or *Tricoccæ* (Fr., *tricoccées*), are the *Euphorbiaceæ.* [α, 35.]

TRICOCEPHALUS (Lat.), n. m. Tri^{2}k-o(o^3)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). See Trichocephalus.

TRICODEINE, n. Tri-kod-e'en. Fr., *tricodéine.* Ger., *Tricodeïn.* A polymeride, $C_{108}H_{126}N_6O_{18}$, formed by the action of sulphuric acid on codeine. Administered to animals, it produces vomiting, ptyalism, and catharsis. [B, 2.]

TRICOLOR, adj. Tri'ku^{3}l-u^{3}r. From *tres,* three, and *color,* color. Of three colors. As a n., the *Amarantus t.* [α, 35.]

TRICORNATE, adj. Tri-ko^{2}rn'at. Lat., *tricornis* (from *tres,* three, and *cornu,* a horn). Ger., *dreihörnig.* Having three horns or horn-like appendages. [α, 35.]

TRICROTIC, adj. Tri-kro^{2}t'i^{2}k. From τρεῖς, three, and κροτεῖν, to beat. Having a triple beat (cf. Dicrotic). [α, 48.]

TRICUSPID, adj. Tri-ku^{3}sp'i^{2}d. From *tres,* three, and *cuspis,* a point. Fr., *tricuspide.* Ger., *tricuspidal, dreizipfelig.* 1. Having three cusps. 2. Pertaining to the t. valve. [L, 41 (α, 14).]

TRICUSPIS (Lat.), n. f. Tri(tri2)-ku3sp(ku4sp)'i2s. Gen., *-cusp'idis.* 1. The tricuspid valve of the right auriculo-ventricular ostium. 2. Of Harvey, one of the semilunar valves of the pulmonary artery. [H, 12.]

TRICYANATE, n. Tri-si'a2n-at. A salt of tricyanic acid. [B.]

TRICYANHYDRIN, n. Tri-si-a2n-hid'ri2n. A polymere, $C_3H_3N_3$, of hydrocyanic acid. [B, 93 (α, 14).]

TRICYANIC ACID, n. Tri-si-a2n'i2k. Ger., *Tricyansäure.* A polymeric form of cyanic acid, $H_3C_3N_3O_3 = (C_3N_3)(OH)_3$. [B.]

TRICYANODIAMIDE, n. Tri-si-a2n-o-di'a2m-i2d(id). A univalent radicle, $(C_3N_3)\left\{\begin{matrix}NH_2\\NH_2\\H\end{matrix}\right.$. [B.]—**T. hydrate.** See AMMELINE.

TRICYANOGEN, n. Tri-si-a2n'o-je2n. Ger., *Tricyan.* A hypothetical polymeric form, $C_3N_3 = \begin{matrix}-CN\\NC-\\-CN\end{matrix}$, of cyanogen. [B.]—**T. diamide-imide.** See MELAM.—**T. tribromide.** Ger., *Tricyantribromür.* A polymeric form, $C_3N_3Br_3$, of cyanogen bromide. [B.]—**T. trichloride.** Ger., *Tricyantrichlorür, festes Chlorcyan.* A polymeric form, $C_3N_3Cl_3$, of ordinary cyanogen chloride. [B.]

TRICYANOTRIAMIDE, n. Tri-si-a2n-o-tri'a2m-i2d(id). Ger., *Tricyanotriamid.* Melamine; a polymer, $C_3H_6N_6 = (C_3N_3)(NH_2)_3$, of cyanamide. [B.]

TRIDECATOIC ACID, TRIDECYLIC ACID, n's. Tri-de2k-a2t-o'i2k, -de2s-i2l'i2k. A crystalline monobasic acid, $C_{13}H_{26}O_2$. [B, 4.]

TRIDENTATE, adj. Tri'de2nt-at. From *tres*, three, and *dens*, a tooth. Three-toothed. [α, 35.]

TRIDÉROATLODYME (Fr.), n. Tre-da-ro-a3t-lo-dem. Of Geoffroy Saint-Hilaire, a rare variety of triple monster presenting features of the derodidymus and of the atlodymus. [α, 34.]

TRIDESMIS (Lat.), n. f. Tri(tri2)-de2z(de2s)'mi2s. Fr., *t.* 1. A genus of the *Euphorbiaceæ*, referred by some to *Croton.* 2. The genus *Cratoxylon.* The *Tridesmeæ*, or *Tridesmineæ*, are a section of the *Desmostemoneæ.* [α, 35.]—**T. hispida.** A species of *T.* (1st def.) found in southern China; a low shrub the root of which is used as a tonic. [α, 35.]

TRIDIGITATE, adj. Tri-di2j'i2t-at. Lat., *tridigitatus* (from *tres*, three, and *digitus*, a finger). Fr., *tridigité.* Ger., *dreifingerig, dreigefingert.* 1. Having three fingers. 2. Thrice digitate; digitately trifoliate, as in the common clover-leaf. [α, 35.]

TRIDYMUS (Lat.), n. m. Tri2d'i2m(u6m)-u3s(u4s). Gr., τρίδυμος. See TRIPLET.

TRIEB (Ger.), n. Treb. See NISUS and TURION.—**Gipfelt'e, Jahrest'e.** See INNOVATIONS.—**T'lager.** Of Link, the thallus of lichens and *Algæ.* [α, 35.]

TRIEFAUGE (Ger.), n. Tref'a3-u4g-e2. Blear-eye. See BLEPHARITIS *intermarginalis.*

TRIEFÄUGIG (Ger.), adj. Tref'oig-i2g. See BLEAR-EYED.

TRIEFÄUGIGKEIT (Ger.), n. Tref'oig-i2g-kit. See BLEAREDNESS.

TRIELCON (Lat.), n. n. Tri(tri2)-elk'o2n. From τρεῖς, three, and ἕλκειν, to draw. In old surgery, a forceps with three branches, for extracting balls, etc. [L, 49, 50 (α, 14).]

TRIENCEPHALUS (Lat.), n. m. Tri(tri2)-e2n(e2n2)-se2f(ke2f)'-a2l(a3l)-u3s(u4s). From τρεῖς, three, and ἐγκέφαλος, the brain. Of Geoffroy St.-Hilaire, a genus of otocephalic monsters devoid of three of the principal cephalic parts, the buccal, nasal, and ocular. [α, 34.]

TRIENNIAL, adj. Tri-e2n'i2-'l. Lat, *triennis* (from *tres*, three, and *annus*, a year). Fr., *triennal, trisannuel.* Lasting three years. [α, 35.]

TRIENTALIS (Lat.), n. f. Tri(tri2)-e2nt-al(a3l)'i2s. From *triens*, a third part. Fr., *trientale.* Ger., *Trientale.* Chickweed-wintergreen; a genus of the *Primulaceæ.* [α, 35.]—**T. americana.** Black wintergreen-chickweed, star-flower; common in rocky woods in North America. [α, 35.]—**T. europœa.** Fr., *trientale d'Europe, pirolle.* European chickweed-wintergreen. The herb is astringent and the root emetic. [α, 35.]

TRIETHYL, n. Tri-e2th'i2l. The chemical group $(C_2H_5)_3$. [α, 38.]—**T'azonium.** A univalent radicle, $(C_2H_5)_3.N_2H_2 = NH_2 : N : (C_2H_5)_3$, containing three molecules of ethyl substituted in hydrazine. [B.]—**T'benzene.** A 3-molecule ethyl substitution compound, $C_6H_3(C_2H_5)_3 = C_{12}H_{18}$, of benzene. [B, 4.]—**T'bismuthine.** See BISMUTH*t'.*—**T'borine.** A liquid, $B.(C_2H_5)_3$, having a penetrating and highly irritant odor and taking fire spontaneously in the air.—**T'carbinol.** See under HEPTYL ALCOHOL.—**T. hydrin.** See TRIETHYLIN.—**T'methane.** See under HEPTANE.—**T'methyl.** See under HEPTYL.—**T'methylphosphonium.** A radicle, $P.(C_2H_5)_3.CH_3'$. [B.]—**T'phosphine.** See *Tertiary* ETHYLPHOSPHINE.—**T. phosphosinamine.** A substance, $SCN(C_3H_5)P(C_2H_5)_3$, occurring as tabular crystals. It is isomorphous with thiosinamine. [B, 3 (α, 38).]—**T. propenyl ether.** See TRIETHYLIN.—**T. pseudocyanurate.** See ETHYL *isocyanurate.*—**T'silicol.** See SILICOHEPTYL *alcohol.*—**T'silicolate.** A salt or substitution compound of silicoheptyl alcohol. [B, 4.]—**T'silicomethane hydride.** See SILICOHEPTANE.—**T'silicyl.** See SILICOHEPTYL.—**T'stibine.** A colorless, spontaneously inflammable liquid, $Sb.(C_2H_5)_3$, of garlicky odor. [B.]—**T'sulphine.** A univalent radicle, $(C_2H_5)_3 \equiv S-$. [B.]—**T'urea.** See under ETHYLUREA.—**T'vinylammonium.** A univalent radicle, $(C_2H_5)_3 \equiv N-CH.CH_2$. [B, 4.]

TRIETHYLAMINE, n. Tri-e2th-i2l'a2m-en. A substance, $N(C_2H_5)_3 = NC_6H_{15}$, isomeric with hexylamine; alkaline, of an oily consistence, and of an agreeable odor. [B.]—**T. hydrochloride.** A substance, $N(C_2H_5)_3,HCl$, forming feathery laminar crystals. [B.]—**T. sulphate.** The compound $[N(C_2H_5)_3]_2H_2SO_4$. [B.]

TRIETHYLARSINE, n. Tri-e2th-i2l-a3rs'en. A colorless liquid, $As.(C_2H_5)_3$. [B.]—**T. bromide, T. dibromide.** A deliquescent crystalline body, $As.(C_2H_5)_3.Br_2$. [B.]—**T. diiodide, T. iodide.** A yellow solid, $As.(C_2H_5)_3I_2$. [B.]—**T. oxide.** A yellowish, oily liquid, $As.(C_2H_5)_3,O$, of a disagreeable odor. [B.]—**T. sulphide.** A body, $As.(C_2H_5)_3.S$, occurring as prismatic crystals. [B.]

TRIETHYLENE, n. Tri-e2th'i2l-en. A radicle, $(C_2H_4)_3 = C_6H_{12}$. [B.]—**T. alcohol.** A liquid, $C_2H_4 : O_2 : (C_2H_4.OH)_2 = C_6H_{14}O_4$. [B; B, 3 (α, 38).]—**T. diamine.** An oily liquid, $(C_2H_4)_3.N_2 = B : (C_2H_4)_3 : N$. [B, 4.]—**T. dioxydihydrate.** See *T. alcohol.*

TRIETHYLIC, adj. Tri-e2th-i2l'i2k. Containing or derived from three molecules of ethyl. [B.]

TRIETHYLIDENE, n. Tri-e2th-i2l'i2-den. A polymeric form, $(C_6H_{12})^{vi}$, of ethylidene. [B.]—**T. oxide, T. trioxide.** See PARALDEHYDE.

TRIETHYLIN, n. Tri-e2th'i2l-i2n. Ger., *Triäthylin.* A liquid, $C_3H_5(OC_2H_5)_3 = C_9H_{20}O_3$, of pleasant smell. [B, 3 (α, 38); B, 4.]

TRIETHYLROSANILINE, n. Tri-e2th-i2l-roz-a2n'i2l-en. A substance, $C_{20}H_{16}(C_2H_5)_3N_3$, obtained by heating rosaniline or its salts with ethyl iodide and alcohol. [B, 93 (α, 14).]—**T. hydrochloride.** The salt of t. commonly known in commerce; it occurs as a semicrystalline, golden-yellow mass. [B, 93 (α, 14).]—**T. hydriodide.** A salt, $C_{20}H_{16}(C_2H_5)_3N_32HI$, forming one of the colors known as Hofmann's violet. [B, 49.]

TRIFACIAL, adj. Tri-fa'si2-'l. From *tres*, three, and *facies*, the face. Fr., *t.* 1. Triple and pertaining to the face. 2. Pertaining to or affecting the t. nerve. [α, 48.]

TRIFARIOUS, adj. Tri-fa'ri2-u3s. Gr., τριφάσιος. In three vertical rows. [α, 35.]

TRIFÉMORO-ROTULIEN (Fr.), n. Tre-fa-mo-ro-ro-tu5-le-a3n2. See TRICEPS *cruris.*

TRIFID, adj. Tri'fi2d. Lat., *trifidus* (from *tres*, three, and *findere*, to cleave). Ger., *dreispaltig.* Three-cleft. [α, 35.]

TRIFLUORIDE, n. Tri-flu2'o2r-i2d(id). A fluorine compound analogous to a trichloride (*q. v.*). [B.]

TRIFOLIATE, adj. Tri-fol'i2-at. Lat., *trifoliatus* (from *tres*, three, and *folium*, a leaf). Fr., *trifolié.* Ger., *dreiblättrig.* 1. Possessing three leaves. 2. Trifoliolate. The *Trifoliatæ* are a section of the *Leguminosæ.* [α, 35.]

TRIFOLIOLATE, adj. Tri-fol'i2-ol-at. Lat., *trifoliolatus* (from *tres*, three, and *folium*, a leaf). Fr., *trifoliolé.* Ger., *dreitheilblättrig.* Of a compound leaf, having three leaflets. [α, 35.]

TRIFOLIUM (Lat.), n. n. Tri(tri2)-fol(fo2l)'i2-u3m(u4m). Gr., τριφύλλιον, τρίφυλλον. Fr., *trèfle, tremaine, trioule* (1st def.). Ger., *Klee* (1st def.). 1. Clover, trefoil; a genus of leguminous herbs. The *Trifolieæ* (Fr., *trifoliées*) are a tribe of the *Papilionaceæ.* [α, 35.] 2. Of the Netherl. Ph., see *Folia trifolii fibrini.*—**Essentia trifolii fibrini.** See *Tinctura trifolii fibrini.*—**Extractum trifolii aquatici** [Belg. Ph., 1854, Finn. Ph.] (seu **fibrini** [Ger. Ph., Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph., Netherl. Ph.]). Fr., *extrait de trèfle d'eau* [Fr. Cod.]. Ger., *Bitterkleeextract.* A thick (soft [Fr. Cod.]) aqueous extract made from the leaves of *Menyanthes trifoliata.* Most of the ph's direct the use of warm or boiling water to extract the drug. [B, 95 (α, 38).]—**Folia trifolii fibrini** [Ger. Ph., Swiss Ph.]. Fr., *ményanthe* (ou *trèfle d'eau*) [Fr. Cod.]. Sp., *trébol acuático* [Sp. Ph.]. The leaves of *Menyanthes trifoliata.* [B, 95 (α, 38).]—**Tinctura trifolii fibrini.** A tincture made by treating *Menyanthes trifoliata* with four or six times as much alcohol for six days, and filtering. [B, 119 (α, 38).]—**T. acetosum.** See OXALIS *acetosella.*—**T. agrarium.** Fr., *trèfle houblon* (ou *jaune*), *minette dorée, trance.* Ger., *Hopfenklee.* Hop- (or yellow, or golden) clover of Europe, western Asia, and New England; a fodder herb. [α, 35.]—**T. alpestre, T. alpinum.** Fr., *trèfle des Alpes, réglisse de montagne* (ou *des Alpes*). Ger., *Alpenklee.* Mountain-licorice; found in Europe and western Asia. The sweet-juiced root is used like licorice. [α, 35.]—**T. amarum, T. antiscorbuticum, T. aquaticum.** See MENYANTHES *trifoliata.*—**T. arvense.** Fr., *trèfle des champs, herbe à vache, patte de lièvre, minots, mignonet* (*blanc*), *pied de lièvre* (ou *de lion*). Ger., *Ackerklee, Hasenpfötchen.* Hare's-foot clover (or trefoil) of Europe, rabbit-foot of North America, stone-clover, the λαγώπους of Dioscorides. The entire plant, formerly official as *herba et flores lagopi* (seu *lagopodis*), is now used as a domestic remedy for diarrhœa and dysentery. It was formerly recommended in Asiatic cholera. [α, 35.]—**T. bituminosum.** See *Psoralea bituminosa.*—**T. cæruleum.** See MELILOTUS *cœrulea.*—**T. cervinum.** See EUPATORIUM *cannabinum.*—**T. corniculatum.** See LOTUS *corniculatus.*—**T. creticum.** See TRIGONELLA *fœnum græcum.*—**T. dentatum.** See MELILOTUS *dentata.*—**T. fibrinum.** 1. See MENYANTHES *trifoliata.* 2. Of the Austr. Ph. and Hung. Ph., see *Folia trifolii fibrini.*—**T. fragiferum.** Fr., *trèfle capiton* (ou *fraise*) [2d def.]. Ger., *Blasenklee, Erdbeerklee* (2d def.). 1. See FRAGARIA *vesca.* 2. Strawberry (or strawberry-headed) clover; a perennial clover of Europe, northern Africa, and middle and northern Asia. [α, 35.]—**T. hepaticum.** See ANEMONE *hepatica.*—**T. hydropicum.** See MENYANTHES *trifoliata.*—**T. incarnatum.** Fr., *farouche, lupinette, trèfle incarnat, fleur de chair.* Ger., *Blutklee, Incarnatklee.* Carnation clover, crimson (or Italian) clover (or trefoil); a European species recommended as a valuable plant for hay. [α, 35.]—**T. medium.** Cow-grass, red zigzag clover of Europe and northern and middle Asia; a perennial species. [α, 35.]—**T. melilotum, T. odoratum.** See MELILOTUS *officinalis.*—**T. minus.** 1. See OXALIS *acetosella.* 2. A variety of *T. procumbens.* [α, 35.]—**T. ochroleucum.** Sulphur-clover, pale-yellow clover; a native of middle and southern Europe and western Asia, much cultivated in upper Italy. [α, 35.]—**T. odoratum.** See MELI-

LOTUS *officinalis*.—**T. paludosum, T. palustre.** See MENYANTHES *trifoliata*.—**T. pratense.** Fr., *trèfle des prés* (ou *commun*, ou *rouge de Hollande*), *grand trèfle rouge* (ou *de Hollande*, ou *d'Espagne*). Ger., *Wiesenklee, Futterklee.* Common clover, beebread, cow-grass, purple (or red) clover, of Europe, northern Africa, Asia, and North America. The herb, flowers, and seed, formerly official as *herba, flores*, et *semen trifolii purpurei*, have been used in whooping-cough and chronic coughs. [α, 35.]—**T. procumbens.** Lesser (or yellow, or low hop) clover of Europe and North America; a fodder herb. [α, 35.]—**T. purpureum.** See *T. pratense*.—**T. repens.** Fr., *petit trèfle de Hollande, trèfle blanc* (ou *rampant*), *trifolet.* Ger., *kriechender Klee, Honigklee.* Ordinary white clover, honeysuckle-grass. The flowers and herb were formerly official and were used like those of *T. pratense*. The flowers are sometimes used as tea. [α, 35.]—**T. sativum.** See *T. pratense*.

TRIFURCATE, adj. Tri-fu⁵rk'at. Lat., *trifurcatus* (from *tres*, three, and *furca*, a fork). Fr., *trifurqué, trifourchu.* Ger., *dreigabelig.* Three-forked; dividing into three branches. [α, 35.]

TRIGAMOUS, adj. Tri²g'a²m-u³s. From τρεῖς, three, and γάμος, marriage. Having three kinds of flowers borne on the same species. [α, 34.]

TRIGASTRIC, adj. Tri-ga²st'ri²k. From τρεῖς, three, and γαστήρ, the stomach. Fr., *trigastrique.* Having three bellies (said of a muscle). [α, 48.]

TRIGEMINAL, adj. Tri-je²m'i²-n'l. Lat., *trigeminus* (from *tres*, three, and *geminus*, twin-born). Ger., *dreigetheilt.* 1. Tripartite. 2. Threefold (three at a birth). [C.]

TRIGEMINUS (Lat.), n. m. Tri(tri²)-je²m(ge²m)'i²n-u³s(u⁴s). See *Trigeminal*; as a n., see *Trigeminal* NERVE.

TRIGEMINUSHUSTEN (Ger.), n. Tre-gam'i²n-u⁴s-hust-e²n. Of Schadewald, a cough due to irritation of the trigeminus nerve, *e. g.*, occasioned by disease of the nasal passages. [Wille, "Dtsch. med. Woch.," 1885, 15, 17.]

TRIGEMINUSKERN [Stieda] (Ger.), n. Tre-gam'i²n-u⁴s-ke²rn. See *Trigeminal* NUCLEUS.—**Motorischer T., Oberer T.** The nucleus of origin of the motor fibres of the trigeminus. [I, 17 (K).]—**Sensibler T.** The sensory nucleus of the trigeminus. [I, 6 (K).]—**Unterer T.** See *Inferior trigeminus* NUCLEUS.

TRIGEMINUSWURZEL (Ger.), n. Tre-gam'i²n-u⁴s-vurts-e²l. The root of the trigeminal nerve. [I, 6 (K).]—**Unbeständige T.** See CONDUCTOR *sonorus*.

TRIGENIC ACID, n. Tri-je²n'i²k. The compound $C_4H_7N_3O_2$. [B, 3 (α, 38).]

TRIGLA (Lat.), n. f. Tri²g'la³. Gr., τρίγλη. A genus of acanthopterygian fishes. [α, 48.]—**T. cuculus.** The red gurnard; a species common on European coasts. [L, 207 (α, 39).]

TRIGLYCERYL ALCOHOL, n. Tri-gli²s'e²r-i²l. A derivative, $(C_3H_5)_3.(OH)_5.O_2. = C_9H_{20}O_7$, of glyceryl alcohol (glycerin), not yet isolated in the pure state. [B, 4.]

TRIGLYCOLLAMIC ACID, n. Tri-gli²k-o²l-a²m'i²k. A crystalline solid, $N(CH_2.COOH)_3 = C_6H_9NO_6$, or more probably $C_{12}H_{18}N_2O_{12}$, having the properties of a dibasic or tribasic acid, and formed by substituting three molecules of the glycollic acid radicle, $(CH_2.COOH)$, for three atoms of hydrogen in ammonia. [B, 4.]

TRIGONAL, adj. Tri²g'o²n-'l. See TRIGONOUS.

TRIGONE, n. Tri'gon. See TRIGONUM.—**Olfactory t.** See TRIGONUM *nervi olfactorii*.—**T. cérébral** (Fr.). See FORNIX *cerebri*.—**T. dur** (Fr.). See TRIGONUM *durum*.—**T. intercrural** (Fr.). See *Interpeduncular* SPACE.—**T. mou** (Fr.). The posterior cerebral commissure. [I, 39 (K).]—**T. of the bladder.** Lat., *trigonum vesicale.* A triangular smooth surface with its apex directed forward upon the fundus of the bladder to a point just posterior to the urethra and limited by two ridges which pass back to the apertures of the ureters and a line uniting these points. [L.]

TRIGONELLA (Lat.), n. f. Tri(tri²)-go²n(gon)-e²l'la³. From τρίγωνος, three-cornered. Fr., *trigonelle.* Ger., *Kuhhornklee, Hornklee.* A genus of the *Leguminosæ*. The *Trigonelleæ* are a section of the *Trifolieæ*. [α, 35.]—**T. cærulea.** The *Melilotus cærulea*. [α, 35.]—**T. elatior.** The λωτός ἄγριος of Dioscorides, a species found in Asia Minor and in Cyprus. The seeds were formerly used in affections of the bladder, and externally in skin diseases and as an emollient poultice. [α, 35.]—**T. fœnum græcum.** Fr., *trigonelle fenu-grec, foin grec, saine-grain, sénegré, sennegrain, senègre, sénegrain.* Ger., *gemeiner Kuhhornklee, Zugenhornklee, Bockshornklee, Siebenzeit, Fönugräk, griechisches Heu.* Fenugreek; a native of southern Europe, Asia Minor, and northern Africa, cultivated for its bitter aromatic seeds, *semen fœni* (seu *fœni græci*, seu *trifolii cretici*), which are used as an emollient, in plasters and salves, and as a stimulant in veterinary medicine. [α, 35.]—**T. monspeliaca.** A species found in southern Europe. In Italy a decoction of the seed is used in diarrhœa and externally as an emollient. [α, 35.]

TRIGONELLINE, n. Tri²g-on-e²l'len. A hygroscopic alkaloid, $C_7H_7NO_2 + H_2O$, found in fenugreek-seeds and obtainable synthetically from nicotinic acid. [B, 270 (α, 38).]

TRIGONOCEPHALISM, n. Tri-go²n-o-se²f'a²l-i²z'm. From τρίγωνος, three-cornered, and κεφαλή, the head. Ger., *Trigonokephalie.* Of Welcher, a triangular cephalic malformation caused by compression of the anterior part of the skull; often associated with microphthalmia and cleft palate. [A, 57 (α, 34).]

TRIGONOUS, adj. Tri²g'o²n-u³s. Lat., *trigonus.* Fr., *trigone.* Ger., *dreiseitig.* Triangular. [α, 35.]

TRIGONUM (Lat.), n. n. Tri(tri²)-gon'u³m(u⁴m). Gr., τρίγωνον (from τρίγωνος, three-cornered). Fr., *trigone.* A triangle; in the brain, the interpeduncular space. [I, 17 (K).]—**T. acustici.** A triangular space on the dorsal surface of the medulla, bounded superiorly by the auditory nerve, internally by the t. hypoglossi, and externally by the corpus restiforme. [Obersteiner (α, 34).]—**T. caroticum superius.** See *Superior carotid* TRIANGLE.—**T. cerebrale.** See FORNIX *cerebri*.—**T. cervicale.** 1. See *Superior carotid* TRIANGLE. 2. Of Goll, the base of the posterior gray cornu of the spinal cord. [I, 31 (K).]—**T. cervicale inferius.** See *Inferior carotid* TRIANGLE and *Supraclavicular* FOSSA.—**T. clavipectorale.** A triangular space bounded by the clavicle, the pectoralis minor, and the thorax. [α, 34.]—**T. colli laterale.** See *Posterior* TRIANGLE *of the neck*.—**T. colli medianum.** The space occupied by the two anterior cervical triangles. [L.]—**T. colli superius.** See *Upper cervical* TRIANGLE.—**T. coraco-acromiale.** The t. formed by the coracoid process, the apex of the acromion, and the concave border of the clavicle. [Luschka (α, 34).]—**T. cubitale.** See FOSSA *cubiti*.—**T. deltoideopectorale.** See *Infraclavicular* FOSSA.—**T. durum.** The triangular interval between the anterior pair of the corpora quadrigemina. [I, 6 (K).]—**T. fluctuans.** See *Posterior cerebral* COMMISSURE.—**T. habenulæ.** A small triangular area at the posterior portion of the upper surface of the optic thalamus, in front of the lamina quadrigemina and between the sulcus habenulæ and the sulcus subpinealis. [I, 17 (K).]—**T. hypoglossi.** A triangular area on the dorsal surface of the medulla oblongata, bounded superiorly by the striæ medullares acusticæ, internally by the posterior longitudinal fissure, and externally by the ala cinerea. [Obersteiner (α, 34).]—**T. inferius commissuræ posterioris.** The lower triangular half of the posterior commissure of the brain. [Krause (α, 18).]—**T. infraclaviculare.** See *Infraclavicular* FOSSA.—**T. inguinale.** See *Scarpa's* TRIANGLE.—**T. intercrurale.** Ger., *graue Bodencommissur* (1st def.). 1. See SUBSTANTIA *intermedia*. 2. See LAMINA *cinerea*. 3. See *Interpeduncular* SPACE.—**T. interpedunculare.** See *Interpeduncular* SPACE.—**T. Lieutaudii.** See TRIGONE *of the bladder*.—**T. lumbale inferius.** See TRIANGULUS *Petiti*.—**T. lumbale superius.** See *Lumbocosto-abdominal* TRIANGLE.—**T. molle.** See *Posterior cerebral* COMMISSURE.—**T. nervi olfactorii, T. olfactorium.** See CARUNCULA *mamillaris* (1st def.).—**T. omoclaviculare.** See *Subclavian* TRIANGLE.—**T. omotrapezium.** See *Occipital* TRIANGLE *of the neck*.—**T. palatinum.** See *Palatal* TRIANGLE.—**T. pensile.** See *Posterior cerebral* COMMISSURE.—**T. Petiti.** See TRIANGULUS *Petiti*.—**T. Scarpæ, T. subinguinale.** See *Scarpa's* TRIANGLE.—**T. submaxillare.** See *Submaxillary* TRIANGLE.—**T. subpineale.** A triangular fossa anterior quadrigemina, formed by the median fissure, that rises abruptly from the velum medullare. It lodges the pineal gland. [α, 34.]—**T. superius commissuræ posterioris.** Ger., *unteres Markblatt der Zirbeldrüse.* The portion of the posterior commissure of the brain connected with the anterior portion of the pineal gland. [L, 332.]—**T. vagi.** The narrow triangular area on the medulla oblongata, from which the vagus nerve arises. [α, 34.]—**T. ventriculi lateralis.** A triangular projection between the entrances to the posterior and descending cornua of the lateral ventricle. [I, 17 (K).]—**T. vesicæ, T. vesicale.** See TRIGONE *of the bladder*.

TRIGUERA (Lat.), n. f. Tre-gar'a³. Fr., *triguère.* 1. A genus of the *Malvaceæ*. 2. A genus of the *Solanaceæ*. [α, 35.]—**T. ambrosiaca, T. baccata.** Fr., *triguère odorante.* A species of *T.* (2d def.); an emollient, antispasmodic, and narcotic herb of Spain. A fragrant narcotic oil is prepared from it. [α, 35.]

TRIGYNOUS, adj. Tri²j'i²n-u³s. Lat., *trigynus* (from τρεῖς, three, and γυνή, a woman). Fr., *trigyne.* Ger., *trigynisch, dreiweibig.* Having three pistils or styles. The *Trigynia* (Fr., *trigynie*) of Linnæus are a class of plants so characterized. [α, 35.]

TRIHALOID, n. Tri-ha²l'oid. A compound of a radicle with three atoms of a halogen. [B, 4.]

TRIHILATUS (Lat.), adj. Tri(tri²)-hi²l(hel)-at(a³t)'u³s(u⁴s). From *tres*, three, and *hilum* (*q. v.*). Of some pollen grains (*e. g.*, those of *Geraniaceæ*), having three perforations in the extine. [α, 35.]

TRIHYDRIC, adj. Tri-hid'ri²k. Containing three atoms of hydrogen in the molecule (said especially of acid salts). [B.]

TRIHYDROXYBENZENE, n. Tri-hid-ro²x-i²-be²nz'en. See HYDROXYQUINOL, PYROGALLOL, and PHLOROGLUCOL.

TRIHYDROXYBENZOIC ACID, n. Tri-hid-ro²x-i²-be²nzo'i²k. An acid, $C_7H_6O_5$, known in four of its six possible isomeric forms; namely, gallic acid (*q. v.*), pyrogallolcarboxylic acid, phloroglucinolcarboxylic acid, and a hydroxyquinolcarboxylic acid. [B, 3 (α, 38).]

TRIHYDROXYDIHYDRANTHROQUINONE, n. Tri-hid-ro²x'''i²-di-hid-ra²n''thro-kwi²n'on. Purpuroxanthin, $C_{14}H_5(OH)_3O_2H_2$. [B, 4, 270 (α, 38).]

TRIHYDROXYNAPHTHALENE, n. Tri-hid-ro²x-i²-na²f'-tha²l-en. See OXYNAPHTHOL.

TRIHYDROXYQUINONE, n. Tri-hid-ro²x-i²-kwi²n'on. The compound $C_6H(OH)_3O_2$. [B, 3 (α, 38).]

TRI-INIODYMUS (Lat.), n. m. Tri(tri²)-i²n(en)-i²-o²d'i²m(u⁵m)-u³s(u⁴s). From τρεῖς, three, ἰνίον, the nape of the neck, and δίδυμος, double. A monster with a single body, but three distinct heads united by their posterior parts. [L, 49 (α, 14).]

TRIIODACETIC ACID, n. Tri-i''o²d-a²s-et(e²t)'i²k. See under IODACETIC ACID.

TRI-IODACETYL, n. Tri-i''o²d-a²s'e²t-i²l. A substitution product, C_2I_3O, of acetyl, in which all the hydrogen is replaced by iodine. [B.]—**T. hydride.** See IODAL.

TRIIODIDE, n. Tri-i'o²d-i²d(id). An iodine compound analogous to a trichloride (*q. v.*). [B.]

TRIIODOBENZENE, n. Tri-i''o²d-o-be²nz'en. Ger., *Trijodbenzol.* A crystalline solid, $C_6H_3I_3$. [B, 4.]

TRIIODOPHENOL, n. Tri-i″o^{2}d-o-fe^{2}n′o^{2}l. Ger., *Trijodphenol.* The compound $C_6H_2I_3.OH$. [B, 3 (*a*, 38); B, 4.]

TRIIODOSALICYLIC ACID, n. Tri-i″o^{2}d-o-sa^{2}l-i^2-si^{2}l′i^{2}k. Fr., *acide triiodosalicylique* (ou *salicylique triiodé*). Ger., *Trijodsalicylsäure.* The compound $C_7H_3I_3O_3$. [B; B, 3 (*a*, 38).]

TRIISOBUTYLENE, n. Tri-i^{2}s-o-bu^2′ti^{2}l-en. The compound $C_{12}H_{24}$. [B, 3 (*a*, 38).]

TRIJUGATE, TRIJUGOUS, adj's. Tri′ju^{2}g-at, -u^{3}s. Lat., *trijugatus, trijugus* (from *tres*, three, and *jugum*, a yoke). Fr., *trijugué.* Ger., *dreipaarig* (2d def.). 1. Of a fruit, having three jugæ or ridges. 2. Having three pairs of leaflets. [*a*, 35.]

TRIJUMEAU (Fr.), n. Tre-zhu^6-mo. See TRIPLET and *Trigeminal* NERVE.

TRILAURIN, n. Tri-la^{4}r′i^{2}n. See LAURIN.

TRILLIUM (Lat.), n. n. Tri^{2}l′li^2-u^{3}m(u^{4}m). From *tres*, three. Fr., *trillie.* American wood-lily, three-leaved nightshade, wake-robin; a genus of the *Liliaceæ*. The *Trilliaceæ*, or trilliads (of Lindley, an order of the *Dictyogenæ*), include genera (*T.*, *Paris*, etc.) referred by Bentham and Hooker to the *Medeoleæ*. [*a*, 35.]—**T. cernuum.** 1. Drooping wake-robin (or wood-lily); a North American species. The root is emetic. 2. Of Torrey and Gray, see *T. pendulum.* [*a*, 35.]—**T. erectum.** Bath-flower, birthroot, bethroot, Indian balm, lamb's-quarters. The astringent and emetic root is considered tonic, expectorant, emmenagogue, and alterative, and has been used in diarrhœa, hæmorrhages, and skin diseases and externally in chronic ulcers. [*a*, 35.]—**T. erythrocarpum.** Smiling wake-robin, painted t. (or wood-lily); found from Canada to Georgia. The root is used like that of *T. erectum.* [*a*, 35.]—**T. pendulum.** Indian balm; said to be used in menorrhagia. Some identify it with *T. erectum.* [*a*, 35.]—**T. stylosum.** A species growing in North Carolina and Georgia. Its root has probably the properties of that of *T. erectum.* [*a*, 35.]

TRILLO (Sp.), n. Trel′yo. A place in Guadalajara, Spain, where there are hot chalybeate, saline, and sulphurous springs. [*a*, 14.]

TRILOBATE, TRILOBED, adj's. Tri-lob′at, tri′lobd. Lat., *trilobatus* (from τρεῖς, three, and λοβός, lobe). Fr., *trilobé.* Ger., *dreilappig.* Having thre lobes. [*a*, 35.]

TRILOCULAR, TRILOCULATE, adj's. Tri-lo^{2}k′u^{2}l-a^{3}r, -at. Three-celled. [*a*, 35.]

TRIMARGARIN, n. Tri-ma^{3}rg′a^{2}r-i^{2}n. Fr., *trimargarine.* Ger., *T.* See under MARGARIN.

TRIMELLITIC ACID, n. Tri-me^{2}l-i^{2}t′i^{2}k. Fr., *acide trimellitique* (ou *trimellique*). Ger., *Trimellithsäure.* An acid, $C_9H_6O_6 = C_6[CO.OH,CO.OH,H,CO.OH,H,H]$, isomeric with hemimellitic acid and trimesic acid. [B, 3 (*a*, 38).]

TRIMERCURIC, adj. Tri-mu^{5}r-ku^{2}r′i^{2}k. Containing three atoms of bivalent mercury. [B.]—**T.-diamine.** Written, also, *trimercuro-diamine.* Mercury nitride. [B.]

TRIMEROUS, adj. Tri^{2}m′e^{2}r-u^{3}s. Lat., *trimerus* (from τρεῖς, three, and μέρος, a part). Fr., *trimère.* Consisting of three parts; of a flower, having three members in each circle. [*a*, 35.]

TRIMESIC ACID, n. Tri-mes′i^{2}k. Ger., *trimesinsäure.* Fr., *acide trimésique.* An acid, $C_9H_6O_6 = C_6[CO.OH,H,CO.OH,H,CO.OH,H,]$, isomeric with trimellitic acid and hemimellitic acid. [B, 3 (*a*, 38).]

TRIMESTRIS (Lat.), adj. Tri(tri^2)-me^{2}st′ri^{2}s. From *tres*, three, and *mensis*, a month. Ripening in or lasting for three months. [*a*, 35.]

TRIMETALLIC, adj. Tri-me^{2}t-a^{2}l′i^{2}k. From *tres*, three, and *metallum*, a metal. Containing in the molecule three atoms of a metallic element. [B.]

TRIMETAPHOSPHATE, n. Tri-me^{2}t-a^3-fo^{2}s′fat. A polymeric derivative of a metaphosphate, having the general formulæ $R'''(PO_3)_3$, $R''R'(P'O_3)_3$, and $R'_3(PO_3)_3$. [B, 3.]

TRIMETHACETIC ACID, n. Tri-me^{2}th-a^{2}s-et(e^{2}t)′i^{2}k. Pseudovaleric acid. [B.] See under VALERIC ACID.

TRIMETHENE, n. Tri-me^{2}th′en. Fr., *triméthène.* Ger., *Trimethen.* A radicle, C_3H_6, consisting of three molecules of methene. [B, 4.]

TRIMETHYL, n. Tri-me^{2}th′i^{2}l. The chemical group $(CH_3)_3$.

TRIMETHYLAMINE, n. Tri-me^{2}th-i^{2}l′a^{2}m-en. A tertiary amine of methyl, $N:(CH_3)_3 = NC_3H_9$, metameric with propylamine; a mobile liquid having a peculiar fishy odor, boiling at about 10° C., and readily inflaming. It occurs naturally in *Arenopodium vulvaria*, *Mercurialis annua*, *Arnica montana*, etc., and in ergot. It is also found in cadavers, rotten fish, and animal liquids (*e. g.*, herring brine), and may be prepared by distillation from various alkaloids and other organic matters. [B.]

TRIMETHYLAMINUM (Lat.), n. n. Tri(tri^2)-me^{2}th-i^{2}l(u^{6}l)-a^{2}m(a^{3}m)-in(en)′u^{3}m(u^{4}m). A 20-per-cent. aqueous solution of trimethylamine [Russ. Ph.]; an 8- or 9-per-cent. solution [Swiss Ph.] of the anhydrous substance. [B, 95 (*a*, 38).]

TRIMETHYLAMMONIUM, n. Tri-me^{2}th-i^{2}l-a^{2}m-mon′i^2-u^{3}m. A univalent radicle, $(CH_3)_3 \equiv N'{-}H = NC_3H_{10}$. [B.]

TRIMETHYLARSINE, n. Tri-me^{2}th-i^{2}l-a^{3}rs′en. A colorless liquid, $As.(Ch_3)_3$. [B.]

TRIMETHYLATED, adj. Tri-me^{2}th′i^{2}l-at-ed. Fr., *triméthylé.* Combined with three molecules of methyl. [*a*, 38.]

TRIMETHYLENE, n. Tri-me^{2}th′i^{2}l-en. Fr., *triméthylène.* A substance, C_3H_6, isomeric with propylene, known only in the form of *t. bromide*, $C_3H_6Br_2$, and *t. chloride*, $C_3H_6CL_2$, both liquids. [B, 93 (*a*, 14).]—**T. alcohol.** Primary propylene glycol; a thick liquid, $C_3H_6(OH)_2$, having a sweet taste. [B, 3 (*a*, 38).]—**T'disulphonic acid.** A dibasic acid, $C_3H_8S_2O_6 = CH_2(SO_3H) - CH_2 - CH_2(SO_3H)$, isomeric with propylene-disulphonic acid; a yellowish syrupy liquid of strongly acid reaction, which upon dehydration solidifies to form amber-colored acicular crystals; deliquescent in the air and soluble in alcohol and in ether. [A. Monari, "Ann. di chim. medico-farm. e di farmacol.," April–May, 1885, p. 253 (B).]

TRIMETHYLIC, adj. Tri-me^{2}th-i^{2}l′i^{2}k. Containing three molecules of methyl, or derived by substitution from a body consisting of a triple molecule of methyl. [B.]

TRIMETHYLIN, n. Tri-me^{2}th′i^{2}l-i^{2}n. A substance, $C_3H_5(CH_3)_3O_3$, produced by heating methyl alcohol and acrolein with a little acetic acid. [B, 2.]

TRIMETHYLPHOSPHINE, n. Tri-me^{2}th-i^{2}l-fo^{2}s′fen. See under METHYLPHOSPHINE.

TRIMETHYLROSANILINE, n. Tri-me^{2}th-i^{2}l-roz-a^{2}n′i^{2}l-en. A substitution product of rosaniline, $C_{20}H_{16}.(CH_3)_3.N_3$. [B, 2.]—**T. hydriodide.** The compound $C_{20}H_{16}(CH_3)N_3.2HI$. [B.]

TRIMETHYLSTIBINE, n. Tri-me^{2}th-i^{2}l-sti^{2}b′en. A stibine, $Sb.(CH_3)_3$, which occurs both in the free state and in combination as a bivalent radicle. In the former case it is found as a heavy colorless liquid of very unpleasant odor, and taking fire spontaneously on exposure to the air. [B, 4.]

TRIMETHYLXANTHIN, n. Tri-me^{2}th″i^{2}l-za^{2}nth′i^{2}n. A compound of three molecules of methyl and one of xanthin. [A, 319 (*a*, 34).]

TRIMEZIA (Lat.), n. f. Tre-me^{2}z′i^2-a^3. A genus of the *Iridaceæ*. [*a*, 35.]—**T. lurida, T. martinicensis.** Fr., *trimézie de la Martinique.* A species of tropical America. The root is said to be tonic, astringent, and emmenagogue and the juice sternutatory. [*a*, 35.]

TRIMOLYBDATE, adj. Tri-mo^{2}l-i^{2}b′dat. A molybdate containing three atoms of molybdenum. [B.]

TRIMORPHINE, n. Tri-mo^{2}rf′en. A polymer, $C_{162}H_{114}N_6O_{18}$, of morphine. [B, 2.]

TRIMORPHISM, n. Tri-mo^{2}rf′i^{2}z′m. From τρεῖς, three, and μορφή, form. A threefold heterogonism, such as the production, on the same species of plant, of three different kinds (long-styled, mid-styled, and short-styled) of flowers. [*a*, 35.]

TRIMORPHOUS, adj. Tri-mo^{2}rf′u^{3}s. Lat., *trimorphus.* Occurring under three forms, exhibiting trimorphism. [*a*, 35.]

TRIMYRISTIN, n. Tri-mi^{2}r-i^{2}st′i^{2}n. A crystalline substance, $C_3H_5(C_{14}H_{27}O_2)_3$, found in butter. [B, 3 (*a*, 38); B, 4.]

TRINERVATE, TRINERVED, adj's. Tri-nu^{5}rv′at, tri′-nu^{6}rvd. Lat., *trinervatus, trinervis, trinervius* (from *tres*, three, and *nervus*, a nerve). Fr., *trinervé.* Ger., *dreinervig.* In botany, having three nerves or ribs. [*a*, 35.]

TRINITRANILINE, n. Tri-nit-ra^{2}n′i^{2}l-en. Picramide, $C_6H_2(NO_2)_3NH_2 = C_6[H,NO_2,H,NO_2,NH_2,NO_2.]$ [B, 3 (*a*, 38); B, 4.]

TRINITRANISIC ACID, n. Tri-nit-ra^{2}n-i^{2}s′i^{2}k. A substitution derivative, $C_8H_5(NO_2)_3O_3$, of anisic acid.

TRINITRANISOL, n. Tri-nit-ra^{2}n′i^{2}s-o^{2}l. Methyl picrate; a substitution derivative, $C_6H_2(NO_2)_3OCH_3$, of anisol, occurring as yellow tabular crystals. [B, 2; B, 3 (*a*, 38).]

TRINITRATE, n. Tri-nit′rat. A nitrate containing three molecules of nitryl. [B, 3.]

TRINITRIN, n. Tri-nit′ri^{2}n. Fr., *trinitrine.* Ger., *T.* See NITROGLYCERIN.

TRINITROACETONITRILE, n. Tri-nit″ro-a^{2}s-e^{2}t-o-nit′ri^{2}l. A camphor-like crystalline mass, $C_2H_4O_6 = C(NO_2)_3.CN$. [B, 4.]

TRINITROAMIDOBENZENE, n. Tri-nit″ro-a^{2}m-i^{2}d-o-be^{2}nz′en. See TRINITRANILINE.

TRINITROAZOBENZENE, n. Tri-nit″ro-a^{2}z-o-be^{2}nz′en. A substance, $C_{12}H_7N_5O_6$, known in three isomeric forms: *α-t.*, $C_{12}H_7(NO_2)_3N_2$, buff or sulphur-colored acicular crystals; *β-t.*, crystals melting at 180° C.; and *γ-t.*, $C_6H_5.N_2.C_6H_2(NO_2)_3$, deep-red prismatic crystals. [B, 3 (*a*, 38).]

TRINITROBENZOIC ACID, n. Tri-nit″ro-be^{2}nz-o′i^{2}k. A monobasic acid, $C_7H_3N_3O_8 = C_6H_2(NO_2)_3.CO.OH$. [B, 2.]

TRINITROCARBOLIC ACID, n. Tri-nit″ro-ka^{3}rb-o^{2}l′i^{2}k. See TRINITROPHENOL.

TRINITROCELLULIN, TRINITROCELLULOSE, n's. Tri-nit-ro-se^{2}l′u^{2}l-i^{2}n, -os. Gun-cotton; a substitution compound, $C_6H_7O_5.(NO_2)_3$, of cellulose, produced by the prolonged action of concentrated nitric acid with a little sulphuric acid on cotton-wool. It resembles ordinary cotton-wool, is insoluble in alcohol, but soluble in ether, and is inflammable and highly explosive. [B, 3, 4, 5, 8, 9.] Cf. PYROXYLIN.

TRINITROCHLORBENZENE, n. Tri-nit″ro-klor-be^{2}nz′en. A derivative, $C_6H_2.(NO_2)_3.Cl$, of picric acid. [B, 3.]

TRINITROCRESOL, TRINITROCRESYLIC ACID, n's. Tri-nit″ro-kre^{2}s′o^{2}l, -i^{2}l′i^{2}k. The compound $C_7H_4.(NO_2)_3.OH$. [B.]

TRINITROMESITYLENE, n. Tri-nit″ro-me^{2}s-i^{2}t′i^{2}l-en. The compound $C_6(NO_2)_3(CH_3)_3 = C_9H_9N_3O_6$. [B, 3 (*a*, 38); B, 4.]

TRINITROMETHANE, n. Tri-nit″ro-me^{2}th′an. See NITROFORM.

TRINITRONAPHTHALENE, n. Tri-nit″ro-na^{2}f′tha^{2}l-en. A substance, $C_{10}H_5(NO_2)_3$, existing in three isomeric forms. [B, 93 (*a*, 14).]

TRINITRO-ORCIN, n. Tri-nit″ro-o^{2}rs′i^{2}n. A substance, $C_7H_2(NO_2)_3(OH)_2 = C_7H_4N_3O_8$, acting as a dibasic acid, and forming large yellow prismatic crystals. [B, 4.]

TRINITRO-ORCINIC ACID, n. Tri-nit″ro-o²rs-i²n′i²k. A dibasic crystalline acid, $C_7H_5N_3O_8 = C_7H_5(NO_2)_3O_2$, formed by the action of nitric acid on orcin at a temperature of —10° C. [B, 2.]

TRINITROPHENATE, n. Tri-nit″ro-fe²n′at. See PICRATE.

TRINITROPHENIC ACID, TRINITROPHENOL, n's. Tri-nit″ro-fe²n′i²k, -fe²n′o²l. A substance, $C_6H_3N_3O_7$, known in three isomeric forms: *α-t*, or picric acid (*q. v.*); *β-t.*, $C_6[H,H,NO_2,NO_2,OH,NO_2,]$, white acicular or laminar crystals; and *γ-t.*, $C_6[H,NO_2,NO_2,H,OH,NO_2,]$, white acicular crystals. [B, 3 (*α*, 38).]

TRINITROPHLOROGLUCOL, n. Tri-nit″ro-flor-o-glu²′ko²l. A derivative, $C_6(NO_2)_3.(OH)_3 = C_6H_3N_3O_9$, of phloroglucol, crystallizing from hot water as yellow prismatic crystals containing a molecule of water, becoming anhydrous at 100°, beginning to sublime at 130°, melting at 158° C., and exploding at a higher temperature. [B, 3 (*α*, 38); B, 4.]

TRINITRORESORCIN, TRINITRORESORCINOL, n's. Tri-nit″ro-re²z-o²r′si²n, -o²r′si²n-o²l. See STYPHNIC ACID.

TRINITROTOLUENE, n. Tri-nit″ro-to²l-u²′en. A substance, $C_6H_2(NO_2)_3CH_3$, known in three isomeric forms: *α-t.*, $C_6[NO_2,NO_2,H,NO_2,H,CH_3,]$, tabular or acicular crystals of a golden color; *β-t.*, transparent prismatic or white tabular or acicular crystals; and *γ-t.*, yellowish crystals. [B, 3 (*α*, 38); B, 4.]

TRINITY SPRINGS, n. Tri²n′i²t-i². A place in Martin County, Indiana, where there are sulphurous springs. [*α*, 14.]

TRINKCUR (Ger.), n. Tri²n²k′kur. A course of treatment by drinking mineral waters.

TRINKEN (Ger.), n. Tri²n²k′e²n. See DRINK.—**Heisst'.** See THERMOPOSIA.

TRIOCEPHALUS (Lat.), n. m. Tri(tri²)-o(o³)-se²f(ke²f)′a²l-(a³l)-u³s(u⁴s). From τρεῖς, three, and κεφαλή, the head. Of I. Geoffroy St.-Hilaire, triencephalus. [*α*, 34.]

TRIŒCIOUS, TRIOICOUS, adj's. Tri-esh′u³s, -oik′u³s. Lat., *triœcius, trioicus* (from τρεῖς, three, and οἶκος, a house). Fr., *trioïque*. Ger., *dreihäusig*. Having staminate, pistillate, and perfect flowers on three distinct individuals. The *Triœcia* of Linnæus are an order of the class *Polygamia* so characterized. [*α*, 35.]

TRIOLEIN, n. Tri-ol′e²-i²n. See OLEIN.

TRIONAL, n. Tri′o²-n′l. A substance, $\frac{C_2H_5}{CH_3}\!>\!C\!<\!\frac{SO_2.C_2H_5}{SO_2.C_2H_5} = C_8H_{18}S_2O_4$, occurring as shining tabular or foliate crystals; a hypnotic. [B, 270 (*α*, 38).]

TRIOPODYMUS (Lat.), n. m. Tri(tri²)-op-o²d′i²m(u⁶m)-u³s(u⁴s). From τρεῖς, three, ὤψ, the face, and δίδυμος, double. A monster with a single head, but three faces. [L, 49 (*α*, 14).]

TRIORCHIS (Lat.), n. m. Tri(tri²)-o²rk(o²rch²)′i²s. Gen., *-orch′ios, -orch′eos*. From τρεῖς, three, and ὄρχις, a testicle. Ger., *Dreihodiger*. An individual having three testicles. [L, 50 (*α*, 14).]—**T. alba odorata.** The *Spiranthes autumnalis*. [*α*, 35.]

TRIOSTEUM (Lat.), n. n. Tri(tri²)-o²st′e²-u³m(u⁴m). From τρεῖς, three, and ὀστέον, a bone. Fr., *triostée*. Ger., *Dreikern*. A genus of the *Caprifoliaceæ*. The *Triosteæ* are a subtribe of the *Lonicereæ*. [*α*, 35.]—**T. angustifolium.** Horse-gentian; found in the southern United States. The root is used like that of *T. perfoliatum*. [*α*, 35.]—**T. perfoliatum.** Fr., *ipécacuanha de Virginie*. Ger., *durchwachsenblättriger Dreikern*. Wild ipecac, horse-gentian, fever-root, feverwort; a North American herb. The yellowish or brownish root, *radix triostei*, has a bitter, nauseous taste and a sickening odor, and is cathartic and emetic. [*α*, 35.]

TRIOVULATE, adj. Tri-o²v′u²l-at. Lat., *triovulatus* (from *tres*, three, and *ovulum*, an ovule). Having three ovules. [*α*, 35.]

TRIOXIDE, n. Tri-o²x′i²d(id). An oxygen compound analogous to a trichloride (*q. v.*). [B.]

TRIOXINDOL, n. Tri-o²x-i²nd′o²l. See ISATIC ACID.

TRIOXYADIPIC ACID, n. Tri-o²x-i²-a²d-i²p′i²k. See under HYDROXYADIPIC ACID.

TRIOXYBENZENE, n. Tri-o²x-i²-be²nz′en. See TRIHYDROXYBENZENE.

TRIOXYBENZOIC ACID, n. Tri-o²x-i²-be²nz-o′i²k. See TRIHYDROXYBENZOIC ACID.

TRIOXYCHLORIC ACID, n. Tri-o²x-i²-klor′i²k. Of Kämmerer, chloric acid. [B. 2.]

TRIOXYNAPHTHALENE, n. Tri-o²x-i²-na²f′tha²l-en. See under OXYNAPHTHOL.

TRIPALMITIN, n. Tri-pa²l′mi²t-i²n. Fr., *tripalmitine*. Ger., *T.* Palmitin, $C_3H_5.(C_{16}H_{31}O_2)_3$, occurring as pearly laminar crystals; a constituent of nearly all the animal and vegetable fats. [B, 4.]

TRIPARTITE, adj. Tri-pa³rt′i²t. Lat., *tripartitus* (from *tres*, three, and *partiri*, to divide). Fr., *triparti*. Ger, *dreitheilig*. Divided to (or nearly to) the base into three divisions. [*α*, 35.]

TRIPE DE ROCHE (Fr.), n. Trep d'rosh. Rock-tripe; a name given by Arctic navigators to mucilaginous lichens of the genera *Gyrophora* and *Umbilicaria*, especially the latter. They are much used as food, but contain a bitter principle which often causes diarrhœa. [*α*, 35.]

TRIPES (Lat.), adj. Tri(tri²)′pez(pas). Gen., *trip′edis*. Fr., *trépied*. Ger., *dreifüssig*. Three-footed. [A, 312 (*α*, 48).]

TRIPETALOID, adj. Tri-pe²t′a²l-oid. From τρεῖς, three, πέταλον, a leaf, and εἶδος, resemblance. Consisting of or containing three petaloid parts. The *Tripetaloideæ* of Linnæus are an order of plants, comprising *Calamus, Alisma, Sagittaria*, etc. [*α*, 35.]

TRIPETALOUS, adj. Tri-pe²t′a²l-u³s. Having three petals.

TRIPHARMACUM (Lat.), n. n. Tri(tri²)-fa³rm′a²k(a³k)-u³m-(u⁴m). From τρεῖς, three, and φάρμακον, a drug. Fr., *tripharmaque*. A medicine composed of three ingredients. [L, 41, 50 (*α*, 14).]

TRIPHENOL, n. Tri-fe²n′o²l. See TRIHYDROXYBENZENE.

TRIPHENYL, n. Tri-fe²n′i²l. The chemical group $(C_6H_5)_3$. [*α*, 38.]—**T'rosaniline.** The compound $C_{38}H_{31}N_3 = C_{20}H_{16}(C_6H_5)_3.N_3$. It constitutes *bleu de Lyon*, and probably also diphenylamine blue. [B, 2.]

TRIPHYLLOUS, adj. Tri-fi²l′u³s. Three-leaved; of a corolla, tripetalous; of a calyx, trisepalous. [*α*, 35.]

TRIPINNATE, adj. Tri-pi²n′at. Lat., *tripinnatus* (from *tres*, three, and *pinna*, a feather). Fr., *tripenné*. Thrice pinnate (said of compound leaves in which the secondary pinnæ are themselves pinnate). [*α*, 35.]

TRIPINNATIFID, adj. Tri-pi²n-a²t′i²-fi²d. Lat., *tripinnatifidus* (from *tres*, three, *pinna*, a feather, and *findere*, to split). Fr., *tripennatifide*. Ger., *dreifiederspaltig*. Thrice pinnatifid. [*α*, 35.]

TRIPINNATISECT, adj. Tri-pi²n-a²t′i²-se²kt. Lat., *tripinnatisectus* (from *tres*, three, *pinna*, a feather, and *secare*, to cut). 1. Divided to the base in a tripinnate manner. 2. Tripinnate. [*α*, 35.]

TRIPLET, n. Tri²p′le²t. Lat., *tergeminus, trigeminus*. Fr., *trijumeau*. Ger., *Drilling, Drillingsfrucht*. One of three born as the result of one gestation. [*α*, 48.]

TRIPLOIDES INSTRUMENTUM (Lat.), n. n. Tri²p-lo(lo²)-i²d(ed)′ez(as) i²n-stru²(stru)-me²nt′u³m(u⁴m). From τριπλόος, triple, and εἶδος, resemblance. Fr., *triploïde*. A three-pronged instrument formerly used for raising depressed fragments of the skull in trephining. [L, 41, 50 (*α*, 14).]

TRIPLOPIA (Lat.), n. f. Tri²p-lop′i²-a³. From τριπλόος, triple, and ὤψ, the eye. Fr., *triplopie*. The simultaneous formation of three visual images of an object. [*α*, 18.]

TRIPLUMBIC, adj. Tri-plu³mb′i²k. Containing three atoms of lead in the molecule. [B.]

TRIPMADAM, n. Tri²p′ma²d-′m. Ger., *T.* See SEDUM *reflexum*.

TRIPOD, n. Tri′po²d. Gr., τρίπους (from τρεῖς, three, and πούς, the foot). Lat., *tripus*. Fr., *trépied*. Ger., *Dreifuss*. A support having three legs. [L.]—**Vital t.** The brain, heart, and lungs, so called as being the main supports of vitality. [*α*, 48.]

TRIPOLITH, n. Tri²p′o-li²th. From τρεῖς, three, and λίθος, a stone. An artificial mixture of gypsum, magnesium sulphate, and powdered cork, used as a material for splints. ["Lancet," 1881, ii, p. 120 (*α*, 34).]

TRIPPER (Ger.), n. Tri²p′pe²r. See GONORRHŒA.—**Fuhrmannst'.** See CHORDEE.—**Nacht'.** See GLEET.—**Syphilitischer T.** See GONORRHOSYPHILIS.—**T'hode.** See EPIDIDYMITIS.—**T'hodenentzündung.** See GONORRHORCHITIS.—**T'nebenhodenentzündung.** Gonorrhœal epididymitis.

TRIPROPYLAMINE, n. Tri-pro-pi²l′a²m-en. A tertiary amine of propyl, $N(C_3H_7)_3$, not yet obtained in the pure state. [B.]

TRIPROPYLARSINE, n. Tri-pro-pi²l-a³rs′en. A body, $As(C_3H_7)_3$, having a very disagreeable odor. [B, 3.]

TRIPSINE (Fr.), n. Trep-sen. See TRYPSIN.

TRIPSIS (Lat.), n. f. Tri²ps(treps)′i²s. Gen., *trips′eos(-is)*. Gr., τρῖψις (from τρίβειν, to rub). See COMMINUTION.

TRIPTEROUS, adj. Tri²p′te²r-u³s. From τρεῖς, three, and πτερόν, a wing. Having three wings or alæ. [*α*, 35.]

TRIPTOKORIA (Lat.), n. f. Tri²pt-o(o³)-kor(ko²r)′i²-a³. From τρεῖς, three, πίπτειν, to fall, and κόρη, the pupil. That condition of the iris in which there are three distinct and separate pupils. [F.]

TRIPUDIATIO (Lat.), n. f. Tri(tri²)-pu²d(pu⁴d)-i²-a(a³)′shi²-(ti²)-o. Gen., *-on′is*. From *tripudiare*, to dance. Ger., *Tanzwuth*. See CHOREA (2d def.).—**T. spastica.** See *Epidemic* CHOREA.

TRIPUS (Lat.), n. m. Tri(tri²)′pu³s(pus). Gen., *trip′odis*. Gr., τρίπους (from τρεῖς, three, and πούς, the foot). See TRIPOD.—**T. cœliacus, T. Halleri.** The three branches of the cœliac artery. [L, 31.]

TRIQUE-MADAME (Fr.), n. Trek-ma³-da³m. The *Sedum album* and *Sedum acre*. [*α*, 35.]

TRIQUETROUS, adj. Tri-kwe²t-ru³s. Lat., *triqueter, triquetrus* (from *tres*, three). Fr., *triquètre*. Ger., *dreiseitig, dreischneidig, dreikantig*. Having three salient angles; triangular-prismatic. [*α*, 35.]

TRIQUETRUM (Lat.), n. n. Tri(tri²)-kwe²t′ru³m(ru⁴m). The cuneiform bone of the hand. [L.]

TRIQUINOYL, n. Tri-kwi²n′o-i²l. See BENZOTRIQUINONE.

TRIRICINOLEIN, n. Tri-ri²s-i²n-o²l′e²-i²n. See RICINOLEIN.

TRISALT, n. Tri′sa⁴lt. Fr., *trisel*. A salt containing three times as much base as acid. [L, 41, 49 (*α*, 14).]

TRISCAPULO-HUMÉRO-OLÉCRANIEN (Fr.), n. Treska³-pu⁶-lo-u⁶-ma-ro-o-la-kra³-ne-a³n². See *Triceps* EXTENSOR *cubiti*.

TRISECTED, adj. Tri-se²kt′a²d. Lat., *trisectus* (from *tres*, three, and *secare*, to cut). Ger., *dreischnittig*. Of a leaf, divided into three portions by incisions reaching to the midrib or base. [*α*, 35.]

TRISELENIDE, n. Tri-se²l′e²n-i²d(id). Fr., *triséléniure*. A selenium compound analogous to a trichloride (*q. v.*). [B.]

TRISERIAL, TRISERIATE, adj's. Tri-ser′i²-′l, -at. Lat., *triserialis, triseriatus* (from *tres*, three, and *series*, a row). Arranged in three horizontal rows. [*α*, 35.]

TRISEPALOUS, adj. Tri-se²p′′l-u³s. From *tres*, three, and *sepalum*, a sepal. Composed of three sepals. [*α*, 35.]

TRISETUM (Lat.), n. n. Tri(tri²)-set(sat)′u³m(u⁴m). From *tres*, three, and *setum*, a bristle. Fr., *trisète*. A genus of grasses closely related to *Avena*. [*α*, 35.]—**T. flavescens.** Fr., *avenetle blonde*,

petit fromental, avoine blonde. Ger., *Goldhafer, gelber Weisenhafer.* Yellow oat (-grass), having small yellow flowers, found in Europe, northern Asia, and North America. [B, 19, 173 ; *a*, 35.]

TRISILICIC ACID, n. Tri-si^{2}l-i^{2}s'i^{2}k. An acid containing three atoms of silicon. Although the salts (called *trisilicates*) of several of these acids exist, the acids themselves, $3SiO_2.2H_2O = H_4Si_3O_8$, $3SiO_2.5H_2O = H_{10}Si_3O_{11}$, and $3SiO_2.7HO = H_{14}Si_3O_{13}$, have not been isolated. [B, 3.]

TRISMOID, n. Tri^{2}s'moid. From τρισμός, trismus, and εἶδος, resemblance. Of Sims, a chronic form of trismus nascentium attributed to depression of the occipital bone during labor. [Hartigan, "N. Y. Med. Jour.," Jan. 3, 1885, p. 16.] Cf. *White* LOCK-JAW.

TRISMUS (Lat.), n. m. Tri^{2}z(tri^{2}s)'mu^{3}s(mu^{4}s). Gr., τρισμός (from τρίζειν, to gnash). Fr., *trisme, mal de mâchoire.* Ger., *T., Klemme, Kieferklemme, Maulklemme, Mundklemme, Zähnerknirschen.* Locked jaw, lock-jaw ; tonic spasm of the muscles that close the jaws. [E.]—**T. capistratus.** Fr., *brédissure.* An impossibility of separating the jaws, in consequence of adhesion of the internal surface of the cheeks to the gums, following ulceration of those parts. [*a*, 34.]—**T. catarrhalis maxillaris.** See GNATHALGIA.—**T. cynicus.** See RISUS *sardonicus.*—**T. dolorificus.** Tic douloureux. [L, 128.]—**T. maxillaris.** See GNATHALGIA.—**T. nascentium, T. neonatorum.** Fr., *sarrète, mal de sept jours.* Nine-day fits ; tetanus affecting infants, usually within the first two weeks of life. It begins with t., and that remains one of the most prominent symptoms. [*a*, 34.]—**T. of cerebral origin** [Lépine]. See *Masticatory* MONOSPASM.—**T. sardonicus.** See RISUS *sardonicus.*—**T. uteri.** See TETANUS *uteri.*

TRISPLANCHNIA (Lat.), n f. Tri(tri^2)-spla^{2}n^{2}k(spla^{3}n^{2}ch^2)'-ni^2-a^3. From τρεῖς, three, and σπλάγχνα, the viscera. Fr., *trisplanchnie.* Of Pinel, see *Asiatic* CHOLERA.

TRISPLANCHNIC, adj. Tri-spla^{2}n^{2}k'ni^{2}k. Pertaining to the contents of the three great body-cavities. The t. nerve is the sympathetic. [L, 50 (*a*, 48).]

TRISTACHYOUS, adj. Tri-sta^{2}k'i^2-u^{3}s. From τρεῖς, three, and στάχυς, an ear of corn. Having three spikes. [*a*, 35.]

TRISTEARIN, n. Tri-ste'a^{2}r-i^{2}n. Ger., *T.* Stearin, $C_3H_5.(C_{18}H_{36}O_2)_3$, occurring as scaly crystals of pearly lustre ; a constituent of most of the animal fats. [B, 3 (*a*, 38) ; B, 4.]

TRISTICHIASIS (Lat.), n. f. Tri(tri^2)-sti^{2}k(sti^{2}ch^2)-i^2-a(a^3)'si^{2}s. Gen., *-as'eos* (*-is*). From τριστιχία, a triple row. Of Cornaz, a form of congenital distichiasis in which there are three rows of cilia. ["Ann. d'ocul.," xxvii (F).]

TRISTICHOUS, adj. Tri^{2}s'ti^{2}k-u^{3}s. Arranged in three vertical rows. [*a*, 35.]

TRISTIGMATIC, adj. Tri-sti^{2}g-ma^{2}t'i^{2}k, From τρεῖς, three, and στίγμα (see STIGMA). Having three stigmata. [*a*, 35.]

TRISTIMANIA (Lat.), n. f. Tri^{2}st-i^2-man(ma^{3}n)'i^2-a^3. From *tristis*, sad, and *mania*, madness. Of Rush, melancholia. [D, 36.]

TRISTIS (Lat.), adj. Tri^{2}st'i^{2}s. In botany, of a dull color. [*a*, 35.]

TRISUBSTITUTED, adj. Tri-su^{3}b'sti^{2}t-u^{2}t-e^{2}d. Having three elements replaced by equivalent elements. [B.]

TRISULCATE, adj. Tri-su^{3}lk'at. From *tres*, three, and *sulcus*, a furrow. Having three grooves. [*a*, 35.]

TRISULFURETUM (Lat.), n. n. Tri(tri^2)-su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-et(at)'u^{3}m(u^{4}m). See TRISULPHIDE.—**T. potassicum.** See POTASSA *sulfurata* (1st def.).—**T. sodicum.** See SODIUM *trisulphide.*

TRISULPHATE, n. Tri-su^{3}lf'at. See TERSULPHATE.

TRISULPHIDE, n. Tri-su^{3}lf'i^{2}d(id). A sulphur compound analogous to a trichloride (*q. v.*). [B.]

TRISULPHURETUM (Lat.), n. n. Tri(tri^2)-su^{3}lf(su^{4}lf)-u^{2}r-(u^{4}r)-et(at)'u^{3}m(u^{4}m). See TRISULPHIDE.—**T. kalicum.** See POTASSA *sulphurata* (1st def.).—**T. kalicum ad usum externum.** See POTASSA *sulphurata* (2d def.).

TRITÆOPHYA (Lat.), n. f. Tri^{2}t-e^2(a^3-e^2)-o^{2}f'i^2(u^6)-a^3. From τριταῖος, of the third day, and φύειν to produce. Written also *tritœophyia* and *tritœophia.* Fr., *tritéophye.* See *Tertian* FEVER.—**T. americana.** Of Sauvages, the pernicious malarial fever of immigrants to Spanish America. [*a*, 34.]—**T. carotica.** See FEBRIS *tertiana lethargica.*—**T. causus.** See *Ardent* FEVER.—**T. deceptiva.** See *Intermittent* FEVER.—**T. hepatalgica.** See FEBRIS *quartana hepatica.*—**T. humorosa.** See AMPHEMERINA *syncopalis.*—**T. elodes.** See *Sweating* FEVER (1st def.).—**T. lactea.** See FEBRIS *lactea.*—**T. leipyria.** See AMPHEMERINA *phricodes.*—**T. maligna.** Of Lautter, see *Pernicious malarial* FEVER.—**T. semitertiana.** See AMPHEMERINA *semiquartana.*—**T. simplex.** See *T.*—**T. splenalgica.** See FEBRIS *quartana splenetica.*—**T. syncopalis.** See AMPHEMERINA *syncopalis.*—**T. typhodes.** Of Mangetus, see *Typhus* FEVER.—**T. vratislaviensis.** See *Breslau* FEVER.

TRITÆUS (Lat.), n. m. Tri^{2}t-e'(a^3'e^2)-u^{3}s(u^{4}s). Gr., τριταῖος. See *Tertian* FEVER.

TRITELLURIDE, n. Tri-te^{2}l'u^{2}r-i^{2}d(id). A tellurium compound analogous to a trichloride (*q. v.*). [B.]

TRITERNATE, adj. Tri-tu^{5}rn'at. Lat., *triternatus* (from *ter*, thrice, and *terni*, three each). Fr., *triterné.* Ger., *dreifach-dreizählig.* Thrice ternate, ternate with each of the divisions itself triply divided. [*a*, 35.]

TRITHIONIC ACID, n. Tri-thi^2-o^{2}n'i^{2}k. An unstable dibasic acid, $H_2S_3O_6$, known only in aqueous solution. [B.]

TRITICEO-GLOSSUS (Lat.), n. m. Tri^{2}t(tret)-i^{2}s(i^{2}k)''e^2-o(o^3)-glo^{2}s(glos)'su^{3}s(su^{4}s). From *triticum*, wheat, and γλῶσσα, the tongue. An anomalous muscle arising from the arytænoid cartilage and inserted into the side of the tongue. [L, 332.]

TRITICEUS (Lat.), adj. Tri^{2}t(tret)-i^{2}s(i^{2}k)'e^2-u^{3}s(u^{4}s). From *triticum*, wheat. Fr., *triticé.* Pertaining to wheat, resembling a grain of wheat. [B. 38 (*a*, 14).]

TRITICIN, n. Tri^{2}t'i^{2}s-i^{2}n. Fr., *triticine.* Ger., *T.* 1. An amorphous and tasteless substance, $C_{12}H_{22}O_{11}$ (or $C_{24}H_{22}O_{22}$), found in *Triticum repens.* [B, 3 ; B, 270 (*a*, 38).] 2. See GLUTEN.

TRITICINA (Lat.), n. f. Tri^{2}t(ret)-i^{2}s(i^{2}k)-in(en)'a^3. From *triticum*, wheat. See *Boiled* FLOUR.

TRITICUM (Lat.), n. n. Tri^{2}t(tret)'i^{2}k-u^{3}m(u^{4}m). From *terere*, to rub. Fr., *froment* (1st def.), *blé* (1st def.), (*rhizome de*) *chiendent officinal* [Fr. Cod.] (2d def.), *petit chiendent* (*rhizome*) [Fr. Cod.] (2d def.). Ger., *Weizen* (1st def.), *Queckenwurzel* (2d def.). 1. Wheat ; a genus of gramineous herbs of the *Hordeæ.* 2. Of the U. S. Ph., the rhizome of *T. repens.* [*a*, 35.]—**Amylum tritici.** See *Wheat* STARCH.—**Decoctum furfuris tritici.** A preparation made by boiling 1 part of wheat bran in 36 parts of water till reduced to 28 parts, and, after it has cooled and settled, straining the liquid. [B, 119 (*a*, 14).]—**Extractum tritici fluidum** [U. S. Ph.]. Fr., *extrait liquide de chiendent.* Ger., *flüssiges Queckenextrakt.* A preparation made by exhausting t. (2d def.) in a percolator with boiling water, evaporating to 80 c. c., shaking up with 20 c. c. of alcohol of sp. gr. 0·820, filtering after forty-eight hours, and bringing up to 100 c. c. with alcohol of sp. gr. 0·974. [B, 95 (*a*, 38).]—**Farina tritici** [Br. Ph.]. Fr., *farine de froment.* Ger., *Weizenmehl.* Wheat flour ; the grain of *T. sativum* ground and sifted. [*a*, 35.]—**Farina tritici tosta.** See *Baked* FLOUR.—**Ptisana de radice tritici.** See *Tisane de* CHIENDENT.—**Saccharum tritici.** Ger., *Queckenwurzelzucker.* A sweetish crystalline substance obtained from the extract of *T. repens*, differing from other sugars in its greater solubility in alcohol. If dissolved in 120 parts of hot alcohol and cooled, it forms a solid mass. [B, 48 (*a*, 14).]—**T. acutum.** A European species. The root-stock is used like that of *T. repens.* [*a*, 35.]—**T. amyleum, T. atratum.** Fr., *épeautre.* Ger., *Emmerkorn, Emmerweizen, Reisdinkel.* Amel corn, starch wheat, the ζεία δίκοκκος (or two-grained wheat) of Dioscorides ; a species (by Haeckel considered a variety of *T. vulgare*) still cultivated in southern Europe as a summer wheat. It is suitable for starch-making. [*a*, 35.]—**T. caninum.** Awned wheat-grass, dog's-tooth (or couch-) grass. It probably has the same properties as *T. repens.* Dogs eat the blades to induce vomiting. [*a*, 35.]—**T. durum.** Fr., *froment corné.* Ger., *hartfrüchtiger Weizen, Bartweizen.* Hard-grained wheat, cultivated especially in southern Europe. The seeds are richer in nitrogen than the soft wheats. [*a*, 35.]—**T. glaucum.** Ger., *seegrüner* (oder *blaugrüner*) *Weizen.* 1. A European species closely related to *T. repens.* The root-stock is used like that of the latter. [*a*, 35.] 2. See *T. polonicum.*—**T. monococcum.** Fr., *froment monocoque, blé* (ou *épeautre*) *locular, petit épeautre, riz sec.* Ger., *einkörniger Weizen, Einkorn, Peterskorn.* St. Peter's corn, single-grained wheat, the ζεία ἁπλῆ of Dioscorides ; the poorest species in cultivation with respect to the quality and quantity of flour yielded by the grain. It is found wild in Greece and Mesopotamia. [*a*, 35.]—**T. polonicum.** Fr., *froment* (ou *seigle*) *de Pologne.* Ger., *polnischer Weizen, Gommer.* Polish wheat ; a species of unknown origin, cultivated in parts of Europe. The elongated, glassy seeds furnish a fine white flour having the properties of that of *T. vulgare.* [*a*, 35.]—**T. repens.** Fr., *froment rampant, agram, auge, laitue de chien, chiendent des boutiques, petit chiendent, sainte neige.* Ger., *kriechender Weizen, Quecken, Päden, Queckweizen, Weizenquecken, Queckengras, Hundegras, Rechgras.* Couch-grass (or -wheat), dog- (or quack-, or scutch-, or shelly-, or skally-, or squitch-) grass ; a weed widely dispersed in Europe, northern Asia, and North and South America. Its sweetish rhizome, occurring in straw-colored fragments from 5 to 10 mm. long and 2 to 3 mm. thick, is used in cystitis and irritable bladder and as a diluent and a slightly nutritious drink. It contains acid malates, sugar, triticin, and another gummy substance containing nitrogen. [*a*, 35.]—**T. sativum.** See *T. vulgare.*—**T. spelta.** Fr., *froment rouge, engrain, ingrain, spaute, spautre, grand épeautre.* Ger., *Dinkelweizen, Spelzdinkel, Spelz, Vesen, Zweikorn.* Dinkel- (or spelt-) wheat, the ὄλυρα of Dioscorides ; indigenous to the Persian mountains, and cultivated in Europe. The seeds yield an excellent flour, used especially for pastry. [*a*, 35.]—**T. vulgare.** Fr., *froment* (*cultivé*), *blé, bled.* Ger., *gemeiner Weizen.* Common wheat ; according to Frédéric Houssay, found wild in the mountains to the east of Kurdistan, though generally believed to have arisen through culture from some species of *Ægilops.* Its seeds, ground and sifted, constitute flour, official in the ph's as *farina tritici.* Wheat flour chiefly contains starch (see *Wheat* STARCH), gluten, albumin, sugar, and a gummy substance which differs from ordinary gum in containing nitrogen and in not yielding mucic acid when treated with nitric acid. Flour is sometimes sprinkled on inflamed surfaces ; boiled with milk, it forms an excellent emollient poultice. Wheat bread, toasted, infused, and flavored, is used as a nutritive drink in fevers. The husk of the seed (see BRAN) is also used medicinally. [*a*, 35.]—**T. zea.** See *T. spelta.*

TRITOPINE, n. Tri^{2}t-op'en. An alkaloid, $C_{42}H_{54}N_2O_7$, obtained from opium, and forming transparent prismatic crystals. Its tendency to cause convulsions contra-indicates its use as a narcotic. [B, 270 (*a*, 38).]

TRITOVUM (Lat.), n. n. Tri^{2}t-o'vu^{3}m(wu^{4}m). From τρίτος, the third, and ᾠόν, an egg. In certain spiders, the innermost of three membranes covering the embryo. [L, 196.]

TRITUBERCULISM, n. Tri-tu^{2}b-u^{6}rk'u^{2}l-i^{2}z'm. From *tres*, three, and *tuberculum*, a tubercle. The condition of having or consisting of three cusps or cones (said of molar teeth). ["Nature," March 20, 1890, p. 467 (*a*, 48).]

TRITURATE, n. Tri^{2}t'u^{2}r-at. A substance or combination of substances reduced to a fine powder, especially by rubbing up in a mortar. [*a*, 38.]

TRITURATED, adj. Tri²t'u²r-at-e²d. Finely powdered, especially by being rubbed up in a mortar. [*a*, 38.]

TRITURATION, n. Tri²t-u²r-a'shu³n. Lat., *trituratio* (from *tritura*, a rubbing). Fr., *t.* Ger., *Zerreibung.* In pharmacy, the act or process of rubbing up in a mortar or otherwise, so as to reduce to a fine powder; also the resulting powder; of the U. S. Ph., a preparation in which a medicinal substance is rubbed up with nine times as much powdered sugar of milk into a homogeneous powder. [B, 95 (*a*, 38).]

TRITUS (Lat.), n. m. Trit(tret)'u³s(u⁴s). Gen., *trit'us.* From *terere*, to rub. See TRITURATION and FRICTION.

TRITYL, n. Tri²t'i²l. Fr., *trityle.* Propyl; so called as containing three atoms of carbon. [B.]—**Hydrated t. oxide, T'-alcohol, T. hydrate.** See PROPYL *alcohol.*

TRITYLATE, n. Tri²t'i²l-at. A salt of trityl.

TRITYLIC, adj. Tri²t-i²l'i²k. Containing trityl.

TRIUMFETTA (Lat.), n. f. Tre-um-fe²t'ta³. From *Trionfetti*, an Italian botanist. Fr., *cousin, lappulier.* West Indian burweed, parroquet-bur of Jamaica; a genus of tiliaceous plants. [*a*, 35.]—**T. elliptica.** A species with a mucilaginous root. The inner bark and the juice are used in the Antilles as detergents. [*a*, 35.]—**T. lappula, T. Plumieri.** Fr., *grand cousin, herbe à cousin, pou de moine.* Great-wort of the West Indies; a mucilaginous shrub. The root and inner bark are used in mucous discharges, hæmorrhages, etc. [*a*, 35.]—**T. rhomboidea, T. semitriloba.** Two species (the first West Indian, the second [burbark-tree] distributed over the tropics of both hemispheres) used like *T. lappula.* [*a*, 35.]

TRIVALENCE, n. Tri²v'a²l-e²ns. Ger., *Dreiwerthigkeit.* The condition or property of being trivalent. [B.]

TRIVALENT, adj. Tri²v'a²l-'nt. From *tres*, three, and *valere*, to be worth. Fr., *t.* Ger., *dreiwerthig.* Having an atomicity of three; *i. e.*, being capable of replacing three atoms of hydrogen in a compound.

TRIVALERIN, n. Tri-va²l'e²r-i²n. Fr., *trivalérine.* A substance, $C_3H_5(C_5H_9O_2)_3$, of disagreeable odor, found in the oil of certain marine mammals. [B, 3 (*a*, 38).]

TRIVIA (Lat.), n. f. Tri²'vi²(wi²)-a³. From *tres*, three, and *via*, a way. The point where the three semicircular canals of the cochlea cross each other. [L, 221.]

TRIVIAL, adj. Tri²v'i²-'l. Lat., *trivialis* (from *trivium*, the meeting of three roads). Fr., *t.* Ger., *schlicht.* Of the name of an animal or plant, common or vulgar; also specific, as opposed to generic. [*a*, 35.]

TRIXIS (Lat.), n. f. Tri²x'i²s. Gen., *trix'eos* (*-is*). Fr., *trixide.* 1. Of Gärtner, the genus *Proserpinaca.* 2. Of Browne, a genus of composite herbs or shrubs. The *Trixideæ* are a division of the *Nassauvieæ.* [*a*, 35.]—**T. antimenorrhœa.** A tonic and emmenagogue species found in tropical America. [*a*, 35.]—**T. brasiliensis.** A species used as an emmenagogue. [*a*, 35.]—**T. frutescens.** The *palo de Santa-Maria* of Panama; used as a vulnerary. [*a*, 35.]—**T. fruticosa, T. pipitzahuac.** A Mexican species used as a drastic purgative and recommended in cholera and dysentery. It contains pipitzahoic acid (*q. v.*). [*a*, 35.]

TRIZINCIC, adj. Tri-zi²n²s'i²k. Containing three atoms of zinc in the molecule. [B.]

TROCAR, n. Tro'ka³r. Fr., *t.*, *trocart, trois-quarts.* Ger., *T.*, *Troicar, Trokar, Abzapfer, Bauchstecher.* An instrument for drawing off liquid from a cavity, consisting of a perforator and a cannula. [E.]—**Lancet-t.** A t. having a lancet-shaped point. [*a*, 34.]—**Piloting t.** A t. devised by Durham for introducing the articulated tracheotomy tube.—**Rectum t.** A t. with a large curve for the operation of tapping the bladder through the rectum. [E.]

TROCHAL, adj. Tro'k'l. From τροχός, a wheel. Wheel-shaped. [*a*, 27.]

TROCHANTER (Lat.), n. m. Trok(tro²ch²)-a²nt(a³nt)'u⁵r(ar). Gen., *-er'os* (*-is*). Gr., τροχαντήρ (from τρέχειν, to run). Fr., *t.* Ger., *Rollhügel.* 1. Of Galen, the ball on which the hip bone turns in its socket. 2. One of two processes upon the upper end of the shaft of the femur. 3. In arthropods, the segment of a leg that is second from the body. [L.]—**Great t.** See *T. major.*—**Lesser t.** See *T. minor.*—**Third t.** See *T. tertius.*—**T. major.** A thick process at the upper end of the femur which projects upward externally to the union of the neck and shaft. [L.]—**T. minor.** A conical tuberosity upon the inner and posterior surface of the upper end of the femur, at the junction of the shaft and neck. [L.]—**T. tertius.** An anomalous process upon the upper end of the planum popliteum of the femur. [L, 332.]

TROCHANTERIAN, TROCHANTERIC, adj's. Trok-a²nter'i²-a²n, -er'i²k. Fr., *trochantérien, trokantérien.* Ger., *trochanterisch.* Pertaining to or resembling a trochanter.

TROCHANTINE, n. Trok-a²nt'en. In certain insects, a small segment interposed between the coxa and the trochanter. [L, 196.]

TROCHANTINIANUS (Lat.), adj. Trok(tro²ch²)-a²nt(a³nt)-i²n(en)-i²-an(a³n)'u³s(u⁴s). Fr., *trochantinien.* Pertaining to the trochanter minor. [L, 50 (*a*, 14).]

TROCHANTINUS (Lat.), n. m. Trok(tro²ch²)-a²nt(a³nt)-in(en)'-u³s(u⁴s). Fr., *trochantin.* See TROCHANTER *minor.*

TROCHE, n. Trok'e. From τροχός, a round cake. Lat., *trochiscus.* Fr., *trochisque.* Ger., *Küchelchen.* A round lozenge. [D. 6.] See also TROCHISCUS and cf. TABLET and PASTILLE.

TROCHIA (Lat.), n. f. Trok(tro²ch²)'i²-a³. From τροχός, a wheel. An old term for the orbit. [F.]

TROCHILIA (Lat.), n. f. Tro²k(tro²ch²)-i²l'i²-a³. See TROCHLEA.

TROCHINUS (Lat.), n. m. Trok(tro²ch²)-in(en)'u³s(u⁴s). From τροχός, a wheel. Fr., *trochin.* The lesser tuberosity of the humerus. [L, 49, 50 (*a*, 14).]

TROCHISCANTHES (Lat.), n. m. Trok(tro²ch²)-i²sk-a²nth-(a³nth)'ez(as). From τροχίσκος, a small wheel, and ἄνθος, a flower. Fr., *trochiscanthe.* A genus of the *Umbelliferæ.* [*a*, 35.] **T. nodiflorus.** An herb sometimes confounded with *Levisticum officinale.* The roots are sold in southern France for those of *Archangelica officinalis.* [*a*, 35.].

TROCHISCUS (Lat.), n. m. Trok(tro²ch²)-i²sk'u³s(u⁴s). Gr., τροχίσκος (from τροχός, a wheel). Fr., *trochisque.* See TROCHE.—**Trochisci albi.** See *Pulvis* CERUSSÆ *compositus.*—**Trochisci alexiterii nostri.** Cordial troches; a mixture of 1 part of Armenian bole, 2 parts each of dry citron-peel and angelica-seeds, 3 parts each of Virginia snake-root and crabs' claws, and 11 parts of white sugar, all finely powdered, and worked with a sufficient quantity of tragacanth mucilage into a paste for troches. [B, 200 (*a*, 14).]—**Trochisci bechici** [Gr. Ph.]. Lozenges consisting of 12 parts of purified licorice-juice, 36 of sugar, 1 part of fennel-seeds. and enough tragacanth mucilage. [B, 95 (*a*, 38).]—**Trochisci bechici albi.** Lozenges consisting of 45 parts of starch made into a paste with rose water and either 187 parts of gum arabic and 589 of sugar or 90 of gum arabic, 540 of sugar, and 3 of benzoic acid; or with tragacanth mucilage and either 45 parts of Florentine iris-root and 600 of sugar, or 33 of licorice, 66 of iris, and 720 of sugar, or 240 of licorice, 120 of iris, and 180 of sugar. See also *Tablettes de* GOMME and *Trochisci* ALTHÆÆ.—**Trochisci bechici citrini.** Fr., *trochisques d'amidon safranés.* Lozenges consisting of 15 parts of starch, 12 of Florentine iris, 11 of licorice, 2¼ of saffron, and 240 of sugar, made into a paste with tragacanth mucilage. [B, 119 (*a*, 38).]—**Trochisci contra vermes, Trochisci hermetici.** Fr., *pastilles vermifuges purgatives.* Thirty-five-centigramme lozenges consisting of 5 parts each of calomel and jalap, 14 of santonica, and 240 of sugar, made into a paste with tragacanth mucilage. [B, 119 (*a*, 38).]—**Trochisci imperatoris.** See MORSULI *imperatoris.*—**Trochisci pectorales.** Ger., *Brustkuchen.* See *Tablettes de* GOMME.—**Trochisci pectorales Danorum.** Fr., *trochisques de réglisse opiacés.* Lozenges consisting of 150 parts each of licorice-juice and gum arabic, 7 of opium, 15 of tincture of balsam of Tolu, and 240 of syrup. [B, 119 (*a*, 38).]—**Trochisci peptici** [Gr. Ph.]. A preparation consisting of 1 drachm each of magnesium lactate and sodium lactate, 4 drachms of sugar, and enough tragacanth mucilage, divided into 60 lozenges. [B, 95 (*a*. 38).]—**T. scillitici.** See *T.* SCILLÆ *Damocratis.*—**Trochisci stibiati.** Fr., *tablettes antimoniales* (ou *de sulfure d'antimoine*). Ger., *Antimonmorsellen.* Troches containing antimony trisulphide in quantities varying from 1 grain [Fr. Cod. (1837)] to 15 grains [Hamb. Ph. (1835), Hess. Ph. (1827)], and even to 75 grains [Bruns. Ph. (1777)], mixed with different ingredients, among which were sugar, cinnamon, lesser cardamom, almonds, orange-peel, and gum arabic or tragacanth. [B, 119.]

TROCHISQUE (Fr.), n. Tro-shesk. See TROCHE.—**T's escarotiques, T's mercuriels au minium.** See *Trochisci de* MINIO.

TROCHITER (Lat.), n. m. Tro²k(tro²ch)'i²t-u⁵r(e²r). Fr., *t.* From τροχός, a wheel. The greater tuberosity of the humerus. [L, 49, 50 (*a*, 14).]

TROCHLEA (Lat.), n. f. Trok(tro²ch²)'le²-a³. From τροχιλία, a pulley. Fr., *trochlée, poulie.* Ger., *T.*, *Rolle.* A hook or ring over or through which a muscle or tendon slips. [L.]—**T. labyrinthi.** See COCHLEA (2d def.).—**T. of the astragalus.** The tibial articular surface of the astragalus. [L.]—**T. of the femur.** Fr., *trochlée fémorale.* See FOSSA *intercondyloidea* (*femoris*) *anterior.*—**T. of the obliquus oculi superior, T. of the orbit.** The ligamentous ring or pulley attached by fibrous tissue to a depression beneath the internal angular process of the frontal bone. It transmits the tendon of the obliquus oculi superior. [F.]

TROCHLEAR, adj. Tro²k'le²-a³r. Lat., *trochlearis.* Fr., *trochléaire.* Ger., *rollenförmig.* Pulley-shaped, circular and contracted in the centre; pertaining to a trochlea; as a n., see OBLIQUUS *oculi superior.* [*a*, 35.]

TROCHLEARIS (Lat.), adj. Trok(tro²ch²)-le²-ar(a³r)'i²s. From τροχιλία, a pulley. Trochlear; as a n., see OBLIQUUS *oculi superior.*

TROCHOCARDIA (Lat.), n. f. Trok(tro²ch²)-o(o³)'ka³rd'i-a³. From τροχός, a wheel, and καρδία, the heart. Of Alvarenga, a cardiac displacement with a turning of the heart on its axis. [L, 57 (*a*, 34).]

TROCHOCEPHALIA (Lat.), n. f. Trok(tro²ch²)-o(o³)-se²f-(ke²f)-al(a³l)'i²-a³. From τροχός, a wheel, and κεφαλή, the head. Fr., *trochocéphalie.* Ger., *Trochocephalie.* A malformation of the skull caused by partial synostosis of the parietal and frontal bones in the middle of the coronal suture. [L, 57 (*a*, 14).]

TROCHOID, adj. Trok'oid. Lat., *trochoides* (from τροχός, a wheel, and εἶδος, resemblance). Fr., *trochoïde.* Ger., *cykloïdisch.* Wheel-like; like the turning of a wheel on its axle; of shells, conical with a flat base. [B, 28 (*a*, 27).]

TROCHOIDES (Lat.), adj. Trok(tro²ch²)-o(o²)-i²d-(ed)'ez(as). See TROCHOID; as a n., see *Trochoid* ARTICULATION.

TROCHORIZOCARDIA (Lat.), n. f. Trok(tro²ch²)-o²r-i²z-o-(o³)-ka³rd'i²-a³. From τροχός, a wheel, ὁρίζειν, to divide, and καρδία, the heart. See TROCHOCARDIA.

TROCKENAMME (Ger.), n. Tro³k'e²n-a³m-me². See *Dry-*NURSE.

TROCKENCUR (Ger.), n. Tro³k'e²n-kur. Treatment by the reduction of fluid elements in the diet. [L, 57 (*a*, 14).]

TROCKENHÄUTIG (Ger.), adj. Tro³k'e²n-hoit-i²g. See SCARIOUS.

TROCKENÖLSÄURE (Ger.), n. Tro^{3}k'e^{2}n-u^{5}l-zoir-e^2. See LINOLEIC ACID.

TROCKNEN (Ger.), n. Tro^{3}k-ne^{2}n. See SCLEROSIS and SCLERODERMA.

TROICAR (Ger.), **TROIS-QUARTS** (Fr.), **TROKAR** (Ger.), n's. Tro'ik-a^{3}r, trwa^3-ka^{3}r, trok'a^{3}r. See TROCAR.

TROLLIUS (Lat.), n. m. Tro^{2}l'li^2-u^{3}s(u^{4}s). Fr., *trolle, trollière.* Ger., *Trollblume.* Globe ranunculus; a genus of the *Helleboreæ.* [α, 35.]—**T. asiaticus.** Fr., *trolle d'Asie.* Asiatic globe-flower. The root is a drastic purgative. [α, 35.]—**T. europæus.** Fr., *trolle* (ou *trollière*) *d'Europe, boule d'or, renoncule de montagne.* Ger., *europäische Trollblume, Kugelblume, Kugelranunkel, Knobbenblume, Engelblume.* 1. Common globe-flower (or troll-flower), golden ball, bolts, lapper, lopper, luckin-gowan; found throughout Europe. The somewhat acrid root, *radix hellebori nigri,* occurs in commerce. The root-leaves were formerly used as an antiscorbutic. [α, 35.] 2. See *T. asiaticus.*

TROMA (Lat., n. n. Trom'a^3. Gen., *trom'atos (-atis).* Gr., τρῶμα, τραῦμα. See TRAUMA.

TROMMEL (Ger.), n. Tro^{3}m'me^{2}l. See DRUM.—**Gehört'.** See TYMPANUM.—**Luftt'.** See TAMBOUR (2d def.).—**T'bauch.** Tympanites. [α, 34.]—**T'höhle.** See *Tympanic* CAVITY.—**T'saite, T'sehne.** See CHORDA *tympani.*

TROMMELFELL (Ger.), n. Tro^{3}m'me^{2}l-fe^{2}l. See MEMBRANA *tympani.*—**Nebent'.** See MEMBRANA *tympani secundaria.*—**T'beutel.** See POUCHES *of the membrana tympani.*—**T'entzündung.** See MYRINGITIS.

TROMMELSUCHT (Ger.), n. Tro^{3}m'me^{2}l-zuch^{2}t. See *Peritoneal* TYMPANITES.—**Magent'.** See GASTROTYMPANITES.—**T. der Gebärmutter.** See PHYSOMETRA.

TROMOMANIA (Lat.), n. f. Trom(tro^{2}m)-o(o^3)-man(ma^{3}n)'i^2-a^3. From τρόμος, a trembling, and μανία, madness. See DELIRIUM *tremens.*

TROMPE (Fr.), n. Tro^{2}n^{2}p. A trumpet-shaped tube.—**T. de Falloppe.** See OVIDUCT.—**T. de Eustache.** The Eustachian tube.—**T. utérine.** See OVIDUCT.

TROMPETE (Ger.), n. Tromp-at'e^2. A trumpet, also a trumpet-shaped tube.—**Muttert'.** See OVIDUCT.—**Ohrt'.** See *Eustachian* TUBE and *Ear*-TRUMPET.

TROMYLES (Fr.), n. pl. Tro-mel. See CILIA (2d def.).

TROMUS (Lat.), n. m. Trom(tro^{2}m)'u^{3}s(u^{4}s). Gr., τρόμος (from τρέμειν, to tremble). See TREMOR.

TRONA, n. Tro'na^3. See under SODIUM *sesquicarbonate.*

TRONC (Fr.), n. Tro^{2}n^2. See TRUNK.

TRONQUÉ (Fr.), adj. Tro^{2}n^2-ka. See TRUNCATE.

TROPÆOLIN, n. Trop-e'o^{2}l-i^{2}n. A name given to certain azo-dyes on account of the resemblance of their colors to those of the flowers of *Tropæolum majus.* [B, 3 (α, 38).]

TROPÆOLUM (Lat.), n. n. Tro^{2}p-e'(a^3'e^2)-o^{2}l-u^{3}m(u^{4}m). From τροπαῖος, of a turning. Fr., *capucine.* Ger., *Kapuzinerkresse.* Indian cress, yellow larkspur, garden nasturtium; a genus of the *Pelargonieæ.* The *Tropæolaceæ,* or trophyworts, of Lindley an order of the *Malvales,* are included by Bentham and Hooker in the *Geraniaceæ.* The *Tropæoleæ* (Fr., *tropæolées;* Ger., *Tropäoleen*) are: Of Lindley, a tribe of the *Tropæolaceæ;* of Baillon and others, a tribe or series of *Geraniaceæ.* [α, 35.]—**T. majus.** Fr., *capucine cultivée, cresson du Mexique, grand cresson d'Inde* (ou *du Pérou*), *fleur sanguine* (ou *de sang*). Ger., *grosse Kapuzinerkresse, indische Kresse, falsche Kapper.* Indian cress, tall nasturtium: a Peruvian species. The buds and young fruits are used as a condiment. It is said to contain phosphorus, and is excitant, stomachic, and antiscorbutic. The leaves and flowers, *herba et flores nasturtii indici* (seu *nasturtii hispanici,* seu *cardami majoris,* seu *tropæoli*), were formerly official. The ripe, dried fruit is recommended as a purgative. An acrid volatile oil may be obtained from the foliage. [α, 35.]—**T. minus.** Fr., *petite capucine, petit cresson d'Inde.* Ger., *kleine Kapuzinerkresse.* The dwarf nasturtium of Peru, having properties like those of *T. majus.* The herb and flowers, *herba* et *floresnasturtii indici minoris* (seu *cardami minoris*), were formerly official. [α, 35.]—**T. tuberosum.** Peruvian (or tuberous-rooted) nasturtium. The farinaceous tubers are eaten. [α, 35.]

TROPFEN (Ger.), n. Tro^{3}pf'e^{2}n. See DROP (1st def.).—**Biett's arsenikalische T.** See *Liquor* AMMONII *arsenici.*—**Bittere Magent', Bittere T.** See TINCTURA *amara* (1st def.) and cf. *Bitter* DROPS.—**Donovan'sche T.** Donovan's solution. See *Liquor* ARSENII *et hydrargyri iodidi.*—**Fiebert'.** See MIXTURA *simplex Ludovici.*—**Hoffmann's T.** See *Spiritus* ÆTHERIS.—**Schwarze Fiebert'.** See *Tinctura* CHINIOIDINI.

TROPHE (Lat.), n. f. Trof(tro^{2}f)'e(a). Gen., *troph'es.* Gr., τροφή (from τρέφειν, to nourish). See ALIMENT.

TROPHESY, n. Tro^{2}f'e^{2}s-i^2. From τροφή, nourishment. Defective nutrition of a part, resulting from withdrawal of the nervous supply. [K.]

TROPHIC, TROPHICAL, adj's. Trof'i^{2}k, -i^2-k'l. Gr., τροφικός. Fr., *trophique.* Pertaining to nutrition. [D.]

TROPHICITÉ (Fr.), n. Tro-fe-se-ta. From τρόπος, a turn. A reversal of the proportion of phosphates to various other urinary constituents, said to be observed constantly in hysteria. ["Gaz. des hôp.," Jan. 23, 1892, p. 90 (α, 50).]

TROPHIS (Lat.), n. f. Trof(tro^{2}f)'i^{2}s. From τρόφις, well-fed. Fr., *trophide, t.* The ramoon-tree, a genus forming a tribe (*Trophideæ*) of the *Moraceæ.* [α, 35.]—**T. americana.** A West Indian shrub or tree, used as a mild astringent and as an alterative. [α, 35.]—**T. aspera.** Fr., *t. rude.* Paper-tree of Siam and India. The juice of the leaves and young shoots is used in ulcers and skin diseases, and the berries as an astringent and antiseptic. [α, 35.]

TROPHOBLAST, n. Tro^{2}f'o-bla^{2}st. From τροφή, nourishment, and βλαστός, a sprout. The epiblast of the blastocyst, in contradistinction to the epiblast of the germinal area, or the formative epiblast. [Hubrecht, "Quart. Jour. of Micr. Sci.," xxx, p. 298 (J).]

TROPHODISC, n. Tro^{2}f'o-di^{2}sk. From τροφή, nourishment, and δίσκος, a disc. See TROPHOSPHERE.

TROPHOLOGY, n. Tro^{2}f-o^{2}l'o-ji^2. From τροφή, nourishment, and λόγος, understanding. Fr., *trophologie.* Ger., *Ernährungslehre.* The physiology, etc., of nutrition. [α, 48.]

TROPHONEUROSIS (Lat.), n. f. Tro^{2}f-o(o^3)-nu^{2}r-os'i^{2}s. Gen., *-os'eos (-is).* From τροφή, nourishment, and νεῦρον, a nerve. Fr., *trophonévrose.* Ger., *Trophoneurose.* 1. A neurosis dependent on nutritive changes. [D.] 2. Failure in nutrition, due to impairment of the nervous action; in dermatology, a cutaneous disease characterized by nutritive changes in the skin depending on morbid conditions of the nerves. [G, 54; K.]—**Facial t.** [Romberg]. See *Progressive facial* ATROPHY.—**Muscular t.** A t. in which the muscles suffer nutritive changes in connection with certain diseases of the nervous system. [D, 35.]—**Romberg's t.** Unilateral atrophy of the face.—**T. disseminata.** See SCLERODERMA.

TROPHONEUROTIC, adj. Tro^{2}f-o-nu^{2}r-o^{2}t'i^{2}k. Fr., *trophonévrotique.* Ger., *trophoneurotisch.* Pertaining to or affected with a trophoneurosis. [D.]

TROPHONOSUS (Lat.), n. f. Tro^{2}f-o^{2}n'o^{2}s-u^{3}s(u^{4}s). From τροφή, nourishment, and νόσος, disease. Fr., *trophonose.* See TROPHOPATHY.

TROPHOPATHY, n. Tro^{2}f-o^{2}p'a^{2}th-i^2. Lat., *trophopathia* (from τροφή, nourishment, and πάθος, disease). Fr., *trophopathie.* Any disease of nutrition.

TROPHOPLAST, n. Tro^{2}f'o-pla^{2}st. From τροφός, a feeder, and πλάσσειν, to form. Of Meyer, a plastid or leucite. [α, 35.]

TROPHOPYLE (Fr.), n. Tro-fo-pel. See HÉTÉROPYLE.

TROPHOSOME, n. Tro^{2}f'o-som. From τροφή, nourishment, and σῶμα, the body. A collective term for the assemblage of the nutritive zooids of a hydrozoon. [B, 28 (α, 27).] Cf. GONOSOME.

TROPHOSPERM, n. Tro^{2}f'o-spu^{5}rm. Lat., *trophosperma, trophospermium* (from τροφή, nourishment, and σπέρμα, seed). Fr., *trophosperme.* See PLACENTA (4th def.).

TROPHOSPHERE, n. Tro^{2}f'o-sfer. From τροφή, nourishment, and σφαῖρα, a sphere. A zone of modified cellular tissue interposed between the decidual stroma and the blastocyst. [Hubrecht, "Quart. Jour. of Micr. Sci.," xxx, p. 332 (J).]

TROPHOTROPISM, n. Tro^{2}f-o^{2}t'ro^{2}p-i^{2}z'm. From τροφή, nourishment, and τρέπειν, to turn. Fr., *trophotropisme.* A tendency to motion induced in the particles of protoplasm by the presence of nutritive material near it. [Stahl, "Bot. Ztg.," 1884, pp. 145, 161, 187; "Proc. of the Roy. Micr. Soc.," 1884, p. 603 (B).]

TROPIC ACID, n. Trop'i^{2}k. Fr., *acide tropique.* Ger., *Tropasäure.* An acid, $C_9H_{10}O_3 = C_6H_5.CH(CH_2.OH)CO.OH$, obtained by decomposing atropine or hyoscyamine with baryta water or in other ways; colorless acicular or tabular crystals. [B, 3, 270 (α, 38).]

TROPIDIN, n. Tro^{2}p'i^{2}d-i^{2}n. Fr., *tropidine.* Ger., *T.* A substance, $C_8H_{13}N$, obtained by heating atropine to 180° C. with hydrochloric and glacial acetic acids; an oily liquid of intoxicating odor similar to that of coniin. [B, 93 (α, 14).]

TROPIDONOTUS (Lat.), n. m. Tro^{2}p-i^{2}d-o(o^3)-not'u^{3}s(u^{4}s). From τρόπις, a keel, and νῶτος, the back. Fr., *tropidonote.* Ger., *Wassernatter.* A genus of fresh-water *Colubrina.* [α, 35.]—**T. natrix.** Ger., *gemeine Natter, Ringelnatter.* Common ring snake; a non-venomous European serpent. Its fat, *axungia serpentum,* which resembles fish-oil, was formerly official. The entire animal, dried, has been used in place of vipers. [α, 35.]

TROPIN, n. Trop'i^{2}n. Fr., *tropine.* Ger., *T.* A body, $C_8H_{15}NO = C_5H_7(C_2H_4.OH)N(CH_3)$, of peculiar tobacco-like odor, obtained by decomposing atropine with baryta water, occurring as tabular crystals. [B, 270 (α, 38).]

TROPOMÈTRE (Fr.), n. Tro-po-me^{2}tr'. From τρέπειν, to turn, and μέτρον, a measure. An instrument devised by Broca for measuring the degree of torsion of the shaft of the humerus. See ANGLE *of torsion.*

TROU (Fr.), n. Tru. See FORAMEN and HOLE.—**T. anonyme.** See *Stylo-mastoid* FORAMEN.—**T's auditifs.** See *Auditory* CANALS.—**T. borgne.** See FORAMEN *cæcum.*—**T. carotidien.** See *Carotic* FORAMEN.—**T. central.** See FOVEA *centralis.*—**T's condyliens.** See *Anterior condylar* FORAMEN and *Posterior condylar* FORAMINA.—**T. de Botal.** See FORAMEN *of Botallo.*—**T. déchiré.** See FORAMEN *lacerum.*—**T. déchiré antérieur.** See *Sphenoidal* FISSURE.—**T. déchiré postérieur.** See FORAMEN *lacerum posterius.*—**T's de conjugaison.** See *Intervertebral* FORAMINA.—**T. de Ferrein.** See *Stylo-mastoid* FORAMEN.—**T's de l'oreille.** See *Auditory* CANALS.—**T. de Magendie.** See FORAMEN *of Magendie.*—**T. de Monro.** See FORAMEN *of Monro.*—**T. du milieu.** In Normandy, the habit of taking alcoholic drinks at the middle of a meal, to renew the appetite. [Dujardin-Beaumetz, "Gaz. hebd. de méd. et de chir.," Nov. 6, 1885, p. 733.]—**T. du nerf maxillaire.** See FORAMEN *ovale* (2d def.).—**T. du nerf sus maxillaire.** See FORAMEN *rotundum.*—**T. épineux.** See FORAMEN *spinosum.*—**T. ethmoïdal, T. fronto-ethmoïdal.** See *Fronto-ethmoid* FORAMEN.—**T. grand rond.** See FORAMEN *rotundum.*—**T. ischio-pubien** [Verneau]. See *Obturator* FORAMEN.—**T. jugulaire.** See FORAMEN *lacerum posterius.*—**T. labyrinthique.** See *Internal auditory* CANAL.—**T. mastoïdien.** See *Mastoid* FORAMEN.—**T. maxillaire inférieur.** See FORAMEN *ovale* (1st def.).—**T. maxillaire supérieur.** See FORAMEN *rotundum.*—**T. mentonnier.** See *Inferior dental* FORAMEN.—**T. nourricier.** See *Nu-*

trient FORAMEN.—**T. obturateur.** See *Obturator* FORAMEN.—**T. occipital.** See FORAMEN *magnum*.—**T. optique.** See *Optic* FORAMEN.—**T. orbitaire inférieur.** See *Infra-orbital* FORAMEN.—**T. orbitaire interne.** See *Anterior ethmoidal* CANAL.—**T. orbitaire supérieur.** See *Supra-orbital* FORAMEN.—**T. ovalaire, T. oval.** See FORAMEN *ovale* (1st def.) and *Obturator* FORAMEN.—**T. ovale de Pacchioni.** The opening in the tentorium through which the crura centri pass. [L, 31.]—**T. pariétal.** See *Parietal* FORAMEN.—**T. petit rond.** See FORAMEN *spinosum*.—**T. rhachidien.** See *Vertebral* FORAMEN.—**T. rond.** See FORAMEN *rotundum*.—**T's sacrés antérieurs.** See *Anterior sacral* FORAMINA.—**T's sacrés postérieurs.** See *Posterior sacral* FORAMINA.—**T's sciatiques.** See *Great sacro-sciatic* FORAMEN and *Small sacro-sciatic* FORAMEN.—**T. sourcilier.** See *Supra-orbital* FORAMEN.—**T. sous-orbitaire.** See *Suborbital* FORAMEN.—**T. sous-pubien.** See *Obturator* FORAMEN.—**T. sous-temporal, T. sphéno-épineux.** See FORAMEN *spinosum*.—**T. sphéno-palatin.** See *Spheno-palatine* FORAMEN.—**T. stylo-mastoïdien.** See *Stylo-mastoid* FORAMEN.—**T. sus-orbitaire.** See *Supra-orbital* FORAMEN.—**T. vitellaire.** See *Vitellar* HOLE.

TROUGH, n. Tro^{2}f. A receptacle, usually oblong in shape, for water and other liquids. [α, 48.]—**Hydrargyropneumatic t.** See CUVE *hydrargyropneumatique*.—**Pneumatic t.** Fr., *cuve hydropneumatique*. A t. by means of which gases can be collected and isolated over water or mercury in inverted vessels. [α, 48.]

TROUSSE (Fr.), n. Trus. A pocket case of surgical instruments. [E.]

TROUSSE-GALANT (Fr.), n. Trus-ga^3-la^{3}n^2. See CHOLERA *morbus*.

TROUSSEAU (Fr.), n. Tru-so. See FASCICULUS.—**T. musculeux.** A thin muscular layer. [L, 41 (α, 14).]

TROUTS, n. Tru^6'u^{4}tz. In Ireland, a form of chloasma occurring among the poor who use turf fires. [G.] Cf. EPHELIS *ab igne*.

TRÜBE (Ger.), adj. Tru^{6}b'e^2. See CLOUDY.

TRÜBSINN (Ger.), n. Tru^{6}b'zi^{2}n. See MELANCHOLIA.

TRÜBUNG (Ger.), n. Tru^{6}b'un^2. Cloudiness. [D, 4.]

TRUFFE (Fr.), n. Tru^{6}f. See TUBER.—**T. à l'ail.** See TUBER *griseum*.—**T. blanche.** See TUBER *griseum* and CHOIROMYCES *magnus*.—**T. d'eau.** See TRAPA *natans*.—**T. de cerf.** See ELAPHOMYCES *cervinus*.—**T. d'hiver.** See TUBER *cibarium*.—**T. douce.** See IPOMŒA *batatas*.—**T. jaune.** See ELAPHOMYCES *cervinus*.—**T. noire.** See TUBER *cibarium*.

TRÜFFEL (Ger.), n. Tru^{6}f'fe^{2}l. See TUBER.—**Aechte T., Essbare T.** See TUBER *cibarium*.—**Graue T.** See TUBER *griseum*.—**Hirscht'.** See ELAPHOMYCES *cervinus*.—**Schwarze T., Schweinet'.** See TUBER *cibarium*.

TRUFFLE, n. Tru^{2}fl. See TUBER.—**English t.** See TUBER *œstivum*.—**False t's.** The *Hypogœi* (see under HYPOGÆOUS). [α, 35.]—**French t.** See TUBER *melanosporum*.—**Red t.** See TUBER *rufum* and MELANOGASTER *variegatus*.

TRUGDOLDE (Ger.), n. Trug'do^{3}ld-e^2. See CYME.

TRUGGEBILD (Ger.), n. Trug'ge^2-bi^{2}ld. See PHANTOM.

TRUGSTIEL (Ger.), n. Trug'stel. See PSEUDOPODIUM (1st def.).

TRUGWAHRNEHMUNG (Ger.), n. Trug'va^{3}r-nam-un^2. See HALLUCINATION.

TRUMBUS (Lat.), n. m. Tru^{3}mb(tru^{4}mb)'u^{3}s(u^{4}s). See THROMBUS.

TRUMPET, n. Tru^{3}mp'e^{2}t. Gr., σάλπιγξ. Lat., *salpinx, tuba, cornu*. Fr., *trompette*. Ger., *Trompete*. A musical wind-instrument in which the sound issues through a flaring opening; also any t.-like instrument or apparatus. [α, 48.]—**Ear-t.** An instrument, usually of metal or of vulcanite, having a flaring mouth-piece or a paraboloid hearing-cup. The latter is a parabolic cup from the focal point of which the sound-waves are collected by a second sound-collector projecting into the cup and connected with the ear-piece. [F.]—**Falloppian t.** See OVIDUCT.

TRUNCATE, TRUNCATED, adj's. Tru^{3}n^{2}k'at, -at-e^{2}d. Lat., *truncatus* (from *truncare*, to mutilate). Fr., *tronqué*. Ger., *gestutzt, abgestutzt, abgeschnitten, abgestumpft*. Lopped, ending abruptly as if cut off. [α, 35.]

TRUNCUS (Lat.), n. m. Tru^{3}n^{2}k(tru^{4}n^{2}k)'u^{3}s(u^{4}s). See TRUNK.—**T. anonymus.** 1. See *Innominate* ARTERY. 2. In the pl., *trunci anonymi*, see *Innominate* VEINS.—**T. anonymus iliacus.** See *Common iliac* ARTERY.—**T. arteriosus.** See *Cardiac* AORTA.—**T. bicaroticus.** An anomalous branch of the arch of the aorta from which the common carotid arteries spring. [L, 332.]—**T. brachialis.** See *Brachial* ARTERY.—**T. brachialis primarius inferior.** The cord formed by the union of the anterior branches of the eighth cervical or first dorsal nerve. [L.]—**T. brachialis primarius medius.** The anterior branch of the seventh cervical nerve. [L.] Cf. *Brachial* PLEXUS.—**T. brachialis primarius superior.** The cord formed by the union of the anterior branches of the fifth and sixth cervical nerves. [L.] Cf. *Brachial* PLEXUS.—**T. brachicephalicus, T. brachiocephalicus.** See *Innominate* ARTERY.—**T. bronchomediastinalis dexter.** A branch of the right lymphatic duct into which the vasa efferentia of the bronchial and mediastinal glands and the internal mammary lymphatics empty. [L, 332.]—**T. cervicalis (posterior) profundus nervi sympathici.** See *Vertebral* PLEXUS.—**T. cœliacus.** See *Cœliac* ARTERY.—**T. communis pedunculorum cerebelli.** See CORPUS *denticulatum*.—**T. corporis callosi.** See CORPUS *corporis callosi*.—**T. costocervicalis.** See *Costo-cervical* ARTERY.—**Trunci encephali.** See CRURA *cerebri*.—**T. facialis efferens.** A loop of communication between the adducens nucleus and the roots of the facial nerve near their exit from the medulla. [L, 31.]—**T. innominatus.** See *Innominate* ARTERY.—**T. intestinalis.** See *Cœliac* ARTERY.—**T. lumbosacralis.** See *Lumbo-sacral* CORD.—**T. lumbalis.** See *Lumbar lymphatic* TRUNK.—**T. lymphaticus abdominalis.** A large abdominal branch of the thoracic duct. [L.]—**T. lymphaticus (communis) dexter.** See *Right lymphatic* DUCT.—**T. lymphaticus communis sinister.** See *Thoracic* DUCT.—**T. lymphaticus jugularis dexter.** A lymphatic receiving the vasa efferentia of the right side of the head and neck, and emptying into the right lymphatic duct. [L, 332.]—**T. lymphaticus jugularis sinister.** A lymphatic receiving the vasa efferentia of the left side of the head and neck, and emptying into the thoracic duct. [L, 332.]—**T. lymphaticus lumbalis.** See *Lumbar lymphatic* TRUNK.—**T. lymphaticus major.** See *Thoracic* DUCT.—**T. lymphaticus minor.** See *Right lymphatic* DUCT.—**T. lymphaticus sinister.** See *Thoracic* DUCT.—**T. medullæ spinalis.** See CAUDEX *cerebri*.—**T. medullaris cerebelli.** See CORPUS *denticulatum*.—**T. subclavius.** See *Axillary lymphatic* TRUNK.—**T. tibio-peroneus.** The posterior tibial artery above the peroneal artery. [L.]—**T. venosus alveolaris.** See *Deep facial* VEIN.

TRUNK, n. Tru^{3}n^{2}k. Gr., στέλεχος. Lat., *truncus*. Fr., *tronc*. Ger., *Stamm*. The stem of a tree; the main body or stem of any branched structure; the body as distinguished from the limbs and head. [α, 17; α, 48.]—**Axillary lymphatic t.** The exterior branch of the right lymphatic duct, formed by the vasa efferentia of the axillary glands. [L.]—**Intestinal lymphatic t.** A lymphatic receiving the vasa efferentia of the mesenteric glands. [L.]—**Lumbar lymphatic t.** A large vessel which is formed by the union of the efferent vessels from the lumbar lymphatic glands, and empties into the thoracic duct or one of its branches. [L.]—**Lymphatic t's.** Large lymphatics formed by the union of the vasa efferentia of the lymphatic glands. [L.]—**Primary t's of the brachial plexus.** The primary cords which make up the brachial plexus. [L.]

TRUNKENHEIT (Ger.), n. Tru^{2}nk'e^{2}n-hit. See DRUNKENNESS and INTOXICATION (2d def.).]

TRUNKSUCHT (Ger.), n. Tru^{2}nk'zuch^{2}t. See *Chronic* ALCOHOLISM and DIPSOMANIA.

TRUSKAWICE, n. A place in Galicia, Austria, where there are saline and chalybeate springs and a sulphurous spring. [α, 14.]

TRUSS, n. Tru^{3}s. Lat., *subligaculum, subligatura*. Fr., *brayer*. Ger., *Bruchband, Bauchcompresse*. A pad and bandage or spring for keeping parts in place, especially a hernia. [E.]—**Carotid t.** A t. for compressing the carotid artery. [J. L. Corning, "Med. Record," Feb. 18, 1882.]—**French t.** A single or double t. for inguinal hernia which exerts pressure by the elasticity of the steel band that supports the pad. [E.]—**Hainsby's t.** A t. used for approximating the edges of the wound after the operation for harelip. [E.]—**Suspensory t.** Ger., *Heberband*. A suspensory bandage. [α, 34.]

TRUXILLIC ACID, n. Tru^{3}x-i^{2}l'i^{2}k. From *Truxillo*, the commercial source of coca. An acid, $C_9H_8O_2$, derived from cocaine. Three isomeric varieties are known, α-, β-, and γ-*t. a.*, formerly known as γ-, δ-, and ε-*isatropic acid*. ["Ann. di chim. e di farmacol.," July, 1890, p. 39 (B).]

TRYMA (Lat.), n. n. Trim(tru^{6}m)'a^3. Gen., *trym'atos (-atis)*. From τρῦμα, a hole. A drupaceous fruit with a thick epicarp which at length separates from a bony nucleus, as in the walnut. [α, 35.]

TRYPANON (Lat.), n. n. Tri^{2}p(tru^{6}p)'a^{2}n(a^{3}n)-o^{2}n. Gr., τρύπανον (from τρυπᾶν, to bore). See TREPHINE.

TRYPESIS (Lat.), n. f. Tri^{2}p(tru^{6}p)-e(a)'si^{2}s. Gen., *-es'eos (-is)*. Gr., τρύπησις (from τρυπᾶν, to bore). Fr., *trypèse*. See TREPHINING.

TRYPETA (Lat.), n. f. Tri^{2}p(tru^{6}p)-et(at)'a^3. From τρυπητής, a borer. A genus of flies the larvæ of various species of which are very destructive to fruit. [α, 48.]

TRYPETHELIUM (Lat.), n. n. Tri^{2}p(tru^{6}p)-e^2-thel(thal)'i^2-u^{3}m(u^{4}m). From τρυπᾶν, to bore, and θηλή, a nipple. Fr., *trypéthélie*. Ger., *Löchervarzenflechte*. A genus of the *Trypetheliaceœ* (or *Trypethelidœ*), which are a cohort of lichens. [α, 35.]—**T. ocellatum, T. olivaceo-fuscum.** Species found on Angustura-bark. [α, 35.]—**T. Sprengelii.** A species occurring on cascarilla-bark. [α, 35.]—**T. verrucosum.** A species found on ordinary Loxa-bark. [α, 35.]

TRYPHERA (Lat.), n. f. Tri^{2}f(tru^{6}f)-er(ar)'a^3. From τρυφερός, dainty. Fr., *tryphère*. A certain old cosmetic electuary. [L, 50.]

TRYPSIN, n. Tri^{2}p'si^{2}n. Fr., *trypsine*. Ger., *T.* A soluble proteolytic ferment which may be separated from the pancreatic juice and which acts in many respects like pepsin, but differs from it in being most potent in a neutral or slightly alkaline medium. The physiological difference between the two is not well understood, but it is now supposed that t. is even more powerful in digesting proteids than pepsin. The products of peptic and tryptic digestion differ, leucine and tyrosine being much the more prominent in tryptic digestion. [J.]

TRYPSINOGEN, n. Tri^{2}p-si^{2}n'o-je^{2}n. The zymogen of the pancreas, from which trypsin is formed. [L.]

TRYPTIC, adj. Tri^{2}pt'i^{2}k. Pertaining to trypsin. [α, 48.]

TRYPTONE, n. Tri^{2}p'ton. Of Kühne, a peptone produced by the action of trypsin upon albuminates. [B, 270 (α, 38).]

TSCHELTIK (Jav.), n. The *Strychnos tieute* or the poison (*upas tieute*) prepared from it. [α, 35.]

TSETSE, n. Tse^{2}t'se^2. Fr., *tsé-tsé*. See GLOSSINA *morsitans*.

TSIN, n. See ARRACK.

TSUCHIAKABI (Jap.), n. The fruit capsule of an orchid indigenous to Japan, used in affections of the urinary tract. ["Therap. Gaz.," Mar., 1886, p. 212.]

TUBA (Lat.), n. f. Tu²b(tu⁴b)'a³. Ger., *T.* See TUBE (1st and 2d def's).—**T. aristotelica, T. Eustachii.** See *Eustachian* TUBE. —**T. falloppiana.** See OVIDUCT.—**T'mündung** (Ger.). The orifice of a tube (*e. g.*, the Falloppian tube).—**T. uteri** [Falloppius], **T. uterina.** See OVIDUCT.

TUBAGE (Fr.), n. Tu⁶-ba³zh. From *tuba*, a tube. The introduction of a tube (*e. g.*, a catheter). [α, 48.]—**T. du larynx, T. of the glottis.** See INTUBATION *of the larynx.*

TUBAL, adj. Tu²'b'l. Pertaining to a tube (*e. g.*, the oviduct).

TUBE, n. Tu²b. Gr., σῦριγξ (1st and 3d def's), σάλπιγξ (2d def.). Lat., *tubus* (1st and 3d def's), *tuba* (1st and 2d def's). Fr., *t.* (1st def.), *trompe* (2d def.), *tuyau* (2d def.). Ger., *Rohr* (1st def.), *Röhre* (3d def.), *T.* 1. A tubular canal. 2. A trumpet-shaped canal (*e. g.*, the Falloppian t.). 3. In botany, any hollow elongated part. [α, 35.] —**Absorption t.** A graduated glass t., about 250 mm. long and 20 mm. in diameter, closed at one end and furnished with a lip at its open end; used in Bunsen's method of volumetric analysis of gases, for collecting gas and transferring it to the eudiometer. [A, 1.]—**Air-t.** Ger., *Luftröhre.* 1. The entire length of the larynx, trachea, bronchi, and bronchial t's. 2. The abdominal trachea in the aquatic larvæ of certain insects. 3. A bronchial t. [D, 90.]—**Alimentary t.** See *Alimentary* CANAL.—**Alisphenoid t.** See *Alisphenoid* CANAL.—**Ambulacral t's.** Short lateral t's, protrusible at will, which pierce the ambulacral pores of certain *Annuloida* and communicate internally with the circular canal. [L, 147.]—**Auscultation t.** A t. for testing the hearing power. It consists of three arms, two of which are to be placed in the patient's auditory canals, the third in the observer's ear. If then a vibrating tuning fork is placed on the patient's vertex, the auscultator can perceive the sound of the fork streaming from the patient's ears. [F.]—**Bellocq's t.** See *Bellocq's* CANNULA.—**Binocular t.** The t. of a binocular microscope. [α, 34.]—**Bronchial t's.** The branches into which the bronchi divide and from which the smaller t's (bronchioles) spring which communicate with the pulmonary alveoli. [L.]—**Calcigerous t's.** See *Dentinal* CANALS.—**Capillary t.** Ger., *Haarröhrchen.* See CAPILLARY (3d def.).—**Chaussier's t. for insufflation** (catheterism of the larynx). A tapering metallic t., 18 to 20 ctm. long, as large as a urethral catheter, slightly flattened at the sides. The large end is trumpet-shaped, to facilitate blowing into it. The other end is flattened and pierced with a hole at each side. This end is curved to facilitate its introduction into the larynx, and at the proper point in the curve there is a collar, also pierced with holes, for attaching some soft material for the purpose of closing the opening of the larynx. [A, 15.]—**Chloride-of-calcium t.** A t. containing chloride of calcium; used in chemical manipulation for absorbing aqueous vapor.—**Collecting t.** See *Collecting* TUBULE.—**Communicating t.** See *Second convoluted* TUBULE.—**Dentinal t's.** See *Dentinal* CANALS.—**Depaul's t. for insufflation** (catheterism of the larynx). The same as Chaussier's, except that it has a terminal opening, but no holes at the sides. [A, 15.]—**Drainage t.** Fr., *t. à drainage.* A t. of soft rubber or other material perforated at one end with small holes, to be introduced into a wound or suppurating cavity to allow of the escape of fluids. [E.]—**Draw t.** A t. sliding within the main t. of a microscope, used to increase or diminish the t. length. [α, 34.]—**Dropping t., Drop t.** Cf. *Drop* BOTTLE and PIPETTE.—**Egg t's.** See *Ovarian t's.*—**Emmet's fistula t.** A slightly conical, horn-shaped t. for draining a fistula. [α, 34.]—**Esbach's t.** See ALBUMINIMETER.—**Endothelial t.** See *Cellular* COAT.—**Esmarch's elastic t.** A round or flattened gum-elastic t. with a hook at one end and a chain at the other; used for making a limb bloodless. [E; α, 34.]—**Eudiometer t.** See EUDIOMETER (2d def.).—**Eustachian t.** The canal which connects the pharynx and the tympanic cavity and by which an exchange of air takes place between the atmosphere and that cavity. Its position is oblique, almost exactly midway between the horizontal and the vertical. It is partly osseous and partly cartilaginous, its entire length being from 34 to 36 mm., of which the cartilaginous portion forms two thirds. The osseous portion, bounded above by the canal of the tensor tympani and below by the carotid canal, is a prolongation of the anterior portion of the tympanic cavity, directed inward. Its lumen is about 2 mm. wide. The cartilaginous portion is attached to the rough, irregular, and oblique margin of the anterior extremity of the osseous portion. This portion is not cartilaginous throughout, the groove-like cartilage being formed into a canal by a membranous plate. [F, 32.]—**Excretory t's.** See *Excretory* TUBULES.—**Falloppian t.** See OVIDUCT.—**Geissler's t.** An apparatus by means of which the various striæ are shown which are produced by an electric discharge through highly rarefied gases. [α, 48.]—**Germ t.** A t. produced by the distention of the endospore in the germination of a spore. [α, 35.]—**Hæmal t.** See *Hæmal* CANAL.—**Hearing t.** Fr., *t.* (ou *tuyau*) *acoustique.* Ger., *Hörrohr.* An instrument for the use of deaf persons in conversation. It consists of a t., two to three feet long, made of a closely pressed spiral wire incased in a layer of leather and covered with a closely-spun woolen or silk tissue. Its olive-shaped ear-piece, for insertion into the external auditory meatus, is either straight or angularly curved. Its mouth-piece has the form of a cup or of a common speculum. [F, 32.]—**Henle's loop t.** Fr., *anse de Henle.* Ger., *schleifenförmige Harnkanälchen, Henle'sche Schleife.* The part of a uriniferous tubule extending from the renal cortex a short distance into the papillary portion of the kidney and then forming a U-shaped loop and returning to the cortical portion. The proximal part of the loop t. (descending loop-t.) is continuous with the spiral tubule at the level of the boundary layer of the kidney. Its course is straight and its lumen distinct and lined with a layer of flattened nucleated cells. After extending for a short distance into the papillary portion of the kidney, the tubule becomes looped, forming Henle's loop, and returns to the renal cortex as the ascending loop-t., parallel with the descending loop-t. After reaching the cortex its course becomes irregular, and it finally passes into the second or distal convoluted tubule. The ascending loop-t. is larger than the descending, and its lining cells are polyedral and fibrillated. [J, 30, 32, 35.]—**Intestinal t.** See *Intestinal* CANAL.—**Kobelt's t's.** In the paroophoron, vestiges of the ducts in the Wolffian bodies. [L, 142, 201.]—**Lieberkühnian t's.** See CRYPTS *of Lieberkühn.*—**Lobular bronchial t's.** See BRONCHIOLES.—**Loop-t.** See *Henle's loop-t.*—**Lymph t's.** The lymphatic vessels. [α, 34.]—**Medullary t.** In embryology, the medullary or neural canal, the primary form of the brain and spinal marrow, formed by the union of the medullary ridges over the medullary groove. [A, 5.]—**Medullary t's.** See *Lymphoid* CORDS.—**Microscopic t.** The cylindrical metal t., blackened on its internal surface, that contains the objective, eye-piece, and draw-t., if there is one, of a microscope. [α, 34.] —**Milk t's.** Lactiferous ducts. [L.]—**Muscle t.** See *Muscular* FIBRE.—**Nerve t.** An elementary nerve-filament. [I, 64 (K).]—**Neural t.** See *Medullary t.*—**O'Beirne's t.** A long rubber t. for irrigation of the colon. [α, 34.]—**Œsophageal t.** A long t., made of rubber or other material, used for lavage. [α, 34.]—**Ovarial t's, Ovarian t's.** Fr., *cordons glanduleux.* Ger., *Eiketten.* Ovular (or egg-) chains; germinal epithelium in a developing ovary; divided into t's or chain-like masses by vascular ingrowths from the ovarian stroma. [J, 1, 30, 35.]—**Peptic t's.** See *Gastric* GLANDS.—**Perforating t's.** Of Tomes and De Morgan, structures in bone which appear to be uncalcified Sharpey's fibres. [J, 35.]—**Perithelial t.** [Auerbach]. See *Cellular* COAT.—**Pflüger's salivary t's.** Ducts within the lobules of a salivary gland. [L.]—**Pflüger's t's.** See *Ovarian t's.*—**Pituitary t.** See HYPOPHYSIS *cerebri.*—**Pollen t.** A slender t. formed by a protrusion of the inner wall of a pollen cell, extending into the tissues of the style (or, in gymnosperms, directly into the tissue of the nucellus), and eventually fertilizing the ovule. [B, 229, 291 (α, 35).]—**Principal t's.** See *Excretory* TUBULES.—**Prolapsus t.** A t. devised by Whitehead for patients to introduce into the vagina for the purpose of inserting medicinal substances, mainly in cases of prolapse of the uterus. [A, 37.]—**Pulp t's.** T.-like masses of the proper substance of an organ (*e. g.*, of the spleen). [J, 21.]—**Receiving t. of the kidney.** See *Collecting* TUBULE.—**Respiratory bronchial t's.** See BRONCHIOLES.—**Rectal t.** An elastic gum t. to be passed into the rectum. [E.]—**Ribemont's laryngeal t.** A hook t. for laryngeal insufflation in asphyxia neonatorum. [α, 34.]—**Safety-t.** A small part of the upper portion of the Eustachian t. which lies in the curve formed by the cartilage as it turns forward under the cartilaginous hook. It is always sufficiently open to allow a recoil of air to occur from the drum cavity if the drumhead is suddenly driven in, as in explosions, and also to permit of a slow equalization of pressure in the tympanic cavity from the pharynx. [F.] —**Segmental t's.** The t's which lead to the segmental duct.—**Sieve-t.** See *Sieve*-CELL.—**Speaking t.** Ger., *Sprachrohr.* See *Hearing t.*—**Spray t.** A combination of two t's with fine nozzles placed at right angles so that a current of air or steam through one will cause a spray of fluid to issue from the other. [α, 34.]—**Stomach t.** See *Œsophageal t.*—**Straight t.** See *Collecting* TUBULE.—**Toynbee's auscultation t.** See *Toynbee's* OTOSCOPE.—**Toynbee's conical metal t.** A small t., slightly bent at the point, used for washing out the mastoid antrum or the cavity of the middle ear. [F.]—**Toynbee's diagnostic t.** See *Toynbee's* OTOSCOPE.—**Trachea t.** See *Trachea* CANNULA.—**T. à dégagement** (Fr.). A t. for the liberation of gases which have been developed in an apparatus. [B.]—**T's à ressort** (Fr.). See *Seminiferous* TUBULES.—**T. contourné** (Fr.). See *First convoluted* TUBULE.—**T. de Bellocq** (Fr.). See *Bellocq's* CANNULA.—**T. de sureté** (Fr.). See *Safety-t.* —**T. encéphalo-rhachidien** (Fr.). See *Medullary t.*—**T'nerweiterer** (Ger.). See ABDUCTOR *of the Eustachian t.*—**T'nfimbrien** (Ger.). See MORSUS *Diaboli.*—**T'nkatarrh** (Ger.). Catarrh of the oviduct. See SALPINGITIS.—**T'nmündung** (Ger.). The aperture of a canal. [L, 115.]—**T'ntrichter** (Ger.). See MORSUS *Diaboli.*—**T.-length.** The length of a microscope tube, measured from the upper surface of the setting of the objective to the upper margin of the body tube on which the eye-piece rests. ["N. Y. Med. Jour.," Mar., 1887, p. 324 (α, 34).]—**T's nerveux à double contour** (ou **à myéline**) (Fr.). See *Medullated* NERVE-FIBRES.—**T's nerveux à simple contour** (Fr.). See *Non-medullated* NERVE-FIBRES.—**T's nerveux blancs (ou de la vie animale)** (Fr.). See *Medullated* NERVE-FIBRES.—**T's nerveux en T.** (Fr.). See *T-form* NERVE-FIBRES.—**T's nerveux sans myéline** (Fr.). See *Non-medullated* NERVE-FIBRES.—**T's of Bellini.** See *Excretory* TUBULES.—**T. of Ferrein.** See *First convoluted* TUBULE.—**T. of the cochlea.** See *Cochlear* CANAL.—**T's plasmatiques** (Fr.). See *Serous* CANALICULI.—**T's séminifères** (Fr.). See *Seminiferous* TUBULES.—**Uriniferous t's, Uriniparous t's.** See *Uriniferous* TUBULES.—**Uterine t.** Ger., *Mutterrohr* (1st def.). 1. A t. for injecting the uterus. 2. A uterine pouch, or diverticulum, in the lower animals. 3. See OVIDUCT.—**Valentin's t's.** See *Ovarian t's.*—**Voltolini's aluminium t.** A small t. of aluminium for insertion in an aperture of the tympanic membrane to keep it open. It is maintained in place by clasping the handle of the malleus with a horseshoe-shaped gold cannula provided with a canal at its greatest convexity. [F, 32.]

TUBER (Lat.), n. n. Tu²b(tub)'u⁶r(e²r). Gen., *tub'eris.* Fr., *tubercule* (1st def.), *truffe* (1st def.). Ger., *Trüffel* (2d def.). 1. A swelling, tumor, or protuberance; in botany (Ger., *Knolle*) a short, thickened underground branch bearing leaf-buds. [G; α, 35.] 2. The typical genus of a division (the *Tuberaceæ* [Fr., *tubéracées*; Ger., *Trüffelpilze*], or *Tuberacei*) of ascomycetous *Fungi* in which the mycelium penetrates the soil and produces tuberous fructifications. Many of them are eaten under the name of truffles. [α, 35.] —**Olfactory t.** See *Olfactory* BULB.—**T. æstivum.** English truffle; an esculent species. [α, 35.]—**T. album.** Ger., *weisse Trüffel.* White (or false) truffle; an esculent species. [α, 35.]—**T. annulare.** See PONS *Varolii.*—**T. anterius.** See *T. cinereum.*—**T. brumale.** See *T. cibarium.*—**T. calcanei.** The tuberosity of the calcaneum. [L, 57 (α, 14).]—**Tubera candicantia.** See CORPUS *albicans* (2d def.).—**T. cervinum.** See ELAPHOMYCES *cervi-*

nus.—**T. cibarium.** Fr., *truffe* (*tubéreuse*, ou *d'hiver*, ou *noire*). Ger., *essbare* (oder *ächte*, oder *schwarze*) *Trüffel*. Earth-ball, true (or black) truffle; an esculent species found in middle and southern Europe, said to be aphrodisiac. [*a*, 35.]—**T. cinereum.** A tract of gray matter which extends from the corpora albicantia to the optic commissure, forming a portion of the floor of the third ventricle. [I, 15 (K).]—**T. corporis callosi.** See SPLENIUM (3d def.).—**T. Eustachii.** See PROMONTORY (2d def.).—**T. exterius.** See EMINENTIA *collateralis*.—**T. frontale.** See *Frontal* EMINENCE.—**Tubera geniculata.** The external and internal geniculate bodies. [I, 30 (K).]—**T. griseum.** Fr., *truffe grise* (ou *à l'ail*, ou *blanche*). An esculent species, of alliaceous odor, found in Italy and France; said to be aphrodisiac. [*a*, 35.]—**T. gulosorum.** See *T. cibarium*.—**T. gutturosum.** See GOÏTRE.—**T. ischii.** See TUBEROSITY *of the ischium*.—**T. magnatum.** Piedmontese (or gray) truffle; an esculent species. [*a*, 35.]—**T. magnum.** See CHOIROMYCES *magnus*.—**T. maxillæ, T. maxillare.** See TUBEROSITY *of the superior maxilla*.—**T. melanospermum.** A French species, much eaten. [B, 61.]—**T. moschatum.** Fr., *truffe musquée*. Ger., *Bisamtrüffel*. A French species with a musk-like odor; sometimes eaten. [*a*, 35.]—**T. nigrum.** See *T. cibarium*.—**T. niveum.** Fr., *truffe blanc-de-neige*. Ger., *schneeweisse Trüffel*. An edible species found in northern Africa. [*a*, 35.]—**T. omentale hepatis.** An elevation on the left lobe of the liver corresponding to the lesser curvature of the stomach. [L, 332.]—**T. omentale pancreatis.** An elevation of the middle portion (corpus) of the pancreas corresponding to the lesser omentum. [L, 332.]—**T. parietale.** See *Parietal* EMINENCE.—**T. rufum.** Fr., *truffe rousse*. Red truffle; found especially in vineyards in Italy, where it is used as food. [*a*, 35.]—**T. supracondyloideum.** A tuberosity on the fibula opposite the inferior end of the internal border of the linea aspera. [L, 115 (*a*, 34).]—**T. supraorbitale.** See *Superciliary* RIDGE.—**T. syphiliticum.** See SYPHILOMA.—**T. tympani.** See PROMONTORY (2d def.).—**T. valvulæ (cerebelli).** See NODULE (2d def.).—**T. verrucosum.** Fr., *ognon*, *oignon*. A callosity, usually developed about the metatarso-phalangeal joint of the great toe.—**T. zygomaticum.** A protuberance on the lower border of the zygoma near the junction of the superior maxilla and the zygomatic projection. [L, 31 (*a*, 34).]

TUBERCLE, n. Tu^{2}b'u^{5}r-k'l. Lat., *tuberculum* (from *tuber* [*q. v.*]). Fr., *tubercule*. Ger., *Tuberkel*, *Höcker*, *Höckerchen*, *Hügel*, *Knolle*, *Knötchen*. 1. In anatomy, a blunt and rounded end of a bone; also a small rounded eminence on a bone or other part. [C.] See also TUBEROSITY. 2. In dermatology, a little nodule in the skin produced by a morbid deposit or growth in the corium or subcutaneous tissue. [G.] 3. In pathology, a small granular body, varying in diameter from $\frac{1}{10}$ mm. to 3 mm. Its consistency is hard, and when fresh it is transparent, but it quickly becomes opaque, and yellowish at the centre. It is usually surrounded by a reddish vascular zone. These characteristics are commonly evident to the naked eye, but may not appear, especially if the granulations are confluent. In the latter case yellowish masses appear which can not be differentiated from a mass of caseous exudate, excepting with the aid of the microscope. When t's are developed in a mass of inflammatory tissue, as often occurs in the pleura and peritonæum, it is not always possible to distinguish them in the embryonal tissue in which they are imbedded. Thus they appear under two forms, the isolated and the confluent. [D, 24.] 4. In botany, (1) a wart or swelling on the surface of a part; (2) a small tuber or tumefied root; (3) of Acharius, see APOTHECIUM *verruciforme*. [*a*, 35.]—**Adductor t. of the femur.** A small sharp projection at the lower termination of the internal supracondylar line of the femur, to which is attached the tendon of the adductor magnus. [C, 3.]—**Amygdaloid t.** A projection in the roof of the descending cornu of the lateral ventricle at its anterior extremity. [I, 15 (K).]—**Anatomical t.** See VERRUCA *necrogenica*.—**Anterior pair of t's.** See NATES (2d def.).—**Anterior t. (of a vertebra).** A t. at the anterior portion of the extremity of the transverse process of certain vertebræ. [L, 142.]—**Anterior t. of the atlas.** A prominence in the middle line upon the anterior arch of the atlas. [L, 332.]—**Anterior t. of the calcaneum.** A rough projection on the inferior anterior surface of the os calcis. [C, 3.]—**Anterior t. of the optic thalamus.** A rounded projection at the anterior extremity of the optic thalamus. [I, 23 (K).]—**Anterior t. of the vagina.** Lat., *tuberculum vaginæ*. A rugose, rounded prominence of the soft parts at the upper part of the orifice of the vagina, behind the meatus urinarius.—**Carotid t.** The anterior t. of the transverse process of the sixth cervical vertebra. [L.]—**Conoid t.** A broad t. on the posterior border of the clavicle at the junction of its middle and outer thirds to which the conoid ligament is attached. [C, 3; L.]—**Cuneate t.** Ger., *dreieckiger Kern des Keilstranges*. Of Schwalbe, a slight projection on the cuneate fasciculus. [I, 15 (K).]—**Cuneiform t.** See *Painful t.*—**Deltoid t.** A prominence upon the anterior border of the clavicle where the deltoideus arises in part. [L, 172.]—**External supracondyloid t.** Lat., *tuberculum supracondyloideum laterale*. A prominence on the outer portion of the posterior surface of the lower end of the femur, from which the plantaris muscle arises. [L, 31.]—**External t.** The most external of three t's at the extremity of the transverse process of several of the dorsal vertebræ. [L, 142.]—**Fibrous t.** T. which has undergone modification chiefly by the formation of connective tissue within the (tuberculous) nodule. [D, 4.]—**Foot-t.** Lat., *parapodium*. A small lateral process, placed one on each side of a segment of an annelid, serving for locomotion. [L, 147.]—**Genial t's.** Double pairs of t's on the inner surface of the inferior maxilla (one pair on each side of the middle line), to which are attached the genio-hyoglossi and the genio-hyoidei muscles. [L, 31, 142, 332.]—**Genital t.** A protuberance of the urino-genital region of the embryo, in front of the cloaca, being the rudiment of the penis or the clitoris. [A, 16.]—**Gray t.** See *Miliary t.*—**Gray t. of Rolando.** An eminence situated between the postero-lateral groove and the prolongation of the column of Burdach. [J, 15 (K).]—**Greater t. of the humerus.** Its greater tuberosity. [G.]—**Hyaline t.** A miliary t. with hyaline degeneration of the reticulum. ["Lancet," 1882, i, p. 283 (*a*, 34).]—**Ilio-pubic t.** 1. See *Ilio-pectineal* EMINENCE. 2. See SPINE *of the pubis*.—**Inferior obturator t.** A prominence opposite to the superior obturator t. on the pubic margin of the obturator foramen. [L, 31.]—**Inferior t.** The lowermost of the three t's on the extremity of the transverse process of several dorsal vertebræ. [L, 142.]—**Infraglenoid t.** An eminence below the glenoid cavity of the scapula, from which the long head of the triceps arises. [L, 31, 332.]—**Internal supracondyloid t.** Lat., *tuberculum supracondyloideum mediale*. A prominence on the inner and posterior surface of the lower end of the femur from which the internal head of the gastrocnemius arises. [L, 31.]—**Internal t.** The innermost of the three t's at the extremity of several of the dorsal vertebræ. [L.]—**Intravascular t.** A t. developed in the intima of a blood-vessel. [*a*, 34.]—**Jugular t.** A ridge on the inner surface of the occipital bone close to the outer wall of the anterior condylar foramen. [L, 31, 332.]—**Lacrymal t.** The little papillary elevation in the inner or nasal third of the margin of the eyelid. In its centre is the opening of the punctum lacrimale. [F.]—**Laminated t.** See NODULE (2d def.).—**Leprous t's.** The t. of tubercular leprosy. [L, 49 (*a*, 14).]—**Lesser t. of the humerus.** Its lesser tuberosity. [L.]—**Lymphoid t.** Of Chiari, a miliary t. that consists of large and small round lymph-like cells. [*a*, 34.]—**Mamillary t's.** See CORPUS *albicans* (2d def.).—**Mental t.** A prominence on the lower border of the inferior maxilla at the point where it changes from the transverse to the more or less antero-posterior direction. [L, 31.]—**Miliary t.** A minute, nearly globular t. occupying the stroma of an organ, and microscopically presenting at its peripheral parts a number of round cells like leucocytes, larger cells near its centre, and giant cells at its centre. [Coats (*a*, 34).]—**Mucous t.** See *Mucous* PATCH.—**Nuchal t.** The spinous process of the seventh cervical vertebra. [L.]—**Olfactory t.** See *Olfactory* BULB and cf. TUBERCULUM *olfactorium*.—**Painful t.** Lat., *tuberculum dolorosum*. Fr., *angiome sous-cutané douloureux*. Of Wood, an isolated t. of a painful character slowly developed in the subcutaneous tissue, usually in the region of the joints. The precise nature of the disease is uncertain. ["Edinburgh Med. and Surg. Jour.," 1812 (G).] Cf. NEUROMA.—**Papillary t. (of the liver).** An overhanging projection of the Spigelian lobe of the liver into the portal fissure. [L, 332.]—**Pathological t.** See VERRUCA *necrogenica*.—**Pearly t's.** See MILIUM (1st def.).—**Pharyngeal t.** See *Pharyngeal* SPINE.—**Pisiform t's.** The corpora albicantia. [J, 6 (K).]—**Plantar t.** A prominence on the metatarsal bone of the great toe to which the tendon of the peronæus longus is attached. [L, 332.]—**Posterior pair of t's.** See TESTES (2d def.).—**Posterior t. (of a vertebra).** A t. at the posterior portion of the extremity of the transverse process of certain vertebræ. [L, 142.]—**Posterior t. of the atlas.** Lat., *tuberculum atlantis posterius*. An elevation or a depression with raised margins on the outer surface in the median line of the posterior arch of the atlas. [L, 31.]—**Posterior t. of the optic thalamus.** An elevation on the postero-lateral ventricular surface of the optic thalamus. [L, 31.]—**Pterygoid t.** A small t. on the internal surface of the inferior maxilla, for the attachment of the internal pterygoid muscle. [*a*, 34.]—**Quadrigeminal t's.** See CORPORA *quadrigemina*.—**Retrograde t.** A calcified t. [*a*, 34.]—**Scalene t.** A t. on the first rib for the attachment of the scalenus anticus. [C.]—**Secondary t.** Of Hamilton, a t. that has followed the softening of a caseous mass, such as occurs in the lung in catarrhal pneumonia. [*a*, 34.]—**Subcutaneous t.** See *Painful t.*—**Superior obturator t.** A flat prominence on the margin of the obturator foramen near the acetabular notch. [L, 31.]—**Supraglenoid t.** A prominence above the glenoid fossa of the scapula from which the long head of the biceps arises. [L, 31.]—**Syphilitic t's.** See *Tubercular* SYPHILODERM.—**T. of a rib.** Lat., *tuberculum costæ*. A prominence on a rib adjoining the neck, directed backward, and articulating with the transverse process of the lower of the two vertebræ which the bone joins. [L, 31, 304.]—**T. of Darwin.** See SPINE *of Darwin*.—**T. of Lower.** A small projection on the wall of the right auricle, between the orifices of the superior and inferior venæ cavæ, only slightly marked in man. [I, 15 (K).]—**T's of Montgomery.** The prominences formed on the surface of the areola of the nipple by the sebaceous glands.—**T. of Rolando.** See *Gray t. of Rolando*.—**T. of Santorini.** An elevation of the mucous membrane of the larynx caused by the cartilage of Santorini. [L, 332.]—**T. of the calcaneum.** See TUBEROSITY *of the calcaneum*.—**T. of the cuboid.** See TUBEROSITY *of the cuboid bone*.—**T. of the epiglottis.** See TUBERCULUM *epiglottidis*.—**T. of the femur.** A prominence on the front part of the neck of the femur where it joins the greater trochanter. [L, 172.]—**T's of the mesencephalon.** See CORPORA *quadrigemina*.—**T. of the quadratus femoris.** See LINEA *quadrati*.—**T. of the radius.** See *Bicipital* TUBEROSITY *of the radius*.—**T. of the scaphoid bone.** A stout conical projection on the outer end of the scaphoid bone, which gives attachment to the annular ligament. [C.]—**T. of the thyreoid cartilage.** A t. at the back part of the upper border of the outer surface of the ala of the thyreoid cartilage. [L, 31.]—**T. of the tibia.** The anterior tuberosity of the tibia. [L.]—**T. of the ulna.** An elevation at the base of the coronoid process of the ulna upon which the brachialis anticus is inserted. [L, 31.]—**T. of the zygoma.** A prominence at the beginning of the zygoma to which the external lateral ligament of the temporo-maxillary articulation is attached. [L, 172.]

TUBERCULAR, adj. Tu^{2}b-u^{5}rk'u^{2}l-a^{3}r. Having the appearance of a tubercle; also tuberculate, tuberculous. [D; *a*, 35.]

TUBERCULATE, TUBERCULATED, adj's. Tu^{2}b-u^{5}rk'-u^{2}l-at, -at-e^{2}d. Lat., *tuberculatus*. Fr., *tuberculé*. Ger., *kleinhöckerig*. Provided with tubercles; also tuberculous. [D; *a*, 35.]

TUBERCULE (Fr.), n. Tu^6-be^{2}r-ku^{6}l. See TUBERCLE.—**T's bijumeaux.** See CORPORA *quadrigemina*.—**T. cendré.** See *Gray* TUBERCLE *of Rolando*.—**T. coracoïdien** [Cuvier]. The

coracoid bone (1st def.) in mammals. [L, 14.]—**T's d'Aranzi.** See Corpora *Arantii.*—**T. de guérison** [Cruveilhier]. See *Fibrous* tubercle.—**T. de l'apophyse.** See Tubercle *of the zygoma.*—**T. de la valvule.** See Nodule (2d def.).—**T. du pubis.** See Spine *of the pubes.*—**T. ischio-pubien interne** [Verneau]. A tubercle situated on the inner surface of the pelvis, at the junction of the descending ramus of the pubic bone and the ascending ramus of the ischium. [A, 50.]—**T. moyen.** A small eminence on the upper surface of the optic thalamus near its middle. [I, 28 (K).]—**T. muqueux.** See Condyloma *latum.*—**T. postérieur.** See Pulvinar (1st def.).—**T's quadrijumeaux.** See Corpora *quadrigemina.*—**T'ssus-sphénoidaux.** See *Clinoid* processes.—**T. tardif à évolution rapide.** See *Tuberculous* osteitis.—**T's vésiculaires.** See *Marginal* bodies.

TUBERCULIN, n. Tu^{2}-bu^{5}rk'u^{2}l-i^{2}n. A preparation invented by R. Koch and considered by him to be a means of diagnosticating and curing tuberculosis. Said by Koch to be an extract made with glycerin of cultures of the tubercle bacillus. It is injected subcutaneously, and is thought to cause destructive inflammation of the tissue surrounding the tuberculous deposit, whereby the deposit is eliminated, with the production of fever. [B, 270 (*a*, 38); *a*, 34.]—**Crude t.** A glycerin extract of the toxic substances present in cultures of the tubercle bacillus in veal broth containing 1 per cent. of peptone and 4 or 5 per cent. of glycerin. The culture liquid is evaporated and filtered. [*a*, 34.]—**Modified t.** Crude t. that has undergone various changes by the precipitation of certain constituents or filtration, or in which the mode of preparation is changed, as in Koch's first modification, in which a precipitate was obtained by adding alcohol to crude t. [*a*, 34.]

TUBERCULITIS (Lat.), n. f. Tu^{2}b(tub)-u^{5}rk(e^{2}rk)-u^{2}l(u^{4}l)-i-(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). Inflammation around a tubercular deposit. [*a*, 34.]

TUBERCULIZATION, n. Tu^{2}b-u^{5}rk-u^{2}l-i^{2}z-a'shu^{3}n. Lat., *tuberculisatio* (from *tuberculum*, a tubercle). Fr., *tuberculisation.* 1. The process of conversion into tubercle (3d def.). [D, 3.] 2. The treatment of a patient with tuberculin.

TUBERCULOCIDIN, n. Tu^{2}b-u^{5}rk-u^{2}l-o-sid'i^{2}n. A substance remaining in solution in crude tuberculin after the noxious bodies in the latter have been precipitated by platinum chloride. It may be precipitated from the solution by alcohol; used in treating tuberculosis. [*a*, 34.]

TUBERCULOSE (Fr., Ger.), n. Tu^{5}-be^{2}r-ku^{6}-loz, tub-e^{2}rk-ul-oz'e^{2}. See Tuberculosis.—**Impft'** (Ger.). See *Inoculated* tuberculosis.—**Inhalationst'** (Ger.). Tuberculosis induced by the inhalation of tuberculous matter. [Bertheau, "Dtsch. Arch. f. klin. Med.," xxvi, 5, 6; "Rev. des sci. méd.," Apr., 1882.]—**Knochent'** (Ger.). See *Tuberculous* osteitis.—**Larynxt'** (Ger.). See *Tubercular* laryngitis.—**Spitzent'** (Ger.). Tuberculosis of a pulmonary apex. [*a*, 34.]—**T. articulaire** (Fr.). See *Tuberculous* osteitis.—**T. aviaire** (Fr.). See *Avian* tuberculosis.—**T. calcifiée** (Fr.). Tuberculosis in which the final pathological condition is a calcification of the deposit. [Déjérine, "Rev. de méd.," Dec., 1884, p. 921.]—**T. caséo-calcifiée** (Fr.). The termination of a tubercular deposit partly by caseification and partly by calcification. [Déjérine, *l. c.*]—**T. entéro-mésentérique** (Fr.). Tuberculosis involving the intestine and mesenteric glands. [*a*, 34.]—**T. pulmonaire anthracosique** (Fr.). See Anthracosis (4th def.).

TUBERCULOSIS (Lat.), n. f. Tu^{2}b(tub)-u^{5}rk(e^{2}rk)-u^{2}l(u^{4}l)-os'i^{2}s. Gen., *-os'eos* (*-is*). From *tuberculum*, a tubercle. Fr., *tuberculose.* Ger., *Tuberculose.* The condition of being affected with tubercle (3d def.).—**Acute miliary t.** A sudden and violent general or local eruption of miliary tubercles in various parts of the body. It may simulate typhoid fever when the infection is general, or acute hydrocephalus when the infection is meningeal, or the pulmonary symptoms are most marked when the lungs are principally affected. [*a*, 34.]—**Anatomical t.** See Verruca *necrogenica.*—**Anthracotic t.** See Pneumonoconiosis.—**Avian t.** T. affecting birds. [*a*, 34.]—**Bovine t.** Fr., *pommelière.* Ger., *Perlsucht, Französenkrankheit der Rinder.* Pearl disease, t. as it occurs in cattle. The lesion appears in nodes consisting largely of giant cells in a coarse reticulum. The nodes are usually much larger than in man, and show less inclination to cheesy degeneration or calcification. [D, 4.]—**Cerebral t.** See *Tubercular* meningitis and *Acute tuberculous* hydrocephalus.—**Inoculated t.** T. produced by inoculation of tuberculous material. [*a*, 34.]—**Intestinal t.** T. affecting a part or all of the intestinal tract. [*a*, 34.]—**Laryngeal t.** See *Tubercular* laryngitis.—**Meningeal t.** See *Cerebral t.*—**Miliary t.** An acute or chronic disease caused by infiltration of one or more parts of the body with miliary tubercles. [*a*, 34.]—**Pseudo-t. cladothrica.** Of Eppinger, a multiple lesion, resembling tubercle, produced by a cladothrix-like organism. [*a*, 34.]—**Pulmonary t.** T. of the lungs, the ordinary form of t.—**Rapid t.** See *Acute miliary t.*—**Renal t.** Tubercular disease of the kidney. It is marked by a sediment of tuberculous matter in the urine, which is supposed to come from the ureters and pelvis of the kidneys, also by paroxysms of severe pain which resemble renal colic, by frequent and scanty urination, by hæmaturia, and by progressive emaciation. [D, 25.]—**Surgical t.** T. affecting a part that is susceptible to surgical interference. [*a*, 34.]—**T. cerebri.** See *Cerebral t.*—**T. cutis.** 1. A tubercular affection of the skin (commonly associated with general t. and usually in its later stages), attended with the formation of superficial, irregular, often serpiginous ulcers with soft, slightly infiltrated, and usually jagged edges and reddish-yellow granular bases often covered by crusts. They are almost invariably situated in the immediate vicinity of one of the mucous orifices. 2. Any disease of the skin due to the presence of tubercle bacilli. In this sense the term is used to include, besides the disease mentioned in the 1st def., lupus t. verrucosa cutis, and scrofuloderma. [G]—**T. of the joints.** Fr., *tuberculose articulaire.* Ger., *Gelenktuberculose.* See *Tuberculous* osteitis.—**T. of the skin.** See *T. cutis.*—**T. panzootica contagiosa.** Of Lydtin, bovine t.—**T. pulmonum.** See *Pulmonary t.*—**T. verrucosa cutis.** A chronic cutaneous disease occurring usually upon the hands of those who work about cattle or handle raw meat. It forms circumscribed patches containing pustules and warty outgrowths, surrounded by an erythematous border and due to the presence of tubercle bacilli. Verruca necrogenica is probably but one form of it. [Riehl and Paltauf, "Vierteljahrschr. f. Dermat. u. Syph.," 1886, p. 19 (G).]—**Zooglœic t.** See *Pseudo-t. cladothrica.*

TUBERCULOTIC, adj. Tu^{2}b-u^{5}rk-u^{2}l-o^{2}t'i^{2}k. Pertaining to or affected with tuberculosis. [D.]

TUBERCULOUS, adj. Tu^{2}b-u^{5}rk'u^{2}l-u^{3}s. Lat., *tuberculosus* (from *tuberculum*, a tubercle). Fr., *tuberculeux.* Ger., *tuberkulös, höckerig.* 1. Affected with, pertaining to, or after the manner of tubercle. [D.] 2. In botany, covered with tubercles. [*a*, 35.]

TUBERCULUM (Lat.), n. n. Tu^{2}b(tub)-u^{5}rk(e^{2}rk)'u^{2}l(u^{4}l)-u^{3}m-(u^{4}m). Dim. of *tuber* (*q. v.*). See Tubercle. In the pl., *tubercula*, of Bateman, an order of skin diseases including phyma, molluscum, vitiligo, acne, sycosis, lupus, elephantiasis, and frambœsia. [G, 12.] See also Gemmulæ *Hobokenii.*—**T. acusticum.** Of Schwalbe, a projection on the lateral wall of the fourth ventricle crossed by the auditory striæ. [I, 17 (K).]—**T. adinosum.** See Molluscum *contagiosum.*—**T. annulare.** See Pons *Varolii.*—**Tubercula anteriora.** The anterior corpora quadrigemina. [I, 23 (K).]—**T. anterius atlantis.** See *Anterior* tubercle *of the atlas.*—**T. anterius thalami optici.** See *Anterior* tubercle *of the optic thalamus.*—**T. anticum humeri.** The lesser tuberosity of the humerus. [L.]—**Tubercula Arantii.** See Corpora *Arantii.*—**Tubercula areolæ.** See Tubercles *of Montgomery.*—**T. articulare ossis temporis.** See *Articular* eminence *of the temporal bone.*—**T. atlantis anterius** (seu **anticum**). See *Anterior* tubercle *of the atlas.*—**T. atlantis posterius** (seu **posticum**). See *Posterior* tubercle *of the atlas.*—**T. baseos cartilagineæ arytænoideæ.** The muscular process of the arytænoid cartilage. [L.]—**Tubercula bigemina.** See Corpora *quadrigemina.*—**T. calcaneum.** See Tuberosity *of the calcaneum.*—**T. capituli fibulæ laterale.** A not uncommon prominence on the upper end of the fibula from which the anterior head of the peronæus longus arises. [L, 332.]—**T. capituli fibulæ mediale.** An ill-defined anomalous prominence on the upper end of the fibula from which a portion of the solæus arises. [L, 332.]—**T. caroticum.** See *Carotid* tubercle.—**T. cartilaginis thyreoideæ.** See Tubercle *of the thyreoid cartilage.*—**T. caudatum.** See Eminentia *caudata.*—**T. cerebelli minimum.** Of Tarini, see Flocculus (2d def.).—**T. cerebri majus.** Of Scarpa, the corpora quadrigemina, especially in the lower animals. [I, 3 (K).]—**T. cerebri olivare.** See Corpora *quadrigemina.*—**T. cervicale inferius.** See *T. colli femoris inferius.*—**T. cervicale superius.** See Tubercle *of the femur.*—**T. chalazinum.** Ger., *Nabelhöckerchen.* A name given to the chalaza (2d def.) when it appears on the perfected ovule (the seed) in the form of a tubercle. [*a*, 35.]—**T. cinereum (Rolandi).** See *Gray* tubercle *of Rolando.*—**T. colli femoris.** See Tubercle *of the femur.*—**T. colli femoris inferius.** A prominence at about the middle of the anterior intertrochanteric line. [L, 332.]—**T. colli femoris superius.** See Tubercle *of the femur.*—**T. costæ.** See Tubercle *of a rib.*—**T. cuboidei.** See Eminentia *ossis cuboidei.*—**T. cuneatum.** See *Cuneate* tubercle.—**T. Darwinii.** See Spine *of Darwin.*—**T. deltoideum.** See *Deltoid* tubercle.—**T. dolorosum.** See *Painful* tubercle.—**T. ephippii.** See *T. sellæ.*—**T. epiglotticum, T. epiglottidis.** Ger., *Kehldeckelpolster.* The projection of the convex posterior surface of the epiglottis into the larynx. [L.]—**T. externum humeri.** The greater tuberosity of the humerus. [L.]—**T. externum processus condyloidei mandibulæ.** A prominence below the condyle of the inferior maxilla to which the ligamentum accessorium laterale is attached. [L.]—**T. fibulæ.** The styloid process of the fibula. [*a*, 34.]—**T. ganglii postici posterius.** See Pulvinar (1st def.).—**T. gummatum.** See Syphiloma.—**T. hemisphæricum.** See Fornix *cerebri.*—**T. iliopectineum.** See *Ilio-pectineal* eminence.—**T. impar** [His]. In the embryo, a prominence in the middle line of the mouth from which the tongue is in part derived. [L, 294.]—**Tubercula intercondyloidea.** The anterior and posterior extremities of the tibial spine. [*a*, 34.]—**T. internum humeri.** The lesser tuberosity of the humerus. [L.]—**T. jugulare.** See *Jugular* tubercle.—**T. labii superioris.** A prominence in the middle line of the inner surface of the upper lip of nurslings. [L, 332.]—**T. laminosum.** See Nodule (2d def.).—**T. laterale.** See *T. acusticum.*—**T. laterale posterius.** See *External geniculate* body.—**T. linearum.** An anomalous protuberance below the external occipital crest. [L, 332.]—**T. Lisfrancii.** See *Scalene* tubercle.—**T. majus humeri.** The greater tuberosity of the humerus. [L.]—**T. mamillæ.** See Corpus *albicans* (2d def.).—**T. mandibulare.** The articular eminence of the temporal bone. [L.]—**T. medium.** The middle projection of the thalamus opticus. [L, 57 (*a*, 14).]—**Tubercula mentalia interna.** See *Genial* tubercles.—**Tubercula mesencephali.** See Corpora *quadrigemina.*—**Tubercula miliaria.** See Milium (1st def.).—**T. minus humeri.** The lesser tuberosity of the humerus. [L.]—**T. nuchæ.** The t. on the occipital bone for the attachment of the ligamentum nuchæ. [*a*, 34.]—**T. obturatorium inferius.** See *Inferior obturator* tubercle.—**T. obturatorium superius.** See *Superior obturator* tubercle.—**T. olfactorium.** A small projection of gray matter in front of the anterior perforated space from which arise the roots of the olfactory nerve. [I, 6 (K).]—**T. opticum.** See Corpora *quadrigemina.*—**T. ossis cuboidei.** See Eminentia *ossis cuboidei.*—**T. ossis hyoidei.** A slight elevation in the middle line of the anterior aspect of the body of the hyoid bone. [L.]—**T. ossis multanguli marjoris.** The prominence on the plantar surface of the trapezium. [L.]—**T. ossis navicularis.** The tuberosity of the scaphoid bone. [L.]—**T. ossis pubis.** See Spine *of the pubes.*—**T. ovale.** See *Olivary* body.—**T. papillare.** See *Papillary*

TUBERCLE.—**T. pharyngeum.** See *Pharyngeal* SPINE.—**T. plantare.** See *Plantar* TUBERCLE.—**Tubercula posteriora.** See TESTES (2d def.).—**T. posterius thalami optici.** See PULVINAR (1st def.).—**T. posterius vertebræ.** See *Posterior* TUBERCLE *of a vertebra.*—**T. prostatæ.** The middle lobe of the prostate gland. [L.]—**T. pterygoideum.** See *Pterygoid* TUBERCLE.—**T. pubicum.** See SPINE *of the pubes.*—**Tubercula quadrigemina.** See CORPORA *quadrigemina.*—**T. Rolandi.** See *Gray* TUBERCLE *of Rolando.*—**T. santorinianum.** See TUBERCLE *of Santorini.*—**T. scaleni.** See *Scalene* TUBERCLE. — **Tubercula sebacea.** See MILIUM (1st def.).—**T. sellæ (equinæ).** An olive-shaped elevation between the optic groove and the sella turcica of the sphenoid bone. [L, 31.]—**T. spinosum ossis sphenoidalis.** The infratemporal crest or a prominence at its anterior extremity. [L, 332.]—**T. superius (anterius).** The anterior tubercle of the optic thalamus. [I, 6 (K)]—**T. superius posterius thalami optici.** See PULVINAR (1st def.). — **T. supracondyloideum externum (seu laterale).** See *External supracondyloid* TUBERCLE.—**T. supracondyloideum mediale.** See *Internal supracondyloid* TUBERCLE.—**T. supracotyloideum.** An anomalous eminence upon the lip of the acetabulum beneath the anterior inferior spine of the ilium. [L, 332.]—**T. supraglenoidale.** See *Supraglenoid* TUBERCLE.—**Tubercula syphilitica.** See *Tubercular* SYPHILODERM.—**T. tali laterale.** An elevation upon the outer margin of the incisura astragali. [L, 332.]—**T. tali mediale.** A prominence upon the inner side of the incisura astragali. [L, 332.]—**T. thalami anterius.** See *Anterior* TUBERCLE *of the optic thalamus.*—**T. thalami inferius (seu internum, seu magnum rotundum, seu posterius).** See PULVINAR (1st def.).—**T. tibiæ.** See SPINE *of the tibia* and *Anterior* TUBEROSITY *of the tibia.* — **T. trochleare.** See TROCHLEA.—**T. tympanicum anticum.** A protuberance on the upper anterior part of the annulus tympanicus. [L, 57 (α, 14).]—**T. tympanicum posticum.** A protuberance on the middle and posterior part of the annulus tympanicus. [L, 57 (α, 14).]—**T. vaginæ.** See *Anterior* TUBERCLE *of the vagina.*—**T. wrisbergianum.** An elevation of the mucous membrane of the larynx caused by the cartilage of Wrisberg. [L, 332.]

TUBER-ISCHIO-TROCHANTERIEN (Fr.), n. Tu^6-be^{2}r-es-ke-o-tro-ka^{3}n^2-ta-re-a^{3}n^2. See QUADRATUS *femoris.*

TUBERIVOROUS, adj. Tu^{2}b-e^{2}r-i^{2}v'o^{2}r-u^{3}s. Lat., *tuberivorus* (from *tuber*, a tuber, and *vorare*, to devour). Fr., *tubérivore.* Ger., *knollenfressend.* Living on tubers, especially truffles. [L.]

TUBERKEL (Ger.), n. Tub-e^{2}rk'e^{2}l. See TUBERCLE.—**Aderhautt'n.** See CHORIOIDITIS *tuberculosa.*—**Darmt'n.** See ENTEROSPHONGIOMA.—**Gekerbte T'n des Scheideneinganges.** See CARUNCULÆ *myrtiformes.*—**Lepröse T. der Regenbogenhaut.** See LEPRA *iridis.*—**Muttert'.** See METROSPHONGIOMA.—**Rückenmarkst'** Tuberculosis of the spinal cord. [α, 34.]—**T'krankheit.** See TUBERCULOSIS.

TUBERKULOSE (Ger.), n. Tub-e^{2}rk-ul-oz'e^2. See TUBERCULOSIS. — **Impft'.** See *Inoculated* TUBERCULOSIS. — **Lymphdrüsent'.** See *Tuberculous* LYMPHADENITIS.

TUBEROSITAS (Lat.), n. f. Tu^{2}b(tub)-e^{2}r-o^{2}s(os)'i^{2}t-a^{2}s(a^{3}s). Gen., *-at'is.* See TUBEROSITY.—**T. atlantis lateralis.** An eminence at the inner margin of that surface of the atlas which articulates with the occipital bone, to which the transverse ligament is attached. [L, 31, 142.]—**T. calcanei, T. calcis.** See TUBEROSITY *of the calcaneum.*—**T. claviculæ.** A roughened eminence on the lower surface of the clavicle, near its sternal end, for the attachment of the costoclavicular ligament. [L.]—**T. coracoidea.** See *Conoid* TUBERCLE.—**T. costalis.** See *T. claviculæ.*—**T. deltoidea.** See *Deltoid* TUBERCLE.—**T. ephippii.** See TUBERCULUM *sellæ.*—**T. glutæalis.** The tubercle on the upper end of the femur for the attachment of the glutæus maximus. [α, 34.]—**T. iliaca, T. ilii.** A rough eminence behind that surface of the ilium which articulates with the sacrum, for the attachment of the sacro-iliac ligaments. [L, 31.]—**T. ischii.** See TUBEROSITY *of the ischium.*—**T. malaris.** A small tuberosity near the maxillary process of the zygomatic bone. [α, 34.]—**T. maxillæ, T. maxillaris.** See TUBEROSITY *of the superior maxilla.*—**T. metacarpi quinti.** A prominent tuberosity on the ulnar side of the fifth metacarpal bone, near its base. [L, 142.]—**T. metatarsi hallucis.** See *Plantar* TUBERCLE.—**T. metatarsi quinti.** A rough prominence upon the external surface of the tarsal end of the fifth metatarsal bone. [L.]—**T. olecrani.** A prominence on the olecranon process into which is inserted the extensor triceps brachii. [L, 31.]—**T. ossis cuboidei.** See TUBEROSITY *of the cuboid bone.*—**T. ossis ilii.** See *T. iliaca.*—**T. ossis navicularis.** See TUBEROSITY *of the scaphoid bone.*—**T. ossis multanguli majoris.** See *T. ossis trapezii.*—**T. ossis palatini.** See *Pyramidal* PROCESS *of the palate bone.*—**T. ossis trapezii.** An oblique ridge on the volar surface of the trapezium. [L.]—**T. palatinus.** A tuberosity formed on the internal surface of the palatine bone, at the angle of the posterior and horizontal borders. [A, 301 (α, 34).]—**T. patellaris.** See *Anterior* TUBEROSITY *of the tibia.*—**T. pectoralis.** A tubercle near the sternal end of the clavicle for the attachment of the pectoralis muscle. [α, 34.]—**T. pubo-ischiadica.** A rough eminence at the union of the rami of the ischium and pubes. [L.]—**T. sacralis.** See TUBEROSITY *of the sacrum.* — **T. scapularis.** See *Conoid* TUBERCLE.—**T. supracondyloidea ossis femoris.** The external or internal supracondyloid tubercle. [L.]—**T. tibiæ.** See *Anterior* TUBEROSITY *of the tibia.*—**T. tympani.** See PROMONTORY (2d def.).—**T. ulnæ major.** A rough eminence at the base of the coronoid process of the ulna, for the attachment of the brachialis internus. [L, 332.]—**T. ulnæ minor.** A small tuberosity occasionally found below the lesser sigmoid cavity of the radius. [L, 332.]—**T. unguicularis phalangis.** A broad, horseshoe-shaped expansion of the distal end of a terminal phalanx. [L.]—**T. vertebralis (medialis).** A rough eminence on the posterior surface of the transverse process (near its apex) of some of the dorsal vertebræ. [L, 31, 332.]—**T. zygomatica.** See TUBERCLE *of the zygoma.*

TUBÉROSITÉ (Fr.), n. Tu^6-ba-ro-ze-ta. See TUBEROSITY.—**T's de l'estomac (grande et petite).** The two extremities of the stomach. [α, 34.]—**T. de l'os palatin.** See *Pyramidal* PROCESS *of the palate bone.*—**T's des condyles.** The internal and external tubercles of the femur. [L.]—**T. du maxillaire.** See TUBEROSITY *of the superior maxilla.*—**T. iliaque.** See TUBEROSITAS *ilii.*—**T. ischiadique, T. sciatique.** See TUBEROSITY *of the ischium.*

TUBEROSITY, n. Tu^{2}b-e^{2}r-o^{2}s'i^{2}t-i^2. Lat., *tuberositas* (from *tuber*, a hump). Fr., *tubérosité.* Ger., *Rauhigkeit.* A rounded or blunt elevation on a bone or other organ. [L.]—**Anterior t. of the tibia.** A t. on the anterior aspect of the tibia, near its upper extremity, for the attachment of the ligamentum patellæ. [C, 3.]—**Bicipital t. of the radius.** A t. on the superior part of the internal aspect of the shaft of the radius to the posterior rough portion of which is attached the tendon of the biceps flexor cubiti. [C, 3.]—**External occipital t.** See *External occipital* PROTUBERANCE.—**External t. of the femur.** A rough eminence above the external t. of the femur to which the external lateral ligament is attached. [L, 142.]—**External t. of the tibia.** A rounded eminence on the external side of the upper end of the tibia which articulates posteriorly with the fibula. [L.]—**Greater t. of the humerus.** Ger., *grösserer Oberarmbeinhöcker.* An upward projection of the humerus on its outer side, separated from the head and lesser t. by grooves and serving as a point of attachment for the infraspinatus, supraspinatus, and teres minor muscles. [L, 31, 142, 332.]—**Internal t. of the femur.** A rough t. above the internal condyle of the femur to which the internal lateral ligament of the knee is attached. [L, 142.]—**Internal t. of the tibia.** A massive rounded eminence on the inner side of the upper end of the tibia. [C, 3.]—**Ischio-pubic t.** See TUBEROSITAS *pubo-ischiadica.*—**Lesser t. of the humerus.** A small t. at the proximal end of the humerus, on the inner side of the bicipital groove, for the attachment of the subscapularis muscle. [L, 142.]—**Maxillary t.** See *T. of the superior maxilla.*—**Pyramidal t. (of the palate bone).** See *Pyramidal* PROCESS *of the palate bone.*—**T. of the calcaneum.** Ger., *Fersenhöcker.* The posterior extremity of the os calcis. [L.]—**T. of the cuboid bone.** A thick, oblique ridge on the inferior surface of the cuboid bone, near its anterior extremity. [L, 31.]—**T. of the ilium.** See TUBEROSITAS *ilii.*—**T. of the ischium.** Ger., *Sitzbeinhöcker, Sitzknorren.* The thick downward projection of the lower portion of the ischium upon which the body rests when sitting. [L.]—**T. of the olecranon.** See TUBEROSITAS *olecrani.*—**T. of the sacrum.** A t. behind and internal to the lateral articular surface of the sacrum. [α, 34.]—**T. of the scaphoid bone.** 1. The prominence of the infero-external portion of the volar surface of the scaphoid bone of the hand. 2. A t. on the lower inner margin of the scaphoid bone of the foot. [L, 31.]—**T. of the superior maxilla.** A rough convexity on the posterior part of the external surface of the superior maxilla. [L.]

TUBEROUS, adj. Tu^{2}b'e^{2}r-u^{3}s. Lat., *tuberosus.* Fr., *tubéreux.* Ger., *knollig.* 1. Resembling a tuber. 2. Bearing tubers.

TUBICOLA (Lat.), n. n. pl. Tu^{2}b(tu^{4}b)-i^{2}k'o^{2}l-a^3. From *tubus*, a tube, and *colere*, to inhabit. Fr., *enfermés.* An order of the *Annelida*, comprising those that live in tube-like structures. [α, 48.]

TUBIFEROUS, adj. Tu^{2}b-i^{2}f'e^{2}r-u^{3}s. Lat., *tubifer* (from *tubus*, a tube, and *ferre*, to bear). Fr., *tubifère.* Ger., *röhrentragend.* Bearing a tube. The *Tubiferæ* of Lindley are a cohort of the *Incompletæ*, comprising the *Santales*, *Daphnales*, *Proteales*, *Lamiales*, and *Peuæales.* [α, 35.]

TUBIFLOROUS, adj. Tu^{2}b-i^2-flor'u^{3}s. Lat., *tubiflorus* (from *tubus*, a tube, and *flos*, a flower). Fr., *tubiflore.* Ger., *röhrenblüthig.* Having a tubular perianth. The *Tubifloræ* are: Of Batsch, a family of the *Coronales*, containing *Narcissus*, *Pancratium*, etc.; of Agardh, a class of the *Phanerocotyledoneæ completæ*, comprising the *Plantagineæ*, *Plumbagineæ*, *Convolvulaceæ*, etc.; of Reichenbach, an order of the *Synpetalæ*, consisting of the *Aggregatæ* and *Campanaceæ*; of Fries, a class of the *Corollifloræ*, including the *Verbenaceæ*, *Asclepiadeæ*, *Solanaceæ*, etc. [α, 35.]

TUBIPORUS (Lat.), n. m. Tu^{2}b(tu^{4}b)-i^{2}p'o^{2}r-u^{3}s(u^{4}s). From *tubus*, a tube, and *porus*, a pore. See BOLETUS.

TUBO-ABDOMINAL, adj. Tu^{2}b''o-a^{2}b-do^{2}m'i^2-n'l. From *tuba*, a trumpet, and *abdomen* (*q. v.*). Pertaining to the abdomen and the oviduct. [L.]

TUBO-OVARIAN, adj. Tu^{2}b-o-ov-ar'i^2-a^{2}n. From *tuba*, a trumpet, and *ovarium*, the ovary. Fr., *tubo-ovarien, tubo-ovarique.* Ger., *tubo-ovarial.* Pertaining to the oviduct and the ovary. [L.]

TUBO-UTERINE, adj. Tu^{2}b-o-u^{2}t'e^{2}r-i^{2}n. From *tuba*, a trumpet, and *uterus* (*q. v.*). Pertaining to the oviduct and the uterus. [L.]

TUBULAR, adj. Tu^{2}b'u^{2}l-a^{3}r. From *tubulus*, a small tube. Fr., *tubulaire.* Ger., *röhrenförmig.* 1. Hollow and nearly cylindrical, tube-shaped. [α, 35.] 2. Of an auscultatory sound, suggestive of one produced by an air-current in a tube (cf. *Tracheal* RESPIRATION [1st def.]). [D.]

TUBULARIA (Lat.), n. f. Tu^{2}b(tu^{4}b)-u^{2}l(u^{4}l)-ar(a^{3}r)'i^2-a^3. From *tubulus*, a small tube. A genus of corals. [α, 35.]—**T. acetabulum.** Ger., *Nadelköcher.* A coral found especially in the Mediterranean Sea on rocks and large crustaceans; formerly used as a diuretic and anthelminthic under the names *umbilicus marinus*, *acetabulum marinum*, *cotyledon marinum*, and *bellericus marinus.* [α, 35.]

TUBULE, n. Tu^{2}b'u^{2}l. Lat., *tubulus* (dim. of *tubus*, a tube). Fr., *t.* Ger., *Röhrchen.* A small tube or tube-like structure. [α, 48.]—**Collecting t.** Lat., *tubulus rectus.* Fr., *canalicule droit, tube collecteur.* Ger., *Sammelrohr.* The part of a uriniferous t. into which the junctional t's open. It is nearly straight, has a large lumen, is lined with clear, cuboidal cells, and joins with others, as it passes from the cortical to the medullary portion of the kidney,

to form a large excretory t. [J, 30, 32.]—**Communicating t.** See *Junctional t.*—**Connecting t.** See *Second convoluted t.*—**Convoluted t.** 1. See *First convoluted t.* 2. Formerly, the entire uriniferous t., from Bowman's capsule to the point where it enters a collecting t. [J, 24.]—**Curved collecting t.** See *Junctional t.*—**Dark-bordered nerve-t's.** See *Medullated* NERVE-FIBRES.—**Dentinal t's.** See *Dentinal* CANALS.—**Distal convoluted t.** See *Second convoluted t.*—**Efferent t's of the testis.** The vasa efferentia of the testicle. [L.]—**Elementary t's.** See *T's of Stilling.*—**Excretory t's.** Lat., *tubuli belliniani.* Fr., *tubes de Bellini.* Ger., *Hauptröhren.* The comparatively large uriniferous t's in the medullary portion of the kidneys, formed by the union of many straight collecting t's. They are lined with columnar epithelium, and unite with others to form a papillary tube or duct which opens at the apex of a papilla into one of the renal calices or infundibula of the pelvis of the kidney. [J, 30, 32, 35.]—**First convoluted t.** Lat., *tubulus contortus.* Fr., *tube contourné.* Ger., *bogig gewundenes Kanalstück, gewundenes Harnkanälchen.* The part of a uriniferous t. that extends in a very tortuous manner for a short distance beyond the capsule of Bowman, to which it is joined by the constricted part or neck of the tubule. The epithelium, according to Heidenhain, is fibrillated. It has been shown by Tuttle to be ciliated in man and in the cat. [J, 30, 32, 35; "Stud. from the Biol. Lab. of Johns Hopkins Univ.," 1883, p. 447 (J).]—**Gastric t's.** See *Gastric* GLANDS.—**Henle's looped t.** See *Henle's loop*-TUBE.—**Intercalary t.** [Schweiger-Seidel], **Intercalated t.** See *Second convoluted t.*—**Irregular t.** The part of a uriniferous t. between the termination of the ascending limb of Henle's loop-tube and the second convoluted t. It winds between the convoluted t's of the labyrinth, so that its course is irregular. The epithelium is distinctly fibrillated. [J, 30, 32.]—**Junctional t.** The relatively short part of a uriniferous t. extending from the second convoluted t. to a straight collecting t. It is narrow, but has a relatively large lumen and is lined with clear, cuboidal cells with a slight admixture of cells like those in the second convoluted t. [J. 30, 32.] See also *Connecting* CANAL and *Second convoluted t.*—**Lactiferous t's.** See *Galactophorous* DUCTS.—**Liver t's.** 1. A tubular ventral outgrowth of the duodenum from which the liver is developed. [L, 201.] 2. In some of the lower animals and perhaps in man, the membrana propria inclosing the tubular network of cells in the liver. 3. In fishes, birds, and reptiles, the tube-like arrangement of the hepatic cells. [J, 2, 35.]—**Looped t. of Henle.** See *Henle's loop*-TUBE.—**Proximal convoluted t.** See *First convoluted t.*—**Renal t's.** See *Uriniferous t's.*—**Schachowa's t.** See *Spiral t. of Schachowa.*—**Second convoluted t.** Fr., *canal d'union.* Ger., *Schaltstück, Schaltwindung, Uebergangskanälchen.* The part of a uriniferous t. between the irregular and the junctional t's. It is convoluted, and has an epithelium composed of long cells with large nuclei and processes that fit into depressions of neighboring cells. Some authors make this portion include the junctional t., and therefore terminate in a collecting t. [G, 2, 21, 30, 34, 42.]—**Seminal t's, Seminiferous t's.** Lat., *tubuli seminiferi.* Fr., *tubes à ressort, canalicules* (ou *conduits*) *séminifères* (ou *séminipares.* ou *spermatiques*). Ger., *Samenkanälchen.* Tubes from $\frac{1}{150}$ to $\frac{1}{200}$ inch in diameter, lined with epithelium, from which the spermatozooids develop. They occupy the spaces in the testicle formed by the processes of the tunica albuginea, within which they are highly convoluted, but as they pass toward the surface they become straighter and unite with each other to form the vasa efferentia. [L, 31, 142, 332.]—**Spiral t. of Schachowa.** The portion of a uriniferous t. just beyond the first convoluted t. It extends to the junction of the cortex and medulla, where it is continued as the descending limb of Henle's loop-tube. Its epithelium is fibrillated. [J, 30, 32.]—**T's of Stilling.** Ger., *Horngerüst, Hornspongiosa.* A continuous, intricate, and connected network of similar minute t's or fibrils forming the entire substance of a nerve-fibre (neurilemma, medullary sheath, and axis-cylinder), supposed by Kühne and Ewald to be of a horny nature. Some of the t's also pass between neighboring nerve-fibres. Clarke denies their existence. [J, 10, 30, 32; "Clarke, "Quart. Jour. of Micr. Sci.," 1860, p. 651 (J).]—**Uriniferous t's, Uriniparous t's.** Ger., *Harnkanälchen, Harnröhren.* Minute canals, consisting of a basement membrane and a lining of epithelium, which form the proper glandular substance of the kidney. They originate in Bowman's capsules, and, after extending in a tortuous manner for a considerable distance, finally join other t's to form a common t., which extends in a nearly straight direction, and, after joining others, empties into the pelvis of the kidney. While the uriniferous t's may be properly said to be continuous from their origin to their termination, various parts of their length differ in size and course and in the character of the lining epithelium, and are named as if they were independent t's, as follows: (1) The capsule of Bowman; (2) the neck or constricted part joining the t. and capsule; (3) the first convoluted t.; (4) the spiral t. of Schachowa; (5) the descending limb of Henle's loop-tube; (6) Henle's loop-tube; (7) the ascending limb of Henle's loop-tube; (8) the irregular t.; (9) the second convoluted t.; (10) the junctional t., the last uniting with other junctional t's to form (11) a collecting t., which unites with others to form (12) an excretory t., which finally opens into one of the calices of the pelvis of the kidney. [J, 30, 32, 35.]

TUBULIFLOROUS, adj. Tu^{2}b-u^{2}l-i^2-flor'u^{3}s. Lat., *tubuliflorus* (from *tubulus*, a small tube, and *flos*, a flower). Fr., *tubuliflore.* Ger., *röhrchenblüthig.* Having flower-heads composed of tubular corollas. The *Tubulifloræ* are: Of De Candolle, a suborder of the *Compositæ*, consisting of the *Vernoniaceæ, Eupatoriaceæ*, etc.; of Reichenbach, a section of the *Amphigynanthæ*, consisting of the *Cotuleæ, Gnaphalieæ*, and *Conyzeæ.* [α, 35.]

TUBULOSE, TUBULOUS, adj's. Tu^{2}b'u^{2}l-os, -u^{3}s. See TUBULAR (1st def.).

TUBULUS (Lat.), n. m. Tu^{2}b(tu^{4}b)'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). 1. See TUBULE. 2. Of Malpighi, in the pl., *tubuli*, apparently the capillary blood-vessels. [Nock, "Brit. Med. Jour.," June 24, 1882, p. 960.] 3. See CANNULA.—**Dental tubuli.** See *Dentinal* CANALS.—**Tubuli belliniani, Tubuli Bellini.** See *Excretory* TUBULES.—**T. colligens.** See *Collecting* TUBULE.—**T. conjunctivus.** See *Junctional* TUBULE.—**T. contortus.** See *First convoluted* TUBULE.—**T. corticalis.** See *Convoluted* TUBULE (2d def.).—**T. henleanus.** See *Henle's loop*-TUBE.—**T. hirsutus.** Hypertrichosis in the external auditory canal. [F.]—**T. intercalaris.** See *Second convoluted* TUBULE.—**T. laqueriformis.** See *Henle's loop*-TUBE.—**T. nervorum.** See PERINEURIUM.—**Tubuli pelvis renalis** [Heister]. The calices of the kidney. [L, 349.]—**T. rectus.** See *Collecting* TUBULE.—**Tubuli renales.** See *Uriniferous* TUBULES.—**Tubuli seminales contorti.** Convoluted seminiferous tubules within the compartments of the testicle. [L.]—**Tubuli seminales recti.** See VASA *recta.*—**T. spiralis modioli.** See *Spiral* CANAL *of the modiolus.*

TUBUS (Lat.), n. m. Tu^{2}b(tu^{4}b)'u^{3}s(u^{4}s). See TUBE.—**T. acusticus.** See *Ear*-TRUMPET.—**T. alimentarius.** See *Alimentary* CANAL.—**T. digestivus.** The portion of the alimentary canal below the diaphragm. [L, 332.]—**T. ingestorius.** The portion of the alimentary canal above the diaphragm. [L, 332.]—**T. medullaris.** See *Medullary* CANAL (1st def.).

TUCH (Ger.), n. Tuch^2. Cloth, linen, linen cloth. [L, 46 (α, 21).]—**Kinnt'.** See *Jaw*-BANDAGE.

TUCKAHOE, TUCKAHOO, n's. Tu^{3}k-a^3-ho', -hu'. Indian loaf (or bread); an American Indian name for an underground tuberous production, consisting chiefly of pectic acid, formerly identified with a fungus (*Pachyma cocos*), but now regarded as a peculiar condition of the roots of certain trees on which it is found in North America, China, and Japan. It is used as food by the Indians, and in China as a medicine and in the manufacture of jelly. [α, 35.]

TUCUM, n. In Brazil, the *Astrocaryum vulgare.* [α, 35.]

TUFT, n. Tu^{3}ft. A knot or bunch (*e. g.*, of hairs, feathers, etc.). [α, 35.]—**Placental t's.** Ger., *Placentarzotten.* The agglomerated chorionic villi which form the fœtal placenta.—**Synovial t's.** See *Synovial* VILLI.—**T's of fœtal vascular villi.** Individual assemblages of the villi of the chorion separated by decidual sæpta.—**Vascular t.** Ger., *Gefässbüschel.* A t. made up largely of blood-vessels.

TUGGING, n. Tu^{3}g'i^{2}n^2. A pulling or dragging. [α, 34.]—**Tracheal t.** A sign of thoracic aneurysm consisting in the sense of downward traction of the larynx with the cardiac systole when the thyreoid cartilage is gently raised between the finger and thumb. ["Lancet," Feb. 20, 1892, p. 435 (α, 50).]

TULBAGHIA (Lat.), n. f. Tul-ba^{3}g'hi^2-a^3. Fr., *tulbaghie.* A genus of liliaceous herbs. The *Tulbaghieæ* are a subsection of the *Anthericeæ.* [α, 35.]—**T. alliacea** (**T. capensis**). **T. cepacea.** Fr., *tulbaghie alliacée.* South African species, of alliaceous odor. They are used as an anthelminthic and in phthisis. [α, 35.]

TULIP, n. Tu^{2}l'i^{2}p. See TULIPA.—**African t.** The genus *Hæmanthus.* [α, 35.]—**Checkered t., Drooping t.** See FRITILLARIA *meleagris.*—**T.-tree.** See LIRIODENDRON *tulipifera.*

TULIPA (Lat.), n. f. Tu^{2}l(tul)'i^{2}p-a^3. Fr., *tulipe.* Ger., *Tulpe, Tulipane.* Tulip; a genus of the *Liliaceæ.* The *Tulipaceæ* (Fr., *tulipacées*) are a family of the *Campanales*, consisting of *T., Fritillaria, Imperialis*, etc. The *Tulipeæ* (Fr., *tulipées*) are a series of the *Liliaceæ.* [α, 35.]—**T. gesneriana.** Fr., *tulipe de Gesner.* Ger., *Gartentulpe.* The common tulip; a native of Armenia and Central Russia. The mucilaginous bulb, edible when cooked, is in its fresh state acid, emetic, and aphrodisiac. It contains tulipine. The σατύριον of Dioscorides is perhaps identical with this or some other species of *T.* [α, 35.]—**T. silvestris.** Wild tulip; found in England and continental Europe. The bulb is emetic. [α, 35.]

TULIPIFERA (Lat.), n. f. Tu^{2}l(tul)-i^{2}p-i^{2}f'e^{2}r-a^3. From *tulipa* (*q. v.*) and *ferre*, to bear. The genus *Liriodendron.* [α, 35.]

TULIPINE, n. Tul'i^{2}p-en. Ger., *Tulipin.* A poisonous alkaloid obtained from the bulb of *Tulipa gesneriana.* It is an energetic sialagogue. [α, 35.]

TUMBEKI, n. A sort of tobacco exported from Persia and Turkey, derived from *Nicotiana persica* or *Nicotiana rustica.* Several varieties are described, named from their place of origin (Shiraz t., Teheran t., etc.), and differing in composition. T. contains from 2 to 5 per cent. of nicotine and 5 to 10 per cent. of saccharine matter. ["Phar. Jour.," xvi (1886), p. 683; "Ann. di chim. e di farmacol.," Apr., 1886, p. 20 (B).]

TUMEFACTION, n. Tu^{2}m-e^2-fa^{2}k'shu^{3}n. From *tumefacere*, to cause to swell. Ger., *Anschwellung.* Swelling, puffiness. Cf. BOUFFISSURE.

TUMEFIED, adj. Tu^{2}m'e^2-fid. Fr., *tuméfié.* Ger., *wulstig.* In a state of tumefaction.

TUMENOL, n. Tu^{2}m'e^{2}n-o^{2}l. From *bitumen* (*q. v.*), and *oleum*, oil. A substance obtained from mineral oils, allied to ichthyol; used externally in eczema, burns, pruritus, ulceration, eczema due to pediculi, and rhagades. ["Brit. Med. Jour.," Nov. 28, 1891, Supp., p. 173 (α, 50).]

TUMESCENCE, n. Tu^{2}m-e^{2}s'e^{2}ns. From *tumescere*, to begin to swell. The condition of swelling or of being swollen. [α, 48.]

TUMEUR (Fr.), n. Tu^6-mu^{6}r. See TUMOR.—**T. adipociriforme.** Of Leprêtre, cholesteatoma. [α, 34.]—**T. à myéloplaxes.** Of Nélaton, an osteosarcoma. [α, 34.]—**T. angiolithique.** See CHOLESTEATOMA.—**T. à ostéoblastes.** A tumor resembling an osteoma. [L, 57 (α, 14).]—**T. ascitique.** See ASCITES.—**T. blanche.** See TUMOR *albus.*—**T. cicatricielle.** See KELOID.—**T. composée.** A t. containing elements of two or more neoplasms, as in a fibrosarcoma. [α, 34.]—**T. cornée.** See CORNU *cutaneum.*—**T. cystique de la conjonctive.** See *Conjunctival*

CYST.—**T. cystique de l'iris.** See CYST *of the iris*.—**T. cystoïde.** See *Cystic* TUMOR.—**T. dentaire.** See ODONTOMA.—**T. des voies lacrymales.** See DACRYOPS.—**T. encéphaloïde.** See ENCEPHALOID.—**T. épithéliale.** See EPITHELIOMA.—**T. érectile lymphatique.** See *Ganglionar* LYMPHANGEIECTASIS.—**T. fibreuse.** See FIBROMA.—**T. fluxionnaire.** A tumor that gives rise to hæmorrhage (like a fibrous tumor of the uterus).—**T's folliculeuses.** See MOLLUSCUM *contagiosum*.—**T. gommeuse.** See SYPHILOMA.—**T. graisseuse.** See LIPOMA.—**T. hématique.** See HÆMATOMA.—**T. hémorrhagique circonscrite.** See *Consecutive* ANEURYSM.—**T. hémorrhagique non circonscrite.** Traumatic aneurysm. [D. 139.]—**T. liquide.** A cystic tumor.—**T. lymphatique des articulations.** See HYDRARTHRUS.—**T. myome.** See MYOMA.—**T. névrome.** See NEUROMA.—**T. ostéome.** See OSTEOMA.—**T. papillaire.** See PAPILLOMA.—**T. perlée.** See CHOLESTEATOMA.—**T. pulpeuse, T. spléniforme. T. spongieuse.** See *Medullary* SARCOMA.—**T. tubuleuse.** See SIPHONOMA.—**T. variqueuse.** See *Cavernous* ANGEIOMA.—**T. verruqueuse des cicatrices.** See *Cicatricial* KELOID.

TUMID, adj. Tu^{2}m'i^{2}d. Lat., *tumidus* (from *tumere*, to swell). Ger., *angeschwollen, aufgeschwollen*. Inflated, swollen. [*a*, 35.]

TUMOR (Lat.), n. m. Tu^{2}m(tu^{4}m)'o^{2}r. Gen., *-or'is*. From *tumere*, to swell. Gr., κήλη, ὄγκος. Fr., *tumeur*. Ger., *Geschwulst, Afterbildung*. A swelling, especially a new growth, cystic or solid. [D, 3; E, 1.]—**Adenoid t.** See ADENOMA.—**Adipose t.** See LIPOMA.—**Aneurysmal t.** See ANEURYSM.—**Anthracoid t.** See *Melanotic t*.—**Benign t.** See *Innocent t*.—**Biliary t.** A t. formed by an enlargement of the gall bladder. [*a*, 34.]—**Blood t.** See HÆMATOMA.—**Bony t.** See OSTEOMA.—**Butyroid t.** A galactocele with contents of the consistence of butter.—**Cancerous t.** A t. formed by a cancer (*q. v.*, 3d def.).—**Cartilaginous t.** See CHONDROMA.—**Cavernous venous t.** See *Cavernous* ANGEIOMA and NÆVUS *vascularis tuberosus*.—**Connective-tissue t.** See FIBROMA.—**Cystic t.** A t. consisting of a sac or of sacs containing liquid.—**Dentigerous t.** See *Dentigeraus* CYST.—**Dermoid t.** See *Dermoid* CYST.—**Desmoid t.** A firm fibrous t. [E.]—**Embryoplastic t.** See *Encephaloid* SARCOMA.—**Erectile t.** Ger., *Aftermilz*. A t. composed chiefly of vascular tissue which may become more or less prominent when the vessels are filled with blood. [E.] Cf. *Cavernous* ANGEIOMA.—**Fatty t.** See LIPOMA.—**Fibrinous t.** See FIBROMA.—**Fibro-calcareous t.** A fibrous t. that has undergone calcareous degeneration.—**Fibro-cellular t.** [Paget]. A new growth made up of tissue more or less resembling the normal fibro-cellular or connective tissue of the body. The typical form is firm, with a homogeneous surface on section, and bands of delicate filamentous white fibrous tissue intersecting its substance. [E.]—**Fibro-cystic t.** A fibrous t. containing cysts. [E.]—**Fibro-fatty t.** See FIBRO-LIPOMA.—**Fibro-muscular t.** See FIBRO-MYOMA.—**Fibro-nucleated t.** See SARCOMA (2d def.).—**Fibro-plastic t.** Fr., *tumeur fibro-plastique*. 1. Of Lebert, see MYELOID. 2. Of French writers, see SARCOMA.—**Fibrous t.** See FIBROMA.—**Fibro-vascular t.** See FIBROMA *teleangeiectaticum*.—**Floating t.** A t. that is movable in some part of the body, *e. g.*, the abdomen. [*a*, 34.]—**Follicular t.** See ATHEROMA (1st def.).—**Fungating t.** A t. composed of exuberant granulations, generally growing from the inner surface of the wall of a cystic t. [E.]—**Gaseous t.** A t. containing gas. ["Rev. de chir.," Feb., 1889, p. 97 (*a*, 34).]—**Gefässt'** (Ger.). See ANGEIOMA.—**Glandular t.** See ADENOMA.—**Granulation t.** A t. formed by the proliferation of granulation tissue. [*a*, 24.]—**Gubler's t.** A t. of the back of the carpus sometimes observed in plumbism. [*a*, 34.]—**Gummatous t., Gummous t., Gummy t.** Syphiloma; so called from either the softish semi-elastic consistence of the tumor or the peculiar character of its contents after the process of softening. [G.]—**Hair t., Hairy t.** A dermoid cyst containing hair. [*a*, 34.]—**Heteradenic t.** Fr., *tumeur hétéradénique*. Of Robin, a hyaline cylindroma. [L, 57 (*a*, 14).]—**Homœomorphous t.** Of Broca, a homologous t. [L, 41, 49 (*a*, 14).]—**Horny t.** See CORNU *cutaneum*.—**Hydatoid t.** A cystic t. resembling a hydatid cyst. [*a*, 34.]—**Idiopathic splenic t.** The enlargement of the spleen observed in pseudoleucocythæmia. [D, 50.]—**Infectious granulation t's.** Ger., *infectiöse Granulationgeschwülste*. Acute miliary tubercles. [Déjérine, "Rev. de méd.," Dec., 1884, p. 921 (*a*, 34).]—**Infiltrating t.** A t. that spreads by infiltration. [*a*, 34.]—**Innocent t.** A t. which affects the patient solely through its local influence, which has little disposition to soften or ulcerate, and has no tendency to multiplication in other tissues or to involve the absorbents with which it is connected. [E.]—**Irritable t. of the breast** [Cooper]. An affection of the breast, not necessarily a t., characterized by exquisite pain and tenderness of one or more of its lobes. [A. 42.] Cf. *Hysterical* BREAST and *Irritable* BREAST.—**Lacteal t.** See GALACTOCELE.—**Lymphadenoid t.** See LYMPHADENOMA.—**Lymph t.** See LYMPHANGEIOMA.—**Malignant t.** See CANCER (3d def.) and SARCOMA.—**Melanic t., Melanotic t.** See *Melanotic* SARCOMA and MELANOMA.—**Meningeal blood-t.** A hæmatoma of the meninges. [*a*, 34.]—**Mesoblastic t.** A t. arising from the mesoblast. [*a*, 34.]—**Milk-like t.** [Monro]. Medullary sarcoma. [A, 42.]—**Molluscous t.** See MOLLUSCUM *contagiosum*.—**Movable t.** See *Floating t*.—**Mucoid t., Mucous-tissue t., Mucous t.** See MYXOMA.—**Multiple fungoid papillomatous t.** See MYCOSIS *fungoides*.—**Muscular t.** See MYOMA (1st def.).—**Myelogenic t.** See *Giant-celled* SARCOMA.—**Myeloid t.** See MYELOID.—**Myoid t.** See LEIOMYOMA.—**Nerve t., Nervous t.** See NEUROMA.—**Neurotic t.** A small t., not persistent, developing in the mamma and due to reflex nervous disturbance. ["N. Y. Med. Jour.," Feb. 8, 1890, p. 162 (*a*, 34).]—**Osseous t.** A t. containing bone, either cancellous or compact. [E.]—**Osteoid t.** See *Osteoid* CHONDROMA.—**Painful subcutaneous t.** An encysted fibrous or fibro-cellular t. situated in the subcutaneous tissue and giving rise to pain. [E.]—**Papillary t.** See PAPILLOMA (2d def.).—**Pearl t., Pearly t.** See CHOLESTEATOMA.—**Pearly t. of the iris.** A small cyst of the iris containing a pultaceous, tallowy substance. [*a*, 34.]—**Perineal t.** A term sometimes applied to the bulging of the perinæum caused by the pressure of the child's head in the expulsive stage of labor. [A, 43.]—**Phantom t.** Fr., *gonflement* (ou *ballonnement*) *hystérique de l'abdomen*. Ger., *Phantomgeschwulst*. An abdominal tumefaction due to flatulence or to circumscribed hysterical contraction of the abdominal muscles. [*a*, 34.]—**Pilocystic t.** A dermoid cyst containing hair. [*a*, 34.]—**Proliferation t.** A t. which develops by the process of proliferation. [D, 3.]—**Recurrent fibroid t.** [Paget]. See *Spindle-celled* SARCOMA.—**Recurrent fibro-vascular t.** A teleangeiectatic fibroma that recurs after excision of a primary t. [*a*, 34.]—**Recurrent t.** A t. approaching in structure the innocent t. but in habit the cancerous t., and tending to recur after removal. [E.]—**Rotated t.** A pediculated t. that has rotated on the pedicle. [*a*, 34.]—**Scalp-t.** See CAPUT *succedaneum*.—**Sebaceous t.** 1. See ATHEROMA (1st def.). 2. Of Toynbee, see CHOLESTEATOMA.—**Semi-malignant t.** See *Recurrent t*.—**Sero-cystic t.** [Brodie]. See *Proliferation* CYST.—**Special t's of the penis.** See SCLEROSIS *of the corpora cavernosa*.—**Stercoral t.** A t. formed by impacted fæces. [*a*, 34.]—**Teratoid t.** See TERATOMA.—**T. albus.** See *Fungous* ARTHRITIS.—**T. aquosa.** A cystic t. [*a*. 34.]—**T. capitis sanguineus neonatorum.** See CAPUT *succedaneum*.—**T. carneus, T. carnosus.** See SARCOMA (2d def.).—**T. cavernosus.** See *Cavernous* ANGEIOMA—**T. fibrinosus.** See FIBROMA.—**T. flatulentus.** See EMPHYSEMA.—**T. fungosus articuli.** See SPINA *ventosa*.—**T. fungosus sanguineus.** See *Cavernous* ANGEIOMA.—**T. gallicus.** See BUBO.—**T. gummatus.** See SYPHILOMA.—**T. lacrimalis.** The swelling over the site of the lacrymal sac in purulent or phlegmonous dacryocystitis. [F.]—**T. lardosis.** See *Fatty t*.—**T. lymphaticus** [Lassur]. See ŒDEMOSARCOMA.—**T. mucosus.** See MYXOMA.—**T. prædurus.** See *Syphilitic* CHANCRE.—**T'es sebipari.** See MOLLUSCUM *contagiosum*.—**T. splenis.** A t. or swelling of the spleen. [*a*, 34.]—**T. splenoides.** See LIENCULUS.—**T. squamiformis carnosus.** See LEPIDOSARCOMA.—**T. villosus.** See PAPILLOMA.—**Uterine t.** Ger., *Uterusgeschwulst*. 1. A t. (neoplasm) of the uterus. 2. A tumidity due to enlargement of the uterus.—**Varicose t.** A t. composed of dilated and hypertrophied veins. [E.] See *Cavernous* ANGEIOMA.—**Vascular t.** See ANGEIOMA.—**Vascular t. of the meatus urinarius** (or **of the urethral orifice** [Clarke]). See *Urethral* PAPILLOMA and *Urethral* CARUNCLE.—**Villous t.** See PAPILLOMA.—**Warty t. of the umbilicus.** See *Fungous* EXCRESCENCE *of the umbilicus*.

TUMULTUS SERMONIS (Lat.), n. m. Tu^{2}m(tu^{4}m)-u^{3}lt(u^{4}lt)'-u^{3}s(u^{4}s) su^{5}rm(se^{2}rm)-on'i^{2}s. See PARAPHRASIA *præceps*.

TUNBRIDGE WELLS, n. Tu^{3}n'bri^{2}j. A place in Kent, England, where there are gaseous and chalybeate springs. [L, 30, 37, 49, 57 (*a*, 14).]

TUNDA OCULI (Lat.), n. f. Tu^{3}nd(tu^{4}nd)'a^3 o^{2}k'u^{2}l(u^{4}l)-i(e). An old term for the ocular conjunctiva. [F.]

TUNDUS CORDIS (Lat.), n. m. Tu^{3}nd(tu^{4}nd)'u^{3}s(u^{4}s) ko^{2}rd'i^{2}s. The apex of the heart. [L.]

TUNGSTATE, n. Tu^{3}n^2'stat. Lat., *tungstas*. A salt of tungstic acid.

TUNGSTEN, n. Tu^{3}n^2'ste^{2}n. Fr., *tungstène*. Ger., *Wolfram*. 1. A metallic element discovered in 1783. It occurs, usually as a tungstate, in various minerals. It has been obtained in the form of a light-gray lustrous powder, not readily oxidized except at high temperatures. Its sp. gr. is said to be 19·129, although by some it is put as low as 16·5, and by others is stated to be 18·0. In composition it acts apparently as a dyad, tetrad, pentad, and hexad. Symbol W (from *wolfram*), sometimes Tu; atomic weight, 183·5. 2. Calcium tungstate. [B, 3, 16.]

TUNGSTIC ACID, n. Tu^{3}n^2'sti^{2}k. A dibasic acid, H_2WO_4. The anhydrous acid is a yellow powder insoluble in water and in most acids.—**Colloidal t. a.** A modification of t. a. prepared by acidulating a solution of sodium tungstate with hydrochloric acid, and then removing the sodium chloride by dialysis. The t. a. remains in solution and may be obtained by evaporation as a transparent gummy substance. [B, 3.]—**Hydrated t. a.** A white substance, $H_2WO_4 + H_2O$, soluble in water. [B.]—**Liquid t. a., Soluble t. a.** T. a. obtained in a soluble form by dialysis. [B, 6.]

TUNIC, n. Tu^{2}n'i^{2}k. Gr., χιτών. Lat., *tunica*. Fr., *tunique*. Ger., *Haut, Hülle*. A coat, an investing membrane; in botany, a skin or covering membrane, such as the testa of a seed, or a thick or thin separable layer (Ger., *Schale*), such as one of the coats of an onion. [*a*, 35.]—**Chorioid t.** The chorioid membrane. [L.]—**External elastic t.** See *External elastic* COAT.—**Inner muscular t. of the epididymis.** Of Kölliker, a layer of muscular tissue at the back of the testis and epididymis, beneath the fascia propria and opposite the lower two thirds of the testis. [C.]—**Internal elastic t.** See *Internal elastic* COAT.—**Vaginal t.** See TUNICA *vaginalis*.

TUNICA (Lat.), n. f. Tu^{2}n(tu^{4}n)'i^{2}k-a^8. 1. See TUNIC. 2. A section of the genus *Dianthus*. [*a*, 35.] 3. Of Jussieu, the perigynium of the *Cariceæ*. [B, 121.]—**Acetum tunicæ.** A preparation made by macerating clove-pink petals with 6 or 12 times as much alcohol for twelve days, and filtering. [B, 119 (*a*, 34).]—**Conserva florum tunicæ.** Fr., *conserve d'œillet*. A preparation made by triturating clove-pink petals with twice as much sugar. [B, 119 (*a*, 38).]—**Syrupus tunicæ (florum).** A preparation made by infusing clove-pink petals in twice as much boiling water for twelve hours, straining, and dissolving in the product twice its weight of sugar. [B, 119 (*a*, 38).]—**T. abdominalis.** Fr., *tablier élastique*. A deep layer of the abdominal fascia in animals, analogous to the transversalis fascia in man. It consists of yellow elastic tissue, and contributes to the support of the viscera. [C.]—**T. acinalis, T. aciniformis, T. acinosa.** See UVEA.—**T. adiposa (renum).** See CAPSULA *adiposa*.—**T. adnata oculi.** 1. An old term for the ocular conjunctiva. [F.] 2. See *T. albuginea oculi* (2d def.).—**T. adnata testis.** See *T. vaginalis testis*.—**T.**

adventitia. Ger., *äussere Gefässhaut* (1st def.), *äussere Eihaut* (2d def.). 1. See ADVENTITIA (1st def.). 2. See *Vitelline* MEMBRANE (2d def.).—**T. agnina.** See AMNION.—**T. alba.** An old term for the sclerotica. [F.]—**T. albuginea.** See ALBUGINEA, ALBUGINEA *testis*, and *Tenon's* CAPSULE.—**T. albuginea corporis cavernosi.** See ALBUGINEA *penis*.—**T. albuginea epididymidos.** See ALBUGINEA *epididymidos*.—**T. albuginea oculi.** 1. See SCLEROTICA. 2. The tendons of the recti of the eye and the connective tissue uniting them. [L, 31.]—**T. arachnoidea.** See ARACHNOID.—**T. arachnoidea oculi.** See ARACHNOID *of the eye*.—**T. araneæ.** See ARACHNOID.—**T. arteriæ elastica externa.** See *External elastic* COAT.—**T. arteriæ externa.** The adventitia of an artery. [L.]—**T. arteriæ fenestrata.** See *Internal elastic* COAT.—**T. arteriæ intima.** The intima of an artery. [L.]—**T. arteriæ media.** The middle coat of an artery. [L.]—**T. candida.** An old term for the sclerotica. [F.]—**T. carnea.** See CREMASTER and DARTOS.—**T. cellularis.** See ADVENTITIA (1st def.).—**T. cellulosa.** See SUBMUCOSA.—**T. cellulosa of the ovum.** Fr., *couche celluleuse*. See *T. granulosa* (1st def.).—**T. cellulosa Ruyschii.** See MEMBRANA *ruyschiana*.—**T. cerebri pia mater** (seu **propria,** seu **vasculosa**). See PIA.—**T. choriocapillaris.** See MEMBRANA *ruyschiana*.—**T. chorioidea.** See CHORIOID.—**T. conjunctiva.** See CONJUNCTIVA.—**T. cornea opaca.** See SCLEROTICA.—**T. cornea pellucida.** See CORNEA.—**T. dartos.** See DARTOS.—**T. demoursiana.** See MEMBRANE *of Descemet*.—**T. dura.** See SCLEROTICA.—**T. erythroides.** See CREMASTER.—**T. exterior ovi.** Of Haller, the decidua vera. [A, 45.]—**T. externa.** See ADVENTITIA (1st def.).—**T. extima.** See SCLEROTICA.—**T. farciminalis.** See ALLANTOIS.—**T. fibrosa (folliculi).** See THECA *folliculi*.—**T. fibrosa hepatis.** A layer of fibrous tissue covering the liver. [L.]—**T. fibrosa lienis.** See ALBUGINEA *lienis*.—**T. fibrosa membranæ tympani.** The middle fibrous layer of the tympanum. [L.]—**T. fibrosa oculi.** The combined cornea and sclerotica. [L.]—**T. vaginalis testis** (seu **visceralis**). The portion of the t. vaginalis which invests the epididymis and the testicle. [L.]—**T. vasculosa chorioideæ.** See UVEA.—**T. vasculosa Halleri.** The chorioid. [α, 34.]—**T. vasculosa lentis.** A very vascular envelope, made up of the various vascular projections of the embryonic cephalic plate, completely surrounding the crystalline lens in the embryo. [F.]—**T. vasculosa oculi.** See CHORIOID.—**T. vasculosa testis.** A vascular network lining the albuginea testis. [L, 142.]—**T. vasorum interna.** See INTIMA.—**T. villosa.** The villous surface of the intestines. [α, 34.]—**T. vitrea.** See *Hyaloid* MEMBRANE.

TUNICATE, adj. Tu^{2}n'i^{2}k-at. Lat., *tunicatus* (from *tunica* [*q. v.*]). Fr., *tuniqué*, *tuniqueux*. Ger., *schalig*. Provided with coats (tunics). [α, 35.] The *Tunicata*, or tunicaries, are a class of the *Molluscoida*, or a degenerate branch of the *Chordata*, which more nearly than any other invertebrates approach the vertebrates. They consist of a double-layered sac inclosing an alimentary canal, with distinct oral and anal apertures at their free extremities, are marine, exist singly or in groups, possess a simple tubular heart open at each end, and are, as a rule, hermaphroditic. [L, 121, 147.]

TUNICIN, n. Tu^{2}n'i^{2}s-i^{2}n. Fr., *tunicine*. A substance, $(C_6H_{10}O_5)_n$, obtained from the mantles of ascidians, regarded by some as identical with vegetable cellulose, by others as identical with animal cellulose, and by Berthelot as a distinct body, convertible into sugar. [B, 3, 93, 270 (α, 14, 38).]

TUNICULA (Lat.), n. f. Tu^{2}n(tu^{4}n)-i^{2}k'u^{2}l(u^{4}l)-a^{3}. Dim. of *tunica* (*q. v.*). See CLITORIS.

TUNIQUE (Fr.), n. Tu^{5}-nek. See TUNIC.—**T. adventice.** See ADVENTITIA.—**T. commune de Bichat.** See ENDOTHELIUM.—**T. érythroïde.** See CREMASTER and DARTOS.—**T. pourpre, T. séminale.** See SPERMODERM.

TUNNEL, n. Tu^{3}n'e^{2}l. The space between the rods of Corti and the membrana basilaris. [L.]—**T. of Corti.** See *T.*

TUPELO, n. Tup'e^{2}l-o. Fr., *tupélo*. See NYSSA.—**Large t., Swamp t.** See NYSSA *tomentosa*.

TÜPFEL (Ger.), n. Tu^{5}pf'e^{2}l. See PUNCTUM.

TÜPFELFARN (Ger.), n. Tu^{6}pf'e^{2}l-fa^{3}rn. See POLYPODIUM.

TUPI-PYA, n. In Brazil, a form of insanity common among the Indians, characterized by sudden accesses of furious and destructive mania, following short stages of depression. [L, 57 (α, 14).]

TÜR, n. A place in Unterweissenburg, Transylvania, where there is a sulphurous spring. [L, 30, 49 (α, 14).]

TURA, n. A place in Neutra, Hungary, where there is an alkaline and chalybeate spring. [L, 63.]

TURACIN, n. Tu^{2}r'a^{2}s-i^{2}n. Fr., *turacine*. A red pigment obtained from the wing-feathers of the turaco. It contains 5·9 per cent. of copper. [B, 38, 93 (α, 14).]

TURBINAL, adj. Tu^{5}rb'i^{2}-n'l. From *turbo*, a top. See TURBINATE; as a n., see *Turbinal* BONE.—**Externe rückläufige T'bewegung.** See MOVEMENT *of restitution*.—**Interne rückläufige T'bewegung.** The rotation of the shoulders that follows the expulsion of the head in labor; being that movement of the shoulders which coincides with the "movement of restitution" of the head. [A, 91.]—**T'bewegung** (Ger.), **T'drehung** (Ger.). A movement of rotation (as of the fœtus in its passage through the pelvis).

TURBINATE, TURBINATED, adj's. Tu^{5}rb'i^{2}n-at, -at-e^{2}d. Lat., *turbinatus* (from *turbo*, a spinning-top). Fr., *turbiné*. Top-shaped; scroll-like. [α, 35.]

TURBITH (Fr.), n. Tu^{6}r-bet. See TURPETH.—**Poudre de t. végétal** [Fr. Cod.]. A preparation made by drying the crushed root of *Ipomœa turpethum* at 40° C., powdering in a covered mortar, and sifting through a No. 120 silk sieve. [B, 95 (α, 38).]—**Résine-t.** Turpeth. [α, 35.]—**T. blanc, T. bleu.** See GLOBULARIA *alypum*.—**T. minéral.** See MERCURY *subsulphate*.—**T. nitreux.** See *Bibasic* MERCURY *nitrate*.—**T. noir.** 1. The *Euphorbia palustris*. [α, 35.] 2. See MERCURY *and ammonium nitrate*.—**T. végétal.** See IPOMŒA *turpethum*.

TURBO (Lat.), n. m. Tu^{5}rb(tu^{4}rb)'o. Gen., *turb'inis*. From *turbare*, to disturb. Gr., στρόμβος. 1. A spinning-top; any top-shaped or scroll-like formation. [α, 48.] 2. A genus of molluscs. The opercula of several species (*T. cochlas*, *T. rugosus*, etc.) were once used as an aphrodisiac under the names *faba marina*, *umbilicus marinus* (seu *Veneris*), *belliculus* (seu *bellericus*) *marinus*, *acetabulum marinum*, and *concha venerea*. [α, 35.]—**T. cerebri.** The pineal gland. [L. 50 (α, 34).]—**Turbines nasi.** The inferior, middle, and superior turbinated bones. [L.]

TURFOL, n. Tu^{5}rf'o^{2}l. Of Vohl, peat-oil (see BRAUNKOHLE*nöl*). [B, 93 (α, 14).]

TURGESCENCE, n. Tu^{5}rj-e^{2}s'e^{2}ns. From *turgescere*, to begin to swell. Fr., *t.* Ger., *Turgescenz*, *Vollsaftigkeit*. The act or process of swelling or enlargement (said especially of very vascular tissues); in botany, the distention of cells with sap. [D, 20; α, 35.]

TURGID, adj. Tu^{5}rj'i^{2}d. Lat., *turgidus* (from *turgere*, to swell). Fr., *turgide*. Ger., *aufgeschwollen*. Swollen, congested, bloated. [D.]

TURGOR (Lat.), n. m. Tu^{5}rg(tu^{4}rg)'o^{2}r. Gen., *-o'ris*. From *turgere*, to swell. Congestion, turgescence. [D, 3.]—**T. vitalis.** That vital property without which the body becomes limp like a corpse.

TURION, n. Tu^{2}r(tu^{4}r)'i^{2}-o^{2}n. Lat., *turio*. Fr., *t.*, *turiobulbe*. Ger., *Schoss*, *Schössling*, *Stockknospe*. 1. A subterranean budding shoot. 2. Of the Fr. Cod., young asparagus shoots. [B; α, 35.]

TURMERIC, n. Tu^{5}rm'e^{2}r-i^{2}k. 1. The genus *Curcuma*, especially *Curcuma longa* (*q. v.*) and its rhizome (see *Radix* CURCUMÆ). Curcuma-root contains curcumin, a brown pigment, an odorous, very acrid, dark-yellow, volatile oil (t.-oil), and, according to some, an alkaloid forming crystallizable salts. T. is chiefly used in pharmacy as a coloring agent. 2. The *Hydrastis canadensis* and *Sanguinaria canadensis*, also their roots. [α, 35.]—**African t.** The rhizome of *Canna speciosa*. [α, 34.]—**Bengal t.** A variety of t. preferred in dyeing for its deep tint. [α, 35.]—**China t., Chinese t.** The most esteemed variety of t., but rarely met with in European or American commerce. [α, 35.]—**Cochin t.** A short, conical rhizome obtained from an undetermined species of *Curcuma*, grown chiefly at Alwaye. It occurs in slices or segments, and is used in making arrowroot. [α, 35.]—**Indian t.** The *Hydrastis canadensis* or its root. [α, 35.]—**Java t.** The rhizome of a variety (*minor*) of *Curcuma longa*. It occurs in pieces dusted with its own powder, and is not highly esteemed [α, 35.]—**Madras t.** A superior variety of t., occurring in large pieces. [α, 35.]—**T.**

oil. Fr., *huile* (ou *essence*) *de curcuma*. Ger., *Curcumaöl*. 1. A volatile oil obtained by distilling t. with water. 2. A dark viscid oil, obtained by treating t. with cold ligroin. [B, 81, 270 (a, 14).]—**T. paper.** Lat., *charta curcumæ*. Fr., *papier de curcuma*. Filter paper impregnated with that portion of the coloring matter of t. which is insoluble in water but soluble in alcohol; used as a test for alkalies in solution, which change its tint to brown. [" Proc. of the Am. Pharm. Assoc.," xxii, p. 50 (a, 50); a, 17.] Cf. LITMUS *paper*.—**Wild t.** See CURCUMA *aromatica*.

TURMEROL, n. Tu⁵rm'e²r-o²l. A constituent of turmeric oil; an alcohol, $C_{19}H_{28}O$ (or, according to some, $C_{10}H_{14}O$), boiling at 250° C. It differs from carvol in not combining with hydrogen sulphide. [B, 81 (a, 14); a, 35.]

TURNERA (Lat.), n. f. Tu⁵rn'e²r-a³. From *Turner*, an English physican. Fr., *turnère*. A genus of herbs or undershrubs of the *Turneraceæ*, which are an order of the *Passiflorales*, considered by Baillon a series (*Turnereæ*) of the *Bixaceæ*. [a, 35.]—**T. aphrodisiaca.** A Mexican species. The leaves are now considered the genuine damiana. [a, 35.]—**T. apifera.** Fr., *turnère excellent*. A Brazilian undershrub. The leaves are astringent and tonic. [a, 35.]—**T. microphylla.** A Mexican species considered by some the source of damiana. [a, 35.]—**T. ulmifolia.** Holly- (or sage-) rose of the West Indies. The leaves are tonic and expectorant. [a, 35.]

TURNING, n. Tu⁵rn'i²n². See VERSION (1st def.).—**Head t.** See *Cephalic* VERSION.

TURNIP, n. Tu⁵r'n'p. The *Brassica rapa*. [a, 35.]—**Indian t.** See ARISÆMA *atrorubens*.—**Swedish t.** See under BRASSICA *campestris*.—**Wild t.** The *Arum triphyllum* and the *Asarum canadense*. [" Jour. of Am. Med. Assoc.," Oct. 24, 1891, p. 616 (a, 47).]

TURNKEY, n. Tu⁵rn'ke. See *Tooth* KEY.

TURN OF LIFE, n. Tu⁵rn o²v lif. See MENOPAUSE.

TURNS, n. pl. Tu⁵rnz. The menses.

TURNSICK, n. Tu⁵rn'si²k. See GID.

TURNSOLE, n. Tu⁵rn'sol. Fr., *tournesol*. Ger., *Turnesol*. 1. Litmus, especially ribbon litmus. 2. An old name for *Euphorbia helioscopia*. 3. The genus *Heliotropium*. [a, 35.]

TURPENAY (Fr.), n. Tu⁶r-p'-ne². A place in the department of the Indre-et-Loire, France, where there is a gaseous and chalybeate spring. [L, 49 (a, 14).]

TURPENTINE, n. Tu⁵rp'e²nt-in. Gr., ῥητίνη, τερμινθίνη. Lat., *terebinthina*. Fr., *térébenthine* [Fr. Cod.]. Ger., *Terpenthin*, *Terpentin*. An oleoresin, consisting of a mixture of rosin (colophony) and an essential oil (see *Oil of t.*), obtained from various species of pine, larch, and fir. [a, 35.] Cf. TEREBINTHINA.—**American t.** Lat., *terebenthina* [U. S. Ph.], *thus americanum* [Br. Ph.]. Fr., *térébenthine de Boston*. White t.; a honey-like fluid of agreeable odor and bitterish taste, obtained from *Pinus australis* (*palustris*) and *Pinus tæda*. In its fresh state it yields 17 per cent. of volatile oil. When exposed to the air or to a low temperature it hardens. [a, 35.]—**Balsam of t.** See TEREBINTHINA (1st def.).—**Bordeaux t.** Lat., *terebinthina* [Ger. Ph.], *terebinthina vulgaris* [Lond. Ph.] (seu *communis*). Fr., *térébenthine de Bordeaux* (ou *commune*) [Fr. Cod.]. Ger., *gemeiner Terpentin*. Common European t.; obtained from several species of *Pinus*, especially *Pinus maritima*. In its fresh state it is whitish, turbid, and thick, but separates, on standing, into two portions, one transparent and liquid, the other viscid and honey-like. The commercial article often consists entirely of the latter part. It yields large quantities of resin and oil of t. [a, 35.]—**Canada t., Canadian t.** Lat., *terebinthina canadensis* [U. S. Ph., Br. Ph.]. Fr., *térébenthine* (ou *baume*) *de Canada* [Fr. Cod.]. Ger., *Canada-Balsam*, *canadischer Terpentin*. Canada balsam, balsam of fir; a yellowish or greenish, viscid, transparent liquid, of bitterish, somewhat acrid taste and terebinthinate odor, obtained from the vesicles which form on the trunk and branches of *Abies balsamea*. According to Flückiger, it contains 24 per cent. of essential oil, with a very small quantity of an oxygenated oil, 60 per cent. of resin soluble in boiling alcohol, and 16 per cent. of resin soluble only in ether. On evaporation of the oil, the resins are left as a transparent elastic mass. [a, 35.]—**Chian t., Chio t., Cyprus t.** Fr., *térébenthine de Chio* [Fr. Cod.], *baume de Chio* (ou *de Chypre*). Ger., *cyprischer Terpentin*. T. obtained from *Pistacia terebinthus*; a thick, tenacious liquid of a greenish-yellow color or a soft solid of a dull-brown hue, with little taste, and of a peculiar pleasant, mildly terebinthinous odor. It consists of resin (probably the resin of mastic) and an essential oil which contains a little oxygenated oil. In Greece, Chian t. is used as an agreeable addition to wines and cordials. It has been recommended in the form of emulsion and as a local application in cancer of the uterus. [a, 35.]—**Dombeya t.** A thick whitish, glutinous fluid of a strong smell and taste, derived from *Araucaria imbricata*. [a, 35.]—**European t.** See *Bordeaux t.*—**Hungarian t.** Lat., *balsamum hungaricum* (seu *carpathicum*, seu *carpathicum nativum*), *oleum carpathicum*. Ger., *Krummholzbalsam*, *ungarischer* (oder *karpathischer*) *Balsam*. Carpathian (or Hungarian, or Riga) balsam; a thin, white fluid with a juniper-like smell that exudes from the young twigs of *Pinus cembra* and *Pinus pumilio*. It has the properties of ordinary t. [a, 35.]—**Larch t.** Lat., *terebinthina* [Belg. Ph., Netherl. Ph.] (*laricina*). A thick, turbid, pale-yellowish fluid of bitter, aromatic taste, obtained from *Larix europœa*. It has the properties of ordinary t., but a less powerful odor. It is much used by the veterinarians. [a, 35.]—**Liniment of t. and acetic acid.** See *Linimentum* TEREBINTHINÆ *aceticum*.—**Oil of t.** Lat., *oleum terebinthinæ* [U. S. Ph., Br. Ph., Ger. Ph.]. Fr., *essence de térébenthine* [Fr. Cod.]. Ger., *Terpentinöl*. Spirit (or spirits) of t.; a volatile colorless liquid, $C_{10}H_{16}$, of penetrating smell, pungent, bitterish taste, and neutral or faintly acid reaction, obtained by distillation from t. It varies in physical properties according to its source. Its boiling point ranges from 152° to 172° C., and its sp. gr. from 0·856 to 0·870. American oil of t. is dextrogyrous, while that from Bordeaux t. is lævogyrous. It is soluble in alcohol, especially in boiling alcohol, and in ether, benzol, other essential oils, and the fixed oils, and dissolves resins and caoutchouc. It is used as a stimulant, diuretic, anthelminthic, cathartic, rubefacient, germicide, and antiseptic. [a, 35.]—**Ointment of t.** See *Unguentum* TEREBINTHINÆ.—**Rectified oil of t.** Lat., *ætheroleum terebinthinæ* [Dan. Ph.] (*depuratum* [Swed. Ph.] *vel rectificatum* [Norw. Ph.]), *essentia terebinthinæ rectificata* [Belg. Ph.], *oleum terebinthinæ depuratum* [Netherl. Ph.] (seu *rectificatum* [Br. Ph., Ger. Ph., Austr. Ph., Hung. Ph., Finn. Ph., Russ. Ph., Swiss Ph., Gr. Ph.]). Sp., *esencia de trementina* [Sp. Ph.]. Oil of t. rectified by shaking up with water (lime-water [Ger. Ph., Finn. Ph.]), and distilling from about two thirds to three quarters. [B, 95 (a, 38).]—**Russian t.** T. obtained from *Pinus silvestris*. " Sanitas " is produced by passing air through its essential oil in contact with warm water. [a, 35.]—**Scio t.** See *Chian t.*—**Spirit** (or **spirits**) **of t.** See *Oil of t.*—**Strassburg t.** Lat., *terebinthina abietina* (seu *argentoratensis*). Fr., *térébenthine d'Alsace* (ou *au citron* [Fr. Cod.]). A t. obtained from the vesicles of the bark of *Pinus picea*, closely resembling Canadian balsam, but of a more agreeable odor and without acrid or bitter taste. It has the properties of common t. [a, 35.]—**T. clyster.** See *Enema* TEREBINTHINÆ.—**T. hydrochlorate.** See *Artificial* CAMPHOR.—**T. plant.** See SILPHIUM *laciniatum*.—**T. vapor bath.** Ger., *Terpentindampfbad*. A bath made by exposing the body to the vapor arising from the distillation of t.; used in rheumatic and pulmonary complaints. [B, 270.]—**Venetian t., Venice t.** See *Larch t.*—**White t.** See *American t.*

TURPETH, n. Tu⁵rp'e²th. Lat., *turpethum*. Fr., *turbith*. Ger., *Turbith*. The *Ipomœa turpethum*, its root (t. root, white t., vegetable t.), or the resin (resin of t.) obtained from the root. T.-root contains turpethin, a volatile oil, a yellow pigment, a fatty substance, iron oxide, etc. It acts like jalap, but is less powerful. [a, 35.]—**T. mineral.** Mercury subsulphate; so called from the resemblance of its color to that of the root of *Ipomœa turpethum*. [B, 5.]—**T.-root.** Lat., *radix turpethi* [Belg. Ph.] (*veri*). Fr., *turbith végétal* (*racine*) [Fr. Cod.]. Ger., *Turpithwurzel*. See under *T.*

TURPETHIC ACID, n. Tu⁵rp-e²th'i²k. Fr., *acide turpéthique*. An amorphous acid, $C_{34}H_{60}O_{18}$, obtained by dissolving turpethin in hot baryta water. [B, 92, 93 (a, 14).]

TURPETHIN, n. Tu⁵rp'e²th-i²n. Fr., *turpéthine*. An amorphous glucoside, $C_{34}H_{56}O_{16}$, isomeric with jalapin, obtained from turpeth resin. [B, 92, 93, 270 (a, 14, 38).]

TURPETHOLIC ACID, n. Tu⁵rp-e²th-o²l'i²k. A monobasic microcrystalline acid, $C_{16}H_{32}O_4$, obtained from turpethin. [B, 92, 93 (a, 14).]

TURPETHUM (Lat.), n. n. Tu⁵rp(tu⁴rp)-eth(ath)'u³m(u⁴m). See TURPETH.—**Extractum turpethi** [Würt. Ph.]. A preparation made by digesting 1 part of turpeth-root in 6 parts of alcohol and expressing, macerating and boiling the residue with 3 parts of water, clarifying with white of egg, mixing the decoction and tincture, distilling off the alcohol, and evaporating the residue to the proper consistence. [B, 97 (a, 14).]—**Radix turpethi** [Belg. Ph.] (**veri**). See TURPETH.—**T. minerale.** See MERCURY *subsulphate*.—**T. nigrum.** See MERCURY *and ammonium nitrate*.—**T. nitricum.** See *Basic* MERCURY *nitrate*.

TURPS, n. Tu⁵rps. See *Oil of* TURPENTINE.

TURRITIS (Lat.), n. f. Tu⁵r(tu⁴r)-ri(re)'ti²s. Gen., *-it'idos* (*-idis*). Fr., *turrite*. The genus *Arabis*. [a, 35.]

TURTLE-OIL, n. Tu⁵r't'l-oil. An oil prepared in South America from the eggs and in the Seychelles from the fat of various turtles; said to equal cod-liver oil as a nutrient. [a, 35.]

TURUNDA (Lat.), **TURUNDULA** (Lat.), n's f. Tu²r(tu⁴r)-u³nd(u⁴nd)'a³, -u²l(u⁴l)-a³. See TENT.

TUSCAN SPRINGS, n. Tu³s'k'n. A place in Tehama County, California, where there are mineral springs some of which are called also Lick Springs. [Anderson (a, 14).]

TUSCARORA ACID (SOUR) SPRINGS, n. Tu³sk-a³r-or'a³. Cold, astringent mineral springs, situated in Canada, containing a large proportion of alumina and free sulphuric acid and having a styptic taste. [A, 363 (a, 21).]

TUSNAD, n. Tu⁴s'na⁴d. A place in Csik, Transylvania, where there are gaseous, saline, and chalybeate springs. [L, 30, 57 (a, 14).]

TUSSAL, adj. Tu³s's'l. Pertaining to or due to a cough or coughing. [a, 48.]

TUSSICULATION, n. Tu³s-i²k-u²l-a'shu³n. From *tussis* (*q. v.*). See *Hacking* COUGH.

TUSSILAGE (Fr.), n. Tu⁶s-el-a³zh. See TUSSILAGO; of the Fr. Cod., see TUSSILAGO *farfara*.—**Sirop de t.** Sp., *jarabe de tusilago*. A preparation made by infusing 10 parts of dried t. flowers in 150 of boiling water, expressing, adding 9 parts of sugar for each 5 of clarified colature, boiling up quickly, and straining [Fr. Cod.], or by infusing 30 parts of t.-leaves in water enough to make 345, clarifying, and adding 620 of sugar [Sp. Ph.]. [B, 95 (a, 38).]—**Tisane de t.** [Fr. Cod.]. A preparation made by infusing 5 parts of the flowers of *Tussilago farfara* in 1,000 of boiling water for half an hour, and filtering. [B, 95 (a, 38).]—**T. (capitule)** [Fr. Cod.]. The dried flowers of *Tussilago farfara*. [B, 95 (a, 38).]

TUSSILAGO (Lat.), n. f. Tu³s(tu⁴s)-si²l-ag(a³g)'o. Gen., *-ag'inis*. From *tussis*, a cough. Fr., *tussilage*. Ger., *Huflattig*. 1. A genus of the *Compositæ*. The *Tussilagineæ* (Fr., *tussilaginées*) are a tribe of the *Synanthereæ* (*Compositæ*). 2. The *T. farfara*. [a, 35.]—**T. farfara.** Fr., *tussilage* (*farfara*), *chou de vigne*, *herbe Saint-Quirin*, *pas d'âne*, *pied de poulain*, *racine de peste*, *taconnet*. Ger., *gemeiner Huflattig*, *Brustlattig*, *Feldlattig*, *Eselhuf*, *Quirinkraut*. Colt's-foot, cough-wort, dove-dock, foal-foot, hoofs, horse-hoofs, clay-weed, cleats, bull's-foot, the βήχιον of Dioscori-

des; an herb indigenous to the temperate regions of the northern hemisphere. It is bitter, astringent, and demulcent, and is used as a pectoral. The leaves, which are the most active, were smoked by the ancients in pulmonary affections, and are still so used in asthma; they have also been recommended for scrofula. [α, 35.]—**T. petasites.** See PETASITES *vulgaris*.—**T. vulgaris.** See *T. farfara*.

TUSSIS (Lat.), n. f. Tu^{3}s(tu^{4}s)'si^{2}s. See COUGH.—**T. arthritica.** Of Sauvages, a cough associated with and due to gout. [α, 34.]—**T. calculosa.** Of Schenck, a cough caused by pulmonary calculi. [Sauvages (α, 34).]—**T. catarrhalis.** Of Sauvages, a cough associated with laryngeal or bronchial catarrh. [α, 34.]—**T. clangosa, T. convulsiva.** See PERTUSSIS.—**T. convulsiva hepatica.** Of Sauvages, a cough consequent upon hepatic disorder. [α, 34.]—**T. ferina.** Of F. Hoffmann, pertussis. [Sauvages (α, 34).]—**T. gravidarum.** Of Sauvages, a reflex cough due to pregnancy. [α, 34.]—**T. gutturalis.** Of Sauvages, a cough dependent upon chronic follicular pharyngitis or amygdalitis. [α, 34.]—**T. hysterica.** T. of hysterical origin. [α, 34.]—**T. metallicolarum.** Of Sauvages, a cough affecting workers in metals. [α, 34.]—**T. rheumatica.** Of Sauvages, a cough associated with pulmonary inflammation and pain. [α, 34.]—**T. sicca.** A cough without expectoration. [α, 34.]—**T. spasmodica.** See PERTUSSIS.—**T. stomachalis humida.** Of Sauvages, a moist cough following eating and due to gastric derangement. [α, 34.]—**T. stomachalis sicca.** Of Sauvages, a dry cough following eating and due to gastric derangement. [α, 34.]—**T. strangulans, T. suffocativa.** See PERTUSSIS.—**T. verminosa.** Of Sauvages, a reflex cough caused by larvæ in the bronchi. [α, 34.]—**T. xerolaryngosa.** Of Sauvages, a cough caused by dryness of the larynx. [α, 34.]

TUSSIVE, adj. Tu^{3}s'i^{2}v. Lat., *tussivus* (from *tussis*, a cough). Pertaining to coughing. [J.]

TUTAMEN (Lat.), n. n. Tu^{2}t(tut)-am(a^{3}m)'e^{2}n. From *tueri*, to protect. A protective structure. [α, 48.]—**Tutamina cerebri.** The skull and the meninges of the brain.

TUTE (Ger.), n. Tut'e^2. A convoluted structure. [α, 34.] See OCREA (1st def.).—**T'n des Keilbeines.** The sphenoidal turbinated bone. [α, 34.]—**T'nförmig.** See CONVOLUTE.

TUTENAG, n. Tu^{2}t'e^{2}n-a^{2}g. An old name for zinc, especially for that brought to Europe from India and China. [α, 48.]

TUTIA (Lat.), n. f. Tu^2(tu)'shi^2(ti^2)-a^3. Fr., *tuthie*. Sp., *tucia*. Tutty; an impure zinc oxide gathered from the flues of furnaces used for working lead and zinc ores. Finely powdered or washed, it is used as a desiccant in excoriations. [B, 5, 10; B, 95 (α, 38).]

TUTTY, n. Tu^{3}t'i^2. See TUTIA.

TUTU, n. See CORIARIA *ruscifolia*.

TVAROSZCZA, n. A place in Saros, Hungary, where there are saline and chalybeate springs. [L, 63.]

TVER, n. A place in the government of T., Russia, where there is an alkaline spring. [L, 30, 49 (α, 14).]

TWAYBLADE, n. Twa'blad. The *Listera ovata*, *Liparis liliifolia*, and other species of *Listera* and *Liparis*.

'TWEENBRAIN, n. Twen'bran. See MESENCEPHALON.

TWIN, adj. Twi^{2}n. Gr., δίδυμος. Lat., *geminus*, *didymus*. Fr., *jumeau*. Ger., *Zwilling* (n.), *Zwillingsfrucht* (n.). Double, paired, geminate; as a n., one of two children that are the product of one gestation. [α, 48.]—**Allantoido-angeiopagous t's.** T's of the same sex inclosed within a single chorion, one of them showing more or less grave developmental defects, and communicating with the other by means of the vessels of the umbilical cord in the neighborhood of the placenta. ["Edinburgh Med. and Surg. Jour.," March, 1893, p. 836 (α, 34).]—**Conjoined t's.** A double monster. [α, 34.]—**Homologous t's.** Of Ahlfeld, t's of the same sex inclosed within one chorion and drawing their nourishment from a single placenta. [α, 34.]—**Interlocking of t's, Locked t's.** The condition in which the birth of a t. is impeded by some part of it being held above its fellow, as when the first t. presents by the pelvic pole and its head can not pass the presenting head of the other t.—**Uniovular t's.** Fr., *jumeaux uniovulaires*. Ger., *eineiige Zwillinge*. T's developed from a single ovum containing a double germ, shown by the existence of only one chorion. [α, 34.]

TWINING, adj. Twin'i^{2}n^2. Climbing by twisting around a support. [α, 35.]

TWIN-LEAF, n. Twi^{2}n'lef. See JEFFERSONIA *diphylla*.

TWIN-POLE, n. Twi^{2}n'pol. See HOLOPOLE.

TWIST, n. Twi^{2}st. A spiral turn, a spiral disposition produced by turning; that result of the action of gravity on the fœtus in utero which consists in a turning of the latter until its centre of buoyancy and its centre of gravity lie in one vertical line. [Neville, "Dublin Jour. of Med. Sci.," June, 1882, p. 54.]

TWO-AXED, adj. Tu'a^{2}xt. See BIAXIAL.

TYLARUS (Lat.), n. m. Ti^{2}l(tu^{6}l)'a^{2}r(a^{3}r)-u^{3}s(u^{4}s). Gr., τύλαρος. Fr., *tylare*. Ger., *Zehenballe*. One of the pads under the toes in certain birds. [L, 343.]

TYLE (Lat.), n. f. Til(tu^{6}l)'e(a). Gen., *tyl'es*. Gr., τύλη. See CALLOSITY.

TYLE-BERRY, n. Til'be^{2}r-i^2. See JATROPHA *multifida*.

TYLODES (Lat.), adj. Til(tu^{6}l)-od'ez(as). Gr., τυλώδης (from τύλος, a callus, and εἶδος, resemblance). Fr., *tyleux*. See CALLOUS.

TYLOMA (Lat.), n. n. Til(tu^{6}l)-om'a^3. Gen., *-om'atos* (*-atis*). Gr., τύλωμα (from τύλος, a callus). Fr., *tylome*, *ognon*. Ger., *Schwiele*. A callosity of the skin, usually appearing on the hands or feet, due to a diffuse thickening of the epidermis, of limited extent, producing a whitish, indurated, and horny elevation of the surface, with more or less obliteration of the natural lines of the skin and impairment of the sense of touch, and sometimes marked by deep fissures. Usually it is the result of long-continued friction or pressure on the skin, but it sometimes originates spontaneously, and is then often congenital. [Unna (G).] Cf. CLAVUS (1st def.).

TYLOPHORA (Lat.), n. f. Til(tu^{6}l)-o^{2}f'o^{2}r-a^3. From τύλος, a callus, and φορεῖν, to bear. Fr., *tylophore*. A genus of the *Asclepiadeæ*. The *Tylophoreæ* are a section of the *Hoyeæ*. [α, 35.]—**T. asthmatica.** Fr., *ipécacuanha d'Inde*, *ipéca du pays* (ou *sauvage*). Country (or East Indian) ipecacuanha; a shrub of southern Asia and the adjacent islands. The root, *radix tylophoræ*, is emetic in large, and cathartic in small, repeated doses, and is used like ipecacuanha in dysentery, and also in moist asthma. The leaves, *folia tylophoræ*, official in the Bengal Ph. of 1844 and the Ph. of India of 1868, are also used in dysentery and as a diaphoretic, emetic, and expectorant. [α, 35.]

TYLOSIS (Lat.), n. f. Til(tu^{6}l)-os'i^{2}s. Gen., *-os'eos* (*-is*). Gr., τύλωσις (from τύλος, a callus). Fr., *t.*, *tylose*. Ger., *Tylose*, *Thylle* (5th def.). 1. See TYLOMA. 2. A laminated corn. [G.] 3. See LEUCOPLAKIA *buccalis*. 4. A chronic inflammation of the margin of the eyelid, in which the whole substance of the lid along the margin is thickened and hardened. [F.] 5. A protuberance of the wall of a plant-cell into the cavity of an adjacent duct. [α, 35.]—**T. calleux** (Fr.). See TYLOMA.—**T. gompheux et bulbeux** (Fr.). Clavus, including the hard conical form (t. gompheux) and a laminated form (t. bulbeux) resembling somewhat the structure of an onion, usually observed on the sole of the foot. [G, 7.]—**T. linguæ.** See LEUCOPLAKIA *buccalis* and ICHTHYOSIS *linguæ*.—**T. palmæ manus plana.** Of Hebra, acquired tyloma. [α, 34.]—**T. palmæ manus verrucosa.** Of Hebra, tyloma in which there are millet-sized horny nodules imbedded in the epidermis. [α, 34.]

TYLOSTERESIS (Lat.), n. f. Til(tu^{6}l)-o(o^3)-ste^{2}r-e(a)'si^{2}s. Gen., *-es'eos* (*-es'is*). From τύλος, a callus, and στερεῖν, to deprive. The removal of a callosity. [L, 50 (α, 14).]

TYLUS (Lat.), n. m. Til(tu^{6}l)'u^{3}s(u^{4}s). Gr., τύλος. See TYLOMA.

TYMMA (Lat.), n. n. Ti^{2}m(tu^{6}m)'ma^3. Gen., *tym'matos* (*-atis*). Gr., τύμμα (from τύπτειν, to strike). See WOUND.

TYMPAN (Fr.), n. Ta^{2}n^2-pa^{3}n^2. See TYMPANUM.—**T. secondaire.** See MEMBRANA *tympani secundaria*.

TYMPANAL (Fr.), n. Ta^{2}n^2-pa^3-na^{3}l. The metapterygoid bone in fishes. [L, 14.]

TYMPANECTOMIA (Lat.), n. f. Ti^{2}mp(tu^{6}mp)-a^{2}n(a^{3}n)-e^{2}k-tom(to^{2}m)'i^2-a^3. From τύμπανον (see TYMPANUM), and ἐκτομή, a cutting out. Of Brunner, excision of the membrana tympani. [α, 34.]

TYMPANIC, adj. Ti^{2}m-pa^{2}n'i^{2}k. Lat., *tympanicus*. Fr., *tympanique*. Ger., *tympanisch*. Pertaining to or connected with the tympanum; as a n., see *T.* BONE.

TYMPANICOLINGUALIS (Lat.), adj. Ti^{2}mp(tu^{6}mp)-a^{2}n-(a^{3}n)''i^{2}k-o(o^3)-li^{2}n^2-gwal(gwa^{3}l)'i^{2}s. From *tympanum* (*q. v.*), and *lingua*, the tongue. Pertaining to the tympanic region and the tongue.

TYMPANISM, n. Ti^{2}mp'a^{2}n-i^{2}zm. Gr., τυμπανισμός. Lat., *tympanismus*. See TYMPANITES.

TYMPANITES (Lat.), n. m. Ti^{2}mp(tu^{6}mp)-a^{2}n(a^{3}n)-it(et)'ez-(as). Gen., *-it'u* (*-it'æ*). Gr., τυμπανίτης (from τύμπανον, a kettle-drum). Fr., *tympanite*. Ger., *T.*, *Aufblähung*, *Auftreibung*. A distended condition of the abdomen due to paralysis of the muscular coat of the intestines and their inflation with gas generated within them. [D. 20.]—**Acute t.** A sudden and excessive t. in puerperal women, with intense pain and great depression, simulating peritonitis; a variety of the "intestinal irritation" of Marshall Hall. [A. 43.]—**Peritoneal t., T. abdominalis.** 1. T. due to an accumulation of air in the peritoneal cavity. [B.] 2. See *T.*—**T. aeriperitonia.** See *Peritoneal t.* (1st def.).—**T. intestinalis.** See *T.*—**T. pericardii.** See PNEUMOPERICARDIUM.—**T. universalis.** General emphysema. [L.]—**T. uteri.** See PHYSOMETRA.

TYMPANITIC, adj. Ti^{2}mp-a^{2}n-i^{2}t'i^{2}k. Gr., τυμπανιτικός. Lat., *tympaniticus*. Fr., *ballonné*. Ger., *tympanisch*. 1. Of the nature of or affected with tympanites. 2. Of a percussion-note, resembling in quality the note produced by percussing a tympanitic abdomen.

TYMPANITIS (Lat.), n. f. Ti^{2}mp(tu^{6}mp)-a^{3}n(a^{3}n)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). See OTITIS *media*.

TYMPANO-EUSTACHIAN, adj. Ti^{2}mp''a^{2}n-o-u^{3}s-tak'i^2-a^{2}n. For deriv., see TYMPANUM and EUSTACHIAN. Pertaining to the tympanum and the Eustachian tube. [α, 48.]

TYMPANOHYAL, adj. Ti^{2}mp-a^{2}n-o-hi''l. Pertaining to the tympanic region or bone and the hyoid apparatus; as a n., see *T.* BONE.

TYMPANO-KONIANTRON (Lat.), n. n. Ti^{2}mp(tu^{6}mp)''a^{2}n-(a^{3}n)-o(o^3)-kon(ko^{2}n)-i^2-a^{2}nt(a^{3}nt)'ro^{2}n. From τύμπανον, a kettle-drum, κονία, dust, and ἄντρον, a cavity. Of Weber and Liel, a longitudinally perforated piece of vulcanite with a small lateral tube, used with a catheter for medication of the tympanic cavity. [Gruber.]

TYMPANOMALLÉAL [Agassiz] (Fr.), n. Ta^{2}n^2-pa^3-no-ma^3-la-a^{3}l. See *Symplectic* BONE.

TYMPANOMALLEARIS (Lat.), n. m. Ti^{2}mp(tu^{6}mp)-a^{2}n-(a^{3}n)-o(o^3)-ma^{2}l(ma^{3}l)-le^2-ar(a^{3}r)'i^{2}s. From *tympanum* (*q. v.*), and *malleus* (*q. v.*). See LAXATOR *tympani minor*.

TYMPANOPETROSOSALPINGOPTERYGOPALATINUS (Lat.), n. m. Ti^{2}mp(tu^{6}mp)''a^{2}n(a^{3}n)-o(o^3)-pe^{2}t-ros'''o(o^3)-sa^{2}lp-(sa^{3}lp)-i^{2}n^{2}g''''o(o^3)-te^{2}r(pte^{2}r)'''''i^{2}g(u^{6}g)-o(o^3)-pa^{2}l(pa^{3}l)-a^{2}t(a^{3}t)-in-(en)'u^{3}s(u^{4}s). From τύμπανον, a kettledrum, πέτρα, a rock, σάλπιγξ, a trumpet, πτέρυξ, a wing, and *palatum*, the palate. See ABDUCTOR *of the Eustachian tube*.

TYMPANOPHONIA (Lat.), n. f. Ti^{2}mp(tu^{6}mp)-a^{2}n(a^{3}n)-o(o^3)-fon'i^2-a^3. From τύμπανον (see TYMPANUM), and φωνή, sound. See AUTOPHONY (2d def.).

TYMPANOSTYLOÏDE (Fr.), n. Ta^{2}n^2-pa^0-no-ste-lo-ed. Of G. St.-Hilaire, the tympanic bone in birds. [L, 14.]

TYMPANUM (Lat.), n. n. Ti^{2}mp(tu^{6}mp)'a^{2}n(a^{3}n)-u^{3}m(u^{4}m). From τύμπανον, a kettledrum. Fr., *tympan.* Ger., *Pauke.* 1. The drum of the ear, the cavity of the middle ear; in a more restricted sense, the membrana tympani. [α, 48.] 2. Of Duvernoi, see Sæptum *lucidum*.—**T. secundarium, T. secundum.** See Ligamentum *obturatorium stapedis.*

TYMPANY, n. Ti^{2}mp'a^{2}n-i^2. See Tympanites.

TYNEMOUTH, n. Tin'mu^{3}th. A sea-bathing resort in Northumberland, England, where there is a chalybeate spring. [α, 14.]

TYPE, n. Tip. Gr., τύπος. Lat., *typus.* Fr., *t.* Ger., *Typus, Gepräge, Vorbild.* 1. A model, a representative or ideal form, structure, or specimen; of a disease, its character as shown by the order, intensity, etc., of the symptoms. [D, 1.] 2. In chemistry, a substance the graphic formula of which serves as a model of construction for numerous other bodies whose graphic formulæ, accordingly, may be reproduced by substituting the appropriate radicles for the radicles of the typical formula. The principal substances used as t's are water, ammonia, hydrogen, and methane (see the subheadings). [B.] 3. In biology, (*a*) the ideal plan on which an organ or form is constructed; (*b*) the primitive pattern on which a group was first established; and (*c*) a group (species, genus, etc.) representing in its characters as completely as possible a higher group. [α, 35.]—**Ammonia t.** The t. of which ammonia is the characteristic example. Compounds formed on this t. have the composition of ammonia, $H - N\langle^{H}_{H}$, in which 2 or 3 of the hydrogen atoms are replaced by elements or radicles (see Amine, Amide, and Alkaloid). Belonging to this t. are also compounds in which not only the hydrogen but also the nitrogen of the ammonia is replaced, forming the *arsines, bismuthines, stibines, phosphines,* etc. The compounds formed on this t. are distinguished by acting as unsaturated bodies, the nitrogen or replacing element being either trivalent or quinquivalent, and the general formula of these compounds being either $R - \underset{R}{\underset{|}{N}} - R$ or $R - \overset{V}{\underset{R}{\underset{|}{N}}} - R$. [B.]—**Benzene t.** The t. of which benzene is the characteristic example. The compounds formed on this t. are the substitution products of benzene, or the aromatic compounds. [B.]—**Marsh-gas t., Methane t.** The t. of which methane is the characteristic example. Compounds formed on this t. may be regarded as methane, $H - \overset{H}{\underset{H}{C}} - H$, in which 1, 2, 3, or 4 of the hydrogen atoms are replaced by elements or radicles. This t. accordingly comprehends all the paraffins and their substitution compounds. [B.]—**Water t.** The t. of which water is the characteristic example. All compounds formed on this t. may be regarded as water, $H - O - H$, in which one or both of the hydrogen atoms are replaced by elements or radicles. Thus, $K - O - H$, caustic potash, $C_2H_5 - O - H$, alcohol, and $NO_2 - O - H$, nitric acid, and in general all hydrates, alcohols, and oxygen acids are formed on the water t., one atom of hydrogen being replaced; and $K - O - K$, potassium oxide, $C_2H_5 - O - C_2H_5$, ether, and in general all oxides are formed on the same t., the 2 atoms of hydrogen being replaced. [B.]

TYPHA (Lat.), n. f. Tif(tu^{6}f)'a^3. From τύφη, cat's-tail. Fr., *massette.* Ger., *Rohrkolben.* A genus forming with *Sparganium* the typhads, which are an order (the *Typhaceæ, Typhæ, Typheæ,* or *Typhineæ*) of monocotyledonous herbs. The *Typheæ* are also a tribe of the *Typhaceæ.* [α, 35.]—**T. angustifolia.** Fr., *chandelle, quenouille.* Small bulrush, reree-plant; an Indian species, used like *T. latifolia.* [α, 35.]—**T. elephantina, T. elephantum.** Elephant-grass; an Indian species, used like *T. latifolia.* [α, 35.]—**T. japonica.** A Japanese species. The pollen (called *hoh-oh*) is used as a desiccant, astringent, styptic, and sedative. [α, 35.]—**T. latifolia, T. major.** Fr., *chandelle, jonc de la passion, masse à bedeau* (ou *d'eau*), *roseau des étangs* (ou *de la passion*), *quenouille, massette.* Ger., *breitblättriger* (oder *schwarzer*) *Rohrkolben.* (Great) cat's-tail (or reed-mace), blackcap, blackheads, bulrush, marsh beetle (or pestle), baccocolts, dod, cat-o'-nine-tails. The astringent roots are used in dysentery, etc., and as a diuretic and antiscorbutic, and the pollen as a desiccant. [α, 35.]

TYPHÆMENTERITIS (Lat.), n. f. Tif(tu^{6}f)-e^{2}m(a^3-e^{2}m)-e^{2}nt-e^{2}r-i(e)'ti^{2}s. Gen., *it'idos* (*-idis*). From τῦφος, fever-stupor, αἷμα, blood, and ἔντερον, an intestine. See Hæmotyphenteritis.

TYPHÆMIA (Lat.), n. f. Tif(tu^{6}f)-em'(a^3'e^{2}m)-i^2-a^3. From τῦφος, fever-stupor, and αἷμα, blood. The depraved state of the blood characteristic of typhus.

TYPHAL, adj. Ti'f'l. Lat., *typhalis.* Belonging to the *Typhales,* which are Lindley's t. alliance (Lat., *nixus typhalis*) of the *Imperfectæ,* consisting of the *Typhaceæ.* [α, 35.]

TYPHANGONE (Lat.), n. f. Tif(tu^{6}f)-a^{2}n^2(a^{3}n^2)'go^{2}n-e(a). Gen., *-an'gones.* For deriv., see Typhus and Angone. Of Eisenmann, typhoid angina. [L, 50 (α, 14).]

TYPHECPHLOGIA (Lat.), n. f. Tif(tu^{6}f)-e^{2}k-floj(flo^{2}g)'i^2-a^3. For deriv., see Typhus and Ecphlogia. Fr., *typhlecphlogie.* Ger., *typhöse Blatternkrankheit.* Typhoid variola. [L, 50 (α, 14).]

TYPHIC, adj. Tif'i^{2}k. Fr., *typhique.* Ger., *typhisch.* See Typhous.

TYPHINE, n. Tif'en. Of Farr, the morbific germ of typhoid fever.

TYPHINIA (Lat.), n. f. Tif(tu^{6}f)-i^{2}n'i^2-a^3. See *Relapsing* fever.

TYPHISATION (Fr.), n. Te-fe-za^3-se-o^{2}n^2. The induction of such a depraved state of the blood or of the system as is characteristic of typhus.—**T. cholémique** [Peter]. See Icterus *gravis.*

TYPHISME (Fr.), n. Te-fez'm. From τῦφος, fever-stupor. See Typhoid *state.*

TYPHLIATER (Lat.), n. m. Ti^{2}f(tu^{6}f)-li^2-a(a^3)'tu^{6}r(tar). Gen., *-at'ros* (*-ris*). From τυφλός, blind, and ἰατήρ, a physician. Fr., *typhliatre.* Ger., *Blindenarzt.* A physician for the blind.

TYPHLITIS (Lat.), n. f. Ti^{2}f(tu^{6}f)-li(le)'ti^{2}s. Gen., *-it'idos* (*-idis*). From τυφλόν, the cæcum. Fr., *typhlite.* Ger., *Blinddarmentzündung.* Inflammation of the cæcum. [D, 70.] Cf. Paratyphlitis and Perityphlitis.

TYPHLOCELE (Lat.), n. f. Ti^{2}f(tu^{6}f)-lo(lo^3)-sel(kal)'e(a); in Eng., ti^{2}f'lo-sel. Gen., *-cel'es.* From τυφλός, blind, and κήλη, a tumor. Of Treves, a hernia of the cæcum. [α, 34.]

TYPHLO-DICLIDITE (Fr.), n. Te-flo-de-kle-det. From τυφλόν, the cæcum, and δικλείς, a double door. Inflammation of the ileo-cæcal valve. [L, 41 (α, 14).]

TYPHLO-ENTERITIS (Lat.), n. f. Ti^{2}f(tu^{6}f)-lo(lo^3)-e^{2}nt-e^{2}r-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). For deriv., see Typhlon and Enteritis. See Typhlitis.

TYPHLOLITHIASIS (Lat.), n. f. Ti^{2}f(tu^{6}f)-lo(lo^3)-li^{2}th-i^2-a(a^3)'si^{2}s. Gen., *-as'eos* (*-as'is*). For deriv., see Typhlon and Lithiasis. Lithiasis of the cæcum. [α, 48.]

TYPHLON (Lat.), n. n. Ti^{2}f(tu^{6}f)'lo^{2}n. From τυφλός, blind. Of Galen, the cæcum. [A, 311 (α, 48).]

TYPHLOPS (Lat.), adj. Ti^{2}f(tu^{6}f)'lo^{2}ps(lops). Gen., *-op'os* (*-op'is*). Gr., τυφλώψ (from τυφλός, blind, and ὤψ, the eye). Blind. [F.]

TYPHLOSIS (Lat.), n. f. Ti^{2}f(tu^{6}f)-los'i^{2}s. Gen., *-os'eos* (*-os'is*). Gr., τύφλωσις (from τυφλός, blind). See Blindness.

TYPHLOSOLE, n. Ti^{2}f'lo-sol. From τυφλός, blind, and σωλήν, a tube. A thick fold of the intestinal wall projecting into its cavity, found in some *Invertebrata.* [L, 11.]

TYPHLOSTENOSIS (Lat.), n. f. Ti^{2}f(tu^{6}f)-lo(lo^3)-ste^{2}n-os'i^{2}s. Gen., *-os'eos* (*-os'is*). For deriv., see Typhlon and Stenosis. Stenosis of the cæcum. [α, 48.]

TYPHLOTES (Lat.), n. f. Ti^{2}f(tu^{6}f)'lo^{2}t-ez(as). Gen., *-et'os* (*-et'is*). Gr., τυφλότης. See Blindness.

TYPHLOTOMY, n. Ti^{2}f-lo^{2}t'om-i^2. From τυφλόν, the cæcum, and τέμνειν, to cut. Ger., *Typhlotomie.* An incision into the cæcum.

TYPHLOTROPHIUM (Lat.), n. n. Ti^{2}f(tu^{6}f)-lo(lo^3)-trof(tro^{2}f)'-i^2-u^{3}m(u^{4}m). From τυφλός, blind, and τρέφειν, to nourish. Ger., *Blindenanstalt.* An asylum for the blind. [L, 50 (α, 14).]

TYPHOBACILLOSIS (Lat.), n. f. Tif(tu^{6}f)-o(o^3)-ba^{2}s(ba^{3}k)-i^{2}l-los'is. Gen., *-os'eos* (*-os'is*). From τῦφος, stupor (see also Bacillus). Ger., *Typhobacillose.* Of Landouzy, the systemic poisoning produced by the toxines formed by the *Bacillus typhosus.* [α, 34.]

TYPHODES (Lat.), adj. Tif(tu^{6}f)-od'ez(as). Gr., τυφώδης (from τῦφος, fever-stupor, and εἶδος, resemblance). See Typhoid.

TYPHODYSENTERIA (Lat.), n. f. Tif(tu^{6}f)-o(o^3)-di^{2}z(du^{6}s)-e^{2}nt-e(e^2)'ri^2-a^3. From τῦφος, fever-stupor, and δυσεντερία, dysentery. Typhoid dysentery. [L, 50 (α, 14).]

TYPHOID, adj. Tif'oid. Gr., τυφώδης (from τῦφος, fever-stupor, and εἶδος, resemblance. Fr., *typhoïde.* Ger., *t.* 1. Typhous. 2. Of the nature of or resembling t. fever; as a n., t. fever (see under Fever). [D.]—**Group t.** Of E. Wagner, t. fever occurring in several persons in the same family, house, or locality, and presenting striking similarity in its phenomena. [α, 34.]—**Laryngeal t.** Laryngitis occurring in and due to t. fever. [α, 34.]—**Pig t.** See Typhus *de porc.*—**T. condition, T. state.** The state or condition in which t. symptoms are present. In addition to fever, this condition may exist in typhus fever, pneumonia, acute rheumatism, acute tuberculosis, pyæmia, uræmia, and some other diseases. [C.]

TYPHOID (Ger.), n. Tu^{6}f-o-ed'. 1. An inflammation of a septic and malignant character. 2. In the pl., *T'e,* of Fuchs, a family of the order of hæmatonoses of the skin, including anthrax contagiosus, traumatocace, noma, and filaria (the *neurophlogoses* of Schönlein). [G.]—**Geflügelt'.** See *Chicken* cholera.

TYPHOÏDIQUE (Fr.), adj. Te-fo-e-dek. Petaining to or resembling typhoid fever or a typhoid condition. [D.]

TYPHOÏGÈNE (Fr.), adj. Te-fo-e-zhe^{2}n. Productive of typhoid fever (applied to localities). [Cotin, quoted by Fayrer, "Brit. Med. Jour.," May 6, 1882, p. 646.]

TYPHOÏQUE (Fr.), n. Te-fo-ek. A person affected with typhoid fever.

TYPHOMANIA (Lat.), n. f. Tif(tu^{6}f)-o(o^3)-man(ma^{3}n)'i^2-a^3. For deriv., see Typhus and Mania. Fr., *typhomanie.* Ger., *Typhomanie.* The low muttering delirium of typhus and typhoid fever.

TYPHONIA (Lat.), n. f. Tif(tu^{6}f)-on'i^2-a^3. From τῦφος, fever-stupor. See Coma-*vigil* (1st def.).

TYPHONIUM (Lat.), n. n. Ti^{2}f(tu^{6}f)-on'i^2-u^{3}m(u^{4}m). Fr., *typhonie.* A genus of the *Aroideæ.* [α, 35.]—**T. divaricatum.** Indian kale. The leaves are used in the Fiji and Hawaiian Islands as a vegetable. The root resembles in properties the corm of *Arum maculatum.* [B; α, 35.]

TYPHOPHTHALMIA (Lat.), n. f. Tif(tu^{6}f)-o^{2}f-tha^{2}l(tha^{3}l)'-mi^2-a^3. For deriv., see Typhus and Ophthalmia. Of Eisenmann, ophthalmotyphus. [L, 50 (α, 14).]

TYPHOPNEUMONIA (Lat.), n. f. Tif(tu^{6}f)-o(o^3)-nu^2(pnu^2)-mon(mo^{2}n)'i^2-a^3. For deriv., see Typhus and Pneumonia. Pneumonia occurring in the course of typhoid or typhus fever.

TYPHOSE (Fr.), n. Te-foz. See Typhoid *state.*—**T. syphilitique** [Fournier]. A typhoid state accompanied by continued fever, seen in the secondary period of syphilis. [α, 18.]

TYPHOSEPSIS (Lat.), n. f. Tif(tu^{6}f)-o(o^3)se^{2}ps(saps)′i^{2}s. Gen., *-seps′eos* (*-is*). From τῦφος, fever-stupor, and σῆψις, decay. Of L. Buzzonini, the systemic poisoning occurring in and caused by typhoid fever. [L, 50 (*a*, 34).]

TYPHOSUS (Lat.), adj. Tif(tu^{6}f)-os′u^{3}s(u^{4}s). From τῦφος, fever-stupor. Typhous, typhoid. [*a*, 17.]

TYPHOTOXINE, n. Tif-o-to^{2}x′en. From *typhus* (*q. v.*), and *toxicum*, poison. A poisonous base, $C_7H_{17}NO_2$, isomeric with gadinine, found in cultures of the *Bacillus typhosus*. [Brieger, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cxv, p. 483 (B).]

TYPHOUS, adj. Tif′u^{3}s. From *typhus* (*q. v.*). Fr., *typhique*. Ger., *typhös*, *typhisch*. Of the nature of, pertaining to, or resembling typhus. [D.]

TYPHUS (Lat.), n. m. Tif(tu^{6}f)′u^{3}s(u^{4}s). From τῦφος, fever-stupor. Fr., *t.* Ger., *T.* See *T.* FEVER.—**Abdominal t.** See *Typhoid* FEVER.—**Abortive t.** An incomplete form of t. with a sudden and favorable stop in the evolution of the disease. [L, 87 (*a*, 50).]—**Abortive t. with icterus.** See *Weil's* DISEASE.—**Catarrhal t.** Irish fever; the peculiar type of t. fever prevalent in Ireland; it is characterized by thoracic complications. [D, 72.]—**Cerebralt′** (Ger.). See *Typhoid* FEVER.—**Cerebro-spinal t.** See *Cerebro-spinal* MENINGITIS.—**Congestive t.** A form of t. in which the seat of the pathological process was supposed to be in the veins. [B, 226.] Cf. *Inflammatory t.*—**Exanthematischer T.** (Ger.), **Fleckt′** (Ger.). See *T.* FEVER.—**Ganglionic t.** See *Typhoid* FEVER.—**Hunger t.** See *T.* FEVER and *Relapsing* FEVER.—**Indian t.** See *Asiatic* CHOLERA.—**Inflammatory t.** A form of t. in which the seat of the pathological process was supposed to be in the arteries. [B, 226.] Cf. *Congestive t.*—**Irish t.** See *Catarrhal t.*—**Knochent′** (Ger.). See OSTEOMYELITIS.—**Kriegst′** (Ger.). See *T.* FEVER.—**Maculated t.** T. gravior accompanied with a macular eruption. [D.]—**Oriental t.** See PLAGUE.—**Pernicious t.** See *T. gravior.*—**Petechial t.** True t. fever. [D, 74.]—**Puerperal t., Puerpero-t.** Fr., *t. des femmes en couches.* 1. Puerperal fever. 2. The gangrenous and diphtheritic forms of puerperal fever. [A, 9, 15.]—**Sinking t.** Of T. Miner, the t. epidemic that occurred in New England in 1823, characterized by great depression. [*a*, 34.]—**Spotted t.** See *Maculated t.*—**T. abdominalis.** See *Typhoid* FEVER.—**T. ægyptiacus.** Probably typhoid fever, occurring epidemically among the Egyptians. [*a*, 34.]—**T. amaril** (Fr.), **T. amaryl** (Fr.). See *Yellow* FEVER.—**T. ambulatorius.** Mild typhoid fever that allows the patient to pursue his usual avocations during the greater part of the disease. [*a*, 34.]—**T. aphthoideus.** See APHTHA *infantum.*—**T. apoplectico-tétanique** (Fr.). See *Cerebro-spinal* MENINGITIS.—**T. à rechutes** (Fr.). See *Relapsing* FEVER.—**T. bengalensis.** See *Asiatic* CHOLERA.—**T. biliosus.** See *Bilious typhoid* FEVER and *Yellow* FEVER.—**T. carbunculosus.** See ANTHRACOTYPHUS.—**T. carcerum.** See *Jail* FEVER.—**T. castrensis.** See *Camp* FEVER and *T.* FEVER.—**T. cérébral convulsif** (Fr.). See *Electric* CHOREA.—**T. cerebralis apoplecticus**, **T. cérébro-spinal** [Boudin] (Fr.). See *Cerebro-spinal* MENINGITIS.—**T. charbonneux** (Fr.). See *Contagious* ANTHRAX.—**T. chlériforme** (Fr.). See *Typhoid* FEVER.—**T. comatosus.** T. with profound coma. [*a*, 34.]—**T. convulsif épidémique** (Fr.). See *Cerebro-spinal* MENINGITIS.—**T. d'Afrique** (Fr.). See PLAGUE.—**T. d'Amérique** (Fr.). See *Yellow* FEVER.—**T. d'écurie** (Fr.). See *T. equilis.*—**T. de la faim** (Fr.). See *T.* FEVER and *Relapsing* FEVER.—**T. de porc** (Fr.). A term applied to contagious anthrax, also to measles in the pig. [A, 301 (*a*, 34).]—**T. des Antilles.** See *Yellow* FEVER.—**T. des femmes enceintes** (Fr.). A generic term for t. and typhoid fever occurring during pregnancy. [A, 24.]—**T. des membres** (Fr.). See *Infectious* OSTEOMYELITIS.—**T. des tropiques** (Fr.). See *Yellow* FEVER.—**T. equilis.** Fr., *t. d'écurie.* Of Mégnin, influenza in the horse. [*a*, 34.]—**T′erysipel** (Ger.). Erysipelas observed during a typhus epidemic. [L, 57 (*a*, 50).]—**T. exanthematicus.** See *Exanthematic t.* FEVER and *T.* FEVER.—**T. exhaustorum.** T. affecting soldiers, sailors, prisoners, and others that have been subjected to privations, exposure, and exhaustion. [*a*, 34.]—**T. gangliaris.** See *Typhoid* FEVER.—**T. gift** (Ger.). The poison of t. fever or of typhoid fever. [D, 18.]—**T. gravior.** T. fever of severe or malignant type.—**T. hépatique** (Fr.). Of Landouzy, infectious jaundice with wasting of the liver cells. [*a*, 34.]—**T. hysterico-verminosus** [Sauvages]. See *Typhoid* FEVER.—**T. icterodes.** See *Bilious typhoid* FEVER and *Yellow* FEVER.—**T. irritabilis.** See *Typhoid* FEVER.—**T. jaune** (Fr.). See *Yellow* FEVER.—**T. levis.** Fr., *t. léger.* A form of typhoid fever in which the symptoms are regular, but very mild and of short duration.—**T. levissimus.** A febrile condition which presents more or fewer of the symptoms of typhus fever, but with great indistinctness. [Eloy, "Un. méd.," May 24, 1884, p. 913 (D).]—**T. malarique** (Fr.). See *Typho-malarial* FEVER.—**T. manipuera.** Of Sauvages, a disease resembling t., produced by taking the juice of the manihot. [*a*, 34.]—**T. mitior.** See *Typhoid* FEVER and *T. levis.*—**T. nervosus.** See *Typhoid* FEVER.—**T. nosocomialis.** See *T.* FEVER.—**T. odor.** The peculiar odor exhaled from the skin in t. fever. It is variously compared to the odor of rotten straw, mice, deer, certain reptiles, etc. It is strongest in damp weather and when the ventilation of the patient's room is bad. It is thought that the exhalation carries the poison of the fever. [D, 1.]—**T. petechialis gravior** [Cullen]. T. in which rigor and heat alternate without perspiration, and delirium is succeeded by stupor. [*a*, 34.]—**T. petechialis mitior** [Cullen]. T. with coma or quiet delirium, nausea, precordial oppression, and despondency. [*a*, 34.]—**T. pestilens.** See *T.* FEVER.—**T. putridus** [Cullen]. Severe t. fever. [*a*, 34.]—**T. recurrens.** See *Relapsing* FEVER.—**T. scarlatina.** See *Scarlet* FEVER.—**T. secundarius.** T. consequent upon some primary disease. [*a*, 34.]—**T′schorf** (Ger.). A crust-like slough shed from the intestinal glands in typhoid fever.—**T. sidérant** (Fr.). See *T. gravior.*—**T. syncopalis.** See *Sinking t.*—**T. urinosus.** See URÆMIA.—**T. vénérien** (Fr.). See *Equine* SYPHILIS.—**T. versatilis.** T. associated with great delirium. [*a*, 34.]—**T. vesicularis** [Cullen]. See PEMPHIGUS.—**Yellow t.** See *Pernicious yellow* FEVER.

TYPICAL, adj. Ti^{2}p′i^2-k′l. Gr., τυπικός. Lat., *typicus*. Fr., *typique*. Ger., *typisch*. Pertaining to or representing a type. [*a*, 35.]

TYPOSIS (Lat.), n. f. Tip(tu^{6}p)-os′i^{2}s. Gen., *-os′eos* (*-os′is*). Gr., τύπωσις (from τύπος, an impression). Ger., *Typose*. A periodically recurring disease; intermittent fever. [G.]

TYPUS (Lat.), n. m. Tip(tu^{6}p)′u^{3}s(u^{4}s). Gr., τύπος (from τύπτειν, to beat). See TYPE.—**T. intermittens anteponens.** See *Anticipating intermittent* FEVER.—**T. intermittens postponens.** See *Postponing intermittent* FEVER.

TYRALINE, n. Tir′a^{2}l-en. See MAUVE and MAUVEINE.

TYREIN, n. Tir′e^2-i^{2}n. Fr., *tyréine*, *tyrine*. See CASEIN.

TYREMESIS (Lat.), n. f. Tir(tu^{6}r)-e^{2}m′e^{2}s-i^{2}s. Gen., *-es′eos* (*-e′mesis*). From τυρός, cheese, and ἔμεσις, vomiting. Vomiting of cheesy or curdy matter. [L, 30, 50 (*a*, 14).]

TYRIASIS (Lat.), n. f. Ti^{2}r(tu^{6}r)-i(i^2)′a^{2}s(a^{3}s)-i^{2}s. Gen., *-as′eos* (*-i′asis*). See ALOPECIA and ELEPHANTIASIS.

TYRODES (Lat.), adj. Tir(tu^{6}r)-od′ez(as). Gr., τυρώδης (from τυρός, cheese, and εἶδος, resemblance). Fr., *tyreux*. Cheesy.

TYROLEUCIN, n. Tir-o-lu^2′si^{2}n. Fr., *tyroleucine*. A starchy compound, $C_{14}H_{22}N_2O_4$, obtained from the decomposition products of albumin. [B, 93 (*a*, 14).]

TYROMA (Lat.), n. n. Tir(tu^{6}r)-om′a^3. Gen., *-om′atos* (*-atis*). Gr., τύρωμα (from τυρός, cheese). A tumor caused by caseation of the lymphatic glands. [A, 326 (*a*, 48).]

TYROSIN, TYROSINE, n's. Tir′o^{2}s-i^{2}n, -en. Oxyphenylamidopropionic acid, $C_9H_{11}NO_3 = C_6H_4 \langle {}^{OH}_{C_2H_3} (NH_2)CO.OH$, occurring as colorless, tasteless, and odorless acicular crystals. It dissolves in acids and solutions of the caustic alkalies, forming saline compounds with both. It is found uniformly among the products of proteid decomposition, and is thus produced in the intestines by the processes of pancreatic digestion. It is also said to occur normally in the spleen, pancreas, etc., but this is doubtful. Pathologically, it occurs in the urine, especially in acute yellow atrophy of the liver, and it has also been found in various parts of the body. [B, 12; B, 3, 270 (*a*, 38).]—**T.-hydantoic acid.** A substance, $C_6H_4 \langle {}^{OH}_{C_2H_3} .NH.CONH_2.COOH = C_{10}N_2H_{12}O_4$, forming large, transparent prismatic crystals, and bearing the same chemical relation to t. that hydantoic acid bears to glycocine. [Jaffe, "Ztschr. f. physiol. Chem.," vii, p. 306 (B).]—**T.-hydantoin.** A substance, $C_{10}H_{10}N_2O_3$, forming yellow acicular crystals, found in the urine of dogs fed upon t. [Blendermann, "Ztschr. f. physiol. Chem.," v, 234; Jaffe, "Ztschr. f. physiol. Chem.," vii, p. 306 (B).]

TYROSIS (Lat.), n. f. Tir(tu^{6}r)-os′i^{2}s. Gen., *-os′eos* (*-os′is*). From τυρός, cheese. 1. Curdling. 2. See TYREMESIS. 3. See CASEATION.

TYROTOXICON, n. Tir-o-to^{2}x′i^2-kon. From τυρός, cheese, and τοξικόν, poison. Ger., *Käsegift*. A poisonous substance, $C_6H_5N_2$, found by V. C. Vaughan, in 1886, in poisonous cheese and in poisonous vanilla ice-cream. [B; *a*, 35.]

U

UATERIUM (Lat.), n. n. U^2(u)-a^{2}t(a^{3}t)-e(a)′ri^2-u^{3}m(u^{4}m). From οὖς, the ear. Fr., *uatérion*. A medicament for the ear. [L, 50 (*a*, 14).]

UDDER, n. U^{3}d′u^{6}r. Gr., οὖθαρ. Lat., *uber*. Fr., *pis*. Ger., *Euter*. The consolidated mammæ of the cow.

UDENIA (Lat.), n. f. U^{2}d(ud)-e^{2}n-i(e)′a^3. Gr., οὐδένεια (from οὐδέν, nothing). Worthlessness.

UDIKA, UDIKA-BREAD, n's. See DIKA.

UDOSADENITIS (Lat.), n. f. U^{2}d(ud)-os-a^{2}d(a^{3}d)-e^{2}n-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). Fr., *udosadénite*. See HIDROSADENITIS.

UEBEL (Ger.), adj. and n. U^{6}b′e^{2}l. An evil, a malady, a complaint. [A, 521 (*a*, 21).]—**Königsu′.** See SCROFULA.—**U′keit.** See NAUSEA.—**U′riechend.** See FŒTID.

UEBERBÄRTIGKEIT (Ger.), n. U^{6}b-e^{2}r-bart′i^{2}g-kit. See POGONIASIS.

UEBERBEIN (Ger.), n. U^{6}b′e^{2}r-bin. See GANGLION (1st def.) and EXOSTOSIS (1st def.).

UEBERBINDEN (Ger.), v. tr. U^{6}b′e^{2}r-bi^{2}nd-e^{2}n. To bandage. [E.]

UEBERCHLORSÄURE (Ger.), n. U^{6}b′e^{2}r-klor-zoir-e^2. See PERCHLORIC *acid*.

UEBERDECKT (Ger.), adj. U^{6}b′e^{2}r-de^{2}kt. See OBTECTED.

UEBERDREHUNG (Ger.), n. U^{6}b′e^{2}r-dra′un^2. An excessive turning or rotation.—**U. der Frucht.** Excessive rotation of the fœtus in a breech delivery, after the expulsion of the breech, so that the back no longer occupies the oblique position it had before,

but is turned directly forward or backward or even somewhat into the opposite oblique diameter of the pelvis. [A, 61.]—**U. der Schultern.** See MOVEMENT *of restitution.*

UEBEREINANDERGESTELLT (Ger.), adj. U^{6}b-e^{2}r-in-a^{3}nd'e^{2}r-ge^2-ste^{2}lt. See SUPERIMPOSED.

UEBEREINANDERTRETEN (Ger.), n. U^{6}b-e^{2}r-in-a^{3}nd'e^{2}r-trat-e^{2}n. See OVERRIDING.

UEBEREINSTIMMUNG (Ger.), n. U^{6}b-e^{2}r-in'sti^{2}m-mun^2. See ANALOGY and CONSISTENCE.

UEBEREMPFÄNGNISS (Ger.), n. U^{6}b'e^{2}r-e^{2}mp-fan^2-ni^{2}s. See SUPERFŒTATION.

UEBERERNÄHRUNG (Ger.), n. U^{6}b'e^{2}r-e^{2}r-nar-un^2. See UEBERNÄHRUNG.

UEBERFRUCHTUNG (Ger.), n. U^{6}b'e^{2}r-fruch^{2}t-un^2. See SUPERFŒTATION and HYPERCARPOSIS.

UEBERFÜLLUNG (Ger.), n. U^{6}b'e^{2}r-fu^{6}l-lun^2. See EPIPLEROSIS and HYPERPLEROSIS.—**Partielle U.** See MEREMPHRAXIS.

UEBERGANG (Ger.), n. U^{6}b'e^{2}r-ga^{3}n^2. A passing over (as from the maternal into the fœtal circulation).—**U'sbrücken.** See *Annectant* CONVOLUTIONS.—**U'sfalte.** A fold of an investing membrane where it passes from one structure to another; a fold of reflection (*e. g.*, the fold formed by the peritonæum as it passes from the posterior vault of the vagina to the anterior wall of the rectum).

UEBERGLIEDERUNG (Ger.), n. U^{6}b'e^{2}r-gled-e^{2}r-u^{2}n. See HYPERARTHROSIS.

UEBERGREIFEN (Ger.), n. U^{6}b'e^{2}r-grif-e^{2}n. See SUPERPOSITION.

UEBERHÄUTUNG (Ger.), n. U^{6}b'e^{2}r-hoit-un^2. See DERMATOPLASIA.

UEBERHÖRNUNG (Ger.), n. U^{6}b'e^{2}r-hu^{6}rn-un^2. See KERATOPLASIA.

UEBERIMPFUNG (Ger.), n. U^{6}b'e^{2}r-i^{2}mpf-un^2. See INOCULATION.

UEBERKLEIDEND (Ger.), adj. U^{6}b'e^{2}r-klid-e^{2}nd. See ENVELOPING.

UEBERLADUNG (Ger.), n. U^{6}b'e^{2}r-la^{3}d-un^2. Surfeit, repletion. [A, 521 (*a*, 48).]

UEBERLASTET (Ger.), adj. U^{6}b'e^{2}r-la^{3}st-e^{2}t. Of a muscle, having a weight attached to it in such a manner as to extend it only to the degree natural during rest. [K, 3.]

UEBERLASTUNG (Ger.), n. U^{6}b'e^{2}r-la^{3}st-un^2. The state of a muscle having such a weight attached to it that it is prevented from contracting with its usual rapidity and energy. [K, 16.]

UEBERLEITUNG (Ger.), n. U^{6}b'e^{2}r-lit-un^2. See TRANSFUSION.

UEBERLINGEN (Ger.), n. U^{6}b'e^{2}r-li^{2}n^2-e^{2}n. A bathing resort on Lake Constance, in Baden, where there is a gaseous and chalybeate spring. [L, 30, 49 (*a*, 14).]

UEBERMANGANSÄURE (Ger.), n. U^{6}b'e^{2}r-ma^{3}n-ga^{3}n-zoir-e^2. See PERMANGANIC *acid.*—**U.-Anhydrid.** See MANGANESE *heptoxide.*

UEBERNÄHRUNG (Ger.), n. U^{6}b'e^{2}r-nar-un^2. See *Forced* ALIMENTATION (2d def.) and HYPERTROPHY.

UEBERNARBUNG (Ger.), n. U^{6}b'e^{2}r-na^{3}rb-un^2. See CICATRIZATION.

UEBEROSMIUMSÄURE (Ger.), n. U^{6}b'e^{2}r-os-me-um-zoir-e^2. See OSMIUM *tetroxide.*

UEBERPFLANZUNG (Ger.), n. U^{6}b'e^{2}r-pfla^{3}nts-un^2. See TRANSPLANTATION.

UEBERPFROPFUNG (Ger.), n. U^{6}b'e^{2}r-pfro^{3}pf-un^2. See *Skin*-GRAFTING.

UEBERREIZ (Ger.), n. U^{6}b'e^{2}r-rits. Excessive irritation or excitement. [A, 315 (*a*, 48).]

UEBERRÖTHE (Ger.), n. U^{6}b'e^{2}r-ru^{6}t-e^2. See ERYSIPELAS.

UEBERSCHLAG (Ger.), n. U^{6}b'e^{2}r-shla^{3}g. A poultice or plaster. [A, 521 (*a*, 48).]

UEBERSCHMELZEND (Ger.), adj. U^{6}b'e^{2}r-shme^{2}lts-e^{2}nd. Of a liquid, cooled below the freezing point without solidifying. [B.]

UEBERSCHNAPPEN (Ger.), n. U^{6}b'e^{2}r-shna^{3}p-pe^{2}n. See PARAPHRONESIS.

UEBERSCHWÄNGERUNG (Ger.), n. U^{6}b'e^{2}r-shwe^{2}n^2-e^{2}r-un^2. See SUPERFECUNDATION.

UEBERSICHTIGKEIT (Ger.), n. U^{6}b'e^{2}r-zi^{2}ch^{2}t-i^{2}g-kit. See HYPERMETROPIA.

UEBERSPANNUNG (Ger.), n. U^{6}b'e^{2}r-spa^{3}n-nun^2. See HYPERTONIA.

UEBERSTECHEN (Ger.), n. U^{6}b'e^{2}r-ste^{2}ch^2-e^{2}n. See INOCULATION.

UEBERSTRECKUNG (Ger.), n. U^{6}b'e^{2}r-stre^{2}k-un^2. See *Dorsal* FLEXION.

UEBERTRAGBAR (Ger.), adj. U^{6}b'e^{2}r-tra^{3}g-ba^{3}r. Transferable, transmissible, contagious. [D.]

UEBERWANDERUNG (Ger.), n. U^{6}b'e^{2}r-va^{3}nd-e^{2}r-un^2. See MIGRATION.

UEBERWEBT (Ger.), adj. U^{6}b-e^{2}r-vabt'. See OBTEXTUS.

UEBERWUCHERN (Ger.), v. intr. U^{6}b'e^{2}r-vuch^2-e^{2}rn. To become hypertrophied. [A, 521 (*a*, 21).]

UEBERZÄHLIG (Ger.), adj. U^{6}b'e^{2}r-tsal-i^{2}g. Supernumerary.

UEBERZUG (Ger.), n. U^{6}b'e^{2}r-tsug. See INDUMENTUM.

UEBUNG (Ger.), n. U^{6}b'un^2. See EXERCISE.

UËHKA (Ar.), n. Okra pods. [Schweinfurth (*a*, 35).]

UEPPIG (Ger.), adj. U^{6}p'pi^{2}g. See LUXURIANT.

UFIUN (Ar.), **UFYOON** (Ar.), n's. Opium. [*a*, 35.]

UKIAH VICHY SPRINGS, n. U^2-ki'a^3. A place in Mendocino County, California, where there are gaseous alkaline and saline springs. [Anderson (*a*, 14).]

ULÆMORRHAGIA (Lat.), n. f. U^{2}l(ul)-e^{2}m(a^3-e^{2}m)-o^{2}r-raj-(ra^{3}g)'i^2-a^3. From οὖλον, the gum, αἷμα, blood, and ῥήγνυσθαι, to burst forth. Fr., *ulémorrhagie.* Ger., *Zahnfleischblutung.* Hæmorrhage from the gums. [L, 50 (*a*, 14).]

ULAGANACTESIS (Lat.), n. f. U^{2}l(ul)-a^{2}g(a^{3}g)-a^{2}n(a^{3}n)-a^{2}kt-(a^{3}kt)-e(a)'si^{2}s. Gen., *-es'eos* (*-e'sis*). From οὖλον, the gum, and ἀγανάκτησις, physical pain. Fr., *ulaganactèse.* Tension and itching in the gums. [L, 50 (*a*, 14).]

ULATROPHIA (Lat.), n. f. U^{2}l(ul)-a^{2}t(a^{3}t)-ro(ro^2)'fi^2-a^3. From οὖλον, the gum, α priv., and τρέφειν, to nourish. Atrophy of the gums. [*a*, 48.]

ULCER, n. U^{3}ls'u^{6}r. Gr., ἕλκος. Lat., *ulcus.* Fr., *ulcère.* Ger., *Geschwür.* A localized loss of substance following a destructive inflammation and ordinarily followed by the production of a cicatrix. The term is usually restricted to cases in which the loss of substance involves at least the entire thickness of the epidermis or of the epithelium of a mucous membrane. [G, 16.] Cf. SORE.—**Aden u.** An endemic u. observed at Aden. [*a*, 34.]—**Adherent u.** Of J. Hardie, a cutaneous u. in which the base becomes incorporated with and adherent to the subjacent fascia, and there is a tendency to "indolence in cicatrization." [*a*, 34.]—**Amputating u.** An u. affecting a digit or a limb in which the ulcerative process destroys the tissue to the bone, virtually amputating the part. [*a*, 34.]—**Arterial u.** A cutaneous u. due to incompetency or disease of an artery. [*a*, 34.]—**Atonic u.** An u. having unhealthy granulations that cicatrize slowly. [*a*, 34.]—**Autochthonous u.** See CHANCRE.—**Cancerous u.** An ulcerating cancer. [G.]—**Carious u.** A gangrenous u. [*a*, 34.]—**Chancroidal u.** See *Simple* CHANCRE.—**Cochin-China u.** A chronic u., occurring on any part of the body, affecting persons newly arrived in Cochin-China. It usually results from a slight cutaneous lesion, and becomes phagedenic in consequence of heat, dirt, and privation. [A, 301 (*a*, 34).]—**Cock's-comb u.** Ger., *Hahnenkammgeschwür.* An u. with outgrowths resembling condylomata. [*a*, 34.]—**Cold u's.** Of Paget, small inflammatory u's occurring spontaneously on the extremities, especially at the ends of the fingers or toes. They resemble ulcerated chilblains, but are not due to exposure to cold. [E.]—**Constitutional u.** See *Syphilitic* CHANCRE.—**Contagious u.** See *Simple* CHANCRE.—**Contagious u. of Mozambique.** See FRAMBŒSIA (2d def.).—**Corrosive u. of Hippocrates.** See *Gangrenous* STOMATITIS.—**Crateriform u.** A peculiar form of acute epithelial cancer of the face, of very rapid and extensive growth. It forms a bossy conoidal mass in the centre of which softening takes place and a cavity like a crater is developed. ["Brit. Med. Jour.," Feb. 23, 1889, p. 412 (*a*, 50).]—**Creeping u. of the cornea.** A serpiginous corneal u. ["Pract.," Mar., 1888, p. 226 (*a*, 34).]—**Diphtheritic u.** An u. that is covered with a false membrane. [*a*, 34.]—**Egyptian u.** An endemic u. observed in Egypt. [*a*, 34.]—**Endemic u.** A phagedenic u., usually affecting the lower extremities, observed in tropical countries. It is likely to follow any solution of continuity of the skin, and the seat of the lesion becomes inflamed, tumefied, and phagedenic. It is much more severe in debilitated subjects, and may end fatally. [*a*, 34.]—**Fissurated u.** Of Whitehead, laceration of the cervix uteri. [A, 37.]—**Fistulous u.** Lat., *ulcus fistulosum.* An u. communicating with a fistula. [G.]—**Follicular u.** An u. due to inflammation in the lymph-follicles of a mucous membrane. [D, 48.]—**Fungiform u.** See CANCER *verrucosus.*—**Fungous u.** An u. with fungous granulations. [*a*, 34.]—**Gastric u.** See *Perforating u. of the stomach.*—**Ghé-Ham u.** See *Cochin-China u.*—**Gummatous u.** An u. formed by the breaking down of a gumma. [*a*, 34.]—**Gwalior u.** An endemic u. observed at Gwalior. [*a*, 34.]—**Hæmorrhagic u.** An u. from which there is hæmorrhage. [*a*, 34.]—**Indolent u.** An u. observed in some dyscrasic or enfeebled condition of the system, that, while not spreading, shows no disposition to heal. [*a*, 34.]—**Inflamed u.** An u. surrounded by an area of inflammation. [*a*, 34.]—**Initial u. of syphilis.** See CHANCRE (2d def.).—**Intractable u.** See *Indolent u.*—**Inveterate u.** See *Indolent u.*—**Irritable u.** An u. that is painful. [*a*, 34.]—**Jacobs's u.** A rodent u. which begins as a small pimple on the skin of the lid near the inner canthus or over the lacrymal bone. It is shallow, with a well-defined, indurated margin, and its progress is very slow. It may remain superficial, but it usually extends deeply. [F.]—**Lupoid u.** An u. that closely resembles lupus. [*a*, 34.]—**Lupous u.** See LUPUS.—**Lymphatic u.** An u. from which there is a lymphy exudate. [*a*, 34.]—**Malignant u.** See CANCER and *Hospital* GANGRENE.—**Malignant u. of the uterus.** An old term for a form of cancer of the uterus characterized by rapid softening and ulceration of the whole organ. [A, 42.]—**Marjolin's u.** An u., probably cancerous, arising upon the site of an old cicatrix. ["Pacif. Med. and Surg. Jour.," viii, p. 209 (*a*, 34).]—**Menstrual u.** Any u. that gives evidence of sympathy, to a lesser or greater degree, with the menstrual function, especially one from which vicarious menstruation takes place. [*a*, 34.]—**Mercurial u.** An u. supposed to be caused by systemic enfeeblement due to mercurialism. [*a*, 34.]—**Mozambique u.** See ULCÈRE *contagieux de Mozambique.*—**Neuralgic u., Painful u.** See *Irritable u.*—**Peptic u.** An u. of the stomach supposed to be produced by a highly acid gastric juice. [D, 25.]—**Perforating u.** An u. that perforates through the tissues of a part, as of the stomach, intestines, etc. [*a*, 34.]—**Perforating u. of the foot.** See MALUM *perforans pedis.*—**Perforating u. of the stomach.**

Lat., *gastrobrosis.* An u. that perforates the gastric wall. [α, 34.]—**Persian u.** An u. endemic in Persia. [α. 34.]—**Phagedenic u.** An u. having the qualities of phagedæna. [E.]—**Phlegmonous u.** See *Inflamed u.*—**Plantar u.** See MALUM *perforans pedis.*—**Post-molar u.** An u. forming behind the last molar tooth, on one or both sides, frequently occurring in Bengal (especially in the rainy season) in persons having the malarial cachexia. ["Ind. Med. Gaz.," June, 1887, p. 190 (α. 50).]—**Putrid u.** 1. An u. accompanied with putrefaction or gangrene, especially chancre. [G.] 2. See *Hospital* GANGRENE.—**Rodent u.** A deeply ulcerating variety of epithelioma, differing from ordinary epithelioma chiefly in its very slow course and in its tendency to involve every tissue with which it comes in contact, including muscles and bones. It more commonly affects the upper portion of the face. [G.]—**Round u. of the stomach.** See *Perforating u. of the stomach.*—**Round u. of the uterus.** Of Clarke, a form of u. of the uterus, of rapid course, supposed by him to be epitheliomatous, and by others to be analogous to lupus or due to the action of an irritating secretion. [Zahn, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," Mar., 1884, p. 388.]—**Round u. of the vagina.** An u. of the vagina similar to the round u. of the stomach. [Zahn, *l. c.*]—**Saemisch's u.** An infectious u. of the cornea. ["Un. méd. et sci. du Nord-Est"; "Province méd.," Oct. 6, 1888, p. 577.]—**Scabious u.** See PSORELCOSIS.—**Scorbutic u.** An unhealthy, indolent u. occurring in scurvy. [α, 34.]—**Scrofulous u.** An u. due to scrofula. [α, 34.]—**Serpiginous u.** An u. which extends in a serpiginous manner.—**Simple u.** Any u. that is not dependent on systemic disease or poisoning, and that shows a tendency to heal. [α, 34.]—**Stercoral u.** An u. in the wall of the gut due to the presence of an accumulation of fæces following intestinal stenosis. [L, 57 (α. 50).]—**Sublingual u.** An ulceration about the frenum linguæ observed during the course of whooping-cough, thought to be due to the part being forced against the lower incisor teeth during the paroxysms.—**Symptomatic u.** An u. indicative of a disease not limited to the ulcerated point. [E.]—**Syphilitic u.** 1. An u. due to syphilis. [G.] 2. See *Syphilitic* CHANCRE.—**Syriac u.** See *Malignant* ANGINA.—**Taschkent u.** An endemic u. observed at Taschkent. [α. 34.]—**Toenail u.** Of Martin, the u. caused by an ingrowing toenail. ["Toledo Med. and Surg. Jour.," iii, 1879 (α, 34).]—**Tubercular u.** An u. due to tubercular disease. [α, 34.]—**Turkestan u.** A form of ulceration observed in Russian soldiers while on the frontiers of Afghanistan, affecting the face, neck, abdomen, and joints. In the first stage there appeared reddish spots, spreading, but limited by an induration and becoming rounded ulcerations with irregular edges. During the second period the ulcerations were augmented, tended to become confluent, and were accompanied by profuse suppuration, lymphangeitis, and adenitis. The third period was that of cicatrization. ["Union méd.," Aug. 31, 1886, p. 371 (α, 50).]—**Varicose u.** An u. caused by varicose veins. [α, 34.]—**Venereal u.** See CHANCRE (2d def.).—**Yemen u.** See *Cochin-China u.*

ULCERATE, v. intr. U^{3}ls'u^{5}r-at. Lat., *ulcerare.* Ger., *ulceriren.* To undergo ulceration.

ULCERATED, adj. U^{3}ls'u^{5}r-at-e^{2}d. Lat., *ulceratus.* Fr., *ulcéré.* Affected with ulceration.

ULCERATION, n. U^{3}ls-u^{5}r-a'shu^{3}n. Gr., ἕλκωσις. Lat., *ulceratio.* Fr., *ulcération.* Ger., *Verschwärung.* The formation of an ulcer; of a part, the condition of being affected with an ulcer or with ulcers. [E: α, 48.]—**Fissured u.** See *Fissurated* ULCER.—**Follicular u.** Disease of the cervix uteri characterized by Nabothian follicles. [A, 37.]—**Hering's pharyngeal u.** An oblong ulcer of the hard palate and the pillars of the fauces, associated with a unilateral and isolated u. of the pharynx, covered by a grayish-white pellicle. It heals in ten or twelve days without leaving any trace. ["Rev. de laryng., d'otol., et de rhin.," Oct. 15, 1891, p. 625 (α. 50).]—**Malignant u.** U. due to cancer. [E.]—**Puerperal u.** U. of the genitals, consequent on puerperal traumatism, of a malignant character, usually accompanied by great œdema of the labia majora. [A, 24.]—**Syriac u.** See *Malignant* ANGINA.—**Tubercular u. of the larynx.** See *Tubercular* LARYNGITIS.

ULCERATIVE, adj. U^{3}ls'u^{5}r-at-i^{2}v. Lat., *exulcerans, ulcerosus, ulcerativus.* Fr., *ulcératif, ulcéreux.* Ger., *geschwürig.* Pertaining to or characterized by ulceration.

ULCÈRE (Fr.), n. U^{6}l-se^{2}r. See ULCER.—**U. annamite.** See *Cochin-China* ULCER.—**U. cancéreux.** See LUPUS.—**U. chancreux.** An ulcerating chancre. [G.]—**U. chancrello-syphilitique.** See *Mixed* CHANCRE.—**U. de Cochin-Chine.** See *Cochin-China* ULCER.—**U. contagieux de Mozambique.** A single, rarely double, ulcer secreting an abundant fœtid, sero-sanious matter that is highly contagious. It presents some resemblance to pian. It occurs in Réunion Island. [A, 301 (α, 34).]—**U. de la baie.** An endemic ulcer observed in the Bay of Honduras. [A, 301 (α, 34).]—**U. de Penjdé, U. d'Orient.** See *Aleppo* BOIL.—**U. de Saigon.** See *Cochin-China* ULCER.—**U. épidermique.** See LUPUS.—**U. malin.** A malignant or phagedenic ulcer. [α, 34.]—**U. ieno-phagédénique.** Of Ricord, a simple chancre that becomes inflamed and gangrenous in consequence of the abuse of alcoholic liquors. [A, 301 (α. 34).]—**U. papillaire, U. papilliforme.** An ulcer with papillary granulations.—**U. perforant.** See MALUM *perforans pedis.*—**U. pianiforme.** See *U. contagieux de Mozambique.*—**U. pointillé.** One of the small corneal ulcerations observed in keratitis. [A, 301 (α, 34).]—**U. syriaque.** See *Malignant* ANGINA.

ULCÉROÏDE (Fr.), adj. U^{6}l-sa-ro-ed. Having the appearance of an ulcer. [α, 48.]

ULCEROUS, adj. U^{3}ls'u^{3}r-u^{2}s. Gr., ἑλκώδης. Lat., *ulcerosus.* Fr., *ulcéreux.* Ger., *ulcerös, geschwürartig.* 1. Having the character of an ulcer. 2. Affected with ulcers. [E.]

ULCUS (Lat.), n. n. U^{3}lk(u^{4}lk)'u^{3}s(u^{4}s). Gen., *ulc'eris.* See ULCER.—**U. abambulans.** See *Phagedenic* ULCER.—**U. achilleum.** Ger., *achilleïsches Geschwür.* A malignant, obstinate ulcer. [A, 305.]—**U. adenosum.** An ulcer involving a gland. [α, 34.]—**Ulcera aluminosa.** Of Paracelsus, ulcers preceded by swelling without heat and erosion, and readily undergoing resolution, but afterward discharging a fœtid fluid. Alum was said to cure them, but sometimes accidentally to produce them. [H.]—**U. ambulativum.** A serpiginous ulcer, especially a serpiginous chancre. [G.]—**U. aperistaton.** A simple u. [α, 34.]—**U. aphthosum.** An ulcer caused by aphthous inflammation. [α, 34.]—**U. araneum.** Of Paracelsus, a gangrenous ulcer. [D, 90.]—**Ulcera arsenicalia.** See *Ulcera realgarina.*—**U. arthriticum.** A cutaneous ulcer caused by the irritation of an arthritic concrement. [α, 34.]—**U. artificiale.** An issue. [α, 34.]—**U. cacoethes.** A malignant u. [G.]—**U. callosum.** See *Indurated* ULCER.—**U. cancrosum.** See CHANCRE (2d def.).—**U. cancrosum fungosum.** See CANCER *verrucosum.*—**U. cancrosum vulgare.** The common form of ulcerating cancer. [G.]—**Ulcera capitis manantia.** An old term for impetiginous eczema of the scalp. [G.]—**U. carcinomatosum.** A cancerous ulcer. [α, 34.]—**U. catarrhale.** An ulcer of the mucous membrane caused by acute or chronic catarrh. [α, 34.]—**U. chronicum cruris.** A chronic ulcer of the leg, usually varicose. [α, 34.]—**U. clysmaticum.** A roundish u. caused by the pressure of the point of a syringe used for rectal injections. [L, 57 (α, 50).]—**U. colpodes.** See *U. sinuosum.*—**U. complicatum.** An ulcer complicated by some disease or dyscrasia. [α, 34.]—**U. condylomatosum.** See *Cock's-comb* ULCER.—**U. corneæ serpens.** 1. An u. beginning as such in the cornea and extending deeply into the corneal tissue. It is further characterized by a tendency to spread superficially in a certain definite direction. It usually appears in the centre of the cornea as a circular u. surrounded by a zone of gray infiltration, and its progress is rapid in the direction of slough and perforation. [F.] 2. See *Hypopyon* KERATITIS.—**U. corrodens Clarkii.** A phagedenic ulcer of the vagina. [A, 326 (α, 34).]—**U. corrosivum.** See *Perforating* ULCER *of the stomach.*—**U. cum callositate** (seu **duritie**, seu **duritie callosa**). See *Indurated* CHANCRE.—**U. depascens.** See *Phagedenic* ULCER.—**U. diphthericum.** An ulcer caused by diphtheria. [α, 34.]—**U. durum.** See *Syphilitic* CHANCRE.—**U. dysentericum.** An intestinal ulcer caused by dysentery. [α, 34.]—**U. eczematosum.** An ulcer caused by eczema. [α, 34.]—**U. elevatum.** 1. Simple chancre when attended with exuberant granulations that rise above the surrounding surface. [G.] 2. See *Raised indurated* CHANCRE.—**U. erethicum.** See *Irritable* ULCER.—**U. ex digestione.** See *Peptic* ULCER.—**U. ferinum.** See *Phagedenic* ULCER.—**U. fistulosum.** See *Fistulous* ULCER.—**U. granulosum.** An ulcer covered with a granular surface.—**U. grave.** See *Madura* FOOT.—**U. hæmorrhoidale.** See HÆMORRHELCOMA.—**U. herpeticum.** See LUPUS (2d def.).—**U. hypersthenicum.** See *Irritable* ULCER.—**U. hypertrophicum.** See *U. elevatum.*—**U. impetiginosum.** An ulcer accompanied by impetigo. [α, 34.]—**U. induratum.** See *Indurated* CHANCRE.—**U. inflammatorium.** See *Simple* CHANCRE.—**U. lenticulare.** A lenticular ulcer, usually of tubercular origin. [α, 34.]—**U. leprosum.** Ulceration due to leprosy. [α, 34.]—**U. molle.** See *Simple* CHANCRE.—**U. narium fœtens.** See OZÆNA.—**U. neuroparalyticum.** An ulcer caused by paralysis of a nerve. [α, 34.]—**Ulcera nitri** [Paracelsus]. Scrofulous ulcerations. [H.]—**U. perforans.** See *Perforating u. of the stomach.*—**U. profundus.** See *Sloughing* PHAGEDÆNA.—**U. puerperale.** An ulcer of the genital tract occurring during the puerperium. [α. 34.]—**U. pulmonum.** Ger., *Lungengeschwür.* A pulmonary abscess. [α, 34.]—**Ulcera realgarina.** Of Paracelsus, malignant ulcers, supposed to be due to the action of realgar.—**U. rodens.** See *Rodent* ULCER.—**U. rodens urethræ.** Of Landau, an ulcer of the urethra in women, probably of syphilitic origin, attacking, step by step, the walls of the urethra and spreading from the meatus, where it takes its origin. [α, 34.]—**U. rotundum.** A round ulcer, usually of the stomach. [α, 34.]—**Ulcera salis communis.** Of Paracelsus, ulcers attributed to the corruption of the common salt in the body. They are at first moist, then dry up, are rather painful, but have no heat. [H.]—**U. serpens.** See *Serpiginous* ULCER.—**U. simplex (venereum).** See *Simple* CHANCRE.—**U. sinuosum.** Ulceration of a sinuous or tortuous character; lupus serpiginosus. [G.]—**U. sordidum.** A foul ulcer, especially a chancre. [G.]—**U. sphacelosum.** A gangrenous ulcer. [α, 34.]—**U. spongiosum.** See *Fungous* ULCER.—**U. syphiliticum.** See *Syphilitic* ULCER.—**U. syphiliticum conjunctivæ.** Either a chancre or the ulcerated surface of a broken-down gumma or tubercular syphilide. In either case the u. usually occurs on the palpebral conjunctiva near the edge of the lid, though it may extend to the cul-de-sac and involve the ocular conjunctiva. [F.]—**U. syringodes.** See *Fistulous* ULCER.—**U. telephium.** See TELEPHIUM (1st def.).—**U. tuberculosum.** See *Tubercular* ULCER.—**U. typhosum.** One of the intestinal ulcers characteristic of typhoid fever.—**Ulcera urinosa** (seu **urodialytica**). Ulcers attributed to suppressed or irregular urinary excretion. [G.] Cf. URELCOSIS.—**Ulcera variolosa.** Small flat ulcers seen in variolous œsophagitis. [L, 57 (α. 50).]—**U. venereum.** See CHANCRE (2d def.).—**U. ventriculi chronicum.** A chronic gastric ulcer. [α, 34.]—**U. ventriculi rotundum.** See *Perforating* ULCER *of the stomach.*—**U. virgæ.** See CHANCRE (2d def.).

ULCUSCULUM (Lat.), n. n. U^{3}lk(u^{4}lk)-u^{3}sk(u^{4}sk)'u^{2}l(u^{4}l)-u^{3}m-(u^{4}m). Dim. of *ulcus* (*q. v.*). A little ulcer. [G.]—**U. cancrosum.** See CHANCRE (2d def.).

ULE (Lat.), n. f. U^{2}l(ul)'e(a). Gen., *ul'es.* Gr., οὐλή. See CICATRIX.

ULERYTHEMA (Lat.), n. n. U^{2}l(ul)-e^{2}r-i^{2}(u^{6})-the(tha)'ma^{3}. Gen., *-em'atos* (*-atis*). From οὐλή, a scar, and ἐρύθημα, erythema. Of Unna, an inflammatory condition of the skin in which a persistent erythema tends to produce atrophy or cicatrization of the skin without ulceration. [G.]—**U. acneiformis.** Of Unna, a rare skin disease that affects the face and the ears. It is limited to the circumference of a certain number of hair follicles and begins with a permanent erythema and hyperkeratosis accompanied by the

production of comedones and terminating in atrophy of the skin. [α, 34.]—**U. centrifugum.** Of Unna, see LUPUS *erythematosus.*—**U. ophryogenes.** Of Taenzer, an inflammatory disease, usually beginning in infancy, affecting especially the region of the eyebrows, and attended with persistent erythema, permanent alopecia, and atrophy of the skin. It is said to be a form of folliculitis decalvans. [G.]—**U. sycosiforme** [Unna]. Lupoid sycosis of Milton, usually affecting the region of the beard, resembling sycosis but attended with the formation of scars. It begins at the upper part of the whiskers, traveling slowly downward with a narrow erythematous margin and marked infiltration, and is followed by cicatricial atrophy and destruction of the hair follicles. [G.] Cf. FOLLICULITIS *decalvans.*

ULETIC, adj. U^{2}l-e^{2}t'i^{2}k. Lat., *uleticus.* Pertaining to the gums. [L, 50 (α, 14).]

ULEX (Lat.), n. m. U^{2}l(ul)'e^{2}x. Gen., *ul'icis.* Fr., *ajonc.* Ger., *Hecksame.* Furze; a genus of leguminous shrubs. The *Ulicineæ* are a division of the *Genisteæ.* [α, 35.]—**U. compositus, U. europæus, U. grandiflorus.** Fr., *ajonc* (*marin*), *agion, bruse, genêt épineux, lande* (*épineuse*), *landier, sainfoin d'Espagne* (ou *d'hiver*), *vigneau.* Common (or French) furze, gorse, thorn-broom, whin; a fodder plant of middle and southern Europe, the Azores, and the Canaries. The seeds contain ulexine. [α, 35.]—**U. minor, U. nanus, U. parviflorus.** Fr., *ajonc nain, petit landin.* Dwarf-furze, cat-whin; a forage species. [α, 35.]—**U. provincialis.** Fr., *airelle de Provence.* Provence furze. It probably has the properties of *U. europæus.* [α, 35.]

ULEXINE, n. U^{2}l-e^{2}x'en. An alkaloid, $C_{11}H_{14}N_2O$, obtained from the seeds of *Ulex europæus;* bitter, colorless crystals. It acts as a stimulant and then a depressor of respiration, and in large doses causes increased excitability of the peripheral nerves, with quivering movements or convulsions, followed by sleepiness and paralysis. It increases the blood-pressure and acts as a diuretic. [B, 270 (α, 38); "Am. Jour. of Pharm.," Sept., 1890, p. 454.]

ULICUS (Lat.), adj. U^{2}l(ul)'i^{2}k-u^{3}s(u^{4}s). See ULETIC.

ULIGINOSE, adj. U^{2}l-i^{2}j'i^{2}n-os. Lat., *uliginosus, uliginarius* (from *uligo,* moisture). Fr., *uliginaire, uligineux.* 1. Marshy. 2. Growing or living in marshy places. [α, 35.]

ULITIS (Lat.), n. f. U^{2}l(ul)-i(e)'ti^{2}s. From οὖλον, the gum. Fr., *ulite.* Inflammation of the gums. [E.]—**Aphthous u.** U. associated with aphthæ. [α, 34.]—**Fungous u.** U. in which the gums present a fungous appearance, as in scurvy. [α, 34.]—**Mercurial u.** U. caused by mercurialism. [α, 34.]—**Parenchymatous u.** Inflammation of the parenchyma of the gums. [α, 34.]—**Scorbutic u.** U. caused by scurvy. [α, 34.]—**Ulcerative u.** U. with ulceration. [α, 34.]

ULLEM, n. A species of pyrosis endemic in Lapland, attributed to the use of reindeer milk and smoked meat. [L, 41 (α, 14).]

ULLERSDORF (Ger.), n. Ul'le^{2}rs-do^{2}rf. A place in Moravia, Austria, where there are alkaline, saline, and sulphurous springs. [L, 30, 49, 57 (α, 14).]

ULMACEOUS, adj. U^{3}l-ma'shu^{3}s. Resembling the genus *Ulmus* or belonging to the *Ulmaceæ,* a family of apetalous dicotyledons included by Bentham and Hooker in the *Urticaceæ.* [α, 35.]

ULMAIRE (Fr.), n. U^{6}l-ma^{2}r. See *Flores* SPIRÆÆ.

ULMAL, adj. U^{3}l'm'l. Lat., *ulmalis.* Pertaining to the *Ulmales,* Lindley's u. alliance (*nixus ulmalis*) of the *Rectembryæ,* including the *Ulmaceæ.* [α, 35.]

ULMARIA (Lat.), n. f. U^{3}l(u^{4}l)-ma(ma^3)'ri^2-a^3. The genus *Spiræa;* also an old official name for *Spiræa u.* The *Ulmariæ* are a section of the *Rosaceæ;* the *Ulmarieæ* are a subtribe of the *Spiræaceæ.* [α, 35.]—**Flores ulmariæ.** Ger., *Geissbartblumen.* The flowers of *Spiræa u.* [α, 35.]

ULMARIC ACID, ULMARINE, n's. U^{3}l-ma^{2}r'i^{2}k, u^{3}l'-ma^{2}r-en. Fr., *acide ulmarique.* See SALICYL *aldehyde.*

ULMIC ACID, n. U^{3}l'mi^{2}k. Fr., *acide ulmique.* Ger., *Ulminsäure.* An acid found in brown peat, apparently identical with humic acid. Its existence does not seem fully established. [B, 2; B, 270 (α, 38).]

ULMIN, n. U^{3}l'mi^{2}n. See HUMUS.

ULMUS (Lat.), n. f. U^{3}l(u^{4}l)'mu^{3}s(mu^{4}s). Fr., *orme* (1st def.). Ger., *Ulme* (1st def.), *Rüster* (1st def.). 1. The elm; the typical genus of the *Ulmaceæ.* [α, 35.] 2. Of the U. S. Ph., see ELM-*bark.*—**Decoctum ulmi** [Br. Ph.]. Fr., *décocté d'orme.* Ger., *Ulmenrindendecoct.* A preparation made by boiling 2½ oz. of elm-bark with 1 pint of distilled water, straining, and washing the residue with water enough to make 1 part. [B; B, 95, 119 (α, 38).]—**Extractum ulmi** [Fr. Cod.]. See *Extrait d'écorce* D'ORME.—**Mucilago ulmi** [U. S. Ph.]. A preparation made by macerating 6 parts of elm-bark in 100 of boiling water. [B.]—**Ulmi cortex (interior).** See ELM-*bark.*—**U. alata.** Wahoo (-elm) of the southern United States, winged (or American small-leaved) elm. The inner bark is used like that of *U. fulva.* [α, 35.]—**U. americana.** American white elm. The inner bark is used like that of *U. fulva* and as a hæmostatic. [α, 35.]—**U. campestris.** Fr., *orme champêtre* (ou *blanc,* ou *des champs,* ou *pyramidal* [Fr. Cod.]), *ormeau, ormille, umeau, arbre à pauvre homme.* Ger., *Feldrüster, gemeine Ulme, Weissrüster.* Common European (or English) elm, probably the πτελέα of Dioscorides (the bark of which was used as an astringent), indigenous to southern Europe and temperate Asia. The bark (see ELM-*bark*) is mucilaginous and slightly astringent, and was formerly used as an antiscorbutic. [α, 35.]—**U. effusa.** Fr., *orme pédonculé.* Ger., *wimperfrüchtige Ulme* (oder *Rüsler*), *schwarze Rüster, Lindblast, Traubenrüster, Bastulme, Flatterrüster.* Spreading-flowered elm of Europe. It has the properties of *U. campestris.* [α, 35.]—**U. fulva.** Fr., *orme fauve* (ou *rouge*). Ger., *schleimige Ulme.* Slippery (or red, or moose-) elm; abundant west of the Alleghany Mountains. The leaves are thicker, larger, and rougher than those of *U. americana.* The mucilaginous, demulcent inner bark is the u. of the U. S. Ph. It has the property of preserving fats from rancidity. [α, 35.]—**U. integrifolia.** Indian elm. The wood, boiled in water, is used to flavor arrack. [α, 35.]—**U. montana.** Witch- (or wych-) elm (or hazel), mountain- (or Scotch) elm; a species growing wild in northern England and Norway. [α, 35.]—**U. racemosa.** Rock- (or white, or cork-) elm; found from New Hampshire to New York and westward. It is used internally as a hæmostatic. [α, 35.]

ULNA (Lat.), n. f. U^{3}l(u^{4}l)'na^3. Gr., ὠλένη, πῆχυς [Galen]. Fr., *u.* Ger., *Ellenbogenknochen.* A long bone on the inner side of the forearm. It articulates above with the humerus by the greater sigmoid cavity, with the head of the radius by the lesser sigmoid cavity, and below with the radius by an articular eminence. [L.]

THE ULNA.

ULNAD, adv. U^{3}l'na^{2}d. Toward the ulnar aspect. [L, 141.]

ULNAR, adj. U^{3}l'na^{3}r. Lat., *ulnaris.* Fr., *ulnaire.* Pertaining to or connected with the ulna. [L, 343.]

ULNARIS (Lat.), adj. U^{3}l(u^{4}l)-nar(na^{3}r)'i^{2}s. Ulnar; as a n. m., a muscle connected with the ulna. [α. 48.]—**U. anterior.** See EPITROCHLEO-SUPERCARPEUS.—**U. externus.** See EXTENSOR *carpi u.*—**U. externus brevis.** An anomalous muscle arising from the lower fourth of the ulna and the intermuscular sæpta of the fore-arm, and inserted into the bases of the fourth and fifth metacarpal bones and the tendon of the ulnaris externus. [Gruber (L).]—**U. gracilis.** See PALMARIS *longus.*—**U. internus.** See FLEXOR *carpi ulnaris.*—**U. internus brevis.** See FLEXOR *carpi ulnaris brevis.*—**U'lähmung** (Ger.). Paralysis of the ulnar nerve. [α, 34.]—**U. posterior.** See EPICONDYLO-SUPRACARPEUS.—**U. quinti.** An accessory bundle of the extensor carpi u. running to the little finger. [L, 332.]

ULOCACE (Lat.), n. f. U^{2}l(ul)-o^{2}k'a^{2}s(a^{3}k)-e(a). Gen., *-oc'aces.* From οὖλον, the gum, and κακός, evil. See *Ulcerative* ULITIS.

ULOCARCINOMA (Lat.), n. n. U^{2}l(ul)-o(o^3)-ka^{3}r-si^{2}n(ki^{2}n)-om'a^3. Gen., *-om'atos* (*-atis*). For deriv., see ULON and CARCINOMA. Fr., *ulocarcinome.* Ger., *Zahnhöhlenkrebs.* Carcinoma of the gums. [L, 50 (α, 14).]

ULON (Lat.), n. n. U^{2}l(ul)'o^{2}n. Gr., οὖλον. The gum. [α, 48.]

ULONCUS (Lat.), n. m. U^{2}l(ul)-o^{2}n^{2}k'u^{3}s(u^{4}s). From οὖλον, the gum, and ὄγκος, a tumor. Fr., *uloncie.* Ger., *Zahnfleischgeschwulst.* A tumor of the gum. [α, 34.]

ULORRHAGIA (Lat.), **ULORRHŒA** (Lat.), n's f. U^{2}l(ul)-o^{2}r-raj(ra^{3}g)'i^2-a^3. From οὖλον, the gum, and ῥήγνυσθαι, to burst forth, or ῥεῖν, to flow. Fr., *ulorrhagie, ulorrhée.* Ger., *Zahnfleischblutung.* Hæmorrhage from the gums. [L, 50 (α, 14).]

ULOSIS (Lat.), n. f. U^{2}l(ul)-os'i^{2}s. Gen., *-os'eos* (*-is*). From οὐλή, a scar. Fr., *ulose.* See CICATRIZATION.

ULOTIC, adj. U^{2}l-ot'i^{2}k. From οὐλή, a scar. Cicatrisant, vulnerary. [L, 50 (α, 14).]

ULOTRICHOUS, adj. U^{2}l-o^{2}t'ri^{2}k-u^{3}s. From οὖλος, curly, and θρίξ, hair. Having crisp or wooly hair. The *Ulotrichi* (Fr., *ulotriques;* Ger., *Kraushaarige*) are a group of races so characterized, including the negroes, Hottentots, etc. [L, 12, 41, 50.] Cf. LEIOTRICHOUS.

ULTIMATE, adj. U^{3}lt'i^{2}m-at. Lat., *ultimus* (superl. of *ulter,* that is beyond). The most remote or elementary as distinguished from the immediate. [B.] Cf. PROXIMATE.

ULTIMUM MORIENS (Lat.), n. n. U^{3}lt(u^{4}lt)'i^{2}m-u^{3}m(u^{4}m)-mor(mo^{2}r)'i^2-e^{2}nz(ans). Lit., that which dies last; the auricular appendix of the right auricle, which is the last to contract after the cessation of the heart-beat. [K.]

ULTRA-BRACHYCEPHALIC, adj. U^{3}lt-ra^3-bra^{2}k-i^2-se^{2}f-a^{2}l'i^{2}k. From *ultra,* beyond βραχύς, short, and κεφαλή, the head. Having the cephalic index 90° or more. [L, 150 (α, 48).]

ULTRA-DOLICHOCEPHALIC, adj. U^{3}lt-ra^3-do^{2}l-i^2-ko-se^{2}f-a^{2}l'i^{2}k. From *ultra,* beyond, δολιχός, long, and κεφαλή, the head. Having the cephalic index 64° or less. [L, 150 (α, 48).]

ULTRAMARINE, n. U^{3}lt-ra^3-ma^{2}r-en'. From *ultra,* beyond, and *mare,* the sea. A blue pigment formerly obtained from lapis lazuli and now artificially prepared by roasting a mixture of fine white clay, sodium carbonate, sulphur, and charcoal or rosin. [B, 8 (α, 27).]—**Cobalt u.** See *Thénard's* BLUE.—**Yellow u.** See BARIUM *chromate.*

ULTRAMICROSCOPIC, adj. U^{3}lt-ra^3-mi^{2}k-ro-sko^{2}p'i^{2}k. From *ultra,* beyond, and *microscopic* (*q. v.*). Too small to be seen with a microscope. [L.]

ULTRAQUININE, n. U^{3}lt-ra^3-kwi^{2}n'en. Homoquinine. [B.]

ULULATION, n. U^{2}l-u^{2}l-a'shu^{3}n. Lat., *ululatio* (from *ululare,* to howl). A howling or loud crying observed in hysteria. [α, 34.]

ULVA (Lat.), n. f. U^{3}l(u^{4}l)'va^3(wa^3). Fr., *u., ulve.* Ger., *Schlauchfaden.* A genus of the *Ulvaceæ* (Fr., *ulvacées;* Ger., *Ulvaceen*), which are a division of the *Algæ.* The *Ulveæ* are a tribe of the *Ulvaceæ.* [α, 35.]—**U. lactuca.** Fr., *u. laitue, laitue de mer.* Ger., *Meerlattig.* Oyster-green, sea-lettuce, sloke, the βρύον of Theophrastus, the βρύον θάλασσιον of Dioscorides; an edible species, used as a refrigerant in inflammations, headache, etc., and, on account of the iodine it contains, in scrofula. [α, 35.]

UMÄNDERUNG (Ger.), n. Um'and-e3r-un2. See MUTATION.

UMBEL, n. U3mb'e2l. Lat., *umbella* (dim. of *umbra*, a shadow). Fr., *ombelle*. Ger., *Dolde*, *Schirm*. 1. An indeterminate inflorescence consisting of several pedicels of nearly equal length radiating from the same point, like the rays of an umbrella. 2. The *Cypripedium pubescens*. [α, 35.]—**Compound u.** An u. in which the rays (primary pedicels) are themselves terminated by u's. [α, 35.]—**Cymose u.** A trichotomous (or polychotomous) cyme. [α, 35.]—**General u.** An u. formed by the branching of the primary axis. [α, 35.] Cf. UMBELLULE.—**Partial u.** See UMBELLULE.—**Simple u.** An u. in which the pedicels are not terminated by secondary u's. [α, 35.]

UMBELLAL, adj. U3m'be2l-'l. Lat., *umbellalis*. Pertaining to the *Umbellales*, which are: (1) Of Lindley, the u. alliance (Lat., *nixus umbellalis*) of the *Albuminosæ*, consisting of the *Umbelliferæ* and *Araliaceæ*; (2) of Bentham and Hooker, a cohort of the *Calyciflorœ* consisting of the *Umbelliferæ*, *Araliaceæ*, and *Cornaceæ*. [α, 35.]

UMBELLATE, adj. U3m'be2l-at. Lat., *umbellatus*. Fr., *ombellé*. Ger., *doldig*. Forming or arranged in an umbel; bearing umbels. The *Umbellatæ* or *Umbellati* of Linnæus are the *Umbelliferæ*. [α, 35.]

UMBELLIC ACID, n. U3m-be2l'i2k. Fr., *acide ombellique*. Ger., *Umbellinsäure*. 1. Of Persoz, anisic acid. 2. An acid, $C_9H_8O_4 = C_6[OH,H,OH,CH : CH,CO,OH,H,H,]$, occurring as a yellowish powder. [B, 3 (α, 38).]

UMBELLIFERON, n. U3mb-e2l-i2f'e2r-o2n. An oily alkaline substance, $C_9H_6O_3 = C_6[OH,H,H,CH : CH,O,CO,H,]$, obtained from the ethereal extracts of certain umbelliferous plants. [B, 3, 270 (α, 38).] Cf. HYDROXYCOUMARIN.

UMBELLIFEROUS, adj. U3mb-e2l-i2f'e2r-u3s. Lat., *umbellifer* (from *umbella*, an umbel, and *ferre*, to bear). Fr., *ombellifère*. Ger., *doldentragend*, *schirmtragend*. Bearing umbels. The *Umbelliferæ* (Fr., *ombellifères*; Ger., *Doldengewächse*) are the umbelworts, an order of the *Umbellales* consisting of herbs, or more rarely shrubs or trees, with small flowers in umbels. The petals are usually imbricate in æstivation, the ovary is 2-celled, and the fruit (cremocarp) separates into 2 dry one-seeded carpels (mericarps), which are provided with raised longitudinal ribs and tubular receptacles (vittæ) containing essential oil. It is from the arrangement of these ribs and vittæ and from the shape of the inclosed albumen that the characters are derived distinguishing the numerous genera (*Apium*, *Carum*, *Cicuta*, *Conium*, *Chœrophyllum*, *Daucus*, *Ferula*, *Galbanum*, *Peucedanum*, *Sanicula*, *Seseli*, *Thapsia*, etc.). They often contain, besides essential oil and resinous matter, a bitter or astringent and tonic principle, and in some cases acrid poisonous alkaloids. [α, 35.]

UMBELLIFLOROUS, adj. U3mb-e2l-i2-flor'u3s. From *umbella*, an umbel, and *flos*, a flower. Fr., *ombelliflore*. Ger., *doldenblüthig*. Having the flowers in umbels. The *Umbellifloræ* are: Of Bartling, a class of the *Gymnoblasti* consisting of the *Umbelliferæ*, *Araliaceæ*, *Hederaceæ*, and *Hamamelideæ*; of Spach, a class of dicotyledons consisting of the *Hamamelideæ*, *Cornaceæ*, *Araliaceæ*, and *Umbelliferæ*. [α, 35.]

UMBELLIFORM, adj. U3m-be2l'i2-fo2rm. Lat., *umbelliformis* (from *umbella*, an umbel, and *forma*, shape. Ger., *doldenförmig*. In the form of an umbel. [α, 35.]

UMBELLULARIA (Lat.), n. f. U3mb(u4mb)-e2l-lu2l(lu4l)-a-(a3)'ri2-a3. From *umbellula*, a little umbel. A genus of the *Laurineæ*. [α, 35.]—**U. californica.** Bay- (or sassafras-) laurel of California and Oregon; an evergreen with a strong spicy odor. The leaves are used as a condiment and as an excitant to the circulation, and the pungent, volatile oil contained in them is recommended for inhalation in nasal catarrh and nervous headache. [α, 35.]

UMBELLULE, n. U3mb'e2l-u2l. Fr., *ombellule*. Ger., *Döldchen*, *Schirmchen*. A partial umbel; an ultimate umbel in a compound umbel. [α, 35.]

UMBIEGUNGSKANTE (Ger.), n. Um-beg'u2nz-ka3nt-e2. The margin of that portion of the cerebellum which forms a part of the roof of the fourth ventricle. [I, 17 (K).]

UMBILDUNG (Ger.), n. Um'bi2ld-un2. See TRANSFORMATION, METAPLASIA, and ANAMORPHOSIS.

UMBILICAL, adj. U3mb-i2l'i2-k'l. Lat., *umbilicalis* (from *umbilicus*, the navel). Fr., *ombilical*. Ger., *nabelartig*. Pertaining to the umbilicus. [C.]

UMBILICATE, UMBILICATED, adj's. U3mb-i2l'i2k-at, -at-e2d. Lat., *umbilicatus* (from *umbilicus*, the navel). Fr., *ombiliqué*. Ger., *genabelt*. Provided with an umbilicus or with a central depression. [α, 35.]

UMBILICATION, n. U3mb-i2l-i2k-a'shu3n. From *umbilicatus*, navel-shaped. Fr., *ombilication*. A condition in which there is a central depression resembling the navel, as in variolous and vaccinal pocks. [α, 34.]

UMBILICUS (Lat.), n. m. U3mb(u4mb)-i2l-ik(ek)'u3s(u4s). Fr., *ombilic*, *nombril* (1st def.), *cicatrice ombilicale* (1st def.). Ger., *Nabel*, *Körpernabel* (1st def.). 1. The navel; the depression caused by the contraction of the remains of the umbilical cord. 2. Any depression in the centre of an organ. Cf. HILUM (1st def.). 3. A section of the genus *Cotyledon*. [α, 35.]—**Folia umbilici (Veneris).** The herb of *Cotyledon u.* [α, 35.]—**Posterior u.** A depression or sinus in the spinal region, due to defective closure of the two borders of the vertebral groove.—**U. Veneris.** The *Cotyledon u.* [α, 35.]

UMBO (Lat.), n. U3mb(u4mb)'o. Fr., *mamelon* (3d def.). Ger., *Stippe*, *Buckel* (3d def.). Lit., a boss (as of a shield). 1. In dermatology, see STIGMA (2d def.). 2. In botany, a protuberance with a projecting point at its centre. [α, 35.] 3. See *U. tympani*.—**U. femoris.** See FOSSA *capitis femoris*.—**U. (membranæ) tympani.** The deepest part of the funnel-shaped curvature or concavity of the membrana tympani which is turned toward the external auditory canal. It corresponds with the inferior extremity of the handle of the malleus, by the traction of which inward the membrane appears hollowed out. [F, 32.]

UMBONATE, adj. U3mb'on-at. Lat., *umbonatus* (from *umbo*, a boss). Ger., *gebuckelt*. Provided with an umbo. [α, 35.]

UMBONULATE, adj. U3mb-on'u2l-at. From *umbo*, a boss. Ger., *kleinbuckelig*. Provided with a small umbo or nipple. [α, 35.]

UMBRACULIFORM, adj. U3mb-ra2k-u2l'i2-fo2rm. Lat., *umbraculiformis* (from *umbraculum*, a little shade, and *forma*, form). Like an umbrella in shape [α, 35.]

UMBRASCOPY, n. U3mb-ra2sk'op-i2. From *umbra*, a shadow, and σκοπεῖν, to examine. Fr., *umbrascopie*. Ger., *Umbraskopie*. See RETINOSCOPY (2d def.).

UMBROSE, adj. U3mb'ros. Lat., *umbrosus* (from *umbra*, shade). Fr., *ombreux*. Ger., *schattig*. 1. Shady. 2. Growing in shady places. [α, 35.]

UMDREHER (Ger.), n. Um'dra-e2r. See ROTATOR.

UMDREHUNG (Ger.), n. Um'dra-un2. Rotation, torsion. [L, 30 (α, 14).]

UMGESTALTUNG (Ger.), n. Um'ge2-sta3lt-un2. See METAMORPHOSIS.—**Krankheitsu'.** See METASCHEMATISM.

UMHÜLLUNG (Ger.), n. Um-hu6l'lun2. An envelope or covering. [α, 14.]—**U'en des Eies.** The investing membranes of the ovum.—**U'shaut.** An investing membrane; in embryology, the vitelline membrane. [A, 317.]

UMKEHRUNG (Ger.), n. Um'kar-un2. See INVERSION.

UMLAUF (Ger.), n. Um'la2-u4f. 1. See CIRCULATION. 2. See PARONYCHIA (1st def.).—**Feuriger U.** See HERPES *zoster*.

UMLEGUNG (Ger.), n. Um'lag-un2. See ECTROPION.

UMSATZ (Ger.), n. Um'za3ts. Exchange. [α, 48.]—**Stoffu'.** Tissue-change. [K, 16.]

UMSCHLAG (Ger.), n. Um'shla3g. 1. An external application, such as a plaster, poultice, fomentation, or wet compress. [E; α, 48.] 2. See PERIDIUM.—**Stirnu'.** 1. A head bandage. 2. A cataplasm for the head. [E.]

UMSCHNÜRUNG (Ger.), n. Um-shnu6r'un2. Ligation, snaring. [A, 521 (α, 48).]

UMSETZUNG (Ger.), n. Um'ze2ts-un2. See METASTASIS.

UMSTALTUNG (Ger.), n. Um'sta3lt-un2. See METAMORPHOSIS.

UMSTECHUNG (Ger.), n. Um-ste2ch2'un2. The insertion of a suture to inclose a bleeding point. [E.]

UMSTÜLPUNG (Ger.), n. Um'stu6lp-un2. An inversion (as of the uterus). Cf. EINSTÜLPUNG.

UMWANDELN (Ger.), **UMWANDLUNG** (Ger.), n's. Um'va3nd-e2ln, -va3nd-lun2. See TRANSFORMATION.

UNÄCHT (Ger.), adj. Un'ach2t. Spurious. [α, 35.]

UNANUEA (Lat.), n. f. Un-a3n-u'e2-a3. A genus of the *Scrophularineæ*. [α, 35.]—**U. febrifuga.** A Peruvian shrub having a febrifuge root. [α, 35.]

UNATHEMBAR (Ger.), adj. Un'a3t-e2m-ba3r. Irrespirable.

UNAUFLÖSBAR (Ger.), **UNAUFLÖSLICH** (Ger.), adj's. Un'a3-u4f-lu6s-ba3r, -li2ch2. See INSOLUBLE.

UNAUFSPRINGEND (Ger.), adj. Un'a3-u4f-spri2n2-e2nd. See INDEHISCENT.

UNAUSROTTBAR (Ger.), adj. Un'a3-u4s-rot-ba3r. Ineradicable. [α, 14.]

UNBEDECKT (Ger.), adj. Un'be2-de2kt. Uncovered. [α, 14.]

UNBEHAART (Ger.), adj. Un'be2-ha3rt. See GLABROUS.

UNBESCHNITTEN (Ger.), adj. Un'be2-shni2t-te2n. 1. Uncircumcised. 2. Unpruned. [α, 14.]

UNBESINNLICHKEIT (Ger.), n. Un'be2-zi2n-li2ch2-kit. See AMNESIA.

UNBEWEGLICH (Ger.), adj. Un'be2-vag-li2ch2. Immobile, irreducible.

UNBEWUSST (Ger.), adj. Un'be2-vust. See UNCONSCIOUS.

UNBIEGSAM (Ger.), adj. Un'beg-za3m. See INFLEXIBLE.

UNBLUTIG (Ger.), adj. Un'blut-i2g. See BLOODLESS.

UNCAM, n. Of the alchemists, mercury. [A, 325 (α, 48).]

UNCARIA (Lat.), n. f. U3n2k(u4n2k)-ar(a3r)'i2-a3. From *uncus*, a hook. Fr., *uncaire*. Ger., *Gambirstrauch*. A genus of the *Rubiaceæ*. [α, 35.]—**Extractum uncariæ.** See CATECHU (2d def.).—**U. acida.** A species growing in the Malay Islands; used like *U. gambir*, of which some consider it a variety. [α, 35.]—**U. gambier, U. gambir.** Ger., *ächter Gambirstrauch*. A stout climbing shrub indigenous to the countries bordering the Straits of Malacca. It yields catechu (*q. v.*, 2d def.). The detergent bitter leaves are used in aphthæ and skin diseases. [α, 35.]

UNCIA (Lat.), n. f. U3ns(u4n2k)'i2-a3. Gr., οὐγγία, οὐγκία. 1. See OUNCE. 2. An inch.

UNCIAL, adj. U3ns'i2-a2l. Lat., *uncialis*. An inch long. [α, 35.]

UNCIFORM, adj. U3ns'i2-fo2rm. Lat., *unciformis* (from *uncus*, a hook, and *forma*, form). Fr., *unciforme*. Ger., *hakenförmig*. Hook-shaped, hooked. [L, 343.]

UNCINATE, adj. U3ns'i2n-at. Lat., *uncinatus* (from *uncinus*, a hook). Fr., *unciné*. Ger., *hakig*. Hooked, curved at the tip in the form of a hook; provided with hooks or bent spines. [α, 27, 35.]

—**U.-setose.** Ger., *hakenborstig.* Covered with hooked bristles. [α, 35.]

UNCINATUM (Lat.), n. n. U^{3}ns(u^{4}n^{2}k)-i^{2}n(en)-at(a^{3}t)′u^{3}m(u^{4}m). From *uncinus*, a hook. See *Unciform* BONE.

UNCINUS (Lat.), n. m. U^{3}ns(u^{4}n^{2}k)-in(en)′u^{3}s(u^{4}s). From *uncus*, a hook. A hook, a barb. [A, 312 (α, 21).]—**M. attractorius.** See CROTCHET.

UNCIPRESSION, UNCIPRESSURE, n's. U^{3}ns-i^{2}-pre^{2}sh′-u^{3}n, -u^{2}r. From *uncus*, a hook, and *premere*, to press. Of Vanzette, a method of hæmostasis by means of a hook inserted into the angle of a wound. [L, 87 (α, 34).]

UNCONSCIOUS, adj. U^{3}n-ko^{2}n′shu^{3}s. Fr., *inconscient, insensible.* Ger., *unbewusst.* Without consciousness. [D.]

UNCTION, n. U^{3}n^{2}k′shu^{3}n. Lat., *unctio* (from *unguere*, to smear). See INUNCTION.

UNCTUOUS, adj. U^{3}n^{2}kt′u^{2}-u^{3}s. Fr., *onctueux.* Ger., *fettig, schmierig.* Oily, greasy. [B.]

UNCUS (Lat.), n. m. U^{3}n^{2}k(u^{4}n^{2}k)′u^{3}s(u^{4}s). Fr., *crochet.* Ger., *Haken, Hakenganglion* (2d def.). 1. A hook or hook-shaped structure. 2. The hook-shaped termination of the gyrus fornicatus. [I, 6 (K).] 3. See *Uncinate* PROCESS. 4. Of Vesalius, the olecranon. [L.] —**U. gyri fornicati.** See *U.* (2d def.).—**U. gyri hippocampi magni.** The hooked extremity of the uncinate convolution. [I, 3 (K).]

UNDATE, adj. U^{3}nd′at. See UNDULATE.

UNDECYL, n. U^{3}n′de^{2}s-i^{2}l. Fr., *undécyle.* See HENDECATYL.

UNDECYLIC ACID, n. U^{3}n-de^{2}s-i^{2}l′i^{2}k. See HENDECATOIC ACID.

UNDERHORN, n. U^{3}nd′u^{5}r-ho^{2}rn. Ger., *Unterhorn.* Of Owen, the descending horn of the lateral ventricle. [I, 14 (K).]

UNDERSHRUB, n. U^{3}nd′u^{5}r-shru^{3}b. Lat., *suffrutex.* Fr., *sous-arbrisseau.* Ger., *Halbstrauch.* A suffruticose plant, a low shrub. [α, 35.]

UNDER-TOE, n. U^{3}nd′u^{5}r-to. A deformity in which one of the toes lies under the adjoining toe.

UNDIMIA (Lat.), n. f. U^{3}nd(u^{4}nd)-i^{2}m′i^{2}-a^{3}. From *unda*, a wave. Of Paracelsus, see ŒDEMA.

UNDULATE, UNDULATING, adj's. U^{3}nd′u^{2}l-at, -at-i^{2}n^{2}. Lat., *undulatus* (from *unda*, a wave). Fr., *ondulé.* Ger., *wellenrändig.* Wavy, repand. [α, 35.]

UNDULATION (Ger.), n. Und-ul-a^{3}-tse-on′. Fr., *ondulation.* A wave-like motion; also a condition characterized by wave-like motion. [α, 48.]—**Jugular u.** See *Venous* PULSE (2d def.).—**Respiratory u.** Ger., *Athmenswelle.* The variation of the curve of blood-pressure due to respiration. [K, 19.]

UNDULDSAMKEIT (Ger.), n. Un′duld-za^{3}m-kit. See INTOLERANCE.

UNDURCHBOHRT (Ger.), adj. Un′durch^{2}-bort. See IMPERFORATE.

UNDURCHLÄSSIG (Ger.), adj. Un′durch^{2}-las-si^{2}g. Impenetrable. [B.]

UNDURCHLÖCHERT (Ger.), adj. Un′durch^{2}-lu^{5}rch^{2}-e^{2}rt. See IMPERFORATE.

UNEHIG (Ger.), adj. Un′a-i^{2}g. Agamous. [α, 35.]

UNEINATHEMBAR (Ger.), adj. Un′in-a^{3}t-e^{2}m-ba^{3}r. Irrespirable. [J.]

UNEINRENKBAR (Ger.), adj. Un′in-re^{2}n^{2}k-ba^{3}r. See IRREDUCIBLE.

UNEMPFÄNGLICHKEIT (Ger.), n. Un′e^{2}mp-fa^{2}n-li^{2}ch^{2}-kit. See INSUSCEPTIBILITY and IMMUNITY.

UNEMPFINDLICH (Ger.), adj. Un′e^{2}mp-fi^{2}nd-li^{2}ch^{2}. 1. Insensible. [α, 14.] 2. See INDOLENT.

UNEMPFINDLICHKEIT (Ger.), n. Un′e^{2}mp-fi^{2}nd-li^{2}ch^{2}-kit. Insensibility; anæsthesia.

UNENTHALTSAMKEIT (Ger.), n. Un′e^{2}nt-ha^{3}lt-za^{3}m-kit. See INCONTINENCE.

UNENTWICKELT (Ger.), adj. Un′e^{2}nt-vi^{2}k-e^{2}lt. Undeveloped, immature. [α, 14.]

UNEQUAL, adj. U^{3}n-e′kw′l. Lat., *inæqualis, inequalis.* Fr., *inégal.* Ger., *ungleich.* Differing in length, size, proportions, or characters. [α, 48.]

UNERSÄTTLICHKEIT (Ger.), n. Un′e^{2}r-zat-li^{2}ch^{2}-kit. See BULIMIA (1st def.).

UNERTRÄGLICHKEIT (Ger.), n. Un′e^{2}r-trag-li^{2}ch^{2}-kit. See INTOLERANCE.

UNFREIWILLIG (Ger.), adj. Un′fri-vi^{2}l-li^{2}g. Involuntary.

UNFRUCHTBARKEIT (Ger.), n. Un′fruch^{2}t-ba^{3}r-kit. Barrenness, sterility.

UNFÜHLBAR (Ger.), adj. Un′fu^{6}l-ba^{3}r. Impalpable. [α, 48.]

UNGEBURT (Ger.), n. Un′ge^{2}-burt. An embryo, a fœtus.

UNGEGLIEDERT (Ger.), adj. Un′ge^{2}-gled-e^{2}rt. See INARTICULATE (1st def.).

UNGEHEUER (Ger.), n. Un′ge^{2}-hoi-e^{2}r. See MONSTER.

UNGEIMPFT (Ger.), adj. Un′ge^{2}-i^{2}mpft. Unvaccinated. [α, 14.]

UNGENANNT (Ger.), adj. Un′ge^{2}-na^{3}nt. See INNOMINATE.

UNGEPAART (Ger.), adj. Un′ge^{2}-pa^{3}rt. See AZYGOS.

UNGESCHLECHTSREIF (Ger.), adj. Un′ge^{2}-scle^{2}ch^{2}ts-rif. Sexually immature. [α, 48.]

UNGESTALTET (Ger.), adj. Un′ge^{2}-sta^{3}lt-e^{2}t. See DEFORMED.

UNGESTALTHEIT (Ger.), **UNGESTALTUNG** (Ger.), n's. Un′ge^{2}-sta^{3}lt-hit, -un^{2}. See DEFORMITY.

UNGESTIELT (Ger.), adj. Un′ge^{2}-stelt. See SESSILE.

UNGESUNDHEIT (Ger.), n. Un′ge^{2}-zund-hit. Sickness, unwholesomeness. [A, 521 (α, 48).]

UNGLEICH (Ger.), adj. Un′glich^{2}. See UNEQUAL.—**U′artig.** See HETEROGENEOUS.—**U′mässigkeit.** See ANOMALY.

UNGUAL, adj. U^{3}n^{2}′gw′l. From *unguis*, a nail. Fr., *unguéal* Pertaining to the nail. [α, 48.]

UNGUEN (Lat.), n. n. U^{3}n^{2}(u^{4}n^{2})′gwe^{2}n. Gen., *un′guinis.* See UNGUENTUM.

UNGUENT, n. Un^{2}′gw′nt. See OINTMENT and UNGUENTUM.—**Egyptian u.** A preparation resembling linimentum æruginis, but containing alum in addition to the copper subacetate. [B, 10.]

UNGUENTUM (Lat.), n. n. U^{3}n^{2}(u^{4}n^{2})-gwe^{2}nt′u^{3}m(u^{4}m). From *unguere*, to smear. Gr., *μύρον.* Fr., *onguent, pommade* (1st def.). Ger., *Salbe.* 1. An ointment. 2. Of the U. S. Ph., specifically, a mixture of 4 parts of lard and 1 part of yellow wax; of the Br. Ph., the u. simplex (1st def.). [B; α, 38.]—**U. acre.** 1. Of the Ger. Ph., 1st ed., Swiss Ph., a mixture of 50 parts of cantharides, 30 of colophony, and 60 of turpentine with 15 (50 [Swiss Ph.]) of yellow wax, 250 (285 [Swiss Ph.]) of lard, and 10 (25 [Swiss Ph.]) of euphorbium. [B, 95 (α, 38).] 2. An ointment of 1 part each of corrosive sublimate, cantharis, and liquor stibii chlorati, and 4 parts of basilicon ointment, used for rubbing into the scalp in cases of progressive general paralysis. [Oebeke, "Allg. Ztschr. f. Psych.," xxxviii, 3; "Am. Jour. of Neurol. and Psych.," May, 1882, p. 320.]—**U. ad ambusta.** An ointment of 45 parts each of elder-bark and linden-bark, 60 of plantain-juice, 30 each of the juice of great houseleek, stag's suet, and white lead washed in rose water, 180 of linseed-oil, 15 of oil of eggs, and 7 of sugar; or of 180 grammes of white lead, 30 of camphor, 60 of olibanum, 90 of oil of roses, and the whites of 7 eggs. [B, 119 (α, 38).]—**U. ad blennorrhagiam chordatam.** See *U. mercuriale camphoratum.*—**U. ad decubitum.** An ointment for bed-sores; especially glycerinum tannatis plumbi. [B.]—**U. ad fonticulos.** 1. The u. cantharidum of the Ger. Ph. 2. U. mezerei. [B, 270 (α, 38).]—**U. ad hæmorrhoides.** An ointment of 83 grammes of the fresh root of figwort, 496 of butter, 55 of litharge, the yolks of 2 eggs, and 3 handfuls of white-henbane leaves. [B, 119 (α, 38).]—**U. ad perniones.** Fr., *onguent contre les engelures, onguent aromatique camphré.* Ger., *Frostsalbe, Frostbeulensalbe.* 1. Of the Palat. Disp., 1764, a preparation containing 4 parts each of wild-cat's fat, stag's fat, oil of bay, and wax, and 1 part of camphor. 2. An ointment of 60 parts of laurel-oil with 54 of mutton suet, 12 of camphor, and 3 each of the oils of juniper and lavender, or with 48 of mutton suet and 6 of camphor dissolved in a little oil of juniper. [B, 119 (α, 38).]—**U. ad scabiem.** Fr., *pommade antipsorique.* 1. A mixture of 2 parts each of quick-lime and sulphur, 1 part of common salt, 12 parts of lard, and 24 of olive-oil. [B, 119.] 2. See *U.* HYDRARGYRI *nitratis.*—**U. ad scabiem Zelleri.** See *U.* HYDRARGYRI *ammoniati.*—**U. ægypticum.** See *Egyptian* UNGUENT.—**U. album** [Finn. Ph.]. 1. An ointment of 10 parts of white wax, 15 of spermaceti, and 40 of olive-oil. [B, 95 (α, 38).] See also *Ceratum* CETACEI. 2. See *U.* PLUMBI *carbonici.*—**U. album camphoratum.** An ointment made by adding 1 part of camphor, triturated with a little oil of sweet almonds, to from 24 to 96 parts of ointment of lead carbonate. [B, 119 (α, 38).] See also *U.* CERUSSÆ *camphoratum.*—**U. album simplex** [Ger. Ph.]. See *Unguentum* PLUMBI *carbonatis.*—**U. ammoniacale.** See POMMADE *de Gondret.*—**U. anthelminthicum.** Fr., *onguent vermifuge.* An ointment of 45 parts each of onions, bryony-root, and the root of *Aspidium filix mas*, 7 each of *Artemisia abrotanum*, wormwood, and tansy, and 360 of oil, boiled together to dryness and mixed with 45 parts of yellow wax, 30 of aloes, 15 of colocynth, and 60 of inspissated ox-gall; or of 4 parts of hepatic aloes, 7 of inspissated ox-gall, and 30 of althæa ointment; or of 62 of aloes, 93 each of petroleum and inspissated ox-gall, and 750 of lard; or of 11 parts each of hepatic aloes, alhandal troches, *Asarum europæum.* wormwood, savin, and tansy, 90 each of myrrh, ox-gall, and yellow wax, 22 each of turpentine and oil of wormwood, and 4 each of petroleum and oil of savin. [L, 85; α, 38.]—**U. apostolorum.** See DODECAPHARMACUM.—**U. Arcæi.** See *U.* ELEMI *compositum.*—**U. aromaticum.** Fr., *pommade dite baume nerval* [Fr. Cod.] (2d def.). 1. An ointment made of 250 parts of yellow wax (240 [Roum. Ph.], 240 of suet, and 80 of yellow wax [Norw. Ph.]), with 125 of laurel-oil (120 [Roum. Ph.], 5 [Norw. Ph.]), 10 each of the oils of juniper, lavender, crisped mint, and rosemary (10 each of the oils of juniper, rosemary, and turpentine, with 5 each of the oils of lavender and crisped mint [Norw. Ph.]), 1,000 of lard (480 [Norw. Ph.]), 250 of dilute alcohol (70-per-cent. alcohol [Austr. Ph.], 300 of 70-per-cent. alcohol [Roum. Ph.], 80 of strong alcohol [Norw. Ph.]), and 125 [Austr. Ph., Hung. Ph.], 120 [Roum. Ph.] of wormwood, 40 each of chamomile flowers and the herbs of melilotus and origanum [Norw. Ph.]; or with 480 parts of lard. 240 of mutton suet, 180 of strong alcohol. 60 each of yellow wax and oil of rosemary, 30 each of laurel-berries and root of pyrethrum, 20 of lavender flowers, and 10 of sweet marjoram [Dan. Ph.]. The Dan. Ph. directs the ointment to be colored with indigo or turmeric. 2. An ointment of 423 parts each of beef marrow and expressed oil of nutmeg, mixed with a solution of 34 of balsam of Tolu and 17 each of camphor and the oils of cloves and rosemary in 69 of 92-per-cent. alcohol [Belg. Ph.]; or of 350 parts of beef marrow, 450 of expressed oil of nutmeg, and 100 of almond-oil, mixed with a solution of 30 each of oil of rosemary and balsam of Tolu and 15 each of camphor and oil of cloves in 60 of 80-per-cent. alcohol [Fr. Cod.]; or of 40 parts of laurel-oil with 32 of mutton suet and a solution of 4 of camphor in 2 of oil of juniper [Gr. Ph.], or with 96 of yellow wax, 224 of lard, 24 of oil of juniper, 4 of oil of rosemary, and 12 of oil of turpentine [Swiss Ph.]. [B, 95 (α, 38).]—**U. arsenicale Hellmundi** [Ger. Ph., 1st ed.]. An extemporaneous mixture of pulvis arsenicalis Cosmi with eight times as much u. narcoticobalsamicum Hellmundi. [B,

95 (*a*, 38).]—**U. Autenriethii.** See *U.* ANTIMONII.—**U. basilicum.** Fr., *onguent basilicum* [Fr. Cod.] (2d def.) (ou *suppuratif*). Sp., *unguento de colofonia pálido* [Sp. Ph.] (1st def.). 1. An ointment of 15 parts each of yellow wax, suet, and colophony (Burgundy pitch [Dan. Ph., Swed. Ph.]), with 45 of olive-oil and 7½ of turpentine [Dan. Ph.] (60 of olive-oil and 15 of turpentine [Finn. Ph., Swed. Ph.], or 45 of olive-oil and 10 of turpentine [Ger. Ph.], or 45 of olive-oil and 15 of Burgundy pitch [Sp. Ph.], or 40 of olive-oil and 15 of turpentine [Norw. Ph.]); or of 15 parts each of yellow wax, suet, and turpentine, 30 of colophony, and 45 of lard [Roum. Ph.]. 2. An ointment of 12 parts each of yellow wax, colophony, and black pitch with 12 each of suet and turpentine and 36 [Dan. Ph., Russ. Ph.] (40 [Norw. Ph.]) of olive-oil, or with 48 [Fr. Cod.] (72 [Gr. Ph.]) of olive-oil only; or of 15 parts each of yellow wax, black pitch, Burgundy pitch, and suet, 45 of oil of sesame, and 5 of larch turpentine [Swiss Ph.]; or of 143 parts each of yellow wax, colophony, and black pitch, and 571 [Belg. Ph.] (572 [Netherl. Ph.]) of olive-oil. [B, 95, 119 (*a*, 38).] See also *U.* RESINÆ.—**U. basilicum flavum.** See *U. basilicum* (1st def.).—**U. basilicum nigrum.** See *U. basilicum* (2d def.).—**U. basilicum veterinarium** [Belg. Ph.]. An ointment of 45 parts of colophony, 40 of mutton suet, 10 of tar, and 5 of cod-liver oil. [B, 95 (*a*, 38).]—**U. camphoratum.** Fr., *pommade camphrée.* Sp., *pomada alcanforada* [Sp. Ph.]. An ointment of 50 parts of camphor with 150 of lard and 16⅔ [Fr. Cod.] (15 [Sp. Ph.]) of white wax (25 of yellow wax [Russ. Ph.]); or with 134 of lard and 16 of white wax [Belg. Ph.]; or with 200 of simple ointment [Swiss Ph.]. [B; B, 95 (*a*, 38).]—**U. carbolisatum** [Swiss Ph.]. An ointment of 2 parts of crystallized carbolic acid dissolved in 2 of glycerin and mixed with 200 of lard. [B, 95 (*a*, 38).]—**U. carminativum.** See ONGUENT *carminatif.*—**U. ceratum.** See CERATUM *Galeni.*—**U. cereum** [Russ. Ph.]. A preparation corresponding nearly to the ceratum of the U. S. Ph., composed of 30 parts of yellow wax (white wax [Gr. Ph.]) and 90 (70 [Ger. Ph.], 75 [Gr. Ph.], 60 [Netherl. Ph.]) of olive-oil. [B; B, 95 (*a*, 38).]—**U. cinereum.** Gray ointment; the *onguent mercuriel simple* of the Fr. Cod. [B.] See under *U.* HYDRARGYRI.—**U. citrinum.** See *U.* HYDRARGYRI *nitratis, U.* ALTHÆÆ, and *U. basilicum.*—**U. cupratum.** See *U.* ÆRUGINIS (2d def.).—**U. Cyrilli.** See POMMADE *de Cirillo.*—**U. de arthanita.** Fr., *onguent d'arthanita* (ou *de pain de porceau*). An ointment made by boiling 1,080 parts of the juice of *Cyclamen europæum*, 360 of the juice of squirting cucumber, 180 of polypody, 120 of colocynth, 720 of olive-oil, and 360 of fresh butter to dryness, straining, and adding 150 parts of yellow wax, 30 each of aloes, mezereum-berries, colocynth, scammony, and Indian jalap, 26 of euphorbium, 15 each of salt, chamomile, ginger, myrrh, and long pepper, and 30 each of sagapenum and ox-gall; or by macerating for 24 hours 664 parts each of the juices of *Cyclamen europæum* and squirting cucumber and 138 of colocynth, boiling down one half, straining, evaporating to an extract, and adding 28 parts each of ox-gall, salt, and sagapenum, 249 of yellow wax, 332 of butter, 664 of olive-oil, and 111 of powdered chamomile; or made of 360 parts of fresh butter or lard, 60 of inspissated ox-gall (or of extract of bile), 15 each of hepatic aloes and colocynth, and 8 to 12 of some essential oil or oils (wormwood alone or with tansy or rosemary). Sometimes 15 parts of sulphur were added, or, instead of 15 parts each, 45 parts each of aloes, colocynth, and flowers of sulphur were used. [L, 85 (*a*, 38).]—**U. defensivum cæruleum.** See *Unguentum oxydi* COBALTI.—**U. de nihilo.** See *U.* ZINCI *oxidi.*—**U. digestivum.** Fr., *onguent digestif simple* [Fr. Cod.] (1st def.). 1. An ointment of 15 parts each of olive-oil and yolk of egg with 70 of larch turpentine [Belg. Ph.]; or of 10 grammes of olive-oil, 40 of larch turpentine, and the yolk of 1 egg [Fr. Cod.] (15 grammes of oil of hypericum, 60 of turpentine, and the yolks of 2 eggs [Sp. Ph.]). [B, 95 (*a*, 38).] 2. See *U.* TEREBINTHINÆ *compositum.*—**U. digestivum aloeticum.** Fr., *onguent digestif animé.* An ointment of 29 parts of aloes, 116 of rhodomel, 355 of turpentine, and 88 of olive-oil; or of 45 grammes of aloes, 180 each of turpentine and basilicum, and the yolks of 3 eggs; or of 179 grammes of turpentine, 119 of honey, 190 of tincture of aloes, and the yolks of 4 eggs. [L, 85; *a*, 38.]—**U. digestivum animatum.** An ointment of equal parts of liquid styrax and u. digestivum. In former times equal parts of basilicon ointment and compound ointment of elemi were added. [B, 95, 119 (*a*, 38).]—**U. digestivum mercuriale.** A mixture of equal parts of u. digestivum and u. hydrargyri (the Sp. preparation). [B, 95 (*a*, 38).]—**U. digestivum myrrhatum.** An ointment of 180 grammes of turpentine and the yolks of 4 eggs with either 22 grammes of myrrh and 45 of olive-oil or 11 each of myrrh and olibanum, 45 of oil of St. John's wort, and enough saffron; or of 240 grammes of turpentine, 46 of oil of St. John's wort, 7 each of myrrh and olibanum, and the yolks of 4 eggs; or of 30 parts of u. digestivum with 4 each of myrrh and olibanum. [B, 119 (*a*, 38).]—**U. digestivum simplex** [Fr. Cod.]. See *U. digestivum* (1st def.).—**U. Dupuytren** [Swiss Ph.]. An ointment of 250 parts of purified beef marrow, 4 of lead acetate, 8 of balsam of Peru, 30 of dilute alcohol, 1½ part of tincture of cantharides, and 1 each of the tinctures of cloves and cinnamon. [B, 95 (*a*, 38).]—**U. emolliens.** 1. Of the Austr. Ph., Hung. Ph., 2d ed., see *U. aquæ* ROSÆ. 2. See *U. suppurans.*—**U. enulatum.** See *U.* HELENII.—**U. epispasticum.** See *U.* MEZEREI.—**U. exsiccans rubrum Acrelii.** An ointment of 90 parts each of lead acetate and minium, 180 each of simple cerate, litharge, and calamine, 360 of goat's suet, 240 of linseed-oil, and 11 of camphor. [B, 119 (*a*, 38).]—**U. extensum.** Any ointment spread on a fabric. [Unna (*a*, 14).]—**U. flavum.** 1. Of the Ger. Ph., 1st ed., Russ. Ph., T. A., see *U.* RESINÆ. 2. See *U.* ALTHÆÆ.—**U. foliatum.** See NARD *ointment.*—**U. fuscum.** Fr., *onguent mercuriel de Boecking* (2d def.) (ou *brun* [3d def.]). 1. An ointment of 72 parts of oil, 16 of yellow wax, 8 each of colophony and black pitch, 4 each of mastic, turpentine, galbanum, sagapenum, and olibanum, and 2 of round birthwort. 2. An ointment made by mixing red precipitate with 16 times as much u. resinæ. [B, 119 (*a*, 38).] 3. See *U. matris.*—**U. griseum.** See *U.* HYDRARGYRI.—**U. hæmorroidale.** An ointment of 22 grammes each of starch, white lead, litharge, lead suboxide, and tragacanth, 5 each of opium and camphor, 180 each of mucilage of the seeds of *Plantago psyllium*, oil of roses, and oil of great mullein, 90 of yellow wax, and the whites of 2 eggs. [B, 119 (*a*, 38).]—**U. Hebræ** [Swiss Ph.]. An ointment of 250 parts each of litharge plaster and olive-oil with 5 of glycerin. [B, 95 (*a*, 38).] See also *U.* DIACHYLON.—**U. helleboratum** [Dan. Ph.]. An ointment of 2 parts of commercial potassium nitrate, 24 of rhizome of white hellebore, 90 of sublimed sulphur, 96 of green soap, and 288 of lard. [B, 95 (*a*, 38).]—**U. Holloway** [Gr. Ph.]. An ointment made of 125 parts of white wax, 60 each of yellow wax and larch turpentine, 50 of spermaceti, 250 of Burgundy pitch, 500 of lard, and 625 of olive-oil. [B, 95 (*a*, 38).]—**U. iodatum.** Fr., *pommade d'iode.* An ointment of iodine mixed with 16, 24, or 64 times as much lard. [B, 119 (*a*, 38).]—**U. irritans.** See *U.* CANTHARIDIS.—**U. jodatum** [Hung. Ph., 2d ed.]. An ointment of tincture of iodine extemporaneously mixed with nine times as much simple ointment. [B, 95 (*a*, 38).]—**U. labiale.** See *U. rubrum labiale* and *Ceratum* CETACEI *rubrum.*—**U. laurinocamphoratum.** See *U. ad perniones.*—**U. laurinum.** Fr., *onguent de laurier, pommade de laurier* [Fr. Cod.] (2d def.). 1. Of the Netherl. Ph., see *Unguentum* LAURI *terebinthinatum.* 2. Of the Fr. Cod., an ointment of 50 parts each of fresh laurel-leaves and laurel-berries and 100 of lard. The Belg. Ph. orders the laurel-leaves and berries to be macerated in 25 parts of 92-per-cent. alcohol for two hours before heating with the lard, and both ph's order the ointment remelted when prepared. [B, 95 (*a*, 38).] 3. See *U. nervinum* (3d def.).—**U. leniens.** 1. Of the Russ. Ph., an ointment of 3 parts of white wax, 6 of spermaceti, 24 of almond-oil, and 4 of glycerin. [B, 95 (*a*, 38).] See also *Ceratum* CETACEI. 2. Of the Ger. Ph., see *U. aquæ* ROSÆ.—**U. lenitivum.** Fr., *onguent émollient.* An ointment of 18 parts of colophony, 36 of yellow wax, 126 of olive-oil, and 9 of turpentine. [B, 119 (*a*, 38).]—**U. liliaceum.** See CRINOMYRON.—**U. matris.** Brown salve; an ointment consisting essentially of 1 or 2 parts each of lard, butter, mutton suet, yellow wax, and litharge with 2, 3, or 8 of olive-oil. The butter was frequently omitted, sometimes also the olive-oil, and a little black pitch was occasionally added. Some ph's simply ordered 2 parts of mutton suet and 1 part of black pitch mixed with 56 parts of simple plaster, or 2 of camphor and 32 of yellow wax with 192 of simple plaster, or 5 of olive-oil with 8 of emplastrum minii rubrum, or 4 of lard and 2 each of mutton suet and yellow wax with 6 of simple plaster. [B, 119 (*a*, 38).]—**U. mercuriale.** See *U.* HYDRARGYRI.—**U. mercuriale album.** See *U.* HYDRARGYRI *ammoniati.*—**U. mercuriale aptyalizomenon.** See POMMADE *de Cirillo.*—**U. mercuriale camphoratum.** A mixture of equal parts of camphor and mercurial ointment or of 2 parts of camphor and 4 of the ointment. [B, 119 (*a*, 38).]—**U. mercuriale citrinum.** See *U.* HYDRARGYRI *nitratis.*—**U. mercuriale corrosivum.** See POMMADE *de Cirillo.*—**U. mundificans Zelleri.** See *U.* HYDRARGYRI *ammoniati.*—**U. myrtinum compositum.** Fr., *pommade astringente.* An ointment of 345 parts of oil of myrtle, 86 of yellow wax, 29 each of gall-nuts and sumach-leaves, 7 each of myrtle-leaves, cypress-leaves, and pomegranate-peel, and 14 of mastic; or of 332 parts of oil of myrtle, 111 of yellow wax, 14 of alum, and 21 each of gall-nuts, cypress, plantain-seeds, and sumach-leaves. [B, 119 (*a*, 38).]—**Unguenta narcotica cum extractis parata** [Swiss Ph.]. Ointments consisting of 10 parts of a narcotic extract dissolved in 1 part each of dilute alcohol and water and mixed with 90 parts of wax ointment. [B, 95 (*a*, 38).]—**U. narcoticobalsamicum Hellmundi.** An ointment of 4 parts of lead acetate, 12 each of extract of hemlock and balsam of Peru, 2 of tinctura opii crocata, and 96 [Ger. Ph.] (100 [Swiss Ph.]) of wax ointment. [B, 95 (*a*, 38).]—**U. nardinum.** See NARD *ointment.*—**U. neapolitanum.** See *U.* HYDRARGYRI.—**U. nervinum.** Fr., *onguent* (ou *baume*) *nervin.* 1. Of the Dan. Ph., see *U. aromaticum* (1st def.). 2. Of the Gr. Ph. and Swiss Ph., see *U. aromaticum* (2d def.). 3. An ointment made of mutton suet, essence of turpentine, and oil of laurel, to which in various old ph's were added several other oils of numerous herbs and other ingredients. [B, 119 (*a*, 38).] Cf. *U.* ROSMARINI *compositum.*—**U. nitricatum.** See ADEPS *oxygenatus.*—**U. oculare Kliseri.** Fr., *onguent ophthalmique vert.* An ointment of 8 parts of verdigris, 150 of tartar, 40 of camphor, and 620 of lard. [B, 119 (*a*, 38).]—**U. ophthalmicum.** An ointment of 2 parts of red mercury oxide, 38 of yellow wax, and 60 of almond-oil [Ger. Ph., 1st ed.], or of 2 parts of yellow mercury oxide and 98 of u. cetacei [Swiss Ph.]. Some of the older ph's directed zinc sulphate with 6 or 7 times as much fresh butter. [B, 95, 119 (*a*, 38).]—**U. ophthalmicum album.** See *U.* ZINCI *oxidi.*—**U. ophthalmicum compositum.** An ointment made of 15 parts of red mercury oxide with 24 of yellow wax, 140 of lard, 6 of zinc oxide, 5 of camphor, and 10 of almond-oil [Ger. Ph., 1st ed.] (with 30 of yellow wax, 210 of lard, 7½ each of zinc oxide and olive-oil, and 4 of camphor [Swiss Ph.]). [B, 95 (*a*, 38).]—**U. ophthalmicum Desault** [Belg. Ph.]. Sp., *pomada de Desault* [Sp. Ph.]. An ointment of 80 parts each of alum (burned [Belg. Ph.]), red mercury oxide, and lead acetate, with 16 of calomel, 40 of zinc oxide, and 704 of benzoated lard [Belg. Ph.] (with 12 of calomel, 80 of tutia, and 600 of rose ointment [Sp. Ph.]). [B, 95 (*a*, 38).]—**U. ophthalmicum Janini** [Swiss Ph.]. An ointment of 10 parts each of calomel, zinc oxide, and white bole and 50 of lard. [B, 95 (*a*, 38).]—**U. ophthalmicum lausannense** [Swiss Ph.]. An ointment of 2 parts of red mercury oxide, 120 of lard, 8 of tinctura opii crocata, and 12 of solution of subacetate of lead. [B, 95 (*a*, 38).]—**U. ophthalmicum Richteri.** An ointment of 2 parts of red precipitate and 6 each of cacao butter and lard. [B, 119 (*a*, 38).]—**U. ophthalmicum rubrum.** See *U.* HYDRARGYRI *oxidi rubri.*—**U. ophthalmicum Sti. Yvesii.** See *U. ophthalmicum compositum.*—**U. ophthalmicum simplex.** See *U. ophthalmicum.*—**U. opiatum.** 1. An ointment made by mixing extemporaneously 5 parts each of extract of opium and water with 90 of wax ointment [Ger. Ph., 1st ed.] (of simple ointment [Swiss Ph.], or of lard [Russ. Ph.]). 2. An ointment made by digesting 7 grammes of powdered opium with 60 grammes of calf's bile, and adding 60 of lard and 10 drops of oil of bergamot. [B, 95, 119 (*a*, 38).]—**U. opodeldoch.** See LINIMENTUM *saponato-camphoratum.*—**U. oxygenatum.** Sp.,

pomada oxigenada [Sp. Ph.]. An ointment made by heating 100 parts of lard with 6 of nitric acid of sp. gr. 1·185 [Ger. Ph., 1st ed.], with 12½ of sp. gr. 1·230 [Gr. Ph.] (1·321 [Sp. Ph.]), or with 10 of sp. gr. 1·32 to 1·34 [Swiss Ph.]. [B, 95 (*a*, 38).] See also ADEPS *oxygenatus*.—**U. oxygenatum (Bañares).** Sp., *aceite oxigenado de Bañares* [Sp. Ph.]. An ointment made by heating 460 parts of olive-oil with a solution of 29 of mercury in 58 of nitric acid of sp. gr. 1·321. [B, 95 (*a*, 38).]—**U. oxynomenon.** See *U.* ACIDI NITRICI and ADEPS *oxygenatus*.—**U. paraffinum** [Br. Ph.]. See PETROLATUM.—**U. phosphoratum.** Sp., *pomada fosforada* [Sp. Ph.]. An ointment made by heating phosphorus in a closed flask with 50 times as much melted lard. [B, 95 (*a*, 38).]—**U. plumbicum.** 1. Of the Gr. Ph., see *U.* PLUMBI. 2. Of the Swed. Ph., see EMPLÂTRE *brun*.—**U. pomadinum** [Austr. Ph.]. An ointment made by melting together 150 parts of white wax and 600 of lard washed with rose-water, straining, and adding, when the mixture is half cold, 3 parts each of the oils of bergamot and cloves. [B, 95 (*a*, 38).]—**U. populeum.** 1. Of the Belg. Ph. and Netherl. Ph., see POMATUM *populeum*. 2. Of the Russ. Ph., an ointment made by extracting poplar buds with half as much again 90-per-cent. alcohol, filtering, distilling off the alcohol, evaporating to the consistence of turpentine, and adding 8 times as much lard [Russ. Ph.], or by boiling the buds with twice as much lard till the moisture is dissipated, expressing, and filtering [Ger. Ph.]. [B, 95 (*a*, 38).]—**U. pro pede.** Fr., *onguent de pied* [Fr. Cod.]. A veterinary ointment made of 26 parts of colophony, 50 of mutton suet, 22 of cod-liver oil, and 2 of animal charcoal [Belg. Ph.]; or of equal parts of yellow wax, lard, turpentine, olive-oil, and vegetable tar [Fr. Cod.]. [B, 95 (*a*, 38).]—**U. quercinum.** See PLUMBUM *tannicum pultiforme*.—**U. refrigerans.** Fr., *onguent adoucissant* (2d def.). 1. Of the Swiss Ph., see *U. aquæ* ROSÆ. 2. A mixture of white wax with 3 or 4 times as much oil of roses. [B, 119 (*a*, 38).]—**U. rosatum.** Fr., *liparolé de roses, onguent rosat* (ou *pommadin*). Ger., *Rosensalbe*. Sp., *pomada de rosas* [Sp. Ph.] (1st def.). 1. An ointment made of 30 parts of rose-water with 60 of white wax and 300 of lard [Ger. Ph.] (30 of white wax and 120 of lard washed in rose-water [Gr. Ph.], 10 of white wax and 40 of olive-oil [Swiss Ph.], 60 of oil of theobroma and 120 of oil of sesame [Hung. Ph.]); of 2 parts of oil of roses with 400 of white wax and 3,600 of benzoated lard [Belg. Ph.] (with 48 of yellow wax and 432 of washed lard [Russ. Ph.]); or of equal parts of fresh pink-rose petals and lard digested for three days at a gentle heat. The older ph's generally directed rose petals instead of rose-water and sometimes a large number of aromatic ingredients. [B, 95, 119 (*a*, 38).] 2. Of the Austr. Ph., see *U. pomadinum*.—**U. rosatum compositum.** See *U.* HYDRARGYRI *ammoniati*.—**U. rubefaciens.** See *U.* MEZEREI.—**U. rubrum balsamicum** [Belg. Ph.]. An ointment made of 248 parts of yellow wax, 498 of oilve-oil, 170 of larch turpentine, and 42 each of balsam of Peru and red sandal-wood. [B, 95 (*a*, 38).]—**U. rubrum labiale** [Belg. Ph.]. Fr., *cérat à la rose*. Sp., *cerato rojo para los labios* [Sp. Ph.]. A preparation made up of 27 parts each of hog's lard and almond-oil and 46 of white wax, colored with alkanet-root and flavored with a mixture of balsam of Peru, and the oils of cloves, bergamot, and lemon. The preparations of the Swiss Ph. and Sp. Ph. are made of white wax mixed with about double its weight of expressed almond-oil colored with alkanet-root, and flavored with oil of roses. [B.] Cf. *Ceratum* CETACEI *rubrum*.—**U. santalinum.** An ointment made of 996 parts of myrtle-oil, 249 of white wax, 111 each of red rose and red sandal-wood, and 14 of camphor; or by boiling together 22 parts each of white, yellow, and red sandal-wood, 45 of red poppies, 75 of roses, 360 of oil of roses, and 120 of white wine until the moisture is dissipated, straining, and adding 90 parts each of Armenian bole and white wax and 7 of camphor. [B, 119 (*a*, 38).]—**U. sedativo-narcoticum.** A preparation made by digesting 4 grammes of opium in the gastric juice of a calf for 24 hours by the aid of gentle heat, and adding lard enough to make a soft ointment. [B, 119 (*a*, 38).]—**U. simplex.** 1. Of the Br. Ph., Austr. Ph., Belg. Ph., Gr. Ph., Hung. Ph. (2d ed.), and Swiss Ph., an ointment of 3 parts of white wax with 4½ of benzoated lard and 4½ fluid parts of almond-oil [Br. Ph.], with 17 of benzoated lard [Belg. Ph.], or with 12 (18 [Swiss Ph.]) of simple lard. [B, 95 (*a*, 38).] 2. Of the Netherl. Ph., see *U. cereum*. 3. See CERATUM *Galeni*. 4. See *U.* PLUMBI *carbonatis*.—**U. sinapinum.** See *Cataplasma* SINAPIS.—**U. stibiatum.** See *U.* ANTIMONII.—**U. stomachicum.** Fr., *onguent stomacal* (1st def.) [ou *stomachique* (2d def.)]. 1. An ointment made of 240 parts each of wormwood, mint, sage, and yellow wax, 120 each of rose petals and styrax, 1,200 of olive-oil, and 5 each of the oils of mint, cloves, and wormwood. [B, 119 (*a*, 38).] 2. An ointment made of 30 parts each of nutmeg and cloves and 15 of mastic, all in powder. [B, 119 (*a*, 38).]—**U. strumale.** See *U.* POTASSII *iodidi*.—**U. sulfuratum.** 1. Of the Swiss Ph., see *U.* SULPHURIS. 2. Of the Austr. Ph. and Hung. Ph., 2d ed., see *U.* SULPHURIS *compositum*.—**U. sulfuratum compositum.** See *U.* SULPHURIS *compositum*.—**U. sulfuratum simplex.** See *U.* SULPHURIS.—**U. sulphuratum.** 1. Of the Belg. Ph., see *U.* SULPHURIS. 2. Of tho Netherl. Ph., see *U.* SULPHURIS *compositum*.—**U. sulphuratum alcalinum.** See *U.* SULPHURIS *alkalinum*.—**U. suppurans.** Ger., *Eiterungssalbe*. An ointment made of 4 pounds of honey, 3 of figs, 1 pound each of resin, Venetian soap, and pulp of onions, and 2 oz. of galbanum; or of ½ pound each of yellow wax, resin, and white soap, and 2½ pounds each of roasted onions and honey. [B, 97 (*a*, 38).]—**U. terebinthinaceum.** See *U.* TEREBINTHINÆ *compositum*.—**U. terebinthinatum.** See *U.* TEREBINTHINÆ.—**U. universale** [Dan. Ph.]. An ointment made of 12 parts of yellow wax, 34 of oil of rape-seed, and 2 each of lead acetate and warm oil of rape-seed. [B, 95 (*a*, 38).]—**U. venereum de Cirillo.** See POMMADE *de Cirillo*.—**U. vesicatorium.** See *U.* CANTHARIDIS.—**U. vesicatorium cum euphorbio** [Belg. Ph.]. Fr., *onguent vésicatoire* (*Lebas*) [Fr. Cod.]. A veterinary ointment made of 193 parts of cantharides, 65 of euphorbium, and 742 of pitch plaster [Belg. Ph.]; or of 300 parts of yellow wax, 400 each of terebinthina cocta and black pitch, 1,000 of olive-oil, 600 of cantharides, and 200 of euphorbium [Fr. Cod.]. [B, 95 (*a*, 38).]—**U. viennense** [Netherl. Ph.]. Fr., *pommade sulfureuse contre la gale* [Fr. Cod.]. An ointment made of 3 parts each of sublimed sulphur and tar, 2 of potassium carbonate, and 6 each of lard and green soap [Netherl. Ph.]; or of 10 parts of potassium sulphide, 2 of pure potassium carbonate, and 300 of lard [Fr. Cod.]. [B, 95 (*a*, 38).]—**U. viride.** See *U.* ÆRUGINIS.—**U. viride potabile.** Fr., *onguent vert*. An old preparation made of a large number of herbs and sometimes containing snails and crabs, made into an ointment with butter. [B, 119 (*a*, 38).]—**U. zincico-plumbicum** [Swed. Ph.]. An ointment made of 8 parts each of olive-oil, zinc oxide, white lead, and litharge, 4 each of minium and lead acetate, 16 of suet, and 2 of camphor liniment. [B, 95 (*a*, 38).]

UNGUICULAR, adj. U^{3}n^2-gwi^{2}k'u^{2}l-a^{3}r. Lat., *unguicularis* (from *unguiculus*, a small nail). Ger., *nagellang* (2d def.). 1. Of or pertaining to a claw or nail. 2. Half an inch in length. [*a*, 35.]

UNGUICULATE, adj. U^{3}n^2-gwi^{2}k'u^{2}l-at. Lat., *unguiculatus*. Fr., *onguiculé*. Ger., *benagelt, genagelt*. Furnished with claws; of petals, contracted at the base into an unguis. [*a*, 35.]

UNGUICULUS (Lat.), n. m. U^{3}n^2(u^{4}n^2)-gwi^{2}k'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *unguis*, a nail. See UNGUIS and NAIL (1st def.).

UNGUINOCÈLE (Fr.), n. U^{6}n^2-gwen-o-se^{2}l. From *unguen*, fat, and κήλη, a tumor. See AÏ.

UNGUIS (Lat.), n. m. U^{3}n^2(u^{4}n^2)'gwi^{2}s. Fr., *onglet* (5th def.). Ger., *Nagel* (1st and 5th def's), *Nagellänge* (6th def.). 1. See NAIL (1st def.). 2. The hard, horny termination of the beak of a bird. [L, 221.] 3. See ONYX (2d def.). 4. The pes hippocampi of the hippocampus major. [I, 3 (K).] 5. In botany, a claw or stalk of a petal. 6. Half an inch, being the length of the thumb-nail. [*a*, 35.]—**U. avis.** See HIPPOCAMPUS *minor*.—**U. corneæ.** See ONYX (2d def.).—**U. hippocraticus.** Of Hippocrates, the bluish discoloration of the nails observed in pulmonary diseases. [L, 57 (*a*, 50).]—**U. incarnatus, U. in carne.** See *Ingrowing* NAIL.—**U. in oculo.** See PTERYGIUM (2d def.).

UNGULA (Lat.), n. f. U^{3}n^2(u^{4}n^2)'gu^{2}l(gu^{4}l)-a^3. From *unguis*, a nail. See HOOF.—**Ungulæ palpebrarum.** An old term for the tarsal cartilages. [F.]

UNGULATA (Lat.), n. n. pl. U^{3}n^{2}g(u^{4}n^{2}g)-u^{2}l(u^{4}l)-at(a^{3}t)'a^3. From *ungula*, a hoof. An order of the *Mammalia* comprising the hoofed quadrupeds. [B, 28 (*a*, 27).]

UNHEILBAR (Ger.), adj. Un'hil-ba^{3}r. See INCURABLE.

UNHEILSAM (Ger.), adj. Un'hil-za^{3}m. Unwholesome, insalubrious. [A, 521 (*a*, 48).]

UNIAXIAL, adj. U^{2}n-i^2-a^{2}x'i^2-'l. From *unus*, one, and *axis*, an axis. See MONAXIAL.

UNICELLULAR, adj. U^{2}n-i^2-se^{2}l'u^{2}l-a^{3}r. Lat., *unicellularis* (from *unus*, one, and *cellula*, a small cell). Fr., *unicellulaire*. Ger., *einzellig, unicellulär*. Consisting of but one cell. [J.]

UNICISM, n. U^{2}n'i^{2}s-i^{2}zm. From *unicus*, one only. Lat., *unitarismus*. Fr., *unicisme*. Ger., *Unitätslehre*. The doctrine that chancre and chancroid are both due to a single virus (cf. DUALISM [5th def.]). [*a*, 48.]

UNICIST, n. U^{2}n'i^{2}s-i^{2}st. A believer in unicism. [*a*, 17.]

UNICITÉ (Fr.), n. U^6-ne-se-ta. The property of being unique (applied by Ricord to syphilis to indicate that it can affect an individual only once). [A, 319 (*a*, 48).]

UNICORN-ROOT, n. U^{2}n'i^2-ko^{2}rn-ru^{4}t. See ALETRIS *farinosa*.

UNICORNU (Lat.), n. n. U^{2}n(un)-i^2-ko^{2}rn'u^2(u). From *unus*, one, and *cornu*, a horn. See RHINOCEROS.

UNIFLOROUS, adj. U^{2}n-i^2-flor'u^{3}s. Lat., *uniflorus* (from *unus*, one, and *flos*, a flower). Fr., *uniflore*. Ger., *einblüthig, einblumig*. Bearing a single flower. [*a*, 35.]

UNIFOLIATE, adj. U^{2}n-i^2-fol'i^2-at. Lat., *unifoliatus* (from *unus*, one, and *folium*, a leaf). Fr., *unifeuillé*. Ger., *einblättrig*. 1. Bearing but one leaf. 2. Unifoliolate. [*a*, 35.]

UNIFOLIOLATE, adj. U^{2}n-i^2-fol'i^2-o^{2}l-at. Lat., *unifoliolatus* (from *unus*, one, and *foliolum*, a little leaf). Fr., *unifoliolé*. Ger., *eintheilblättrig*. Of a compound leaf, consisting of a single leaflet. [*a*, 35.]

UNIGLANS (Lat.), n. f. U^{2}n(un)'i^2-gla^{2}nz(gla^{3}ns). Gen., *-gland'is*. Fr., *unigland*. Of Mirbel, a cupulate fruit containing but one glans (*e. g.*, an acorn). [*a*, 35.]

UNIJUGATE, adj. U^{2}n-i^{2}j'u^{2}g-at. Lat., *unijugus* (from *unus*, one, and *jugum*, a yoke). Fr., *unijugué*. Ger., *einpaarig*. Having but one jugum, or pair of leaflets. [*a*, 35.]

UNILABIATE, adj. U^{2}n-i^2-lab'i^2-at. Lat., *unilabiatus* (from *unus*, one, and *labium*, a lip). Ger., *einlippig*. Having but one lip (said of a corolla in which one lip is obsolete). [*a*, 35.]

UNILATERAL, adj. U^{2}n-i^2-la^{2}t'e^2-r'l. Lat., *unilateralis* (from *unus*, one, and *latus*, a side). Fr., *unilatéral*. Ger., *einseitig*. 1. One-sided, growing on or turned all toward one side of an axis. [*a*, 35.] 2. Affecting only one side of the body or one of two laterally paired organs.

UNILOBATE, adj. U^{2}n-i^{2}l'o^{2}b-at. Lat., *unilobatus* (from *unus*, one, and *lobus*, a lobe). Fr., *unilobé*. Ger., *einlappig*. Having but one lobe. The *Unilobatæ* (Fr., *unilobées*) are the monocotyledons. [*a*, 35.]

UNILOCULAR, adj. U^{2}n-i^2-lo^{2}k'u^{2}l-a^{3}r. Lat., *unilocularis* (from *unus*, one, and *loculus* [*q. v.*]). Fr., *uniloculaire*. Ger., *einkammerig, einfächerig*. 1. Having but one loculus; one-celled. [*a*, 35.] 2. Of a cystic tumor, made up of only one cyst.

UNINERVATE, adj. U^{2}n-i^2-nu^{5}rv'at. Lat., *uninervis* (from *unus*, one, and *nervus*, a nerve). Fr., *uninerve*. Ger., *einnervig*. Having only one rib or midrib. [*a*, 35.]

UNINERVI-OBLITERATUS (Lat.), adj. U^{2}n(un)-i^2-nu^{6}r-(ne^{2}r)-vi^2(wi^2)-o^{2}b-li^{2}t(let)-e^{2}r-at(a^{3}t)′u^{3}s(u^{4}s). From *unus*, one, *nervus*, a nerve, and *obliterare*, to obliterate. Fr., *uninervi-oblitéré.* Having a single rib (midrib) which is obliterated before reaching the margin of the leaf. [α, 35.]

UNINTERRUPTED, adj. U^{3}n-i^{2}nt-u^{6}r-ru^{3}pt′e^{2}d. Consisting of equal parts or of parts which increase or decrease regularly; continuous. [α, 35.]

UNINUCLEAR, adj. U^{2}n-i^2-nu^{2}k′le^2-a^{3}r. From *unus*, one, and *nucleus*, a nut. Ger., *einkernig, uninucleär.* Having but a single nucleus. [J.]

UNIO (Lat.), n. f. U^{2}n(un)′i^2-o. Gen., *o′nis.* From *unus*, one. See UNION.—**U. thalamorum nervorum opticorum.** See *Middle* COMMISSURE *of the brain.*—**U. vasorum.** See ANASTOMOSIS (2d def.).

UNIOCULAR, adj. U^{2}n-i^2-o^{2}k′u^{2}l-a^{3}r. Lat., *uniocularis, uniocullatus* (from *unus*, one, and *oculus*, the eye). Fr., *uniocul*é. Ger., *einäugig.* 1. Having but one eye. [F.] See CYCLOPS. 2. In botany, having but one point (eye) of vegetation. [α, 35.]

UNION, n. U^{2}n′yu^{3}n. Gr., ἕνωσις. Lat., *unio* (from *unus*, one). Fr., *u.* Ger., *U., Verbindung.* The act or process of conjoining two or more things, also the condition of being so conjoined. [E; α, 48.]—**Dissolved u.** A condition sometimes seen in fractures in which, callus having once formed and the fragments having been united, the reparative material subsequently dissolves and disappears. [E, 4.]—**Primary u.** See *First* INTENTION.—**Secondary u.** See *Second* INTENTION.—**U. of granulations.** See *Third* INTENTION.—**Vicious u.** The condition of deformity following badly united fractures. [E.]

UNIOVULAR, UNIOVULATE, adj's. U^{2}n-i^2-o^{2}v′u^{2}l-a^{3}r, -at. From *unus*, one, and *ovulum*, a little egg. Ger., *eineiig.* Having a solitary ovule. [α, 35.]

UNIPARA (Lat.), n. f. U^{2}n(un)-i^{2}p′a^{2}r(a^{3}r)-a^3. From *unus*, one, and *parere*, to bring forth. A woman who is parturient for the first time. [α, 48.]

UNIPAROUS, adj. U^{2}n-i^{2}p′a^{2}r-u^{3}s. From *unus*, one, and *parere*, to bring forth. 1. Of animals, usually bringing forth but one fœtus at a birth. 2. In botany, producing but one (*e. g.*, a u. cyme is a cyme with one lateral axis). [α, 35.]

UNIPETALOUS, adj. U^{2}n-i^2-pe^{2}t′′l-u^{3}s. Lat., *unipetalus* (from *unus*, one and *petalum*, a petal). Fr., *unipétale.* Ger., *einzelblumenblättrig.* Consisting of a single petal (the others being aborted or non-developed); not to be confounded with *gamopetalous.* [α, 35.]

UNIPOLAR, adj. U^{2}n-i^{2}p′o^{2}l-a^{3}r. Lat., *unipolaris* (from *unus*, one, and *polus*, a pole). Fr., *unipolaire.* Ger., *einpolig.* Of cells, having but one process. [B.]

UNISERIAL, UNISERIATE, adj's. U^{2}n-i^2-ser′i^2-′l, -at. From *unus*, one, and *series*, a row. Fr., *unisérié.* Arranged in a single line. [α, 35.]

UNISEXUAL, adj. U^{2}n-i^2-se^{2}x′u^2-′l. Lat., *unisexualis* (from *unus*, one, and *sexus*, a sex). Fr., *unisexual.* Ger., *eingeschlechtlich.* Having the sexual organs of but one sex; of a flower, having stamens or pistils only. The *Unisexuales* of Bentham and Hooker are a series of monochlamydeous dicotyledons, consisting of the *Euphorbiaceæ, Cupuliferæ, Juglandeæ*, etc. [α, 35.]

UNISSANT (Fr.), adj. U^6-ne-sa^{3}n^2. See CONNECTIVE.

UNIT, n. U^{2}n′i^{2}t. From *unus*, one. Fr., *unité.* Ger., *Einheit.* 1. A single individual. 2. A quantity adopted as a starting-point by comparison with which other quantities are measured. [α, 48.]

UNITAIRES (Fr.), n. pl. U^6-ne-ta^{2}r. Isidore Geoffroy Saint-Hilaire's first class of monsters, including all in which the elements of a single individual only are found. [A, 301 (α, 34).]

UNITARISMUS (Lat.), n. m. U^{2}n(un)-i^{2}t-a^{2}r(a^{3}r)-i^{2}z(i^{2}s)′mu^{3}s-(mu^{4}s). From *unitas*, unity. Ger., *Unitätslehre.* See UNICISM.

UNITÉ (Fr.), n. U^6-ne-ta. 1. Oneness, unity. [α, 48.] 2. See UNIT.—**U. morbide.** In pathology, the aggregate of the lesions and symptoms which present in different cases sufficient analogy to be classed together under one name. [L, 41 (α, 14).]

UNITIF (Fr.), adj. U^6-ne-tef. See CONNECTIVE.

UNIVALENCE, n. U^{2}n-i^{2}v′′l-e^{2}ns. Fr., *u.* Ger., *Einwerthigkeit.* The condition or property of being univalent. [B.]

UNIVALENT, adj. U^{2}n-i^{2}v′′l-e^{2}nt. From *unus*, one, and *valere*, to be worth. Ger., *einwerthig.* Having an atomicity of one (*i. e.*, being capable of replacing one atom of hydrogen in a compound). [B.]

UNIVALVE, adj. U^{2}n′i^2-va^{2}lv. From *unus*, one, and *valva*, a valve. Having a single valve; as a n., a mollusc having a shell consisting of a single valve or piece. [α, 48.]

UNIVERSAL, adj. U^{2}n-i^2-vu^{6}r′s′l. Lat., *universalis* (from *universus*, together). In botany, general, in contradistinction to partial. [α, 35.]

UNIVOQUE (Fr.), adj. U^6-ne-vok. Unequivocal, acting in one way only; of generation, normal (cf. EQUIVOCAL). [A, 385 (α, 48).]

UNLEBENSFÄHIG (Ger.), adj. Un′lab-e^{2}nz-fa-i^{2}g. Not viable. [α, 14.]

UNLINING, n. U^{3}n-lin′i^{2}n^2. See CHORISIS.

UNLÖSLICH (Ger.), adj. Un′lu^{6}s-li^{2}ch^2. See INSOLUBLE.

UNMÄSSIGKEIT (Ger.), n. Un′mas-si^{2}g-kit. See INTEMPERANCE.

UNOCULUS (Lat.), adj. U^{2}n(un)-o^{2}k′u^{2}l(u^{4}l)-u^{3}s(u^{4}s). See UNIOCULAR.

UNONA (Lat.), n. f. Un-on′a^3. Fr., *u., unone.* A genus of anonaceous trees or shrubs. The *Unoneæ* (Fr., *unonées*) are a subdivision (tribe) of the *Anonaceæ.* [α, 35.]—**U. æthiopica.** See HABZELIA *æthiopica.*—**U. narum.** See UVARIA *narum.*

UNORDENTLICH (Ger.), adj. Un′ord-e^{2}nt-li^{2}ch^2. Irregular, atactic.

UNPAAR (Ger.), **UNPAARIG** (Ger.), adj's. Un′pa^{3}r, -pa^{3}r-i^{2}g. See AZYGOS.

UNREGELMÄSSIG (Ger.), adj. Un′rag-e^{2}l-mas-si^{2}g. See IRREGULAR.

UNREIF (Ger.), adj. Un′rif. Unripe, immature. [α, 35.]

UNREIN (Ger.), n. Un′rin. Unclean, dirty. [α, 14.]

UNREINHEIT (Ger.), **UNREINLICHKEIT** (Ger.), n. Un′rin-hit, -li^{2}ch^2-kit. Uncleanliness. [α, 14.]

UNREIZBAR (Ger.), adj. Un′rits-ba^{3}r. Not irritable.

UNRUHE (Ger.), n. Un′ru-e^2. Restlessness.—**Muskelu′.** 1. Chorea minor. [D.] 2. See CONVULSIBILITY.

UNSATURATED, adj. U^{3}n-sa^{2}t′u^{2}r-at-e^{2}d. Ger., *ungesättigt.* Of a compound, not having the total combining capacities of all its elements satisfied; of a solution, not containing its maximum of a soluble body. [B; L.]

UNSCHÄDLICH (Ger.), adj. Un′shad-li^{2}ch^2. Harmless. [α, 48.]

UNSCHMERZHAFT (Ger.), n. Un′shme^{2}rts-ha^{3}ft. Painless.

UNSINNIG (Ger.), adj. Un′zi^{2}n-i^{2}g. Demented, insane. [α, 14.]

UNSOUNDNESS OF MIND, n. U^{3}n-su^5′u^{4}nd-ne^{2}s. A mental condition in which there is inability to transact ordinary affairs properly or to follow certain lines of thought consecutively. [α, 34.]

UNSTABLE, adj. U^{3}n-sta′b′l. Lat., *instabilis.* Fr., *instable.* Ger., *unbeständig.* Not fixed or permanent. [α, 48.]

UNSYMMETRICAL, adj. U^{3}n-si^{2}m-e^{2}t′ri^{2}k′l. 1. Destitute of symmetry (cf. SYMMETRY and ASYMMETRY). [α, 48.] 2. Of a flower, having whorls which differ in numerical plan. [α, 35.] 3. Of a trisubstituted benzene compound, having two of the replacing radicles attached to two neighboring carbon atoms and the third to the carbon atom which is not adjacent to either of these two. [B.] Cf. SYMMETRICAL.

UNTERBAUCH (Ger.), n. Unt′e^{2}r-ba^3-u^{4}ch^2. See HYPOGASTRIUM.

UNTERBINDUNG (Ger.), n. Unt-e^{2}r-bi^{2}nd′un^2. See LIGATION and LIGATURE (1st def.).

UNTERCHLORIG (Ger.), adj. Unt-e^{2}r-klor′i^{2}g. Hypochlorous. [B.]—**U′säure.** Hypochlorous acid. [B.]

UNTERCHLORSÄURE (Ger.), n. Unt-e^{2}r-klor′zoir-e^2. See CHLORINE *peroxide.*

UNTERDRÜCKUNG (Ger.), n. Unt-e^{2}r-dru^{6}k′un^2. See SUPPRESSION.

UNTEREITERN (Ger.), v. intr. Unt′e^{2}r-it-e^{2}rn. To suppurate beneath. [L, 46 (α, 21).]

UNTERGESICHT (Ger.), n. Unt′e^{2}r-ge^2-zi^{2}ch^{2}t. The lower part of the face. [α, 32.]

UNTERHALS (Ger.), n. Unt′e^{2}r-ha^{3}ls. The lower part of the neck. [α, 48.]

UNTERHAUT (Ger.), n. Unt′e^{2}r-ha^3-u^{4}t. 1. See CORIUM (1st def.). 2. The subcutaneous tissue. [J.]

UNTERHÄUTIG (Ger.), adj. Unt′e^{2}r-hoit-i^{2}g. See SUBCUTANEOUS.

UNTERHIRN (Ger.), n. Unt′e^{2}r-hern. See SUBENCEPHALON.

UNTERHORN (Ger.), n. Unt′e^{2}r-ho^{2}rn. See *Descending* HORN *of the lateral ventricle.*

UNTERKIEFER (Ger.), n. Unt′e^{2}r-kef-e^{2}r. See *Inferior* MAXILLA.—**U′ast.** The ramus of the inferior maxilla. [L, 31.]—**U′phänomen.** See *Jaw*-JERK.

UNTERKIEMENDECKELSTÜCK (Ger.), n. Unt′e^{2}r-kem-e^{2}n-de^{2}k-e^{2}l-stu^{6}k. See *Subopercular* BONE.

UNTERKINN (Ger.), n. Unt′e^{2}r-ki^{2}n. 1. The lower part of the chin. [α, 14.] 2. See BUCCULA (1st def.).

UNTERKÜHLT (Ger.), adj. Unt-e^{2}r-ku^{6}lt′. Cooled below the freezing point without solidifying. [B.]

UNTERLAPPEN (Ger.), n. Unt′e^{2}r-la^{3}p-pe^{2}n. See *Biventral* LOBE and *Temporo-sphenoidal* LOBE.—**Hinterer U.** See *Posterior inferior* LOBE.

UNTERLASSEN (Ger.), n. Unt-e^{2}r-la^{3}s′se^{2}n. See INTERMISSION.

UNTERLAUFUNG (Ger.), n. Unt-e^{2}r-la^3′u^{4}f-un^2. See ECCHYMOSIS and EXTRAVASATION.

UNTERLEIB (Ger.), n. Unt′e^{2}r lib. See ABDOMEN.—**U′sbeschauer.** See LAPAROSCOPE.—**U′sblähung.** See TYMPANITES.—**U′sbruch.** See *Abdominal* HERNIA.

UNTERPHOSPHORIG (Ger.), adj. Unt′e^{2}r-fos-for-i^{2}g. See HYPOPHOSPHOROUS.—**U′säure.** Hypophosphorous acid. [B.]

UNTERPHOSPHORSÄURE (Ger.), n. Unt′e^{2}r-fos-for-zoir-e^2. Phosphatic acid. [A, 324.]

UNTERRIPPENGEGEND (Ger.), n. Unt′e^{2}r ri^{2}p-pe^{2}n-gag-e^{2}nd. See *Hypochondriac* REGION.

UNTERSALPETERSÄURE (Ger.), n. Unt′e^{2}r-za^{3}l-pat-e^{2}r-zoir-e^2. Hyponitric acid. [A, 324.]

UNTERSCHEIDUNG (Ger.), n. Unt′e^{2}r-shid-un^2. See DIFFERENTIATION and DIAGNOSIS.

UNTERSCHENKEL (Ger.), n. Unt'e²r-she²n²k-e²l. See LEG (1st def.).—**U'strecker.** See EXTENSOR *quadriceps femoris.*

UNTERSCHIED (Ger.), n. Unt'e²r-shed. See DIAPHORA.

UNTERSCHLÄCHTIG (Ger.), adj. Unt'e²r-shlach²t-i²g. See SUCCUBOUS.

UNTERSCHLÄFENFIRSTE (Ger.), n. Unt'e²r-shlaf-e²n-ferst-e². See *Infratemporal* CREST.

UNTERSCHLÜSSELBEINMUSKEL (Ger.), n. Unt'e²r-shlu⁶s-se²l-bin-musk-e²l. See SUBCLAVIUS.

UNTERSCHULTERBLATTMUSKEL (Ger.), n. Unt'e²r-shult-e²r-bla³t-musk-e²l. See SUBSCAPULARIS.

UNTERSCHWEFLIG (Ger.), adj. Unt-e²r-shwaf'li²g. See HYPOSULPHUROUS.

UNTERSCHWEFELSÄURE (Ger.), n. Unt'e²r-shwaf-e²l-zoir-e². Hyposulphuric acid. [A, 324.]

UNTERSUCHUNG (Ger.), n. Unt'e²r-zuch²-un². See EXAMINATION.—**Doppelte U.** Combined abdomino-vaginal examination. —**Fingeru'.** See *Digital* EXAMINATION.—**Gemischte U., Mehrseitige U.** See *Bimanual* EXAMINATION.—**Sondenu'.** An examination with a sound.—**U'slehre.** See DOCIMASIOLOGIA.

UNTERTAUCHEN (Ger.), **UNTERTAUCHUNG** (Ger.), n's. Unt'e²r-ta³-u⁴ch²-e²n, -un². See IMMERSION.

UNTERTUCH (Ger.), n. Unt'e²r-tuch². See ALÈZE.

UNTERWEIBIG (Ger.), adj. Unt'e²r-vib-i²g. See HYPOGYNOUS.

UNTERWUNDARZT (Ger.), n. Unt'e²r-vund-a³rtst. An assistant surgeon. [*a*, 14.]

UNTERWURM (Ger.), n. Unt'e²r-vurm. See *Inferior vermiform* PROCESS.

UNTERZWICKEL (Ger.), n. Unt'e²r-tswi²k e²l. See SUBCUNEUS.

UNVERBRENNBAR (Ger.), **UNVERBRENNLICH** (Ger.), adj's. Un'fe²r-bre²n-ba³r, -li²ch². See INCOMBUSTIBLE.

UNVERDAULICH (Ger.), adj. Un'fe²r-da³-u⁴-li²ch². See INDIGESTIBLE.

UNVERDAUUNG (Ger.), n. Un'fe²r-da³-u⁴-un². See INDIGESTION (1st def.).

UNVERMÖGEN (Ger.), n. Un'fe²r-mu⁶g-e²n. See IMPOTENCE.

UNVERTRÄGLICH (Ger.), adj. Un'fe²r-trag-li²ch². See INCOMPATIBLE.

UNVOLLKOMMEN (Ger.), adj. Un'fol-ko³m-me²n. See IMPERFECT.

UNWELL, adj. U³n-we²l'. 1. Sick, affected with illness. [*a*, 48.] 2. See MENSTRUOUS (2d def.).

UNWILLKÜRLICH (Ger.), adj. Un'vi²l-ku⁶r-li²ch². See INVOLUNTARY.

UNWOHLSEIN (Ger.), n. Un'vol-zin. Indisposition. [L, 57.]

UNWURZELKEIMER (Ger.), n. pl. Un'vurts-e²l-kim-e²r. See ARRHIZOBLASTÆ.

UNXIA (Lat.), n. f. U³n²x(u⁴n²x)'i²-a². Fr., *unxie.* A genus of the *Compositæ,* referred by Bentham and Hooker to *Melampodium.* [*a*, 35.]—**U. camphorata.** A Surinam species; used as a sudorific, and especially as an application in lumbago. [*a*, 35.]

UNZEITIG (Ger.), adj. Un'tsit-i²g. Premature, immature. [A, 521 (*a*, 48).]

UNZULÄNGLICHKEIT (Ger.), n. Un'tsu-lan²-li²ch²-kit. See INSUFFICIENCY.

UNZURECHNUNGSFÄHIG (Ger.), adj. Un'tsu-re²ch²-nun²z-fa-i²g. Not accountable, irresponsible. [*a*, 14.]

UPAS (Mal.), n. U²'pa²s. A poison, especially the *U. antiar* and *U. tieute.* [*a*, 35.]—**U. antiar.** See ANTIAR.—**U.-bidji.** See SOPHORA *tomentosa.*—**U. radja, U. tieute.** A poison more active than the antiar u., prepared from a decoction of the root-bark of *Strychnos tieute,* mixed with garlic, pepper, etc. It resembles strychnine in its effects. [*a*, 35.]—**U.-tree.** See ANTIARIS *toxicaria.*

UPPER BLUE LICK SPRINGS, n. U³p'u⁶r-blu²-li²k. A place in Nicholas County, Kentucky, where there is a gaseous and sulphurous spring. [Anderson (*a*, 14).]

URACHAL, adj. U²r'a²-k'l. Pertaining to the urachus.

URACHUS (Lat.), n. m. U²r(ur)'a²k(a³ch²)-u³s(u⁴s.) From οὖρον, urine, and ἔχειν, to hold. Fr., *ouraque.* Ger., *Harngang, Harnstrang, Harnblasenschnur, Blasenband.* In the embryo, a tubular extension of the walls of the urinary bladder toward and in part through the umbilicus to join the allantois; in the human embryo it does not generally pass beyond the root of the umbilical cord. In the adult, a ligamentous cord resulting from obliteration of the u. of the embryo connecting the bladder with the front wall of the abdomen. [A, 5; L, 12 (*a*, 27).]

URACRASIA (Lat.), **URACRATIA** (Lat.), n's f. U²r(ur)-a²k(a³k)-raz(ra³s)'i²-a³, -ra²sh(ra³t)-i(e)'a². From οὖρον, urine, and ακρασία, or ἀκράτεια, debility. See ENURESIS.

URÆMIA (Lat.), n. f. U²r(ur)-em'(a³'e²m)-i²-a³. From οὖρον, urine, and αἷμα, blood. Fr., *urémie.* Ger., *Urämie, Harnstoffblutvergiftung.* A poisoned state of the blood due to defective elimination of the elements of urine in consequence of impairment of the functional capability of the kidneys, or by their resorption in cases of retention of urine; characterized by stupor and, especially in lying-in women, by convulsions.—**Dyspnœic u., Pulmonary u.** See *Uræmic* DYSPNŒA.—**Renal u.** U. caused by retention of urine in the kidneys. [L, 57 (*a*, 14).]—**Ureteral u.** U. caused by retention of urine in the ureters. [L, 57 (*a*, 14).]—**Urethral u.** U. caused by constriction of the urethra and consequent retention of urine. [L, 57 (*a*, 14).]—**Vesical u.** U. caused by retention of urine in the bladder. [L, 57 (*a*, 14).]

URÆMIC, adj. U²r-e²m'i²k. Lat., *uræmicus.* Fr., *urémique.* Ger., *urämisch.* Pertaining to or due to uræmia. [D.]

URAGOGUS (Lat.), adj. U²r(ur)-a²g(a³g)-og'u³s(u⁴s). From οὖρον, urine, and ἄγειν, to drive. Fr., *uragogue.* See DIURETIC.

URAL, n. U²'r'l. Lat., *uralium.* A hypnotic combination of urethane and chloral hydrate; used in cardiac disease, mental disorders, and hysteria. ["N. Y. Med. Jour.," Feb. 1, 1890, p. 130.]

URALI, n. Ur-a³'le. See CURARE (1st def.).

URALIUM (Lat.), n. n. U²r(ur)-a(a³)'li²-u³m(u⁴m). See URAL.

URAMIDOBENZOIC ACID, n. U²r-a²m-i²d-o-be²nz-o'i²k. Fr., *acide uramidobenzoïque.* Ger., *Uramidobenzoësäure.* An acid, $C_8H_8N_2O_3$, known in three isomeric forms: *Orthou' acid,* acicular crystals; *metau' acid,* acicular or prismatic crystals containing water of crystallization; and *parau' acid,* long tabular crystals. [B; B. 3 (*a*, 38).]

URAMIDOXIME, n. U²r-a²m-i²d-o²x'i²m. A body having at once the structure of a substituted urea and of an amidoxime. [B.]

URAMIL, n. U²r'a²m-i²l. Fr., *uramile.* Ger., *U.* Of Liebig and Wöhler, dialuramide. [B, 4.]

URANALYSIS (Lat.), n. f. U²r(ur)-a²n(a³n)-a²l(a³l)'i²s(u⁶s)-i²s. Gen., *-ys'eos (-al'ysis).* From οὖρον, urine, and ἀνάλυσις, a loosing. The analysis of urine.

URANATE, n. U²r'a²n-at. A compound of a metallic oxide with uranium trioxide. [B. 3.]

URANE (Fr.), n. U⁶-ra³n. A substance long considered an elementary body, but now shown to be a uranium oxide. [B.]

URANFÄNGLICH (Ger.), adj. Ur'a³n-fan²-li²ch². See PRIMORDIAL.

URANIC, adj. U²r-a²n'i²k. Fr., *uranique.* Containing uranium as a hexad radicle. [B.]

URANIN, n. U²r'a²n-i²n. 1. A compound of fluorescein with ammonia. ["Dtsch. med. Wchnschr.," 1882, 2, 3, 4 (B).] 2. A dye-stuff, $C_{20}H_{10}O_5Na_2$, the sodium salt of fluorescein. [B, 270 (*a*, 38).]

URANISCOCHASMA (Lat.), n. n. U²r(ur)-a²n(a³n)-i²sk-o(o³)-ka²z(ch²a³s)'ma³. Gen., *-chas'matos (-atis).* From οὐρανίσκος, the palate, and χάσμα, a yawning. See *Cleft* PALATE.

URANISCONITIS (Lat.), n. f. U²r(ur)-a²n(a³n)-i²sk-o²n-i(e)'ti²s. Gen., *-it'idos (-idis).* From οὐρανίσκος, the palate. Fr., *palatite.* Ger., *Gaumenentzündung.* Inflammation of the palate. [E.]

URANISCOPLASTY, n. U²r-a²n-i²sk'o-pla²st-i². Lat., *uraniscoplastice* (from οὐρανίσκος, the palate, and πλάσσειν, to mold). Fr., *uraniscoplastie.* See URANOPLASTY.

URANISCORRHAPHY, n. U²r-a²n-i²sk-o²r'a²f-i². Lat., *uraniscorrhaphia, uraniscorrhaphe* (from οὐρανίσκος, the palate, and ῥαφή, a suture). Fr., *uraniscorrhaphie.* See STAPHYLORRHAPHY.

URANISCOSTÉOPLASTIE (Fr.), n. U⁶-ra³-ne-sko-sta-o-pla³st-e. Restoration of the osseous palate by a plastic operation.

URANISCUS (Lat.), n. m. U²r(ur)-a²n(a³n)-i²sk'u³s(u⁴s). Gr., οὐρανίσκος (from οὐρανός, the vault of heaven). The vault of the mouth, the palate. [*a*, 48.]

URANIUM (Lat.), n. n. U²r(ur)-an(a³n)'i²-u³m(u⁴m). Fr., *u.* Ger., *Uran.* A metallic element discovered by Klaproth in 1789, eight years after the discovery of the planet Uranus, from which it was named. It occurs in nature usually as an oxide. It is a hard, malleable, grayish-white metal of silvery lustre. In composition it acts as a tetrad, pentad, or hexad. Symbol, U; sp. gr., 18·33; atomic weight, 240. [B, 3.]—**U. tetroxide.** A body, UO_4, forming either a colorless micro-crystalline powder, or, combined with water of crystallization, $UO_4 + 2H_2O$, a yellowish-white substance. [B.]—**U. trioxide.** A brownish-yellow powder, $UO_3 = (UO_2)'O$. [B, 3.]

URANLAGE (Ger.), n. Ur'a³n-la³g-e². A primary rudiment; a germ. [A, 8.]

URANOCOLOBOMA (Lat.), n. n. U²r(ur)''a²n(a³n)-o(o³)-ko²l-o²b-om'a³. Gen., *-bom'atos (-atis).* From οὐρανός, the palate, and κολόβωμα, mutilation. See *Cleft* PALATE.

URANOMANIA (Lat.), n. f. U²r(ur)-a²n(a³n)-o(o³)-man(ma³n)'i²-a³. From οὐρανός, heaven, and μανία, madness. A form of megalomania involving belief in the subject's divine or celestial origin. [A, 540 (*a*, 34).]

URANOPLASTIC, adj. U²r-a²n-o-pla²st'i²k. Fr., *uranoplastique.* Ger., *Uranoplastik.* Pertaining to uranoplasty. [L, 197.]

URANOPLASTY, n. U²r'a²n-o-pla²st-i². From οὐρανός, the palate, and πλάσσειν, to mold). Fr., *ouranoplastie, uranoplastie.* Ger., *Gaumenbildung, Uranoplastik.* The plastic surgery of the palate. Cf. STAPHYLORRHAPHY.—**Dieffenbach's u., Fergusson's u.** An operation in which the edges of the hard palate are first drilled with holes with a curved brad-awl for the passage of the threads; the palate itself is then cut through with a chisel in a line parallel to and half an inch from the edge of the cleft; the edges are thus brought together, and the spaces left where the cuts are made by the chisel are allowed to heal by granulation. [E.]—**Mason's u.** An operation in which the holes are first drilled with a curved brad-awl through the hard palate on each side of the cleft to facilitate the use of the chisel and guide it in the division of the bone. [E.]

URANORRHAPHE (Lat.), **URANORRHAPHIA** (Lat.), n's f. U²r(ur)-a²n(a³n)-o²r'ra²f(ra³f)-e(a), -o²r-ra³f(raf)'i²-a³. Gen., *-rhaph'es, -rhaph'iæ.* From οὐρανός, the palate and ῥαφή, a suture. See STAPHYLORRHAPHY.

URANOSCHISIS (Lat.), **URANOSCHISMA** (Lat.), u's f. and n. U[2]r(ur)-a[2]n(a[3]n)-o[2]sk(o[2]sch[2])'i[2]s-i[2]s, -o(o[3])-ski[2]z(sch[2]i[2]s)'ma[3]. Gen., *-schis'eos* (*-osch'isis*), *-schis'matos* (*-atis*). From οὐρανός, the palate, and σχίζειν, to cleave. See *Cleft* PALATE.

URANOSO-URANIC, adj. U[2]r-a[2]n-os"o-u[2]r-a[2]n'i[2]k. Containing uranium both as a tetrad and as a hexad radicle. [B.]

URANO-STAPHYLORRHAPHY, n. U[2]r"a[2]n-o-sta[2]f-i[2]l-o[2]r'a[2]f-i[2]. From οὐρανός, the palate, σταφυλή, the uvula, and ῥαφή, a suture. Suture of the hard and of the soft palate. [*a*, 34.]

URANOUS, adj. U[2]r'a[2]n-u[3]s. Fr., *uraneux.* Containing uranium as a tetrad radicle. [B.]

URANOXYD (Ger.), n. Ur-a[3]n'ox-u[6]d". Uranium trioxide; in composition with a qualifying adjective, a salt of uranyl. [B.]

URANOXYDUL (Ger.), n. Ur-a[3]n'ox-u[6]d-ul". Uranium dioxide; in composition with a qualifying adjective, a uranous oxysalt. [B.]

URANYL, n. U[2]r'a[2]n-i[2]l. Fr., *uranyle.* The dibasic radicle, UO_2'', supposed to be present in the uranic compounds. [B, 2, 3.]—**U. acetate.** A substance, $UO_2.(C_2H_3O_2)_2+H_2O$, proposed as a test for albumin. [B.]—**U. and ammonium carbonate.** A lemon-colored, crystalline salt. $UO_2CO_3.''(NH_4)_2CO_3$. [B, 3.]—**U. and ammonium phosphate.** A greenish-yellow substance, $UO_2.(NH_4).PO_4$, formed in one of the processes for the volumetric determination of phosphoric acid and also of uranium. [B, 3.]—**U. and calcium carbonate.** An apple-green substance, $UO_2CO_3\text{-}CaCO_3 + 10H_2O$, occurring native as a mineral. [B, 3.]—**U. and potassium carbonate.** A crystalline salt, $UO_2CO_3.2K_2CO_3$. [B, 3.]—**U. and potassium fluoride.** A body, $UO_2F_2.3KF$, forming lemon-colored crystals. [B, 3.]—**U. arsenate.** A compound of u. and arsenic acid. Salts of the constitution $(UO_2)_3.(AsO_4)_2 + 12H_2O$ and $(UO_2).HAsO_4 + 4H_2O$ are known. [B, 2, 3.]—**U. bromide.** A body, UO_2,Br_2, forming yellow acicular crystals. [B, 3.]—**U. carbonate.** A compound of u. and carbonic acid. Double carbonates of u. and the alkaline metals and earths are known. [B.]—**U. chloride.** A yellow crystalline mass, $UO_2.Cl_2$, or, combined with water of crystallization, $UO_2.Cl_2+H_2O$. It forms double salts with the chlorides of the alkaline metals and with the hydrochlorides of organic basic compounds. [B, 3.]—**U. disulphate.** See *U. pyrosulphate.*—**U. fluoride.** A light-colored amorphous mass, $UO_2.F_2$. It forms double salts with the fluorides of potassium, sodium, ammonium, and barium. [B, 3.]—**U. hydroxide.** A yellowish mass, $UO_2.(OH)_2+H_2O$. [B, 3.]—**U. nitrate.** A body, $UO_2(NO_3)_2+6H_2O$, forming prismatic crystals. [B, 3.]—**U. oxide.** See URANIUM *trioxide.*—**U. peruranate.** See URANIUM *tetroxide.*—**U. phosphate.** A compound of u. and phosphoric acid; the salt $UO_2.(H_2PO_4)_2+3H_2O$, or $2UO_2.(H_2PO_4)_2+3H_2O$, is known. [B, 3.]—**U. pyrosulphate.** A crystalline compound, $UO_2.S_2O_7$. [B, 3.]—**U. sulphate.** A substance, $UO_2.SO_4+3H_2O$, crystallizable with difficulty. It forms a green compound with sulphuric acid, $UO_2.SO_4+H_2SO_4$, and double sulphates with the alkaline metals. [B, 3.] See also *U. pyrosulphate.*—**U. sulphide.** The compound $UO_2.S$. [B, 3.]

URAPOSTEMA (Lat.), n. n. U[2]r(ur)-a[2]p(a[3]p)-o[2]st-em(am)'a[3]. Gen., *-em'atos* (*-atis*). From οὖρον, urine, and ἀπόστημα, an abscess. An abscess containing urine. [E.]

URARI, n. U[2]r-a[3]r'e. See CURARE.

URAROMA (Lat.), n. n. U[2]r(ur)-a[2]r(a[3]r)-om'a[3]. Gen., *-om'atos* (*-atis*). From οὖρον, urine, and ἄρωμα, a spice. Ger., *Harnarom.* A special musk-like odor said to have been observed in the urine of gouty persons and of some animals. [L, 50 (*a*, 14).]

URARTHRITIS (Lat.), n. f. U[2]r(ur)-a[3]rth-ri(re)'ti[2]s. Gen., *-thrit'idos* (*-idis*). From οὖρον, urine, and ἄρθρον, a joint. See ARTHRITIS *uratica.*

URATE, n. U[2]r'at. Lat., *uras.* Fr., *u.* Ger., *harnsaures Salz.* A salt of uric acid. [K.]

URATOSIS (Lat.), n. f. U[2]r(ur)-a[2]t(a[3]t)-os'i[2]s. Gen., *-os'eos* (*-is*). From *uras*, a urate. The precipitation of crystalline urates in the tissues or fluids of the body. [W. Roberts, "Brit. Med. Jour.," Nov. 22, 1890 (*a*, 34).]

URATURIA (Lat.), n. f. U[2]r(ur)-a[2]t(a[3]t)-u[2]r(ur)'i[2]-a[3]. From *uras*, a urate, and οὖρον, urine. Gen., *Uraturie.* An abnormal excretion of urates in the urine. [L, 50 (*a*, 14).]

URAWEL, n. A place in the Caucasus where there is an alkaline and ferruginous spring. [L, 57 (*a*, 14).]

URBALACONE (It.), n. Ur-ba[3]-la[3]-ko'na. A place in Corsica where there are hot sulphurous springs. [*a*, 14.]

URBANYA, n. U[6]r-ba[3]n-ya[3]. A place in the department of the Pyrénées-Orientales, France, where there is a chalybeate spring.

URBEROAGA DE ALZOLA (Sp.), n. Urb-ar-o-a[3]g'a[3] da a[3]l-th[2]o'la[3]. A place in Guipuzcoa, Spain, where there is a warm mineral spring. [L, 49, 57 (*a*, 14).]

URBEROAGA DE UBIELLA, n. Urb-ar-o-a[3]g'a[3] da Ub-e-e[2]l'ya[3]. A place in Biscay, Spain, where there is a warm saline spring. [L, 57 (*a*, 14).]

URBILD (Ger.), n. Ur'bi[2]ld. See ARCHETYPE.

URCEOLARIA (Lat.), n. f. U[5]rs(u[4]rk)-e[2]-o[2]l-ar(a[3]r)'i[2]-a[3]. From *urceolus*, a little pitcher. Fr., *urcéolaire.* Ger., *Krugflechte.* A genus of lichens. The *Urceolariaceæ* (*Urceolarieæ*, *Urceolarinæ*) are a subfamily of the *Lecanoreæ.* [*a*, 35.]—**U. esculenta.** A species used as food in northern Russia. [*a*, 35.]

URCEOLATE, adj. U[5]rs'e[2]-o[2]l-at. Lat., *urceolatus* (from *urceolus*, a little pitcher). Fr., *urcéolé.* Ger., *krugig.* Urn-shaped. [*a*, 35.]

URCEOLUS (Lat.), n. m. U[5]rs(u[4]rk)-e(e[2])'o[2]l-u[3]s(u[4]s). Dim. of *urceus*, a pitcher. Fr., *urcéole.* Ger., *Krug.* Any one of various urn-shaped parts (*e. g.*, the calyx-tube of roses or [De Candolle] the perigynium of the *Cariceæ*). [*a*, 35.]—**U. nectarifer.** Ger., *Honigkrug.* The urceolate (often nectariferous) perianth of *Mirabilis*, *Balanites*, etc. [*a*, 35.]

URDARM (Ger.), n. Ur'da[3]rm. See ARCHENTERON and BLASTOCŒLE.

UREA (Lat.), n. f. U[2]r(ur)-e(a)'a[3]. From οὖρον, urine. Fr., *urée.* Ger., *Harnstoff.* Carbamide, or carboxyldiamine, $CON_2H_4 = C\left\{\begin{matrix}O\\ NH_2)_2\end{matrix}\right.$ (or $H_2N-(CO)-NH_2$), the chief solid constituent of the urine and the principal excretory product containing nitrogen. It forms long, colorless, prismatic crystals, melting at 130° C., soluble in water and moderately soluble in alcohol. It acts as a base, forming addition compounds with acids and their salts and with metallic oxides. It is decomposed by heat and moisture, and more slowly by the action of an organized ferment (*Micrococcus ureæ*), into normal ammonium carbonate. This process takes place in the urine, constituting its so-called alkaline fermentation and giving to stale urine its peculiar strong ammoniacal odor. U. is also decomposed into cyanogen compounds (cyanuric acid and ammelide) by the action of dry heat. It is remarkable as being the first organic body that was prepared artificially, Wöhler having accomplished this in 1828 by making the isomeric cyanate of ammonium, and then transforming the latter into u. by evaporation. [B.]—**Mesoxalyl u.** See ALLOXAN.—**U. and mercury nitrate.** An addition compound of varying composition formed by the action of mercuric nitrate on u. [B.]—**U. argentic oxide.** Ger., *Harnstoffsilberoxyd.* A grayish granular substance, $2CO.N_2H_4.3Ag_2O$. [B.]—**U. cyanurate.** See TETRURET.—**U. hydrochloride.** A deliquescent crystalline mass, $CON_2H_4.HCl = H_2N-CO-NH_3Cl$, formed by the action of dry hydrochloric-acid gas on u. [B.]—**U. mercuric oxide.** Ger., *Harnstoffquecksilberoxyd.* 1. A white crystalline powder, $CON_2H_4.HgO$. 2. A gelatinous substance, $2CON_2H_4.3HgO$. 3. The compound $CON_2H_4.2HgO$. [B.]—**U. nitrate.** A substance, $CON_2H_4.HNO_3 = H_2N-(CO)-N_3HONO_2$, forming tabular crystals on the addition of nitric acid to a solution of u. (concentrated urine). [B.]—**U. oxalate.** A substance, $2CON_2H_4.H_2C_2O_4+2H_2O = H_2N-CO-NH_3.O.C_2O_2.O.H_3N-CO-NH_2+H_2O$, forming laminar crystals, and produced by the action of oxalic acid on a rather concentrated solution of u. [B.]—**U. sodiochloride.** A substance, $CON_2H_4.NaCl + H_2O$, obtained as a crystalline body by evaporating a solution containing both u. and sodium chloride urine. [B.]

URECCHYSIS (Lat.), n. f. U[2]r(ur)-e[2]k'ki[2]s(ch[2]u[6]s)-i[2]s. Gen., *-chys'eos* (*-ec'chysis*). From οὖρον, urine, and ἔκχυσις, a pouring out. Fr., *urecchyse.* Ger., *Harnergiessung.* Effusion of urine into the cellular tissue. [L, 50 (*a*, 14).]

URECHITES (Lat.), n. f. U[2]r(ur)-e[2]k(e[2]ch[2])'i[2]t-ez(as). A genus of West Indian and Mexican apocynaceous undershrubs. [*a*, 35.]—**U. suberecta.** The *Echites suberecta.* [*a*, 35.]

URECHITIN, n. U[2]r-e[2]k-it'i[2]n. From *urechites* (*q. v.*). A glucoside, $C_{28}H_{42}O_8 + XH_2O$, obtained by Bowrey from the leaves of *Urechites suberecta.* [B, 270 (*a*, 38).]

URECHITOXIN, n. U[2]r-e[2]k-i[2]-to[2]x'i[2]n. From *urechites* (*q. v.*), and τόξον, a bow. Of Bowrey, a glucoside obtained from the leaves of *Urechites suberecta.* [B, 270 (*a*, 38).]

UREDO (Lat.), n. f. U[2]r(ur)-ed(ad)'o. Gen., *-ed'inis.* From *urere*, to burn. Fr., *urédo.* Ger., *Schmierbrand* (3d def.). 1. Itching with a sensation of burning. 2. Urticaria. 3. The typical genus of the *Uredei* (of Fries, a subdivision of the *Uredinei*). The *Uredinaceæ* of Lindley are the *Coniomycetes* of Fries. The *Uredineæ* (Ger., *Uredineen*, *Rostpilze*), or *Uredinei* (Fr., *urédines*), are a division of the *Hypodermiæ*, parasitic as yellowish, brownish, or blackish spots (rusts) on the stems and leaves of various plants. Some of them are very destructive to crops (cf. *Corn*-MILDEW). [*a*, 35.]—**U. maydis.** See USTILAGO *maydis.*

UREDOSPORE, n. U[2]r-e[2]d'o-spor. From *uredo*, a blast, and σπόρος, a sowing. One of the yellowish spores (see under *Corn*-MILDEW) formed early in the season by the *Uredineæ.* U's are produced from a mycelium growing within a grass or other plant, on which they form rust-like spots. [*a*, 35.]

URÉE (Fr.), n. U[6]-ra. See UREA.

UREI (Ger.), n. Ur'i. See *Primitive* OVUM.

URELCOMA (Lat.), n. n. U[2]r(ur)-e[2]lk-om'a[3] Gen., *-om'atos* (*-atis*). Ger., *Harngeschwür.* An ulcer of the urinary passages. [*a*, 34.]

URELCOSIS (Lat.), n. f. U[2]r(ur)-e[2]lk-os'i[2]s. Gen., *-cos'eos* (*-is*). From οὖρον, urine, and ἕλκωσις, ulceration. Fr., *urelcose.* 1. Ulceration in the urinary tract. 2. Of Fuchs, any one of certain forms of ulceration, especially on the legs, supposed to be due to irregularities in the urinary secretion. [G, 5.]

UREMA (Lat.), n. n. U[2]r(ur)-em(am)'a[3]. Gen., *-em'atos* (*-atis*). Gr., οὔρημα (from οὖρον, urine). See URINE.

URÉMIE (Fr.), n. U[6]-ra-me. See URÆMIA.

URENA (Lat.), n. f. Ur-an'a[3]. Fr., *urène.* Indian mallow; a genus of tropical herbs and shrubs forming, with *Pavonia*, *Malvaviscus*, etc., a tribe (the *Ureneæ*) of the *Malvaceæ.* [*a*, 35.]—**U. heterophylla.** An Indian species. The root is used in snake-bites. [*a*, 35.]—**U. lobata.** A species found in southeastern Asia. The flowers are used as an emollient and expectorant, the leaves as a vulnerary, and the root as an oxytocic. [*a*, 35.]—**U. scabriuscula.** A shrub found from India to Brazil. The flowers are used as a pectoral, and the root and stem for flatulent colic. [*a*, 35.]

URENIUM (Lat.), n. n. U[2]r(ur)-en(an)'i[2]-u[3]m(u[4]m). See UREA.

URENS (Lat.), adj. U[2]r(ur)'e[2]nz(ans). Gen., *-en'tis.* From *urere*, to burn. Stinging, having stinging hairs. [*a*, 35.]

UREO-CARBONIC ACID, n. U[2]r-e"o-ka[3]rb-o[2]n'i[2]k. See ALLOPHANIC *acid.*

UREORRHŒA (Lat.), n. f. U^{2}r(ur)-e^2-o^{2}r-re'(ro^2'e^2)-a^3. From οὖρον, urine, and ῥοία, a flowing. Fr., *uréorrhée.* Excessive flow of urine, diabetes. [L, 50 (α, 14).]

URESIÆSTHESIS (Lat.), n. f. U^{2}r(ur)-e^{2}s(as)-i^2-e^{2}s(a^3-e^{2}s)-the(tha)'si^{2}s. Gen., *-thes'eos* (*-is*). From οὔρησις, urination, and αἴσθησις, sensation. Fr., *urésiœsthèse.* Ger., *Pisserigsein.* A persistent inclination to urinate. [L, 50 (α, 48).]

URESIS (Lat.), n. f. U^{2}r(ur)-e(a)'si^{2}s. Gen., *-es'eos* (*-is*). Gr., οὐρήσις (from οὐρεῖν, to urinate). Fr., *urèse.* See URINATION.

URETER (Lat.), n. m. U^{2}r(ur)-et(at)'u^{5}r(ar). Gen., *-er'os* (*-is*). Gr., οὐρητήρ. Fr., *urétère.* Ger., *Harnleiter.* The tube continuous with the pelvis of the kidney, which transports the urine to the b adder. It consists of an external fibrous, an internal mucous, and an intervening muscular coat, is about fifteen or sixteen inches in length, the size of a goose-quill, and descends beneath the peritonæum to the point of reflection of the posterior false ligament of the bladder, between the folds of which it passes to the side of the bladder along which it runs, and pierces it obliquely about an inch and a half to two inches posterior to the opening of the urethra. [L, 31, 142, 332.]

URETERALGIA (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-a^{2}lj(a^{3}lg)'-i^2-a^3. From οὐρητήρ, the ureter, and ἄλγος, pain. Fr., *urétéralgie.* Ger., *Harnleiterschmerz.* Pain in the ureter. [L, 50 (α, 14).]

URETERIC, adj. U^{2}r-e^{2}t-e^{2}r'i^{2}k. Fr., *urétérique, uretéral.* Ger., *uretrisch.* Pertaining to the ureters.

URETERITIS (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From οὐρητήρ, the ureter. Fr., *urétérite.* Ger., *Harnleiterentzündung.* Inflammation of the ureter. [α, 14.]

URETERODIALYSIS (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o-(o^3)-di(di^2)-a^{2}l(a^{3}l)'i^2(u^6)-si^{2}s. Gen., *-ys'eos* (*-al'ysis*). From οὐρητήρ, the ureter, and διάλυσις, dissolution. Fr., *urétérodialyse.* Ger., *Harnleiterverletzung.* Injury to or rupture of the ureter. [α, 14.]

URETEROLITHIASIS (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o(o^3)-li^{2}th i^2-a(a^3)'si^{2}s. Gen., *-as'eos* (*-is*). From οὐρητήρ, the ureter, and λιθίασις, lithiasis. Fr., *urétérolithiase.* The formation or presence of a calculus in the ureter. [L, 50 (α, 14).]

URETEROLYSIS (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o^{2}l'i^2(u^6)-si^{2}s. Gen., *-ys'eos* (*-ol'ysis*). From οὐρητήρ, the ureter, and λύσις, a loosing. Ger., *Harnleiterlähmung* (1st def.). 1. Paralysis of the ureter. [L, 50 (α, 14).] 2. See URETERODIALYSIS.

URETEROPHLEGMA (Lat.), n. n. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o-(o^3)-fle^{2}g'ma^3. Gen., *-phle'gmatos* (*-atis*). From οὐρητήρ, the ureter, and φλέγμα, phlegm. Fr., *urétérophlegme.* Ger., *Harnleiterverschleimung.* An accumulation of mucus in the ureter. [α, 14.]

URETEROPHLEGMASIA (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o(o^3)-fle^{2}g-maz(ma^{3}s)'i^2-a^3. From οὐρητήρ, the ureter, and φλεγμασία (see PHLEGMASIA). Fr., *urétérophlegmasie.* See URETERITIS.

URETEROPYOSIS (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o(o^3)-pi-(pu^6)-os'i^{2}s. Gen., *-os'eos* (*-is*). From οὐρητήρ, the ureter, and πύον, pus. Fr., *urétéropyose.* Ger., *Harnleitervereiterung.* Suppuration of the ureter. [L, 50 (α, 14).]

URETERORRHAGIA (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o^{2}r-raj(ra^{3}g)'i^2-a^3. From οὐρητήρ, the ureter, and ῥήγνυσθαι, to burst forth. Fr., *urétérorrhagia.* Ger., *Harnleiterblutung.* Hæmorrhage from the ureter. [L, 50 (α, 14).]

URETERORRHAPHY, n. U^{2}r-e^{2}t-e^{2}r-o^{2}r'ra^{2}f-i^2. From οὐρητήρ, the ureter, and ῥαφή, a suture. Suture of the ureter. [α, 34.]

URETEROSTEGNOSIS (Lat.), n. f. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o-(o^3)-ste^{2}g-nos'i^{2}s. Gen., *-nos'eos* (*-is*). From οὐρητήρ, the ureter, and στέγνωσις, stenosis. Fr., *urétérostegnose.* Stricture of the ureter. [L, 50 (α, 14).]

URETEROSTENOMA (Lat.), n. n. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o-(o^3)-ste^{2}n-om'a^3. Gen., *-om'atos* (*-atis*). From οὐρητήρ, the ureter, and στένωμα, a contraction. Fr., *urétérosténome.* Ger., *Harnleiterverengerung.* Contraction of the ureter. [L, 50 (α, 14).]

URETEROSTOMA (Lat.), n. n. U^{2}r(ur)-e^{2}t(at)-e^{2}r(ar)-o^{2}st'-o^{2}m-a^3. Gen., *-om'atos* (*-atis*). From οὐρητήρ, the ureter, and στόμα, the mouth. Fr., *urétérostome.* Ger., *Harnleitermündung.* The mouth of the ureter, either in the pelvis of the kidney or in the bladder. [L, 41. 50 (α, 14).]

URETEROTOMY, n. U^{2}r-e^{2}t-e^{2}r-o^{2}t'o^{2}m-i^2. From οὐρητήρ, the ureter, and τομή, a cutting. Fr., *urétérotomie.* Ger., *Harnleiterschnitt, Ureterotomie.* An incision into the ureter. [α, 14.]

URETERO-VAGINAL, adj. U^{2}r-e^{2}t''e^{2}r-o-va^{2}j'i^2-n'l. Pertaining to the ureter and the vagina.

URETERO-UTERINE, adj. U^{2}r-e^{2}t''e^{2}r-o-u^{2}t'e^{2}r-i^{2}n. Pertaining to the ureter and the uterus.

URETHANE, n. U^{2}r'e^{2}th-an. Lat., *urethanum.* Fr., *uréthane.* Ger., *Urethan.* 1. Of Dumas, ethyl carbamate, so called because regarded as a compound of urea with ethyl carbonate $[2CO.\left\{\begin{matrix}NH_2\\OC_2H_5\end{matrix}\right. = CON_2H_4.(C_2H_5)_2CO_3]$. It acts as a hypnotic. 2. Any one of the carbamates of a hydrocarbon radicle. [B.]—**Methyl u.** See METHYL *carbamate.*

URETHRA (Lat.), n. U^{2}r(ur)-eth(ath)'ra^3. Gr.. οὐρήθρα (from οὐρεῖν, to urinate). Fr., *urèthre, urètre.* Ger., *Harnröhre.* The tube, consisting of an internal mucous coat and an external coat made up of two layers of muscular fibres, the internal being longitudinal and the external circular, which serves for voiding the urine, and in the male sex for the ejaculation of the semen. In the adult male it is about 9 inches in length and forms a portion of the penis. It is divided into three portions: the prostatic, where it passes through the prostate gland; the membranous, or intermediate part; and the spongy, or that which is surrounded by erectile tissue (the corpus spongiosum). Its mucous lining is freely supplied, except near the meatus urinarius, with a large number of glands (glands of Littre) and pouch-like recesses. Into the prostatic portion the ejaculatory ducts open. Except during the passage of urine or semen it is collapsed, with its longest diameter directed transversely. In the female it is about 1½ inch in length, is highly distensible, and is lodged in the anterior wall of the vagina. [L, 31, 142, 172, 332.]—**Irritable u.** Hyperæsthesia or neuralgia of the u. [α, 34.]—**Penial u., Penile u.** That portion of the u. which is lodged within the penis.—**Posterior u.** See *Prevesical u.*—**Pouched u.** Of Fenwick, a sacculated u. ["Lancet," 1886, ii. p. 820 (α, 34).]—**Prevesical u., Prostatic u.** The prostatic portion of the u. (*q. v.*). [L.]—**Second u.** The deep part of the u.

URETHRÆMORRHAGIA (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-re^{2}m-(ra^3-e^{2}m)-o^{2}r-raj(ra^{3}g)'i^2-a^3. From οὐρήθρα, the urethra, αἷμα, blood, and ῥήγνυσθαι, to burst forth. Fr., *uréthrémorrhagie.* Ger., *Harnröhrenblutung.* Hæmorrhage from the urethra. [L, 50 (α, 14).]

URETHRAL, adj. U^{2}r-eth'r'l. Lat., *urethralis.* Fr., *uréthral, urétral.* Ger., *u.* Pertaining to, proceeding from, or affecting the urethra. [α, 17.]

URETHRALGIA (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ra^{2}lj(ra^{3}lg)'-i^2-a^3. From οὐρήθρα, the urethra, and ἄλγος, pain. Fr., *uréthralgie.* 1. Pain in the urethra. 2. Gonorrhœa. [L, 50, 57 (α, 14).]

URETHRALIS (Lat.), adj. U^{2}r(ur)-e^{2}th(ath)-ral(ra^{3}l)'i^{2}s. See URETHRAL; as a n. m., muscular fibres arching over and surrounding the membranous portion of the urethra. [L, 332.]

URETHRAMETER, n. U^{2}r-e^{2}th-ra^{2}m'e^{2}t-u^{5}r. See URETHROMETER.

URETHREMPHRAXIS (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-re^{2}m-fra^{2}x(fra^{3}x)'i^{2}s. Gen., *-phrax'eos* (*-is*). From οὐρήθρα, the urethra, and ἔμφραξις, a stopping. Ger., *Harnröhrenverstopfung.* Occlusion or obstruction of the urethra. [L, 41, 50 (α, 14).]

URETHREURYNTER (Lat.), n. m. U^{2}r(ur)-e^{2}th(ath)-ru^{2}r-i^{2}nt(u^{6}nt)'u^{5}r(ar). Gen., *-er'os* (*-is*). From οὐρήθρα, the urethra, and εὐρύνειν, to make wide. Fr., *uréthreuryntère.* Ger., *Harnröhrenausdehner.* A dilating bougie for the urethra. [L, 50 (α, 14).]

URETHRIPRESSOR [Coues] (Lat.), n. m. U^{2}r(ur)-eth(ath)''-ri^2-pre^{2}s'so^{2}r. Gen., *-sor'is.* From *urethra* (*q.v.*), and *premere*, to press. See CONSTRICTOR *urethræ.*

URETHRISMUS (Lat.), n. m. U^{2}r(ur)-e^{2}th(ath)-ri^{2}z(ri^{2}s)'mu^{3}s-(mu^{4}s). From οὐρήθρα, the urethra. Of Otis, spasm of the urethra.

URETHRITIS (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ri(re)'ti^{2}s. Gen., *-rit'idos* (*-idis*). From οὐρήθρα, the urethra. Fr., *uréthrite.* Ger., *Harnröhrenentzündung.* Inflammation of the urethra, usually gonorrhœa. [E; L, 50 (α, 14).]—**Posterior u., Prevesical u.** Inflammation of the prostatic urethra.—**Rheumatic u.** A form of u. occurring in rheumatism. accompanied by a discharge of purulent fluid and other symptoms common to gonorrhœa, but differing from it in the complete absence of gonococci. [Riel, "Lyon méd.," March 14, 21, 1886; "N. Y. Med. Jour.," July 10, 1886, p. 54 (α, 50).]—**U. anterior acuta.** Acute u. affecting the anterior portion of the urethra. [α, 34.]—**U. blennorrhoica.** See GLEET.—**U. catarrhalis.** Non-virulent gonorrhœa. [G.]—**U. chronica.** See GLEET.—**U. externa.** Of Guérin, a gonorrhœal affection of the follicles surrounding the meatus urinarius externus in either sex. [E. Ödmannsson, "Nord. med. Ark.," xvii, 5; "Ctrlbl. f. Chir.," Feb. 6. 1886, p. 89.]—**U. gonorrhoica.** See GONORRHŒA.—**U. granulosa.** Chronic u. accompanied with urethral granulations. [α, 34.]—**U. herpetica.** U. causing herpetic eruptions. [α, 34.]—**U. inflammatoria.** Acute u. [α, 34.]—**U. membranacea.** Chronic u. with a membranous formation in the urethra. [α, 34.]—**U. membranacea desquamativa.** Chronic u. with desquamation of the urethral mucous membrane. [α, 34.]—**U. phlyctænulosa.** Chronic u. with phlyctænulæ of the mucous membrane. [α. 34.]—**U. pyorrhoica.** U. with an abundant purulent discharge. [α, 34.]—**U. pyorrhoica contagiosa.** See GONORRHŒA.—**U. suppurativa.** See *U. pyorrhoica.*—**U. venerea.** See GONORRHŒA.

URETHRITOPROSTATITIS (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ri^{2}t(ret)'o(o^3)-pro^{2}s-ta^{2}t(ta^{3}t)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). Fr.. *uréthritoprostatite.* Prostatitis accompanying gonorrhœa. [α, 14.]

URETHRITORCHITIS (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ri^{2}t-(ret)''o^{2}rk(o^{2}rch^2)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). Orchitis complicating gonorrhœa. [L, 30, 50 (α, 14).]

URETHRITOSYPHILIS (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ri^{2}t-(ret)''o(o^3)-si^{2}f(su^{6}f)'i^{2}l-i^{2}s. Gen., *-il'idos* (*-idis*). Syphilis accompanied by gonorrhœa. [L, 30, 50 (α, 14).]

URETHROBLENNORRHŒA (Lat.), n. f. U^{2}r(ur)-e^{2}th-(ath)''ro(ro^3)-ble^{2}n-no^{2}r-re'(ro^2'e^2)-a^3. See GLEET.

URETHRO-BULBAR, adj. U^{2}r-eth''ro-bu^{3}lb'a^{3}r. Fr., *uréthro-bulbaire.* Pertaining to the bulb of the urethra. [L, 41 (α, 14).]

URETHROCATARRHUS (Lat.), n. m. U^{2}r(ur)-eth(ath)''ro-(ro^3)-ka^{2}t(ka^{3}t)-a^{2}r(a^{3}r)'ru^{3}s(ru^{4}s). From οὐρήθρα. the urethra, and καταῤῥοος, running down. Fr.. *uréthrocatarrhe.* Ger., *Harnröhrencatarrh.* Catarrh of the urethra. [L, 50 (α, 14).]

URETHROCELE (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ro(ro^3)-sel(kal)'-e(a); in Eng., u^{2}r-eth'ro-sel. Gen., *-cel'es.* From οὐρήθρα, the urethra. and κήλη. a tumor. Fr., *uréthrocèle.* A hernia-like protrusion of a dilated portion of the urethra (generally such a protrusion of the urethra into the vagina).

URETHROCYSTITIS (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)''ro(ro^3)-si^{2}st(ku^{6}st)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From οὐρήθρα, the urethra, and *cystitis* (*q. v.*). Cystitis associated with or consecutive upon urethritis. [α, 34.]

URETHROCYSTOPLYNON (Lat.), n. n. U^{2}r(ur)-eth(ath)''ro-(ro^3)-si^{2}st(ku^{6}st)-o^{2}p-lin(lu^{6}n)'o^{2}n. An instrument invented by A. Fischer for irrigation of the bladder and urethra; consisting of two catheters, one within the other, the inner one to convey the water

into the bladder and urethra, and the outer one to serve for its outflow. ["Ctrlbl. f. Chir.," July 22, 1882, p. 473.]

URETHROCYSTOTOME, n. U^{2}r-eth-ro-si^{2}st'o-tom. From οὐρήθρα, the urethra, κύστις, the bladder, and τέμνειν, to cut. An instrument for performing urethral cystotomy.

URETHRO-CYSTOTOMY, n. U^{2}r-eth"ro-si^{2}st-o^{2}t'om-i^2. Lat., *urethrocysteotomia*. Ger., *Harnröhrenblasenschnitt.* Urethral cystotomy.

URETHROGRAPH, n. U^{2}r-eth'ro-gra^{2}f. From οὐρήθρα, the urethra, and γράφειν, to write. An instrument devised by G. Herschell for detecting and recording variations in the calibre of the urethra, also their relative situation. ["Lancet," 1884, ii, p. 608.]

URETHROHÆMORRHAGIA (Lat.), n. f. U^{2}r-(ur)-eth(ath)"ro(ro^3)-he^{2}m(ha^3-e^{2}m)-o^{2}r-raj(ra^{3}g)'i^2-a^3. From οὐρήθρα, the urethra, αἷμα, blood, and ῥήγνυσθαι, to burst forth. See URETHRORRHAGIA (1st def.).

URETHROLAPAROCYSTIDOTOMIA (Lat.), n. f. U^{2}r(ur)-eth(ath)"ro(ro^3)-la^{2}p(la^{3}p)'"a^{2}r(a^{3}r)-o(o^3)-si^{2}st(ku^{6}st)-i^{2}d-o(o^3)-tom-(to^{2}m)'i^2-a^3. From οὐρήθρα, the urethra, λαπάρα, the flank, κύστις, the bladder, and τομή, a cutting. Fr., *uréthrolaparocystidotomie.* Combined lateral and suprapubic cystotomy. [L, 30, 50 (a, 14).]

URETHROMETER, n. U^{2}r-e^{2}th-ro^{2}m'e^{2}t-u^{6}r. From οὐρήθρα, the urethra, and μέτρον, a measure. Fr., *uréthromètre.* Ger., *U.*

OTIS'S URETHROMETER.

An instrument for measuring the calibre of the urethra.—**Otis's u.** A catheter, part of which consists of several sections which may be spread apart by a screw in the handle. The extent to which there can be separation in any part of the urethra is indicated by a gauge at the handle. [E.]

URÉTHROPATHE (Fr.), n. U^6-ra-tro-pa^{3}t. A person affected with a urethral disease.

URÉTHRO-PÉNIEN (Fr.), adj. U^6-ra-tro-pa-ne-a^{3}n^2. Involving the urethra and the exterior of the penis.

URETHROPHRAXIS (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ro(ro^3)-fra^{2}x(fra^{3}x)'i^{2}s. See URETHREMPHRAXIS.

URETHROPHYMA (Lat.), n. n. U^{2}r(ur)-e^{2}th(ath)-ro(ro^3)-fim-(fu^{6}m)'a^3. Gen., *-phym'atos (-atis).* From οὐρήθρα, the urethra, and φῦμα, a growth. Fr., *uréthrophyme.* Ger., *Harnröhrengeschwulst.* A swelling of a portion of the urethra. [L, 30, 50 (a, 14).]

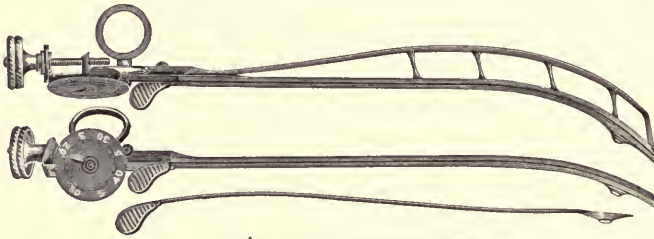
URETHROPISTHORRHEXIS (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ro(ro^3)-pi^{2}sth-o^{2}r-re^{2}x(rax)'i^{2}s. Gen., *-rhex'eos (-is).* From οὐρήθρα, the urethra, ὄπισθεν, behind, and ῥῆξις, a bursting. Fr., *uréthropisthorrhexis.* Rupture of the urethra behind a stricture. [A, 322.]

URETHROPLASTY, n. U^{2}r-eth'ro-pla^{2}st-i^2. Lat., *urethroplastica* (from οὐρήθρα, the urethra, and πλάσσειν, to mold). Fr., *uréthroplastie.* Ger., *Harnröhrenbildung, Urethroplastik.* The plastic surgery of the urethra. [E.]

URETHRORRHAGIA (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ro^{2}r-raj-(ra^{3}g)'i^2-a^3. From οὐρήθρα, the urethra, and ῥήγνυσθαι, to burst forth. Fr., *urétrorrhagie.* Ger., *Harnröhrenblutfluss* (1st def.). 1. Hæmorrhage from the urethra. 2. A discharge from he urethra ; gonorrhœa or gleet. [a, 34.]

URETHRORRHAPHY, n. U^{2}r-e^{2}th-ro^{2}r'a^{2}f-i^2. Lat., *urethrorrhaphia* (from οὐρήθρα, the urethra, and ῥαφή, a seam. Fr., *uréthrorrhaphie.* Ger., *Harnröhrennaht.* The operation of closing an abnormal opening into the urethra with sutures.

URETHRORRHŒA (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-ro^{2}r-re'-(ro^2'e^2)-a^3. From οὐρήθρα, the urethra, and ῥοία, a flowing. Fr., *uréthrorrhée.* Ger., *Harnröhrenfluss.* A morbid discharge from the urethra, especially gleet. [L, 30, 50 (a, 14).]



URETHROSCOPE, n. U^{2}r-eth'ro-skop. From οὐρήθρα, the urethra, and σκοπεῖν, to examine. Fr., *uréthroscope.* Ger., *Urethroskop.* A tubular or fenestrated instrument used to dilate the urethra to permit of examination of its lining membrane. [a, 34.]

URETHROSPASMUS (Lat.), n. m. U^{2}r(ur)-e^{2}th(ath)-ro(ro^3)-spa^{2}z(spa^{3}s)'mu^{3}s(mu^{4}s). From οὐρήθρα, the urethra, and σπασμός, a spasm. Fr., *uréthrospasme.* Ger., *Harnröhrenkrampf.* Spasmodic stricture of the urethra. [L, 57 (a, 50).]

URETHROSTENIA (Lat.), **URETHROSTENOSIS** (Lat.), n's f. U^{2}r(ur)-eth(ath)"ro(ro^3)-sten(ste^{2}n)'i^2-a^3, -ste^{2}n-os'i^{2}s. Gen., *-ste'niæ, -os'eos (-is).* From οὐρήθρα, the urethra, and στένειν, to straiten. Fr., *uréthrosténie, uréthrosténose.* Ger., *Harnröhrenverengerung.* Stricture of the urethra. [E.]

URETHROSYSTOLEUS (Lat.), n. m. U^{2}r(ur)-eth(ath)"ro-(ro^3)-si^{2}s(su^{6}s)-tol(to^{2}l)'e^2-u^{3}s(u^{4}s). From οὐρήθρα, the urethra, and συστολή, contraction. Fr., *uréthrosystolé.* Of Guthrie, the constrictor urethræ. [L, 30, 50 (a, 14).]

URETHROTOME, n. U^{2}r-eth'ro-tom. Lat., *urethrotomus* (from οὐρήθρα, the urethra, and τέμνειν, to cut). Fr., *uréthrotome.* Ger., *Harnröhrenmesser.* An instrument for dividing strictures of the urethra. [E.]—**Dilating u., Divulsing u.** 1. A combined dilator and u., the two blades of which can be separated equally along their entire length by a screw attachment at the handle, one of the blades carrying the knife in a groove. 2. A divulsor resembling Thompson's, but provided with a cutting blade. [E.]—**Gouley's tunneled u.** A tunneled sound with a convex cutting blade near the end which is guided by a filiform bougie running through the tunnel. [E.]—**Maisonneuve's u.** A tunneled sound carrying a small cutting blade at the end of a stylet which works

OTIS'S DILATING URETHROTOME.

forward or backward in the tunnel and groove. [E.]—**Ricord's u.** A director-like instrument that conceals a blade which can be extruded after the instrument is introduced into the urethra. [a, 34.]—**Voillemier's u.** A u. resembling Maisonneuve's, but with a blade of different shape and a screw-tip for a filiform bougie. [E.]

URÉTHROTOMIE (Fr.), n. U^6-ra-tro-to-me. See URETHROTOMY.—**U. d'emblée.** Perineal section for the purpose of searching for the proximal portion of a ruptured urethra. [P. Gueterbock (A, 319).]—**U. sur conducteur** (Fr.). See *External* URETHROTOMY *with a guide.*

URETHROTOMY, n. U^{2}r-e^{2}th-ro^{2}t'o^{2}m-i^2. Lat., *urethrotomia* (from οὐρήθρα, the urethra, and τομή, a cutting). Fr., *uréthrotomie.* Ger., *Urethrotomie.* The operation of dividing a stricture of the urethra. [E.]—**Cock's external u.** U. in which the perinæum is laid open without a guide, the stricture being impervious. [E.]—**External u.** The operation of dividing a stricture of the urethra by means of an incision through the perinæum. [E.]—**External u. with a guide.** External u. in which the stricture is divided on a grooved sound passed into the urethra. [a, 18.]—**External u. without a guide.** See *Cock's external u.*—**Internal u.** The operation of dividing a stricture of the urethra from within. [E.]—**Syme's external u.** U. in which the stricture is divided through the perinæum on a grooved director passed through the stricture. [E.]—**Wheelhouse's external u.** An operation in which the urethra is opened in front of the stricture and a grooved probe passed through it into the bladder before its division. [E.]

URETHRO-VAGINAL, adj. U^{2}r-eth"ro-va^{2}j'i^2-n'l. Pertaining to the urethra and the vagina. [a, 48.]

URETHRO-VESICAL, adj. U^{2}r-eth"ro-ve^{2}s'i^2-k'l. Pertaining to the urethra and the bladder. [a, 48.]

URETHRYMENIA (Lat.), n. f. U^{2}r(ur)-e^{2}th(ath)-rim(ru^{6}m)-en(e^{2}n)'i^2-a^3. From οὐρήθρα, the urethra, and ὑμήν, a membrane. Fr., *uréthryménie.* Partial or total occlusion of the urethra by a membranous formation. [L, 50 (a, 14).]

URETHYLANE, n. U^{2}r-e^{2}th'i^{2}l-an. Fr., *uréthylane.* Methyl carbamate. [B, 2, 93.]

URETIC, adj. U^{2}r-e^{2}t'i^{2}k. Gr., οὐρητικός (from οὖρον, urine). Lat., *ureticus.* Fr., *urétique.* 1. Pertaining to urine. 2. Diuretic. [L, 41, 50 (a, 14).]

URÈTRE (Fr.), n. U^{6}r-e^{2}tr'. See URETHRA.

URGINEA (Lat.), n. f. U^{6}rj(u^{4}rg)-i^{2}n'e^2-a^3. From *urgere*, to press. Fr., *urginée.* A genus of the *Liliaceæ.* [a, 35.]—**U. indica.** 1. An Indian and African species. Its tunicated bulb is used like squill, but is said to have little virtue when old and large. 2. A species indigenous to India and Abyssinia. Its bulb, which differs from that of the preceding in being scaly, resembles squill in properties. [a, 35.]—**U. maritima, U. scilla.** Fr., *scille maritime.* Ger., *gemeine Meerzwiebel.* Squill, sea-onion, the σκίλλα of the ancients ; indigenous to Mediterranean regions. The bulb, sliced and dried, official in the U. S. and Br. Ph's as *scilla*, abounds in an acrid and even corrosive juice. Squill is used as a diuretic, expectorant, emetic, and purgative. [a, 35.]

URHIDROSIS (Lat.), n. f. U^{2}r(ur)-hid(hed)-ros'i^{2}s. Gen., *-ros'eos (-is).* See URIDROSIS.

URIAGE (Fr.), n. U^{6}r-e-a^{3}zh. A place in the department of the Isère, France, where there is a warm saline and sulphurous spring. [L, 57 (a, 14).]

URIAS (Lat.), n. f. U^{2}r(ur)'i^2-a^{2}s(a^{3}s). Gen., *-i'ados (-adis).* Gr., οὐρίας (from οὖρον, urine). A urinary fistula. [L, 50 (a, 14).]

URIASIS (Lat.), n. f. U^{2}r(ur)-i(i^2)'a^{2}s(a^{3}s)-i^{2}s. Gen., *-as'eos (-i'asis).* See URINATION.

URIC, adj. U^{2}r'i^{2}k. Lat., *uricus* (from οὖρον, urine). Fr., *urique.* 1. Derived from or contained in the urine. [B.] 2. Due to the excessive production of u. acid (*e. g.*, arthritis urica).

URIC ACID, n. U^{2}r'i^{2}k. Fr., *acide urique.* Ger., *Harnsäure.* A feebly dibasic acid, $C_5H_4N_4O_3$, occurring in small quantities in the human urine and that of other mammals, and in large quantities in that of birds, amphibians, and some insects. It was first isolated by Scheele in 1776. It consists of a white, spongy powder, devoid of taste and odor, which under the microscope is seen to be constituted of rhombic tables or of elongated plates, often disposed in the form of sheaves or of rosettes. As deposited from the urine it has a more or less reddish tinge, due to the presence of urinary coloring matters. It is soluble in about 15,000 parts of water at 20° C., and in from 1,000 to 2,000 parts at 100° C., insoluble in alcohol, moderately soluble in glycerin (which, however, produces a change

in the form of its crystals), and when associated with lithium carbonate is rendered quite soluble in water, producing increased solubility in the lithium salt. [B, 3, 4.]
